(1) Financial Statement Presentation

The unaudited Consolidated Interim Financial Statements of TrustCo Bank Corp NY (the “Company” or “TrustCo”) include the accounts of the subsidiaries after elimination of all significant intercompany accounts and transactions. Prior period amounts are reclassified when necessary to conform to the current period presentation. The net income reported for the three months and nine months ended September 30, 2015 is not necessarily indicative of the results that may be expected for the year ending December 31, 2015, or any interim periods. These financial statements consider events that occurred through the date of filing.

In the opinion of the management of the Company, the accompanying unaudited Consolidated Interim Financial Statements contain all recurring adjustments necessary to present fairly the financial position as of September 30, 2015, the results of operations for the three months and nine months ended September 30, 2015 and 2014, and the cash flows for the nine months ended September 30, 2015 and 2014. The accompanying Consolidated Interim Financial Statements should be read in conjunction with the Company’s year-end Consolidated Financial Statements, including notes thereto, which are included in Company’s 2014 Annual Report on Form 10-K for the year ended December 31, 2014. The accompanying consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and, therefore, do not include all information and notes necessary for a complete presentation of financial position, results of operations and cash flow activity required in accordance with accounting principles generally accepted in the United States.

(2) Earnings Per Share

The Company computes earnings per share in accordance with Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 260, Earnings Per Share (“ASC 260”). TrustCo adopted FASB ASC 260-10 (“ASC 260-10”), Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities, which clarified that unvested share-based payment awards that contain nonforfeitable rights to receive dividends or dividend equivalents (whether paid or unpaid) are participating securities, and thus, should be included in the two-class method of computing earnings per share (“EPS”).

Participating securities under this statement include the unvested employees’ and directors’ restricted stock awards with time-based vesting, which received nonforfeitable dividend payments. These awards vested in November 2014 and as of September 30, 2015, the Company no longer has unvested restricted stock awards that were previously considered participating securities. As of September 30, 2015, there are no other awards that are considered participating securities.

Index

A reconciliation of the component parts of earnings per share for the three months and nine months ended September 30, 2015 and 2014 is as follows:

(In thousands except per share data)	For the three months ended September 30:		For the nine months ended September 30:	
	2015	2014	2015	2014
Net income	\$10,616	10,714	\$32,058	33,533
Less: Net income allocated to participating securities	-	12	-	38
Net income allocated to common shareholders	\$10,616	10,702	\$32,058	33,495
Basic EPS:				
Distributed earnings allocated to common stock	\$6,244	6,220	\$18,710	18,639
Undistributed earnings allocated to common stock	4,372	4,482	13,348	14,856
Net income allocated to common shareholders	\$10,616	10,702	\$32,058	33,495
Weighted average common shares outstanding including participating securities	95,149	94,734	95,051	94,668
Less: Participating securities	-	106	-	106
Weighted average common shares	95,149	94,628	95,051	94,562
Basic EPS	\$0.112	0.113	\$0.337	0.354
Diluted EPS:				
Net income allocated to common shareholders	\$10,616	10,702	\$32,058	33,495
Weighted average common shares for basic EPS	95,149	94,628	95,051	94,562
Effect of Dilutive Securities:				
Stock Options	85	124	116	123
Weighted average common shares including potential dilutive shares	95,234	94,752	95,167	94,685
Diluted EPS	\$0.111	0.113	\$0.337	0.354

For both the three and nine months ended September 30, 2015, the weighted average number of antidilutive stock options excluded from diluted earnings per share was approximately 1.4 million. For both the three and nine months ended September 30, 2014 the weighted average number of antidilutive stock options excluded from diluted earnings per share was approximately 2.4 million. The stock options are antidilutive because the strike price is greater than the average fair value of the Company's common stock for the periods presented.

Index

(3) Benefit Plans

The table below outlines the components of the Company's net periodic benefit recognized during the three and nine months ended September 30, 2015 and 2014 for its pension and other postretirement benefit plans:

(dollars in thousands)	For the three months ended September 30,			
	Pension Benefits		Other Postretirement Benefits	
	2015	2014	2015	2014
Service cost	\$ 15	8	47	46
Interest cost	337	359	72	99
Expected return on plan assets	(684)	(660)	(182)	(166)
Amortization of net loss (gain)	77	-	(34)	(77)
Amortization of prior service cost	-	-	23	239
Net periodic benefit	\$(255)	(293)	(74)	141

(dollars in thousands)	For the nine months ended September 30,			
	Pension Benefits		Other Postretirement Benefits	
	2015	2014	2015	2014
Service cost	\$45	44	125	75
Interest cost	997	1,031	201	163
Expected return on plan assets	(2,052)	(1,878)	(543)	(504)
Amortization of net loss (gain)	158	-	(105)	(223)
Amortization of prior service cost	-	-	68	149
Net periodic benefit	\$(852)	(803)	(254)	(340)

The Company previously disclosed in its consolidated financial statements for the year ended December 31, 2014, that it did not expect to make contributions to its pension and postretirement benefit plans in 2015. As of September 30, 2015, no contributions have been made, however, this decision is reviewed each quarter and is subject to change based upon market conditions.

Since 2003, the Company has not subsidized retiree medical insurance premiums. However, it continues to provide postretirement medical benefits to a limited number of current and retired executives in accordance with the terms of their employment contracts.

Index

The following table distributes the debt securities included in the available for sale portfolio as of September 30, 2015, based on the securities' final maturities (mortgage backed securities and collateralized mortgage obligations are stated using an estimated average life):

(dollars in thousands)	Amortized Cost	Fair Value
Due in one year or less	\$ 2,459	2,452
Due in one year through five years	317,594	318,781
Due after five years through ten years	305,162	303,261
Due after ten years	18	18
	\$ 625,233	624,512

Actual maturities may differ from the above because of securities prepayments and the right of certain issuers to call or prepay their obligations without penalty.

Gross unrealized losses on securities available for sale and the related fair values aggregated by the length of time that individual securities have been in an unrealized loss position, were as follows:

(dollars in thousands)	September 30, 2015					
	Less than 12 months		12 months or more		Total	
	Fair Value	Gross Unreal. Loss	Fair Value	Gross Unreal. Loss	Fair Value	Gross Unreal. Loss

Index

The proceeds from sales and calls of securities available for sale, gross realized gains and gross realized losses from sales and calls during the three and nine months ended September 30, 2015 and 2014 are as follows:

(dollars in thousands)	Three months ended September		Nine months ended	
	30, 2015	2014	September 30, 2015	2014
Proceeds from sales	\$-	42,228	\$22,945	42,228
Proceeds from calls	107,777	45,648	166,348	226,271
Gross realized gains	-	376	249	382
Gross realized losses	-	-	-	-

For the three months ended September 30, 2014, income tax expense recognized on net gains on sales of securities available for sale were approximately \$151 thousand. Income tax expense recognized on net gains on sales of securities available for sale were approximately \$100 thousand and \$153 thousand for the nine months ended September 30, 2015 and 2014, respectively.

(b) Held to maturity securities

The amortized cost and fair value of the held to maturity securities are as follows:

(dollars in thousands)	September 30, 2015			
	Amortized Cost	Gross Unrecognized Gains	Gross Unrecognized Losses	Fair Value
Mortgage backed securities and collateralized mortgage obligations - residential	\$50,027	3,088	-	53,115
Corporate bonds	9,971	810	-	10,781
Total held to maturity	\$59,998	3,898	-	63,896

(dollars in thousands)	December 31, 2014			
	Amortized Cost	Gross Unrecognized Gains	Gross Unrecognized Losses	Fair Value
Mortgage backed securities and collateralized mortgage obligations - residential	\$60,986	3,334	-	64,320
Corporate bonds	9,960	1,062	-	11,022
Total held to maturity	\$70,946	4,396	-	75,342

The following table distributes the debt securities included in the held to maturity portfolio as of September 30, 2015, based on the securities' final maturity (mortgage backed securities and collateralized mortgage obligations are stated using an estimated average life):

(dollars in thousands)	Amortized Cost	Fair Value
Due in one year or less	\$ -	-
Due in one year through five years	59,998	63,896

Due in five years through ten years	-	-
	\$ 59,998	63,896

Index

Actual maturities may differ from the above because of securities prepayments and the right of certain issuers to call or prepay their obligations without penalty.

There were no held to maturity securities in an unrecognized loss position as of September 30, 2015 or December 31, 2014.

There were no sales or transfers of held to maturity securities during the three and nine months ended September 30, 2015 and 2014.

(c) Other-Than-Temporary Impairment

Management evaluates securities for other-than-temporary impairment (“OTTI”) at least on a quarterly basis, and more frequently when economic or market conditions warrant such an evaluation. The investment securities portfolio is evaluated for OTTI by segregating the portfolio by type and applying the appropriate OTTI model. Investment securities classified as available for sale or held to maturity are generally evaluated for OTTI under ASC 320 “Investments – Debt and Equity Securities.”

In determining OTTI under the FASB ASC 320 model, management considers many factors, including: (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, (3) whether the market decline was affected by macroeconomic conditions, and (4) whether the Company has the intent to sell the debt security or more likely than not will be required to sell the debt security before its anticipated recovery. The assessment of whether any other-than-temporary decline exists involves a high degree of subjectivity and judgment and is based on the information available to management at a point in time.

When OTTI occurs, the amount of the OTTI recognized in earnings depends on whether management intends to sell the security or it is more likely than not it will be required to sell the security before recovery of its amortized cost basis. If management intends to sell or it is more likely than not it will be required to sell the security before recovery of its amortized cost basis, the OTTI shall be recognized in earnings equal to the entire difference between the investment’s amortized cost basis and its fair value at the balance sheet date. If management does not intend to sell the security and it is not more likely than not that the entity will be required to sell the security before recovery of its amortized cost basis, the OTTI on debt securities shall be separated into the amount representing the credit loss and the amount related to all other factors. The amount of the total OTTI related to the credit loss is determined based on the present value of cash flows expected to be collected and is recognized in earnings. The amount of the total OTTI related to other factors is recognized in other comprehensive income, net of applicable taxes. The previous amortized cost basis less the OTTI recognized in earnings becomes the new amortized cost basis of the investment.

As of September 30, 2015, the Company’s security portfolio included certain securities which were in an unrealized loss position, and are discussed below.

U.S. government sponsored enterprises

In the case of unrealized losses on U.S. government sponsored enterprises, because the decline in fair value is attributable to changes in interest rates, and not credit quality, and because the Company does not have the intent to sell these securities and it is likely that it will not be required to sell the securities before their anticipated recovery, the Company does not consider these securities to be other-than-temporarily impaired at September 30, 2015.

Index

Mortgage backed securities and collateralized mortgage obligations - residential

All of the mortgage backed securities and collateralized mortgage obligations held by the Company were issued by U.S. government sponsored entities and agencies, primarily Ginnie Mae, Fannie Mae and Freddie Mac, which are institutions the government has affirmed its commitment to support. Because the decline in fair value is attributable to changes in interest rates, and not credit quality, and because the Company does not have the intent to sell these securities and it is likely that it will not be required to sell the securities before their anticipated recovery, the Company does not consider these securities to be other-than-temporarily impaired at September 30, 2015.

Small Business Administration (SBA) - guaranteed participation securities

All of the SBA securities held by the Company were issued and guaranteed by U.S. Small Business Administration. Because the decline in fair value is attributable to changes in interest rates, and not credit quality, and because the Company does not have the intent to sell these securities and it is likely that it will not be required to sell the securities before their anticipated recovery, the Company does not consider these securities to be other-than-temporarily impaired at September 30, 2015.

Mortgage backed securities and collateralized mortgage obligations – commercial

All of the mortgage backed securities and collateralized mortgage obligations held by the Company were issued by U.S. government-sponsored entities and agencies, are current as to the payment of interest and principal and the Company expects to collect the full amount of the principal and interest payments. Because the decline in fair value is attributable to changes in interest rates, and not credit quality, and because the Company does not have the intent to sell these securities and it is likely that it will not be required to sell the securities before their anticipated recovery, the Company does not consider these securities to be other-than-temporarily impaired at September 30, 2015.

As a result of the above analysis, during the three and nine months ended September 30, 2015, the Company did not recognize any other-than-temporary impairment losses for credit or any other reason.

*Includes New York, New Jersey, Vermont and Massachusetts

At September 30, 2015 and December 31, 2014, the Company had approximately \$28.3 million and \$38.5 million of real estate construction loans, respectively. Of the \$28.3 million in real estate construction loans at September 30, 2015, approximately \$12.0 million are secured by first mortgages to residential borrowers while approximately \$16.3 million were to commercial borrowers for residential construction projects. Of the \$38.5 million in real estate construction loans at December 31, 2014, approximately \$17.6 million are secured by first mortgages to residential borrowers while approximately \$20.9 million were to commercial borrowers for residential construction projects. The vast majority of construction loans are in the Company's New York market.

TrustCo lends in the geographic territory of its branch locations in New York, Florida, Massachusetts, New Jersey and Vermont. Although the loan portfolio is diversified, a portion of its debtors' ability to repay depends significantly on

the economic conditions prevailing in the respective geographic territory.

Index

The Company has identified non-accrual commercial and commercial real estate loans, as well as all loans restructured under a troubled debt restructuring (“TDR”), as impaired loans. A loan is considered impaired when it is probable that the borrower will be unable to repay the loan according to the original contractual terms of the loan agreement or the loan is restructured as a TDR.

The following tables present the balance in the allowance for loan losses and the recorded investment in loans by portfolio segment and based on impairment method as of September 30, 2015 and December 31, 2014:

	September 30, 2015

A loan for which the terms have been modified, and for which the borrower is experiencing financial difficulties, is considered a TDR and is classified as impaired. TDR’s at September 30, 2015 and December 31, 2014 are measured at

the present value of estimated future cash flows using the loan's effective rate at inception or the fair value of the underlying collateral if the loan is considered collateral dependent.

The Company has not committed to lend additional amounts to customers with outstanding loans that are classified as impaired. Interest income recognized on impaired loans was not material during the three and nine months ended

September 30, 2015 and 2014.

As of September 30, 2015 and December 31, 2014 impaired loans included approximately \$11.2 million and \$9.9 million of 1 to 4 family residential real estate loans in accruing status that were identified as TDR's in accordance with regulatory guidance related to Chapter 7 bankruptcy loans.

24

Index

Management evaluates impairment on impaired loans on a quarterly basis. If, during this evaluation, impairment of the loan is identified, a charge off is taken at that time. As a result, as of September 30, 2015 and December 31, 2014, based upon management's evaluation and due to the sufficiency of chargeoffs taken, none of the allowance for loan losses has been allocated to a specific impaired loan(s).

The following table presents, by class, loans that were modified as TDR's:

New York and other states*: (dollars in thousands)	Three months ended 9/30/2015			Three months ended 9/30/2014

The addition of these TDR's did not have a significant impact on the allowance for loan losses.

In situations where the Bank considers a loan modification, management determines whether the borrower is experiencing financial difficulty by performing an evaluation of the probability that the borrower will be in payment default on any of its debt in the foreseeable future without the modification. This evaluation is performed under the Company's underwriting policy.

Generally, the modification of the terms of loans was the result of the borrower filing for bankruptcy protection. Chapter 13 bankruptcies generally include the deferral of all past due amounts for a period of generally 60 months in accordance with the bankruptcy court order. In the case of Chapter 7 bankruptcies, as previously noted, even though there is no modification of terms, the borrowers' debt to the Company was discharged and they did not reaffirm the debt.

Index

A loan is considered to be in payment default once it is 90 days contractually past due under the modified terms. In situations involving a borrower filing for Chapter 13 bankruptcy protection, however, a loan is considered to be in payment default once it is 30 days contractually past due, consistent with the treatment by the bankruptcy court.

The following table presents, by class, TDR's that defaulted during the three and nine months ended September 30, 2015 and 2014 which had been modified within the last twelve months:

	Three months ended 9/30/2015	Three months ended 9/30/2014

Real estate mortgage - 1 to 4 family: First mortgages	- \$ -	1 \$ 60
Home equity lines of credit	1 \$ 50	1 \$ 279
Total	1 \$ 50	2 \$ 339

The TDR's that subsequently defaulted described above did not have a material impact on the allowance for loan losses.

The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt, such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. On at least an annual basis, the Company's loan grading process analyzes non-homogeneous loans, such as commercial and commercial real estate loans, individually by grading the loans based on credit risk. Homogeneous loans, such as residential 1-to-4 family loans and installment loans, are also assigned loan grades based primarily on the delinquent status of the loan. The loan grades assigned to all loan types are tested by the Company's internal loan review department in accordance with the Company's internal loan review policy.

Index

The Company uses the following definitions for classified loans:

Special Mention: Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the Company's credit position at some future date.

Substandard: Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans classified as such have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected.

Doubtful: Loans classified as doubtful have all the weaknesses inherent in those loans classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. All doubtful loans are considered impaired.

Loans not meeting the criteria above that are analyzed individually as part of the above described process are considered to be "satisfactory" or "pass" rated loans.

Index

As of September 30, 2015 and December 31, 2014, and based on the most recent analysis performed, the risk category of loans by class of loans is as follows:

Index

Included in classified loans in the above tables are impaired loans of \$3.7 million and \$4.1 million at September 30, 2015 and December 31, 2014, respectively.

For homogeneous loan pools, such as residential mortgages, home equity lines of credit, and installment loans, the Company uses payment status to identify the credit risk in these loan portfolios. Payment status is reviewed on a daily basis by the Bank's collection area and on a monthly basis with respect to determining the adequacy of the allowance for loan losses. The payment status of these homogeneous pools as of September 30, 2015 and December 31, 2014 is included in the aging of the recorded investment of past due loans table. In addition, the total nonperforming portion of these homogeneous loan pools as of September 30, 2015 and December 31, 2014 is presented in the non-accrual loans table.

(6) Fair Value of Financial Instruments

Fair value measurements (ASC 820) defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair values:

Level 1 – Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity can access as of the measurement date.

Level 2 – Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3 – Significant unobservable inputs that reflect a company's own assumptions about the value that market participants would use in pricing an asset or liability.

The Company used the following methods and significant assumptions to estimate the fair value of assets and liabilities:

Securities Available for Sale: The fair value of securities available for sale is determined utilizing an independent pricing service for identical assets or significantly similar securities. The pricing service uses a variety of techniques to arrive at fair value including market maker bids, quotes and pricing models. Inputs to the pricing models include recent trades, benchmark interest rates, spreads and actual and projected cash flows. This results in a Level 2 classification of the inputs for determining fair value. Interest and dividend income is recorded on the accrual method and is included in the Consolidated Statements of Income in the respective investment class under total interest and dividend income. Also classified as available for sale securities, the fair value of equity securities is determined by quoted market prices and these are designated as Level 1. The Company does not have any securities that would be designated as level 3.

Other Real Estate Owned: Assets acquired through loan foreclosure are initially recorded at fair value less costs to sell when acquired, establishing a new cost basis. These assets are subsequently accounted for at lower of cost or fair value less estimated costs to sell. Fair value is commonly based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process to adjust for differences between the comparable sales and income data available. This results in a Level 3 classification of the inputs for determining fair value.

Index

Impaired Loans: At the time a loan is considered impaired, it is valued at the lower of cost or fair value. Impaired loans carried at fair value generally have had a chargeoff through the allowance for loan losses. For collateral dependent loans, fair value is commonly based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process to adjust for differences between the comparable sales and income data available. Such adjustments may be significant and typically result in a Level 3 classification of the inputs for determining fair value. When obtained, non-real estate collateral may be valued using an appraisal, net book value per the borrower's financial statements, or aging reports, adjusted or discounted based on management's historical knowledge, changes in market conditions from the time of the valuation, and management's expertise and knowledge of the client and client's business, resulting in a Level 3 fair value classification. Impaired loans are evaluated on a quarterly basis for additional impairment and adjusted accordingly.

Indications of value for both collateral-dependent impaired loans and other real estate owned are obtained from third party providers or the Company's internal Appraisal Department. All indications of value are reviewed for reasonableness by a member of the Appraisal Department for the assumptions and approaches utilized in the appraisal as well as the overall resulting fair value via comparison with independent data sources such as recent market data or industry-wide statistics.

Assets and liabilities measured at fair value under ASC 820 on a recurring basis are summarized below:

Index

Other real estate owned, which is carried at fair value less costs to sell, approximated \$5.9 million at September 30, 2015 and consisted of \$2.3 million of commercial real estate and \$3.6 million of residential real estate properties. Valuation charges of \$431 thousand and \$781 thousand are included in earnings for the three and nine months ended September 30, 2015, respectively.

Of the total impaired loans of \$27.1 million at September 30, 2015, \$743 thousand are collateral dependent and are carried at fair value measured on a non-recurring basis. Due to the sufficiency of charge offs taken on these loans and the adequacy of the underlying collateral, there were no specific valuation allowances for these loans at September 30, 2015. There were no gross charge offs related to commercial impaired loans included in the table above for the three months ended September 30, 2015. Gross charge offs related to commercial impaired loans included in the table above were \$80 thousand for the nine months ended September 30, 2015, while gross charge offs related to residential impaired loans included in the table above amounted to \$88 thousand and \$131 thousand for the three and nine months ended September 30, 2015, respectively.

Other real estate owned, which is carried at fair value less costs to sell, approximates \$6.4 million at December 31, 2014 and consisted of \$2.2 million of commercial real estate and \$4.2 million of residential real estate properties. A valuation charge of \$2.0 million is included in earnings for the year ended December 31, 2014.

Of the total impaired loans of \$26.5 million at December 31, 2014, \$3.6 million are collateral dependent and are carried at fair value measured on a non-recurring basis. Due to the sufficiency of charge offs taken on these loans and the adequacy of the underlying collateral, there were no specific valuation allowances for these loans at December 31, 2014. Gross charge offs related to commercial impaired loans included in the table above were \$17 thousand for the year ended December 31, 2014, while gross charge offs related to residential impaired loans included in the table above amounted to \$349 thousand.

Index

In accordance with ASC 825, the carrying amounts and estimated fair values of financial instruments, at September 30, 2015 and December 31, 2014 are as follows:

The specific estimation methods and assumptions used can have a substantial impact on the resulting fair values of financial instruments. The following is a brief summary of the significant methods and assumptions used in estimating fair values:

Cash and Cash Equivalents

The carrying values of these financial instruments approximate fair values and are classified as Level 1.

Federal Reserve Bank and Federal Home Loan Bank stock

It is not practical to determine the fair value of Federal Reserve Bank and Federal Home Loan Bank stock due to their restrictive nature.

Securities Held to Maturity

Similar to securities available for sale described previously, the fair value of securities held to maturity are determined utilizing an independent pricing service for identical assets or significantly similar securities. The pricing service uses a variety of techniques to arrive at fair value including market maker bids, quotes and pricing models. Inputs to the pricing models include recent trades, benchmark interest rates, spreads and actual and projected cash flows. This results in a Level 2 classification of the inputs for determining fair value. Interest and dividend income is recorded on the accrual method and included in the Consolidated Statements of Income in the respective investment class under total interest and dividend income. The Company does not have any securities that would be designated as Level 3.

Index

Loans

The fair values of all loans are estimated using discounted cash flow analyses with discount rates equal to the interest rates currently being offered for loans with similar terms to borrowers of similar credit quality resulting in a Level 3 classification. Impaired loans are valued at the lower of cost or fair value as described previously. The methods utilized to estimate the fair value of loans do not necessarily represent an exit price.

Deposit Liabilities

The fair values disclosed for noninterest bearing demand deposits, interest bearing checking accounts, savings accounts, and money market accounts are, by definition, equal to the amount payable on demand at the balance sheet date resulting in a Level 1 classification. The carrying value of all variable rate certificates of deposit approximates fair value resulting in a Level 2 classification. The fair value of fixed rate certificates of deposit is estimated using discounted cash flow analyses with discount rates equal to the interest rates currently being offered on certificates of similar size and remaining maturity resulting in a Level 2 classification.

Accrued Interest Receivable/Payable

The carrying amounts of accrued interest approximate fair value resulting in a Level 1, Level 2 or Level 3 classification consistent with the asset or liability that they are associated with.

Short-Term Borrowings and Other Financial Instruments

The fair value of all short-term borrowings, and other financial instruments approximates the carrying value resulting in a Level 2 classification.

Financial Instruments with Off-Balance Sheet Risk

The Company is a party to financial instruments with off-balance sheet risk. Such financial instruments consist of commitments to extend financing and standby letters of credit. If the commitments are exercised by the prospective borrowers, these financial instruments will become interest earning assets of the Company. If the commitments expire, the Company retains any fees paid by the prospective borrower. The fair value of commitments is estimated based upon fees currently charged to enter into similar agreements, taking into consideration the remaining terms of the agreements and the present creditworthiness of the borrower. For fixed rate commitments, the fair value estimation takes into consideration an interest rate risk factor. The fair value of these off-balance sheet items approximates the recorded amounts of the related fees, which are considered to be immaterial.

The Company does not engage in activities involving interest rate swaps, forward placement contracts, or any other instruments commonly referred to as derivatives.

(8) Agreement with the Office of the Comptroller of the Currency

On July 21, 2015 Trustco Bank (the “Bank”), the wholly owned subsidiary of TrustCo Bank Corp NY, entered into a formal agreement (the “Agreement”) with the Comptroller of the Currency of the United States (the “OCC”). The Agreement relates to the findings of the OCC following an examination of the Bank.

The Agreement requires the Bank to take various actions, within prescribed time frames, with respect to certain areas of the Bank. These include, among others, (i) establishment of a committee of at least three Directors to monitor and coordinate the Bank’s response to the Agreement; (ii) adoption of compliance plans to respond to the Agreement with the assistance of an independent qualified consultant; (iii) evaluation and implementation of improvements in corporate governance with the assistance of an independent qualified consultant; (iv) evaluation and implementation of improvements in internal audit; (v) development of a strategic plan; (vi) development of a revised capital plan consistent with the strategic plan; (vii) development and implementation of improvements to the Bank’s loan review system; and (viii) such other necessary steps to address the issues and questions noted by the OCC in the Agreement.

(9) New Accounting Pronouncements

In January 2014, the FASB amended existing guidance to clarify when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan such that the loan should be derecognized and the real estate recognized. These amendments clarify that an in substance repossession or foreclosure occurs, and a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either: (1) the creditor obtaining legal title to the residential real estate property upon completion of a foreclosure, or (2) the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. Additional disclosures are required. These amendments are effective for public business entities for annual periods and interim periods within those annual periods beginning after December 15, 2014. The adoption of this standard did not have a material effect on the Company’s operating results or financial condition, but new disclosures were added.

Accounting Standards Update (“ASU”) 2014-09, “Revenue from Contracts with Customers (Topic 606)” implements a common revenue standard that clarifies the principles for recognizing revenue. The core principle of ASU 2014-09 is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve that core principle, an entity should apply the following steps: (i) identify the contract(s) with a customer, (ii) identify the performance obligations in the contract, (iii) determine the transaction price, (iv) allocate the transaction price to the performance obligations in the contract and (v) recognize revenue when (or as) the entity satisfies a performance obligation. In July 2015, FASB deferred the effective date of the ASU by one year which means ASU 2014-09 will be effective for the Company on January 1, 2018. The Company is currently evaluating the potential impact of ASU 2014-09 on its consolidated financial statements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders
TrustCo Bank Corp NY
Glenville, New York

We have reviewed the accompanying consolidated statements of financial condition of TrustCo Bank Corp NY as of September 30, 2015, the related consolidated statements of income and comprehensive income for the three-month and nine-month periods ended September 30, 2015 and 2014, and the related changes in shareholders' equity and cash flows for the nine-month periods ended September 30, 2015 and 2014. These interim financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the accompanying interim financial statements for them to be in conformity with U.S. generally accepted accounting principles.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-looking Statements

Statements included in this report and in future filings by TrustCo Bank Corp NY (“TrustCo” or the “Company”) with the Securities and Exchange Commission, in TrustCo’s press releases, and in oral statements made with the approval of an authorized executive officer, which are not historical or current facts, are “forward-looking statements” made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, and are subject to certain risks and uncertainties that could cause actual results to differ materially from historical earnings and those presently anticipated or projected. Forward-looking statements can be identified by the use of such words as may, will, should, could, would, estimate, project, believe, intend, anticipate, plan, seek, expect and similar expressions. Examples of forward-looking statements include, among others, statements TrustCo makes regarding its expectations for complying with the new regulatory capital rules, costs associated with the Formal Agreement that the Company’s subsidiary, Trustco Bank (or the “Bank”) has entered into with the Office of the Comptroller of the Currency (“OCC”), the profitability of growth of the Company’s balance sheet, the ability of its loan products to continue to attract customers if long-term rates rise and the ability to secure new sources of liquidity should the need arise. TrustCo wishes to caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made.

In addition to factors described under Part II, Item 1A, Risk Factors, if any, and under the Risk Factor discussion in TrustCo’s Annual Report on Form 10-K for the year ended December 31, 2014 and in its Quarterly Report on Form 10-Q for the quarter ended June 30, 2015, the following important factors, among others, in some cases have affected and in the future could affect TrustCo’s actual results, and could cause TrustCo’s actual financial performance to differ materially from that expressed in any forward-looking statement:

TrustCo’s ability to continue to originate a significant volume of one-to-four family mortgage loans in its market areas;

TrustCo’s ability to continue to maintain noninterest expense and other overhead costs at reasonable levels relative to income;

TrustCo’s ability to comply with the Formal Agreement entered into with Trustco Bank’s regulator, the OCC, and potential regulatory actions if TrustCo or Trustco Bank fails to comply;

Restrictions or conditions imposed by TrustCo’s and Trustco Bank’s regulators on their operations that may make it more difficult to achieve TrustCo’s and Trustco Bank’s goals;

the future earnings and capital levels of TrustCo and Trustco Bank and the continued receipt of approvals from TrustCo’s and Trustco Bank’s primary federal banking regulators to distribute capital from Trustco Bank to TrustCo, which could affect the ability of TrustCo to pay dividends;

TrustCo’s ability to make accurate assumptions and judgments regarding the credit risks associated with its lending and investing activities, including changes in the level and direction of loan delinquencies and charge-offs, changes in property values, and changes in estimates of the adequacy of the allowance for loan losses;

the effects of and changes in, trade, monetary and fiscal policies and laws, including interest rate policies of the Board of Governors of the Federal Reserve System, inflation, interest rates, market and monetary fluctuations;

Index

the perceived overall value of TrustCo's products and services by users, including the features, pricing and quality compared to competitors' products and services and the willingness of current and prospective customers to substitute competitors' products and services for TrustCo's products and services;

the effect of changes in financial services laws and regulations (including laws concerning taxation, banking and securities) and the impact of other governmental initiatives affecting the financial services industry;

results of examinations of Trustco Bank and the Company by their respective primary federal banking regulators, including the possibility that the regulators may, among other things, require us to increase our loss allowances or to take other actions that reduce capital or income;

real estate and collateral values;

changes in accounting policies and practices, as may be adopted by the bank regulatory agencies, the Financial Accounting Standards Board ("FASB") or the Public Company Accounting Oversight Board;

technological changes;

changes in local market areas and general business and economic trends, as well as changes in consumer spending and saving habits;

TrustCo's success at managing the risks involved in the foregoing and managing its business; and

other risks and uncertainties included under "Risk Factors" in TrustCo's Form 10-K for the year ended December 31, 2014 and in its Form 10-Q for the quarter ended June 30, 2015.

The foregoing list should not be construed as exhaustive, and the Company disclaims any obligation to subsequently revise any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events.

Following this discussion are the tables "Distribution of Assets, Liabilities and Shareholders' Equity: Interest Rates and Interest Differential" which gives a detailed breakdown of TrustCo's average interest earning assets and interest bearing liabilities for the three month and nine month periods ended September 30, 2015 and 2014.

Introduction

The review that follows focuses on the factors affecting the financial condition and results of operations of TrustCo during the three month and nine month periods ended September 30, 2015, with comparisons to the corresponding periods in 2014, as applicable. Net interest margin is presented on a fully taxable equivalent basis in this discussion. The consolidated interim financial statements and related notes, as well as the 2014 Annual Report to Shareholders on Form 10-K, which was filed with the SEC on March 6, 2015, should also be read in conjunction with this review. Amounts in prior period consolidated interim financial statements are reclassified whenever necessary to conform to the current period's presentation.

Index

Equity markets were roughly flat for the first half of the third quarter of 2015, followed by a fairly significant sell-off in the latter part of August. Overall volatility was higher during the quarter than in recent quarters. For the full third quarter, the S&P 500 Index was down 6.9% and the Dow Jones Industrial Average was down 7.6%. Credit markets continue to be driven by worldwide economic news and decreasing liquidity in some segments of the bond market. On average, the shape of the curve did not change significantly from Q2 to Q3. The 10 year Treasury bond averaged 2.22% during Q3 compared to 2.16% in Q2, an increase of 6 basis points. However, the 2 year Treasury bond average rate rose 8 basis points, resulting in a slightly less steep curve. The spread between the 10 year and the 2 year Treasury bonds decreased from 1.55% on average in Q2 to 1.53% in Q3. This spread remains well below where it was for much of 2014, including the 198 basis point spread averaged during the third quarter of 2014. Steeper yield curves are favorable for portfolio mortgage lenders like TrustCo. The table below illustrates the range of rate movements for both short term and longer term rates. The target Fed Funds range remained unchanged at zero to 0.25% during the third quarter of 2015. Spreads of certain asset classes, including agency securities and mortgage-backed securities, were consistent with recent quarters, remaining relatively narrow compared to the Treasury curve during the third quarter of 2015. Spreads generally remained well below the levels seen a year ago. One exception to this was in corporate bonds, where spreads have widened as risk perceptions have changed. Changes in rates and spreads during the current quarter were due to a number of factors; however, uncertainty about the timing of any actions that the Federal Reserve Board (“FRB”) would take in regard to the extraordinary accommodations that have influenced markets in recent years and further uncertainty regarding the economy and related issues were key factors. Low risk free rates in major nations have also caused investors to shift into alternative fixed income instruments, contributing to the compression of spreads over the risk free rate.

Despite some modest improvements in parts of the economy, the underlying economy of the United States continued to face significant challenges. Employment increased and the unemployment rate declined, although labor force participation remains weak. Wage growth also remains weak, with much of the new job creation coming from low wage jobs. Economic conditions vary significantly over geographic areas, with strength concentrated in and around major population centers on the coasts and in certain areas where economic activity has been driven by specific regional factors. The unprecedented intervention by governments in markets and attempts to stimulate the economy, including the sharp easing of monetary policy during 2007-2008 are now in the early stages of being stabilized, and eventually reversed. Economic activity in Europe, China and elsewhere has also been mixed at best, contributing to global economic issues and leading to additional government stimulation efforts in those areas. Finally, the impact of regulatory changes that have been enacted has only partly been felt at this point, and we expect that these changes will continue to impact the banking industry going forward. These regulatory changes have added significant operating expense and operational burden and fundamentally changed the way banks conduct business.

The federal government, primarily through the Treasury Department and the federal banking agencies, is also implementing the financial reform bill, the “Dodd–Frank Wall Street Reform and Consumer Protection Act” (the

“Dodd-Frank Act”), which has had and will likely continue to have a significant impact on the financial services industry.

41

Index

The Dodd-Frank Act also created a new agency, the Consumer Financial Protection Bureau (the “CFPB”), to centralize responsibility for consumer financial protection and be responsible for implementing, examining and enforcing compliance with federal consumer financial laws such as the Truth in Lending Act, the Equal Credit Opportunity Act, the Real Estate Settlement Procedures Act and the Truth in Saving Act, among others. Depository institutions that have assets of \$10 billion or less, such as the Bank, will continue to be supervised by their primary federal regulators (in the case of the Bank, the OCC). The CFPB will also have data collecting powers for fair lending purposes for both small business and mortgage loans, as well as authority to prevent unfair, deceptive and abusive acts and practices. These new and revised rules have and may continue to increase our regulatory compliance burden and costs and restrict the financial products and services we offer to our customers.

In January 2013, the CFPB issued a series of final rules related to mortgage loan origination and mortgage loan servicing. In particular, on January 10, 2013, the CFPB issued a final rule implementing the ability-to-repay and qualified mortgage (“QM”) provisions of the Truth in Lending Act, as amended by the Dodd-Frank Act (the “QM Rule”). The ability-to-repay provision requires creditors to make reasonable, good faith determinations that borrowers are able to repay their mortgages before extending the credit based on a number of factors and consideration of financial information about the borrower from reasonably reliable third-party documents. Under the Dodd-Frank Act and the QM Rule, loans meeting the definition of “qualified mortgage” are entitled to a presumption that the lender satisfied the ability-to-repay requirements. The presumption is a conclusive presumption/safe harbor for prime loans meeting the QM requirements, and a rebuttable presumption for higher-priced/subprime loans meeting the QM requirements. The definition of a “qualified mortgage” incorporates the statutory requirements, such as not allowing negative amortization or terms longer than 30 years. The QM Rule also adds an explicit maximum 43% debt-to-income ratio for borrowers if the loan is to meet the QM definition, though some mortgages that meet Government-Sponsored Enterprise, Federal Housing Administration and United States Department of Veterans Affairs (“VA”) underwriting guidelines may, for a period not to exceed seven years, meet the QM definition without being subject to the 43% debt-to-income limits. The QM Rule became effective on January 10, 2014.

TrustCo believes that its long-term focus on traditional banking services and practices has enabled the Company to avoid significant impact from asset quality problems and that the Company’s strong liquidity and solid capital positions have allowed the Company to continue to conduct business in a manner consistent with its past practice. TrustCo has not engaged in the types of high risk loans and investments that have led to the widely reported problems in the industry. Nevertheless, the Company did experience an increase in nonperforming loans (“NPLs”) relative to historical levels, although NPLs have declined over recent years, and management believes the current level remains manageable. While the Company does not expect to see a significant change in the inherent risk of loss in its loan portfolio at September 30, 2015, should general housing prices and other economic measures, such as unemployment in the Company’s market areas, deteriorate, the Company may experience an increase in the level of credit risk and in the amount of its classified and nonperforming loans.

Index

In addition, the natural flight to quality that occurs in financial crises as investors focus on the safest possible investments, cuts in targeted interest rates and liquidity injections by the Federal government have all served to reduce yields available on both short term liquidity (Federal Funds and other short term investments), as well as the low risk types of securities typically invested in by the Company. As noted, the slope of the curve was roughly flat in the quarter as compared to the preceding quarter. A steeper slope in the yield curve is generally better for mortgage lender profitability. The future course of interest rates is subject to significant uncertainty, as various indicators are providing contradicting signals. Somewhat better economic activity could potentially lead to higher rates. Potentially offsetting this is that Treasuries continue to be viewed as a safe haven by many investors around the world, with their demand serving to dampen or completely outweigh any upward pressure on yields. Finally, the Dodd-Frank Act creates additional uncertainty for the Company and the Bank. This law significantly changed the current bank regulatory structure and affects the lending, deposit, investment, trading and operating activities of financial institutions and their holding companies.

Overview

TrustCo recorded net income of \$10.6 million, or \$0.111 of diluted earnings per share for the three months ended September 30, 2015, compared to net income of \$10.7 million or \$0.113 of diluted earnings per share in the same period in 2014. Return on average assets was 0.88% and 0.92%, respectively, for the three months ended September 30, 2015 and 2014. Return on average equity was 10.35% and 10.96%, respectively, for the three months ended September 30, 2015 and 2014.

For the nine months ended September 30, 2015, net income was \$32.1 million versus \$33.5 million for the year earlier period, while diluted earnings per share were \$0.337 compared to \$0.354, for the same periods.

The primary factors accounting for the change in net income for three month and nine month periods ended September 30, 2015 compared to the same periods of the prior year were:

An increase in the average balance of interest earning assets of \$164.4 million to \$4.68 billion for the third quarter of 2015 compared to the same period in 2014, and an increase of \$151.3 million for the first nine months of 2015 compared to the prior year period.

An increase in the average balance of interest bearing liabilities of \$103.8 million to \$3.97 billion for the third quarter of 2015 compared to the same period in 2014, and an increase of \$102.0 million for the first nine months of 2015 compared to the prior year period.

A decrease in taxable equivalent net interest margin for the third quarter of 2015 to 3.08% from 3.16% in the prior year period. The decrease in the margin was more than offset by the increase in average earning assets, resulting in an increase of \$393 thousand in taxable equivalent net interest income in the third quarter of 2015 compared to the third quarter of 2014. For the nine month period, taxable equivalent net interest income was up \$1.1 million, due to the increase in average earning assets as the net interest margin declined from 3.15% to 3.08%.

Index

A decrease in the provision for loan losses to \$800 thousand in the third quarter of 2015 from \$1.1 million in the third quarter of 2014. For the nine months ended September 30, 2015, the provision was \$2.4 million, compared to \$4.1 million during the same period in 2014.

An increase of \$1.3 million in noninterest expense, including net other real estate (“ORE”) expense, for the third quarter of 2015 compared to the third quarter of 2014. Excluding ORE costs, expenses were up \$1.5 million. For the nine months ended September 30, 2015 as compared to the corresponding prior year period noninterest expense, including net ORE expense, increased by \$5.0 million. Noninterest expense for the nine month period in 2014 includes a \$2.4 million gain from a large ORE sale.

A decrease of \$1.0 million in income taxes, in the third quarter of 2015 compared to the prior year due to lower pre-tax earnings and adjustments made to valuations of deferred tax assets and liabilities related to the filing of the 2014 tax return during the quarter and a decrease of \$2.5 million for the nine month period versus the prior year, also due primarily to lower pre-tax earnings as well as the noted adjustments in the third quarter of 2015.

Regulatory Agreement

On July 21, 2015 Trustco Bank, the wholly owned subsidiary of TrustCo Bank Corp NY, entered into a formal agreement with the OCC.

The Formal Agreement relates to the findings of the OCC following its regularly scheduled examination of the Bank. Since the completion of the examination, the Bank believes it has been working diligently to address the findings of the examination and to develop and implement appropriate formal action plans.

The Formal Agreement requires the Bank to take various actions, within prescribed time frames, with respect to certain areas of the Bank. These include, among others, (i) establishment of a committee of at least three Directors to monitor and coordinate the Bank’s response to the Formal Agreement; (ii) adoption of compliance plans to respond to the Formal Agreement with the assistance of an independent qualified consultant; (iii) evaluation and implementation of improvements in corporate governance with the assistance of an independent qualified consultant; (iv) evaluation and implementation of improvements in internal audit; (v) development of a strategic plan; (vi) development of a revised capital plan consistent with the strategic plan; (vii) development and implementation of improvements to the Bank’s loan review system; and (viii) such other necessary steps to address the issues and questions noted by the OCC in the Formal Agreement. The Company expects the cost to comply with the agreement to be approximately \$5.0 million annually.

Asset/Liability Management

The Company strives to generate its earnings capabilities through a mix of core deposits funding a prudent mix of earning assets. Additionally, TrustCo attempts to maintain adequate liquidity and reduce the sensitivity of net interest income to changes in interest rates to an acceptable level while enhancing profitability both on a short-term and long-term basis.

Index

TrustCo's results are affected by a variety of factors including competitive and economic conditions in the specific markets in which the Company operates, and more generally in the national economy, financial market conditions and the regulatory environment. Each of these factors is dynamic, and changes in any area can have an impact on TrustCo's results. Included in the Annual Report to Shareholders on Form 10-K for the year ended December 31, 2014 is a description of the effect interest rates had on the results for the year 2014 compared to 2013. Many of the same market factors discussed in the 2014 Annual Report continued to have a significant impact on results through the third quarter of 2015.

TrustCo competes with other financial service providers based upon many factors including quality of service, convenience of operations and rates paid on deposits and charged on loans. In the experience of management, the absolute level of interest rates, changes in interest rates and customers' expectations with respect to the direction of interest rates have a significant impact on the volume of loan and deposit originations in any particular period.

Interest rates have a significant impact on the operations and financial results of all financial services companies. One of the most important interest rates used to implement national economic policy is the Federal Funds rate. This is the interest rate utilized within the banking system for overnight borrowings for institutions with the highest credit rating. The Federal Funds target rate decreased from 4.25% at the beginning of 2008 to a target range of 0.00% to 0.25% by the end of 2008. The target range has not been changed since. Management believes that FRB officials have not been completely consistent or clear in regard to expectations for the future and have generally stressed the need to be accommodative given economic conditions, but have noted that conditions may be in place to raise the target rate later this year.

Traditionally, interest rates on bank deposit accounts are heavily influenced by the Federal Funds rate. The average rate on interest bearing deposits was 1 basis point higher in the third quarter of 2015 relative to the prior year period and flat as compared to the second quarter of 2015. Relative to the year ago period, lower rates on money market and savings deposits offset most of the rate increases on time deposits. Please refer to the statistical disclosures in the table below entitled "Distribution of Assets, Liabilities and Shareholders' Equity: Interest Rates and Interest Differential."

The interest rate on the 10 year Treasury bond and other long-term interest rates have significant influence on the rates for new residential real estate loans. The FRB has attempted to influence rates on mortgage loans by means other than targeting a lower Federal Funds rate, including direct intervention in the mortgage-backed securities market through purchasing these securities in an attempt to raise prices and reduce yields. Currently (based on the FRB's statement released September 17, 2015) this includes the reinvestment of principal payments received on its holdings of agency securities, agency mortgage-backed securities and Treasury securities. While no longer increasing its holdings of these securities, the reinvestment of principal means that the existing holdings are not being unwound. Eventually, management believes, the FRB will have to unwind these positions, which would likely put upward pressure on rates, although other factors may mitigate this pressure. These changes in interest rates can have an effect on the Company relative to the interest income on loans, securities and Federal Funds sold and other short term instruments, as well as on interest expense on deposits and borrowings.

Index

TrustCo's principal loan products are residential real estate loans. As noted above, residential real estate loans and longer-term investments are most affected by the changes in longer term market interest rates such as the 10 year Treasury. As noted previously, the 10 year Treasury yield was up somewhat, on average, during the third quarter of 2015 compared to the second quarter of 2015, but the yield remains at relatively lower levels compared to historical yields.

Interest rates on new residential real estate loan originations are also influenced by the rates established by secondary market participants such as Freddie Mac and Fannie Mae. As a portfolio lender, TrustCo does not sell loans into the secondary market in the normal course of business, and is able to establish rates that management determines are appropriate in light of the long-term nature of residential real estate loans while remaining competitive with the secondary market rates. Financial market volatility and the problems faced by the financial services industry have lessened the influence of the secondary market; however, various programs initiated by arms of the federal government have had an impact on rate levels for certain products. Most importantly, a government goal of keeping mortgage rates low has been supported by targeted buying of certain securities, thus supporting prices and constraining yields, as noted above. The futures of Freddie Mac and Fannie Mae remain uncertain as Congress debates the structure of both entities.

The Federal Funds sold and other short term investments portfolios are affected primarily by changes in the Federal Funds target rate. Also, changes in interest rates have an effect on the recorded balance of the securities available for sale portfolio, which is recorded at fair value. Generally, as interest rates increase the fair value of these securities will decrease.

Interest rates generally remained below historic norms on both short term and longer term investments during the third quarter of 2015. As noted above, time deposit costs were higher in the third quarter of 2015 compared to the prior year quarter.

While TrustCo has been affected by aspects of the overall changes in financial markets, it was not affected to the degree the mortgage crisis affected some banks and financial institutions in the United States beginning in 2007. Generally, the crisis revolved around actual and future levels of delinquencies and defaults on mortgage loans, in many cases arising, in management's view, from lenders with overly liberal underwriting standards, changes in the types of mortgage loans offered, significant upward resets on adjustable rate loans and fraud, among other factors. The Company utilizes a traditional underwriting process in evaluating loan applications, and since originated loans are retained in portfolio there is a strong incentive to be conservative in making credit decisions. For additional information concerning TrustCo's loan portfolio and nonperforming loans, please refer to the discussions under "Loans" and "Nonperforming Assets," respectively. Further, the Company does not rely on borrowed funds to support its assets and maintains a significant level of liquidity on the asset side of the balance sheet. These characteristics provide the Company with increased flexibility and stability during periods of market disruption and interest rate volatility.

Index

A fundamental component of TrustCo's strategy has been to grow customer relationships and the deposits and loans that are part of those relationships. The Company has significant capacity to grow its balance sheet given its existing infrastructure. The Company expects that growth to be profitable. The current interest rate environment has narrowed the margin on incremental balance sheet expansion. While the Company has not changed its fundamental long term strategy in regard to utilizing its excess capacity, management continually evaluates changing conditions and may seek to limit growth or reduce the size of the balance sheet if its analysis indicates that doing so would be beneficial in the short term.

For the third quarter of 2015, the net interest margin was 3.08%, down 8 basis points versus the prior year's quarter. The quarterly results reflect the following significant factors:

The average balance of Federal Funds sold and other short-term investments increased by \$54.0 million while the average yield was flat at 25 basis points in the third quarter of 2015 compared to the same period in 2014. The increase in the average balance reflects the decision to temporarily limit purchases of additional investment securities to make funds available for lending given the relative attractiveness of yields on loans versus securities.

The average balance of securities available for sale decreased by \$92.9 million while the average yield decreased to 1.96% for the third quarter of 2015 compared to 2.03% for the same period in 2014. The average balance of held to maturity securities decreased by \$14.3 million and the average yield increased to 3.97% for the third quarter of 2015 compared to 3.67% for the same period in 2014.

The average loan portfolio grew by \$218.1 million to \$3.26 billion and the average yield decreased 15 basis points to 4.37% in the third quarter of 2015 compared to the same period in 2014. The decline in the average yield primarily reflects the decline in market interest rates on new loan originations as older, higher rate loans pay down or are paid off.

The average balance of interest bearing liabilities (primarily deposit accounts) increased \$103.8 million and the average rate paid increased 1 basis point to 0.41% in the third quarter of 2015 compared to the same period in 2014.

During the third quarter of 2015, the Company continued to focus on its strategy to expand the loan portfolio by offering competitive interest rates. Management believes the TrustCo residential real estate loan product is very competitive compared to local and national competitors. Competition remains strong in the Company's market areas.

The strategy on the funding side of the balance sheet continues to be to attract deposit customers to the Company based upon a combination of service, convenience and interest rate.

Index

Earning Assets

Total average interest earning assets increased from \$4.51 billion in the third quarter of 2014 to \$4.68 billion in the same period of 2015 with an average yield of 3.51% in 2014 and 3.43% in 2015. Interest income on average earning assets increased from \$39.6 million in the third quarter of 2014 to \$40.2 million in the third quarter of 2015, on a tax equivalent basis, with higher volume more than offsetting the lower yield.

Loans

The average balance of loans was \$3.26 billion in the third quarter of 2015 and \$3.04 billion in the comparable period in 2014. The yield on loans decreased 15 basis points to 4.37%. The higher average balances more than offset the lower yield, leading to an increase in the interest income on loans from \$34.4 million in the third quarter of 2014 to \$35.6 million in the third quarter of 2015.

Compared to the third quarter of 2014, the average balance of the loan portfolio during the third quarter of 2015 increased in all categories except commercial loans, with increases in residential mortgage, home equity and installment loan categories. The average balance of residential mortgage loans was \$2.69 billion in 2015 compared to \$2.47 billion in 2014, an increase of 8.7%. The average yield on residential mortgage loans decreased by 17 basis points to 4.41% in the third quarter of 2015 compared to 2014.

TrustCo actively markets the residential loan products within its market territories. Mortgage loan rates are affected by a number of factors including rates on Treasury securities, the Federal Funds rate and rates set by competitors and secondary market participants. TrustCo aggressively markets the unique aspects of its loan products thereby attempting to create a differentiation from other lenders. These unique aspects include low closing costs, fast turn-around time on loan approvals, no escrow or mortgage insurance requirements for qualified borrowers and the fact that the Company typically holds these loans in portfolio and does not sell them into the secondary markets. Assuming a rise in long-term interest rates, the Company would anticipate that the unique features of its loan products will continue to attract customers in the residential mortgage loan area.

Commercial loans, which consist primarily of loans secured by commercial real estate, decreased \$11.9 million to an average balance of \$208.5 million in the third quarter of 2015 compared to the same period in the prior year. The average yield on this portfolio decreased 1 basis point to 5.15% over the same period.

The average yield on home equity credit lines decreased 6 basis points to 3.53% during the third quarter of 2015 compared to 3.59% in the year earlier period. Given the stability of the underlying repricing index in recent years, changes in portfolio yield are driven primarily by the proportion of loans that are within the lower introductory rate offered on new lines at times relative to fully priced balances and balances that have priced to the floor rate. The average balances of home equity lines increased 3.5% to \$354.6 million in the third quarter of 2015 as compared to the prior year.

Index

Securities Available for Sale

The average balance of the securities available for sale portfolio for the third quarter of 2015 was \$691.8 million compared to \$784.8 million for the comparable period in 2014. The decreased balances reflect routine paydowns, calls and maturities, partly offset by new investment purchases. During the quarter, continued low market yields on securities eligible to be added to the portfolio resulted in loans being a more attractive option for the deployment of cash. The average yield was 1.96% for the third quarter of 2015 and 2.03% for the third quarter of 2014 for the available for sale portfolio. The decline in yield primarily reflects the maturities, calls and paydowns of higher yielding securities. This portfolio is primarily comprised of agency issued residential mortgage backed securities, bonds issued by government sponsored enterprises (such as Fannie Mae, the Federal Home Loan Bank, and Freddie Mac), agency-issued commercial mortgage backed securities, Small Business Administration participation certificates and municipal bonds. These securities are recorded at fair value with any adjustment in fair value included in other comprehensive income (loss), net of tax.

The net unrealized loss in the available for sale securities portfolio was \$721 thousand as of September 30, 2015 compared to a net unrealized loss of \$6.2 million as of December 31, 2014. The unrealized gain or loss in the portfolio is primarily the result of changes in market interest rate levels.

Held to Maturity Securities

The average balance of held to maturity securities was \$61.9 million for the third quarter of 2015 compared to \$76.2 million in the third quarter of 2014. The decrease in balances reflects routine paydowns, calls and maturities and follows the overall decline in securities with a shift towards cash for more flexibility and loans for greater yield. The average yield was 3.97% for the third quarter of 2015 compared to 3.67% for the year earlier period. The higher yield reflects a modest change in mix and slower prepayments on MBS, which reduced premium amortization. TrustCo expects to hold the securities in this portfolio until they mature or are called.

As of September 30, 2015, the securities in this portfolio include residential mortgage-backed securities and corporate bonds. The balances for these securities are recorded at amortized cost.

Federal Funds Sold and Other Short-term Investments

The 2015 third quarter average balance of federal funds sold and other short-term investments was \$652.3 million, a \$54.0 million increase from the \$598.3 million average for the same period in 2014. The yield was unchanged at 0.25%. Interest income from this portfolio increased \$34 thousand from \$374 thousand in 2014 to \$408 thousand in 2015, reflecting the average balance increase.

The Federal Funds sold and other short-term investments portfolio is utilized to generate additional interest income and liquidity as funds are waiting to be deployed into the loan and securities portfolios.

Index

Funding Opportunities

TrustCo utilizes various funding sources to support its earning asset portfolio. The vast majority of the Company's funding comes from traditional deposit vehicles such as savings, demand deposits, interest-bearing checking, money market and time deposit accounts.

Total average interest bearing deposits (which includes interest bearing checking, money market accounts, savings and certificates of deposit) increased \$106.7 million to \$3.79 billion for the third quarter of 2015 versus the third quarter in the prior year, and the average rate paid increased from 0.39% for 2014 to 0.40% for 2015. Total interest expense on these deposits increased \$202 thousand to \$3.8 million in the third quarter of 2015 compared to the year earlier period. The increase in deposits versus the prior year was due to strong growth in both core deposits and certificates of deposit. From the third quarter of 2014 to the third quarter of 2015, interest bearing demand account average balances were up 11.9%, certificates of deposit average balances were up 3.6%, non-interest demand average balances were up 11.8% and average savings balances increased 1.7%. Money market balances were down 5.1%. The Company has not utilized brokered deposits as a funding source, but does incorporate them as a contingent funding source within its Asset/Liability Policy. Like other contingent funding sources, brokered CDs may be tested from time to time to ensure operational and market readiness. The Company does not pay premium rates on certificates with balances over \$100,000 within its branch network.

At September 30, 2015, the maturity of total time deposits is as follows:

(dollars in thousands)

Under 1 year	\$980,728
1 to 2 years	156,348
2 to 3 years	12,098
3 to 4 years	13,855
4 to 5 years	5,686
Over 5 years	193
	\$1,168,908

Average short-term borrowings for the quarter were \$177.2 million in 2015 compared to \$180.1 million in 2014. The average rate decreased during this time period from 0.72% in 2014 to 0.65% in 2015. The short-term borrowings of the Company are cash management accounts, which represent retail accounts with customers for which the Bank has pledged certain assets as collateral.

Net Interest Income

Taxable equivalent net interest income increased by \$393 thousand to \$36.1 million in the third quarter of 2015 compared to the same period in 2014. The net interest spread was down 9 basis points to 3.02% in the third quarter of 2015 compared to the year ago period. As previously noted, the net interest margin was down 8 basis points to 3.08% for the third quarter of 2015 compared to the same period in 2014.

Nonperforming Assets

Nonperforming assets include nonperforming loans ("NPLs"), which are those loans in a non-accrual status and loans past due three payments or more and still accruing interest. Also included in the total of nonperforming assets are foreclosed real estate properties, which are included in other assets and categorized as other real estate owned.

Index

The following describes the nonperforming assets of TrustCo as of September 30, 2015:

Nonperforming loans and foreclosed real estate: Total NPLs were \$31.9 million at September 30, 2015, compared to \$34.0 million at December 31, 2014 and \$37.1 million at September 30, 2014. There were \$31.9 million of non-accrual loans at September 30, 2015 compared to \$33.9 million at December 31, 2014 and \$37.0 million at September 30, 2014. There were no loans at September 30, 2015 and 2014 and December 31, 2014 that were past due 90 days or more and still accruing interest.

At September 30, 2015, nonperforming loans primarily include a mix of commercial and residential loans. Of total nonperforming loans of \$31.9 million at September 30, 2015, \$28.2 million were residential real estate loans, \$3.7 million were commercial mortgages and \$78 thousand were installment loans, compared to \$30.1 million, \$3.8 million and \$90 thousand, respectively at December 31, 2014.

A significant percentage of nonperforming loans are residential real estate loans, which are historically lower-risk than most other types of loans. Net charge-offs were 0.16% of average residential real estate loans (including home equity lines of credit) for the third quarter of 2015 (annualized) compared to 0.19% for the third quarter of 2014. Management believes that these loans have been appropriately written down where required.

Ongoing portfolio management is intended to result in early identification and disengagement from deteriorating credits. TrustCo has a diversified loan portfolio that includes a significant balance of residential mortgage loans to borrowers in the Capital Region of New York and avoids concentrations to any one borrower or any single industry. TrustCo has no advances to borrowers or projects located outside the United States. TrustCo continues to identify delinquent loans as quickly as possible and to move promptly to resolve problem loans. Efforts to resolve delinquencies begin immediately after the payment grace period expires, with repeated, automatically generated notices, as well as personalized phone calls and letters. Loans are placed in nonaccrual status once they are 90 days past due, or earlier if management has determined that such classification is appropriate. Once in nonaccrual status, loans are either brought current and maintained current, at which point they may be returned to accrual status, or they proceed through the foreclosure process. The collateral on nonaccrual loans is evaluated periodically, and the loan value is written down if the collateral value is insufficient.

The Company originates loans throughout its deposit franchise area. At September 30, 2015, 80.9% of its gross loan portfolio balances were in New York State and the immediately surrounding areas (including New Jersey, Vermont and Massachusetts), and 19.1% were in Florida. Those figures compare to 82.7% and 17.3%, respectively at December 31, 2014. Within these two geographic regions, commercial loans constitute a larger component of the local outstandings in New York than in Florida, at 7.3% and 2.5%, respectively, as of September 30, 2015. The Florida and New York levels of commercial loans as a percent of total loans within each geographic region were similar to the December 31, 2014 numbers of 7.8% in New York and 3.6% in Florida.

Index

Economic conditions vary widely by geographic location. Florida experienced a more significant downturn than New York during the recession. Reflecting that, nonperforming loans (NPLs as a percentage of the portfolio) had generally been more heavily weighted towards Florida in recent years. However, as of September 30, 2015, NPLs were roughly in line with regional outstandings, as 6.5% of nonperforming loans were to Florida borrowers, compared to 93.5% in New York and surrounding areas. The level of Florida based NPLs was 8.1% of total NPLs as of December 31, 2014. For the three months ended September 30, 2015, New York and surrounding areas experienced net charge-offs of approximately \$1.2 million, compared to \$34 thousand in Florida.

Other than loans currently identified as nonperforming, management is aware of no other loans in the Bank's portfolio that pose material risk of the eventual non-collection of principal and interest. Also as of September 30, 2015, there were no other loans classified for regulatory purposes that management reasonably expects will materially impact future operating results, liquidity, or capital resources.

TrustCo has identified nonaccrual commercial and commercial real estate loans, as well as all loans restructured under a troubled debt restructuring (TDR), as impaired loans. There were \$4.0 million of commercial mortgages and commercial loans classified as impaired as of September 30, 2015, compared to \$4.1 million at December 31, 2014. There were \$23.1 million of impaired residential loans at September 30, 2015, compared to \$22.4 million at December 31, 2014. The average balances of all impaired loans were \$28.8 million during the nine months of 2015 and \$27.7 million for the full year 2014.

As of September 30, 2015 and December 31, 2014, the Company's loan portfolio did not include any subprime mortgages or loans acquired with deteriorated credit quality.

At September 30, 2015 there was \$5.9 million of foreclosed real estate compared to \$6.4 million at December 31, 2014.

Allowance for loan losses: The balance of the allowance for loan losses is maintained at a level that is, in management's judgment, representative of the amount of probable incurred losses in the loan portfolio.

(dollars in thousands)	As of September 30, 2015		As of December 31, 2014	
	Amount	Percent of Loans to Total Loans	Amount	Percent of Loans to Total Loans
Commercial	\$3,832	5.86 %	\$3,764	6.41 %
Real estate - construction	393	0.86 %	571	1.22 %
Real estate mortgage - 1 to 4 family	34,120	82.15 %	35,394	80.98 %
Home equity lines of credit	6,358	10.86 %	6,430	11.15 %
Installment Loans	446	0.27 %	168	0.24 %
	\$45,149	100.00 %	\$46,327	100.00 %

Index

At September 30, 2015, the allowance for loan losses was \$45.1 million, compared to \$46.5 million at September 30, 2014 and \$46.3 million at December 31, 2014. The allowance represents 1.38% of the loan portfolio as of September 30, 2015 compared to 1.51% at September 30, 2014 and 1.47% at December 31, 2014.

The provision for loan losses was \$800 thousand for the quarter ended September 30, 2015 compared to \$1.1 million for the third quarter of 2014. Net charge-offs for the three-month period ended September 30, 2015 were \$1.2 million, compared to \$1.5 million in the year earlier period. The decrease in the provision for loan losses in 2015 was primarily related to improving trends in asset quality and generally better economic conditions in Florida, where loss severity was particularly high during the financial crisis.

During the third quarter of 2015, there were \$3 thousand of gross commercial loan charge-offs and \$1.4 million of gross residential mortgage and consumer loan charge-offs as compared with \$124 thousand of gross commercial loan charge-offs and \$1.5 million of residential mortgage and consumer loan charge-offs in the third quarter of 2014. Gross recoveries during the third quarter of 2015 were \$3 thousand for commercial loans and \$167 thousand for residential mortgage and consumer loans, compared to \$1 thousand for commercial loans and \$132 thousand for residential and consumer in the third quarter of 2014.

In determining the adequacy of the allowance for loan losses, management reviews the current nonperforming loan portfolio as well as loans that are past due and not yet categorized as nonperforming for reporting purposes. Also, there are a number of other factors that are taken into consideration, including:

- The magnitude and nature of recent loan charge-offs and recoveries,
- The growth in the loan portfolio and the implication that it has in relation to the economic climate in the Bank's market territories, and
- The economic environment in the Upstate New York territory primarily (the Company's largest geographical market) over the last several years, as well as in the Company's other market areas.

Management continues to monitor these factors in determining future loan loss provisions or recaptures in relation to the economic environment, loan charge-offs, recoveries and the level and trends of nonperforming loans.

Liquidity and Interest Rate Sensitivity

TrustCo seeks to obtain favorable sources of funding and to maintain prudent levels of liquid assets in order to satisfy varied liquidity demands. Management believes that TrustCo's earnings performance and strong capital position enable the Company to easily secure new sources of liquidity. The Company actively manages its liquidity through target ratios established under its liquidity policies. Continual monitoring of both historical and prospective ratios allows TrustCo to employ strategies necessary to maintain adequate liquidity. Management has also defined various degrees of adverse liquidity situations which could potentially occur and has prepared appropriate contingency plans should such a situation arise.

Index

The Company uses an industry standard external model as the primary tool to identify, quantify and project changes in interest rates and prepayment speeds taken both from industry sources and internally generated data based upon historical trends in the Bank's balance sheet. Assumptions based on the historical behavior of deposit rates and balances in relation to changes in market interest rates are also incorporated into the model. This model calculates an economic or fair value amount with respect to non-time deposit categories since these deposits are part of the core deposit products of the Company. The assumptions used are inherently uncertain and, as a result, the model cannot precisely measure the fair value of capital or precisely predict the impact of fluctuations in interest rates on the fair value of capital.

Using this model, the fair value of capital projections as of September 30, 2015 are referenced below. The base case (current rates) scenario shows the present estimate of the fair value of capital assuming no change in the operating environment or operating strategies and no change in interest rates from those existing in the marketplace as of September 30, 2015. The table indicates the impact on the fair value of capital assuming interest rates were to instantaneously increase by 100 bp, 200 bp, 300 bp and 400 bp or to decrease by 100 bp.

	Estimated Percentage of Fair value of Capital to Fair value of Assets	
<u>As of September 30, 2015</u>		
+400 BP	19.90	%
+300 BP	21.02	
+200 BP	22.07	
+100 BP	22.84	
Current rates	21.89	
-100 BP	21.20	

Noninterest Income

Total noninterest income for the third quarter of 2015 was \$4.4 million, compared to \$4.9 million in the prior year period. For the nine months ended September 30, 2015 total noninterest income was \$13.4 million compared to \$15.2 million in the prior year period. The 2014 nine month period included gains on securities sales of \$382 thousand and a gain of \$1.6 million on the sale of the Company's planned Florida regional administrative center, while the 2015 period included gains on securities sale of \$249 thousand. Excluding all gains, noninterest income was down \$23 thousand to \$13.2 million for the nine month periods.

Trustco Financial Services income decreased \$120 thousand to \$1.4 million for the third quarter of 2015 compared to the third quarter of 2014. The fair value of assets under management were \$895 million at September 30, 2015 compared to \$918 million at December 31, 2014 and \$879 million at September 30, 2014. The decrease in assets was due to market value declines offset by net account acquisition.

The total of fees for other services to customers plus other income was \$3.0 million in the third quarter of 2015, down \$29 thousand. For the nine months ended September 30, 2015 fees for other services to customers plus other income was \$8.7 million, compared to \$10.4 million for the first nine months of 2014. The nine month 2014 period includes the \$1.6 million gain on sale of a Bank building.

Index

Noninterest Expenses

Total noninterest expenses were \$23.5 million for the three months ended September 30, 2015, compared to \$22.2 million for the three months ended September 30, 2014. The largest cause of the increase in expenses was a \$1.1 million increase in FDIC and other insurance expenses which is a direct result of our most recent regulatory exam. Other significant increases included higher professional services expenses and “other” expenses. Professional services expenses were up \$691 thousand for the period, due in large part to legal and consulting fees related to the agreement with the OCC. “Other” expenses were up \$190 thousand due to costs associated with the upgrade to EMV chip enabled debit cards for our customers. Salaries and benefits were down \$438 thousand due to adjustments for stock based compensation plans and other executive benefit programs, which had an \$838 thousand beneficial impact on the quarter. Full time equivalent headcount was 778 as of September 30, 2015, compared to 733 as of September 30, 2014. Decreases of \$195 in ORE expense, net, \$129 thousand in equipment expense and \$84 thousand in occupancy expense offset a portion of the increases. ORE expenses were down due to a decline in the number of properties held during the current year versus the prior year. Excluding the ORE line, noninterest expenses were up \$1.5 million in the third quarter of 2015 compared to the prior year.

For the nine months ended September 30, 2015, total noninterest expenses were \$67.5 million, compared to \$62.4 million for the nine months ended September 30, 2014, an increase of \$5.0 million. Excluding the ORE line, noninterest expenses were up \$3.8 million for the nine month period ended September 30, 2015 compared to the prior year, with increases in professional service expenses, FDIC and other insurance and salaries and benefits contributing most of the total increase. In the first nine months of 2014, the ORE expense, net line included a \$2.4 million gain on the sale of a large ORE property.

Income Taxes

In the third quarter of 2015, TrustCo recognized income tax expense of \$5.5 million, compared to \$6.5 million for the third quarter of 2014. The effective tax rates were 34.3% and 37.9% for the third quarters of 2015 and 2014, respectively. For the nine month period ended September 30, 2015, as compared to the year earlier period, tax expense fell to \$18.4 million from \$20.9 million and the tax rate was 36.5% down from 38.4%. The decrease in taxes reflects lower pre-tax income levels in 2015 for both the three and nine month periods, and is also a result of adjustments made to valuations of deferred assets and liabilities upon finalizing the 2014 tax return which was filed during the third quarter of 2015.

Capital Resources

Consistent with its long-term goal of operating a sound and profitable financial organization, TrustCo strives to maintain strong capital ratios.

Banking regulators have moved towards higher required capital requirements due to the standards included in the Basel III reform measures and the Dodd-Frank Act, as well as a general trend towards reducing risk in the banking system by providing a greater capital margin.

Total shareholders' equity at September 30, 2015 was \$412.3 million, compared to \$389.5 million at September 30, 2014. TrustCo declared a dividend of \$0.065625 per share in the third quarter of 2015. This results in a dividend payout ratio of 58.82% based on third quarter 2015 earnings per share of \$0.111.

Index

The Bank reported the following capital ratios as of September 30, 2015 and December 31, 2014:

(dollars in thousands)	As of September		Well Capitalized*	Adequately Capitalized*
	30, 2015 Amount	Ratio		
Tier 1 leverage capital	\$401,225	8.42 %	5.00 %	4.00
Common equity tier 1 capital	401,225	16.97	6.50	4.50
Tier 1 risk-based capital	401,225	16.97	8.00	6.00
Total risk-based capital	430,979	18.23	10.00	8.00

(dollars in thousands)	As of December		Well Capitalized*	Adequately Capitalized*
	31, 2014 Amount	Ratio		
Tier 1 (core) capital	\$386,913	8.33 %	5.00 %	4.00
Tier 1 risk-based capital	386,913	16.60	6.00	4.00
Total risk-based capital	416,269	17.86	10.00	8.00

*Federal regulatory minimum requirements to be considered to be Well Capitalized and Adequately Capitalized

The following is a summary of actual capital amounts and ratios as of September 30, 2015 and December 31, 2014 for TrustCo on a consolidated basis:

(dollars in thousands)	As of September	
	30, 2015 Amount	Ratio
Tier 1 leverage capital	\$412,913	8.66 %
Common equity tier 1 capital	412,913	17.45
Tier 1 risk-based capital	412,913	17.45
Total risk-based capital	442,685	18.71

(dollars in thousands)	As of December	
	31, 2014 Amount	Ratio
Leverage capital	\$397,400	8.55 %
Tier 1 risk-based capital	397,400	17.04
Total risk-based capital	426,770	18.30

In addition, at September 30, 2015, the consolidated equity to total assets ratio was 8.72%, compared to 8.47% at December 31, 2014 and 8.50% at September 30, 2014.

TrustCo became subject to Federal Reserve regulations requiring minimum capital requirements in January 2015 when new regulatory capital rules issued in July 2013 by the federal banking agencies, including the Federal Reserve and the OCC, took effect. The new capital rules substantially amend the prior regulatory capital rules and implemented the "Basel III" regulatory capital reforms, as well as certain changes required by the Dodd-Frank Act.

The final rule includes new minimum risk-based capital and leverage ratios, and refines the definition of what constitutes “capital” for purposes of calculating these ratios. The new minimum capital requirements are: (i) a new common equity Tier 1 capital ratio of 4.5%; (ii) a Tier 1 to risk-based assets capital ratio of 6% (increased from 4%); (iii) a total capital ratio of 8% (unchanged from current rules); and (iv) a Tier 1 capital to average consolidated assets ratio (known as the “leverage ratio”) of 4% (unchanged from current rules). The final rule also establishes a “capital conservation buffer” of 2.5% above the new regulatory minimum capital ratios and when fully phased in, effectively, will result in the following minimum ratios that banks and bank holding companies must maintain in order to avoid being subject to, among other matters, limitations on dividends, share repurchases and discretionary bonus payments to executive officers: (i) a common equity Tier 1 capital ratio of 7.0%, (ii) a Tier 1 to risk-based assets capital ratio of 8.5%, and (iii) a total capital ratio of 10.5%. The new capital conservation buffer requirement would be phased in beginning in January 2016 at 0.625% of risk-weighted assets and would increase in increments of 0.625% each year until fully implemented in January 2019.

Index

The following chart compares the risk-based capital ratios required under the prior rules to those prescribed under the new final rules:

	Prior Rules	Final Rules
Common equity tier 1 capital	N/A	4.50 %
Tier 1 risk-based capital	4.00 %	6.00 %
Total risk-based capital	8.00 %	8.00 %
Common equity tier 1 capital conservation buffer*	N/A	2.50 %

*When fully phased in, which will occur on January 1, 2019.

The final rules also implement revisions and clarifications consistent with Basel III regarding the various components of Tier 1 capital, including common equity, unrealized gains and losses and instruments that will no longer qualify as Tier 1 capital.

The application of more stringent capital requirements for the Company and the Bank could, among other things, result in lower returns on equity, require the raising of additional capital and result in regulatory actions, such as the inability to pay dividends or repurchase shares, if we were to be unable to comply with such requirements.

In addition to the updated capital requirements, the final rules also contain revisions to the prompt corrective action framework. Beginning January 1, 2015, the minimum ratios for the Company and the Bank to be considered well-capitalized are as follows:

	Prior Rules	Final Rules
Common equity tier 1 capital	N/A	6.50 %
Tier 1 risk-based capital	6.00 %	8.00 %
Total risk-based capital	10.00 %	10.00 %
Tier 1 leverage capital	5.00 %	5.00 %

The Bank and the Company continue to meet the regulatory requirements to be classified as well capitalized.

Critical Accounting Policies:

Pursuant to SEC guidance, management of the Company is encouraged to evaluate and disclose those accounting policies judged to be critical policies - those most important to the portrayal of the Company's financial condition and results, and that require management's most difficult subjective or complex judgments.

Management considers the accounting policy relating to the allowance for loan losses to be a critical accounting policy given the inherent uncertainty in evaluating the levels of the allowance required to cover the inherent risk of losses in the loan portfolio and the material effect that such judgments can have on the results of operations. Included in Note 1 to the Consolidated Financial Statements contained in the Company's Annual Report on Form 10-K for the year ended December 31, 2014 is a description of the significant accounting policies that are utilized by the Company in the preparation of the Consolidated Financial Statements.

I. DISTRIBUTION OF ASSETS, LIABILITIES AND SHAREHOLDERS' EQUITY:
 INTEREST RATES AND INTEREST DIFFERENTIAL

The following table summarizes the component distribution of the average balance sheet, related interest income and expense and the average annualized yields on interest earning assets and annualized rates on interest bearing liabilities of TrustCo (adjusted for tax equivalency) for each of the reported periods. Nonaccrual loans are included in loans for this analysis. The average balances of securities available for sale and held to maturity are calculated using amortized costs for these securities. Included in the average balance of shareholders' equity is the unrealized loss, net of tax, in the available for sale portfolio of (\$3.5) million in 2015 and (\$3.3) million in 2014. The subtotals contained in the following table are the arithmetic totals of the items contained in that category. Increases and decreases in interest income and expense due to both rate and volume have been allocated to the categories of variances (volume and rate) based on the percentage relationship of such variances to each other.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

As detailed in the Annual Report to Shareholders as of December 31, 2014, the Company is subject to interest rate risk as its principal market risk. As noted in detail throughout this Management's Discussion and Analysis for the three and nine month periods ended September 30, 2015 and 2014, the Company continues to respond to changes in interest rates in a fashion to position the Company to meet short term earning goals and to also allow the Company to respond to changes in interest rates in the future. Consequently, for the third quarter of 2015, the Company had an average balance of Federal Funds sold and other short-term investments of \$652.3 million compared to \$598.3 million in the third quarter of 2014. As investment opportunities present themselves, management plans to invest funds from the Federal Funds sold and other short-term investment portfolio into the securities available for sale, securities held to maturity and loan portfolios. Additional disclosure of interest rate risk can be found under "Liquidity and Interest Rate Sensitivity" and "Asset/Liability Management" in the Management's Discussion and Analysis section of this document.

Item 4. Controls and Procedures

An evaluation was carried out under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures as of the end of the period covered by this report.

The Company maintains disclosure controls and procedures (as that term is defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934 ("Exchange Act")) designed to ensure that information required to be disclosed in the reports that the Company files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission. Based upon this evaluation of those disclosure controls and procedures, the Chief Executive Officer and Chief Financial Officer of the Company concluded, as of the end of the period covered by this report, that the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed in the reports the Company files and submits under the Exchange Act is recorded, processed, summarized and reported as and when required.

In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Further, no evaluation of a cost-effective system of controls can provide absolute assurance that all control issues and instances of fraud, if any, will be detected.

There have been no changes in internal control over financial reporting (as defined in Rule 13a-15(f) and 15d-15(f) of the Exchange Act) during the quarter to which this report relates that have materially affected or are reasonably likely to materially affect, the internal control over financial reporting.
