SCHEDULE A

IMA EXPLORATION INC.
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2002
(Unaudited - Prepared by Management)

1. NATURE OF OPERATIONS

The Company is in the process of exploring its mineral properties in South America and evaluating other mineral properties. The Company considers itself to be an exploration stage company. On the basis of information to date, it has not yet determined whether these properties contain economically recoverable ore reserves. The amounts shown as mineral properties and related deferred costs represent net costs to date, less amounts amortized and/or written off, and do not necessarily represent present or future values. The underlying value of the mineral properties and related deferred costs is entirely dependent on the existence of economically recoverable reserves, securing and maintaining title and beneficial interest in the properties, the ability of the Company to obtain the necessary financing to complete development, and future profitable production.

The Company considers that it has adequate resources to maintain its operations for the next year. However, the Company recognizes that it will require additional financing in the forthcoming year to complete its proposed exploration programs. The Company is seeking additional financing to complete these programs, and while it has been successful at doing so in the past, there can be no assurance that it will be able to do so in the future. See also Note 4.

2. SIGNIFICANT ACCOUNTING POLICIES

The interim consolidated financial statements of the Company have been prepared by management in accordance with Canadian generally accepted accounting principles. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts

Edgar Filing: IMA EXPLORATION INC - Form 6-K

reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates. The consolidated financial statements have, in management's opinion, been properly prepared using careful judgement with reasonable limits of materiality. These interim consolidated financial statements should be read in conjunction with the most recent annual consolidated financial statements. The significant accounting policies follow that of the most recently reported annual consolidated financial statements.

MANAGEMENT DISCUSSION & ANALYSIS

Description of Business

IMA Exploration Inc. is in the process of exploring its mineral properties in South America and evaluating other mineral properties. The Company considers itself to be an exploration stage company. On the basis of information to date, it has not yet determined whether these properties contain economically recoverable ore reserves.

Operations

During the nine months ended September 30, 2002, the Company reported a consolidated loss of \$953,158 (\$0.04 per share), an increase of \$377,099 from the loss of \$576,059 (\$0.04 per share) in 2001. The increase in the loss experienced by the Company in 2002, compared to 2001, was due to a number of factors of which \$258,562 can be attributed to operating expenditures and \$118,537 to non-operating items.

The Company for the period ended September 30, 2002 has significantly increased its focus on activities in the Patagonia region of Argentina carrying out an extensive exploration program in the Chubut Province and acquiring five new gold projects. Additionally the Company has evaluated a number of projects available for option ranging from grass roots projects to advanced projects including those with resources. The Company has continued with the market awareness and investor relations program throughout North America and Europe.

As a result the Company experienced increases in the following expenses: (i) Administration and management services - \$ 7,034; (ii) Bank charges and interest - \$829; (iii) Corporate development and investor relations - \$128,739 of which \$51,419 reflects the cost of full time investor relations staff, \$62,080 for various media advertising and \$15,240 for International Conferences; (iv) General exploration - \$15,255; (v) Printing - \$8,275 mainly for investor presentation material; (vi) Professional fees - \$37,570 which relates to the ongoing North America and European market awareness program; (vii) Rent, parking and storage - \$2,367; (viii) Salaries and employee benefits - \$2,112 reflects a slight increase in administration wages and benefits cost; (ix) Telephone and utilities - \$7,762 due to the increase in correspondence with Europe, North America and South America; (x) Transfer agent and regulatory fees - \$21,611 as a result of the various equity financings; (xi) Travel and accommodation - \$32,580 mainly due to the European market awareness and investor relations program.

The following expenses decreased for the period: (i) Amortization and depreciation -\$1,829; and (ii) Office and sundry - \$3,743.

Interest and miscellaneous income reported for the period ended September 30, 2002 was \$15,695 a decrease of \$113,335 from \$129,030 reported in 2001 mainly due to the reduction of overhead charges for the exploration expenditures on the Valle del Cura property allowed under the Barrick agreement.

MANAGEMENT DISCUSSION & ANALYSIS (continued)

During the period ended September 30, 2002, the Company did not dispose of any Viceroy common shares. No provision was required for marketable securities for the period ended September 30, 2002 as compared to \$16,618 reported in 2001.

Liquidity and Capital Resources

The Company's total assets increased from \$5,487,374 at December 31, 2001 to \$7,723,656 at September 30, 2002. The increase is attributed to issuance of share capital of \$2,358,814 through four private placements, \$837,513 and \$68,000 through the exercise of warrants and options, respectively, during the period.

As at September 30, 2002, the Company had working capital of \$2,112,952. As a result of revising the timetable for exploration on Rio Tabaconas in Peru, the Company has amended its exploration budget to \$305,000 for the remaining three months to December 31, 2002 and approximately \$120,000 for property payments on its existing property holdings. The Company currently considers that it has adequate working capital to meet all its ongoing overhead obligations but may not have sufficient working capital to fund all of its planned exploration work and property commitments for the next year. The Company will continue to rely on successfully completing additional equity financing and/or conducting joint venture arrangements to further exploration on its properties. There can be no assurance that the Company will be successful in obtaining the required financing or negotiating joint venture agreements. The failure to obtain such financing or joint venture agreements could result in the loss of or substantial dilution to the Company's interest in its properties.

Properties

New Epithermal Vein Discoveries - Patagonia, Argentina

On September 3, 2002, IMA announced the acquisition of several new gold properties to its existing portfolio in the Patagonia region of southern Argentina. These new acquisitions bring IMA's land position in this high profile gold district to almost 750 square kilometers (74,906 ha) on which the Company holds a 100% interest with no underlying royalties.

The newly acquired properties are within the same geological trend, and in a similar geological environment as Meridian Gold Inc.'s Esquel deposit (formerly owned by Brancote Holdings PLC and containing a resource of 3.8 million ounces gold, and 6.9 million ounces of silver).

On September 30, 2002, the Company reported progress on its Patagonia exploration program which commenced on August 13, 2002, as well as due diligence exploration on properties under negotiation in the region. Work to date had identified two gold bearing, low-sulphidation epithermal vein systems that potentially extend up to 10 kilometers in length. The geological environment and style of mineralization is very similar to the Esquel gold discovery, indicating excellent exploration potential for IMA's projects.

Work on IMA's Los Toros property was completed and the Company was waiting for final assays and field reports, while the exploration team has moved to the nearby Las Bayas/Victoria claims. Both projects contain large, low-sulphidation

epithermal vein systems. An additional 3,000 hectares has been added to Los Toros to cover two newly discovered epithermal vein systems located approximately 6 kilometers to the southeast. Los Toros now covers 7,200 hectares that are 100% IMA owned.

On the Company's 100% owned Las Bayas and adjacent Victoria claims, individual veins had previously been traced for 350 meters. Recent work has now extended this into a zone of intense quartz veining (including individual veins up to 22 meters wide) for a strike length of 4.5 kilometers. Additional veining has been found 5.5 kilometers along strike to the northeast, suggesting a total strike length in excess of 10 kilometers.

The Patagonia region has also seen several other new gold discoveries, including; Cerro Vanguardia, and Manantial Espejo. Consequently, the district has attracted the keen interest of several of the world's largest gold and silver producers, as well as an increasing number of medium and small exploration companies.

Financings

The Company received \$182,125 on July 2, 2002 from the exercise of 385,000 warrants at a price \$0.40 and 62,500 warrants at a price of \$0.45. On September 27, 2002, IMA completed a brokered private placement for 1,554,915 units at \$0.47 per unit for net proceeds of \$698,987. Proceeds from the sale of the units and exercise of warrants are to be used for general working capital.

Investor Relations

During the nine months ended September 30, 2002 the Company had retained two consultants, Raven Capital of Vancouver, British Columbia and Strategic Financial Services of Scottsdale, Arizona to assist with IMA's market awareness and investor relations activities throughout North America and Europe. Both contracts have been terminated and activities during the quarter ended consisted of investor mailings and shareholders communications by Company personnel.
