Form 10-Q
November 06, 2007

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

þ Quarterly Report Pursuant to Sections 13 or 15(d) of the
Securities Exchange Act of 1934

For the period ended

September 30, 2007

or

¨ Transition Report Pursuant to Sections 13 or 15(d) of
the Securities and Exchange Act of 1934

For the transition period from

_____ to _____

Commission File Number 001-31434

AMERICAN PHYSICIANS SERVICE GROUP, INC.

(Exact name of registrant as specified in its charter)

Texas	75-1458323
(State or other jurisdiction of incorporation or organization)	(I.R.S. employer Identification No.)

1301 S. Capital of Texas Highway, Suite C-300, Austin, Texas 78746

(Address of principal executive offices)(Zip Code)

(512) 328-0888

(Registrant's telephone number, including area code)

Yes þ No ¨

Edgar Filing: AMERICAN PHYSICIANS SERVICE GROUP INC - Form 10-Q

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Sections 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act

Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

AMERICAN PHYSICIANS SERVICE GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

September 30, 2007

(Unaudited)

1.

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) and pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such rules and regulations. The consolidated unaudited financial statements as of and for the three- and nine-month periods ended September 30, 2007 and 2006 reflect all adjustments which are, in the opinion of management, necessary for a fair presentation of the financial position, results of operations and cash flows for the periods presented. Such adjustments consist of only items of a normal recurring nature. These consolidated financial statements have not been audited by our independent registered public accounting firm. The operating results for the interim periods are not necessarily indicative of results for the full fiscal year.

The notes to consolidated financial statements appearing in our Annual Report on Form 10-K for the year ended December 31, 2006 filed with the SEC should be read in conjunction with this Quarterly Report on Form 10-Q. There have been significant changes in the type of information reported and the presentation format in this Quarterly Report as a result of the acquisition of American Physicians Insurance Company (API) effective April 1, 2007 and such changes are disclosed in the notes hereto.

2.

Management's Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The most significant estimates that are susceptible to significant change in the near-term relate to the determination of the liability for reserves for losses and loss adjustment expenses, reinsurance, income taxes, and the fair value of investments. Although considerable judgment is inherent in these estimates, management believes that the current estimates are reasonable in all material respects. The estimates are reviewed regularly and adjusted, as necessary. Adjustments related to changes in estimates are reflected in the Company's results of operations, or other

comprehensive income, in the period in which those estimates are changed.

3.

Acquisition

On April 1, 2007, we acquired all of the issued and outstanding stock of API. We considered several factors in determining to acquire API, including the favorable effects tort reform had on the Texas market, our long-term experience managing API's operations, our credibility in the marketplace, the common goals we shared with API's board of directors, the ability to increase API's capital to support future growth after the acquisition and the increased financial strength of the combined entities. The results of operations for API are included in our consolidated results of operations beginning April 1, 2007. The business combination is being accounted for using the purchase method of accounting and, accordingly, the purchase price has been allocated to assets acquired and liabilities assumed based on fair values at the date of acquisition. The total purchase price was \$45,167,000 and consisted of 1,982,499 shares of the Company's common stock, valued at a per share price of \$17.635, or \$34,961,000 in the aggregate, \$35,000 in cash paid in lieu of fractional shares of common stock, 10,197.95 shares of preferred stock valued at \$9,179,000, plus costs to complete the acquisition of \$992,000. We are required to redeem at least \$1 million of the preferred stock each calendar year beginning in 2007, until December 31, 2016, at which time all of the preferred stock must have been redeemed. The preferred stock has a cumulative dividend equal to 3% of the outstanding redemption value per year. In June 2007, we made the first required payment, redeeming 10% of the preferred shares outstanding and paying the dividend.

[Return to Table of Contents](#)

The following table displays the amount of the purchase price assigned to each major asset and liability of API at the acquisition date, April 1, 2007:

(in thousands)

ASSETS**Investments:**

Fixed maturities available for sale	\$ 145,354
Equity securities available for sale	6,851
Other invested assets	1,848
Total investments	154,053
Cash and cash equivalents	9,910
Accrued investment income	793
Premium and maintenance fees receivable	14,647
Other amounts receivable under reinsurance recoverables	1,373
Reinsurance recoverables on paid and unpaid loss adjustment expenses	29,685
Prepaid reinsurance premiums	311
Deferred policy acquisition costs	2,404
Deferred tax assets	4,630
Subrogation recoverables	505
Other assets	358
Total assets	\$ 218,669

LIABILITIES AND SHAREHOLDERS EQUITY**Liabilities**

Reserve for losses and loss adjustment expenses	116,227
Unearned premiums and maintenance fees	36,516
Reinsurance premiums payable	253
Funds held under reinsurance treaties	11,112
Federal income tax payable	2,623
Other liabilities	4,507
Total liabilities	\$ 171,238

Purchase Price	45,167
Excess of net assets received over cost to acquire (1)	2,264

Total **\$ 218,669**

(1)

The fair value of net assets acquired exceeded the cost of acquisition. After review it was determined that no intangibles were acquired and that no assets should be reduced below their carrying value, which approximates fair value. Consequently, an extraordinary gain of \$2,264,000 was recognized in the period of the acquisition in accordance with SFAS No. 141, *Accounting for Business Combinations*.

The tables below reflect the unaudited pro forma balance sheet as of December 31, 2006, and the results of operations for the three- and nine-month periods ended September 30, 2007 and 2006 of the Company and API as if the acquisition had taken place on January 1 of 2007 and 2006, respectively, including estimated purchase accounting adjustments.

4.

Impairment of Goodwill

Goodwill arose with the re-purchase of an interest in one of our subsidiaries, APS Insurance Services, from the minority holder in 2003. Goodwill was determined to exist based on earnings expected to be generated from the management contract with API. With the purchase of API by us and termination of the management agreement, the question of impairment of the goodwill was raised. Upon review, in accordance with SFAS 142, Goodwill and Other Intangibles, we determined that the original circumstances creating the goodwill no longer existed and that the entire \$1,247,000 balance was impaired. The goodwill was written down during the three months ended June 30, 2007.

5.

Investments

Available-For-Sale Fixed Maturities. Of the total \$194,156,000 portfolio balance in available-for-sale fixed income maturities at September 30, 2007, all but \$214,000 is considered investment grade securities. Our investment strategy is reviewed and approved by our board of directors. The primary goal of our investment strategy for our insurance services segment is to ensure that we have sufficient assets to meet our obligations to our policyholders, and our secondary goal is to provide investment income. The investment plan for our insurance services segment provides guidance on diversification, duration of the portfolio, sector allocation and specific restrictions, such as the size of investment in any one issue and limitations on the purchases of securities rated lower than investment grade by Moody's, Standard and Poor's or a comparable rating institution.

Our insurance services segment employs an investment strategy that emphasizes asset quality to minimize the credit risk of our investment portfolio and also matches fixed-income maturities to anticipated claim payments and expenditures or other liabilities. The amounts and types of investments that may be made by our insurance services segment are regulated under the Texas Insurance Code. We utilize APS Financial Corporation, our broker/dealer subsidiary, as our fixed-income advisor. Our board of directors reviews our fixed-income advisor's performance and compliance with our investment guidelines on a quarterly basis.

Our entire fixed-income portfolio consists of investment grade securities rated A or higher from any of Standard and Poor's, Moody's or Fitch with the exception of one bond with a fair market value of approximately \$214,000. The following table reflects the composition of our fixed-income portfolio by security rating category of the issuer, as of September 30, 2007 (dollars in thousands). In cases where the rating agencies had a different rating assigned to a security, the classification in the table used the lower rating.

Rating Category	Fair Value	Percentage
AAA / Aaa	\$ 173,881	90%
AA / Aa	9,670	5%
A / A	10,391	5%
Non-investment grade	214	0%
Total	\$ 194,156	100%

Available-For-Sale Equity Securities. Our equity portfolio consists of \$10,154,000 in available-for-sale equity securities, comprising 4.9% of total investments at market value as of September 30, 2007. We account for equity securities as available for sale. We utilize two outside investment managers to manage our insurance segment's equity portfolio. Our board of directors reviews our equity managers' performance and compliance with our investment guidelines on a quarterly basis.

In accordance with SFAS No. 115, *Accounting for Certain Investments In Debt and Equity Securities*, we evaluate our investment securities on at least a quarterly basis for declines in market value below cost for the purpose of determining whether these declines represent other than temporary declines. A decline in the fair value of a security below cost judged to be other than temporary is recognized as a loss in the current period and its fair value becomes the new cost basis of the security. The following factors are considered in determining whether an investment decline is other than temporary :

.

The extent to which the market value of the security is less than its cost basis;

.

The length of time for which the market value of the security is less than its cost basis;

.

The financial condition and near-term prospects of the security's issuer, taking into consideration the economic prospects of the issuer's industry and geographical region, to the extent that information is publicly available; and

.

Our ability and intent to hold the investment for a period of time sufficient to allow for any anticipated recovery in market value.

[Return to Table of Contents](#)

The securities acquired as part of API were revalued to market value as of the date of the merger, April 1, 2007. The fixed maturity investments are virtually all investment grade securities. Of our entire invested assets, including cash, agency-backed mortgage obligations, with underlying collateral consisting of GNMA, FHLMC, or FNMA loans comprise 38% of our portfolio; non-agency collateralized mortgage obligations comprise 23% of our portfolio; and the remaining 39% is comprised of U.S. Treasury, government agency bonds and notes, municipal tax exempt bonds, corporate bonds and equities. The majority of the non-agency CMO s in our portfolio have underlying mortgages categorized as Prime quality loans, and none of our CMO s have underlying mortgages classified as Subprime. However, within our portfolio there are eleven CMO securities classified as Alternative-A or Alt-A. These Alt-A securities are generally considered to have underlying mortgages with underwriting characteristics that are stronger than Subprime mortgages but less stringent than Prime mortgages. All of our Alt-A securities are investment grade, currently rated either AAA, AA or A.

During the three months ended September 30, 2007, we saw a significant and rapid decline in the market value of our Alt-A securities, particularly those with an A rating. In evaluating this decline, we considered the deepening national housing crisis and its potential effects on the underlying collateral and concluded that the decreases in value of our A rated Alt-A securities should be considered to be other than temporary as defined in Statements of Financial Accounting Standards No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. The amount of the pretax charge to earnings associated with this adjustment for the three months ended September 30, 2007, is \$3,140,000 bringing our total carrying value in Alt-A securities to \$13,904,000 from \$17,044,000 as of September 30, 2007. While we have the ability and intent to hold all of our Alt-A securities indefinitely, we will continue to monitor and evaluate these securities and their underlying collateral.

The following table reflects the composition of our Alt-A securities as of September 30, 2007 after the other than temporary impairment (dollars in thousands):

Rating Category	Carrying "Book" Value	Fair Value	% of Portfolio (Fair Value)
AAA	\$ 2,327	\$ 2,297	1.0%
AA	4,746	3,997	1.9%
A	6,831	6,831	3.0%
Total	\$ 13,904	\$ 13,125	5.9%

Additionally, an impairment charge resulted from our investment in Financial Industries Corporation (FIC) for the three months ended September 30, 2007, having previously resolved that declines in FIC s stock price will be considered to be other than temporary . Our policy in regards to our investment in FIC is that we will record pretax

charges to earnings should the common stock price on the last day of each interim or annual period fall below the adjusted cost basis of our investment in FIC. During the three months ended September 30, 2007, that charge totaled \$39,000, bringing the total amount written off in 2007 to \$693,000. For the three and nine months ended September 30, 2006, no impairment charges were recorded related to our investment in FIC. As a consequence of these write-downs, our basis in this stock has declined to \$5.80 per share which equals the fair market value of FIC common stock at September 30, 2007. While we continue to have the ability and the intent to hold the stock indefinitely, we previously determined that the additional uncertainty created by FIC's previous late SEC filings, together with its continued de-listing from any national stock exchanges, dictated that the current quarter decline should be viewed as other than temporary. We will continue to monitor and evaluate the situation at FIC.

[Return to Table of Contents](#)

The following two tables reflect securities whose fair values were lower than the related cost basis at September 30, 2007 and December 31, 2006, respectively (in thousands). However, these declines in value were not deemed to be other than temporary. The tables show the fair value and the unrealized losses, aggregated by investment category and category of duration that individual securities have been in a continuous unrealized loss position.

September 30, 2007:	Less Than 12 Months		12 Months or More		Total	
	Estimated Fair Value	Unrealized Loss	Estimated Fair Value	Unrealized Loss	Estimated Fair Value	Unrealized Loss

Total	\$ 11,454	\$ 17	\$ 1,323	\$ 2	\$ 12,777	\$ 19

The unrealized losses on the fixed maturities and equities are primarily due to market fluctuations resulting from cyclical and other economic pressures and not due to changes in the credit worthiness of the issuer. All fixed maturities with an unrealized loss over 12 months or more are investment grade securities. As of September 30, 2007, we believe that these unrealized losses are temporary and that the fair value will recover to a level equal to or greater than the cost basis. In addition, as of September 30, 2007, we had the ability and intent to hold these investments until there is a recovery in fair value, which may be maturity for the applicable securities. In the future, information may come to light or circumstances may change that would cause us to record an other than temporary impairment or sell any of our fixed maturity or equity securities and incur a realized loss.

As a result of our acquisition of API, the Texas Department of Insurance (TDI) required that funds be set aside in an escrow account with a bank to remain until the aggregate remaining redemption obligation of our Series A redeemable preferred stock is less than the amount of the escrow balance, with no withdrawals to be made from this escrow account without prior approval from TDI. To satisfy this condition of the merger, we purchased a fixed income security in March of 2007 in the amount of \$2,500,000 paying 5% interest and maturing in March of 2008. This security is included in fixed maturities, available for sale.

At September 30, 2007, investments with a fair market value of \$1,352,000 were on deposit with state insurance departments to satisfy regulatory requirements and these securities are included in fixed maturities, available for sale.

[Return to Table of Contents](#)

6.

Cash Restricted

Cash Restricted represents cash deposits advanced from customers for trade claim transactions that do not close by the end of the period. It occurs when a customer remits payment for a transaction by check instead of via wire transfer. As checks of this size normally take several business days to clear, we ask our customers to pay in advance for transactions expected to close in the near future. At the time of receipt, Cash Restricted and Accounts Payable are increased for an equal amount as no part of this cash is ours until the transaction closes.

7.

Reinsurance

Reinsurance Premiums Ceded. Certain premiums are ceded to other insurance companies under reinsurance agreements. These reinsurance agreements provide us with increased capacity to write additional risk and the ability to write specific risk within our capital resources and underwriting guidelines. API enters into reinsurance contracts, which provide coverage for losses in excess of the retention of \$250,000 on individual claims and beginning in 2002 through 2005, \$350,000 on multiple insured claims related to a single occurrence. The 2006 and 2007 reinsurance treaties provide for these same terms with API retaining an additional 10% of the aforementioned retention levels for 2006 and 20% for 2007. The reinsurance contracts for 2002 through 2007 contain variable premium ceding rates based on loss experience. The ceded premium charged under these contracts will depend upon the development of ultimate losses ceded to the reinsurers under their retrospective treaties. For the three and nine months ended September 30, 2007, we recorded favorable development to ceded premiums of \$2,435,000 and \$8,071,000, respectively, related to prior year variable premium reinsurance treaties as a result of lower estimated ultimate loss and loss adjustment expenses for treaty years 2002 through 2006. During the quarter ended September 30, 2007, we lowered our estimated ceded accrual rate for the 2007 treaty year to 16.7% from 17.5% of earned premium. The favorable development reflects reductions in our estimates of claim severity as a result of claim closures at less than reserved amounts.

In addition to an adjustment to premiums ceded, estimates of ultimate reinsurance ceded premium amounts compared to the amounts paid on a provisional basis give rise to a balance sheet asset classified as Other Amounts Receivable Under Reinsurance Contracts or a balance sheet liability classified as Funds Held Under Reinsurance Treaties. Furthermore, each retrospective treaty requires a 24 or 36 month holding period before any premium adjustments or cash can be returned or paid. The ultimate settlement amount is not determined until all losses have been settled under the respective treaties. As of September 30, 2007, API had recorded a balance sheet asset, Other Amounts Receivable Under Reinsurance Contracts of \$3,399,000 and a balance sheet liability, Funds Held Under Reinsurance Treaties of \$5,929,000, which represent the differences between the estimates of ultimate reinsurance premiums ceded amounts for the 2002 through 2007 treaty years as compared to the amounts paid on a provisional basis.

Reinsurance Recoverables. Ceded reserves for loss and loss adjustment expenses are recorded as reinsurance recoverables. Reinsurance recoverables are the estimated amount of future loss payments that will be recovered from reinsurers, and represent the portion of losses incurred during the period that are estimated to be allocable to reinsurers. There are several factors that can directly affect the ability to accurately forecast the reinsurance recoverables. Many of the factors discussed in Note 8 related to the sensitivities of forecasting total loss and loss adjustment expense reserves also apply when analyzing reinsurance recoverables. Since API cedes excess losses above \$250,000 on individual claims and \$350,000 on multiple insured claims, the trends related to severity significantly affect this estimate. Current individual claims severity can be above or fall below API's retention level over the period it takes to resolve a claim.

Similar to the estimate for reserves, due to the long-tailed nature of the medical professional liability line of insurance, relatively small changes in the actuarial assumptions for trends, inflation, severity and frequency for projected ultimate loss and loss adjustment expense reserves can have a greater impact on the recorded balance for reinsurance recoverables than with most other property and casualty insurance lines. While we believe that our estimate for ultimate projected losses related to loss and loss adjustment expense is adequate based on reported and open claim counts, there can be no assurance that additional significant reserve enhancements will not be necessary in the future given the many variables inherent in such estimates and the extended period of time that it can take for claim patterns to emerge.

Reinsurance contracts do not relieve API from its obligations to policyholders. API continually monitors its reinsurers to minimize its exposure to significant losses from reinsurer insolvencies. Any amount found to be uncollectible is written off in the period in which the uncollectible amount is identified. As of September 30, 2007, all of API's reinsurance contracts were with companies in strong financial condition, and we believe there is no need to establish an allowance for uncollectible reinsurance recoverable. API has not experienced any material problems collecting from its reinsurers.

[Return to Table of Contents](#)

Unsecured reinsurance recoverables at September 30, 2007, that exceeded 10% of total reinsurance paid and unpaid loss and loss adjustment expenses are summarized as follows (in thousands):

Company Name	September 30, 2007
Transatlantic Reinsurance	\$ 4,099
Swiss Reinsurance	\$ 12,589

Both Transatlantic Reinsurance and Swiss Reinsurance are A.M. Best rated A+ (Superior).

8.

Reserve for Loss and Loss Adjustment Expense

The reserve for unpaid losses and loss adjustment expenses represents the estimated liability for unpaid claims reported to us, plus claims incurred but not reported and the related estimated loss adjustment expenses. The reserve for losses and loss adjustment expenses is determined based on our actual experience, available industry data and projections as to future claims frequency, severity, inflationary trends and settlement patterns.

We write medical malpractice insurance policies which have a lengthy period for reporting a claim (tail coverage) and a long process of litigating a claim through the courts and whose risk factors expose its reserves for loss and loss adjustment expenses to significant variability. These conditions subject API's open reported claims and incurred but not reported claims to increases due to inflation, changes in legal proceedings and changes in the law. While the anticipated effects of inflation is implicitly considered when estimating reserves for loss and loss adjustment expenses, an increase in average severity of claims is caused by a number of factors. Future average severities are projected based on historical trends adjusted for changes in underwriting standards, policy provisions and general economic trends. Those anticipated trends are monitored based on actual experience and are modified as necessary to reflect any changes in the development of ultimate losses and loss adjustment expenses. These specific risks, combined with the variability that is inherent in any reserve estimate, could result in significant adverse deviation from our carried reserve amounts. Settlement of claims is subject to considerable uncertainty. We believe the reserves for loss and loss adjustment expenses are reasonably stated as of September 30, 2007.

We recorded \$4,624,000 and \$7,786,000 for losses and loss adjustment expenses for the three months and the nine months ended September 30, 2007, respectively, which included \$7,789,000 for the current accident year and

\$3,165,000 of favorable development for the three months ended September 30, 2007 and \$19,403,000 for the current accident year and \$11,617,000 of favorable development for prior report years for the nine months ended September 30, 2007. The favorable development for both periods was primarily the result of loss severity for the 2002 through 2006 report years developing favorably compared to prior period estimates. In addition, the total number of claims closed with indemnity for these report years were less than prior estimates.

9.

Contingencies

We are involved in various claims and legal actions that have arisen in the ordinary course of business. We believe that any liabilities arising from these actions will not have a significant adverse affect on our financial condition or results of operations.

[Return to Table of Contents](#)

10.

Earnings Per Share

Basic earnings per share are based on the weighted average shares outstanding without any dilutive effects considered. Diluted earnings per share reflect dilution from all contingently issuable shares, such as options. A reconciliation of income and weighted average shares outstanding used in the calculation of basic and diluted income per share from operations follows:

	Three Months Ended		Nine Months Ended

12.

Stock-Based Compensation

In December 2004, the Financial Accounting Standards Board issued SFAS No. 123 (revised 2004), *Share-Based Payment* (SFAS No. 123 (R)). The standard amends SFAS 123, *Accounting for Stock-Based Compensation*, and concludes that services received from employees in exchange for stock-based compensation results in a cost to the employer that must be recognized in the financial statements. The cost of such awards should be measured at fair value at grant date.

On January 1, 2006 we adopted SFAS No. 123(R). We use the Black-Scholes-Merton option-pricing model to determine the fair value of stock-based awards, consistent with that used for pro forma disclosures under SFAS No. 123, *Accounting for Stock-Based Compensation*. We have elected the modified prospective transition method as permitted by SFAS No. 123(R) and accordingly prior periods have not been restated to reflect the impact of SFAS No. 123(R). SFAS No. 123(R) requires that stock-based compensation be recorded for all new and unvested stock options expected to vest as the requisite service is rendered beginning January 1, 2006, the first day of our 2006 fiscal year. Stock-based compensation expense for awards granted on or before December 31, 2005, but unvested as of that date, is based on the grant date fair value as determined under the pro forma provisions of SFAS No. 123. For the three and nine months ended September 30, 2007, we recorded compensation cost related to stock options of \$126,000 and \$1,145,000 and a related reduction in income taxes of \$44,000 and \$401,000, respectively. The compensation cost is the total fair value, at date of grant, of stock options that vested during the three and nine month periods. No compensation costs were capitalized in the three and nine month periods ended September 30, 2007.

During the three and nine month periods ended September 30, 2007, 4,000 and 31,000 options were exercised with an intrinsic value of \$31,000 and \$352,000, respectively. We received proceeds of \$49,000 and \$183,000 from the exercise of these options during the three and nine month periods ended September 30, 2007, respectively. Based on unvested options outstanding at September 30, 2007 compensation costs to be recorded in future periods are expected to be recognized as follows: 2007, \$127,000; 2008, \$509,000; 2009, \$227,000 and 2010, \$20,000.

Our 2005 Incentive and Non-Qualified Stock Option Plan (Incentive Plan). The Incentive Plan provides for the issuance of up to 650,000 shares of common stock to our directors and key employees. A total of 555,000 of these options have been granted as of September 30, 2007 and 95,000 are available for grants. Of those granted, 8,000 shares have been exercised, 283,000 options are exercisable and 264,000 are not yet exercisable. Our previous plan, the 1995 Incentive and Non-Qualified Stock Option Plan, provided for the issuance of 1,600,000 shares of common stock to our directors and key employees. All of the approved options have been granted as of September 30, 2007, 1,185,000 shares have been exercised, 256,000 shares are exercisable and 159,000 options have been canceled. Upon the exercise of an option we issue the shares from our authorized, but unissued, shares.

The exercise price for each non-qualified option share is determined by the Compensation Committee of the Board of Directors (the Committee). The exercise price of a qualified incentive stock option has to be at least 100% of the fair market value of such shares on the date of grant of the option. Under the Plans, option grants are limited to a maximum of ten-year terms; however, the Committee has issued all currently outstanding grants with five-year terms. The Committee also determines vesting for each option grant and traditionally has had options vest in two to three approximately equal annual installments beginning one year from the date of grant.

Presented below is a summary of the stock options held by our employees and our directors and the related transactions for the three and nine months ended September 30, 2007.

	Three Months Ended		Nine Months Ended	
	September 30, 2007		September 30, 2007	
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
Balance at beginning of period	799,000	\$ 12.79	467,000	\$ 9.96
Options granted	8,000	17.50	368,000	15.94
Options exercised	(4,000)	11.33	(31,000)	5.94
Options forfeited	0	0	(1,000)	15.90
Balance at end of period	803,000	\$ 12.85	803,000	\$ 12.85
Options exercisable	538,000	\$ 10.83	538,000	\$ 10.83

[Return to Table of Contents](#)

The weighted average fair value of Company stock options granted is \$5.04 per option for the nine months ended September 30, 2007. The fair value of the options was calculated using the Black-Scholes-Merton option pricing model with the following assumptions:

	Nine Months ended September 30, 2007
Expected option term	3.7 years
Expected volatility	31.13%
Expected dividend yield	1.73%
Risk-free rate of return	4.49%

The expected volatility assumptions we used are based on the historical volatility of our common stock over the most recent period commensurate with the estimated expected life of our stock options, such estimated life being based on the historical experience of our stock option exercises.

The following table summarizes our outstanding and exercisable options at September 30, 2007:

Stock Options Outstanding				Stock Options Exercisable			
Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value (1)	Average Remaining Contractual Life	Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value (1)	Average Remaining Contractual Life
803,000	\$ 12.85	\$ 4,456,000	3.2 yrs.	538,000	\$ 10.83	\$ 4,075,000	2.6 yrs.

(1)

Based on the \$18.40 closing price of our stock at September 30, 2007.

13.

Secondary Stock Offering

On June 19, 2007, we announced that our public offering of 2,100,000 shares of common stock had priced at \$16.50 per share. Of the shares offered, 2,000,000 were offered by us, and Kenneth S. Shifrin, our Chairman of the Board and Chief Executive Officer, offered 100,000 of the 582,554 shares he owned at that date.

Net proceeds received by us from the secondary offering were approximately \$30,237,000 after deducting underwriting, legal, accounting, and publication fees. Of this total, we contributed \$10,000,000 to API to strengthen its capacity to underwrite insurance risks. The balance of the proceeds has been invested primarily in U.S. government and U.S. government agency securities and is available for general corporate purposes including possible acquisitions.

Total common shares outstanding increased from approximately 4,819,000 before the secondary offering to approximately 6,819,000 afterwards.

Pursuant to the secondary offering, the underwriters of the offering were granted a 30-day period to exercise an option to purchase up to 315,000 additional common shares from us. On July 12, 2007 we announced that the underwriters had exercised their over-allotment option to purchase all of these additional shares of common stock at the public offering price of \$16.50 per share. Net proceeds received by us related to this over-allotment option were approximately \$4,886,000.

Total common shares outstanding increased from approximately 6,819,000 before the sale of the over-allotment option to approximately 7,134,000 afterwards.

[Return to Table of Contents](#)

14.

Preferred Stock

In conjunction with the acquisition of API we issued 10,198 shares of Series A redeemable preferred stock, par value \$1.00 per share, from the 10,500 shares authorized. Holders of Series A redeemable preferred stock are entitled to cumulative dividends thereon at the rate of three percent (3%) per annum payable on the remaining redemption value per share, in priority to the payments of dividends on the common shares. Holders of our Series A redeemable preferred stock have no preemptive rights and have the same voting rights as the holders of our common stock. The shares are non-certificated and mandatorily redeemable. They will be redeemed ratably at not less than \$1,000,000 per year, with all remaining outstanding shares being redeemed by December 31, 2016. In June 2007, 1,019 shares of our Series A redeemable preferred stock were redeemed for a total cash pay-out of \$1,060,000, which included accrued dividends of \$40,000. In the event of any liquidation, the holders of our Series A redeemable preferred stock receive an amount equal to the remaining redemption value before any distribution is made to the holders of our common stock.

Pursuant to Financial Accounting Standards Board (FASB) Statement No. 150, *Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity* (FASB No. 150), an issuer is required to classify an instrument as a liability if it is issued in the form of shares that are mandatorily redeemable if it embodies an unconditional obligation that requires the issuer to redeem the shares by transferring the entity's assets at a specified or determinable date(s) or upon an event that is certain to occur. The preferred stock's mandatory cash redemption feature coupled with a fixed redemption date and fixed amount requires that it be classified as debt, rather than equity. As of September 30, 2007, the fair market value of the Series A redeemable preferred stock was \$8,397,000.

15.

Minority Interest

The 3% minority interest in Asset Management, a subsidiary within our financial services segment, owned by key individuals within Asset Management, was repurchased by APS Investment Services in the current quarter for a nominal amount.

16.

Income Taxes

As further disclosed in the Extraordinary Gain section of our Management's Discussion and Analysis section of this Quarterly Report on Form 10-Q, we recorded a tax-free extraordinary gain in the prior quarter in the amount of \$2,264,000 as a result of our acquisition of API. The result of this extraordinary gain was to reduce our effective income tax rate for the nine months ended September 30, 2007, from approximately 37.3% to approximately 34.1%.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

For purposes of this Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A), APS, we, our, us and the Company refer to American Physicians Service Group, Inc., together with its subsidiaries, unless the context requires otherwise. The following MD&A should be read in conjunction with the

accompanying consolidated financial statements for the three and nine months ended September, 2007, included in Part I, Item 1, As well as the audited, consolidated financial statements and notes in our Annual Report on Form 10-K for the year ended December 31, 2006, which was filed with the United States Securities and Exchange Commission (the SEC) on March 28, 2007.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This quarterly report contains forward-looking statements within the meaning of Section 27A of the Securities Act, Section 21E of the Exchange Act and the Private Securities Litigation Reform Act of 1995, about the Company that are subject to risks and uncertainties. All statements other than statements of historical fact included in this document are forward-looking statements.

[Return to Table of Contents](#)

You can identify forward-looking statements by the use of words such as may, target, should, could, estimate, predicts, potential, continue, anticipates, projects, forecasts, believes, plans, expects, future and other expressions which are intended to identify forward-looking statements. Forward-looking statements are based on beliefs and assumptions made by management using currently available information, such as market and industry materials, experts' reports and opinions and trends. These statements are not guarantees of future performance and are subject to risks, uncertainties and other factors, some of which are beyond our control and difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements. In evaluating forward-looking statements, you should carefully consider the risks and uncertainties referenced in Risk Factors in Part II, Item 1A. All forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by the cautionary statements and risk factors contained in this quarterly report. Forward-looking statements contained in this quarterly report reflect our view only as of the date of this report. We do not have any obligation, other than as required by law, to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

The following important factors, in addition to those referenced under Risk Factors in Part II, Item 1A, could affect the future results of our operations and could cause those results to differ materially from those expressed in or implied by such forward-looking statements:

general economic conditions, either nationally or in our market area, that are worse than expected;

changes in the healthcare industry;

regulatory and legislative actions or decisions that adversely affect our business plans or operations;

inflation and changes in the interest rate environment, the performance of financial markets and/or changes in the securities markets;

uncertainties inherent in the estimate of loss and loss adjustment expense reserves and reinsurance; changes in the availability or cost of reinsurance;

significantly increased competition among insurance providers;

potential losses and litigation risk associated with our financial services businesses;

loss of key executives, personnel, accounts or customers;

our ability to renew our existing reinsurance or obtain new reinsurance; and

failure of our reinsurers to pay claims in a timely manner.

The foregoing factors should not be construed as exhaustive and we caution you not to place undue reliance on these forward-looking statements, which speak only as of the date of this quarterly report. In addition to any risks and uncertainties specifically identified in the text surrounding forward-looking statements, you should consult with our other filings under the Securities Act of 1933 and the Securities Act of 1934, for factors that could cause our actual results to differ materially from those presented.

Business Overview

We provide (1) insurance services, specifically medical professional liability insurance in Texas and (2) financial services, including brokerage and investment services to individuals and institutions.

[Return to Table of Contents](#)

Insurance Services. We provide medical professional liability insurance primarily in Texas, where our insurance subsidiary, API, has written business for over 30 years. API is authorized to do business in the States of Texas, Arkansas and Oklahoma and specializes in writing medical professional liability insurance for physicians, dentists and other healthcare providers. We became authorized to do business in Oklahoma during the three month period ended September 30, 2007. API currently insures approximately 4,950 physicians, dentists, and other healthcare providers, the vast majority of which are in Texas. Approximately 99% of API's premiums are written through purchasing groups, which in Texas currently subjects us to less stringent state regulation of premium rates and policy forms. Historically, we operated as the attorney-in-fact manager for API since 1975. In April 2007, we acquired API, thus combining our insurance management experience with an insurance underwriting entity to allow for the increased possibility for expansion into new markets and to assist our efforts for continued growth in existing markets.

Financial Services. We provide investment and investment advisory services to institutions and individuals throughout the United States through the following subsidiaries:

o

APS Financial. APS Financial is a fully licensed broker/dealer that provides brokerage and investment services primarily to institutional and high net worth individual clients. APS Financial also provides portfolio accounting, analysis and other services to insurance companies, banks and public funds. We recognize commission revenue, and the related compensation expense, on a trade date basis.

o

APS Capital. APS Capital is dedicated to the clearing and settlement of trades involving syndicated bank loans, trade claims and distressed private loan portfolios. We seek to develop business with clients who trade in the high-yield bond market. We recognize commission revenue, and the related compensation expense, when the transaction is complete and fully funded.

o

APS Asset Management. APS Asset Management, a registered investment adviser under the Investment Advisers Act of 1940, manages fixed income and equity assets for institutional and individual clients on a fee basis. We recognize fee revenues monthly based on the amount of funds under management.

Recent Transactions

Acquisition. On April 1, 2007, we acquired all of the issued and outstanding stock of API. The business combination is being accounted for using the purchase method of accounting and, accordingly, the purchase price has been allocated to assets acquired and liabilities assumed based on fair values at the date of acquisition. The total purchase price was \$45,167,000 and consisted of consideration of 1,982,499 shares of the Company's common stock, valued at a per share price of \$17.635, or \$34,961,000 in aggregate, \$35,000 in cash paid in lieu of fractional shares of common stock, 10,197.95 shares of preferred stock valued at \$9,179,000, plus costs to complete the acquisition of \$992,000. We are required to redeem at least \$1 million of the preferred stock each calendar year beginning in 2007, until December 31, 2016, at which time all of the preferred stock must have been redeemed. The preferred stock has a cumulative dividend equal to 3% of the outstanding redemption value per year. On June 1, 2007, we made the first required payment, redeeming 10% of the preferred shares outstanding and paying the dividend.

Secondary Stock Offering. On June 19, 2007 we announced that our public offering of 2,100,000 shares of common stock had priced at \$16.50 per share. Of the shares offered, 2,000,000 were offered by us, and Kenneth S. Shifrin, our Chairman of the Board and Chief Executive Officer, offered 100,000 of the 582,554 shares he owned at that date.

The underwriters of the offering were granted a 30-day period to exercise an option to purchase up to 315,000 additional common shares from APS. On July 12, 2007, we announced that the underwriters had exercised their over-allotment option to purchase all of these additional shares of common stock at the public offering price of \$16.50 per share. Total common shares outstanding rose from approximately 4,819,000 before the over-allotment to approximately 7,134,000 afterwards.

Net proceeds received by the Company from the secondary offering, including the over-allotment, were approximately \$35,000,000 after subtracting underwriting, legal, accounting and publication fees. Of this total, we contributed \$10,000,000 to API to strengthen its capacity to underwrite insurance risks. The balance of the proceeds has been invested primarily in U.S. government and U.S. government agency securities and is available for general corporate purposes including possible acquisitions.

[Return to Table of Contents](#)

CRITICAL ACCOUNTING POLICIES AND ESTIMATES.

The preparation of our consolidated financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. On an on-going basis, we evaluate our estimates, including those related to: reserve for losses and loss adjustment expenses; death, disability and retirement reserves; reinsurance premiums recoverable/payable; premiums ceded; deferred policy acquisition costs, impairment of assets; bad debts; income taxes; and contingencies and litigation. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We believe the following critical accounting policies and estimates affect our more significant judgments and estimates used in the preparation of our consolidated financial statements. We periodically review the carrying value of our assets to determine if events and circumstances exist indicating that assets might be impaired. If facts and circumstances support this possibility of impairment, our management will prepare undiscounted and discounted cash flow projections, which require judgments that are both subjective and complex. Management may also obtain independent valuations.

Revenue Recognition. Historically, our insurance services segment recognized revenues in accordance with Staff Accounting Bulletin (SAB) No. 101, *Revenue Recognition in the Financial Statements*. Prior to April 1, 2007, our Insurance Services revenues were historically related to management fees based on the earned premiums of API and included a profit sharing component related to API s annual earnings. Management fees equaled 13.5% of API s earned premiums before payment of reinsurance premiums plus profit sharing equal to 50% of API s pre-tax earnings up to a maximum of 3% of earned premiums before payment of reinsurance premiums. Management fees were recorded, based upon the terms of the management agreement, in the period the related premiums are earned by API. API recognizes premiums as earned ratably over the terms of the related policy. The profit sharing component was historically recognized in the fourth quarter when it was certain API would have an annual profit. In 2007, however, since the management contract ended March 31, 2007, we recognized the quarter s profit in March, based on our ability to fully determine the profit sharing base.

As a result of the acquisition, our insurance services segment recognizes revenue in accordance with SFAS No. 60, *Accounting and Reporting of Insurance Enterprises*. We issue policies written on a claims-made basis. A claims-made policy provides coverage for claims reported during the policy year. We charge both a base premium and a premium maintenance fee. Policies are written for a one-year term and premiums and maintenance fees are earned on a pro rata basis over the term of the policy. Premium maintenance fees are charged to offset the costs incurred by API to issue and maintain policies. Unearned premiums and maintenance fees are determined on a monthly pro rata basis. Upon termination of coverage, policyholders may purchase an extended reporting period (tail) endorsement for additional periods of time. These extended reporting period coverage endorsement premiums are earned when written.

Our financial services revenues are composed primarily of commissions on securities trades and clearing of trade claims and asset management fees. Revenues related to securities transactions are recognized on a trade date basis. Revenues from the clearing and settlement of trades involving syndicated bank loans, trade claims and distressed private loan portfolios are recognized when the transaction is complete and fully funded. Asset management fees are

recognized as a percentage of assets under management during the period based upon the terms of agreements with the applicable customers.

Investments. We account for our equity and fixed-income securities as available-for-sale. In the event a decline in fair value of an investment occurs, management may be required to determine if the decline in market value is other than temporary. Our policy is to account for investments as available-for-sale securities which requires that we assess fluctuations in fair value and determine whether these fluctuations are temporary or other than temporary as defined in SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, . Management's assessments as to the nature of a decline in fair value are based on the quoted market prices at the end of a period, the length of time an investment's fair value has been in decline and our ability and intent to hold the investment until a recovery in value. If the fair value is less than the carrying value and the decline is determined to be other than temporary, a write-down is recorded against earnings in the period such determination is made.

[Return to Table of Contents](#)

Asset Impairment. We periodically review the carrying value of our assets to determine if events and circumstances exist indicating that assets might be impaired. If facts and circumstances support this possibility of impairment, our management will prepare undiscounted and discounted cash flow projections, which require judgments that are both subjective and complex. Management may also obtain independent valuations. In accordance with SFAS No. 142, *Goodwill and Other Intangibles*, intangible assets with indefinite lives are not amortized but are subject to annual tests for impairment or more often if events or circumstances indicate they may be impaired. Other identified intangible assets are amortized over their estimated useful lives and are subject to impairment if events or circumstances indicate a possible inability to realize the carrying amount.

Business Combinations. We recorded all assets and liabilities acquired in the acquisition of API, including indefinite-lived intangibles, and other intangibles, at fair value as required by SFAS No. 141, *Accounting for Business Combinations*. The initial recording of other intangibles requires subjective judgments concerning estimates of the fair value of the acquired assets and liabilities. Based on our review of the fair value of assets acquired in the acquisition of API on April 1, 2007, there was no goodwill and we recorded an extraordinary gain of \$2,264,000 during the three months ended June 30, 2007 for the excess of net assets received over cost to acquire.

Reserve for Loss and Loss Adjustment Expense. Loss and loss adjustment expense reserves represent management's best estimate of the ultimate costs of all reported and unreported losses incurred. The reserves for unpaid losses and loss adjustment expenses are estimated using actuarial analysis. These estimates include expectations of what the ultimate settlement and administration of claims will cost based on the Company's assessments of facts and circumstances then known, review of historical settlement patterns, estimates in trends in loss severity, frequency, legal theories of liability and other factors. Other factors include the nature of the injury, the judicial climate where the insured event occurred and trends in health care costs. In addition, variables in reserve estimation can be affected by internal and external events, such as economic inflation, legal trends and legislative changes. The estimation of medical professional liability loss and loss adjustment expense is inherently difficult. Injuries may not be discovered until years after the incident, or a claimant may delay pursuing recovery for damages. Medical liability claims are typically resolved over an extended period of time, often five years or more.

The combination of changing conditions and the extended time required for claim resolution results in a loss estimation process that requires actuarial skill and the application of judgment, and such estimates require periodic revisions. Management performs an in-depth review of the reserve for unpaid losses and loss adjustment expenses periodically with assistance from our outside consulting actuary. Management is continually reviewing and updating the data underlying the estimation of the loss and loss adjustment expense reserves and we make adjustments that we believe the emerging data indicates. Any adjustments to reserves that are considered necessary are reflected in the results of operations in the period the estimates are changed.

Reinsurance Premiums Ceded. Under our primary medical professional liability reinsurance contract, certain premiums are ceded to other insurance companies. The reinsurance contract provides coverage for losses in excess of API's retention of \$250,000 on individual claims and beginning in 2002, \$350,000 on multiple insured claims related to a single occurrence. The 2006 reinsurance contract provides for these same terms with API retaining 10% of the risk above the aforementioned \$250,000 and \$350,000 retention levels. The 2007 reinsurance contract provides for the same terms with API retaining 20% of the risk above the \$250,000 and \$350,000 retention levels. The reinsurance contracts for 2002 through 2007 contain variable premium ceding rates based on loss experience and thus, a portion of policyholder premium ceded to the reinsurers is calculated on a retrospective basis. The variable premium contracts are subject to a minimum and a maximum premium range to be paid to the reinsurers, depending on the extent of losses actually paid by the reinsurers. A provisional premium is paid during the initial policy year. The actual percentage rate ultimately ceded under these contracts will depend upon the development of ultimate losses ceded to

the reinsurers under their retrospective treaties.

To the extent that estimates for unpaid losses and loss adjustment expenses change, the amount of variable reinsurance premiums may also change. The ceded premium estimates are based upon management's estimates of ultimate losses and loss adjustment expenses and the portion of those losses and loss adjustment expenses that are allocable to reinsurers under the terms of the related reinsurance contracts. Given the uncertainty of the ultimate amounts of losses and loss adjustment expenses, these estimates may vary significantly from the ultimate outcome. In addition to the in-depth review of reserves for unpaid losses and loss adjustment expenses, periodically, API also has its outside consulting actuary review development in the reinsurance layer or excess of \$250,000 retention for each open variable premium treaty year. Management reviews these estimates and any adjustments necessary are reflected in the period in which the change in estimate is determined. Adjustment to the premiums ceded could have a material effect on API's results of operations for the period in which the change is made.

[Return to Table of Contents](#)

Reinsurance Recoverables. Ceded reserves for loss and loss adjustment expenses are recorded as reinsurance recoverables. Reinsurance recoverables are the estimated amount of future loss payments that will be recovered from reinsurers, and represent the portion of losses incurred during the period that are estimated to be allocable to reinsurers. There are several factors that can directly affect the ability to accurately forecast the reinsurance recoverables. Many of the factors discussed above related to the sensitivities of forecasting total loss and loss adjustment expense reserves also apply when analyzing reinsurance recoverables. Since API cedes excess losses above \$250,000 on individual claims and \$350,000 on multiple insured claims, the trends related to severity significantly affect this estimate. Current individual claims severity can be above or fall below API's retention level over the period it takes to resolve a claim. Furthermore, tort reform in Texas has been in effect since the latter part of 2003 and has lowered claim counts but the trends of severity payouts are only beginning to emerge.

Similar to the estimate for reserves, due to the long-tailed nature of the medical professional liability line of insurance, relatively small changes in the actuarial assumptions for trends, inflation, severity, frequency for projected ultimate loss and loss adjustment expense reserves can have a greater impact on the recorded balance for reinsurance recoverables than with most other property and casualty insurance lines. While we believe that our estimate for ultimate projected losses related to loss and loss adjustment expense is adequate based on reported and open claim counts, there can be no assurance that additional significant reserve enhancements will not be necessary in the future given the many variables inherent in such estimates and the extended period of time that it can take for claim patterns to emerge.

Reinsurance contracts do not relieve API from its obligations to policyholders. We continually monitor our reinsurers to minimize our exposure to significant losses from reinsurer insolvencies. Any amount found to be uncollectible is written off in the period in which the uncollectible amount is identified. As of September 30, 2007, all of our reinsurance contracts were with companies in strong financial condition, and management believes there is not a need to establish an allowance for uncollectible reinsurance recoverable. We have not experienced any material problems collecting from our reinsurers.

Stock-Based Compensation. In December 2004, the FASB issued a revision (SFAS No. 123(R)) to SFAS No. 123, *Accounting for Stock-Based Compensation* (SFAS No. 123), and we were required to adopt SFAS No. 123(R) in the first quarter of 2006. SFAS No. 123(R) supersedes Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* (APB No. 25), and related Interpretations, and requires that all stock-based compensation, including options, be expensed at fair value, as of the grant date, over the vesting period. Companies are required to use an option pricing model (e.g.: Black-Scholes or Binomial) to determine compensation expense, consistent with the model previously used in the already required disclosures of SFAS No. 148, *Accounting for Stock-Based Compensation-Transition and Disclosure*. The adoption of SFAS No. 123(R) has not had a material effect on the Company's financial position, operations or cash flow.

At September 30, 2007, we have several stock-based compensation plans, which are described more fully in Notes 12 and 13 to the audited consolidated financial statements contained in our most recently filed Annual Report on Form 10-K. Prior to January 1, 2006, we accounted for these plans under the recognition and measurement principles of APB No. 25, under which stock-based employee compensation cost was not reflected in net income, as all options granted under these plans had an exercise price equal to the market value of the underlying common stock on the date of grant. In accordance with SFAS No. 123, as amended by SFAS No. 148, we provided footnote disclosure of the

pro forma stock-based compensation cost, net loss and net loss per share as if the fair-value based method of expense recognition and measurement prescribed by SFAS No. 123 had been applied to all employee options.

Deferred Policy Acquisition Costs. The costs of acquiring and renewing insurance business that vary with and are directly related to the production of such business are deferred and amortized ratably over the period the related unearned premiums and maintenance fees are earned. Such costs include commissions, premium taxes and certain underwriting and policy issuance costs. Deferred acquisition costs are recorded net of ceding commissions. Deferred policy acquisition costs are reviewed to determine if they are recoverable from future income, including investment income. If such costs are estimated to be unrecoverable, they are expensed in the period the determination is made.

[Return to Table of Contents](#)

Income Taxes. We compute income taxes utilizing the asset and liability method. We recognize current and deferred income tax expense, which is comprised of estimated provisions for federal income taxes. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. A valuation allowance against deferred tax assets is recorded if it is more likely than not that all or some portion of the benefits related to the deferred tax assets will not be realized. We have not established a valuation allowance because we believe it is more likely than not our deferred tax assets will be fully recovered. In July 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109* (FIN 48), which we adopted on January 1, 2007. FIN 48 clarifies the accounting for income tax uncertainties. The company has developed and implemented a process based on the guidelines of FIN 48 to ensure that uncertain tax positions are identified, analyzed and properly reported in the company's financial statements in accordance with SFAS 109. Based on all known facts and circumstances and current tax law, we believe that the total amount of unrecognized tax benefits as of January 1, and September 30, 2007, is not material to its results of operations, financial condition or cash flows. We also believe that the total amount of unrecognized tax benefits as of January 1, and September 30, 2007, if recognized, would not have a material effect on our effective tax rate. We further believe that there are no tax positions for which it is reasonably possible that the unrecognized tax benefits will significantly increase or decrease over the next 12 months producing, individually or in the aggregate, a material effect on our results of operations, financial condition or cash flows.

RESULTS OF OPERATIONS

With the acquisition of API on April 1, 2007, our consolidated revenue and earnings will be predominately derived from medical professional liability insurance provided through our Insurance Services segment. Prior to April 1, 2007, the historical results of operations of our Insurance Services segment were determined by the management fees we received from API pursuant to a management agreement and the expenses incurred in managing API's operations such as personnel expenses, rent, office expenses and technology costs. The management agreement obligated API to pay management fees to us based on API's earned premiums before payment of reinsurance premiums. The management fee percentage was 13.5% of API's earned premiums. In addition, any pre-tax profits of API were shared equally with us (profit sharing) so long as the total amount of profit sharing did not exceed 3% of earned premiums. When we acquired API, our management agreement with API was terminated and our consolidated results of operations are no longer affected by management fees from API; but, rather our results of operations are now directly affected by premiums API earns from the sale of medical professional liability insurance, investment income earned on assets held by API, insurance losses and loss adjustment expenses relating to the insurance policies API writes as well as commissions and other insurance underwriting and policy acquisition expenses API incurs.

The following table sets forth selected historical financial and operating data for the Company. The results of operations for the nine months ended September 30, 2007 include the historical financial and operating results of the Company prior to and subsequent to the acquisition of API on April 1, 2007. The results of operations for the three months ended September 30, 2007 includes only the historical financial and operating results of the Company subsequent to the acquisition of API on April 1, 2007. For comparative purposes, we have also included on a pro forma basis the results of operations for the three months ended and nine months ended September 30, 2007 and 2006 of the Company and API as if the acquisition had occurred on January 1, 2007 and 2006, respectively. Any reference

in the MD&A Section below to on a pro forma basis is as if the Company acquired API on January 1, 2007 and 2006, respectively.

The income statement data below for the three months and nine months ended September 30, 2007 and 2006, is derived from our consolidated unaudited financial statements which management believes incorporate all of the adjustments necessary for the fair presentation of the financial condition and results of operations for such periods. All information is presented in accordance with GAAP, but may not be comparable as data stated for periods 2006 and later were impacted by the implementation of SFAS No. 123(R). Actual financial results through September 30, 2007 may not be indicative of future financial performance. Equity compensation expense of approximately \$1,200,000 related to our acquisition of API is included in the nine-month period ended September 30, 2007.

(1) Loss ratio is defined as the ratio of losses and loss adjustment expenses to net premiums and maintenance fees earned.

(2) Expense ratio is defined as the ratio of other underwriting expenses and net change in deferred acquisition costs to net premiums and maintenance fees earned.

(3) Combined ratio is the sum of the loss ratio and the expense ratio.

(4) Ratios are not applicable for the three months ended September 30, 2006 Actual Column and the nine months ended September 30, 2007 and 2006 Actual Columns as the acquisition of API occurred on April 1, 2007.

The discussion that follows should be read in connection with the unaudited Condensed Financial Statements and Notes thereto included elsewhere in this report. For additional information regarding the pro forma results of operations of the Company and API had the transaction occurred on January 1, 2007 and 2006, respectively, please see Note 3 to the Unaudited Financial Statements.

Revenues increased \$15,754,000 (221%) to \$22,879,000 from \$7,125,000 and increased \$38,836,000 (170%) to \$61,618,000 from \$22,782,000 for the three month and nine month periods ended September 30, 2007, respectively, compared to the same periods in 2006. Our income from operations increased \$8,281,000 (1,292%) to \$8,922,000 from \$641,000 and increased \$21,500,000 (876%) to \$23,954,000 from \$2,454,000 in the three and nine month periods ended September 30, 2007, respectively, compared to the same periods in 2006. Our net income increased \$4,883,000 (1,194%) to \$5,292,000 from \$409,000 and increased \$15,699,000 (1,001%) to \$17,268,000 from \$1,569,000 in the three and nine month periods ended September 30, 2007, respectively, compared to the same periods in 2006. Lastly, our diluted net income per share increased \$0.59 (421%) to \$0.73 from \$0.14 and increased \$2.84 (538%) to \$3.37 from \$0.53 in the three and nine month periods ended September 30, 2007, respectively, compared to the same periods in 2006. The explanations for these changes are described below.

Gross premiums and maintenance fees written. Gross premiums and maintenance fees written increased to \$22,239,000 and \$37,284,000 from \$0 for the three and nine months ended September 30, 2007, respectively, as

compared to the same periods in 2006 as a result of the acquisition of API on April 1, 2007. On a pro forma basis, gross premiums and maintenance fees written decreased \$1,882,000 (8%) to \$22,239,000, from \$24,121,000 and \$8,811,000 (14%) to \$52,749,000 from \$61,560,000 for the three and nine month periods ended September 30, 2007, respectively, compared to the same periods in 2006. While API increased in the number of policyholders to 4,967 at September 30, 2007 from 4,578 at September 30, 2006, gross premiums and maintenance fees written decreased due to rate decreases which averaged 13% and 16% for the three and nine months ended September 30, 2007.

[Return to Table of Contents](#)

Premiums Ceded. Premiums ceded decreased to \$504,000 and \$3,922,000 from \$0 for the three and nine months ended September 30, 2007, as compared to the same periods in 2006 as a result of the acquisition of API on April 1, 2007. On a pro forma basis, premiums ceded expenses decreased \$3,876,000 to \$504,000 from (\$3,372,000) and \$7,142,000 to \$1,515,000 from (\$5,627,000) for the three and nine months ending September 30, 2007, respectively, as compared to the same periods in 2006. The reinsurance contracts beginning in 2002 through 2007 are variable premium treaties that have various minimum and maximum rates. The actual premium rate will depend upon the ultimate losses ceded to the reinsurer under the related treaty. The Company, supported periodically by outside consulting actuarial reviews, continually monitors the development of claims subject to reinsurance and adjusts premiums ceded for estimated profit sharing provisions based on claims development in the reinsurance layers. The pro forma decrease in premiums ceded of \$3,876,000 and \$7,142,000 for the three months and nine months ended September 30, 2007, as compared to the same period in 2006, is primarily the result of lower estimated ceding rates due to lower estimated loss and loss adjustment expenses for prior treaty years 2002 through 2006. This prior year favorable development in the reinsurance layer resulted in us recognizing \$2,435,000 and \$8,071,000 as a reduction to ceded premiums in the three and nine months ended September 30, 2007 as compared to \$0 and \$4,310,000 of prior year favorable development in the pro forma three and nine months ended September 30, 2006. Based on lower claims frequency than anticipated for the current 2007 treaty, the Company recognized \$305,000 as an additional reduction of ceded premium during the current quarter. Additionally, API increased its participation in the excess loss treaty from 10% in 2006 to 20% of any claim in excess of \$250,000 on individual claims and \$350,000 on multiple insured claims in 2007, which resulted in a lower cost of reinsurance than in 2006. API increased its retention in 2006 and 2007 based on decreases in claims experience since the passage of tort reform legislation in 2003.

Net Premiums and Maintenance Fees Earned. Net premiums and maintenance fees earned increased by \$17,631,000 and \$38,077,000 from \$0 for the three and nine months ended September 30, 2007 as compared to the same periods in 2006 as a result of the acquisition of API on April 1, 2007. On a pro forma basis, net premiums and maintenance fees earned increased by \$2,548,000 (17%) to \$17,631,000 from \$15,083,000 and increased by \$1,982,000 (4%) to \$54,388,000 from \$52,406,000 for the three and nine months ended September 30, 2007 as compared to the same periods in 2006. The increase for the three and nine months ending September 30, 2007 as compared to the same periods in 2006 was mainly due to favorable development of \$2,435,000 and \$8,071,000, respectively, on the 2002-2006 variable premium reinsurance treaties offset by average rate decreases of 13% and 16% for the three and nine months ended September 30, 2007, respectively.

Investment Income. Investment income, net of investment expenses increased by \$2,655,000 (1,066%) to \$2,904,000 from \$249,000 and \$5,075,000 (760%) to \$5,743,000 from \$668,000 for the three and nine months ended September 30, 2007, respectively, as compared to the same periods in 2006 as a result of the acquisition of API on April 1, 2007. On a pro forma basis, investment income, net of investment expenses, increased by \$836,000 (40%) to \$2,904,000 from \$2,068,000 and increased \$1,954,000 (35%) to \$7,570,000 from \$5,616,000 for the three and nine months ended September 30, 2007 as compared to the same periods for 2006. On a pro forma basis, invested assets increased by \$71,022,000 (53%) to \$206,241,000 at September 30, 2007 from \$155,617,000 at September 30, 2006 resulting in the increase in investment income. The increase in invested assets resulted primarily from the use of proceeds of our common stock offering as well as from positive net cash flow from operating activities.

Realized Capital Gains (Loss). Realized capital losses increased by \$3,285,000 to \$3,195,000 from a gain of \$90,000 and increased \$3,769,000 to \$3,659,000 from a gain of \$110,000 for the three and nine months ended September 30, 2007 as compared to the same periods of 2006. On a pro forma basis, realized capital losses increased by \$3,332,000 to \$3,195,000 from a gain of \$137,000 and increased \$3,732,000 to \$3,452,000 from a gain of \$280,000 for the three and nine months ended September 30, 2007, respectively, as compared to same periods in 2006. The increase in losses for the three and nine month periods ended September 30, 2007 as compared to the same periods in 2006 is primarily due to other than temporary impairment charges of \$3,140,000 in the three months ended September 30, 2007, resulting from fair market value declines in our investment in Alt-A collateralized mortgage-backed securities. See Note 5 to the condensed consolidated financial statements for a more detailed explanation of this other-than temporary impairment of these securities.

Management Services Revenue. Prior to the acquisition of API, the historical results of operations of our insurance services segment were determined by the management fees we received from API pursuant to a management agreement and the expenses incurred in managing API's operations. In conjunction with the merger with API on April 1, 2007, our management agreement was terminated as of March 31, 2007 and as such is no longer included in our consolidated results of operations. Management services revenue decreased by \$3,656,000 to \$70,000 from \$3,726,000 and decreased \$6,791,000 to \$3,765,000 from \$10,556,000 for the three and nine months ended September 30, 2007, respectively, compared to the same periods in 2006. As a result of our acquisition of API, we recorded management fee revenue including the contingent management fee only through the quarter ended March 31, 2007. However, comparable periods for the three months and nine months ended September 30, 2006 include management fee revenue on an annual basis.

[Return to Table of Contents](#)

Financial Services Revenues. Our financial services revenue increased \$2,386,000 (78%) to \$5,434,000 from \$3,048,000 and increased \$6,240,000 (55%) to \$17,623,000 from 11,383,000 in the three and nine month periods ended September 30, 2007, respectively, compared to the same periods in 2006. The increases in both current year periods were primarily the result of higher commission revenues earned at APS Financial, the broker/dealer, which derives most of its revenue from transactions in the fixed income market, in both investment and non-investment grade securities. Commission revenues increased \$1,804,000 (84%) and \$5,199,000 (67%) in the three and nine month periods ended September 30, 2007, respectively, compared to the same periods in 2006. Revenue from our trading in mortgage related securities picked up during the quarter as a result of the well publicized problems in the residential loan market. Some investors in this asset class liquidated positions, while others viewed the current market conditions as an opportunity to invest at distressed price levels. Revenue from trading of corporate high yield bonds was also satisfactory during the third quarter due to customer activity in investments of certain distressed and bankrupt companies. Also contributing to our increased revenues was the continued growth of transactions in bank debt and trade claims which increased \$551,000 (160%) to \$896,000 from \$345,000 and \$1,691,000 (143%) to \$2,870,000 from \$1,179,000 for the three and nine month periods ended September 30, 2007, respectively, compared to the same periods in 2006.

Loss and Loss Adjustment Expenses. As a result of the acquisition of API on April 1, 2007, loss and loss adjustment expenses increased to \$4,624,000 and \$7,786,000 from \$0 for the three and nine months ended September 30, 2007, respectively, as compared to the same periods in 2006. On a pro forma basis, loss and loss adjustment expenses for the three months ended September 30, 2007 decreased by \$5,619,000 (55%) to \$4,624,000 from \$10,243,000 for the three months ended September 30, 2006. The decrease of \$5,619,000 on a pro forma basis is the result of a lower accident year loss and loss adjustment expense and higher favorable development on prior year losses as compared to 2006. For the three months ended September 30, 2007, current accident year loss and loss adjustment expenses totaled \$7,789,000 based on 89 claims reported and prior year losses developed favorably \$3,165,000 as a result of reductions in our estimates of claims severity, principally the 2002 through 2006 report years. For the three months ended September 30, 2006, current accident year loss and loss adjustment expenses were \$10,259,000 based on 160 claims reported and there was \$21,000 favorable development for the three months ended. On a pro forma basis, for the nine months ended September 30, 2007, loss and loss adjustment expenses decreased by \$9,715,000 (34%) to \$18,750,000 from \$28,465,000 for the nine months ended September 30, 2006. The decrease on a pro forma basis is the result of higher favorable development on prior year losses of \$11,556,000 for the nine months ended September 30, 2007 as compared to \$1,735,000 of favorable development on prior year losses for the nine months ended September 30, 2006. The effects of 2003 tort reform in Texas on average claim severity post-reform are emerging favorably and resulting in improved claim development patterns. Since the passage of reform, API has favorably settled a number of post-tort reform claims from the 2004 and 2005 report years. On a pro forma basis, even though reported claims have decreased for the nine months ended September 30, 2007 by 123 to 286 from 409 for the nine months ended September 30, 2006, our current 2007 accident year loss and loss adjustment expenses remains comparable to the 2006 accident year. We continue to accrue our current accident year losses conservatively based on increases in policyholder count from 4,578 as of September 30, 2006 to 4,967 as of September 30, 2007.

We continually review and update the data underlying the estimation of the loss and loss adjustment expense reserves and make adjustments that we believe the emerging data warrant. Any adjustments to reserves that are considered necessary are reflected in the results of operations in the period the estimates are changed. As of September 30, 2007, we continue to reserve at the upper end of the reserve range.

Other Underwriting Expenses and Net Change in Deferred Acquisition Costs. Other underwriting expenses increased to \$3,262,000 and \$5,696,000 from \$0 for the three and the nine months ended September 30, 2007, respectively, as compared to the same periods in 2006 as a result of the acquisition of API on April 1, 2007. On a pro forma basis, other underwriting expenses decreased by \$369,000 (10%) to \$3,262,000 from \$3,631,000 and decreased \$483,000 (5%) to \$9,053,000 from \$9,536,000 for the three months and the nine months ended September 30, 2007, respectively, as compared to the same periods in 2006. Other underwriting expenses consist primarily of commissions to agents, premium taxes and other general underwriting expenses related to managing our insurance services segment. The pro forma decrease of \$369,000 and \$483,000 for the three and nine months ended September 30, 2007, respectively as compared to the same periods for September 30, 2006, is mainly attributable to conversion and higher merger related expenses and agent commissions in the prior year period as compared to the current year. Net change in deferred acquisition costs decreased to \$(444,000) and \$(287,000) from \$0 for the three months and the nine months ended September 30, 2007, respectively, as compared to the same periods in 2006 as a result of the acquisition of API on April 1, 2007. On a pro forma basis, the net change in deferred acquisition costs, which is comprised of the change in deferred and amortized commissions paid to agents on new and renewal business and deferred and amortized premium taxes, decreased for three months ending September 30, 2007 by \$17,000 (4%) to \$(444,000) from \$(427,000) for the comparable period in 2006 due to the new costs capitalized exceeding amortization of expenses. Deferred acquisition costs increased for nine months ending September 30, 2007, by \$210,000 (59%) to \$(146,000) from \$(356,000) for the comparable period in 2006 due to the amortization of expenses exceeding new costs capitalized.

[Return to Table of Contents](#)

Management Service Expenses. Prior to the acquisition of API, the historical results of operations of our insurance services segment were determined by the management fees we received from API pursuant to a management agreement and the expenses incurred in managing API's operations. In conjunction with the merger with API on April 1, 2007, our management agreement was terminated as of March 31, 2007 and as such is no longer included in our consolidated results of operations. Thus, as a result of the merger, insurance management services expenses decreased by \$3,147,000 (100%) to \$ 0 from \$3,147,000 and \$4,725,000 (55%) to \$3,823,000 from \$8,548,000 in the three and nine month periods ended September 30, 2007, respectively, compared to the same periods in 2006. Insurance services expenses were recorded only through the quarter ended March 31, 2007. However, comparable periods for the three months and nine months ended September 30, 2006 include insurance services expenses on an annual basis.

Financial Services Expenses. Our financial services expenses increased \$1,993,000 (68%) to \$4,907,000 from \$2,914,000 and increased \$5,240,000 (51%) to \$15,599,000 from \$10,359,000 in the three and nine month periods ended September 30, 2007, respectively, compared to the same periods in 2006. The primary reason for the current year increase is a \$1,427,000 (86%) and \$4,011,000 (64%) increase in commission expense in the current year three and nine month periods, respectively, compared to the same periods in 2006. This resulted from the increase of commissions paid on non-investment grade bond and trade claim transactions mentioned above. In addition, incentive compensation costs increased \$62,000 (36%) and \$659,000 (122%) in the current three and nine months, respectively, as a result of increased profits and surpassing certain minimum thresholds earlier in the year. Legal and professional expenses were higher by \$101,000 (77%) and \$250,000 (98%) for the current year three and nine months, respectively, due to costs incurred for litigation concerning certain transactions and for expenses to further our efforts to become compliant with the Sarbanes-Oxley Act of 2002. In addition, a claim was settled in the current period in the amount of \$160,000 resulting from a disputed trade claim transaction.

General and Administrative Expenses. General and administrative expenses increased \$1,185,000 (280%) to \$1,608,000 from \$423,000 and increased \$2,379,000 (167%) to \$3,800,000 from \$1,421,000 in the three month and nine month periods ended September 30, 2007, respectively, compared to the same periods in 2006. The increase in general and administrative expenses in the current quarter includes higher salaries of \$144,000 or 82% resulting from our hiring a new Chief Operating Officer and new administrative assistant in April of 2007; higher incentive compensation of \$171,000 or 131%, a formula-driven expense that is higher in 2007 due to the large increase in net earnings; higher board fees of \$265,000 or 2,263% resulting from deferred compensation awarded as a result of the successful merger as well as due to a greater number of directors and a greater number of board meetings necessitated by the merger with API and the common stock secondary offering; higher professional fees of \$181,000 or 337% resulting from internal control expenditures to further our efforts to become compliant with the Sarbanes-Oxley Act of 2002; and higher interest of \$281,000 resulting from interest and preferred stock dividends due to our preferred share holders. The increase in general and administrative expenses for the nine months ended September 30, 2007, current year includes higher salaries of \$252,000 or 48%; higher incentive compensation of \$679,000 or 178%; higher board fees of \$415,000 or 470%; higher legal and professional of \$284,000 or 174%; and higher interest expense of \$379,000. All of the explanations provided for the current quarter variances apply to the nine month variances.

Loss from Impairment of Goodwill. Goodwill arose upon the repurchase of an interest in APS Insurance Services from a minority holder in 2003. Goodwill was determined to exist based on earnings expected to be generated from the management agreement with API. With our purchase of API and termination of the management agreement the question of impairment of the goodwill was raised. Upon review, we determined that the original circumstances creating the goodwill no longer existed and that the entire \$1,247,000 balance was impaired. The goodwill was written off in the quarter ended June 30, 2007.

Minority Interest. The 3% minority interest in Asset Management, a subsidiary within our financial services segment, owned by key individuals within Asset Management, was repurchased by APS Investment Services in the current quarter for a nominal amount.

Extraordinary Gain. Our extraordinary gain represents the excess of the assets received over the costs to acquire all of the issued and outstanding stock of API. The business combination is being accounted for using the purchase method of accounting and, accordingly, the purchase price has been allocated to assets acquired and liabilities assumed based on fair values at April 1, 2007, the date of acquisition. The total purchase price was approximately \$45,167,000 and consisted of consideration of 1,982,499 shares of the Company's common stock, valued at a per share price of \$17.635, or \$34,961,000 in aggregate, \$35,000 in cash paid in lieu of fractional shares of common stock, 10,197.95 shares of preferred stock valued at \$9,179,000, plus costs to complete the acquisition of \$992,000. The net fair value of the assets acquired and the liabilities assumed was \$47,431,000. The resulting excess of assets received over costs to acquire was recorded as an extraordinary gain in accordance with SFAS No. 141, *Accounting for Business Combinations*

[Return to Table of Contents](#)

LIQUIDITY AND CAPITAL RESOURCES

The primary sources of our liquidity for the nine months ended September 30, 2007, are funds provided by insurance premiums collected, net investment income, recoveries from reinsurers and proceeds from the maturity and sale of invested assets and principal receipts from our mortgage-backed securities. In addition, a large non-recurring source of funds in 2007 resulted from our secondary common stock offering of 2,315,000 shares. The primary uses of cash are losses from insurance claims, loss adjustment expenses, operating expenses, the acquisition of invested assets and fixed assets, reinsurance premiums and federal income taxes.

Cash Flows. Our total cash and cash equivalents balance at September 30, 2007, was \$14,788,000, an increase of \$10,546,000 (249%) in the current year as cash provided by operating and financing activities more than offset net cash used in investing activities. Our cash flows provided from operating activities totaled \$7,043,000 for the current year on the strength of net income before extraordinary gains of \$15,004,000. Our Insurance Services segment generated the bulk of the cash received from operating activities, the result of increased premium and maintenance fee receipts and decreased claims payouts. Cash provided by financing activities contributed \$32,342,000 for the nine months ended September 30, 2007 as a result of cash received from our secondary offering of common stock totaling approximately \$30,237,000 as well as cash received from an over-allotment sale of an additional 315,000 shares which contributed another \$4,846,000. Partially offsetting this was a dividend paid to our common stock shareholders (\$1,416,000) and a partial redemption of our preferred stock (\$1,018,000). Our cash flows used in investing activities totaled \$28,839,000 in 2007 primarily as a result of purchases of available-for-sale fixed income securities in excess of proceeds from their sale. Partially offsetting this use of cash from investing activities was cash totaling \$9,910,000 received as part of the assets acquired from our acquisition of API. For details of the amounts described above, refer to the Condensed Consolidated Statements of Cash Flows on page 7 of this Form 10-Q.

Historically, we have maintained a strong working capital position and, as a result, we have been able to satisfy our operational and capital expenditure requirements with cash generated from our operating and investing activities. These same sources of funds have also allowed us to pursue investment and expansion opportunities consistent with our growth plans. Although there can be no assurance our operating activities will provide positive cash flow for the remainder of 2007, we are optimistic that our working capital requirements will be met for the foreseeable future for the following reasons: (1) our current cash position is very strong, with a balance of approximately \$15,000,000; (2) a large portion of our approximate \$206,000,000 investment portfolio is in short-term, highly liquid bonds and other fixed income securities, and (3) we renewed a line of credit in April 2007 that is described below.

Line of Credit. We renewed a \$3,000,000 line of credit that was originally established in November 2003 with PlainsCapital Bank. The line of credit calls for interest payments only to be made on any amount drawn until April 15, 2008, when the entire amount of the line of credit, principal and interest then remaining unpaid, becomes due and payable. At September 30, 2007, there had never been any advances taken against this line of credit. We are in compliance with the covenants of the loan agreement, including requirements for a minimum of \$5,000,000 of unencumbered liquidity and a minimum 2 to 1 net worth ratio.

Capital Expenditures. In April 2007 we entered into a contract with a vendor to provide us with, and assist in the implementation of an integrated policy and claims administration system. The total cash outflow for the project is anticipated to be approximately \$2,100,000 over the next 15 to 18 months. Our capital expenditures for equipment were \$710,000 in the first nine months of 2007 of which approximately \$449,000 were expenditures related to the initial phase of this software implementation project. We expect capital expenditures for the remainder of 2007 to be approximately \$600,000 for this system upgrade project and are expected to be funded through cash on hand.

Restrictions on Dividends by API. In addition to restrictions on dividends and distributions applicable to all Texas stock insurance companies, for so long as any Series A redeemable preferred stock is outstanding, the Texas Department of Insurance prohibits API from paying dividends to us in any fiscal year unless and until we have complied with our redemption and dividend payment obligations to the holders of our Series A redeemable preferred stock for that year. We have also agreed that, without prior approval of the Texas Department of Insurance, aggregate annual distributions to us in respect of API's capital stock may not exceed the lesser of 10% of API's prior year-end policyholder statutory earned surplus or API's prior year net income, and in no event may exceed API's statutory earned surplus.

Escrow Account. In connection with the API acquisition, the Texas Department of Insurance has required us to place \$2,500,000 into an escrow account with a bank, to remain in escrow until the aggregate remaining redemption and dividend obligation relating to our Series A redeemable preferred stock is less than the amount of the escrow balance. No withdrawals may be made from this escrow account without prior approval from the Texas Department of Insurance.

ADOPTION OF RECENT ACCOUNTING PRONOUNCEMENTS

In February 2006, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards, or SFAS, No. 155, *Accounting for Certain Hybrid Financial Instruments*, an amendment of FASB Statement Nos. 133 and 140. SFAS No. 155 becomes effective for all financial instruments acquired or issued after the beginning of an entity's first fiscal year that begins after September 15, 2006. This Statement permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation; clarifies which interest-only strips and principal-only strips are not subject to the requirements of Statement No. 133; establishes a requirement to evaluate interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation; clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives; and amends Statement 140 to eliminate the prohibition on a qualifying special-purpose entity from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument. We do not expect the adoption of this standard to have a material effect on our financial position, results of operations or cash flows.

In July 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109* (FIN 48), which we adopted on January 1, 2007. FIN 48 clarifies the accounting for income tax uncertainties. The company has developed and implemented a process based on the guidelines of FIN 48 to ensure that uncertain tax positions are identified, analyzed and properly reported in the company's financial statements in accordance with SFAS 109. Based on all known facts and circumstances and current tax law, we believe that the total amount of unrecognized tax benefits as of January 1, and September 30, 2007 is not material to its results of operations, financial condition or cash flows. We also believe that the total amount of unrecognized tax benefits as of January 1, and September 30, 2007, if recognized, would not have a material effect on its effective tax rate. We further believe that there are no tax positions for which it is reasonably possible that the unrecognized tax benefits will significantly increase or decrease over the next 12 months producing, individually or in the aggregate, a material effect on the company's results of operations, financial condition or cash flows.

In September 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards, or SFAS No. 157, *Accounting for Fair Value Measurements*, effective for fiscal years beginning after November 15, 2007. This Statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles (GAAP) and expands disclosures about fair value measurements. Accordingly, this Statement does not require any new fair value measurements. However, for some entities, the application of this Statement will change current practice. We do not expect the adoption of this standard to have a material effect on our financial position, results of operations or cash flows.

In February, 2007 the Financial Accounting Standards Board issued Statement of Financial Accounting Standards, or SFAS, No. 159, *Accounting for the Fair Value Option for Financial Assets and Financial Liabilities* - an amendment of FASB Statement No. 115. This Statement permits entities to choose to measure many financial instruments and

certain other items at fair value. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. We do not expect the adoption of this standard to have a material effect on our financial position, results of operations or cash flows.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are principally exposed to three types of market risk related to our investment operations, including credit risk, interest rate risk, and equity price risk. The term market risk refers to the risk of a loss arising from adverse changes in market rates and prices such as interest rates, credit risk, equity prices and foreign currency exchange rates.

We invest our assets primarily in fixed-maturity securities, which as of September 30, 2007 and December 31, 2006 comprised approximately 94% and 79% of total investments at market value. As of September 30, 2007 and December 31, 2006, the fair value of investments in fixed maturity securities was \$194,156,000 and \$16,636,000. The significant increase in fixed-income maturities is the result of the acquisition of API on April 1, 2007.

The fixed-income maturities consist predominately of investment grade U.S. government agency and non-agency collateralized mortgage obligations and U.S. government agency mortgage-backed bonds for the purpose of generating ample cash flow to meet claim funding requirements while maintaining a reasonable investment yield.

[Return to Table of Contents](#)

We have exposure to credit risk primarily as a holder of fixed-income securities. We control this exposure by emphasizing investment grade quality in the fixed-income securities we purchase. At September 30, 2007 and at December 31, 2006, substantially all of our fixed-income portfolio consisted of investment grade securities. We believe that this concentration of investment grade securities limits our exposure to credit risk on our fixed-income investments.

Of our entire invested assets, including cash, agency-backed mortgage obligations, with underlying collateral consisting of GNMA, FHLMC, or FNMA loans comprise 38% of our portfolio; non-agency collateralized mortgage obligations comprise 23% of our portfolio; and the remaining 39% is comprised of U.S. Treasury, government agency bonds and notes, municipal tax exempt bonds, corporate bonds and equities. The majority of the non-agency CMOs in our portfolio have underlying mortgages categorized as Prime quality loans, and none of our CMOs have underlying mortgages classified as Subprime. However, within our portfolio there are eleven CMO securities classified as Alternative-A or Alt-A. These Alt-A securities are generally considered to have underlying mortgages with underwriting characteristics that are stronger than Subprime mortgages but less stringent than Prime mortgages. All of our Alt-A securities are investment grade, currently rated either AAA, AA or A.

During the three months ended September 30, 2007, we saw a significant and rapid decline in the market value of our Alt-A securities, particularly those with an A rating. In evaluating this decline, combined with the deepening national housing crisis and its potential effects on the underlying collateral, we have concluded that the decreases in value of our A rated Alt-A securities should be considered to be other than temporary as defined in Statements of Financial Accounting Standards No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. The amount of the pretax charge to earnings associated with this adjustment for the three months ended September 30, 2007, is \$3,140,000 bringing our total carrying value in Alt-A securities to \$13,904,000 from \$17,044,000 as of September 30, 2007. While we to have the ability and intent to hold all of our Alt-A securities indefinitely, we will continue to monitor and evaluate these securities and their underlying collateral.

The value of the fixed-income maturities are also subject to interest rate risk. As market interest rates decrease, the value portfolio increases with the opposite holding true in rising interest rate environments. All of our fixed income securities are designated as available-for-sale and, accordingly, are presented at fair value on our balance sheets. Fixed rate securities may have their fair market value adversely affected due to a rise in interest rates, and we may suffer losses in principal if forced to sell securities that have declined in market value due to changes in interest rates. We believe we are in a position to keep our fixed-income investments until maturity since we do not invest in fixed maturity securities for trading purposes.

Equity securities comprised approximately 5% and 21.0% of total investments at market value as of September 30, 2007 and December 31, 2006, respectively. As of September 30, 2007 and December 31, 2006, the fair value of investments in equity securities was \$10,154,000 and \$4,403,000, respectively.

Equity securities are subject to equity price risk, which is defined as the potential for loss in market value due to a decline in equity prices. The value of common stock equity investments is dependent upon the general conditions in the securities markets and the business and financial performance of the individual companies in the portfolio. Values are typically based on future economic prospects as perceived by investors in the equity markets. We regularly review the carrying value of our investments and identify and record losses when events and circumstances indicate that such declines in the fair value of such assets below our accounting basis are other-than-temporary.

An additional impairment charge was taken in the current quarter on our investment in Financial Industries Corporation (FIC) having previously resolved that declines in FIC 's stock price will be considered to be other than temporary as defined in Statements of Financial Accounting Standards (SFAS) No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. Our policy in regards to our investment in FIC is that we will record pretax charges to earnings should the common stock price on the last day of each interim or annual period fall below the adjusted cost basis of our investment in FIC. During the three months ended September 30, 2007, that charge totaled \$39,000, bringing the total amount written off in 2007 to \$693,000. As a consequence of these write-downs, our basis in this stock has declined to \$5.80 per share which equals the fair market value of FIC common stock at September 30, 2007. While we continue to have the ability and the intent to hold the stock indefinitely, we concluded that the additional uncertainty created by FIC 's late SEC filings, together with its continued de-listing from any national stock exchanges, dictated that the current quarter decline should be viewed as other than temporary. We will continue to monitor and evaluate the situation at FIC.

The remainder of the investment portfolio consists of cash and highly liquid short-term investments.

[Return to Table of Contents](#)

As mentioned above, our invested assets are subject to interest rate risk and equity price risk. The following table presents the effect as of September 30, 2007 on current estimated fair values of the fixed-maturity securities available-for-sale and equity securities assuming a 100-basis point (1%) increase in market interest rates and a 10% decline in equity prices.

	Carrying Value	Estimated Fair Value at Current Market Rates/Prices	Estimated Fair Value at Adjusted Market Rates/Prices (1)
		(in thousands)	
Interest rate risk:			
Fixed-maturities; available for sale	\$ 194,156	\$ 194,156	\$ 182,419
Equity price risk:			
Equity securities	10,154	10,154	9,139

(1)

Adjusted rates assume a 100 basis point (1%) increase in market rates for fixed rate securities and a 10% decline in equity market values.

For all our financial assets and liabilities, we seek to maintain reasonable average durations, consistent with the maximization of income, without sacrificing investment quality and providing for liquidity and diversification.

The estimated fair values at current market rates for financial instruments subject to interest rate risk and equity price risk in the table above are the same as those included elsewhere herein. The estimated fair values are calculated using simulation modeling based on the most likely outcome, assuming a 100-basis point shift in interest rates.

This sensitivity analysis provides only a limited, point-in-time view of the market risk sensitivity of certain of our financial instruments. The actual impact of market interest rate and price changes on the financial instruments may differ significantly from those shown in the sensitivity analysis. The sensitivity analysis is further limited, as it does not consider any actions that we could take in response to actual and/or anticipated changes in interest rates and equity prices.

We are also subject to credit risk with respect to our reinsurers. Although our reinsurers are liable to us to the extent we cede risk to them, we are ultimately liable to our policyholders on all risks we have reinsured. As a result, reinsurance agreements do not limit our ultimate obligations to pay claims to policyholders and we may not recover claims made to our reinsurers.

Additionally, our revenues generated through commissions at our financial services segment also expose us to market risk. Changes in interest rates could have an impact at our broker/dealer subsidiary, APS Financial. The general level of interest rates may trend higher or lower, and this move may impact our level of business in different fixed-income sectors. If a generally improving economy is the impetus behind higher rates, then while our investment grade business may drop off, our high yield business might improve with improving credit conditions. A volatile interest rate environment could also impact our business as this type of market condition can lead to investor uncertainty and their corresponding willingness to commit funds.

[Return to Table of Contents](#)

ITEM 4. CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed by us in reports that we file or submit under the Securities Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurances of achieving the desired control objectives, and management necessarily is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. As of the end of the period covered by this report, and under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we evaluated the effectiveness of the design and operation of these disclosure procedures. Based on this evaluation and subject to the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective in reaching a reasonable level of assurance of achieving management's desired controls and procedures objectives.

There have been no changes in internal controls over financial reporting that occurred during our most recent fiscal quarter that have materially affected, or are reasonably likely to affect, our internal control over financial reporting.

As part of a continuing effort to improve our business processes we are evaluating our internal controls and may update certain controls to accommodate any modifications to our business processes or accounting procedures.

[Return to Table of Contents](#)

PART II

OTHER INFORMATION

ITEM 1. Legal Proceedings

We are involved in various claims and legal actions that have arisen in the ordinary course of business. Management believes that any liabilities arising from these actions will not have a significant adverse effect on our financial condition or results of operations.

ITEM 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A. Risk Factors in our Quarterly Report on Form 10-Q for the period ended June 30, 2007, and our Registration Statement on Form S-1, which became effective on June 20, 2007, which could materially affect our business, financial condition or future results. The risks described in those reports are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial could have a material adverse effect on our business, financial condition and results of operations.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds

Items 2(a) through (d) are inapplicable.

(e) Stock Repurchases for the three months ended September 30, 2007:

Period	(a) Total Number of shares Purchased (1)	(b) Average Price Paid Per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Dollar Value of Shares that May yet be Purchased under the Plans or Programs (2)
July 1, 2007 July 31, 2007	-0-	\$ -0-	-0-	\$ 1,053,000
Aug 1, 2007 Aug 31, 2007	1,023	\$ 17.60	1,023	\$ 1,035,000
Sept 1, 2007 Sept 30, 2007	1,000	\$ 18.05	1,000	\$ 2,017,000

(1)

All of the total shares purchased were purchased in open market transactions.

(2)

Our original share repurchase program was announced August 17, 2004, was increased in \$2,000,000 increments on December 12, 2005 and on June 30, 2006 and by \$1,000,000 on September 7, 2007. As of September 30, 2007, we have a maximum dollar value of \$2,017,000 remaining for the future purchase of shares under the Stock Repurchase program.

Our open market stock repurchases are made in reliance upon Rule 10b-18 of the Exchange Act safe harbor from certain market manipulation claims for purchases by an issuer of its own common stock. Under this rule, we may not open trading in our shares, may not trade in the last thirty minutes of the trading session, may bid no more than the current bid or last trade, and may purchase no more in a single day than 25% of the average daily trading volume for the last four calendar weeks, unless certain rules for larger block trades are followed. Our stock option plan allows us to accept shares owned by an optionee immediately prior to the exercise of an option in payment for the option exercise. Additionally, we consider unsolicited offers to sell shares back to us and make a decision on purchasing them based on the price and our business needs at the time of the offer. We give priority in our repurchases to shares offered in option exercises, followed by open market purchases and finally unsolicited offers from shareholders. We do not reissue any shares acquired in repurchases, instead canceling them upon acquisition.
