FOR IMMEDIATE RELEASE

CAMTEK ANNOUNCES THE LAUNCH OF
A NEW 2D SEMICONDUCTOR INSPECTION MODEL

First units are already installed at major customers' sites

MIGDAL HAEMEK, Israel – March 14, 2016 – Camtek Ltd. (NASDAQ: CAMT; TASE: CAMT), today announced the launch of a new 2D inspection model. The new 2D inspection model significantly enhances the Eagle 2D inspection performance. This new model includes a new camera, a high-end optical channel, new lighting configurations and an innovative detection engine, all designed to significantly enhance Camtek's 2D inspection capabilities. The new model enables superior detection of even the most challenging defects. The new 2D inspection model is modular and field upgradable and can be deployed in the various Eagle systems already installed at customer sites.

Ramy Langer, Vice President and Head of Camtek's Semiconductor Division, commented, "Our Eagle system and the previous generations are the industry standard for 3D metrology. We expect the new 2D inspection model will similarly position Camtek as a leader in the 2D inspection market segment."

Continued Mr. Langer: "We have already installed the new system at several customer sites and received excellent feedback on its 2D inspection capabilities."

ABOUT CAMTEK LTD.

Camtek Ltd. provides automated and technologically advanced solutions dedicated to enhancing production processes, increasing products yield and reliability, enabling and supporting customer's latest technologies in the Semiconductors, Printed Circuit Boards (PCB) and IC Substrates industries.

Camtek addresses the specific needs of these interconnected industries with dedicated solutions based on a wide and advanced platform of technologies including intelligent imaging, image processing and functional 3D inkjet printing.
