FirstEnergy
(Continued)

With respect to the proposed merger, actual results may differ materially due to the risks and uncertainties relating to the ability

requisite Allegheny and FirstEnergy stockholder approvals; the risk that FirstEnergy or Allegheny may be unable to obtain governmental and regulatory approvals required for the merger, or required governmental and regulatory approvals may delay the merger or result in conditions that could reduce the anticipated benefits from the merger or cause the parties to abandon the merger; the risk that the closing of the merger may not be satisfied; the timing to consummate the proposed merger; the risk that the businesses will not be successfully integrated; the risk that the cost savings and any other synergies from the transaction may not be fully realized or may take longer than expected; disruption from the transaction making it more difficult to maintain relationships with customers, employees or suppliers; increased management time on merger-related issues; and the risk that the credit ratings of the combined company or its subsidiaries may be lower than what the companies expect.

The foregoing review of factors should not be construed as exhaustive. New factors emerge from time to time, and it is not possible for management

to predict

all such factors,

nor assess the

impact of

any such factor

on FirstEnergy's business

or the extent

to which any

factor, or

combination of factors, may cause results to differ materially from those contained in any forward-looking statements. FirstEnergy disclaims any current intention to update any forward-looking statements contained herein as a result of new information, future events or otherwise.

assets

Adjacent geographic footprint complements existing businesses and our retail sales strategy

Generation anchored by efficient nuclear and supercritical fossil baseload assets
Transaction creates a significant presence in region and sector

6.1MM customers ~35% increase in customer base

24 GW of combined generation capacity (21 GW in competitive markets) ~70% increase in
generating capacity
Transaction provides numerous opportunities to create value

Increased scale, scope and diversification improves operating performance and geographic reach

More cost-effective fuel procurement options and O&M savings

Improved risk profile through existing and planned FERC regulated transmission investments
Attractive shareholder return potential

Diversified avenues for growth between regulated and generation businesses

Solid balance sheet with strong operating cash flows
Anticipate transaction to be accretive to earnings in the first year following the close

FirstEnergy's current dividend would represent a 145% increase for Allegheny shareholders, supported by combined company's strong balance sheet and cash flows
Larger, more diversified platform of generation and utility assets with additional value drivers

Diversified generation fleet with significant non-carbon emitting capacity reduces exposure to changing environmental requirements

Enhanced retail marketing capability

Greater utility scale and regulatory diversification

Expanded transmission platform with major projects underway

More cost-effective fuel procurement options, O&M savings and other synergies
Maintains leverage to recovery in economy and power prices
