INFORMATION TO BE INCLUDED IN THE REPORT

Item 8.01. Other Events.

On January 30, 2012, Ormat Technologies, Inc. (the Company) announced that it is revising its previously issued guidance concerning the impact recently-finalized mandatory short-run-avoided-cost (SRAC) pricing applicable to the power purchase agreements (PPAs) for the Heber 1 and 2 power plants, the Ormesa complex and the Mammoth complex in California (the SRAC PPAs) may have on the Company's revenues in 2012 and 2013.

The Company's current expectation is that the new SRAC price formulas will reduce the Company's revenues in 2012 and 2013 by an estimated \$24.8 million and \$24.9 million, respectively. This estimate is based, among other things, on the Company's current assumptions concerning the average price of natural gas during these years and the time when California implements its greenhouse gas (GHG) cap-and-trade program, each of which is uncertain and subject to change.

The change from the Company's previously announced guidance (which estimated a revenue reduction in 2012 and 2013 of \$9.5 million and \$6.5 million, respectively) is attributable primarily to recent and significant decreases in forecasted natural gas prices for 2012 and 2013. It is also attributable to a delay in implementing the California GHG program, now scheduled to begin in 2013.

As explained in the Company's Form 10-Q for the quarter ended September 30, 2011, the PPAs for the Heber 1 and 2 power plants, the Ormesa complex and the Mammoth complex in California will implement SRAC pricing, as required under a global settlement relating primarily to purchase and payment obligations of investor-owned utilities in California to certain Qualifying Facilities. As the Company stated in that Form 10-Q, the Company is unable to estimate the impact on revenues beyond 2013 at this time.

In addition, to mitigate part of the reduction in revenues from these facilities, the Company may seek to amend one or more of its PPAs, among other things, to provide for fixed price terms. The Company has no assurance that it will be able to amend any of these PPAs on terms that are attractive to it, or at all.

A copy of the Company's press release containing this information is furnished as Exhibit 99 to this report on Form 8-K.

Item 9.01. Financial Statements and Exhibits.

(d) Exhibits

Exhibit 99 Press Release of the Company dated January 30, 2012.

Safe Harbor Statement

Information provided in this report on Form 8-K contains statements relating to current expectations, estimates, forecasts and projections about future events that are forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. These forward-looking statements include the estimated impact of SRAC pricing on the Company's revenues for 2012 and 2013 and the various assumptions underlying those estimates, including future natural gas prices, the date of implementation of California's GHG program, the revenues that the affected plants otherwise might generate during these years, any possible amendments of one or more of the PPAs for these plants and other uncertainties associated with the future operation of these plants. Actual future results may differ materially from those projected as a result of any of these factors and other risks and uncertainties. For a discussion of such risks and uncertainties, see Risk Factors as described in Ormat Technologies, Inc.'s Annual Report on Form 10-K filed with the Securities and Exchange Commission on February 28, 2011.
