FFO is defined as net income (computed in accordance with GAAP), excluding impairment write-downs of depreciable real estate or of investments in non-consolidated investees that are driven by measurable decreases in the fair value of depreciable real estate held by the investee, gains (or losses) from sales of depreciable property, plus real estate depreciation and amortization, and after adjustments for unconsolidated partnerships and joint ventures. This definition conforms with the National Association of Real Estate Investment Trust s definition issued in April 2002. UDR considers FFO in evaluating property acquisitions and its operating performance and believes that FFO should be considered along with, but not as an alternative to, net income and cash flows as a measure of UDR s activities in accordance with generally accepted accounting principles and is not necessarily indicative of cash available to fund cash needs.

RE3 gain on sales, net of taxes, is defined as net sales proceeds less a tax provision and the gross investment basis of the asset before accumulated depreciation. We consider FFO with RE3 gain on sales, net of taxes, to be a meaningful supplemental measure of performance because the short-term use of funds produce profits which differ from the traditional long-term investment in real estate for REITs.
