P. H. GLATFELTER COMPANY AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

1. ORGANIZATION

P. H. Glatfelter Company and subsidiaries (Glatfelter) is a manufacturer of specialty papers and fiber-based engineered materials. Headquartered in York, Pennsylvania, our manufacturing facilities are located in Spring Grove, Pennsylvania; Chillicothe and Freemont, Ohio; Gatineau, Quebec, Canada; Gloucestershire (Lydney), England; Caerphilly, Wales, Gernsbach and Falkenhagen, Germany; Scaër, France; and the Philippines. Our products are marketed worldwide, either through wholesale merchants, brokers and agents or directly to customers.

2. ACCOUNTING POLICIES

Basis of Presentation The unaudited condensed consolidated financial statements (financial statements) include the accounts of Glatfelter and its wholly owned subsidiaries. All intercompany balances and transactions have been eliminated.

We prepared these financial statements in accordance with accounting principles generally accepted in the United States of America (generally accepted accounting principles or GAAP). In our opinion, the financial statements reflect all normal, recurring adjustments needed to present fairly our results for the interim periods. When preparing these financial statements, we have assumed that you have read the audited consolidated financial statements included in our 2011 Annual Report on Form 10-K (2011 Form 10-K).

Accounting Estimates The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingencies as of the balance sheet date and the reported amounts of revenues and expenses during the reporting period. Management believes the estimates and assumptions used in the preparation of these financial statements are reasonable, based upon currently available facts and known circumstances, but recognizes that actual results may differ from those estimates and assumptions.

Recently Issued Accounting Pronouncements In June 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2011-05, *Presentation of Comprehensive Income*. This ASU is designed to improve the comparability and transparency of other comprehensive income components. The guidance provides an option to present total comprehensive income, the components of net income and the components of other comprehensive income in a single continuous statement or two separate but consecutive statements. This ASU eliminates the option to present other comprehensive income components as part of the statement of changes in shareholders' equity. The provisions of this ASU are required to be applied retrospectively. We have adopted this standard by presenting a separate consecutive statement of comprehensive income beginning in the first quarter of 2012.

In September 2011, the FASB updated ASC 350, *Intangibles - Goodwill and Other* to provide an entity the option, when evaluating goodwill and other assets for possible impairment, to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after completing this assessment, an entity determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step impairment test is unnecessary. This update became effective for us beginning January 1, 2012.

In May 2011, the FASB issued ASU 2011-04, *Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS*, which provides common requirements for measuring fair value and disclosing information about fair value measurements in accordance with U.S. GAAP and International Financial Reporting Standards. We adopted this standard in the first quarter of 2012 and it did not have a material impact on us.

Edgar Filing: GLATFELTER P H CO - Form 10-Q

GLATFELTER

3.31.12 Form 10-Q

Table of Contents**3. GAINS ON DISPOSITIONS OF PLANT, EQUIPMENT AND TIMBERLANDS, NET**

During the first quarters of 2012 and 2011, we completed sales of assets as summarized in the following table:

<i>Dollars in thousands</i>	Acres	Proceeds	Gain
2012			
Other	n/a	\$ 49	\$ 37
		\$ 49	\$ 37
2011			
Timberlands	717	\$ 3,373	\$ 3,158
Other	n/a	32	17
		\$ 3,405	\$ 3,175

4. EARNINGS PER SHARE

The following table sets forth the details of basic and diluted earnings per share (EPS):

<i>In thousands, except per share</i>	Three months ended	
	March 31	
	2012	2011
Net income	\$ 18,878	\$ 17,426
Weighted average common shares outstanding used in basic EPS	42,751	46,070
Common shares issuable upon exercise of dilutive stock options and restricted stock awards	716	340
Weighted average common shares outstanding and common share equivalents used in diluted EPS	43,467	46,410
Earnings per share		
Basic	\$ 0.44	\$ 0.38
Diluted	0.43	0.38

The following table sets forth potential common shares outstanding for stock options and restricted stock units that were not included in the computation of diluted EPS for the period indicated, because their effect would be anti-dilutive:

<i>In thousands</i>	March 31	
	2012	2011
Potential common shares	589	1,737

5. INCOME TAXES

Income taxes are recognized for the amount of taxes payable or refundable for the current year and deferred tax liabilities and assets for the future tax consequences of events that have been recognized in our consolidated financial statements or tax returns. The effects of income taxes are measured based on enacted tax laws and rates.

As of both March 31, 2012 and December 31, 2011, we had \$29.7 million of gross unrecognized tax benefits. As of March 31, 2012, if such benefits were to be recognized, approximately \$29.7 million would be recorded as a component of income tax expense, thereby affecting our effective tax rate.

Edgar Filing: GLATFELTER P H CO - Form 10-Q

We, or one of our subsidiaries, file income tax returns with the United States Internal Revenue Service, as well as various state and foreign authorities. The following table summarizes, by major jurisdiction, tax years that remain subject to examination:

Jurisdiction	Open Tax Years	
	Examinations not yet initiated	Examination in progress
United States		
Federal	2008 - 2011	N/A
State	2005 - 2011	2004, 2006, 2008, 2009
Canada (1)	2007 - 2011	2006 - 2009
Germany (1)	2007 - 2011	N/A
France	2009 - 2011	N/A
United Kingdom	2008 - 2011	N/A
Philippines	2010 - 2011	2009 - 2010

(1) includes provincial or similar local jurisdictions, as applicable

The amount of income taxes we pay is subject to ongoing audits by federal, state and foreign tax authorities, which often result in proposed assessments. Management performs a comprehensive review of its global tax positions on a quarterly basis and accrues amounts for uncertain tax positions. Based on these reviews and the result of discussions and resolutions of matters with certain tax authorities and the closure of tax years subject to tax audit, reserves are adjusted as necessary. However, future results may include favorable or unfavorable adjustments to our estimated tax liabilities in the period the assessments are determined or resolved or as such statutes are closed. Due to potential for resolution of federal, state and foreign examinations, and the expiration of various statutes of limitation, it is reasonably possible our gross unrecognized tax benefits balance may decrease within the next twelve months by a range of zero to \$4.8 million. Substantially all of this range relates to tax positions taken in the U.S. and the U.K.

- 7 -

GLATFELTER

3.31.12 Form 10-Q

Table of Contents

We recognize interest and penalties related to uncertain tax positions as income tax expense. We recorded interest expense of \$0.1 million during the first quarter of 2012, and \$0.3 of interest expense in the first quarter of 2011. As of March 31, 2012, we had recognized a liability for interest of \$1.9 million, and as of December 31, 2011, accrued interest payable was \$1.7 million. We did not record any penalties associated with uncertain tax positions during the first quarters of 2012 or 2011.

6. STOCK-BASED COMPENSATION

The P. H. Glatfelter Amended and Restated Long Term Incentive Plan (the LTIP) provides for the issuance of up to 5,500,000 shares of Glatfelter common stock to eligible participants in the form of restricted stock units, restricted stock awards, non-qualified stock options, performance shares, incentive stock options and performance units.

Since the approval of the LTIP, we have issued to eligible participants restricted stock units, performance share awards and stock only stock appreciation rights (SOSARs).

Restricted Stock Units (RSU) and Performance Share Awards (PSAs) Awards of RSUs and PSAs are made under our LTIP. The vesting of RSUs is based solely on the passage of time, generally on a graded scale over a three, four, and five-year period. PSAs were first issued in March 2011 and cliff vest three years from the grant date assuming the achievement of predetermined, three-year cumulative performance targets. The performance measures include a minimum, target and maximum performance level providing the grantees an opportunity to receive more or less shares than targeted depending on actual financial performance. For both RSUs and PSAs, the grant date fair value of the awards is used to determine the amount of expense to be recognized over the applicable service period, and, with respect to PSAs, adjusted to give effect to estimated level of target to be achieved. Settlement of RSUs and PSAs will be made in shares of our common stock. The following table summarizes RSU and PSA activity during the first three months of 2012 and 2011:

<i>Units</i>	2012	2011
Beginning balance	788,088	579,801
Granted	162,217	227,860
Forfeited	(17,100)	(6,073)
Restriction lapsed/shares delivered	(72,080)	
Ending balance	861,125	801,588

The amount granted in 2012 and 2011 includes PSAs of 161,083 and 96,410, respectively, exclusive of reinvested dividends. The following table sets forth aggregate RSU and PSA compensation expense for the periods indicated:

<i>In thousands</i>	March 31	
	2012	2011
Three months ended	\$ 576	\$ 466

Stock Only Stock Appreciation Rights (SOSARs) Under terms of the SOSAR, a recipient receives the right to a payment in the form of shares of common stock equal to the difference, if any, in the fair market value of one share of common stock at the time of exercising the SOSAR and the strike price. The SOSARs vest ratably over a three year period and have a term of ten years.

The following table sets forth information related to outstanding SOSARs.

SOSARS	2012		2011	
	Shares	Wtd Avg Exercise Price	Shares	Wtd Avg Exercise Price

Raw materials	\$ 61,936	\$ 57,547
In-process and finished	99,667	93,096
Supplies	57,757	56,064
Total	\$ 219,360	\$ 206,707

9. LONG-TERM DEBT

Long-term debt is summarized as follows:

Edgar Filing: GLATFELTER P H CO - Form 10-Q

<i>In thousands</i>	March 31, 2012	Dec. 31, 2011
Revolving credit facility, due Nov. 2016	\$ 22,000	\$ 27,000
7 1/8% Notes, due May 2016	200,000	200,000
Total long-term debt	222,000	227,000
Less current portion		
Long-term debt, excluding current portion	\$ 222,000	\$ 227,000

On November 21, 2011, we entered into an amendment to our revolving credit agreement with a consortium of banks (the Revolving Credit Facility) which increased the amount available for borrowing to \$350 million, extended the maturity of the facility to November 21, 2016, and instituted a lower interest rate pricing grid.

For all U.S. dollar denominated borrowings under the Revolving Credit Facility, the borrowing rate is, at our option, (a) the bank's base rate which is equal to the greater of i) the prime rate; ii) the federal funds rate plus 50 basis points plus an applicable spread ranging from 25 basis points to 125 basis points based on our corporate credit ratings determined by Standard & Poor's Rating Services and Moody's Investor Service, Inc. (the Corporate Credit Rating); or iii) the daily Euro-rate plus 100 basis points; or (b) the daily Euro-rate plus an applicable margin ranging from 125 basis points to 225 basis points based on the Corporate Credit Rating. For non-US dollar denominated borrowings, interest is based (b) above.

The Revolving Credit Facility contains a number of customary covenants for financings of this type that, among other things, restrict our ability to dispose of or create liens on assets, incur additional indebtedness, repay other indebtedness, limits certain intercompany financing arrangements, make acquisitions and engage in mergers or consolidations. We are also required to comply with specified financial tests and ratios including: i) maximum net debt to earnings before interest, taxes, depreciation and amortization (EBITDA) ratio; ii) a consolidated EBITDA to interest expense ratio; and iii) beginning December 31, 2015, a minimum liquidity ratio. A breach of these requirements would give rise to certain remedies under the Revolving Credit Facility, among which are the termination of the agreement and accelerated repayment of the outstanding borrowings plus accrued and unpaid interest under the credit facility.

On April 28, 2006 we completed an offering of \$200.0 million aggregate principal amount of our 7 1/8% Senior Notes due 2016 (7 1/8% Notes). Net proceeds from this offering totaled approximately \$196.4 million, after deducting the commissions and other fees and expenses relating to the offering. The proceeds were primarily used to redeem \$150.0 million aggregate principal amount of our then outstanding notes plus the payment of applicable redemption premium and accrued interest.

Interest on the 7 1/8% Notes is payable semiannually in arrears on May 1 and November 1.

The 7 1/8% Notes contain cross default provisions that could result in all such notes becoming due and payable in the event of a failure to repay debt outstanding under the Revolving Credit Agreement at maturity or a default under the Revolving Credit Agreement that accelerates the debt outstanding thereunder. As of December 31, 2011, we met all of the requirements of our debt covenants.

- 9 -

GLATFELTER

3.31.12 Form 10-Q

Table of Contents

P. H. Glatfelter Company guarantees all debt obligations of its subsidiaries. All such obligations are recorded in these consolidated financial statements.

As of March 31, 2012 and December 31, 2011, we had \$4.6 million of letters of credit issued to us by certain financial institutions. Such letters of credit reduce amounts available under the Revolving Credit Facility. The letters of credit outstanding primarily provide financial assurances for the benefit of certain state workers compensation insurance agencies in conjunction with our self-insurance program. We bear the credit risk on this amount to the extent that we do not comply with the provisions of certain agreements. No amounts are outstanding under the letters of credit.

10. ASSET RETIREMENT OBLIGATION

During 2008, we recorded \$11.5 million representing the estimated fair value of asset retirement obligations related to the legal requirement to close several lagoons at the Spring Grove, PA facility. Historically, the lagoons were used to dispose of residual waste material. Closure of the lagoons will be accomplished by filling the lagoons, and installing a non-permeable liner which will be covered with soil to construct the required cap over the lagoons. The amount referred to above, in addition to the upward revisions in 2009 and 2011, was accrued with a corresponding increase in the carrying value of the property, equipment and timberlands caption on the consolidated balance sheet. The amount capitalized is being amortized as a charge to operations on the straight-line basis over the expected closure period. Following is a summary of activity recorded during the first quarters of 2012 and 2011:

<i>In thousands</i>	2012	2011
Balance at January 1	\$ 9,679	\$ 9,717
Accretion	122	132
Payments	(207)	(149)
Balance at March 31	\$ 9,594	\$ 9,700

Of the total liability at March 31, 2012, \$1.5 million is recorded in the accompanying consolidated balance sheet, under the caption Other current liabilities and \$8.1 million is recorded under the caption Other long-term liabilities.

11. FAIR VALUE OF FINANCIAL INSTRUMENTS

The amounts reported on the condensed consolidated balance sheets for cash and cash equivalents, accounts receivable and short-term debt approximate fair value. The following table sets forth carrying value and fair value of long-term debt:

<i>In thousands</i>	March 31, 2012		December 31, 2011	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Fixed-rate bonds	\$ 200,000	\$ 204,954	\$ 200,000	\$ 204,000
Variable rate debt	22,000	22,000	27,000	27,000
Total	\$ 222,000	\$ 226,954	\$ 227,000	\$ 231,000

As of March 31, 2012, and December 31, 2011, we had \$200.0 million of 7 1/8% fixed rate debt. These bonds are publicly registered, but thinly traded. Accordingly, the values set forth above are based on debt instruments with similar characteristics (Level 2). The fair value of financial derivatives is set forth below in Note 12.

12. FINANCIAL DERIVATIVES AND HEDGING ACTIVITIES

Edgar Filing: GLATFELTER P H CO - Form 10-Q

As part of our overall risk management practices, we enter into financial derivatives primarily designed to either i) hedge foreign currency risks associated with forecasted transactions cash flow hedges ; or ii) mitigate the impact that changes in currency exchange rates have on intercompany financing transactions and foreign currency denominated receivables and payables foreign currency hedges.

Derivatives Designated as Hedging Instruments Cash Flow Hedges We use currency forward contracts as cash flow hedges to manage our exposure to fluctuations in the currency exchange rates on certain forecasted production costs expected to be incurred over a maximum of twelve months. Currency forward contracts involve fixing the EUR-USD exchange rate or USD-CAD for delivery of a specified amount of foreign currency on a specified date.

We designate certain currency forward contracts as cash flow hedges of forecasted raw material purchases or certain production labor costs with exposure to changes in foreign currency exchange rates. The effective portion of changes in the fair value of derivatives designated and that qualify as cash flow hedges of foreign exchange risk is deferred as a component of accumulated other comprehensive income in the accompanying condensed consolidated balance sheet and is subsequently reclassified into costs of products sold in the period that inventory produced using the hedged transaction affects earnings. The ineffective portion of the change in fair value of the derivative is recognized directly to earnings

- 10 -

GLATFELTER

3.31.12 Form 10-Q

Table of Contents

and reflected in the accompanying condensed consolidated statement of income as non-operating income (expense) under the caption Other-net.

We had the following outstanding derivatives that were used to hedge foreign exchange risks associated with forecasted transactions and designated as hedging instruments:

<i>In thousands</i>	Mar. 31, 2012	Dec. 31, 2011
Derivative		Buy Notional
Sell / Buy		
Euro / U.S. dollar	31,210	22,730
U.S. dollar / Canadian dollar	10,276	11,019

These contracts have maturities of twelve months or less.

Derivatives Not Designated as Hedging Instruments Foreign Currency Hedges We also enter into forward foreign exchange contracts to mitigate the impact changes in currency exchange rates have on balance sheet monetary assets and liabilities. None of these contracts are designated as hedges for financial accounting purposes and, accordingly, changes in value of the foreign exchange forward contracts and in the offsetting underlying on-balance-sheet transactions are reflected in the accompanying statement of operations under the caption Other net.

<i>In thousands</i>	Mar. 31, 2012	Dec. 31, 2011
Derivative		Sell Notional
Sell / Buy		
Euro / U.S. dollar	18,500	25,500
Philippine peso / U.S. dollar		150,000

These contracts have maturities of one month from the date originally entered into.

Fair Value Measurements The following table summarizes the fair values of derivative instruments for the period indicated and the line items in the accompanying consolidated balance sheet where the instruments are recorded:

Balance sheet caption	Prepaid and Other Current Assets		Other Current Liabilities	
	Mar. 31, 2012	Dec. 31, 2011	Mar. 31, 2012	Dec. 31, 2011
<i>In thousands</i>				
Designated as hedging:				
Forward foreign currency exchange contracts	\$ 488	\$ 1,520	\$ 264	\$
Not designated as hedging:				
Forward foreign currency exchange contracts		\$ 338	\$ 120	\$ 15

The amounts set forth in the table above represent the net asset or liability giving effect to rights of offset with each counterparty.

The following table summarizes the amount of income or loss from derivative instruments recognized in our results of operations for the periods indicated and the line items in the accompanying consolidated statements of income where the results are recorded:

<i>In thousands</i>	Three months ended March 31, 2012	2011
Designated as hedging:		Gains (losses)

Edgar Filing: GLATFELTER P H CO - Form 10-Q

Forward foreign currency exchange contracts:

Effective portion	cost of products sold	\$ 572	\$
Ineffective portion	other	net	140

Not designated as hedging:

Forward foreign currency exchange contracts:

Other	net	\$ (1,070)	\$ (4,346)
-------	-----	------------	------------

The impact of activity not designated as hedging was substantially all offset by the remeasurement of the underlying on-balance sheet item.

The fair value hierarchy consists of three broad levels, which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3).

The fair values of the foreign exchange forward contracts are considered to be Level 2. Foreign currency forward contracts are valued using foreign currency forward and interest rate curves. The fair value of each contract is determined by comparing the contract rate to the forward rate and discounting to present value. Contracts in a gain position are recorded in the condensed consolidated balance sheets under the caption

Prepaid and other current assets and the value of contracts in a loss position is recorded under the caption Other current liabilities.

A rollforward of fair value amounts recorded as a component of accumulated other comprehensive income is as follows:

<i>In thousands</i>	2012	2011
Balance at January 1,	\$ 1,649	\$
Deferred losses on cash flow hedges	(568)	
Reclassified to earnings	(572)	
Balance at March 31,	\$ 509	\$

We expect substantially all of the amounts recorded as a component of accumulated other comprehensive income will be realized in results of operations within the next twelve months and the amount ultimately recognized will vary depending on actual market rates.

- 11 -

GLATFELTER

3.31.12 Form 10-Q

Table of Contents

Credit risk related to derivative activity arises in the event a counterparty fails to meet its obligations to us. This exposure is generally limited to the amounts, if any, by which the counterparty's obligations exceed our obligation to them. Our policy is to enter into contracts only with financial institutions which meet certain minimum credit ratings.

13. SHARE REPURCHASES

In April 2011, our Board of Directors authorized a share repurchase program for up to \$50.0 million, exclusive of commissions, of our outstanding common stock, all of which was used by January 2012. The following table summarizes share repurchases under this program:

	shares	(thousands)
Authorized amount	n/a	\$ 50,000
Repurchases	3,588,018	(50,000)
Remaining authorization		\$

During the first quarter of 2012, we repurchased 82,533 shares at a cost of \$1.2 million.

14. COMMITMENTS, CONTINGENCIES AND LEGAL PROCEEDINGS**Fox River - Neenah, Wisconsin**

Background We have significant uncertainties associated with environmental claims arising out of the presence of polychlorinated biphenyls (PCBs) in sediments in the lower Fox River and in the Bay of Green Bay Wisconsin (Site). As part of our 1979 acquisition of the Bergstrom Paper Company, we acquired a facility located at the Site (the Neenah Facility). The Neenah Facility used wastepaper as a source of fiber. Discharges to the lower Fox River from the Neenah Facility that may have contained PCBs from wastepaper may have occurred from 1954 to the late 1970s. We believe that any PCBs that the Neenah Facility may have discharged into the lower Fox River resulted from the presence of PCBs in NCR®-brand carbonless copy paper in the wastepaper that was recycled at the Neenah Facility. We closed the Neenah Facility in June 2006.

The United States, the State of Wisconsin and various state and federal governmental agencies (collectively, the Governments), as well as other entities (including local Native American tribes), have found PCBs in sediments in the bed of the Fox River, apparently from a number of sources at municipal and industrial facilities along the upstream and downstream portions of the Site. The

Governments have identified manufacturing and recycling of NCR®-brand carbonless copy paper as the principal source of that contamination.

The United States Environmental Protection Agency (EPA) has divided the lower Fox River and the Bay of Green Bay site into five operable units (the OUs), including the most upstream (OU1) and four downstream reaches of the river and bay (OU2-5). OU1 extends from primarily Lake Winnebago to the dam at Appleton, and is comprised of Little Lake Butte des Morts. The Neenah Facility discharged its wastewater into OU1.

Our liabilities, if any, for this contamination primarily arise under the federal Comprehensive Environmental, Response, Compensation and Liability Act (CERCLA or Superfund), pursuant to which the Governments have sought to recover response actions or response costs, which are the costs of studying and cleaning up contamination. Other agencies and natural resource trustee agencies (collectively, the Trustees) have sought to recover natural resource damages (NRDs), including natural resource damage assessment costs.

We are one of eight entities that have been formally notified that they are potentially responsible parties (PRPs) under CERCLA for response costs or NRDs. Others, including the United States and the State of Wisconsin, may also be liable for some or all of the costs of NRD at this Site.

Edgar Filing: GLATFELTER P H CO - Form 10-Q

We are engaged in litigation to allocate costs and NRDs among the parties responsible for this site. The Governments have sought to recover response actions, response costs, and NRDs from us through three principal enforcement actions.

OU1 CD. On October 1, 2003, the United States and the State of Wisconsin commenced an action captioned *United States v. P.H. Glatfelter Co.* against us and WTM I Co. in the United States District Court for the Eastern District of Wisconsin and simultaneously lodged a consent decree (OU1 CD) that the court entered on April 12, 2004. Under that OU1 CD, and an amendment dated August 2008, we and WTM I, with a limited fixed contribution from Menasha Corp. and funds provided by the United States from an agreement with others, have implemented the remedy for OU1. We have also resolved claims for all Governmental response costs in OU1 after July 2003 and made a payment on NRDs. That remedy is complete. We have continuing operation and maintenance obligations that we expect to fund from contributions we and WTM I have already made to an escrow account for OU1 under the OU1 CD.

- 12 -

GLATFELTER

3.31.12 Form 10-Q

Table of Contents

OU2-5 UAO. In November 2007, the United States Environmental Protection Agency (EPA) issued an administrative order for remedial action (UAO) to Appleton Papers Inc. (API), CBC Coating, Inc. (formerly known as Riverside Paper Corporation), Georgia-Pacific Consumer Products, L.P. (formerly known as Fort James Operating Company), Menasha Corporation, NCR Corporation, Glatfelter, U.S. Paper Mills Corp., and WTM I Company (WTM I) directing those respondents to implement the remedy in OU2-5. Shortly following issuance of the UAO, API and NCR commenced litigation against us and others, as described below. Accordingly, we have no vehicle for complying with the UAO s overall requirements other than answering a judgment in the litigation, and we have so informed EPA, but, to minimize disruptions, have paid certain *de minimis* amounts to EPA for oversight costs under the UAO.

Government Action. On October 14, 2010, the United States and the State of Wisconsin filed an action in the United States District Court for the Eastern District of Wisconsin captioned *United States v. NCR Corp.* (the Government Action) against 12 parties, including us. The Government Action seeks to recover from each of the defendants, jointly and severally, all of the governments past costs of response, which are approximately \$17 million to date, a declaration as to liability for all of the governments future costs of response, and compensation for natural resource damages, as well as a declaration as to liability for compliance with the UAO for OU2-5. The United States twice sought a preliminary injunction in 2011 to obtain full-scale remediation from NCR or API, and those motions were denied. NCR implemented less than a full season of work in 2011. On March 19, 2012, the United States again moved for a preliminary injunction to require NCR and API to conduct full-scale remediation defined as dredging of 660,000 cubic yards of sediment in 2012. On April 10, 2012, the court granted summary judgment to API, holding that API was not a successor to the Appleton Coated Papers Division of NCR Corporation. On April 12, 2012, the court held a hearing on the motion for preliminary injunction directed solely at NCR, but the court has not yet ruled on that motion. Active litigation of the United States claim for a declaratory judgment or permanent injunctive relief against all recipients of the UAO for OU2-5, including us, began with the issuance of a case management order on March 22, 2012. The court has indicated that it may wish to accelerate the schedule for disposition of that claim so that a trial would begin as early as December 3, 2012. Among other issues, disposition of that claim will require litigation of challenges to the United States selection of the remedy for this Site and will also require disposition of various parties asserted defenses that liability for some or all of this Site is not joint and several and may be apportioned.

Whiting Litigation. On January 7, 2008, NCR and API commenced litigation in the United States District Court for the Eastern District of Wisconsin captioned *Appleton Papers Inc. v. George A. Whiting Paper Co.*, seeking to reallocate costs and damages allegedly incurred or paid or to be incurred or paid by NCR or API (the Whiting Litigation). The case involves allocation claims among the two plaintiffs and 28 defendants including us. We and other defendants counterclaimed against NCR and API. Some of the claims have since been resolved as described below.

Claims against governments. The Whiting Litigation involves claims by certain parties against federal agencies who are responsible parties for this site. In the Government Action many defendants, including us, asserted counterclaims against the United States and the State of Wisconsin.

Settlements. Certain parties have resolved their liability to the United States affording them contribution protection. These settlements are embodied in consent decrees. Notably, we entered into the OUI CD. Also, in a case captioned *United States v. George A. Whiting Paper Co.*, the district court entered two consent decrees under which 13 *de minimis* defendants in the Whiting Litigation settled with the United States and Wisconsin. The Court of Appeals for the Seventh Circuit denied an appeal of these settlements by NCR and API on May 4, 2011. Further, Georgia-Pacific Consumer Products LP, has entered into a consent decree resolving its liability for NRDs and a separate consent decree in the Government Action that resolves all of its liabilities except for the downstream portion of the OU4 remedy. Finally, the United States has lodged a consent decree that would resolve the liability of itself and two municipalities. The United States moved for entry of that consent decree, but later withdrew that motion due to a ruling by the court adverse to the government in a related case captioned *Menasha Corp. v. United States Department of Justice*, seeking disclosure of certain documents under the Freedom of Information Act. We oppose entry of that consent decree, which the district court must approve. The United States or the State of Wisconsin may enter into settlements with us or with other parties that would affect our ultimate obligations because settling parties may become unavailable to pay any share other than their settlement amount, depending upon the terms of the settlement and the court s order entering any consent decree.

Cleanup Decisions. The extent of our exposure depends, in large part, on the decisions made by EPA and the Wisconsin Department of Natural Resources (WDNR) as to how the Site will be cleaned up and the costs and timing of those response actions. The nature of

Table of Contents

the response actions has been highly controversial. Between 2002 and 2008, the EPA issued records of decision (RODs) regarding required remedial actions for the OUs. Some of those RODs have been amended. We contend that the remedy for OU2-5 is arbitrary and capricious. We and others have begun to litigate that issue in the Government Action. If we were to be successful in modifying any existing selected remedy, our exposure could be reduced materially.

NRD Assessment. We are engaged in disputes as to (i) whether various documents prepared by the Trustees taken together constitute a sufficient NRD assessment under applicable regulations; and (ii) on a number of legal grounds, whether the Trustees may recover from us on the specific NRD claims they have made.

Cost estimates. Estimates of the Site remediation change over time as we, or others, gain additional data and experience at the Site. In addition, disagreement exists over the likely costs for some of this work. Based upon estimates made by the Governments and independent estimates commissioned by various potentially responsible parties, we have no reason to disagree with the Governments' assertion that total past and future costs and NRDs at this site may exceed \$1 billion and that \$1.5 billion is a reasonable outside estimate.

NRDs. Of that amount, the Trustees' assessment documents claimed that we are jointly and severally responsible for NRDs with a value between \$176 million and \$333 million. They now claim that this range should be inflated to 2009 dollars and then certain unreimbursed past assessment costs should be added, so that the range of their claim would be \$287 million to \$423 million. We deny liability for most of these NRDs and believe that even if anyone is liable, that we are not jointly and severally liable for the full amount. Moreover, we believe that the Trustees may not legally pursue this claim at this late date, as the limitations period for NRD claims is three years from discovery.

Allocation and Divisibility. We contend that we are not jointly and severally liable for costs or damages arising from the presence of PCBs downstream of OU1. In addition, we contend that NCR or other sources of NCR®-brand carbonless copy paper that our Neenah Mill recycled bear most, if not all, of the responsibility for costs and damages arising from the presence of PCBs in OU1 and downstream.

On December 16, 2009, the court granted motions for summary judgment in our favor in the Whiting Litigation holding that neither NCR nor API may seek contribution from us or other recyclers under CERCLA. The Court made no ruling as to any other allocation, the liability of NCR or API to us for costs we have incurred, or our liability to the Governments or Trustees. NCR and API have stated their intention to appeal, but an appeal is not yet timely because the court has not entered a final judgment.

We also filed counterclaims against NCR and API to recover the costs we have incurred and may later incur and the damages we have paid and may later pay in connection with the Site. Other defendants have similar claims. On February 28, 2011, the district court granted our summary judgment motions on those counterclaims in part and denied them in part. The court granted a declaration that NCR and API are liable to us (and to others) in contribution for 100% of any costs of response (that is, clean up) that we may be required to pay for work in OU2-5 in the future. On September 30, 2011, the court clarified its ruling with respect to NRDs and natural resource damage assessment costs, holding that NCR and API owe full contribution to us (and others) for NRDs or natural resource damage assessment costs that we have paid or may be required to pay in the future. The court required further proceedings to decide whether or to what extent NCR and API owe contribution to us and others for costs that we and others incurred in the past and costs that we and others incurred in connection with OU1. In addition, NCR and API contended that some of the costs we claim are not recoverable and that our insurance coverage settlements ought to be set off against any recovery in whole or in part. Those issues were tried to the court in February 2012. Post-trial submissions are not yet complete and the court has not yet issued its decision. We expect that decision to determine the precise amounts due us on our counterclaims with respect to costs and damages we have already paid.

Reserves for the Site. As of March 31, 2012, our reserve for our claimed liability at the Site, including our remediation and ongoing monitoring obligations at OU1, our claimed liability for the remediation of the rest of the Site, our claimed liability for NRDs associated with PCB contamination at the Site and all pending, threatened or asserted and unasserted claims against us relating to PCB contamination at the Site totaled \$16.5 million. Of our total reserve for the Fox River, \$0.3 million is recorded in the accompanying consolidated balance sheets under the caption Environmental liabilities and the remainder is recorded under the caption Other long term liabilities.

Table of Contents

Although we believe that amounts already funded by us and WTM I to implement the OU1 remedy are adequate and no payments have been required since January 2009, there can be no assurance that these amounts will in fact suffice. WTM I has filed a bankruptcy petition in the Bankruptcy Court in Richmond; accordingly, there can be no assurance that WTM I will be able to fulfill its obligation to pay half of any additional costs, if required.

We believe that we have strong defenses to liability for further remediation downstream of OU1, including the existence of ample data that indicate that PCBs did not leave OU1 in concentrations that could have caused or contributed to the need for additional cleanup downstream. Others, including the EPA and other PRPs, disagree with us and, as a result, the EPA has issued a UAO to us and to others to perform the additional remedial work, and filed the Government Action seeking, in part, the same relief. NCR and API commenced the Whiting Litigation and joined us and others as defendants, but, to this point, have not prevailed.

Even if we are not successful in establishing that we have no further remediation liability, we do not believe that we would be allocated a significant percentage share of liability in any equitable allocation of the remediation costs and natural resource damages. The accompanying consolidated financial statements do not include reserves for defense costs for the Whiting Litigation, the Government Action, or any future defense costs related to our involvement at the Site, which could be significant.

In setting our reserve for the Site, we have assessed our legal defenses, including our successful defenses to the allegations made in the Whiting Litigation, and assumed that we will not bear the entire cost of remediation or damages to the exclusion of other known PRPs at the Site, who are also potentially jointly and severally liable. The existence and ability of other PRPs to participate has also been taken into account in setting our reserve, and is generally based on our evaluation of recent publicly available financial information on certain of the PRPs and any known insurance, indemnity or cost sharing agreements between PRPs and third parties. In addition, our assessment is based upon the magnitude, nature, location and circumstances associated with the various discharges of PCBs to the river and the relationship of those discharges to identified contamination. We will continue to evaluate our exposure and the level of our reserves, including, but not limited to, our potential share of the costs and NRDs, if any, associated with the Site.

The amount and timing of future expenditures for environmental compliance, cleanup, remediation and personal injury, NRDs and property damage liabilities cannot be ascertained with any certainty due to, among other things, the unknown extent and nature of any contamination, the response actions that may ultimately be required, the availability of remediation equipment, and landfill space, and the number and financial resources of any other PRPs.

Other Information. The Governments have published studies estimating the amount of PCBs discharged by each identified PRP's facility to the lower Fox River and Green Bay. These reports estimate the Neenah Facility's share of the mass of PCBs discharged to be as high as 27%. We do not believe the discharge mass estimates used in these studies are accurate because (a) the studies themselves disclose that they are not accurate and (b) the PCB mass estimates contained in the studies are based on assumptions that are unsupported by existing data on the Site. We believe that the Neenah Facility's absolute and relative contribution of PCB mass is significantly lower than the estimates set forth in these studies.

In any event, based upon the court's December 16, 2009, and February 28, 2011, rulings in the Whiting Litigation, statements in the court's disposition of the United States' 2011 motions for a preliminary injunction in the Government Action, as well as certain other procedural orders, we continue to believe that an allocation in proportion to mass of PCBs discharged would not constitute an equitable allocation of the potential liability for the contamination at the Fox River. We contend that other factors, such as the location of contamination, the location of discharge, and a party's role in causing discharge, must be considered in order for the allocation to be equitable.

We previously entered into interim cost-sharing agreements with six of the other PRPs, which provided for those PRPs to share certain costs relating to scientific studies of PCBs discharged at the Site (Interim Cost Sharing Agreements). These Interim Cost Sharing Agreements do not establish the final allocation of remediation costs incurred at the Site. Based upon our evaluation of the Court's December 16, 2009, and February 28, 2011 rulings in the Whiting Litigation as well as the volume, nature and location of the various discharges of PCBs at the Site and the relationship of those discharges to identified contamination, we believe our allocable share of liability at the Site is less than our share of costs under the Interim Cost Sharing Agreements.

Table of Contents

Range of Reasonably Possible Outcomes. Our analysis of the range of reasonably possible outcomes is derived from all available information, including but not limited to official documents such as RODs, discussions with the United States and other PRPs, as well as legal counsel and engineering consultants. Based on our analysis of the current RODs and cost estimates for work to be performed at the Site, we believe that it is reasonably possible that our costs associated with the Fox River matter may exceed our cost estimates and the aggregate amounts accrued for the Fox River matter by amounts that are insignificant or that could range up to \$265 million over an undeterminable period that could range beyond 10 years. We believe that the likelihood of an outcome in the upper end of the monetary range is significantly less than other possible outcomes within the range and that the possibility of an outcome in excess of the upper end of the monetary range is remote. The two summary judgments in our favor in the Whiting Litigation, if sustained on appeal, suggest that outcomes in the upper end of the monetary range have become somewhat less probable, while increases in cost estimates for some of the work may make an outcome in the upper end of the range more likely.

Summary. Our current assessment is that we will be able to manage this environmental matter without a long-term, material adverse impact on the Company. This matter could, however, at any particular time or for any particular year or years, have a material adverse effect on our consolidated financial position, liquidity and/or results of operations or could result in a default under our debt covenants. Moreover, there can be no assurance that our reserves will be adequate to provide for future obligations related to this matter, that our share of costs and/or damages will not exceed our available resources, or that such obligations will not have a long-term, material adverse effect on our consolidated financial position, liquidity or results of operations. Should a court grant the United States or the State of Wisconsin relief which requires us either to perform directly or to contribute significant amounts towards remedial action downstream of OU1 or to natural resource damages, those developments could have a material adverse effect on our consolidated financial position, liquidity and results of operations and might result in a default under our loan covenants.

The sum of individual amounts set forth above may not agree to the consolidated financial statements included herein due to rounding.

Results of individual business units are presented based on our management accounting practices and management structure. There is no comprehensive, authoritative body of guidance for management accounting equivalent to accounting principles generally accepted in the United States of America; therefore, the financial results of individual business units are not necessarily comparable with similar information for any other company. The management accounting process uses assumptions and allocations to measure performance of the business units. Methodologies are refined from time to time as management accounting practices are enhanced and businesses change. The costs incurred by support areas not directly aligned with the business unit are allocated primarily based on an estimated utilization of support area services or are included in Other and Unallocated in the Business Unit Performance table.

Management evaluates results of operations of the business units before pension income or expense, alternative fuel mixture credits, debt redemption costs, restructuring related charges, certain corporate level costs, and the effects of asset dispositions. Management believes that this is a more meaningful representation of the operating performance of its core businesses, the profitability of business units and the extent of cash flow generated from these core operations. Such amounts are presented under the caption Other and Unallocated. This presentation is aligned with the management and operating structure of our company. It is also on this basis that the Company's performance is evaluated internally and by the Company's Board of Directors.

Table of Contents**16. GUARANTOR FINANCIAL STATEMENTS**

Our 7 1/8% Notes are fully and unconditionally guaranteed, on a joint and several basis, by certain of our 100%-owned domestic subsidiaries: PHG Tea Leaves, Inc., Mollanvick, Inc., The Glatfelter Pulp Wood Company, and Glatfelter Holdings, LLC.

The following presents our condensed consolidating statements of income and comprehensive income and cash flow, and our condensed consolidating balance sheets. These financial statements reflect P. H. Glatfelter Company (the parent), the guarantor subsidiaries (on a combined basis), the non-guarantor subsidiaries (on a combined basis) and elimination entries necessary to combine such entities on a consolidated basis.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with the information in the unaudited condensed consolidated financial statements and notes thereto included herein and Glatfelter's Financial Statements and Management's Discussion and Analysis of Financial Condition and Results of Operations included in our 2011 Annual Report on Form 10-K.

Forward-Looking Statements This Quarterly Report on Form 10-Q includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact, including statements regarding industry prospects and future consolidated financial position or results of operations, made in this Report on Form 10-Q are forward looking. We use words such as anticipates, believes, expects, future, intends and similar expressions to identify forward-looking statements. Forward-looking statements reflect management's current expectations and are inherently uncertain. Our actual results may differ significantly from such expectations. The following discussion includes forward-looking statements regarding expectations of, among others, non-cash pension expense, environmental costs, capital expenditures and liquidity, all of which are inherently difficult to predict. Although we make such statements based on assumptions that we believe to be reasonable, there can be no assurance that actual results will not differ materially from our expectations. Accordingly, we identify the following important factors, among others, which could cause our results to differ from any results that might be projected, forecasted or estimated in any such forward-looking statements:

- i. variations in demand for our products including the impact of any unplanned market-related downtime, or variations in product pricing;
- ii. changes in the cost or availability of raw materials we use, in particular pulpwood, pulp, pulp substitutes, caustic soda and abaca fiber;
- iii. changes in energy-related costs and commodity raw materials with an energy component;
- iv. our ability to develop new, high value-added products;
- v. the impact of exposure to volatile market-based pricing for sales of excess electricity;
- vi. the impact of competition, changes in industry production capacity, including the construction of new mills, the closing of mills and incremental changes due to capital expenditures or productivity increases;
- vii. the gain or loss of significant customers and/or on-going viability of such customers;
- viii. cost and other effects of environmental compliance, cleanup, damages, remediation or restoration, or personal injury or property damages related thereto, such as the costs of natural resource restoration or damages related to the presence of polychlorinated biphenyls (PCBs) in the lower Fox River on which our former Neenah mill was located;
- ix. risks associated with our international operations, including local economic and political environments and fluctuations in currency exchange rates;
- x. geopolitical events, including war and terrorism;
- xi. disruptions in production and/or increased costs due to labor disputes;

Edgar Filing: GLATFELTER P H CO - Form 10-Q

- xii. the impact of unfavorable outcomes of audits by various state, federal or international tax authorities;
 - xiii. enactment of adverse state, federal or foreign tax or other legislation or changes in government policy or regulation;
 - xiv. adverse results in litigation in the Fox River matter;
 - xv. our ability to finance, consummate and integrate acquisitions; and
 - xvi. the cost, and successful design and construction, of the Composite Fibers capacity expansion project.
- We manufacture a wide array of specialty papers and fiber-based engineered materials. We manage our company along three business units:

Specialty Papers with revenue from the sale of carbonless papers and forms, book publishing, envelope & converting papers, and fiber-based engineered products;

Composite Fibers with revenue from the sale of single-serve coffee and tea filtration papers, metallized papers, composite laminates used for decorative furniture and flooring applications, and other technical specialty papers; and

Advanced Airlaid Materials with revenue from the sale of airlaid non-woven fabric like materials used in feminine hygiene products, adult incontinence products, cleaning pads, wipes, food pads, napkins, tablecloths, and baby wipes.

GLATFELTER

3.31.12 Form 10-Q

Table of Contents**RESULTS OF OPERATIONS****Three months ended March 31, 2012 versus the Three months ended March 31, 2011**

Overview For the first quarter of 2012, net income was \$18.9 million, or \$0.43 per diluted share, compared with \$17.4 million, or \$0.38 per diluted share, in the first quarter of 2011. The amounts reported for 2011 include \$1.7 million in after-tax gains from timberland sales.

Operationally, our results reflect \$2.2 million of higher operating income from our business units primarily reflecting higher selling prices, efficient operations and continuous improvement initiatives. Overall, volumes shipped declined 1.0% in the year-over-year comparison.

Specialty Papers operating income totaled \$23.7 million and \$22.2 million for the first quarters of 2012 and 2011, respectively. Although volumes shipped declined 1.5%, this unit's profitability was favorably impacted by higher selling prices, the mix of products sold and efficient operations.

Our Composite Fibers business unit's first quarter of 2012 operating income declined to \$10.9 million from \$12.4 million in the first quarter of 2011 primarily due to lost production from downtime associated with two machine upgrades as well as translation of foreign currencies. Volumes shipped were essentially unchanged.

Advanced Airlaid Materials operating income increased to \$3.9 million compared with \$1.7 million for the first quarter of 2011, reflecting improvements in operating efficiency and lower raw material and energy costs.

The increase in consolidated net income and earnings per share also reflects \$1.4 million, after tax, of lower interest expense as a result of the debt refinancing activities undertaken in the fourth quarter of 2011 and lower shares outstanding due to the 2011 share repurchase program. Diluted shares outstanding for the first quarter of 2012 declined by 2.9 million shares compared with the first quarter of 2011.

The following table sets forth summarized results of operations:

<i>In thousands, except per share</i>	Three months ended March 31	
	2012	2011
Net sales	\$ 397,352	\$ 396,771
Gross profit	60,970	60,167
Operating income	31,040	31,572
Net income	18,878	17,426
Earnings per diluted share	0.43	0.38

The consolidated results of operations for the three months ended March 31, 2011 include the following significant items:

<i>In thousands, except per share</i>	After-tax Gain (loss)	Diluted EPS
2011		
Gains on sale of timberlands	\$ 1,718	\$ 0.04
Acquisition and integration costs	(275)	(0.01)

The above items increased earnings by \$1.4 million, or \$0.03 per diluted share, in first quarter of 2011.

Table of Contents

Business Units Results of individual business units are presented based on our management accounting practices and management structure. There is no comprehensive, authoritative body of guidance for management accounting equivalent to accounting principles generally accepted in the United States of America; therefore, the financial results of individual business units are not necessarily comparable with similar information for any other company. The management accounting process uses assumptions and allocations to measure performance of the business units. Methodologies are refined from time to time as management accounting practices are enhanced and businesses change. The costs incurred by support areas not directly aligned with the business unit are allocated primarily based on an estimated utilization of support area services or are included in Other and Unallocated in the Business Unit Performance table.

Management evaluates results of operations of the business units before pension income or expense, alternative fuel mixture credits, debt redemption costs, restructuring related charges, certain corporate level costs, and the effects of asset dispositions. Management believes that this is a more meaningful representation of the operating performance of its core businesses, the profitability of business units and the extent of cash flow generated from these core operations. Such amounts are presented under the caption Other and Unallocated. This presentation is aligned with the management and operating structure of our company. It is also on this basis that the Company's performance is evaluated internally and by the Company's Board of Directors.

Sales and Costs of Products Sold

<i>In thousands</i>	Three months ended		
	March 31		
	2012	2011	Change
Net sales	\$ 397,352	\$ 396,771	\$ 581
Energy and related sales net	1,861	2,987	(1,126)
Total revenues	399,213	399,758	(545)
Costs of products sold	338,243	339,591	(1,348)
Gross profit	\$ 60,970	60,167	\$ 803
Gross profit as a percent of Net sales	15.3%	15.2%	

The following table sets forth the contribution to consolidated net sales by each business unit:

<i>Percent of Total</i>	Three months ended	
	March 31	
	2012	2011
Business Unit		
Specialty Papers	56.3%	55.6%
Composite Fibers	28.2	29.0
Advanced Airlaid Materials	15.5	15.4
Total	100.0%	100.0%

Net sales for the first quarter of 2012 increased slightly to \$397.4 million compared with \$396.8 million in the first quarter of 2011. The translation of foreign currencies unfavorably impacted net sales by \$4.8 million in the comparison.

In the Specialty Papers business unit, 2012 first quarter net sales increased \$3.3 million due to a \$3.7 million benefit from higher selling prices and an improved mix of products sold, partially offset by a 1.5% decline in shipping volumes. Carbonless volumes benefited from increased demand in advance of our previously announced price increase effective at the end of March 2012.

Specialty Papers 2012 first quarter operating income was \$1.5 million higher than the same period of 2011 reflecting the benefit from higher selling prices and \$1.8 million from continuous improvement initiatives production efficiencies, and the timing of maintenance. These factors offset a \$1.5 million adverse impact of higher input costs and \$1.1 million of lower energy and related sales. Results for the 2011 first quarter

Edgar Filing: GLATFELTER P H CO - Form 10-Q

benefited by \$2.8 million from an insurance recovery and the resolution of a tax audit.

We sell excess power generated by the Spring Grove, PA facility. The following table summarizes this activity for the first quarters of 2012 and 2011:

<i>In thousands</i>	2012	2011	Change
Energy sales	\$ 1,039	\$ 2,892	\$ (1,853)
Costs to produce	(1,010)	(2,477)	1,467
Net	29	415	(386)
Renewable energy credits	1,832	2,572	(740)
Total	\$ 1,861	\$ 2,987	\$ (1,126)

Renewable energy credits (RECs) represent sales of certified credits earned related to burning renewable sources of energy such as black liquor and wood waste. We sell RECs into an emerging and somewhat illiquid market. The extent and value of future revenues from REC sales is dependent on many factors outside of management s control. Therefore, we may not be able to generate consistent additional sales of RECs in future periods.

In Composite Fibers, 2012 first quarter net sales were \$111.9 million, a decrease of \$3.3 million, or 2.9%, primarily due to the translation of foreign currencies which unfavorably impacted the comparison by \$3.4 million partially offset by a \$1.1 million benefit from higher selling prices.

Composite Fibers first-quarter 2012 operating income decreased by \$1.5 million as the benefit from higher selling prices was more than offset by unfavorable operating costs including higher energy costs, general inflation, and a \$0.7

- 23 -

Table of Contents

million impact from the completion of machine upgrades at two facilities. In addition, the translation of foreign currencies was \$0.5 million unfavorable.

In Advanced Airlaid Materials, net sales were \$61.6 million and \$61.1 million in the first quarters of 2012 and 2011, respectively. The increase was primarily due to a 3.7% increase in volumes shipped which more than offset a \$0.4 million adverse impact of lower selling prices.

First-quarter 2012 operating income increased \$2.1 million compared with the year ago quarter led by a \$1.5 million benefit from continuous improvement initiatives including supply chain efficiencies, waste reduction, improved throughput, and benefits from a new festooner. In addition, lower raw material and energy costs benefited results by \$1.0 million.

Pension Expense The following table summarizes the amounts of pension expense recognized for the periods indicated:

<i>In thousands</i>	Three months ended		
	2012	2011	Change
<i>Recorded as:</i>			
Costs of products sold	\$ 2,623	\$ 2,075	\$ 548
SG&A expense	453	319	134
Total	\$ 3,076	\$ 2,394	\$ 682

The amount of pension expense or income recognized each year is determined using various actuarial assumptions and certain other factors, including discount rates and the fair value of our pension assets as of the beginning of the year.

Other and Unallocated The amount of net expenses not allocated to a business unit and reported as Other and Unallocated in our table of *Business Unit Performance* totaled \$7.4 million in the first quarter of 2012 compared with net expenses of \$4.8 million in the first quarter of 2011. The change was primarily due to \$3.2 million of gains on dispositions of plant, equipment and timberlands in the first quarter of 2011. Excluding these gains, other and unallocated net operating expenses decreased \$0.6 million.

Non-operating income (expense) as presented in the *Business Unit Performance* table includes \$4.3 million of interest expense for the first quarter of 2012, a decrease of \$2.2 million in the quarterly comparison primarily due to the redemption in the fourth quarter of 2011 of \$100.0 million of 7 1/8% bonds.

Income taxes For the first three months of 2012, we recorded a provision for income taxes of \$8.2 million on \$27.1 million of pretax income, or 30.3%. The comparable amounts in the first quarter of 2011 were income tax expense \$7.9 million on \$25.3 million of pretax income, or 31.2%. The lower tax rate in the first quarter of 2012 was due, in part, to gains on timberland sales in the first quarter of 2011 which are taxed at a higher rate, partially offset by the expiration of the research and development tax credit and a change in the mix of jurisdictions in which taxable income is generated.

Foreign Currency We own and operate facilities in Canada, Germany, France, the United Kingdom and the Philippines. The functional currency of our Canadian operations is the U.S. dollar. However, in Germany and France it is the Euro, in the UK, it is the British Pound Sterling, and in the Philippines the functional currency is the Peso. During the first three months of 2012, Euro functional currency operations generated approximately 25.7% of our sales and 24.8% of operating expenses and British Pound Sterling operations represented 7.0% of net sales and 7.0% of operating expenses. The translation of the results from these international operations into U.S. dollars is subject to changes in foreign currency exchange rates.

The table below summarizes the effect from foreign currency translation on the reported results for first three months of 2012 compared to the first three months 2011:

In thousands

Edgar Filing: GLATFELTER P H CO - Form 10-Q

	Three months ended March 31 Favorable (unfavorable)
Net sales	\$ (4,837)
Costs of products sold	3,723
SG&A expenses	434
Income taxes and other	82
Net income	\$ (598)

The above table only presents the financial reporting impact of foreign currency translations assuming currency exchange rates in 2012 were the same as 2011. It does not present the impact of certain competitive advantages or disadvantages of operating or competing in multi-currency markets.

GLATFELTER

3.31.12 Form 10-Q

Table of Contents**LIQUIDITY AND CAPITAL RESOURCES**

Our business is capital intensive and requires significant expenditures for new or enhanced equipment, for environmental compliance matters, to support our research and development efforts and for our business strategy. In addition we have mandatory debt service requirements of both principal and interest. The following table summarizes cash flow information for each of the years presented:

<i>In thousands</i>	Three months ended March 31	
	2012	2011
Cash and cash equivalents at beginning of period	\$ 38,277	\$ 95,788
Cash provided by (used for)		
Operating activities	9,743	27,613
Investing activities	(14,103)	(4,683)
Financing activities	(9,473)	(4,307)
Effect of exchange rate changes on cash	455	1,526
Net cash provided (used)	(13,378)	20,149
Cash and cash equivalents at end of period	\$ 24,899	\$ 115,937

As of March 31, 2012, we had \$24.9 million in cash and cash equivalents and \$323.4 million available under our revolving credit agreement, which matures in November 2016.

Operating cash flow declined in the year-over-year comparison by \$17.9 million. The decline was primarily due to the collection in 2011 of \$17.8 million of cellulosic biofuel credits.

Net cash used by investing activities totaled \$14.1 million in the first quarter of 2012 compared with \$4.7 million in the first quarter of 2011. The increase was due to a \$6.1 million increase in capital expenditures, which totaled \$14.2 million in the 2012 first quarter compared with \$8.1 million in the same quarter of 2011. Increased capital expenditures include \$4.7 million for the Composite Fibers capacity expansion. Capital expenditures are expected to approximate \$95 million to \$105 million in 2012 including \$30 million to \$35 million of the \$50 million investment to expand capacity to serve Composite Fibers growth markets.

Net cash used by financing activities increased \$5.2 million in the first quarter of 2012 compared with the first quarter of 2011, reflecting reduced borrowings under our revolving credit facility.

The following table sets forth our outstanding long-term indebtedness:

<i>In thousands</i>	March 31, 2012	Dec. 31, 2011
Revolving credit facility, due Nov. 2016	\$ 22,000	\$ 27,000
7 1/8% Notes, due May 2016	200,000	200,000
Total long-term debt	222,000	227,000
Less current portion		
Long-term debt, excluding current portion	\$ 222,000	\$ 227,000

Our revolving credit facility contains a number of customary compliance covenants. In addition, the 7 1/8% Notes contain cross default provisions that could result in all such notes becoming due and payable in the event of a failure to repay debt outstanding under the credit agreement at maturity, or a default under the credit agreement, that accelerates the debt outstanding thereunder. As of March 31, 2012, we met all of the requirements of our debt covenants. The significant terms of the debt instruments are more fully discussed in Item 1 Financial

Edgar Filing: GLATFELTER P H CO - Form 10-Q

Statements Note 9.

Cash dividends paid on common stock totaled \$3.9 million and \$4.2 million in the first quarters of 2012 and 2011, respectively. Our Board of Directors determines what, if any, dividends will be paid to our shareholders. Dividend payment decisions are based upon then-existing factors and conditions and, therefore, historical trends of dividend payments are not necessarily indicative of future payments.

We are subject to various federal, state and local laws and regulations which operate to protect the environment as well as human health and safety. We have, at various times, incurred significant cost to comply with these regulations, as new regulations are developed or regulatory priorities change. Currently, we anticipate that we could incur material capital and operating costs to comply with several air quality regulations including the U.S. EPA Best Available Retrofit Technology rule (BART; otherwise known as the Regional Haze Rule) and the Boiler Maximum Achievable Control Technology rule (Boiler MACT). For example, on March 21, 2011, the U. S. Environmental Protection Agency issued new rules which could require process modifications and/or installation of air pollution controls on power boilers at two of our facilities. We are currently reviewing these rules, and challenges to them filed by others in the court system, to understand the effect they may have on our operations if we are required to comply with the rules in their current form. We are also evaluating options that may be available to us, such as reducing or curtailing boiler usage or modifying the types of boilers operated or fuel consumed. The cost of compliance is likely to be significant. Our initial estimates to implement viable options could result in additional capital spending in excess of \$30 million; however, the amount ultimately incurred may be less depending on the outcome of

- 25 -

GLATFELTER

3.31.12 Form 10-Q

Table of Contents

challenges to current rules or on our successful implementation of appropriate available options. In addition, the timing of any additional capital spending is uncertain. Enactment of new environmental laws or regulations or changes in existing laws or regulations could significantly change our estimates.

In addition, we may incur obligations to remove or mitigate any adverse effects on the environment resulting from our operations, including the restoration of natural resources and liability for personal injury and for damages to property and natural resources. See Item 1 Financial Statements Note 14 for a summary of significant environmental matters.

We expect to meet all of our near- and longer-term cash needs from a combination of operating cash flow, cash and cash equivalents, our credit facility or other bank lines of credit and other long-term debt. However, as discussed in Item 1 Financial Statements Note 14, an unfavorable outcome of various environmental matters could have a material adverse impact on our consolidated financial position, liquidity and/or results of operations.

Off-Balance-Sheet Arrangements As of March 31, 2012 and December 31, 2011, we had not entered into any off-balance-sheet arrangements. Financial derivative instruments, to which we are a party, and guarantees of indebtedness, which solely consist of obligations of subsidiaries and a partnership, are reflected in the condensed consolidated balance sheets included herein in Item 1 Financial Statements.

Outlook For Specialty Papers, we expect slightly lower shipping volumes and an unfavorable mix in the second quarter of 2012 compared with the first quarter of 2012. Selling prices should rise as announced price increases are implemented and overall input costs are expected to rise slightly. We also plan to complete the annually scheduled maintenance outages at both the Chillicothe and Spring Grove facilities in the second quarter of 2012. The outages are expected to adversely impact second quarter operating profit by approximately \$21 million, pre-tax. In addition, non-shutdown related maintenance spending is expected to increase by approximately \$2 million, pre-tax, compared to the first quarter.

We anticipate Composite Fibers shipping volumes will be 5% higher in the second quarter and that selling prices will generally be in line with the first quarter of 2012. However, the mix of products sold is expected to be slightly unfavorable. Input costs are expected to increase moderately.

Shipping volumes for the Advanced Airlaid Materials business unit in the second quarter of 2012 are expected to be in-line with the first quarter of 2012. Input cost increases are expected to outpace selling price changes due to the pass-through provisions in certain customer contracts but we expect this to be more than offset by the impact of our continuous improvement initiatives.

3.31.12 Form 10-Q

Table of Contents**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISKS**

<i>Dollars in thousands</i>	Year Ended December 31					At March 31, 2012	
	2012	2013	2014	2015	2016	Carrying Value	Fair Value
Long-term debt							
Average principal outstanding							
At fixed interest rates	\$ 200,000	\$ 200,000	\$ 200,000	\$ 200,000	\$ 76,923	\$ 200,000	\$ 204,954
At variable interest rates	22,000	22,000	22,000	22,000	18,615	22,000	22,000
						\$ 222,000	\$ 226,954
Weighted-average interest rate							
On fixed rate debt	7.13%	7.13%	7.13%	7.13%	7.13%		
On variable rate debt	2.00	2.00	2.00	2.00	2.00		

The table above presents the average principal outstanding and related interest rates for the next five years for debt outstanding as of March 31, 2012. Fair values included herein have been determined based upon rates currently available to us for debt with similar terms and remaining maturities.

Our market risk exposure primarily results from changes in interest rates and currency exchange rates. At March 31, 2012, we had long-term debt outstanding of \$222.0 million, of which \$22.0 million or 9.9% was at variable interest rates. Variable-rate debt outstanding represents borrowings under our revolving credit agreement that accrues interest based on one month LIBOR plus a margin. At March 31, 2012, the weighted-average interest rate paid was approximately 2.00%. A hypothetical 100 basis point increase or decrease in the interest rate on variable rate debt would increase or decrease annual interest expense by \$0.2 million.

As part of our overall risk management practices, we enter into financial derivatives primarily designed to either i) hedge foreign currency risks associated with forecasted transactions – cash flow hedges ; or ii) mitigate the impact that changes in currency exchange rates have on intercompany financing transactions and foreign currency denominated receivables and payables – foreign currency hedges. For a more complete discussion of this activity, refer to Item 1 Financial Statements Note 12.

We are subject to certain risks associated with changes in foreign currency exchange rates to the extent our operations are conducted in currencies other than the U.S. Dollar. During the first three months of 2012, Euro functional currency operations generated approximately 25.7% of our sales and 24.8% of operating expenses and British Pound Sterling operations represented 7.0% of net sales and 7.0% of operating expenses.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures Our chief executive officer and our principal financial officer, after evaluating the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of March 31, 2012, have concluded that, as of the evaluation date, our disclosure controls and procedures are effective.

Changes in Internal Controls There were no changes in our internal control over financial reporting during the three months ended March 31, 2012, that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.
