### Dear Shareholder

About this time one year ago, financial market activity was dominated by concerns about Europe's debt crisis. Investors were also discouraged by gloomy economic reports from various parts of the world, particularly in China. As the outlook for the global economy worsened, however, investors grew increasingly optimistic that the world's largest central banks would intervene to stimulate growth. This theme, along with the European Central Bank's (ECB's) firm commitment to preserve the euro currency bloc, drove most asset classes higher through the summer of 2012. In early September, the ECB announced its sovereign bond-buying program designed to support the region's debt-laden countries. Days later, the US Federal Reserve announced its own much-anticipated stimulus package.

Although financial markets world-wide were buoyed by these aggressive policy actions, risk assets weakened in the fall of 2012. Global trade slowed as many European countries fell into recession and growth continued to decelerate in China. In the United States, stocks slid on lackluster corporate earnings and volatility rose in advance of the US Presidential election. In the post-election environment, investors became more concerned about the fiscal cliff, the automatic tax increases and spending cuts that had been scheduled to take effect at the beginning of 2013. High levels of global market volatility persisted through year-end due to fears that bipartisan gridlock would preclude a timely resolution, putting the US economy at high risk for recession. Ultimately, the worst of the fiscal cliff was averted with a last-minute tax deal, although decisions relating to spending cuts and the debt ceiling were postponed, leaving lingering uncertainty.

Investors shook off the nerve-racking finale to 2012 and the New Year began with a powerful relief rally. Money that had been pulled to the sidelines amid year-end tax-rate uncertainty poured back into the markets in January. Key indicators signaling modest but broad-based improvements in the world's major economies underpinned the rally. Underlying this aura of comfort was the absence of negative headlines out of Europe. Against this backdrop, global equities surged through January while rising US Treasury yields pressured high quality fixed income assets (as prices move in the opposite direction of yields).

However, bond markets regained strength in February (as yields once again dropped) when global economic momentum slowed and investors toned down their risk appetite. International stock markets weakened amid a resurgence of macro risk out of Europe. A stalemate presidential election in Italy was a reminder that political instability continued to plague the eurozone and a severe banking crisis in Cyprus underscored the fragility of the broader European banking system. In the United States, stocks continued to rise, but at a more moderate pace. Investors grew more cautious given uncertainty as to how long the central bank would continue its stimulus programs. How government spending cuts would impact the already slow economic recovery was another concern. But improving labor market data and rising home prices boosted sentiment in March, pushing major US stock indices to all-time highs. Investors scaled back their enthusiasm in April due to a series of disappointing economic reports. On the whole, US stocks have performed well thus far in 2013 as the US economy demonstrated enough resilience to allay fears of recession, but growth has remained slow enough to dissuade the US Federal Reserve from changing its stance.

Despite continued headwinds for global growth, risk assets have rallied, driven largely by investors seeking meaningful yields in the ongoing low-interest-rate environment. For the 6- and 12-month periods ended April 30, 2013, US and international stocks and high yield bonds posted strong gains. Emerging market equities lagged the rally as the uneven pace of global growth raised doubts that developing economies could thrive in the near term. US Treasury yields were highly volatile over the past 12 months, although they continue to remain low from a historical perspective. US Treasury and investment-grade bonds generated modest returns in this environment, while tax-exempt municipal bonds benefited from favorable supply-and-demand dynamics. Near-zero short term interest rates continued to keep yields on money market securities near their all-time lows.

Market conditions have improved over the past couple of years, but investors still remain highly uncertain and many of the old ways of investing no longer work. That's why the new world of investing calls for a new approach. One that seeks out more opportunities in more places across a broader array of investments in a portfolio designed to move freely as the markets move up and down. Visit [www.blackrockplan.com](http://www.blackrockplan.com) to learn more about how to take action.

Sincerely,

Rob Kapito

Trust Summary as of April 30, 2013

BlackRock Credit Allocation Income Trust

**Trust Overview**

BlackRock Credit Allocation Income Trust's (BTZ) (the Trust) investment objective is to provide current income, current gains and capital appreciation. The Trust seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its assets in credit-related securities, including, but not limited to, investment grade corporate bonds, high yield bonds (commonly referred to as junk bonds), bank loans, preferred securities or convertible bonds or derivatives with economic characteristics similar to these credit-related securities. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust's investment objective will be achieved.

**Portfolio Management Commentary**

On July 27, 2012, the Board of Directors of BTZ approved separate plans of reorganization whereby BTZ would acquire all of the assets and assume all of the liabilities of Credit Allocation Income Trust (PSW), Credit Allocation Income Trust II (PSY) and Credit Allocation Income Trust III (BPP) (each a Target Fund) in exchange for newly issued shares of BTZ in a merger transaction. At a shareholder meeting on November 2, 2012, each Target Fund's shareholders approved their respective plan of reorganization and BTZ shareholders approved the issuance of BTZ shares in connection with each reorganization. The reorganizations took place on December 10, 2012. On February 11, 2013, BTZ changed its name to BlackRock Credit Allocation Income Trust.

**How did the Trust perform?**

For the six-month period ended April 30, 2013, the Trust returned 5.04% based on market price and 5.88% based on net asset value (NAV). For the same period, the closed-end Lipper Corporate BBB-Rated Debt Funds (Leveraged) category posted an average return of 5.12% based on market price and 4.83% based on NAV. All returns reflect reinvestment of dividends. The Trust's discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

**What factors influenced performance?**

The Trust's heavy exposure to credit sectors had a positive impact on performance as risk assets broadly rallied during the period. The Trust maintained a high level of leverage, which enhanced results in the positive market environment. A preference for companies generating cash flows sourced from the US domestic market proved beneficial. Also contributing positively to returns were the Trust's large allocations to the higher-yielding credit sectors such as high yield bonds, subordinated financials and lower-quality investment grade bonds.

**Describe recent portfolio activity.**

During the six-month period, the Trust was tactical in rotating in and out of sectors and individual credit names, but overall, did not make major changes to its overall positioning. The Trust continued to maintain a stance based on the assumption that the current low-growth, low-interest rate and low-volatility environment would continue for the near term. Thus far, the slow-growth paradigm in the United States has not proved sufficient to warrant a major change in central bank monetary policy and, as a result, credit sectors have been well supported. In this scenario where corporate funding is cheap and re-levering is a reality, the Trust remained focused on bottom-up security selection within industrials given the event-driven headline risk for a number of credits in that space.

**Describe portfolio positioning at period end.**

## Edgar Filing: BLACKROCK FLOATING RATE INCOME TRUST - Form N-CSRS

As of period end, the Trust's positioning remained largely consistent with the themes of 2012, which reflect a base case of the continuation of modest growth, accommodative monetary policy and low interest rates. In this environment, credit conditions remained supportive and thus the Trust retained its allocations to high yield bonds, financials, capital securities, and companies with cash flows derived from the United States.

SEMI-ANNUAL REPORT

APRIL 30, 2013

5

---

**Table of Contents**

Trust Summary as of April 30, 2013

BlackRock Floating Rate Income Trust

**Trust Overview**

BlackRock Floating Rate Income Trust's (BGT) (the Trust) primary investment objective is to provide a high level of current income. The Trust's secondary investment objective is to seek the preservation of capital. The Trust seeks to achieve its investment objectives by investing primarily, under normal conditions, at least 80% of its assets in floating and variable rate instruments of US and non-US issuers, including a substantial portion of its assets in global floating and variable rate securities including senior secured floating rate loans made to corporate and other business entities. Under normal market conditions, the Trust expects that the average effective duration of its portfolio will be no more than 1.5 years. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust's investment objectives will be achieved.

**Portfolio Management Commentary**

**How did the Trust perform?**

For the six-month period ended April 30, 2013, the Trust returned 10.55% based on market price and 6.56% based on NAV. For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of 8.61% based on market price and 6.32% based on NAV. All returns reflect reinvestment of dividends. The Trust's premium to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

**What factors influenced performance?**

Security selection in the technology and gaming sectors contributed positively to results, as did the Trust's tactical allocation to fixed-rate high yield corporate bonds, which outperformed floating rate loan interests (bank loans) over the period. The Trust's preference for non-US loan credits versus emerging market sovereign bonds had a positive impact as well.

Conversely, security selection in the electric and media non-cable sectors detracted from performance. The Trust's large exposures to the wireless and media cable sectors also had a negative impact.

**Describe recent portfolio activity.**

During the six-month period, the Trust maintained its focus on the higher quality portions of the loan market in terms of loan structure, liquidity and overall credit quality. The Trust sought issuers with attractive risk-reward characteristics and superior fundamentals, while avoiding lower-rated, less-liquid loan names that have rallied significantly, but offer a less compelling risk-reward trade-off. More specifically, with the average loan trading at or just above par today (leaving little or no potential for price appreciation and increased risk for unfavorable re-pricing), the Trust placed an emphasis on attaining attractive coupon income and investing in strong companies that are better positioned to endure the continued fragile economic environment.

**Describe portfolio positioning at period end.**

## Edgar Filing: BLACKROCK FLOATING RATE INCOME TRUST - Form N-CSRS

At period end, the Trust held 81% of its total portfolio in floating rate loan interests, 15% in corporate bonds and 3% in asset-backed securities, with the remainder invested in a mix of common stocks and other interests. The Trust's largest sector exposures included health care, consumer services and gaming. The Trust ended the period with leverage at approximately 29% of its total managed assets.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

### The Benefits and Risks of Leveraging

The Trusts may utilize leverage to seek to enhance the yield and NAV of their common shares ( Common Shares ). However, these objectives cannot be achieved in all interest rate environments.

The Trusts may utilize leverage by borrowing through a credit facility and/or entering into reverse repurchase agreements. In general, the concept of leveraging is based on the premise that the financing cost of assets to be obtained from leverage, which will be based on short-term interest rates, will normally be lower than the income earned by each Trust on its longer-term portfolio investments. To the extent that the total assets of each Trust (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Trust's shareholders will benefit from the incremental net income.

The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV. However, in order to benefit shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. If the yield curve becomes negatively sloped, meaning short-term interest rates exceed long-term interest rates, income to shareholders will be lower than if the Trusts had not used leverage.

To illustrate these concepts, assume a Trust's capitalization is \$100 million and it borrows for an additional \$30 million, creating a total value of \$130 million available for investment in long-term securities. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Trust pays borrowing costs and interest expense on the \$30 million of borrowings based on the lower short-term interest rates. At the same time, the securities purchased by the Trust with assets received from the borrowings earn income based on long-term interest rates. In this case, the borrowing costs and interest expense of the borrowings is significantly lower than the income earned on the Trust's long-term investments, and therefore the Trust's shareholders are the beneficiaries of the incremental net income.

If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental net income pickup will be reduced or eliminated completely. Furthermore, if prevailing short-term interest rates rise above long-term interest rates, the yield curve has a negative slope. In this case, the Trust pays higher short-term interest rates whereas the Trust's total portfolio earns income based on lower long-term interest rates.

Furthermore, the value of the Trusts' portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Trusts' borrowings does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Trusts' NAV positively or negatively in addition to the impact on Trust performance from borrowings discussed above.

The use of leverage may enhance opportunities for increased income to the Trusts, but as described above, it also creates risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in the Trusts' NAVs, market prices and dividend rates than comparable portfolios without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Trusts' net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, each Trust's net income will be less than if leverage had not been used, and therefore the amount available for distribution to shareholders will be reduced. Each Trust may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause a Trust to incur losses. The use of leverage may limit each Trust's ability to invest in certain types of securities or use certain types of hedging strategies. Each Trust will incur expenses in connection with the use of leverage, all of which are borne by shareholders and may reduce income.

Under the Investment Company Act of 1940, as amended (the 1940 Act ), the Trusts are permitted to issue senior securities representing indebtedness up to 33 1/3% of their total managed assets (each Trust's net assets plus the proceeds of any outstanding borrowings). If the Trusts segregate liquid assets having a value not less than the repurchase price (including accrued interest), a reverse repurchase agreement will not be considered a senior security and therefore will not be subject to this limitation. In addition, each Trust voluntarily limits its aggregate economic leverage to 50% of its managed assets. As of April 30, 2013, the Trusts had aggregate economic leverage from reverse repurchase agreements and/or borrowings through a credit facility as a percentage of their total managed assets as follows:

	<b>Percent of Economic Leverage</b>
BTZ	31%
BGT	29%
BIT	23%

## Derivative Financial Instruments

The Trusts may invest in various derivative financial instruments, including financial futures contracts, foreign currency exchange contracts, options and swaps, as specified in Note 2 of the Notes to Financial Statements, which may constitute forms of economic leverage. Such derivative financial instruments are used to obtain exposure to a security, index and/or market without owning or taking physical custody of securities or to hedge market, equity, credit, interest rate and/or foreign currency exchange rate risks. Derivative financial instruments involve risks, including the imperfect correlation between the value of a derivative financial instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the derivative financial instrument. The Trusts' ability to use a derivative financial instrument successfully depends on the investment advisor's ability to predict pertinent market movements accurately, which cannot be assured. The use of derivative financial instruments may result in losses greater than if they had not been used, may require a Trust to sell or purchase portfolio investments at inopportune times or for distressed values, may limit the amount of appreciation a Trust can realize on an investment, may result in lower dividends paid to shareholders or may cause a Trust to hold an investment that it might otherwise sell. The Trusts' investments in these instruments are discussed in detail in the Notes to Financial Statements.

## Notes to Schedule of investments

(a) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration to qualified institutional investors.

## Edgar Filing: BLACKROCK FLOATING RATE INCOME TRUST - Form N-CSRS

(b) Variable rate security. Rate shown is as of report date.

(c) All or a portion of security has been pledged as collateral in connection with open reverse repurchase agreements.

(d) When-issued security. Unsettled when-issued transactions were as follows:

Counterparty	Value	Unrealized Appreciation
Bank of America Corp.	\$ 4,476,571	\$ 22,899
JPMorgan Chase & Co.	\$ 2,744,953	\$ 45,854

(e) Security is perpetual in nature and has no stated maturity date.

(f) Represents a payment-in-kind security which may pay interest/dividends in additional par/shares.

(g) Convertible security.

(h) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.

(i) Investments in issuers considered to be an affiliate of the Trust during the six months ended April 30, 2013, for purposes of Section 2(a)(3) of the 1940 Act, were as follows:

Affiliate	Shares Held at October 31, 2012	Net Activity	Shares Held at April 30, 2013	Income
BlackRock Liquidity Funds, TempFund, Institutional Class	1,652,656	2,795,681	4,448,337	\$ 5,003

(j) Represents the current yield as of report date.

For Trust compliance purposes, the Trust's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Trust management. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

See Notes to Financial Statements.

<sup>1</sup> Using S&P's rating of the issuer.

## Edgar Filing: BLACKROCK FLOATING RATE INCOME TRUST - Form N-CSRS

<sup>2</sup> The maximum potential amount the Trust may pay should a negative credit event take place as defined under the terms of the agreement.

Interest rate swaps outstanding as of April 30, 2013 were as follows:

<b>Fixed Rate</b>	<b>Floating Rate</b>	<b>Counterparty/ Exchange</b>	<b>Expiration Date</b>	<b>Notional Amount (000)</b>	<b>Unrealized Appreciation (Depreciation)</b>
0.44% <sup>3</sup>	3-month LIBOR	Chicago Mercantile	8/29/14	USD 56,600	\$ (95,842)
2.71% <sup>3</sup>	3-month LIBOR	Credit Suisse Group AG	8/21/42	USD 300	6,503
2.97% <sup>3</sup>	3-month LIBOR	Deutsche Bank AG	1/31/43	USD 10,000	(317,420)
2.93% <sup>4</sup>	3-month LIBOR	Deutsche Bank AG	4/15/43	USD 2,000	46,492
<b>Total</b>					\$ (360,267)

<sup>3</sup> Trust pays the fixed rate and receives the floating rate.

<sup>4</sup> Trust pays the floating rate and receives the fixed rate.

**Fair Value Measurements** Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities that the Trust has the ability to access

Level 2 other observable inputs (including, but not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

See Notes to Financial Statements.

**Table of Contents**

## Schedule of Investments (continued)

BlackRock Credit Allocation Income Trust (BTZ)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivative financial instruments). The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Trust's policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and is not necessarily an indication of the risks associated with investing in those securities. For information about the Trust's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the Trust's investments and derivative financial instruments categorized in the disclosure hierarchy as of April 30, 2013:

	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Investments:				
Long-Term Investments:				
Asset-Backed Securities		\$ 7,926,549	\$ 8,415,000	\$ 16,341,549
Corporate Bonds		1,920,243,573	17,200,000	1,937,443,573
Preferred Securities	\$ 15,663,670	401,914,529		417,578,199
Taxable Municipal Bonds		18,971,450		18,971,450
US Government Sponsored Agency Securities		3,514,218		3,514,218
US Treasury Obligations		40,653,473		40,653,473
Short-Term Securities	4,448,337			4,448,337
Options Purchased:				
Interest Rate Contracts	32,812	173,038		205,850
<b>Total</b>	<b>\$ 20,144,819</b>	<b>\$ 2,393,396,830</b>	<b>\$25,615,000</b>	<b>\$ 2,439,156,649</b>

	Level 1	Level 2	Level 3	Total
Derivative Financial Instruments <sup>1</sup>				
<b>Assets:</b>				
Credit contracts		\$ 959,631		\$ 959,631
Interest rate contracts	\$ 90,035	52,995		143,030
<b>Liabilities:</b>				
Credit contracts		(1,355,140)		(1,355,140)
Foreign currency exchange contracts		(19,324)		(19,324)
Interest rate contracts	(6,063,557)	(553,808)		(6,617,365)
<b>Total</b>	<b>\$ (5,973,522)</b>	<b>\$ (915,646)</b>		<b>\$ (6,889,168)</b>

<sup>1</sup> Derivative financial instruments are swaps, financial futures contracts, foreign currency exchange contracts and options written. Swaps, financial futures contracts and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument and options written are shown at value.

Certain of the Trust's assets and liabilities are held at carrying amount or face value, which approximates fair value for financial statement purposes. As of April 30, 2013, such assets and liabilities are categorized within the disclosure hierarchy as follows:

Edgar Filing: BLACKROCK FLOATING RATE INCOME TRUST - Form N-CSRS

	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Cash pledged as collateral for centrally cleared swaps	\$ 110,000			\$ 110,000
Cash pledged as collateral for financial futures contracts	4,017,940			4,017,940
Cash pledged as collateral for swaps	1,850,000			1,850,000
<b>Liabilities:</b>				
Cash received as collateral for reverse repurchase agreements		\$ (8,667,000)		(8,667,000)
Reverse repurchase agreements		(750,036,395)		(750,036,395)
<b>Total</b>	\$ 5,977,940	\$ (758,703,395)		\$ (752,725,455)

There were no transfers between Level 1 and Level 2 during the six months ended April 30, 2013.

See Notes to Financial Statements.

## Schedule of Investments (concluded)

BlackRock Credit Allocation Income Trust (BTZ)

A reconciliation of Level 3 investments is presented when the Trust had a significant amount of Level 3 investments at the beginning and/or end of the period in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Asset- Backed Securities	Corporate Bonds	Total
<b>Assets:</b>			
Opening Balance, as of October 31, 2012	\$ 3,982,000	\$ 8,192,550	\$ 12,174,550
Transfers into Level 3 <sup>1</sup>			
Transfers out of Level 3 <sup>1</sup>			
Accrued discounts/premiums	57,923		57,923
Net realized gain (loss)			
Net change in unrealized appreciation/depreciation <sup>2</sup>	329,921	517,450	847,371
Purchases	4,045,156	8,490,000	12,535,156
Sales			
<b>Closing Balance, as of April 30, 2013</b>	<b>\$ 8,415,000</b>	<b>\$17,200,000</b>	<b>\$ 25,615,000</b>

<sup>1</sup> Transfers into and transfers out of Level 3 represent the values as of the beginning of the reporting period.

<sup>2</sup> Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held as of April 30, 2013 was \$847,371.

See Notes to Financial Statements.
