Portfolio Statistics by Investment Strategy Portfolio statistics illustrate CSWC's prudent investment underwriting Note: All metrics above exclude the I-45 Senior Loan Fund At September 30, 2017, we had equity ownership in approximately 84.6% of our LMM investments. The weighted-average annual effective yields were computed using the effective interest rates for all debt investments at cost as of September 30, 2017, including accretion of original issue discount but excluding fees payable upon repayment of the debt instruments and any debt investments on non-accrual status. As of September 30, 2017, there were no investments on non-accrual status. Weighted-average annual effective yield is higher than what an investor in shares in our common stock will realize on its investment because it does not reflect our expenses or any sales load paid by an investor. Weighted average metrics are calculated using investment cost basis weighting. Includes CSWC debt investments only. Calculated as the amount of each portfolio company's debt (including CSWC's position and debt senior or pari passu to CSWC's position, but excluding debt subordinated to CSWC's position) in the capital structure divided by each portfolio company's adjusted EBITDA. Management uses this metric as a guide to evaluate relative risk of its position in each portfolio debt investment

Interest Rate Sensitivity Fixed vs. Floating Portfolio Composition (1) Debt Portfolio Exposure at 9/30/17

Well-Positioned for Changes to Base Interest Rates Note: Illustrative change in NII is based on CSWC's existing debt investments as of 9/30/17, adjusted only for changes in Base Rates. The results of this analysis include the I-45 Senior Loan Fund, which is comprised of 100% floating rate assets and liabilities. (1) Portfolio Composition includes I-45 assets pro rata as a % of CSWC's equity investment in the fund

Management interests are directly aligned with all Stakeholders Both the asset manager and the managed investment assets are consolidated and therefore all stakeholders have an interest in both entities Management owns equity directly in the BDC All management activities flow to the benefit of all stakeholders Operating expenses of an internally managed BDC typically offer a lower fee structure than an externally managed BDC (Opex as a % of Assets) Average of 2.2% for Internally Managed BDCs vs. 3.6% for similarly sized Externally Managed BDCs CSWC continues to thoughtfully manage its expense structure to offer a lower fee structure (Opex as a % of Assets) Senior personnel and corporate infrastructure already in place Historically, performing Internally Managed BDCs have traded at 0.5x price to book premiums versus Externally Managed peers Advantages of the Internally Managed BDC Structure
