**Enclosure:** 

AngloGold Ashanti - Report for the quarter ended 31 March 2015

## **Quarter 1 2015**

## Report

# for the quarter ended 31 March 2015

- Production of 969,000oz exceeded guidance of 900,000-940,000oz
- Total cash costs \$744/oz down 3% year-on-year, beat guidance of \$830-860/oz
- · All-in sustaining costs \$926/oz, 7% reduction year-on-year
- International all-in-sustaining costs fall by 13% year-on-year to \$849/oz
- · All-in costs of \$1,026/oz down 8% year-on-year
- · Costs reflect strong leverage to lower oil price and weaker currencies
- Adjusted EBITDA remains strong at \$409m, despite 14% reduction year-on-year due to lower gold price and fewer ounces sold
- · Capex at \$195m, a 29% decline from same period last year
- [Obuasi/CC&V Updates After Board/Disclosure MEETINGS]

Certain statements contained in this document, other than statements of historical fact, including, without limitation, those concerning the economic outlook for the gold mining industry, expectations regarding gold prices, production, cash costs, all-in sustaining costs, all-in costs, cost savings and other operating results, return on equity, productivity improvements, growth prospects and outlook of AngloGold Ashanti's operations, individually or in the aggregate, including the achievement of project milestones, commencement and completion of commercial operations of certain of AngloGold Ashanti's exploration and production projects and the completion of acquisitions, dispositions or joint venture transactions, AngloGold Ashanti's liquidity and capital resources and capital expenditures and the outcome and consequence of any potential or pending litigation or regulatory proceedings or environmental health and safety issues, are forward-looking statements regarding AngloGold Ashanti's operations, economic performance and financial condition. These forward-looking statements or forecasts involve known and unknown risks, uncertainties and other factors that may cause AngloGold Ashanti's actual results, performance or achievements to differ materially from the anticipated results, performance or achievements expressed or implied in these forward-looking statements. Although AngloGold Ashanti believes that the expectations reflected in such forward-looking statements and forecasts are reasonable, no assurance can be given that such expectations will prove to have been correct. Accordingly, results could differ materially from those set out in the forward-looking statements as a result of, among other factors, changes in economic, social and political and market conditions, the success of business and operating initiatives, changes in the regulatory environment and other government actions, including environmental approvals, fluctuations in gold prices and exchange rates, the outcome of pending or future litigation proceedings, and business and operational risk management. For a discussion of such risk factors, refer to AngloGold Ashanti's annual reports on Form 20-F filed with the United States

Securities and Exchange Commission. These factors are not necessarily all of the important factors that could cause AngloGold Ashanti's actual results to differ materially from those expressed in any forward-looking statements. Other unknown or unpredictable factors could also have material adverse effects on future results. Consequently, readers are cautioned not to place undue reliance on forward-looking statements. AngloGold Ashanti undertakes no obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events, except to the extent required by applicable law. All subsequent written or oral forward-looking statements attributable to AngloGold Ashanti or any person acting on its behalf are qualified by the cautionary statements herein. This communication may contain certain "Non-GAAP" financial measures. AngloGold Ashanti utilises certain Non-GAAP performance measures and ratios in managing its business. Non-GAAP financial measures should be viewed in addition to, and not as an alternative for, the reported operating results or cash flow from operations or any other measures of performance prepared in accordance with IFRS. In addition, the presentation of these measures may not be comparable to similarly titled measures other companies may use. AngloGold Ashanti posts information that is important to investors on the main page of its website at www.anglogoldashanti.com and under the "Investors" tab on the main page. This information is updated regularly. Investors should visit this website to obtain important information about AngloGold Ashanti.

Financial and Operating Report

#### FINANCIAL AND CORPORATE REVIEW

#### First quarter overview

AngloGold Ashanti delivered a strong financial and operating performance for the first quarter of 2015, with production and costs both

better than guidance. The operating results for the three months to 31 March showed a robust performance from the International

operations, which partly offset a slow start in South Africa due to the post-Christmas ramp-up and a number of safety stoppages. The

performance from the international operations was achieved despite the loss of ounces from Obuasi (limited operations) and Navachab

(sold). The Group's performance reflects the positive impact on costs of lower oil prices in Continental Africa and Australia in particular

and weaker currencies in South Africa, Brazil and Australia.

"This is an exceptionally strong performance from our International portfolio in particular, and one which shows the benefit of our

diversified portfolio," Chief Executive Officer Srinivasan Venkatakrishnan said. "We've continued to focus on delivering real operational

efficiencies and tight cost management, while ensuring we benefit from weaker producer currencies and lower oil prices. It shows in

these results."

First-quarter production for the group was 969,000oz at an average total cash cost of \$744/oz, compared to 1.055Moz at \$770/oz in the

first quarter of 2014 (which had the full benefit of Obuasi and Navachab's production), and 1,156,000oz at \$724/oz the previous quarter.

Production guidance for the quarter was 900,000oz to 940,000oz at a total cash cost of \$830-\$860/oz. Total cash costs benefited from

higher output in some operations, weaker currencies and continued benefit from cost saving initiatives.

The International operations delivered 730,000oz at a total cash cost of \$692/oz and All-in Sustaining Costs (AISC) of \$849/oz,

representing a year-on-year improvement of 9% and 13% in total cash costs and AISC respectively, despite a 5% reduction in output,

due mainly to Obuasi and Navachab. Geita delivered a strong performance, Kibali and Tropicana reflect full ramp-up in production, and

Cerro Vanguardia and AngloGold Ashanti Mineração delivered output improvements.

South Africa's production fell 18% to 239,000oz from the first quarter of 2014, due to safety stoppages at both the West Wits and Vaal

River regions, which contributed to the 12% rise in AISC to \$1,095/oz and a 14% increase in total cash costs to \$911/oz.

Cash inflow from operating activities was positive at \$190m, although lower than the same quarter a year earlier at \$350m, following the

lower production and gold price as well as working capital movements. Free cash flow for the quarter was negative \$40m (however,

positive \$20m before interest payments), from a positive \$22m a year earlier, partly due to a 6% (\$73/oz) drop in the gold price. Free

cash flow was negative \$198m in the previous quarter, when final redundancy payments were made at Obuasi and the shareholder loan

was extended to the Rand Refinery.

First quarter adjusted headline earnings (AHE) were \$35m, or 9 US cents per share in the three months to 31 March 2015, compared

with \$119m, or 29 US cents per share, in the first quarter of 2014, impacted by lower ounces sold from Ghana,

Namibia and South

Africa, the lower gold price and a higher tax charge. An adjusted headline loss of \$117m, or 29 US cents per share, was recorded the

previous quarter.

Adjusted earnings before interest, tax, depreciation and amortisation (Adjusted EBITDA) was \$409m, compared with \$476m in the first

quarter of 2014, with the reduction due mainly to the 6% reduction in the gold price received and a 9% reduction in ounces sold.

However, adjusted EBITDA was higher than the previous quarter's \$407m, despite the markedly lower output from the South Africa

region, given the lower costs quarter-on-quarter.

Total capital expenditure (including equity accounted joint ventures) during the first quarter of 2015 was \$195m, compared with \$274m

in the first quarter of 2014 and \$363m the previous quarter. This reflects seasonality in capital expenditure, the positive impact of

weaker currencies, and lower capital required at Kibali, Obuasi, and Cripple Creek & Victor where the mill has been commissioned and

ramp up is underway. Of the total capital spent, project capital expenditure during the quarter amounted to \$62m. Net Debt was \$3.150bn at the end of the first quarter of 2015 compared to \$3.095bn for the same quarter last year and \$3.133bn in the

previous quarter, resulting in a Net Debt to adjusted EBITDA ratio of 1.97 times. (This remains well within covenant levels of 3.5 times.)

2

#### **SAFETY**

AngloGold Ashanti's efforts continued to show strong commitment in safety performance, with the all injury frequency rate, the broadest

measure of safety performance, improving to 7.53 per million hours worked compared to 7.79 the same quarter last year. Regrettably,

there were three fatalities during the first quarter of 2015, two in South Africa and one in Brazil. Formal incident investigations to identify

factors which contributed to the incidents were initiated immediately and have been completed. Corrective and preventative actions

have been identified and are being implemented to prevent recurrence. Safety is our highest priority, a critical focus area in our

strategic objectives and we remain committed to a zero harm work environment which we aim to achieve through the fatalities

prevention initiatives by management and control of major hazards.

#### **OPERATING HIGHLIGHTS**

The **South African** operations produced 239,000oz at a total cash cost of \$911/oz for the first quarter of 2015 compared to

290,000oz at a total cash cost of \$797/oz in the same quarter last year. As flagged during our fourth quarter 2014 results presentation,

safety-related interruptions during the fourth quarter 2014 and the first quarter 2015 had a significant impact on production given the

tragic fatalities at Mponeng mine, as well as various other safety-related interruptions at the Vaal River region, which exacerbated the

slower start-up after the Christmas break. In addition the South African Operations lost about 33,000oz due to safety stoppages,

increased seismicity at West Wits (particularly at Mponeng) and some 3,000oz mainly due to electricity supply issues, including

equipment theft and failure. Total cash costs were adversely impacted by lower production despite currency weakness and efforts to

contain inflationary pressures.

At **West Wits**, production was 93,000oz at a total cash cost of \$977/oz for the quarter ended March 2015 compared to 128,000oz at a

total cash cost of \$735/oz in the same quarter last year. The first quarter's performance was negatively impacted by interruptions

from safety-related stoppages subsequent to two fatalities at Mponeng. This was exacer bated by the grades at TauTona which

were 7% lower when compared to the same period last year, as a result of lower on-reef, in-situ values planned as mining progresses

towards the boundary. TauTona ore previously treated at Savuka gold plant is now being processed at the Mponeng gold plant in an

attempt to derive benefit of higher recovery factor and cost efficiencies.

Production from the **Vaal River** operations for the first quarter of 2015 was 94,000oz at a total cash cost of \$868/oz, compared to

102,000oz at a total cash cost of \$851/oz in the same quarter last year. Kopanang's performance was negatively impacted by an ore-

pass blockage, whilst Moab Khotsong faced challenges from safety-related stoppages. Yield at Moab Khotsong was 10% lower when

compared to the same quarter last year due to an increase in dilution. Moab Khotsong, however, remained the lowest cost producer for

the South African region during the quarter at a total cash cost of \$782/oz. The establishment of a Vaal River district model is

progressing well and the new model is expected to be fully functional by the second half of 2015. Effective 1 January 2015, Great

Noligwa's operations have been incorporated as a segment under Moab Khotsong which will be reported as a single entity.

Surface Operations' production for the first quarter of 2015 was 50,000oz at a total cash cost of \$868/oz, compared to 60,000oz at a

total cash cost of \$836/oz in the same quarter last year. The most significant challenge has been a reduction in grade. To alleviate the

grade constraints, the mining mix was altered in order to prioritise higher grade Marginal Ore Dumps. Going forward, this is expected to

be supplemented by the intake of external Marginal Ore Dumps and the processing of clean-up material at Savuka gold plant.

3

The **Continental Africa region** production for the first quarter of 2015 was 351,000oz at a total cash cost of \$714/oz compared to

374,000oz at a total cash cost of \$808/oz in the same quarter last year. The region's performance is attributable mainly to the strong

production from Geita and continuing ramp-up in Kibali, despite the limited operations at Obuasi and the absence of Navachab

production, the limited operational flexibility in oxide operations at Sadiola, as well as plant maintenance shutdowns at Iduapriem and

Siguiri.

In the **DRC**, Kibali production for the quarter was 73,000oz at a total cash cost of \$630/oz compared to 51,000oz at a total cash cost of

\$538/oz in the same quarter last year. Production was 43% higher due to operation of both the oxide and sulphide circuits compared to

the same quarter last year when only the oxide circuit was operational. Quarter-on-quarter, production was impacted by decrease in

tonnage throughput due to fewer operating shifts together with a planned 5% decrease in recovered grade.

Consequently, total cash

costs increased as a result of the lower production together with higher mining rates.

In **Ghana**, Iduapriem produced 40,000oz at a total cash cost of \$1,046/oz compared to 45,000oz at a total cash cost of \$716/oz in the

same quarter last year. Production declined year-on-year due to a 2% decrease in recovered grade together with a 9% decrease in

tonnage throughput. Tonnage throughput in the current quarter was impacted by a planned major plant shutdown to replace

components of the mill circuit. Total cash costs increased as production decreased and mainly because full-scale mining operations

only resumed during the quarter after executing a stockpile treatment plan last year. The impact of the mine plant shutdown that took

place during the quarter was compensated by higher grade ore tonnes processed.

As the Obuasi mine continued in limited operations state, with the feasibility study well advanced, production for the first quarter of 2015

was significantly down at 17,000oz at a total cash cost of \$628/oz, compared to 53,000oz at a total cash cost of \$1,234/oz in the same

quarter last year. Current production was from scaled down surface operations and tailings maintenance activities. In the **Republic of Guinea**, Siguiri's production was 64,000oz at a total cash costs of \$887/oz, compared to 70,000oz at a total cash

cost of \$800/oz in the same quarter last year. Production declined as expected, due to depletion of higher grade ore sources. Total cash

costs were higher than the same period last year as a result of inflationary increases together with the impact of the lower recovered

grade. Tonnage throughput was impacted by a four-day minor plant shutdown, together with fewer operating shifts during the quarter.

In **Mali**, Morila's production for the first quarter of 2015 was 20,000oz at a total cash cost of \$535/oz. Production increased as a result of

the higher grade tonnes sourced from the satellite pit 7s commissioned in the latter part of last year.

Sadiola's production for the first quarter of 2015 was maintained at 19,000oz at a total cash cost of \$876/oz. The current quarter's

production compared to the previous quarter was impacted by a 16% decrease in tonnage throughput partly offset by a 7% increase in

recovered grade from tonnes mined in the satellite oxide pits. Total cash costs, however, decreased from \$1,262/oz compared to the

same quarter last year due to a 25% decrease in volumes mined as a result of limited operational flexibility in the oxide operations,

together with the cumulative benefit of the cost management initiatives.

The Yatela mine accelerated the transition to full closure. The current quarter's operational performance is therefore not comparable to

previous periods.

In **Tanzania**, Geita's production was 118,000oz at a total cash cost of \$579/oz compared to 106,000oz at a total cash cost of \$631/oz in

the same quarter last year. Production increased 11% as a result of accessing higher grade ore sources stripped in the Nyankanga pit.

Total cash costs decreased by 8%, primarily as a result of the efficiency of lower mining unit costs together with the benefits of lower

fuel prices. Current quarter production was somewhat impacted by a decrease in tonnage throughput, due to scheduled down time for

maintenance, together with fewer operating shifts in the quarter.

In the **Americas region,** production for the first quarter of 2015 was 236,000oz at a total cash cost of \$665/oz compared to 236,000oz

at a total cash cost of \$668/oz in the same quarter last year. Production remained stable, supported by strong performances from Cerro

Vanguardia and Mineração, where production was up 12% and 5% respectively, year-on-year. However, the region was negatively

impacted by lower placed grade, leach pad sequence timing and a mill start-up delay at the Cripple Creek & Victor mine, in addition to

lower feed grades and equipment challenges at Serra Grande. Total cash costs for the region declined marginally due to efficiencies

derived from the continued costs savings initiatives and benefiting from weaker currencies, and despite subdued production in some

parts of the region and high inflation in Argentina.

At Cripple Creek & Victor, production was 41,000oz at a total cash cost of \$957/oz compared to 52,000oz at a total cash cost of \$699/oz

in the same quarter last year. Production decreased year-on-year due to lower placed grade, leach pad sequence timing and increasing

pad height, causing longer leach solution transport time. Total cash costs increased due to lower recoverable grade, fewer tons mined

and below-plan ounce production due to the mill start-up delay, partially assisted by lower fuel prices.

In **Argentina**, Cerro Vanguardia's production for the quarter was 12% higher at 65,000oz at a total cash cost of \$651/oz, compared to

58,000oz at a total cash cost of \$644/oz in the same quarter of last year, mainly due to the effect of higher heap leach production. Total

cash costs were negatively impacted by persistently high inflation in Argentina, with salary increases effective from February. Currency

weakness, however, had a positive effect on costs in addition to favourable stockpile movements, mainly as a result of lower tonnes

treated, and higher grades. These favourable effects were partially offset by higher heap-leach costs as high volume of material was

processed. Plans are being evaluated to further increase production in coming quarters.

In **Brazil**, operations produced 130,000oz at a total cash cost of \$580/oz compared to 126,000oz at a total cash cost of \$664/oz in the

same quarter of last year. Production increased year-on-year due to higher tonnages treated. Improved costs reflect production

increase and the benefits of the local currency depreciation. In addition, initiatives implemented to reduce power and water

consumption, through ventilation management and other activities, all helped in managing costs.

AngloGold Ashanti Córrego do Sítio Mineração's production was 5% higher at 99,000oz at a total cash cost of \$548/oz compared to

94,000oz at total cash costs of \$619/oz in the same quarter of last year. Production increased year-on-year due to improved

performance of Córrego do Sítio operations, stabilization of Lamego at a higher mining rate, as a consequence of changing the mining

method from cut-and-fill to open stope, and also improved productivity at Cuiabá. Total cash costs improved due to higher gold

production, higher by-product sales and price received whilst also benefiting from the weakness in the Brazilian Real. Notwithstanding the improved performance, the Cuiabá complex encountered delays in the initial plan for shaft maintenance, which will

impact second-quarter production. Similarly, at Córrego do Sítio, geological modelling changes at both Oxide and Sulphide (Mina II)

mines will impact second-quarter production. However, in both cases the output is expected to be recovered in latter half of the year.

Production at Serra Grande was 31,000oz at a total cash cost of \$680/oz compared to 32,000oz at a total cash cost of \$799/oz in the

same quarter of last year. Production was lower than the previous quarter as a result of lower feed grade, in line with plan. Total cash

costs were consequently impacted by lower gold produced but offset by the weakness of the Brazilian Real.

Production is expected to

recover in the second quarter by mining higher grades at Mina III. High inflation and threats of power rationing, due to a poor rainy

season, are risks to both costs and production, and mitigation plans are being developed.

**Australia** produced 143,000oz at a total cash cost of \$679/oz compared to 155,000oz at a total cash cost of \$779/oz in the same

quarter of last year, when the final high grade crown pillar ore from the base of the open pit at Sunrise Dam was mined. Costs were

favourably impacted by a weaker Australian dollar.

At Sunrise Dam gold production in the March quarter decreased by 7% to 57,000oz compared to 61,000oz in the previous quarter, due

to a number of factors which reduced the volume of underground ore mined in January and February by approximately 100,000t. A

primary ventilation fan failure in the Cosmo section of the mine late in 2014, exacerbated by poor loader availability, required a change

to the mining and development schedule. As a result a higher proportion of intermediate grade stockpiled ore was fed to the mill to

make up the shortfall in mined tonnes. These issues have been corrected. Production in the March quarter was 20% lower than the

previous corresponding period when the last parcel of high grade ore from the open pit was mined. Mill throughput of 963,000t was 4%

lower than the previous quarter, but still above budget. Despite the fall in mined tonnes and head grade in the March quarter, total cash

costs dropped by 10% to \$970/oz from \$1,083/oz in the previous quarter, largely due to reduced processing costs and a lower

exchange rate. A total of 99m of underground capital development and 2,200m of operational development were completed during the quarter.

Tropicana had a steady quarter with gold production of 86,000oz at a total cash cost of \$422/oz compared to 84,000oz at a total cash

cost of \$495/oz in the same quarter of last year. Production was down 11% compared to the previous quarter, but 2% higher than the

March quarter of 2014. Mill throughput and recoveries remained constant, while mining rates and mining productivity both improved

during the quarter. Lower processing and maintenance costs contributed to a 12% decrease in total cash costs to \$422/oz from \$482/oz

in the previous quarter.

The borefield expansion was almost complete at quarter end and process water supply constraints have been alleviated. Construction

of the 292 km long Eastern Goldfields Pipeline that will deliver natural gas to the Sunrise Dam and Tropicana operations began on

schedule in March. Construction is anticipated to be completed by year end with first delivery of gas to Tropicana scheduled for January

2016.

## **UPDATE ON CAPITAL PROJECTS**

In the Americas, the Mine Life Extension project at Cripple Creek & Victor is on schedule. Mill commissioning progressed well during the

quarter, having started with first gold production. Mill production ramp up is planned for the second quarter. Capital spend in 2015 is

expected to be primarily related to the Mine Life Extension 2 (MLE2) project, which includes a new mill and a new Valley Leach Facility

with associated gold recovery plant. The new Valley Leach facility and associated gold recovery plant are on schedule with expected

production to start in 2016.

At Kibali, in the DRC, the capital spend reduced significantly following completion of the process plant and related infrastructure. The

shaft development and the underground decline development progressed according to plan. The paste fill plant was pre-commissioned,

and is scheduled to be commissioned in the second quarter when the underground distribution system has been completed. The

Ambarau hydro power station dam design and the construction method changed due to the foundation requirements. Both open pit and

underground production performed well during the quarter. Open pit resource reconciliations were slightly better than the resource

models.

In South Africa, the Mponeng Phase I project commissioned the chairlifts and electrical monorail between 120L and 123L. During

March, the mining milestone of exceeding 300m of development on 123L was achieved. The remaining infrastructures to be completed

for this project are the rock silos, de-gritting dam and mono rail between 123L and 126L. Mine stoppages due to fatalities in the

previous two quarters have caused schedule delays in both Phase 1 and 2 projects.

5

#### TECHNOLOGY AND INNOVATION UPDATE

The three prototype production machines at TauTona continue to make progress towards the desired drilling efficiencies, while the test

site machine has been refurbished and fully serviced to MKIII specifications and was returned to the mine in April. The newest

generation (MKIV) machine manufacture is nearing completion with delivery anticipated by mid-year. Narrow-reef drilling at Kopanang is

progressing well with less cutter-head deflection than experienced when drilling the C-reef at Great Noligwa. RC drilling depth and

penetration rates have met original specifications and work will now commence to refine drilling accuracy. Ultra-high strength backfill

test work continues to yield improved design capabilities with greater pumping distances and increased mixing volumes being proven possible.

#### **EXPLORATION UPDATE**

Total expensed exploration and evaluation costs (including technology) during the first quarter, inclusive of expenditure at equity accounted

joint ventures, were \$31m (\$13m on Brownfield, \$5m on Greenfield and \$13m on pre-feasibility studies), compared to \$34m for the same

quarter last year.

#### **GREENFIELDS EXPLORATION**

During the first quarter of 2015, Greenfields exploration activities were undertaken in Australia, Colombia and Brazil. Greenfields Exploration

completed 2,865m of diamond and RC drilling. Total expenditure for the quarter was \$5m.

In **Colombia**, a handover from the Greenfields exploration team to the Colombia project's team was completed at Quebradona. This

work for the quarter focused on the Guintar project (100% AGA) in Colombia which is situated 40km west of Medellin. Mapping and

target generation activities were undertaken. These activities have outlined an extensive alteration system in sediments overlaying a

dioritic porphyry intrusion. The intrusion is associated with both porphyry Cu/Au and epithermal gold occurrences which are being

mapped and evaluated.

In **Australia**, at the Tropicana JV (AngloGold Ashanti 70%) a total of 4,661m of aircore (AC), 2,317m of reverse circulation (RC) and

108.5 m of diamond drilling was completed at the Madras and Sanpan prospects located 25 km south and 50 km southeast of the

Tropicana Gold Mine, respectively. Drilling at Madras aimed to follow up encouraging results initially received in the second half of 2014

within a zone of supergene mineralisation spatially associated with a broad shear zone. RC drilling returned significant results including,

but not limited to 15.0m @ 5.08 g/t Au in MARC039, 25.0m @ 2.47 g/t Au in MARC040 and 17.0m @ 4.22 g/t Au in MARC044.

Further RC and diamond drilling is scheduled at Madras to define the dimensions and tenor of mineralisation intersected to date.

#### **BROWNFIELDS EXPLORATION**

This section contains only selected highlights from the exploration programme during the quarter. More detail is available on the

#### Web site, in the quarterly reports section.

A total of 87,946m of diamond and RC drilling was completed during the first quarter of 2015. Exploration on brownfields was carried out

in ten countries.

In **Tanzania**, at Geita Gold Mine, a total of 3,083m were drilled. Infill drilling programmes were conducted at Star & Comet South East

Extension, Star & Comet Cut3, Geita Hill East Cut 1 and Nyankanga Cut 8.

One DD hole was completed at Star & Comet South East (141m), testing the priority, near-surface mineralisation and down-dip

extension of the southern limb of the ore body. A number of significant intercepts were returned. Mineral Resource amelioration drilling

was completed at Nyankanga Cut 8 and Geita Hill East when permitted by pit access restrictions. 2 RC holes (257m) and 3 DD holes

(480m) were completed in Nyankanga and 1 RC hole (50m) at Geita Hill East.

A hydrogeological drill hole at Nyamonge, 300m NW of Waste Dump 14, returned a significant gold value. Initial indications are that the

mineralisation is associated with a palaeochannel, however analysis of the results is ongoing to assess follow up work required.

In **Ghana** at Iduapriem, auger drilling (951m) was undertaken at the North heap leach pad. Samples have been submitted for fire assay,

Particle Size Distribution (PSD), Gravity Recoverable Gold, and Bottle Roll analyses. About a third of the results for Au and PSD have

been received to date. Reconnaissance work was initiated at the Bankyem (Block 1 Extension), with mapping initially focused in the

vicinity of known near-surface drill hole intersections. The Mile 5 quartz vein target was also revisited with detailed mapping and

sampling of veins exposed by the extensive artisanal workings at the site. The mapping confirmed two distinct NE and E trending vein

sets, both associated with auriferous quartz-tourmaline-sericite veins.

In the **Democratic Republic of the Congo** at Kibali, the Phase 4 (21 hole) drilling programme was completed at Gorumbwa. In the

southwest area, most mineralised zones were intersected outside of previously predicted positions, but still within the \$1000 Reserve

pit, indicating upside potential (more detail contained in online report).

In **Brazil**, exploration continued at the Cuiabá, Lamego and CdS production centres for AGABM with 17,300m drilled collectively in the

surface and underground drilling programmes during the quarter with a focus on Mineral Resource conversion. At Serra Grande,

13,255m of drilling were completed as infill drilling programmes continued in the Mineral Resource conversion programmes.

In the **United States**, 17,990m were drilled as part of the ongoing programmes to add new heap leach tonnage for the VLF facilities and

confirm high grade targets outside of current open pit designs.

6

At Sunrise Dam in **Australia**, exploration was focussed on underground Mineral Resource extension and infill. Drilling (7,859m)

targeted Vogue, GQ South, Carey Shear Zone and Astro South and East. Delays were caused to the drilling programme due to a fall of

ground which blocked off one of the rigs. A total of 18 significant assay results were received of which all but one were from infill and

extensional drilling at Vogue.

At Tropicana, drilling commenced at Havana North with a total of 1,194m of RC and 2,238m of DD drilling completed. The Havana

North drill programme is anticipated to be completed by July and RC/DD drilling will then advance to the Tropicana Extension targets.

Both of these programmes are designed to test potential down-plunge extensions of known mineralisation.

Detailed information on the exploration activities and studies both for brownfields and greenfields is available on the AngloGold Ashanti

website (

www.anglogoldashanti.com

)

#### **UPDATE ON CRIPPLE CREEK & VICTOR**

As advised earlier, the Company has initiated a plan to identify a joint arrangement partner or a purchaser in respect of its interest in the

Cripple Creek & Victor mine ("the mine") in Colorado in the United States. The Company has received binding offers from counterparties

for a 50% interest in the mine structured as a joint operation as well as binding offers for the purchase of 100% of the mine. These

binding offers are currently being considered as to the value and the conditions.

The Company has assumed at this stage in the process that it is reasonable that a transaction resulting in a sale of 50% of the mine,

structured as a joint operation is possible, provided that the company's value criteria are met. It has thus accounted for 50% of the

assets and liabilities of the mine as "held for sale". Currently there is no assurance that any binding offer will be accepted or any sales

transaction may occur (Refer note 14).

#### SOUTH AFRICA WAGE TALKS

In the coming months AngloGold Ashanti will join the largest employers and producers in South Africa's gold sector in negotiating a new

wage agreement with labour unions representing most of the industry's collective workforce. This year's negotiations come at a delicate

time for South Africa's gold industry - gold prices remain almost 40% below their peak reached in 2011, tariff increases for water and

electricity have risen by multiples of the inflation rate while wage increases have also continued to outpace increases in inflation.

The industry has looked for ways to absorb these cost increases amid declining grades and diminishing productivity levels, with lower

overall employment levels an unfortunate but inevitable consequence. At current gold prices, much of the sector is close to, or below

break-even levels, placing still more jobs at risk. Over the past decade, according to the Chamber of Mines, the average annual wage

for an employee in the sector has risen by 180% to around R196,298 per year, while the total number of employees in the sector fell by

a third to about 119,000 people. Over that same period, South Africa's gold production fell by an average annual decline of 8.2%.

Leadership of these gold companies are now looking to reach a new accord with employees and their labour unions to arrest this

downward spiral and restore the industry to a more sustainable long-term footing. It is crucial for the future of one of South Africa's key

economic contributors, and indeed for individual mines and their employees, given that companies cannot be expected to persist with

unprofitable operations.

The companies will this year propose an 'Economic and Social Sustainability Compact'. Such a compact would comprise a mutually

agreed set of binding principles that will determine the rights and responsibilities of companies and organised labour in respect of

workplace activities and consequences, including wages and conditions of service. The fundamental principles of the proposed compact

will be sustainability through a partnership approach by the companies, the unions and employees. Proposed wage increases and other

terms and conditions of employment will be considered with due regard to their impact on the sustainability of the industry and of course

on employment security. More detail will be provided on the content of the proposed Compact in due course, once the key features of

the employers' proposal have been fully covered with the unions.

#### **OUTLOOK**

Gold production for the second quarter of 2015 is estimated to be between 960,000oz to 1,000,000oz and total cash costs of \$770/oz to

\$820/oz, assuming average exchange rates of R11.92/\$, BRL2.95/\$, \$0.79/A\$ and AP9.00/\$. Oil at \$70/bl average for the quarter.

The annual guidance remains unchanged for production at 4.0moz to 4.3moz, total cash costs at \$770/oz to \$820/oz and All-in

sustaining costs of \$1,000/oz-\$1,050/oz, assuming average exchange rates of R11.60/\$, BRL 2.60/\$, \$0.85/A\$ and AP9.50/\$. Oil at

\$70/bl average for the year.

Capital expenditure guidance for the year remains unchanged at \$1.0 to 1.1bn.

Both production and cost estimates assume neither labour interruptions, power disruptions or changes to asset portfolio and/or

operating mines. Other unknown or unpredictable factors could also have material adverse effects on our future results.

# Independent auditor's review report on the Condensed Consolidated Financial Information for the quarter ended

#### 31 March 2015 to the Shareholders of AngloGold Ashanti Limited

We have reviewed the condensed consolidated financial statements of AngloGold Ashanti Limited (the company) contained in

the accompanying quarterly report on pages 10 to 24, which comprise the accompanying condensed consolidated statement of

financial position as at 31 March 2015, the condensed consolidated income statement, statement of comprehensive income,

statement of changes in equity and statement of cash flows for the quarter then ended, and selected explanatory notes. *Directors' Responsibility for the Condensed Consolidated Financial Statements* 

The directors are responsible for the preparation and presentation of these condensed consolidated financial statements in

accordance with the International Financial Reporting Standard, IAS 34 Interim Financial Reporting as issued by the International Accounting Standards Board (IASB), the SAICA Financial Reporting Guides, as issued by the Accounting

Practices Committee and Financial Reporting Pronouncements as issued by the Financial Reporting Standards Council and

the requirements of the Companies Act of South Africa, and for such internal control as the directors determine is necessary to

enable the preparation of condensed consolidated financial statements that are free from material misstatement, whether due

to fraud or error.

Auditor's Responsibility

Our responsibility is to express a conclusion on these interim financial statements based on our review. We conducted our

review in accordance with International Standard on Review Engagements (ISRE) 2410, Review of Interim Financial Information Performed by the Independent Auditor of the Entity. This standard requires us to conclude whether anything has

come to our attention that causes us to believe that the interim financial statements are not prepared in all material respects in

accordance with the applicable financial reporting framework. This standard also requires us to comply with relevant ethical

requirements.

A review of interim financial statements in accordance with ISRE 2410 is a limited assurance engagement. We perform

procedures, primarily consisting of making enquiries of management and others within the entity, as appropriate, and applying

analytical procedures and evaluating the evidence obtained.

The procedures performed in a review are substantially less than and differ in nature from those performed in an audit conducted in accordance with International Standards on Auditing. Accordingly, we do not express an audit opinion on these

financial statements.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying condensed consolidated financial statements of the company for the quarter ended 31 March 2015 are not prepared, in all material respects, in accordance with International Financial Reporting Standard, IAS 34 Interim Financial Reporting as issued by the

IASB, the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and Financial Reporting

Pronouncements as issued by the Financial Reporting Standards Council and the requirements of the Companies Act of South

Africa.

The reviewed financial statements for the three months ended 31 March 2015 have been prepared by the corporate accounting staff of

AngloGold Ashanti Limited headed by Mr John Edwin Staples (BCompt (Hons); CGMA), the Group's Chief Accounting Officer. This

process was supervised by Ms Kandimathie Christine Ramon (CA (SA)), the Group's Chief Financial Officer and Mr Srinivasan

Venkatakrishnan (BCom; ACA (ICAI)), the Group's Chief Executive Officer. The financial statements for the quarter ended 31 March 2015

were reviewed, but not audited, by the Group's statutory auditors, Ernst & Young Inc. A copy of their unmodified review report is available

for inspection at the company's head office.

Quarterly report March 2015 - www.AnglogoldAshanti.com

#### **Notes**

#### for the quarter ended 31 March 2015

1.

#### **Basis of preparation**

The financial statements in this quarterly report have been prepared in accordance with the historic cost convention except for

certain financial instruments which are stated at fair value. The group's accounting policies used in the preparation of these

financial statements are consistent with those used in the annual financial statements for the year ended 31 December 2014

except for the adoption of new standards and interpretations effective 1 January 2015.

The financial statements of AngloGold Ashanti Limited have been prepared in compliance with IAS 34, IFRS as issued by the

International Accounting Standards Board, the South African Institute of Chartered Accountants Financial Reporting Guides as

issued by the Accounting Practices Committee, Financial Reporting Pronouncements as issued by Financial Reporting Standards

Council, JSE Listings Requirements and in the manner required by the South African Companies Act, 2008 (as amended) for the

preparation of financial information of the group for the quarter ended 31 March 2015. These interim financial statements should

be read in conjunction with the Company's audited consolidated financial statements and the notes thereto as at and for the years

ended 31 December 2014 and 2013.

379

(1)

Includes capital commitments relating to associates and joint ventures.

## Liquidity and capital resources

To service the above capital commitments and other operational requirements, the group is dependent on existing cash resources, cash generated from operations and borrowing facilities.

Cash generated from operations is subject to operational, market and other risks. Distributions from operations may be subject to

foreign investment, exchange control laws and regulations and the quantity of foreign exchange available in offshore countries. In

addition, distributions from joint ventures are subject to the relevant board approval.

The credit facilities and other finance arrangements contain financial covenants and other similar undertakings. To the extent that

external borrowings are required, the group's covenant performance indicates that existing financing facilities will be available to

meet the above commitments. To the extent that any of the financing facilities mature in the near future, the group believes that

sufficient measures are in place to ensure that these facilities can be refinanced.

#### 14. Non-current assets and liabilities held for sale

#### **Cripple Creek and Victor mine (CC&V)**

Effective 31 March 2015, the company announced its plan to identify a joint arrangement partner or a purchaser in respect of its

interest in CC&V mine in Colorado in the United States for full value. The CC&V gold mine is a surface mining operation which

provides oxidised ore to a crusher and valley leach facility, one of the largest in the world. It is included in the Americas reporting

segment and was acquired by AngloGold Ashanti in 1999. The mine produced 211,000 ounces of gold in 2014. There can be no

assurance, however, that a sale and purchase agreement for this transaction will be entered into or that any sales transaction will

be completed.

# Société d'Exploitation des Mines d'Or de Sadiola S.A. (Sadiola) and Société d'Exploitation des Mines d'Or de Yatela S.A.

(Yatela)

Effective 31 March 2015, the company announced its plan to dispose of its 41% stake in Sadiola and its 40% stake in Yatela.

The mines are both situated in western Mali and are included in the Continental Africa reporting segment. The Sadiola and

Yatela mines produced 85,000 and 11,000 attributable ounces of gold, respectively, in 2014.

Management was approached by a potential buyer for both mines who meets management's qualifying criteria and has asked for

a binding bid. There can be no assurance, however, that a sale and purchase agreement for these transactions will be entered

into or that any sales transactions will be completed.

Net non-current assets held for sale

386

#### Navachab mine

Effective 30 April 2013, Navachab mine located in Namibia was classified as held for sale. Navachab gold mine was previously

recognised as a combination of tangible assets, goodwill, current assets, current and long-term liabilities. On 10 February 2014,

AngloGold Ashanti announced that it signed a binding agreement to sell Navachab to a wholly-owned subsidiary of QKR Corporation

Ltd (QKR). The purchase consideration consists of two components: an initial cash payment and a deferred consideration in the form

of a net smelter return (NSR).

On 30 June 2014, AngloGold Ashanti Limited announced that the sale had been completed in accordance with the sales agreement

with all conditions precedent being met. A loss on disposal of \$2m (note 5) was realised on the sale on Navachab.

15.

#### Financial risk management activities

#### **Borrowings**

The \$1.25bn bonds are carried at fair value. The rated bonds are carried at amortised cost and their fair values are their closing

market values at the reporting date. The interest rate on the remaining borrowings is reset on a short-term floating rate basis, and

accordingly the carrying amount is considered to approximate fair value.

Derivatives
The fair value of derivatives is estimated based on ruling market prices, volatilities, interest rates and credit risk and
includes all
derivatives carried in the statement of financial position.
Embedded derivatives are included as derivatives on the statement of financial position.
The group uses the following hierarchy for determining and disclosing the fair value of financial instruments:
Level 1:
quote prices (unadjusted) in active markets for identical assets or liabilities;
Level 2:
inputs other than quoted prices included in level 1 that are observable for the asset or liability, either directly
(as prices) or indirectly (derived from prices); and
Level 3:
inputs for the asset or liability that are not based on observable market data (unobservable inputs).
The following tables set out the group's financial assets and liabilities measured at fair value by level within the fair
value
hierarchy:

551
Groundwater pollution - AngloGold Ashanti Limited has identified groundwater contamination plumes at certain of
```

operations, which have occurred primarily as a result of seepage from mine residue stockpiles. Numerous scientific, technical

and legal studies have been undertaken to assist in determining the magnitude of the contamination and to find sustainable

remediation solutions. The group has instituted processes to reduce future potential seepage and it has been demonstrated

that Monitored Natural Attenuation (MNA) by the existing environment will contribute to improvements in some instances.

Furthermore, literature reviews, field trials and base line modelling techniques suggest, but have not yet proven, that the use

of phyto-technologies can address the soil and groundwater contamination. Subject to the completion of trials and the technology being a proven remediation technique, no reliable estimate can be made for the obligation.

Deep groundwater pollution - The group has identified a flooding and future pollution risk posed by deep groundwater in

certain underground mines in Africa. Various studies have been undertaken by AngloGold Ashanti Limited since 1999. Due

to the interconnected nature of mining operations, any proposed solution needs to be a combined one supported by all

mines located in these gold fields. As a result, in South Africa, the Mineral and Petroleum Resources Development Act

21

(MPRDA) requires that the affected mining companies develop a Regional Mine Closure Strategy to be approved by the

Department of Mineral Resources. In view of the limitation of current information for the accurate estimation of a liability, no

reliable estimate can be made for the obligation.

(3)

Litigation -

On 11 October 2011, AngloGold Ashanti (Ghana) Limited (AGAG) terminated Mining and Building Contractors Limited's (MBC) underground development agreement, construction on bulkheads agreement and diamond drilling agreement at Obuasi mine. The parties reached agreement on the terms of the separation and concluded a separation agreement on 8 November 2012. On 20 February 2014, AGAG was served with a writ issued by MBC claiming a total of

\$97m. AGAG filed a motion with the trial court requesting a stay of proceedings pending arbitration. On 5 May 2014, the

court denied AGAG's application to submit the matter to arbitration. AGAG subsequently appealed this decision to the

of Appeal and filed a Stay of Proceedings at the lower court, which was granted on 11 June 2014. On 2 October 2014, AGAG

was notified that the records had been transmitted to the Court of Appeal. However, as the transmitted records were incomplete, AGAG timely filed an application for the record to be amended prior to filing its statement of case. The matter

remains pending as the transmitted records are still being amended.

(4)

Litigation - AGAG received a summons on 2 April 2013 from Abdul Waliyu and 152 others in which the plaintiffs allege that

they were or are residents of the Obuasi municipality or its suburbs and that their health has been adversely affected by

emissions and/or other environmental impacts arising in connection with the current and/or historical operations of the Pompora Treatment Plant (PTP) which was decommissioned in 2000. The plaintiffs' alleged injuries include respiratory

infections, skin diseases and certain cancers. The plaintiffs have not filed their application for directions which was due by

31 October 2013. AGAG is allowing some time to pass prior to applying to have the matter struck out for want of prosecution. On 24 February 2014, executive members of the PTP (AGAG) Smoke Effect Association (PASEA), sued AGAG

by themselves and on behalf of their members (undisclosed number) on grounds similar to those discussed above, as well as

economic hardships as a result of constant failure of their crops. On 26 January 2015, the Court issued an order allowing the

plaintiffs to procure an expert from the Environmental Protection Agency to undertake environmental and chemical assessments in the areas around the PTP. The matter was adjourned to 22 June 2015. In view of the limitation of current

information for the accurate estimation of a liability, no reliable estimate can be made for AGAG's obligation in either matter.

(5)

Occupational Diseases in Mines and Works Act (ODMWA) litigation - On 3 March 2011, in Mankayi vs. AngloGold Ashanti,

the Constitutional Court of South Africa held that section 35(1) of the Compensation for Occupational Injuries and Diseases

Act, 1993 does not cover an "employee" who qualifies for compensation in respect of "compensable diseases" under the Occupational Diseases in Mines and Works Act, 1973 (ODMWA). This judgement allows such qualifying employee

to pursue

a civil claim for damages against the employer. Following the Constitutional Court decision, AngloGold Ashanti has become

subject to numerous claims relating to silicosis and other Occupational Lung Diseases (OLD), including several potential

class actions and individual claims.

AngloGold Ashanti, Anglo American South Africa, Gold Fields, Harmony Gold and Sibanye Gold announced in November

2014 that they have formed an industry working group to address issues relating to compensation and medical care for OLD

in the gold mining industry in South Africa. The companies have begun to engage all stakeholders on these matters, including government, organised labour, other mining companies and legal representatives of claimants who have filed legal

suits against the companies. These legal proceedings are being defended, and the status of the proceedings are set forth below. Essentially, the companies are seeking a comprehensive solution which deals both with the legacy compensation

issues and future legal frameworks, and which, whilst being fair to employees, also ensures the future sustainability of companies in the industry.

On or about 21 August 2012, AngloGold Ashanti was served with an application instituted by Bangumzi Bennet Balakazi

("the Balakazi Action") and others in which the applicants seek an order declaring that all mine workers (former or current)

who previously worked or continue to work in specified South African gold mines for the period owned by AngloGold Ashanti

and who have silicosis or other OLD constitute members of a class for the purpose of proceedings for declaratory relief and

claims for damages. On 4 September 2012, AngloGold Ashanti delivered its notice of intention to defend this application.

In addition, on or about 8 January 2013, AngloGold Ashanti and its subsidiary Free State Consolidated Gold Mines (Operations) Limited, alongside other mining companies operating in South Africa, were served with another application to

certify a class ("the Nkala Action"). The applicants in the case seek to have the court certify two classes, namely: (i) current

and former mineworkers who have silicosis (whether or not accompanied by any other disease) and who work or have worked on certain specified gold mines at any time from 1 January 1965 to date; and (ii) the dependents of mineworkers who

died as a result of silicosis (whether or not accompanied by any other disease) and who worked on these gold mines at any

time after 1 January 1965. AngloGold Ashanti filed a notice of intention to oppose the application.

On 21 August 2013, an application was served on AngloGold Ashanti for the consolidation of the Balakazi Action and the

Nkala Action, as well as a request for an amendment to change the scope of the classes the court was requested to certify in

the previous applications that were initiated. The applicants now request certification of two classes (the "silicosis class" and

the "tuberculosis class"). The silicosis class would consist of certain current and former underground mineworkers who have

contracted silicosis, and the dependents of certain deceased mineworkers who have died of silicosis (whether or not accompanied by any other disease). The tuberculosis class would consist of certain current and former mineworkers who

have or had contracted pulmonary tuberculosis and the dependents of certain deceased mineworkers who died of

pulmonary

tuberculosis (but excluding silico-tuberculosis).

In the event the class is certified, such class of workers would be permitted to institute actions by way of a summons against

AngloGold Ashanti for amounts as yet unspecified. The parties in the class action met with the court and have tentatively

agreed on a timetable for the court process wherein the application to certify the class action will be heard in October 2015.

22

In October 2012, AngloGold Ashanti received a further 31 individual summonses and particulars of claim relating to silicosis

and/or other OLD. The total amount claimed in the 31 summonses is approximately \$6m as at the 31 March 2015 closing

rate (2014: \$7m). On or about 3 March 2014, AngloGold Ashanti received an additional 21 individual summonses and particulars of claim relating to silicosis and/or other OLD. The total amount claimed in the 21 summonses is approximately

\$4m as at the 31 March 2015 closing rate (2014: \$4m). On or about 24 March 2014, AngloGold Ashanti received a further

686 individual summonses and particulars of claim relating to silicosis and/or other OLD. The total amount claimed in the 686

summonses is approximately \$95m as at the 31 March 2015 closing rate (2014: \$100m). On or about 1 April 2014, AngloGold Ashanti received a further 518 individual summonses and particulars of claim relating to silicosis and/or other

OLD. The total amount claimed in the 518 summonses is approximately \$78m as at the 31 March 2015 closing rate (2014:

\$81m).

On 9 October 2014, AngloGold Ashanti and the plaintiffs' attorneys agreed to refer all of the individual claims to arbitration.

The court proceedings have been suspended as a result of entering into the arbitration agreement.

It is possible that additional class actions and/or individual claims relating to silicosis and/or other OLD will be filed against

AngloGold Ashanti in the future. AngloGold Ashanti will defend all current and subsequently filed claims on their merits.

Should AngloGold Ashanti be unsuccessful in defending any such claims, or in otherwise favourably resolving perceived

deficiencies in the national occupational disease compensation framework that were identified in the earlier decision by the

Constitutional Court, such matters would have an adverse effect on its financial position, which could be material. The company is unable to reasonably estimate its share of the amounts claimed.

(6)

Other tax disputes - In November 2007, the Departamento Nacional de Produção Mineral (DNPM), a Brazilian federal mining

authority, issued a tax assessment against AngloGold Ashanti Brazil Mineração Ltda (AABM) in the amount of \$14m (2014:

\$18m) relating to the calculation and payment by AABM of the financial contribution on mining exploitation (CFEM) in the

period from 1991 to 2006. AngloGold Ashanti Limited's subsidiaries in Brazil are involved in various other disputes with tax

authorities. These disputes involve federal tax assessments including income tax, royalties, social contributions and annual

property tax. The amount involved is approximately \$12m (2014: \$14m). Management is of the opinion that these taxes are

not payable.

(7)

VAT disputes - Mineração Serra Grande S.A. (MSG) received a tax assessment in October 2003 from the State of Minas

Gerais related to VAT on gold bullion transfers. The tax administrators rejected the company's appeals against the assessment. The company is now appealing the dismissal of the case. The assessment is approximately \$12m (2014: \$15m).

(8)

Tax dispute - In January 2013, AngloGold Ashanti Colombia S.A. (AGAC) received notice from the Colombian Tax Office

(DIAN) that it disagreed with the company's tax treatment of certain items in the 2010 and 2011 income tax returns. On 23

October 2013, AGAC received the official assessments from the DIAN which established that an estimated additional tax of

\$25m (2014: \$27m) will be payable if the tax returns are amended. Penalties and interest for the additional taxes are expected to be \$126m (2014: \$135m). The company believes that it has applied the tax legislation correctly. AGAC requested in December 2013 that the DIAN reconsider its decision, but in November 2014 DIAN affirmed its earlier ruling.

AGAC challenged the DIAN's ruling by filing lawsuits before the Administrative Tribunal of Cundinamarca (trial court for tax

litigation) on 26 March 2015 and on 6 April 2015.

(9)

Tax dispute - On 12 July 2013, Cerro Vanguardia S.A. (CVSA) received a notification from the Argentina Tax Authority

(AFIP) requesting corrections to the 2007, 2008 and 2009 income tax returns of about \$14m (2014: \$14m) relating to the

non-deduction of tax losses previously claimed on hedge contracts. The AFIP is of the view that the financial derivatives at

issue should not have been accounted for as hedge contracts, as hedge contract losses could only be offset against gains

derived from the same kind of hedging contracts. Penalties and interest on the disputed amounts are estimated at a further

\$39m (2014: \$39m). CVSA and AFIP have corresponded on this issue over the past two years as previously disclosed, and

while management is of the opinion that the taxes are not payable, the government continues to assert its position regarding

the use of the financial derivatives. CVSA's most recent response to the government's findings was filed on 9 March 2015

and awaits a response.

(10)

Sales tax on gold deliveries – In 2006, MSG received two tax assessments from the State of Goiás related to the payments

of state sales taxes at the rate of 12% on gold deliveries for export from one Brazilian state to another during the period from

February 2004 to the end of May 2006. The first and second assessments were approximately \$62m and \$39m as at 31 December 2013, respectively. Various legal proceedings have taken place over the years with respect to this matter, as previously disclosed. On 5 May 2014, the State of Goiás published a law which enables companies to settle outstanding tax

assessments of this nature. Under this law, MSG settled the two assessments in May 2014 by paying \$14m in cash and by

utilising \$29m of existing VAT credits. The utilisation of the VAT credits is subject to legal confirmation from the State of

Goiás. Although the State has not yet provided confirmation, management has concluded that the likelihood of the State of

Goiás declining the utilisation of the VAT credits or part thereof is remote. The cash settlement was further set off by an

indemnity from Kinross of \$6m.

(11) Indemnity - As part of the acquisition by AngloGold Ashanti Limited of the remaining 50% interest in MSG during June 2012,

Kinross Gold Corporation (Kinross) has provided an indemnity to a maximum amount of BRL255m against the specific

exposures discussed in items 7 and 10 above. In light of the settlement described in item 10 above at 31 March 2015, the

company has estimated that the maximum contingent asset is \$8m (2014: \$9m).

(12) Royalty - As a result of the sale of the interest in the Tau Lekoa Gold Mine during 2010, the group is entitled to receive a

royalty on the production of a total of 1.5Moz by the Tau Lekoa Gold Mine and in the event that the average monthly rand

price of gold exceeds R180,000/kg (subject to an inflation adjustment). Where the average monthly rand price of gold does not exceed R180,000/kg (subject to an inflation adjustment), the ounces produced in that quarter do not count

23

towards the total 1.5Moz upon which the royalty is payable. The royalty is determined at 3% of the net revenue (being

revenue less state royalties) generated by the Tau Lekoa assets. Royalties on 538,179oz (2014: 507,471oz) produced

been received to date.

(13)

Royalty – As a result of the sale of Navachab during the second quarter of 2014, AngloGold Ashanti will receive a net

return paid quarterly for seven years from 1 July 2016, determined at 2% of ounces sold during the relevant quarter subject

to a minimum average gold price of \$1,350 and capped at a maximum of 18,750 ounces sold per quarter.

(14) Provision of surety - The company has provided surety in favour of a lender on a gold loan facility with its associate Oro

Group (Pty) Limited and one of its subsidiaries to a maximum value of \$8m (2014: \$9m). The probability of the nonperformance under the suretyships is considered minimal. The suretyship agreements have a termination notice period of 90

days.

#### 17. Concentration of tax risk

There is a concentration of tax risk in respect of recoverable value added tax, fuel duties and appeal deposits from the Tanzanian

government.

The recoverable value added tax, fuel duties and appeal deposits are summarised as follows

#### **Mar 2015**

#### **US Dollar million**

Recoverable value added tax

18

Appeal deposits

#### 18. Borrowings

AngloGold Ashanti's borrowings are interest bearing.

#### 19. Announcements

Replacement of retiring COO: South Africa: On 10 March 2015, AngloGold Ashanti announced the appointment of Chris

Sheppard, a thirty-year veteran of South Africa's ultra-deep underground mining sector, as incoming Chief Operating Officer:

South Africa, replacing the incumbent Mike O'Hare who plans to take early retirement during the course of 2015.

AngloGold Ashanti seeks CC&V partner or buyer, receives Mali approach: On 31 March 2015, AngloGold Ashanti

confirmed that it had initiated a plan to identify a joint venture partner or buyer of its Cripple Creek & Victor (CC&V)

the United States, and has also received an approach for the purchase of its stakes in the Sadiola and Yatela mines in Mali.

AngloGold Ashanti outlines transformation of South Africa Mining Industry: On 31 March 2015, AngloGold

noted the media release by the Department of Mineral Resources (DMR) on the state of the transformation in South Africa's mining sector. It indicated that it fully supports the transformation objectives enshrined in the Mineral and Petroleum Resources Development Act (MPRDA) and has taken meaningful steps to give effect to them.

AngloGold Ashanti is of the view that it has complied with the Charter. AngloGold Ashanti understands that the DMR

the Chamber of Mines will ask a court to determine whether black economic empowerment (BEE) ownership

#### transactions

concluded after 2004, where BEE ownership level has fallen due to the relevant BEE shareholders selling down their interest, should be included in the calculation of progress made against ownership targets. While transactions comprising

the majority of AngloGold Ashanti's BEE ownership credit (20.8%) took place before 2004, and thus are not contested, the

company welcomed the use of the court to provide clarity in respect of transactions completed after 2004. AngloGold Ashanti's own reading of the legislation at the time each of its BEE transactions took place is that they qualified for recognition. The award of New Order Mining Rights by the DMR, which explicitly refer to these transactions, supports this

point. AngloGold Ashanti is accordingly of the view that it has complied with the ownership requirements of the Charter.

By order of the Board

SM PITYANA S VENKATAKRISHNAN

Chairman Chief Executive Officer 7 May 2015 24
