KEY FEATURES

Quarter on quarter

Gold production increased by 4% to 7 977kg (256 465oz)

Gold sold increased by 12% to 8 321kg (267 523oz)

All-in sustaining costs remained stable at R478 746/kg (down 2% at US\$1 233/oz)

Headline earnings per share increased from loss of 60 SA cents to profit of 44 SA cents
(from 5 US cents loss to 4 US cents profit)

Year on year

Gold production decreased by 8% to 33 513kg (1.08moz)

– closure of unprofitable Target 3

– Kusasalethu, Hidden Valley and Doornkop restructured for profitability

Underground recovered grade stable y-on-y at 4.75g/t

All-in sustaining costs increased by 11% from R413 433/kg to R458 626/kg
(stable at US\$1 246)

Operational capital expenditure reduced by 2% from R2.52bn (US\$243m) to R2.47bn
(US\$216m)

Net loss of R4.5 billion (US\$396 million) recorded in FY15

– Impairment of R3.5 billion (US\$303 million)

1

Headline loss per share of 189 SA cents (17 US cents)

FORWARD-LOOKING STATEMENTS

This quarterly report contains forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 with respect to Harmony's financial condition, results of operations, business strategies, operating efficiencies, competitive positions, growth opportunities for existing services, plans and objectives of management, markets for stock and other matters. Statements in this quarter that are not historical facts are "forward-looking statements" for the purpose of the safe harbour provided by Section 21E of the U.S. Securities Exchange Act of 1934, as amended, and Section 27A of the U.S. Securities Act of 1933, as amended. Forward-looking statements are statements that are not historical facts. These statements include financial projections and estimates and their underlying assumptions, statements regarding plans, objectives and expectations with respect to future operations, products and services, and statements regarding future performance. Forward-looking statements are generally identified by the words "expect", "anticipates", "believes", "intends", "estimates" and similar expressions. These statements are only predictions. All forward-looking statements involve a number of risks, uncertainties and other factors and we cannot assure you that such statements will prove to be correct. Risks, uncertainties and other factors could cause actual events or results to differ from those expressed or implied by the forward-looking statements. These forward-looking statements, including, among others, those relating to the future business prospects, revenues and income of Harmony, wherever they may occur in this quarterly report and the exhibits to this quarterly report, are

necessarily estimates reflecting the best judgement of the senior management of Harmony and involve a number of risks and uncertainties that could cause actual results to differ materially from those suggested by the forward-looking statements. As a consequence, these forward-looking statements should be considered in light of various important factors, including those set forth in this quarterly report. Important factors that could cause actual results to differ materially from estimates or projections contained in the forward-looking statements include, without limitation: overall economic and business conditions in the countries in which we operate; the ability to achieve anticipated efficiencies and other cost savings in connection with past and future acquisitions; increases or decreases in the market price of gold; the occurrence of hazards associated with underground and surface gold mining; the occurrence of labour disruptions; availability, terms and deployment of capital; changes in government regulations, particularly mining rights and environmental regulations; fluctuations in exchange rates; currency devaluations and other macro-economic monetary policies; and socio-economic instability in the countries in which we operate.

MESSAGE FROM THE CHIEF EXECUTIVE OFFICER

1 SAFETY

I am pleased to report a significant improvement in the company's safety performance with Harmony recording its first ever fatality-free quarter in the second quarter of FY15. Safety performance in terms of all parameters measured improved during the year.

We are not content with our performance though, as nine lives were tragically lost at our mines during the year under review. The colleagues we mourn are Mhanjelwa Cebani, a rockdrill operator at Doornkop, Mosoeu Ntsutheleng, a team leader at Kusasalethu, and Mariselunes Thibello, a rock drill operator at Bambanani, who were involved in fatal falls of ground; Mmaneo Florisa Muso from Tshepong, Michael Chobeng from Masimong and Maxwell Wari from Hidden Valley who were involved in transport accidents; Bernardo Ernesto Cuambe, an engineering assistant at Unisel, who was involved in a headgear accident; and security officers, Sello Jacob Bobejaan and Thapelo Andries Mofokeng who succumbed to gas and smoke inhalation from a self-made heating device inside their security cubicle at Brand 1 ventilation shaft. To their families, their friends and their colleagues, I send our most sincere condolences.

Following each incident in which an injury occurs – whether fatal or not – an incident report detailing “lessons learnt” is circulated to all operations to enable them to scrutinise their own systems and procedures. This enables them to pro-actively identify potential shortcomings and to take remedial action where necessary to prevent a recurrence of any such incident.

Emphasis on health and safety campaigns has been reinforced, via communication initiatives and regular visits underground by senior management. To achieve zero harm, visible felt leadership is enforced at all levels, based on our commitment to safety as a priority that is embedded in our organisational culture. Initiatives implemented at the operations encourage safer behaviour throughout the company. Zero harm has not only become our mantra, but an objective that can be achieved.

Although there are a number of uncertainties that we have to deal with, Harmony's board and management will continue to manage what we can – production and costs. We have restructured under-performing operations, cut corporate costs, curtailed our capital expenditure and reduced our labour numbers. Our strategy remains unchanged: being a value focused company – one that creates value through increasing margins and generating the cash necessary to develop Golpu in Papua New Guinea.

To ensure that the value of all of our assets are accounted for in our share price and to create a viable investment case, we are assessing ways of funding Golpu and unlocking the true value of each of our assets. This will ensure positive shareholder returns in the long term.

We are in the process of developing a magnificent copper-gold project, Golpu, in Papua New Guinea. Our exploration team has

enjoyed, and continues to enjoy, considerable success in locating copper-gold mineralisation. Towards the end of July 2015 we announced the superb exploration drilling results from Kili Teke – a porphyry style mineralisation with significant copper-gold intercepts. More upside potential exists as Harmony continues to explore. In a world where new discoveries are rare, we are encouraged by the prospect that Kili Teke could well develop into another major copper-gold discovery.

2 OPERATIONAL RESULTS

Quarter on quarter

Gold production for the June 2015 quarter increased by 4% to 7 977 kilograms (Mar 15: 7 642kg) with significant improvements from Tshepong and Target 1.

Gold production increased at the following operations when compared to the March 2015 quarter:

- Tshepong's (+252kg) 20% increase in tonnes milled (42 000t) in the June 2015 quarter, combined with an 8% improvement in the recovery grade to 4.43g/t (Mar 15: 4.12g/t) resulted in a 29% increase in kilograms produced;
- Target 1 (+118kg) milled 13 000 tonnes (7%) more than in the March 2015 quarter, whilst the recovered grade increased by 6% to 5.03g/t (Mar 15: 4.73g/t) for the quarter under review, resulting in a 14% increase in gold production;
- Hidden Valley (+54kg) increased gold production by 8% when compared to the March 2015 quarter mainly due to a 12% increase in the recovered grade to 1.64g/t (Mar 15: 1.46g/t) for the June 2015 quarter. The increase in recovered grade was partially offset by a 4% decrease in tonnes milled.

The increase in gold production was however partially offset by decreases at the following operations:

- Phakisa (-30kg) milled 5 000 tonnes (3%) less than in the March 2015 quarter, resulting in a 4% decrease in gold produced;
- Joel (-30kg) recorded a 14% decrease in the recovered grade at 3.83g/t (Mar 15: 4.43g/t). This was however partially offset by a 9% increase in tonnes milled resulting in a 5% decrease in gold produced;
- Unisel (-27kg) recorded a 7% decrease in gold production as a result of a 7% decrease in the recovery grade to 3.75g/t (Mar 15: 4.03g/t).

Production profit decreased by 2% to R627 million. In the June 2015 quarter, gold sold increased by 12% and revenue increased by 13% quarter on quarter.

During the June 2015 quarter the US dollar gold price received decreased by 2% to US\$1 195/oz (Mar 15: US\$1 220/oz), offset by a weakening of the rand against the dollar.

Cash operating costs for the June 2015 quarter were 8% higher quarter on quarter. Total capital expenditure for the June 2015 quarter increased by only 3% to R728 million (Mar 15: R710 million).

The all-in sustaining costs remained fairly steady with a 1% increase in the June 2015 quarter to R478 746/kg, compared to

R474 873/kg in the March 2015 quarter.

Harmony Gold Mining Company Limited

Results for the fourth quarter FY15 and year ended 30 June 2015

4

Year on year

Gold production for FY15 decreased by 8% to 33 513 kilograms, compared to 36 453 kilograms in FY14.

There was an increase in production at the following operations:

- Bambanani (+332kg) increased tonnes milled by 11% (23 000t) for FY15; combined with a 2% increase in the recovery grade to 12.70g/t (FY14: 12.50g/t) and gold production increased by 13%;
- Phakisa (+142kg) increased tonnes milled by 6% during FY15 to 611 000 tonnes.

Gold production decreased at the following operations:

- Kusasalethu (-741kg) milled 235 000 tonnes (21%) less than in FY14. Production at the shaft was hampered by safety stoppages, underground fires and illegal mining activities during FY15;
- Target 1's (-669kg) recovered grade returned to expected levels in FY15 at 5.11g/t (FY14: 5.83g/t) and was the main reason for the 15% decrease in gold production;
- Hidden Valley's (-349kg) tonnes milled decreased by 9% (176 000t) in FY15. Production was affected by a tear in the overland conveyor belt towards the end of the December 2014 quarter, as well as planned maintenance at the metallurgical plant in the first half of 2015;
- Masimong (-255kg) recorded a 9% decrease in the recovery grade at 3.68g/t for FY15, compared to 4.06g/t in FY14.
- Suspended operations: Target 3 (-930kg) was placed on care and maintenance during FY15 and produced its last gold in the December 2014 quarter. Steyn 2 (-392kg) was closed in FY14 and produced no gold in FY15.

3 FINANCIAL RESULTS

Year on year

Production profit

Production profit for FY15 decreased to R2.8 billion compared to R3.8 billion in FY14. This was mainly due to the 8% decrease in gold production, as well as a 6% increase in operating costs for FY15.

Gold price received

The rand gold price received increased by 4% to R449 570/kg in FY15, compared to R432 165/kg in FY14. The increase was due to a weakening of the rand against the US dollar from US\$/R10.35 to US\$/R11.45.

All-in sustaining costs

All-in sustaining costs increased by 11% in FY15 to R458 626/kg, compared to R413 433/kg in FY14, largely due to the under-performance of some of our operations.

Revenue

Revenue decreased by 2% as a result of the 5% decrease in gold sold to 34 332kg in FY15, more than offset by a 4% increase in the

Rand gold price received at R449 570/kg in FY15.

Production costs

Production costs increased by 6% to R12.6 billion in FY15. Cost containment remained a priority in FY15. Cash operating costs only increased by 3% despite inflationary increases and increases above inflation in electricity costs. Production costs for the year include R260 million as a result of the reduction in gold inventory during the year.

Other items in costs of sales

Other items included in cost of sales for the year ended 30 June 2015 include employment termination and restructuring costs of R251 million mainly relating to restructuring at Kusasalethu, Masimong, Hidden Valley, management retrenchments and closure of Target 3.

Loss on scrapping of property, plant and equipment

Loss on scrapping of property, plant and equipment of R491 million recorded in FY15, of which R430 million relates to the life-of-mine optimisation process finalised in December 2014. The optimisation resulted in the abandoning of shaft levels and raise lines at Kusasalethu and Masimong.

Borrowings

At year-end total borrowings comprised R400 million drawdown on the Nedbank facility as well as US\$250 million on the US\$ revolving credit facility.

Quarter on quarter

Impairment of assets

The impairment of R3 471 million in the June 2015 quarter consists of an impairment of R2 114 million in respect of Hidden Valley, R1 036 million on Doornkop, R278 million on Phakisa and R43 million on Freddie's 9.

The impairments are due to the restructuring of operations for profitability and in response to low commodity prices and high operating costs, which resulted in a reduced life of mine.

5

Deferred taxation

A deferred tax credit of R558 million was recorded following the net decrease in the deferred tax rates year on year for the South African companies, and impairments recognised on property, plant and equipment.

Net loss

The net loss for the June 2015 quarter was R3 152 million, mainly due to the impairment of R3 471 million recorded, compared to a net loss of R263 million in the March 2015 quarter.

Headline earnings per share

Headline earnings per share increased to 44 SA cents from a loss of 60 SA cents in the March 2015 quarter.

4 EMPLOYEE RELATIONS

4.1 Restructuring

On 19 May 2015, Harmony started a 60 day consultation process with organised labour at its Doornkop mine in terms of section 189A of the Labour Relations Act, 66 of 1995 (Section 189A) with a view to find ways to return the mine to profitability or to place the mine on care and maintenance. Following several meetings with organised labour, Harmony and the unions have agreed to a new operational plan for Doornkop that will return the mine to profitability, thus saving a significant number of jobs.

Doornkop mine's newly agreed plan provides for more than 3 100 employees (including contractors), with only 526 employees (including contractors) being affected. The majority of these employees have been transferred to other operations. Of the 526, about 183 people have either been re-skilled for redeployment elsewhere in Harmony or elected to accept a voluntary severance package.

At Masimong, with its marginal grades, the mine has been restructured for profitability by reducing development rates and concentrating on higher-grade areas. This strategy will reduce the mine's remaining operational life expectancy to about two years and, while this is short, they are expected to be two profitable years. A total of 373 people were affected, of which 229 were transferred to other operations and 74 accepted voluntary severance packages.

At the Hidden Valley mine our focus has been on cutting costs by revising the mine plan to encompass a lower stripping ratio and on tighter control of the mine's operations. On 18 July 2015, a road accident occurred at Hidden Valley, fatally injuring one employee. The mine has been closed for two weeks while intensive safety audits are taking place. This is likely to impact the production of the first quarter of FY16.

4.2 Wage negotiations

The 2015 round of wage negotiations in the gold sector began on 22 June 2015 between the Chamber of Mines, representing five gold companies, and the four trade unions: Association of Mine Workers and Construction Union (AMCU), National Union of Mine Workers (NUM), UASA and Solidarity. The approach to this

year's wage negotiations has been distinctly different in the hope that the negotiated outcome is cognisant of the economic realities of the individual gold producers negotiating under the auspices of the Chamber of Mines. Discussions are ongoing.

5 GOLPU

The Conservation and Environment Protection Authority of Papua New Guinea has granted a Level 2B environmental permit in respect of proposed advanced exploration and feasibility support activities. Owners' representatives are engaging with this authority on the detail of the permit conditions.

Revised block cave footprint designs and preliminary production schedules have been completed as part of the stage 1 feasibility study. Work has commenced on the stage 2 prefeasibility study.

The owners' representatives continue to engage with the government's negotiating team to finalise a pre-mining development agreement terms sheet for endorsement by the National Executive Committee.

6 EXPLORATION

Kili Teke (PNG – 100% held by Harmony)

The mineralised footprint (defined by the 0.2% copper envelope) currently stands at 600m long, 200m wide and 700m deep, and remains open along strike and at depth. Geology and results from KTDD012 and KTDD013 (186m@1.02Cu, 0.72g/t Au from 256m), together with KTDD007 (202m @ 0.74% Cu, 0.57g/t Au from 137m) are extremely encouraging as they reflect high grade zones developing within the mineralised envelope.

The project is a major new greenfield copper-gold discovery and drilling to convert the prospect into a new copper-gold resource continues. Kili Teke could well be another Golpu.

Graham Briggs

Chief Executive Officer

Harmony Gold Mining Company Limited

Results for the fourth quarter FY15 and year ended 30 June 2015

6

Harmony's statement of mineral resources and mineral reserves as at 30 June 2015 is compliant with the South African Code for the Reporting of Mineral Resources and Mineral Reserves (SAMREC) and the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC).

This report provides a summary of the update, while the detailed statement of the mineral resources and mineral reserves will be published in the Integrated Report on 23 October 2015, which will be available at www.harmony.co.za/investors. It should be noted that the mineral resources are reported inclusive of the mineral reserves.

Harmony use certain terms in the summary such as 'measured', 'indicated' and 'inferred' resources, which the United States' Securities and Exchange Commission (SEC) guidelines strictly prohibit US-registered companies from including in their filings with the SEC. US investors are urged to consider the disclosure in this regard in our Form 20-F which will be available on 23 October 2015.

South African underground operations

The company's mineral resources at the South African underground operations as at 30 June 2015 are 60.6 Moz (217.2 Mt at 8.68 g/t). A decrease of 27% year on year from the 83.3 Moz declared as at 30 June 2014. This decrease is due to depletion by mining during the year, the exclusion of Freddie's No 9 shaft and downscaling at Masimong. The company's mineral reserves at the South African underground operations as at 30 June 2015 are 15.0 Moz (80.3 Mt at 5.82 g/t), a decrease of 25% year on year from the 19.9 Moz declared as at 30 June 2014. The decrease is due to depletion by mining during the year, placing of Target No 3 on care and maintenance and changes to the Life of mine (LOM) profile at various operations.

South African surface operations including Kalgold

The company's mineral resources at the South African surface operations as at 30 June 2015 are 9.5 Moz (1082.3 Mt at 0.27g/t). A decrease of 1% year on year from the 9.6 Moz declared as at 30 June 2014. This decrease is due to depletion by mining and exclusion of surface sources at Joel. The company's mineral reserves at the South African surface operations as at 30 June 2015 are 7.1 Moz (835.9 Mt at 0.26 g/t), a decrease of 12% year on year from the 8.0 Moz declared at 30 June 2014. The decrease is due to depletion by mining and exclusion of surface sources at Joel.

Papua New Guinea (PNG) operations

The company's mineral resources at the PNG operations as at 30 June 2015 are 40.2 Moz, a decrease of 2% year on year from the 40.9 Moz declared as at 30 June 2014. This decrease is due to depletion by mining during the year, and changes to open pit spatial constraint. The company's mineral reserves at the PNG operations as at 30 June 2015 are 20.5 Moz, a decrease

of 5% year on year from the 21.5 Moz declared as at 30 June 2014. The decrease is due to depletion by mining during the year, and changes to the life of mine (LOM) profile at Hidden Valley operation. The reserves that we declared for Golpu are based on the prefeasibility study completed in 2012.

During December 2014 Harmony released an updated prefeasibility study with respect to the Golpu project. Please refer to our website (<https://www.harmony.co.za/our-business/exploration/golpu-updated-prefeasibility-results>) for details. There will be an update to the reserves of Golpu once the feasibility study for stage 1 and the prefeasibility study for stage 2 have been completed. The studies are expected to be completed in January 2016.

Total Harmony

The company's attributable gold equivalent mineral resources are declared as 110.3 Moz as at 30 June 2015, a 18% decrease year on year from the 133.8 Moz declared on 30 June 2014.

The gold contained in the mineral resources in South Africa represent 63.5% of the company total, the PNG operations represent 36.5% of Harmony's total gold and gold equivalent mineral resources as at 30 June 2015.

As at 30 June 2015, Harmony's attributable gold and gold equivalent mineral reserves amounted to 42.6Moz of gold, a 14% decrease from the 49.5Moz declared at 30 June 2014.

The gold reserve ounces in South Africa represent 51.9% while the PNG gold and gold equivalent ounces represent 48.1% of Harmony's total mineral reserves as at 30 June 2015.

In converting the mineral resources to mineral reserves, the following commodity prices and exchange rates were applied:

- A gold price of US\$1 230/oz
- An exchange rate of US\$/ZAR11.38
- The above parameters resulted in a rand gold price of R450 000/kg for the South African assets
- Morobe Mining Joint Venture used commodity prices of US\$1 250/oz Au, US\$20/oz Ag, US\$10/lb Mo and US\$3.10/lb Cu at an exchange rate of US\$0.85 per A\$
- Gold equivalent ounces are calculated assuming US\$1 400/oz Au, US\$3.10/lb Cu and US\$23.00/oz Ag, and assuming a 100% recovery for all metals. These are the same assumptions as those used in the 2012 prefeasibility study for the calculation of gold equivalent ounces

Harmony's South African mineral resources and reserves were reviewed by SRK Consulting Engineers and Scientists for compliance with SAMREC.

The mineral resources and reserves of the Papua New Guinea assets were reviewed by AMC Consultants Pty Ltd for compliance with the standards set out in JORC.

Note:

Au= gold; Cu = copper; Ag = Silver, Mo = Molybdenum, Moz= million ounces

** Represents Harmony's 50% portion*

*** In instances where individual deposits may contain multiple valuable commodities with a reasonable expectation of being recovered (for example gold and copper in a single deposit) Harmony computes a gold equivalent to more easily assess*

the value of the deposit against gold-only mines. Harmony does this by calculating the value of each of the deposits commodities, then dividing the product by the price of gold. For example, the gold equivalent ounces for the copper portion

of a deposit would be calculated as follows: (copper pounds x copper price per pound)/gold price per ounce. All gold equivalent calculations are done using metal prices and parameters as stipulated above.

Competent person's declaration

In South Africa, Harmony employs an ore reserve manager at each of its operations who takes responsibility for the compilation and reporting of mineral resources and mineral reserves at their operations.

In Papua New Guinea, competent persons are appointed for the mineral resources and mineral reserves for specific projects and operations.

The mineral resources and mineral reserves in this report are based on information compiled by the following competent persons:

• Resources and reserves South Africa:

Jaco Boshoff, BSc (Hons), MSc, MBA, Pr. Sci. Nat, MSAIMM, who has 20 years' relevant experience and is registered with the South African Council for Natural Scientific Professions (SACNASP) and a member of the South African Institute of Mining and Metallurgy (SAIMM).

Mr Boshoff is the Harmony Lead Competent Person.

• Resources and reserves Papua New Guinea:

Gregory Job, BSc, MSc, who has 27 years' relevant experience and is a member of the Australian Institute of Mining and Metallurgy (AusIMM).

Mr Boshoff and Mr Job are full-time employees of Harmony Gold Mining Company Limited.

These competent persons consent to the inclusion in the report of the matters based on the information in the form and context in which it appears.

Jaco Boshoff

Legal entitlement to the minerals being reported upon

The Harmony South Africa operations operate under new order mining rights in terms of the Minerals and Petroleum Resources Development of Act of 2002 (Act No. 28, of 2002) (MPRDA). In PNG Harmony operates under the Independent State of Papua New Guinea Mining Act 1992. All required operating permits have been obtained, and are in good standing. The legal tenure of each operation and project has been verified to the satisfaction of the accountable Competent Person.

The accompanying notes are an integral part of these condensed consolidated financial statements.

The condensed consolidated provisional financial statements (condensed consolidated financial statements) for the year ended

30 June 2015 have been prepared by Harmony Gold Mining Company Limited's corporate reporting team headed by Herman Perry. This

process was supervised by the financial director, Frank Abbott and approved by the board of Harmony Gold Mining Company Limited on

14 August 2015. These condensed consolidated financials have been reviewed by the group's external auditors, PricewaterhouseCoopers

Incorporated (see note 16).

** For the June 2014 quarter: Cash generated by operating activities previously reported as R470 million restated to R489 million. Cash utilised by investing activities previously reported as R656 million restated to R675 million. This is mainly related to the change in accounting policy for IFRIC 20, which became effective 1 July 2013.*

The accompanying notes are an integral part of these condensed consolidated financial statements.

Harmony Gold Mining Company Limited

Results for the fourth quarter FY15 and year ended 30 June 2015

18

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

for the year ended 30 June 2015 (Rand)

1.

Accounting policies

Basis of accounting

The condensed consolidated financial statements for the year ended 30 June 2015 have been prepared in accordance with IAS 34,

Interim Financial Reporting, JSE Listings Requirements for provisional reports, SAICA Financial Reporting Guides as issued by the

Accounting Practices Committee and Financial Pronouncements as issued by the Financial Reporting Standards Council, and in the

manner required by the Companies Act of South Africa. They should be read in conjunction with the annual financial statements for

the year ended 30 June 2014, which have been prepared in accordance with International Financial Reporting Standards as issued

by the International Accounting Standards Board (IFRS). The accounting policies are consistent with those described in the annual

financial statements, except for the adoption of applicable revised and/or new standards issued by the International Accounting

Standards Board.

The following accounting standards, amendments to standards and new interpretations have been adopted with effect from

1 July 2014 and had no impact on the financial results of the group:

IFRSs

Annual Improvements 2010 – 2012 Cycle

IAS 32

Amendment – Presentation – Offsetting Financial Assets and Financial Liabilities

IAS 36

Amendment – Impairment of Assets – Recoverable amount disclosures for non-financial assets

1

The impairment in the June 2015 quarter consists of an impairment of R2.11 billion on Hidden Valley, R1.04 billion on Doornkop, R278 million on Phakisa and R43 million on Freddie's 9. The June 2014 quarter impairment consists of an impairment of R1.38 billion on Phakisa, R7 million on Steyn 2 and R21 million on St Helena. Refer to note 6 for further details.

2

Included in the total for the June 2015 quarter is a credit of R61 million relating to the change in estimate following the annual reassessment.

3

Including R20 million reparation costs relating to the Brand 1A vent shaft explosion.

4

The March 2015 quarter total includes a credit for Kusasalethu following the conclusion of the Section 189A process during the quarter.

5

Included in the total for the June 2015 quarter is a credit of R87 million relating to the reduction in employees qualifying for post-retirement benefits.

3.

Exploration expenditure

The Harmony board approved the updated Golpu project prefeasibility study in December 2014. The approval and the progression to the final feasibility study stage demonstrates the technical and commercial viability of the Golpu project. As a result Harmony started capitalising project exploration and evaluation expenditure for the Golpu project in the March 2015 quarter.

4. Taxation

A deferred tax credit of R558 million was recorded in the June 2015 quarter following the net decrease in the deferred tax rates year on year for the South African companies and impairments recognised on property, plant and equipment. Included in the total is a debit of R64 million for the derecognition of the Australian deferred tax asset (see note 6).

(a) Impairment

One of the most significant assumptions that influence the life-of-mine plans and therefore impairment is the expected gold

price. During this year's planning and testing, gold price and exchange rate assumptions as per the table below were used.

Post-tax real discount rates ranging between 7.99% and 12.03% (2014: 7.03% and 11.56%), depending on the asset, were

used to determine the recoverable amounts (generally fair value less costs to sell).

2016**2017****2018****Short term Medium term****Long term****Year 1****Year 2****Year 3**

11.86

11.66

Exchange rate (PGK/US\$)

2.75

2.75

2.80

For South African operations, values of US\$40.86, US\$23.35 and US\$5.84 per ounce were used for measured, indicated and inferred resources, respectively. For Hidden Valley, values of US\$15.00 and US\$6.00 per ounce were used for indicated and inferred resources, respectively.

During the 2015 year, an impairment of R2.11 billion was recognised on Hidden Valley following a change in the life-of-mine plan during the annual planning process. Low commodity prices and high all-in sustaining costs resulted in a shortening in the life-of-mine of the operation. The revised plan also made the recoverability of the deferred tax asset for Australia unlikely, and as a result it was derecognised.

Following the decision to restructure Doornkop in May 2015, a revised life-of-mine plan was completed. The new plan resulted in a lower recoverable amount and an impairment of R1.04 billion was recognised.

Other impairments include R278 million on Phakisa as cost pressures continue to impact profitability and R43 million for

Freddies 9 as plans to develop the project further have been abandoned.

The recoverable amounts for the impaired shafts are as follows: Hidden Valley R653 million (US\$53.7 million), Doornkop

Harmony Gold Mining Company Limited

Results for the fourth quarter FY15 and year ended 30 June 2015

20

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS CONTINUED

for the year ended 30 June 2015 (Rand)

R1 846 million, Phakisa R3 989 million and Freddie's 9 Rnil. These were determined on a fair value less costs to sell basis using

the assumptions above in discounted cash flow models and attributable resource values. These are fair value measurements

classified as level 3.

The sensitivity scenario of a 10% decrease in the gold price used in the models as well as a 10% decrease in the silver price for

Hidden Valley would have resulted in an additional impairment at Phakisa of R1.3 billion, Doornkop of R923 million and Hidden

Valley of R461 million. The decreases noted would have resulted in impairments at Target 1 of R938 million, Target 3 of R33

million, Tshepong of R693 million, Unisel of R6 million and other Harmony assets of R393 million.

(b) Loss on scrapping of property, plant and equipment

As previously reported, management embarked on a life-of-mine optimisation process in respect of the South African operations

which was finalised at the end of the December 2014 quarter. The optimisation ensured greater focus on mining profitable and

higher grade areas at our operations and therefore resulted in the abandonment of lower grade and unprofitable areas from

the life-of-mine plan for most of the operations.

In the case of Kusasalethu and Masimong, the optimisation led to the abandonment of levels and areas with a carrying value.

The abandonment of these areas resulted in the derecognition of property, plant and equipment as no future economic benefits

are expected from their use or disposal and a loss on scrapping of property, plant and equipment of R214 million on Kusasalethu

and R216 million on Masimong was recorded in the December 2014 quarter.

At 30 June 2015, following the annual life-of-mine planning, an additional amount of R61 million was recorded for various

shafts as a result of the abandonment of uneconomical areas in the plans.

7.

Investment in associate

Harmony holds a 10.38% share in Rand Refinery Proprietary Limited (Rand Refinery). Due to the issues experienced at Rand Refinery

following the implementation of a new Enterprise Resource Planning (ERP) system on 1 April 2013, Harmony provided for its

estimated share of loss for the inventory discrepancy and recognised a R127 million loss in the June 2014 quarter.

As a precautionary measure following the challenges experienced by the implementation of the software system, Rand Refinery's

shareholders have extended Rand Refinery an irrevocable, subordinated loan facility of up to R1.2 billion. The facility is convertible

to equity after a period of two years. The agreements relating to the facility were signed on 23 July 2014. During the December

2014 quarter, Rand Refinery drew down R1.02 billion on the shareholders' loan. Harmony's portion of the shareholders' loan was

R120 million. Interest on the facility is JIBAR plus a margin of 3.5%.

Following the finalisation of Rand Refinery's 2013 and 2014 audited financial statements, which accounted for the known inventory discrepancy at that date, Harmony has recorded a further R25 million against the loan to Rand Refinery (loan to associate) for its share of the loss. At 30 June 2015, the loan to associate was tested for impairment and a provision for impairment of R15 million was required. This impairment is included in "Other expenses (net)" in the income statement.

8. Borrowings

During the March 2015 quarter, the US\$300 million syndicated revolving credit facility (US\$270 million drawn) was repaid and a new revolving credit facility of US\$250 million (of which US\$205 million was drawn down) was entered into. During the June 2015 quarter, US\$45 million (R541 million) was drawn down on the US\$ revolving credit facility. R400 million was drawn down on the R1.3 billion Nedbank revolving credit facility during the March 2015 quarter.

A foreign exchange translation loss of R4 million was recorded in the June 2015 quarter (March 2015: R118 million) increasing the borrowings balance and other expenses (net). The total foreign exchange translation loss for the 2015 financial year is R382 million (2014: R155 million).

9.

Financial risk management activities

Fair value determination

The following table presents the group's assets and liabilities that are measured at fair value by level within the fair value hierarchy:

Level 1: Quoted prices (unadjusted) in active markets for identical assets;

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset, either directly or indirectly (that

is, as prices) or indirectly (that is derived from prices);

Level 3: Inputs for the asset that are not based on observable market data (that is unobservable inputs).

Contingent liabilities

For a detailed disclosure on contingent liabilities refer to Harmony's annual financial statements for the financial year ended

30 June 2014. There were no significant changes in contingencies since 30 June 2014, except as discussed below:

(a) US class action

The distribution of the settlement amount, held in escrow, to the plaintiff class of the lawsuit filed in the United States of

America was completed. From both legal and accounting perspectives, the matter is now concluded.

12. Related parties

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities

of the group, directly or indirectly, including any director (whether executive or otherwise) of the group.

During the June 2015 quarter, Frank Abbott, financial director, purchased 60 000 shares in the company in the open market.

13. Subsequent events

Harmony has signed a R100 million guarantee for the ARM Broad Based Economic Empowerment (BBEE) Trust, a member of the

African Rainbow Minerals (ARM) group. The guarantee is for additional security for the ARM BBEE Trust loan due to Nedbank

Limited.

The currency conversion average rates for the quarter ended: June 2015: US\$1 = R12.08 (March 2015: US\$1 = R11.74, June 2014:

US\$1 = R10.51). For year ended: June 2015: US\$1 = R11.45 (June 2014: US\$1 = R10.35).

The income statement for the year ended 30 June 2014 has been extracted from the 2014 annual financial statements.

Note on convenience translations

Except where specific statements have been extracted from 2014 annual financial statements, the requirements of IAS 21, The

Effects of the Changes in Foreign Exchange Rates, have not necessarily been applied in the translation of the US Dollar financial

statements presented on page 25 to 29.

** For the June 2014 quarter: Cash generated by operating activities previously reported as US\$45 million restated to US\$46 million. Cash utilised by investing activities previously reported as US\$62 million restated to US\$63 million. This is mainly related to the change in accounting policy for IFRIC 20, which became effective 1 July 2013.*

The currency conversion average rates for the quarter ended: June 2015: US\$1 = R12.08 (March 2015: US\$1 = R11.74, June 2014:

US\$1 = R10.51). For year ended: June 2015: US\$1 = R11.45 (June 2014: US\$1 = R10.35).

Closing balance translated at closing rates of: June 2015: US\$1 = R12.16 (March 2015: US\$1 = R12.17, June 2014: US\$1 = R10.61).

The cash flow statement for the year ended 30 June 2014 has been extracted from the 2014 annual financial statements.
