Liquidity and Capital Resources at March 31, 2004 and December 31, 2003

General. Like all financial institutions, the Company must ensure that sufficient funds are available to meet deposit withdrawals, loan commitments, investment needs and expenses. Control of the Company's cash flow requires the anticipation of deposit flows and loan payments. The Company's primary sources of funds are deposit accounts, FHLB advances and principal and interest payments on loans.

The Company requires funds in the short term to finance ongoing operating expenses, pay liquidating deposits, purchase temporary investments in securities and invest in loans. The Company funds short-term requirements through advances from the FHLB, the sale of investments, deposit growth and loan principal payments. The Company requires funds in the long-term to invest in loans for its portfolio, purchase fixed assets and provide for the liquidation of deposits maturing in the future. The Company funds its long-term requirements with proceeds from maturing loans, the sale of loans and the sale of securities. Management has no plans to significantly change long-term funding requirements.

During the three months ended March 31, 2004, the Company's primary source of funds consisted of a net increase in deposits of \$20.9 million and net principal repayments and sales of loans of \$16.5 million and securities available for sale of \$3.9 million. The Company used its capital resources principally to purchase loans of \$31.2 million, repay \$7.3 million in Federal Home Loan Bank advances and to purchase securities available for sale of \$4.0 million.

During the year ended December 31, 2003, the Company obtained funds primarily from the sale of loans of \$40.2 million; net principal repayment of loans of \$64.0 million; proceeds from the increase in deposits of \$36.1 million; proceeds from the sale and repayments of securities of \$24.0 million and proceeds from increased FHLB advances of \$53.5 million. The Company used cash to fund \$176.8 million in

Edgar Filing: - Form

loan purchases; \$20.3 million in loans originated for sale; the purchase of securities for \$36.6 million; the purchase of bank-owned life insurance of \$3.4 million; the purchase of FHLB stock of \$2.8 million; and the purchase of premises and equipment of \$2.6 million. Management believes that in the future, funds will continue to be obtained from the above sources.

Table of Contents

At March 31, 2004 and December 31, 2003, loans-in-process, or closed loans scheduled to be funded over a future period of time, totaled \$3.3 million and \$2.8 million, respectively. Loans committed, but not closed, totaled \$5.6 million and \$4.7 million, respectively, available lines of credit totaled \$3.0 million and \$5.3 million, respectively, and standby letters of credit totaled \$494,000. Funding for these amounts is expected to be provided by the sources described above.

In March 2004, and December 2003, the Bank's average liquidity was 8.1% and 9.6%, respectively. The Company expects the Bank's six Central Florida offices along with other wholesale sources of funds, to generate sufficient funds to provide liquidity for expected loan purchases and originations and other investments. The Asset/Liability Management Committee meets regularly and, in part, reviews liquidity levels to ensure that funds are available as needed.

During the first three months of 2004, the Company paid \$0.02 per common share in dividends. The Company paid \$0.05 per share in dividends during 2003, its first dividend payments since 1994. Although the Company was profitable during 2002, the Board of Directors did not authorize dividends, as the earnings were being retained and used by the Bank for its growth. The payment of future dividends will depend on general economic conditions, as well as the Company's overall performance and capital needs.

At March 31, 2004 and December 31, 2003, Federal Trust had \$207,000 and \$396,000, respectively, in cash in its account, which will be used primarily for interest on debt, cash dividend payments and other operating expenses.

The following table is a reconciliation of the Bank's stockholders' equity calculated in accordance with accounting principles generally accepted in the United States of America (GAAP) to regulatory capital (\$ in thousands):

	<u>Tier 1</u>	<u>Total Risk-Based</u>
At March 31, 2004:		
Bank's stockholders' equity in accordance with GAAP	\$ 32,061	\$ 32,061
Add (deduct):		
Unrealized losses on investments	77	77
Excess mortgage servicing rights and Excess net deferred tax assets	(87)	(87)
General valuation allowances		3,247
	<u> </u>	<u> </u>
Regulatory capital	\$ 32,051	\$ 35,298
	<u> </u>	<u> </u>
At December 31, 2003:		
Bank's stockholders' equity in accordance with GAAP	30,860	30,860
Add (deduct):		
Unrealized losses on investments	380	380
Excess mortgage servicing rights and Excess net deferred tax assets	(91)	(91)
General valuation allowances		2,728
	<u> </u>	<u> </u>

	<u> </u>	<u> </u>

Table of Contents

At March 31, 2004, and December 31, 2003, the Company exceeded all of its minimum capital requirements.

Results of Operations**Comparison of the Three-Month Periods Ended March 31, 2004 and 2003**

General. The Company had net earnings for the three-month period ended March 31, 2004, of \$810,000 or \$0.12 per basic and diluted share, compared to \$654,000 or \$0.10 per basic and diluted share for the same period in 2003. The increase in net earning was primarily due to an increase in net interest income, partially offset by increases in the provision for loan losses and other expenses.

Interest Income. Interest income increased by \$305,000, or 5.6% to \$5.8 million for the three-month period ended March 31, 2004, from \$5.5 million for the same period in 2003. Interest income on loans increased \$324,000 or 6.3% to \$5.5 million in 2004 from \$5.1 million in 2003, primarily as a result of an increase in the average amount of loans outstanding from \$356.1 million in 2003 to \$412.1 million in 2004, partially offset by a decrease in the average yield earned on loans from 5.76% for the three-month period ended March 31, 2003, to 5.29% for the comparable period in 2004. Interest income on securities decreased by \$8,000 for the three-month period ended March 31, 2004, compared to the same period in 2003, primarily as a result of a decrease in the average yield, which was partially offset by an increase in the average balance of securities owned. Management expects the rates earned on the portfolio to fluctuate with general market interest rates and economic conditions.

Interest Expense. Interest expense decreased by \$379,000 or 13.7% to \$2.4 million during the three-month period ended March 31, 2004, compared to \$2.8 million for the same period in 2003. Interest on deposits decreased \$375,000 or 18.4% to \$1.7 million in 2004 from \$2.0 million in 2003, as a result of a decrease in the average cost of deposits from 2.75% for the three-month period ended March 31, 2003, to 2.04% for the comparable period in 2004, partially offset by an increase in average deposits outstanding from \$295.8 million in 2003, to \$324.4 million in 2004. Interest on other borrowings decreased to \$735,000 in 2004 from \$739,000 in 2003, primarily as a result of a decrease in the average rate paid from 3.51% in 2003 to 2.38% in 2004, partially offset by an increase in the average balance of other borrowings from \$84.3 million during 2003, to \$123.3 million in 2004. Management expects to continue to use FHLB advances and other borrowings to provide liquidity and as a liability management tool.

Provision for Loan Losses. A provision for loan losses is charged to earnings based upon management's evaluation of the losses in its loan portfolio. During the quarter ended March 31, 2004, management recorded a provision for loan losses of \$550,000 based on its evaluation of the loan portfolio, which was an increase of \$330,000 from the same period in 2003, primarily as a result of the increase in total loans outstanding as well as an increase in the percentage of commercial loans in the Company's portfolio. The allowance for loan losses at March 31, 2004, was \$3.3 million or 0.79% of total loans outstanding, versus \$2.8 million at December 31, 2003, or 0.69% of total loans outstanding. Management believes the allowance for loan losses at March 31, 2004 is adequate.

Other Income. Other income increased \$71,000 or 11.7% from \$607,000 for the three-month period ended March 31, 2003, to \$678,000 for the same period in 2004. The increase in other income was primarily due to increases of \$52,000, \$170,000 and \$81,000 in gain on sale of loans held for sale, service charges and fees and other income, respectively, partially offset by a decrease of \$196,000 in gain on sale of securities available for sale. The increase in gain on sale of loans held for sale is due to the Company selling more loans during 2004, as compared to 2003. The increase in service charges and fees primarily resulted from an increase in prepayment fees earned during 2004. The increase in other income resulted from an increase in earnings on bank-owned life insurance.

Table of Contents

Other Expense. Other expense increased \$208,000 or 9.7%, to \$2.3 million for the three-month period ended March 31, 2004, from \$2.1 million for the same period in 2003. Salary and employee benefits increased \$73,000, occupancy expense increased \$74,000 and professional services increased \$107,000 due to an increase in commercial lending personnel and the overall growth of the Company.

Income Taxes. Income taxes for the three months ended March 31, 2004, was \$377,000 (an effective rate of 31.8%), compared to \$316,000 (an effective rate of 32.6%) for the same period in 2003.

Comparison of the Years Ended December 31, 2003 and 2002

General. The Company had net earnings for 2003 of \$2.8 million, or \$0.42 per basic and diluted share compared to net earnings of \$2.1 million or \$0.34 per basic and diluted share for 2002. The improvement in the net earnings in 2003 was due to an increase in net interest income, partially offset by an increase in other expenses.

Interest Income. Interest income was \$20.9 million in 2003, compared to \$19.5 million in 2002. Interest income on loans increased to \$19.6 million in 2003, from \$18.3 million in 2002. The increase in interest income on loans in 2003, was primarily attributable to an increase in the average amount of loans outstanding during the year offset partially by a decrease in yield earned on loans. Interest income on securities increased to \$1.1 million in 2003, from \$735,000 in 2002, as a result of an increase in the average balance of securities held by the Company partially offset by a decrease in yield earned on the securities. Other interest income decreased from \$368,000 in 2002, to \$218,000 during 2003. Management expects the yield earned on the portfolios to fluctuate with general market interest rate movements and economic conditions.

Interest Expense. Interest expense decreased during 2003, to \$9.8 million compared to \$11.0 million in 2002 primarily due to a decrease in the average cost paid partially offset by an increase in the average amount of deposit accounts and borrowings outstanding. Interest expense on deposits decreased by \$1.4 million in 2003 as a result of a decrease in average cost paid on deposits partially offset by an increase in the average amount of deposits. Interest expense on these accounts will increase or decrease according to the general level of interest rates. Interest on borrowings increased to \$2.7 million in 2003, from \$2.5 million in 2002 due to an increase in the amount of borrowings outstanding, partially offset by a decrease in the average cost paid for borrowings. Management expects to continue to use FHLB advances and other borrowings to provide a source of liquidity and as a liability management tool.

Provisions for Loan Losses. A provision for loan losses is charged to earnings based upon management's evaluation of the inherent losses in its loan portfolio. The Company's provision for loan losses for 2003 was \$650,000, compared to \$445,000 in 2002. The Company's net loan portfolio grew by \$89.8 million, or 29% in 2003. Of this amount, \$55.8 million were residential mortgage loans. As of December 31, 2003, 75.4% of the Company's gross loan portfolio was residential mortgage loans, which historically have had the lowest risk of loss in the overall portfolio, and as a result have had a lower reserve percentage applied to them based on historical loss percentages.

Total charge-offs were \$31,000 in 2003, compared to recoveries of \$50,000 on loans previously charged-off. For 2002, total charge-offs and recoveries were \$258,000 and \$158,000, respectively. At December 31, 2003, the allowance for loan losses was \$2.8 million, or 0.70%, of year-end loans compared to \$2.1 million, or 0.69%, of loans at December 31, 2002. Total nonaccrual loans at December 31, 2003 were \$6.4 million compared to \$5.6 million at December 31, 2002. The amount needed in the allowance for loan losses for nonaccrual loans is based on the particular circumstances of the individual loan, including the type, amount, and value of the collateral, if any, and the overall composition and amount of the performing loans in the portfolio at the time of evaluation, and, as a result, will vary over time.

Table of Contents

Other Income. Other income decreased slightly to \$2.4 million for the year ended December 31, 2003. Increased gains on sales of loans held for sale and securities were offset by decreased other income. Other income declined in 2003, due to a decrease in loan servicing income related to the significant residential loan refinancing activity during 2003 together with the Company's decision to have a third party service the Company's residential mortgage loan portfolio.

Other Expense. Other expense increased to \$8.8 million in 2003, from \$7.3 million in 2002. The increase was the result of increased salary and employee benefits expense, occupancy expenses, professional services and data processing expense. The increase in salary and employee benefits of \$583,000 was the result of additions to staff in 2003, due to the growth of the Company and the opening of three new branches in December 2002, June 2003 and October 2003, which also caused occupancy expense to increase. In addition, staff was added in the commercial loan department as part of the Company's strategy to increase non-residential real estate lending. Data processing expense increased as a result of an increase in the number of accounts and the opening of the new branches.

Income Taxes. Income taxes increased from \$1.0 million (an effective tax rate of 33.5%) in 2002, to \$1.3 million (an effective tax rate of 31.5%) in 2003. The effective tax rate decreased in 2003 due to an increase in tax-exempt income in 2003.

Comparison of the Years Ended December 31, 2002 and 2001

General. The Company had net earnings for 2002 of \$2.1 million or \$0.34 per basic and diluted share compared to net earnings of \$1.3 million, or \$0.25 per basic and diluted share for 2001. The improvement in the net earnings in 2002 was due to an increase in net interest income, partially offset by an increase in other expenses.

Interest Income. Interest income was \$19.5 million in 2002 compared to \$20.0 million in 2001. Interest income on loans decreased to \$18.3 million in 2002 from \$19.2 million in 2001. The decrease in interest income on loans in 2002, was primarily attributable to a decrease in the yield earned on loans offset partially by an increase in the average amount of loans outstanding during the year. Interest income on securities increased to \$735,000 in 2002 from \$363,000 in 2001, as a result of an increase in the average balance of securities held by the Company partially offset by a decrease in the yield earned on the securities. Other interest income increased from \$352,000 in 2001 to \$368,000 during 2002.

Interest Expense. Interest expense decreased during 2002 to \$11.0 million, compared to \$13.3 million in 2001 primarily due to a decrease in the average cost paid partially offset by an increase in the average amount of deposit accounts and FHLB advances outstanding. Interest expense on deposits decreased by \$2.0 million in 2002, as a result of a decrease in average cost paid on deposits partially offset by an increase in the average amount of deposits. Interest expense on these accounts will increase or decrease according to the general level of interest rates. Interest on FHLB advances and other borrowings decreased to \$2.5 million in 2002, from \$2.8 million in 2001 due to decreases in both the average cost paid on the advances and borrowings and in the amount of advances and other borrowings outstanding. Management expects to continue to use FHLB advances and other borrowings when the market rates and investment opportunities are available.

Provisions for Loan Losses. A provision for loan losses is generally charged to earnings based upon management's evaluation of the inherent losses in its loan portfolio. The Company's provision for loan losses for 2002 was \$445,000 compared to \$540,000, in 2001. The Company's gross loan portfolio grew by \$36.6 million in 2002. Residential mortgage loans grew \$42.5 million, while construction loans declined by \$20.0 million and commercial real estate loans increased \$12.5 million. As of December 31, 2002, 79.2% of the Company's gross loan portfolio was residential mortgage loans, which historically have had the lowest risk of loss in the overall portfolio, and as a result have had a lower reserve percentage applied to them based on historical loss percentages.

Table of Contents

Gross charge-offs totaled \$258,000 in 2002, compared to \$425,000 for 2001. Loan recoveries for 2002 and 2001 were \$158,000 and \$16,000, respectively. At December 31, 2002, the allowance for loan losses was \$2.1 million, or 0.69% of loans. Total nonaccrual loans at December 31, 2002 were \$5.6 million, compared to \$3.6 million at December 31, 2001. The amount needed in the allowance for loan losses for nonaccrual loans is based on the particular circumstances of the individual loan, including the type, amount, and value of the collateral, if any, and the overall composition and amount of the performing loans in the portfolio at the time of evaluation, and, as a result, will vary over time.

Other Income. Other income increased slightly to \$2.4 million for the year ended December 31, 2002. The increase in 2002 was the result of increased rental income and gains on sales of securities available for sale offset partially by decreased gains on sales of loans held for sale. Rental income increased due to a full year of recognized sub-lease income on agreements entered into during 2001.

Other Expense. Other expense increased to \$7.3 million in 2002, from \$6.5 million in 2001. The increase was the result of increased salary and employee benefits expense, occupancy expense and data processing expense, offset partially by decreased professional services expense. The increase in salary and employee benefits of \$637,000 was the result of additions to staff in 2002, due to the growth of the Company and the opening of a new branch, which also caused occupancy expense to increase. In addition, staff was added in the commercial loan department as part of the Company's strategy to increase non-real estate commercial lending. Data processing expense increased as a result of an increase in the number of accounts and the opening of the new branch.

Income Taxes. Income taxes increased from \$716,000 (an effective tax rate of 36.1%) in 2001 to \$1.0 million (an effective tax rate of 33.5%) in 2002. The effective tax rate decreased in 2002 due to an increase in tax-exempt income being recognized during the year.

Asset /Liability Management

The Company's profitability, like that of most holding companies and financial institutions, is dependent to a large extent upon its net interest income, which is the difference between its interest income on interest-earning assets, such as loans, mortgage-backed securities and other investment securities, and its interest expense on interest-bearing liabilities, such as deposits and other borrowings. Financial institutions are affected by changes in levels of market interest rates and other economic factors beyond their control. At December 31, 2003, the Company's one-year interest sensitivity gap (the difference between the amount of interest-earning assets anticipated by the Company to mature or reprice within one year and the amount of interest-bearing liabilities anticipated by the Company to mature or reprice within one year) as a percentage of total assets was a negative 36.6%. Generally, an institution with a negative gap would experience a decrease in net interest income in a period of rising interest rates or an increase in net interest income in a period of declining interest rates since there will be more liabilities than assets that will either mature or be subject to repricing within the one-year period. However, certain shortcomings are inherent in this rate sensitivity analysis. For example, although certain assets and liabilities may have similar maturities or periods to repricing, they may react in different manners to changes in market interest rates. Therefore, no assurance can be given that the Company will be able to maintain its net interest-rate spread as market interest rates fluctuate.

The Company monitors its interest-rate risk through the Asset/Liability Committee which meets bi-weekly and reports the results of such monitoring quarterly to the Board of Directors. The Company's policy is to seek to maintain a balance between interest-earning assets and interest-bearing liabilities so that the Company's cumulative one-year gap is within a range established by the Board of Directors and which management believes is conducive to maintaining profitability without incurring undue risk. The Company has increased its investment in adjustable-rate and shorter average-life loans and mortgage-related securities in order to position itself for changing interest rates.

Table of Contents

The following table sets forth the amounts of interest-earning assets and interest-bearing liabilities outstanding at December 31, 2003 that are expected to reprice, based upon certain assumptions and contractual maturities, in each of the future periods shown. Adjustable-rate mortgage-backed securities are scheduled according to their next adjustment date and fixed-rate mortgage-backed securities are scheduled according to their maturity date.

Recent Pronouncements

Edgar Filing: - Form

In November 2002, the Financial Accounting Standards Board (the FASB) issued Interpretation No. 45, *Guarantor s Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness to Others* (FIN 45), which expands previously issued accounting guidance and disclosure requirements for certain guarantees. FIN 45 requires the Company to recognize an initial liability for the fair value of an obligation assumed by issuing a guarantee. The

Table of Contents

provision for initial recognition and measurement of the liability is applied on a prospective basis to guarantees issued or modified after December 31, 2002. The adoption of FIN 45 did not have a material effect on the Company's consolidated financial statements.

In June 2002, the FASB issued SFAS No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*, to provide guidance on the recognition and measurement of liabilities for costs associated with exit or disposal activities. SFAS No. 146 is effective for exit and disposal activities that are initiated after December 31, 2002. The adoption of this Statement had no effect on the Company's consolidated financial statements.

In April 2003, the FASB issued SFAS No. 149, *Amendment of Statement 133 on Derivative Instruments and Hedging Activities*. This Statement amends and clarifies financial accounting and reporting for derivative instruments, including certain derivative instruments embedded in other contracts (collectively referred to as derivatives) and for hedging activities under FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*. This Statement is effective for contracts entered into or modified after June 30, 2003. The adoption of this Statement had no effect on the Company's consolidated financial statements.

In May 2003, the FASB issued SFAS No. 150, *Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity*. This Statement establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. This Statement is effective for financial instruments entered into or modified after May 31, 2003, and otherwise is effective at the beginning of the first interim period beginning after June 15, 2003. The adoption of this Statement had no effect on the Company's consolidated financial statements.

Impact of Inflation and Changing Prices

The financial statements and related data presented herein have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP), which require the measurement of financial position and operating results in terms of historical dollars, without considering changes in the relative purchasing power of money over time due to inflation. Unlike most industrial companies, substantially all of the assets and liabilities of the Company are monetary in nature. As a result, interest rates have a more significant impact on the Company's performance than the effects of general levels of inflation. Interest rates do not necessarily move in the same direction or in the same magnitude as the prices of goods and services, since such prices are affected by inflation to a larger extent than interest rates.

Table of Contents**MANAGEMENT****Executive Officers and Directors of Federal Trust and the Bank**

The following table sets forth information with respect to Federal Trust's and the Bank's executive officers and directors.

Name	Position with Federal Trust	Position with the Bank
Jennifer B. Brodnax	Assistant Corporate Secretary	SVP of Branch Administration
Dr. Samuel C. Certo	Director	Director
George W. Foster	Director	Director
Stephen C. Green	None	EVP & Chief Operating Officer
A. Stewart Hall, Jr.	None	Director
Dennis J. Harward	None	Director
Kenneth W. Hill	Director	Director
A. George Iglar	Vice Chairman	None
Thomas J. Punzak	None	VP & Treasurer
Daniel C. Roberts	None	SVP & Chief Credit Officer
Gregory E. Smith	EVP & Chief Financial Officer	EVP & Chief Financial Officer
James V. Suskiewich	President, Chief Executive Officer & Chairman of the Board	President, Chief Executive Officer & Chairman of the Board

Information regarding the experience and expertise of these executive officers and directors is set forth below.

Jennifer B. Brodnax started her banking career in June 1987 with the Bank, while it was still in organization. She has served in various management capacities including the oversight of the accounting functions and operations. She presently serves as Senior Vice President of Branch Administration, responsible for all branch operations. Ms. Brodnax resides in Winter Park, Florida.

Dr. Samuel C. Certo has been a director of Federal Trust since 1997 and a director of the Bank since 1996. He is the former Dean and a Professor of Management in the Crummer Graduate School of Business at Rollins College in Winter Park. Since 1986, Dr. Certo has served as a business consultant and has published textbooks in the areas of management and strategic management. Dr. Certo resides in Longwood, Florida.

George W. Foster is a retired banker and has been a director of Federal Trust since 1997 and a director of the Bank since 1990. From 1990 through 1993, he served as President and Chief Executive Officer of Federal Trust Bank. Mr. Foster resides in Longwood, Florida.

Stephen C. Green has been in banking since 1973, principally involved in corporate and commercial lending. He has served in various management capacities including Senior Lending Officer, Chief Credit Officer, and Region President with large regional banks. He has served in his current capacity with the Bank since November 2000. Mr. Green resides in Longwood, Florida.

Edgar Filing: - Form

A. Stuart Hall, Jr. has been a director of the Bank since September 2003. He has been Chairman of Ashcorp, Inc. since 2001. He was also President and Chief Operating Officer of Hughes Supply, Inc. from 1973 to 2001. Mr. Hall resides in Orlando, Florida.

Table of Contents

Dennis J. Harward has been a director of the Bank since May 1999. He is the President and Chief Executive Officer of Innoprise Software, Inc., which provides software programs to the public sector and utility companies. Mr. Harward resides in Orlando, Florida.

Kenneth W. Hill has been a director of Federal Trust since 1997 and a director of the Bank since 1995. Mr. Hill was the Vice President and Trust Officer of SunBank, N.A., Orlando, Florida from 1983 through 1995. Mr. Hill resides in Orlando, Florida.

A. George Iglar was elected to the Board in October, 2001. Since 1992, he has been a principal in the law firm of Iglar & Dougherty, P.A., which specializes in banking, corporate and securities law. Iglar & Dougherty, P.A. has served as the Federal Trust's corporate counsel since 1993. Mr. Iglar resides in Tallahassee, Florida.

Thomas J. Punzak is Vice President/Treasurer for Federal Trust Bank and began his career with the Bank in June 1992. He has 18 years of experience in the banking and mortgage banking industries, including in the accounting, loan servicing and operations areas. He is a licensed CPA in Florida with auditing experience dealing primarily with banking clients while employed with a large CPA firm. Mr. Punzak resides in Winter Springs, Florida.

Daniel C. Roberts has been in banking since 1974, principally as a regulator, and in various aspects of credit review, credit administration, underwriting and approval. He has served in various management capacities including Chief Credit Officer, and in the loan review, underwriting and approval functions with large regional banks. He has served in his current capacity since March 2001. Mr. Roberts resides in Lake Mary, Florida.

Gregory E. Smith joined Federal Trust in April 2003. He has worked in both large and small commercial banks and savings associations in Florida since 1979. His prior banking experience includes being President, Chief Operating Officer, Chief Financial Officer and director. Mr. Smith is a CPA and he started his career with a large CPA firm in New York, where he was a bank specialist. Mr. Smith resides in Winter Springs, Florida.

James V. Suskiewich has been a director of Federal Trust since 1994 and is currently Chairman of the Board. He has served as President and Chief Executive Officer of Federal Trust since July 1996. Since January 1993, he has been President, Chief Executive Officer and a director of the Bank. Mr. Suskiewich resides in Lake Mary, Florida.

DESCRIPTION OF BUSINESS

General

Federal Trust was organized in February 1989 for the purpose of becoming the unitary savings and loan holding company of the Bank, a federally-chartered stock savings bank. Federal Trust, the Bank and the Bank's subsidiaries are collectively referred to herein as the Company. Federal Trust's main office is located in Sanford, Florida. Federal Trust conducts business as a savings and loan holding company, and its principal asset is the capital stock of the Bank. As a savings and loan holding company, Federal Trust has greater flexibility than the Bank to

Edgar Filing: - Form

diversify and expand its business activities, either through newly formed subsidiaries or through acquisitions.

Federal Trust is a legal entity separate from the Bank. Federal Trust's executive offices are located at 312 West First Street, Sanford, Florida 32771, and its telephone number is (407) 323-1833.

Table of Contents

The principal source of Federal Trust's revenues on an unconsolidated basis is earnings of the Bank. Various regulatory restrictions and tax considerations limit, directly or indirectly, the amount of dividends the Bank can pay to Federal Trust. In addition, federal law restricts the Bank in the making of investments in or loans to Federal Trust or its affiliates. See Regulation and Supervision.

Subsidiary

Federal Trust Bank is chartered as a Federal-stock savings bank and is primarily engaged in the business of obtaining funds in the form of deposits and Federal Home Loan Bank (FHLB) advances and investing such funds in permanent loans on residential and commercial real estate, in various types of commercial, construction and consumer loans and in investment securities.

The FDIC, an agency of the United States Government, insures through the Savings Association Insurance Fund (SAIF), all depositors of the Bank up to \$100,000 in accordance with the rules and regulations of the FDIC. The Bank is subject to comprehensive regulation, examination and supervision by the OTS and the FDIC, which is intended primarily for the benefit of depositors. See Regulation and Supervision.

Other Entity

In September 2003, Federal Trust Statutory Trust I (the Statutory Trust I) was formed for the sole purpose of issuing \$5,000,000 of trust preferred securities. In accordance with Financial Accounting Standards Interpretation No. 46 *Consolidation of Variable Interest Entities* (as revised December 2003), Federal Trust accounts for the Statutory Trust I under the equity method of accounting.

Critical Accounting Policies

Our financial condition and results of operations are sensitive to accounting measurements and estimates of matters that are inherently uncertain. When applying accounting policies in areas that are subjective in nature, we use our best judgment to arrive at the carrying value of certain assets. The most critical accounting policy we applied is related to the valuation of the loan portfolio.

A variety of factors impact the carrying value of the loan portfolio including the calculation of the allowance for loan losses, the valuation of underlying collateral, the timing of loan charge-offs and the amount and amortization of loan fees and deferred origination costs.

We believe that the determination of the allowance for loan losses represents a critical accounting policy. The allowance for loan losses is maintained at a level management considers to be adequate to absorb probable loan losses inherent in the portfolio, based on evaluations of the collectibility and historical loss experience of loans. Credit losses are charged and recoveries are credited to the allowance. Provisions for loan losses are based on our review of the historical loan loss experience and such factors which, in management's judgment, deserve consideration under existing economic conditions in estimating probable credit losses. The allowance is based on ongoing assessments of the probable estimated losses inherent in the loan portfolio. Our methodology for assessing the appropriate allowance level consists of several key elements described below.

Edgar Filing: - Form

Larger commercial loans that exhibit probable or observed credit weaknesses are subject to individual review. Where appropriate, reserves are allocated to individual loans based on our estimate of the borrower's ability to repay the loan given the availability of collateral, other sources

Table of Contents

of cash flows, and available legal options. Included in the review of individual loans are those that are impaired as provided in Statement of Financial Accounting Standards No. 114, *Accounting by Creditors for Impairment of a Loan* as amended. Any specific reserves for impaired loans are measured based on the fair market value of the underlying collateral. We evaluate the collectibility of both principal and interest when assessing the need for a special reserve. Historical loss rates are applied to other commercial loans not subject to specific reserve allocations.

Homogenous loans, such as residential mortgage loans, are not individually reviewed by management. Reserves are established for each pool of loans based on the delinquency trends and expected net charge-offs. Loss rates are based on the average net charge-off history by loan category.

Historical loss rates for commercial and consumer loans may be adjusted for significant factors that, in management's judgment, reflect the impact of any current conditions or loss recognition. Factors which management considers in the analysis include the effects of the local economy, trends in the nature and volume of loans (delinquencies, charge-offs, nonaccrual and problem loans), changes in the internal lending policies and credit standards, collection practices, and examination results from bank regulatory agencies and our internal credit review function. An unallocated reserve is maintained to recognize the imprecision in estimating and measuring loss when evaluating reserves for individual loans or pools of loans. Specific reserves on individual loans and historical loss rates are reviewed throughout the year and adjusted as necessary based on changing borrower and collateral conditions and actual collection and charge-off experience.

Based on the procedures discussed above, management believes that the allowance for loan losses was adequate to absorb estimated loan losses associated with the loan portfolio at March 31, 2004 and December 31, 2003. Actual results could differ from these estimates. However, since the allowance is affected by management's judgment and uncertainties, there is the likelihood that materially different amounts would be reported under different conditions or assumptions. To the extent that the economy, collateral values, reserve factors, or the nature and volume of problem loans change, we may need to adjust the provision for loan losses. Material additions to our provision for loan losses would result in a decrease in net earnings and capital.

The allowance for loan losses is also discussed as part of *Results of Operations* and in Note 3 to the consolidated financial statements. The significant accounting policies are discussed in Note 1 to the consolidated financial statements.

Operating Strategy

Our current operating strategy is to build a community bank branch network serving Central Florida through the origination and bulk purchase of residential mortgage loans, and expansion of a commercial loan portfolio. Residential loans are typically secured by a first mortgage on a dwelling and commercial loans are secured by real estate and, where appropriate, the working assets of the borrower (such as accounts receivable, inventory, and equipment). To a lesser extent, we provide loans to consumers secured by the equity in their homes.

Our lending activities are funded through core deposit generation fostered by branch expansion, borrowings from the Federal Home Loan Bank, and in the secondary market when rates are favorable. To the extent possible, we attempt to control interest rates paid on deposits; however, outside factors such as economic, environmental, competitive and liquidity needs will have an effect on the cost of deposits. Our principal sources of earnings are interest on loans, securities, and overnight deposits, fees on checking and loan accounts and sales of loans and investments held for

Table of Contents

sale. Our principal expenses are interest paid on deposits and other borrowings and operating expenses.

Market Area and Competition

We have six offices: in Sanford, Winter Park, New Smyrna Beach, Casselberry, Deltona and Orange City, Florida. Sanford, which is located approximately 20 miles northeast of downtown Orlando, is the second largest city in Seminole County and is the County seat. The City of Winter Park is located 13 miles southeast of Sanford and approximately 7 miles northeast of downtown Orlando, in the heart of the greater metropolitan Orlando area which encompasses Orange, Seminole, Lake, and Osceola Counties in Central Florida. The total population of the four County area is estimated at 1.6 million, with the majority in Orange and Seminole Counties. Casselberry is located in Seminole County between our Sanford and Winter Park Offices. New Smyrna Beach is located in Volusia County on the Atlantic Ocean approximately 33 miles northeast of our Sanford office and 15 miles south of Daytona Beach, Florida. Deltona and Orange City are both located in the western part of Volusia County along the Interstate 4 corridor between Orlando and Daytona Beach. Our administrative and operations offices are located in Sanford.

Our primary market area is Orange, Seminole and Volusia Counties. Although best known as a tourist destination, with over 20 million visitors a year, the Central Florida area has become a center for industries such as aerospace and defense, electro-optics and lasers, computer simulated training, computer networking and data management. In addition, motion picture production, professional and amateur sports, and distribution make the local economy more diverse each year. Many companies, including some in the Fortune 500, have chosen the greater Orlando area as a base for corporate, regional, and divisional headquarters. The area is also home to the University of Central Florida, the second largest state university in Florida, with an enrollment of 36,000, one of the fastest growing schools in the state university system, as well as Valencia Community College and Seminole Community College whose combined enrollment exceeds 85,000. Winter Park is home to Rollins College, the oldest college in Florida founded in 1885. In addition, Stetson University, Florida's first private university, is located in Volusia County.

We experience substantial competition in attracting and retaining deposits and in lending funds. The primary factors in competing for deposits are customer service, branch locations and interest rates. Direct competition for deposits comes from other savings institutions, commercial banks and nontraditional financial service providers, including insurance companies, consumer finance companies, brokerage houses and credit unions. Additional significant competition for deposits comes from corporate and government securities and money market funds. The primary factors in competing for loans are loan structure, interest rates and loan origination points. Competition for origination of real estate loans normally comes from other savings institutions, commercial banks, mortgage bankers, insurance companies and real estate investment trusts.

Consolidation within the banking industry, and in particular within Florida, has been dramatic over the past eight years. As of June 30, 2003, the four largest banking institutions in the state controlled approximately 50% of the bank deposits. In 1994, the four largest controlled less than 29% of the deposits.

Geographic deregulation also has had a material impact on the banking industry. Legislation in Florida and on the national level has removed most of the final barriers to interstate banking. Under Florida Law, bank holding companies are permitted to acquire existing banks across state lines. A bank holding company may now consolidate its interstate subsidiary banks into branches and merge with a bank in another state, depending on state laws.

Table of Contents

Lending Activities

General. Residential lending includes the origination and purchase of mortgage loans for purchasing or constructing residential real property, primarily secured by first liens on such property. These loans are typically conventional loans which are not insured by the Federal Housing Agency (FHA) or partially secured by the Veterans Administration (VA). Loans with fixed rates beyond five years are generally sold into the secondary market. Loans with fixed rates of five years or less are considered for portfolio. Interest rates for construction loans are tied to the prime rate and float daily during the construction period and are fixed upon completion. To a lesser extent, we also make home equity loans which generally float daily with the prime rate. Other consumer related loans are savings loans secured by certificates of deposit at an interest rate above the rate paid on the certificate.

As part of our strategy, we have emphasized commercial lending during the past three years. Commercial loans are comprised of loans to small businesses secured by real estate used in the enterprise and, where appropriate, the working assets of the business. We also make commercial real estate loans for the acquisition and development of undeveloped land, and income producing properties. Commercial loans are priced on a floating prime rate basis or fixed at repricing intervals not to exceed five years. As a matter of policy, commercial loans are guaranteed by the borrowers principals.

Credit Risk. Since our primary business is the origination and acquisition of loans, that activity entails potential credit losses, the magnitude of which depends on a variety of economic factors affecting borrowers which are beyond the control of the Bank. While guidelines have been instituted and credit review procedures have been put in place to protect us from credit losses, some losses may inevitably occur.

Short-term balloon mortgage loans are sometimes used to allow borrowers the option of waiting until interest rates are more favorable for a long-term fixed rate loan. If interest rates rise, these loans may require renewals if borrowers fail to qualify for a long-term fixed rate loan at maturity and there is no assurance that a borrower's income will be sufficient to service the renewal. Management recognizes the risks associated with this type of lending, but we believe that the policies and procedures that we have in place lowers the general risk.

Loan Portfolio Composition. Our net loan portfolio, which is total loans plus premiums paid for loans purchased less loans in process, deferred loan origination fees and costs and allowance for loan losses, totaled \$413.9 million at March 31, 2004, representing 86% of total assets at such date, and \$398.4 million at December 31, 2003, representing 85% of total assets at such date. At December 31, 2002, our net loan portfolio was \$308.6 million or 84% of total assets.

Residential mortgage loans, not including construction loans, comprise the largest group of loans in our loan portfolio, amounting to \$305.6 million or 73.4% and \$302.1 million or 75.4% of the total loan portfolio at March 31, 2004, and December 31, 2003, respectively. We offer fixed-rate and ARM loans with maturities up to 30 years. As of March 31, 2004, and December 31, 2003, approximately 89% and 86%, respectively, of these loans were ARM loans and 11% and 14%, respectively, of these loans were fixed-rate. Fixed-rate loans are generally underwritten to secondary market standards to ensure liquidity and interest rate risk protection.

Commercial real estate loans, including land loans, amounted to \$89.6 million or 21.5% and \$78.2 million or 19.5% of the total loan portfolio at March 31, 2004 and December 31, 2003, respectively. Commercial real estate loans consist of \$47.4 million of loans secured by other

Table of Contents

non-residential property and \$30.8 million of loans secured by land which is developed or being developed as of December 31, 2003.

Construction loans amounted to \$7.1 million or slightly less than 2% of total loans at both March 31, 2004 and December 31, 2003. The Company makes residential and commercial real estate construction loans usually on property throughout Central Florida.

At March 31, 2004 and December 31, 2003, consumer loans, consisting of installment loans and savings account loans, amounted to \$930,000 and \$864,000 or 0.2%, respectively, of the total loan portfolio.

Commercial loans at March 31, 2004 and December 31, 2003, amounted to \$13.4 million or 3.2% and \$12.4 million or 3.1%, respectively, of total loans. Commercial loans are generally secured by the assets of the borrower including accounts receivable, inventory, fixed assets and company owned real estate, and are also usually guaranteed by the owners.

The following table sets forth information on our loan portfolio by type.

	At March 31,						At December 31,

Contractual Repayments. Scheduled contractual principal repayments of loans do not reflect the actual life of such assets. The average life of loans is substantially less than their average contractual terms because of prepayments. In addition, due-on-sale clauses on loans generally give us the right to declare a conventional loan immediately due and payable in the event, among other things, that the borrower sells the real property subject to the mortgage and the loan is not repaid. The average life of mortgage loans tends to increase, however, when current mortgage loan rates are substantially higher than rates on existing mortgage loans and, conversely, decrease when rates on

Table of Contents

existing mortgages are substantially higher than current mortgage loan rates. As of both March 31, 2004 and December 31, 2003, we had \$7.1 million in construction loans, the majority of which mature in one year or less.

The following table shows the contractual maturities of the Bank's loan portfolio. Loans that have adjustable rates are shown as amortizing to final maturity rather than when the interest rates are next subject to change. The table does not include prepayments or scheduled principal repayments.

Purchase, Origination, and Sale of Loans. Historically, Florida has experienced a rate of population growth in excess of national averages. However, the real estate development and construction industries in Florida have been sensitive to cyclical changes in economic conditions and the demand for and supply of residential units. Our real estate mortgage loan origination volume could be affected by changes in interest rates and in the real estate development and construction industries.

Our loan portfolio consists of purchased and originated loans. When loans are acquired in the secondary market, we generally purchase loan packages of \$5 million to \$25 million of single-family residential mortgages, comprised of new and seasoned adjustable rate mortgage (ARM) loans. While we prefer to purchase loan packages comprised of Florida real estate, because of pricing and the limited number of Florida loan packages that are available, we also purchase packages of loans outside of Florida. The loan packages undergo an individual loan underwriting review prior to purchase.

Loans that we originate are generally on real estate located in our primary lending area of Central Florida. Sources for residential mortgage loan originations include direct solicitation by employed loan originators, depositors, other existing customers, advertising and referrals from real

Edgar Filing: - Form

estate brokers, mortgage brokers and developers. Our residential mortgage loans are originated in accordance with written underwriting standards approved by the Board of Directors. Most fixed rate loan originations are eligible for sale to Fannie Mae and other investors in the secondary market. In addition, if the size of a particular loan request exceeds our legal or internal lending limit, we may seek to sell a participation in that loan to a correspondent bank. From time to time, we also purchase participations from our correspondents.

Consumer loan originations are attributable largely to depositors and walk-in customers and referrals, while commercial and commercial real estate loan originations are primarily attributable to

Table of Contents

our loan officers and referrals. All loan applications are evaluated by staff at the administrative and operations office in Sanford to ensure compliance with our underwriting standards. See Lending Activities - Loan Portfolio Composition - Loan Underwriting Policies.

The following table sets forth the amount of loans originated, purchased, sold and repaid during the periods indicated (in thousands).

	Three Months Ended		For the Year Ended December 31,

Loan Underwriting. Lending activities are subject to underwriting standards and loan origination procedures prescribed by our Board of Directors and management. Loan applications are obtained to determine the borrowers' ability to repay, and the more significant items on these applications are verified through the use of credit reports, financial statements and confirmations. Our lending policy for real estate loans requires that collateral be appraised by an independent, outside appraiser approved by the Board of Directors.

Loans are approved at various management levels up to and including the Loan Committee of the Board of Directors. Loan approvals are made in accordance with a Chart of Delegated Authority approved by our Board of Directors. Generally, loans less than \$300,000 are approved jointly by authorized officers and underwriters. Loans in excess of \$300,000 to \$2,000,000 require the concurrence of three or more authorized officers. Loans greater than \$2,000,000 require approval of the Board of Directors' Loan Committee. For loan approvals, the aggregate loans to the borrower and their related interest are used for determination of the appropriate lending authority required for any new loans or renewals.

Edgar Filing: - Form

To ensure that underwriting standards and loan policies are being followed, an internal loan review process has been put in place. Additionally, the Company's external auditor and the OTS perform independent testing of the Bank's underwriting and credit quality.

Table of Contents

General Lending Policies. Our policy for real estate loans is to have a valid mortgage lien on real estate securing a loan and to obtain a title insurance policy, which ensures the validity and priority of the lien. Borrowers must also obtain hazard insurance policies prior to closing, and when the property is in a flood prone area, flood insurance is required.

We are permitted to lend up to 100% of the appraised value of real property securing a mortgage loan. However, if the amount of a conventional, residential loan (including a construction loan or a combination construction and permanent loan) originated or refinanced exceeds 90% of the appraised value, federal regulations require that private mortgage insurance be obtained on that portion of the principal amount of the loan that exceeds 80% of the appraised value of the property. We originate single-family residential mortgage loans up to a 97% loan-to-value ratio if the required private mortgage insurance is obtained. Loans over 97% loan-to-value ratio, if originated, are under special community support programs or one of the Federal Housing Administration, Veterans Administration or USDA Rural Housing Service or insurance programs. The loan-to-value ratio on a home loan secured by a junior lien generally does not exceed 100%, including the amount of the first mortgage on the collateral. With respect to home loans granted for construction or combination construction/permanent financing, we will lend up to 95% of the appraised value of the property on an "as completed" basis. The loan-to-value ratio on multi-family residential and commercial real estate loans is generally limited to 80% of value. Consumer loans are considered to be loans to natural persons for personal, family or household purposes, and these loans may be unsecured, secured by personal property or secured by liens on real estate which, when aggregated with prior liens, equals or exceeds the appraised value of the collateral property.

The maximum amount that could have been loaned by the Bank to one borrower and the borrower's related entities at March 31, 2004, was approximately \$4.8 million. We have no loans in our portfolio that exceed our loans to one borrower limit.

Federal savings and loan association regulations permit the Bank to invest in loans secured by non-residential or commercial real estate in the aggregate, up to four times our regulatory capital. At March 31, 2004, this limit allowed us to invest in non-residential or commercial real estate loans in an aggregate amount up to \$128.2 million. At such date, we had \$89.6 million in loans secured by non-residential or commercial real estate.

The risk of non-payment of loans is inherent in all loans. However, we carefully evaluate all loan applicants and attempt to minimize our credit risk exposure by use of thorough loan application and approval procedures that we have established for each category of loan. In determining whether to make a loan, we consider the borrower's credit history, analyze the borrower's income and ability to service the loan, and evaluate the need for collateral to secure recovery in the event of default. An allowance for loan losses is maintained based upon assumptions and judgments regarding the ultimate collectibility of loans in our portfolio and a percentage of the outstanding balances of specific loans when their ultimate collectibility is considered questionable.

Residential Real Estate Loans. We make adjustable or fixed interest rate residential real estate loans to qualified individuals for the purchase of existing single-family residences in our principal markets. We also purchase loan packages in the secondary market. We make these loans in accordance with our underwriting policy which is focused on debt-to-income and loan-to-value ratios, and the borrower's credit score. We believe our underwriting standards are sufficient to insulate us from fluctuations in real estate market values and will minimize losses that could result from a downturn in the residential real estate market. We sell mortgage loans that do not meet our portfolio criteria in the secondary markets. The risk of these loans depends on our ability to sell the loans to national investors and on the frequency of interest rate changes.

Table of Contents

We limit interest rate risk and credit risk on these loans by locking in the interest rate for fixed rate loans with a secondary market investor and receiving the investor's underwriting approval before originating the loan. Adjustable rate loans are retained for our portfolio when rates and other loan terms are favorable to retain the loans. The loan underwriting standards and policies are generally the same for both loans sold in the secondary market and those retained in our portfolio.

Commercial Real Estate Loans. Commercial real estate loans are offered to developers of both commercial and residential properties, as well as to small businesses. Interest rates may be fixed or adjustable. We manage credit risk associated with these loans by actively monitoring such measures as advance rate, cash flow, collateral value and other appropriate credit factors. Risks associated with commercial real estate loans include the general risk of the failure of the commercial borrower, which are different for each type of business and commercial entity. We evaluate each business on an individual basis. We attempt to reduce credit risks in the commercial real estate loan portfolio by emphasizing loans on owner-occupied office and retail buildings where the loan-to-value ratio, established by independent appraisals, does not exceed 80%. In addition, we typically require personal guaranties of the principal owners.

Construction and Development Loans. Construction and development loans are made on both a pre-sold and speculative basis, and are generally at a floating interest rate. If the borrower has entered into an arrangement to sell the property prior to beginning construction, we consider the loan to be on a pre-sold basis. If the borrower has not entered into an agreement to sell the property prior to beginning construction, we consider the loan to be on a speculative basis. We make residential and commercial construction loans to builders and developers, as well as to consumers who have contracted with an approved builder. We generally limit the term of most construction and development loans to 18 months, although we may structure the payments based on a longer amortization basis. We base speculative loans on the borrower's financial strength, cash flow position and market dynamics, such as absorption rates. Loan proceeds are disbursed based on the percentage of completion and only after an approved inspector certifies that the work is completed. These loans generally command higher rates and fees commensurate with the risks warranted in the construction loan field. The risk in construction lending depends upon the performance of the builder in building the project to the plans and specifications of the borrower and our ability to administer and control all phases of the construction disbursements. Upon completion of the construction, we typically convert construction loans to permanent loans.

Commercial Loans. This category includes loans made to business entities for a variety of business purposes. We place particular emphasis on loans to small to medium-sized professional firms, retail and wholesale businesses, and light industry and manufacturing concerns operating in our principal markets. We consider small business to include commercial, professional and retail businesses with annual gross sales of less than \$15 million or annual operating profits of less than \$5 million. Our commercial loans include term loans and lines of credit with fixed and variable interest rates secured by equipment, inventory, receivables and other assets. We evaluate general business conditions of the local economy and the borrower's ability to sell its products and services in order to generate sufficient business profits to repay their loans under the agreed upon terms and conditions. Personal guarantees are obtained from the principals of business borrowers to support further the borrower's ability to service the debt and reduce the risk of non-payment.

Consumer and Installment Loans. Consumer loans include lines of credit and term loans secured by second mortgages on the residences of borrowers for a variety of purposes, including home improvements, education and other personal expenditures. Consumer loans also include installment loans to individuals for personal, family and household purposes, including automobile and boat loans and pre-approved lines of credit. Consumer loans generally involve more risk than mortgage loans because the collateral for a defaulted loan may not provide an adequate source of

Table of Contents

repayment of the principal. This risk is due to the potential for damage to the collateral or other loss of value, and the fact that any remaining deficiency often does not warrant further collection efforts. In addition, consumer loan performance depends on the borrower's continued financial stability and is, therefore, more likely to be adversely affected by job loss, divorce, illness or personal bankruptcy.

Income from Lending Activities/Loan Servicing. Fees are earned in connection with loan commitments and originations, loan modifications, late payments, assumptions related to changes of property ownership and for miscellaneous services related to loans. We also receive fees for servicing loans owned by others. At March 31, 2004, we were servicing \$86.6 million in loans for other institutions, which produces servicing income, net of amortization of mortgage servicing rights. Income from these activities varies from period to period with the volume and type of loans originated, sold and purchased, which in turn is dependent upon prevailing mortgage interest rates and their effect on the demand for loans in our market area. During 2003, we made a strategic decision to have a third party begin servicing our residential mortgage loans. This third party charges standard servicing and administration fees for these services.

Loan fees and direct costs typically are charged at the time of loan origination and may be a flat fee or a percentage of the amount of the loan. Under current accounting standards such fees cannot typically be recognized as income and are deferred and taken into income over the contractual life of the loan, using a level yield method. If a loan is prepaid or refinanced, all remaining deferred fees with respect to such loan are taken into income at that time.

Non-performing Loans and Foreclosed Assets. When a borrower fails to make a required payment on a loan, our collection efforts begin with contacting the borrower. If a payment on a loan has not been received by the end of a grace period, notices are sent at that time, with follow-up contacts made thereafter. In most cases, the delinquencies are cured promptly. If the delinquency exceeds 90 days and is not cured through normal collection procedures, more formal measures are instituted to remedy the default, including the commencement of foreclosure proceedings.

If foreclosure is effected, the property is sold at a public auction in which we typically participate as a bidder. If we are the successful bidder, the acquired real estate property is then included in our foreclosed assets account until it is sold. Under federal regulations, we are permitted to finance sales of foreclosed assets by loans to facilitate, which may involve more favorable interest rates and terms than generally would be granted under our underwriting guidelines. At March 31, 2004 and December 31, 2003, we had no loans to facilitate.

Loans are placed on non-accrual status when, in the judgment of management, the probability of collection of interest is deemed to be insufficient to warrant further accrual. When a loan is placed on non-accrual status, previously accrued, but unpaid interest is deducted from interest income. Our policy is to not accrue interest on loans past due 90 days or more.

Assets acquired as a result of foreclosure or by deed-in-lieu of foreclosure are classified as foreclosed assets until they are sold. When assets are acquired, they are recorded at the lower of cost or fair value less estimated selling costs at the date of acquisition and any write-down resulting therefrom, is charged to the allowance for losses on loans.

Table of Contents

The following table sets forth certain information regarding our non-accrual loans and foreclosed assets, the ratio of such loans and foreclosed assets to total assets as of the date indicated, and certain other related information.

	At March 31,		At December 31,

Total non-accrual loans and foreclosed assets to total assets	0.9%	1.6%	1.7%	1.4%	1.4%	1.4%

At March 31, 2004, we had no accruing loans which were contractually past due 90 days or more as to principal and interest and no troubled debt restructurings as defined by Statement of Financial Accounting Standards No. 15. Nonaccrual loans for which interest has been reduced totaled approximately \$3.8 million, \$6.4 million, \$5.6 million and \$3.6 million at March 31, 2004, December 31, 2003, 2002 and 2001, respectively. Interest income that would have been recorded under the original terms of nonaccrual loans and interest income actually recognized is summarized below (in thousands):

	Three Months Ended March 31,		Year Ended December 31,
	2004	2003	2003
Interest income that would have been recorded	\$ 83	\$ 109	\$ 468

Classified Assets Potential Problem Loans. Federal regulations and the Bank's policies require the classification of loans and other assets, such as debt and equity securities, considered to be of lesser quality as substandard, doubtful or loss assets. An asset is considered substandard if it is inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Substandard assets include those characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected. Assets classified as doubtful have all of the weaknesses inherent in those classified substandard, with the added characteristic that the weaknesses present make collection or liquidation in full, on the basis of currently existing facts,

Table of Contents

conditions, and values, highly questionable and improbable. Assets classified as loss are those considered uncollectible and of such little value that their continuance as assets without the establishment of a specific loss reserve is not warranted. In addition, the Bank's policies require that assets which do not currently expose the insured institution to sufficient risk to warrant classification as substandard but possess other weaknesses be designated special mention by management.

If an asset is classified, the estimated fair value of the asset is determined and if that value is less than the then carrying value of the asset, the difference is established as a specific reserve. If an asset is classified as loss, the amount of the asset classified as loss is reserved. General reserves or general valuation allowances represent loss allowances which have been established to recognize the inherent risk associated with lending activities but, unlike specific reserves, are not allocated to particular assets.

No assets were classified doubtful or loss at March 31, 2004 or December 31, 2003. The following table sets forth information concerning the number and dollar amount of assets classified as special mention or substandard:

	Special Mention		Substandard	
	Number	Amount	Number	Amount
(\$ in thousands)				
At March 31, 2004:				
Loans	6	\$ 1,202	57	\$ 4,975
At December 31, 2003:				
Loans	8	\$ 1,128	78	\$ 8,249

Provisions for Loan Losses

A provision for loan losses is generally charged to earnings based upon management's evaluation of the inherent losses in our loan portfolio. During the three months ended March 31, 2004, management made a provision of \$550,000 based on its evaluation of the loan portfolio, compared to a provision of \$220,000 made in the comparable period in 2003. The increase is primarily a result of an increase in total loans outstanding as well as an increase in the percentage of commercial loans in our portfolio. During 2003, our gross loans increased by \$89.8 million and management charged \$650,000 to our provision for loan losses. Also during 2003, we recognized \$31,000 in charge-offs against our allowance, but collected \$50,000, in recoveries from prior charge-offs.

Although we believe that our present allowance for loan losses is adequate as of March 31, 2004, the provisions are based on the current and anticipated future operating conditions, thereby causing these estimates to be susceptible to changes that could result in a material adjustment to results of operations in the near term. The amount needed in the allowance for loan losses is based on the particular circumstances of the individual non-performing loans, including the type, amount, and value of the collateral, if any. In addition, the overall composition and amount of the performing loans in the portfolio at the time of evaluation is considered to determine the adequacy of the allowance, and, as a result, will vary over time. Although more emphasis is being placed on originating new commercial real estate loans, the composition of our loan portfolio continues to be concentrated primarily on residential mortgage loans, which tend to have a lower risk of loss. Loan repayments are dependent on loan underwriting and also on economic, operating and other conditions that may be beyond our control. Therefore, actual losses in future periods could differ materially from amounts provided in the current period and could result in a material adjustment to operations.

Table of Contents

In addition to the continuing internal assessment of the loan portfolio, our loan portfolio is subject to examination by our primary regulator, the OTS, which will periodically review the loan portfolio and assess the adequacy of the allowance for loan losses.

During 2003, our total non-accrual loans increased by approximately \$817,000, however nonaccrual loans decreased by \$2.6 million, or 41%, in the first quarter of 2004.

Allowance for Losses on Loans

When establishing our allowance for loan losses, a number of factors are considered. For loan loss purposes, the loan portfolio is segregated into the following broad segments: residential real estate loans to United States citizens; residential real estate loans to foreign borrowers; commercial real estate loans; and commercial business and other loans. A general allowance for losses is then provided for each of the aforementioned categories, which consists of two components. General loss percentages are calculated based upon historical analyses. A supplemental portion of the allowance is calculated for inherent losses which probably exist as of the evaluation date even though they might not have been identified by the more objective processes used for the portion of the allowance described above. This is due to the risk of error and/or inherent imprecision in the process. This portion of the allowance is particularly subjective and requires judgments based on qualitative factors which do not lend themselves to exact mathematical calculations such as: trends in delinquencies and nonaccruals; migration trends in the portfolio; trends in volume, terms, and portfolio mix; new credit products and/or changes in the geographic distribution of those products; changes in lending policies and procedures; loan review reports on the efficacy of the risk identification process; changes in the outlook for local, regional and national economic conditions; concentrations of credit; and peer group comparisons.

Specific allowances are provided in the event that the specific collateral analysis on each classified loan indicates that the probable loss upon liquidation of collateral would be in excess of the general percentage allocation. The provision for loan losses is debited or credited in order to bring the allowance for loan losses to the required level as determined above.

The allowance for loan losses at December 31, 2003, was \$2.8 million, or 43.4% of non-performing loans and 0.70% of total loans net of loans in process (LIP) compared to \$2.1 million, or 37.8% of non-performing loans and 0.69% of total loans net of LIP at December 31, 2002. At March 31, 2004, the allowance was \$3.3 million or 86.5% of non-performing loans and 0.79% of total loans net of LIP. The allowance at both dates consisted of reserves for the performing loans in the portfolio and reserves against certain loans based on management's evaluation of these loans. As the size of the total loan portfolio and the amount of commercial real estate loans in the portfolio increases, the allowance will be adjusted accordingly.

Although we believe that we use the best information available to determine the allowance, unforeseen market conditions could result in adjustments and net earnings could be significantly affected if circumstances differ substantially from the assumptions used in making the final determination. Future additions to our allowance for loan losses will be the result of periodic loan, property, and collateral reviews and thus cannot be predicted in advance. In addition, the OTS, as an integral part of its examination process, periodically reviews our allowance for loan losses. The OTS may require us to recognize additions to the allowance level based upon their judgment of the information available to them at the time of their examination.

Table of Contents

The following table sets forth information with respect to our allowance for loan losses during the periods indicated. The allowances shown in the table below should not be interpreted as an indication that charge-offs in future periods will occur in these amounts or proportions or that the allowance indicates future charge-off amounts or trends (\$ in thousands).

Table of Contents**Investment Activities**

Mortgage-Backed Securities. We purchase mortgage-backed securities and other collateralized mortgage obligations, which are guaranteed as to principal and interest by FNMA and FHLMC, agencies of the Federal government. We also purchased mortgage-backed securities issued by entities that are not Federal government agencies. The securities are permissible investments for a savings institution and were acquired primarily for their liquidity, yield, and credit characteristics. Such securities may be used as collateral for borrowings. The mortgage-backed securities are backed by either fixed-rate or adjustable-rate mortgage loans. At December 31, 2003, these securities totaled \$15.8 million and had decreased to \$14.9 at March 31, 2004.

Other Investments. We also purchases municipal bonds, corporate equity and debt securities and are required to invest in the FHLB common stock. At March 31, 2004, and December 31, 2003, we did not have any securities pledged to the FHLB as collateral under its short-term credit agreement.

The following table sets forth the carrying values of our total investments and liquidity as of the dates indicated (\$ in thousands).

	At March 31, 2004	At December 31,

Impact of Interest Rates on the Investment Portfolio. From 2001 through the first half of 2003, both long and short term interest rates moved steadily lower as a result of Federal Reserve action, the weak global economy, terrorist activities and the overseas military actions. As interest rates fell, all

Table of Contents

financial institutions experienced a dramatic increase in residential loan refinancing activity coupled with a general slowdown in commercial loan originations. During this period, we also experienced a similar increase in prepayments in our mortgage-backed securities portfolio. To replenish our investment portfolio, we purchased other mortgage-backed investments which generally had lower yields than the previous issues.

In the second half of 2003, long-term interest rates increased from the June 2003 lows, while the Federal Reserve kept short-term rates at historical lows. The increase in market rates in the second half of 2003 resulted in a decrease in the market value of our investment portfolio. At December 31, 2003, we had unrealized pretax losses of \$511,000 in our investment portfolio, as compared to unrealized pretax gains of \$24,000 at December 31, 2002. At March 31, 2004, we had unrealized pretax losses of \$26,000 in the investment portfolio. Management does not consider the unrealized loss at March 31, 2004, to be a permanent impairment of value of the portfolio.

As a condition of our membership in the FHLB we are required to own FHLB stock. The amount of FHLB stock that we own is based in part on the level of our outstanding FHLB advances. At March 31, 2004 and December 31, 2003, our investment in FHLB stock was \$5.4 million and \$5.7 million, respectively. The other investments in the portfolio, with the exception of the corporate equity securities, are eligible for inclusion in our liquidity base when calculating our regulatory liquidity requirement.

Sources of Funds

General. Deposits are our primary source of funds for use in lending, investments and for other general business purposes. In addition to deposits, funds are obtained from normal loan amortization and prepayments, and from operations. Contractual loan payments are a relatively stable source of funds, while deposit inflows and outflows and loan prepayments are significantly influenced by general market interest rates and economic conditions. FHLB borrowings are used on a short-term basis to compensate for seasonal or other reductions in normal sources of funds. FHLB borrowings are also used on a longer term basis to support expanded lending or investment activities.

Borrowings by Federal Trust can also be used by the Bank as an additional source of capital. At March 31, 2004, there was approximately \$4.0 million in debt in Federal Trust that is utilized as equity capital by the Bank.

Deposits. Our primary deposit products include fixed-rate certificate accounts, money-market deposit accounts and both noninterest and interest-bearing transaction accounts. We have a number of different programs that are designed to attract both short-term and long-term deposits.

Deposits have generally been obtained from residents in our primary market area and, to a lesser extent, through a network of deposit brokers. The principal methods used to attract in market deposit accounts have included offering a wide variety of services and accounts, competitive interest rates and convenient office locations, including access to automated teller machines (ATMs) and Internet Banking. We currently operate six ATMs and our customers also have access to the Star7 (previously Honor) and other shared ATM networks. We also offer customers Internet Banking which allows convenient access to their accounts, funds transfer, and bill paying.

The variety of deposit accounts that we offer has increased our ability to retain deposits and has allowed us to be competitive in obtaining new funds, although the threat of disintermediation (the flow of funds away from savings institutions into direct investment vehicles such as government and corporate securities) still exists. Our ability to attract and retain deposits and our cost of funds have been, and will continue to be, significantly affected by competition and market interest rates.

Table of Contents

On a weekly basis, we review the rates offered by other deposit institutions in our market area and make adjustments to the rates we offer to meet our funding needs and to be competitive with the local market. Our deposits increased to \$335.6 million at March 31, 2004, from \$314.6 million at December 31, 2003, and \$278.5 million at December 31, 2002.

The following table sets forth the amount of outstanding time certificates of deposits of \$100,000 and over, maturing as follows (in thousands):

	At March 31,	At December 31,
	2004	2003
Due three months or less	\$ 21,841	\$ 23,473
Due over three months to six months	23,411	21,586
Due over six months to one year	42,718	41,774
Due over one year	40,386	26,687
	<u>\$ 128,356</u>	<u>\$ 113,520</u>

Federal Home Loan Bank Advances. The Bank has an agreement to obtain advances from the FHLB. Such advances may be made pursuant to several different credit programs. Each credit program has its own interest rate based on the range of maturities. The FHLB has limitations on the total amount and terms of advances available to the Bank based on, among other things, asset size, capital strength, earnings and the amount of collateral available to be pledged for such advances. Prepayment of FHLB advances would incur prepayment penalties. At March 31, 2004, and December 31, 2003, we had \$100.4 million and \$107.7 million, respectively, in borrowings outstanding.

A summary of advances from the FHLB are as follows (\$ in thousands):

Maturing During the Year Ending December 31,	Interest Rate	At December 31,

(footnotes for table on previous page)

- (1) Daily advance or adjustable rate.
- (2) FHLB has the option to call every three months.
- (3) FHLB has the option to call every three months beginning in January 2005.
- (4) FHLB has the option to call every three months beginning in June 2004.
- (5) FHLB has a one-time call option in December 2004.
- (6) FHLB has a the option to call every three months beginning in February 2006.

The security agreement with FHLB includes a blanket floating lien requiring the Company to maintain qualifying first mortgage loans as pledged collateral in an amount equal to at least, when discounted at 75% of the unpaid principal balances, 100% of these advances. The FHLB stock is also pledged as collateral for these advances.

The overnight, variable rate advances reprice daily and may be repaid at any time without penalty. Fixed rate advances incur a prepayment penalty if repaid prior to maturity, and the interest rate is fixed for the term of the advance.

Other Borrowings. We had a line of credit agreement with a correspondent bank that permitted the Company to borrow up to \$6,000,000. The line of credit bore interest at the prime lending rate plus 50 basis points and was secured by all of the Bank's common stock. Borrowings under the line of credit agreement were to mature five years after the date of the borrowing. At December 31, 2002 and 2001, the outstanding balances under the line of credit agreement were approximately \$915,000 and \$2,115,000, respectively.

During 2003, we entered into a new loan agreement with another correspondent bank. Under this agreement, we can borrow up to \$6,000,000 under a revolving line of credit (LOC) for general operations and up to \$2,000,000 on a separate nonrevolving line of credit (ESOP LOC) for common stock purchases relating to our Employee Stock Ownership Plan. Both lines are secured by all of the Bank's common stock and both have interest rates of prime minus 12.5 basis points, as long as the Bank maintains certain loan-to-book value percentages. We used the proceeds from the LOC, in part, to pay off the old line of credit. The following summarizes the balances and other information pertaining to these loans at March 31, 2004, and December 31, 2003 (\$ in thousands):

	Outstanding Balance	Available Balance	Interest Rate	Interest Due	Principal Due
LOC	\$ 4,212	\$ 1,788	3.875%	Quarterly	Beginning in June 2005 principal amortizes over a 10 year schedule-due June 2015
ESOP LOC	1,005	995	3.875%	Quarterly	Annual principal repayments of 10% of outstanding balance increasing 5% per year, due in full in June 2009

Total	<u>\$ 5,217</u>	<u>\$ 2,783</u>
-------	-----------------	-----------------

Table of Contents

Total interest expense on other borrowings for the years ended December 31, 2003, 2002 and 2001, was approximately \$137,000, \$84,000 and \$187,000, respectively. Total interest expense on the borrowings for the first quarter of 2004 was \$51,000, compared to \$12,000 for the same period in 2003.

Junior Subordinated Debentures. On September 17, 2003, the Statutory Trust I sold adjustable-rate Trust Preferred Securities due September 17, 2033, in the aggregate principal amount of \$5,000,000 (the Trust Preferred Securities) in a pooled trust preferred securities offering. The interest rate on the Trust Preferred Securities adjusts quarterly, to a rate equal to the then current three-month London Interchange Bank Offering Rate (LIBOR), plus 295 basis points (4.06% at March 31, 2004 and 4.12% at December 31, 2003). In addition, Federal Trust contributed capital of \$155,000 to the Statutory Trust I for the purchase of the common securities of the Statutory Trust I. We received the proceeds from these sales in exchange for \$5,155,000 of its adjustable-rate Junior Subordinated Debentures (the Debentures) due September 17, 2033. The Debentures have the same terms as the Trust Preferred Securities. The sole asset of the Statutory Trust I, the obligor on the Trust Preferred Securities, is the Debentures.

We have guaranteed the Statutory Trust I's payment of distributions on, payments on any redemptions of, and any liquidation distribution with respect to, the Trust Preferred Securities. Cash distributions on both the Trust Preferred Securities and the Debentures are payable quarterly in arrears on March 17, June 17, September 17 and December 17 of each year.

The Trust Preferred Securities are subject to mandatory redemption: (i) in whole, but not in part, upon repayment of the Debentures at stated maturity or, at the option of Federal Trust, their earlier redemption in whole upon the occurrence of certain changes in the tax treatment or capital treatment of the Trust Preferred Securities, or a change in the law such that the Statutory Trust I would be considered an Investment Company; and (ii) in whole or in part at any time on or after September 17, 2008 contemporaneously with the optional redemption by Federal Trust of the Debentures in whole or in part. The Debentures are redeemable prior to maturity at our option: (i) on or after September 17, 2008, in whole at any time or in part from time to time; or (ii) in whole, but not in part, at any time within 90 days following the occurrence and continuation of certain changes in the tax treatment or capital treatment of the Trust Preferred Securities, or a change in law such that the Statutory Trust I would be considered an Investment Company, required to be registered under the Investment Company Act of 1940.

The following table sets forth certain information relating to the Bank's borrowings at the dates indicated:

(Table to follow this page)

Expansion Plans

In February 2002, the Sanford Branch Office, which originally opened in October 1998, relocated to a new 3,000 square-foot facility with three drive-up lanes and a fourth lane which has a drive-up ATM. The new location is next to our corporate headquarters building where the branch originally opened and provides our customers with easier access and extended hours.

In June 2001, we opened our first Volusia County Branch, in New Smyrna Beach, in a 1,500 square-foot facility in a retail plaza. The location is situated to service the growing retirement community of New Smyrna Beach.

In December 2002 the Casselberry Branch Office opened in a new 3,000 square-foot facility with two drive-up lanes and a third lane which has a drive-up ATM. The office is located on Semoran Boulevard (State Road 436) which is a main thorough-fare in Seminole and Orange Counties.

In June, 2003, we opened our second Volusia County Branch in Deltona, Florida, in a 1,500 square-foot, short-term leased facility in a retail plaza. In January 2004, the Company began construction of our permanent Deltona Branch, a 2,500 square-foot free-standing facility located on Dogle Road at a key intersection on an out-parcel of a grocery store and retail plaza. The relocation of the Deltona Branch to the permanent location is planned for June 2004.

Table of Contents

In October 2003, we opened our third Volusia County Branch in Orange City, Florida, in a 3,000 square-foot free-standing facility with two drive-up lanes and a third lane which has a drive-up ATM. The office is located on Enterprise Boulevard, which is a main commercial artery in Orange City.

At present we have identified several additional branch sites in our primary market area that will provide for our future expansion. One future branch site we currently own is in Port Orange, which is located between New Smyrna and Daytona in eastern Volusia County.

Employees

At March 31, 2004, Federal Trust had no full-time employees, while the Bank had a total of 75 full-time employees. Management considers relations with its employees to be excellent.

We currently maintain a comprehensive employee benefit program providing, among other benefits, hospitalization and major medical insurance, long-term disability insurance, life insurance, education assistance, an employee stock ownership plan (ESOP) and a 401K Plan. These benefits are considered by management to be very competitive with employee benefits provided by other major employers in our market area. Our employees are not represented by any collective bargaining group.

Other Subsidiaries

At March 31, 2004, Federal Trust had no subsidiaries other than the Bank and its investment in Statutory Trust I. The total equity investment in the Bank at March 31, 2004, was \$32.1 million.

Bank Subsidiaries

There are no limits on the amount a savings institution may invest in its operating subsidiaries, either separately or in the aggregate. The Bank had one operating subsidiary, FTB Financial, Inc. (FTBF). FTBF, which commenced operations in 1996, engaged in the business of selling insurance annuities, stocks and bond investment products. FTBF ceased operations in September 2003, and had minimal activity over the previous three years. The Bank's other subsidiary, Vantage Mortgage Service Center, Inc. (Vantage) originated residential mortgages (FHA and VA) in the Gainesville, Florida market. Vantage ceased operations during March 2001, and was dissolved in September 2001.

Legal Proceedings

There are no material pending legal proceedings to which Federal Trust or the Bank is a party, or to which any of their properties are subject.

Monetary Policies

The results of our operations are affected by the credit policies of monetary authorities, particularly the Federal Reserve Board. The instruments of monetary policy employed by the Federal Reserve Board include open market operations in United States government securities, changes in the discount rate on member bank borrowings, and changes in reserve requirements against member bank deposits. In view of changing conditions in the national economy and in the financial markets, as well as the effect of action by monetary and fiscal authorities, including the Federal Reserve Board, no absolute prediction can be made as to our possible future changes in interest rates, deposit levels, loan demand or our business and earnings.

Table of Contents

REGULATION AND SUPERVISION

General

Federal Trust, is a registered savings and loan holding company within the meaning of the Home Owners' Loan Act (HOLA). Federal Trust and the Bank operate in a highly regulated environment. Our business activities, which are governed by statute, regulation and administrative policies, are supervised by a number of federal regulatory agencies, including the OTS, the FDIC and, to a limited extent, the Federal Reserve Board. The following is a brief summary of the more recent legislation which affects Federal Trust and our subsidiaries.

In November 1999, the financial services regulations were significantly reformed with the adoption of the Gramm-Leach-Bliley Act (GLA). The GLA provides for the streamlining of the regulatory oversight functions of the various federal banking agencies. Of significance, is the fact that while the GLA permits bank holding companies that are well managed, well capitalized and that have at least a satisfactory Community Reinvestment Act rating to operate as Financial Holding Companies (FHC), it essentially eliminated the unlimited investment authority of a unitary savings and loan holding company. Savings and loan holding companies are now, for the most part, limited to activities permitted by a bank holding company, a multiple savings and loan holding company, or an FHC.

The GLA also requires financial institutions to permit, with few exceptions, their customers to opt out of having their personal financial information shared with nonaffiliated third parties. The GLA bars financial institutions from disclosing customer account numbers to direct marketers and mandates that institutions provide annual disclosure to their customers regarding the institution's privacy policies and procedures. We have chosen to permit our customers to opt out if they choose to.

Regulation of the Holding Company

Restrictions on the Acquisition of Savings Institutions. Section 1467a of the HOLA provides that no holding company, directly or indirectly or acting in concert with one or more persons, or through one or more subsidiaries, or through one or more transactions, may acquire control of an insured savings institution at any time without the prior approval of the OTS. In addition, any holding company that acquires such control becomes a savings and loan holding company subject to registration, examination and regulation under HOLA and the regulations promulgated thereunder. Control in this context means ownership, control of, or holding proxies representing more than 25% of the voting shares of an insured institution, the power to control in any manner the election of a majority of the directors of such institution, or the power to exercise a controlling influence over the management or policies of the institution.

The OTS also has established certain rebuttable control determinations. An acquiror must file for approval of control with the OTS, or file to rebut the presumptions before surpassing a rebuttable control level of ownership. To rebut the presumption, the acquiror must file a submission with the OTS setting forth the reasons for rebuttal. The submission must be filed when the acquiror purchases more than 25% of any class of voting stock of the savings bank and when they have any of the control factors enumerated in 12 C.F.R. Section 574.4(c) which include, but are not limited to: (i) the acquiror would be one of the two largest shareholders of any class of voting stock; (ii) the acquiror and/or the acquiror's representative or nominees would constitute more than one member of the savings bank's Board of Directors; and (iii) the acquiror or nominee or management official of the acquiror would serve as the chairman of the Board of Directors, chairman of the executive committee, chief executive officer, chief operating officer, chief financial officer, or in any similar policy-making authority in the savings bank.

Table of Contents

Transactions with Affiliates. The authority of Federal Trust to engage in transactions with related parties or affiliates or to make loans to certain insiders, is limited by Sections 23A and 23B of the Federal Reserve Act (FRA) and Regulation W, adopted thereunder. Section 23A limits the aggregate amount of transactions with any individual affiliate to 10% of the capital and surplus of the savings institution and also limits the aggregate amount of transactions with all affiliates to 20% of the savings institution's capital and surplus. Certain transactions with affiliates are required to be secured by collateral in an amount and of a type described in the FRA and the purchase of low quality assets from affiliates is generally prohibited. Section 23B provides that certain transactions with affiliates, including loans and asset purchases, must be on terms and circumstances, including credit standards, that are substantially the same or at least as favorable to the savings institution as those prevailing at the time for comparable transactions with a non-related party or non-affiliated holding company. In the absence of comparable transactions, such transactions may only occur under terms and circumstances, including credit standards, that in good faith would be offered to or would apply to non-related parties or non-affiliated companies. Regulation W contains certain exceptions for transactions involving industry credit, loan participations and derivative transactions. Notwithstanding Sections 23A and 23B, savings institutions are prohibited from lending to any affiliate that is engaged in activities that are not permissible for bank holding companies under Section 4(c) of the Bank Holding Company Act of 1956. Further, no savings institution may purchase the securities of any affiliate other than a subsidiary.

In addition, Sections 22(g) and 22(h) of the FRA and Regulation O (which set limits on extensions of credit to executive officers, directors and 10% shareholders, as well as companies which such persons control) apply to savings institutions. Among other things, such loans must be made on terms, including interest rates, substantially the same as loans to unaffiliated individuals and which involve no more than the normal risk of collectibility. These regulations also place limits on the amount of loans the Bank may make to such persons. These restrictions apply in addition to certain restrictions on transactions with affiliates contained in the OTS regulations.

Support of Subsidiary Depository Institutions. Under OTS policy, Federal Trust is expected to act as a source of financial strength to and to commit resources to support the Bank. This support may be required at times when, in the absence of such OTS policy, Federal Trust might not be inclined to provide such support. In addition, any capital loans by Federal Trust to the Bank must be subordinate in right of payment to depositors and to certain other indebtedness of the Bank. In the event of bankruptcy, any commitment by a holding company to a federal bank regulatory agency to maintain the capital of a subsidiary depository institution will be assumed by the bankruptcy trustee and will be entitled to a priority of payment.

Under the FDIA, a depository institution of a holding company, can be held liable for any loss incurred by, or reasonably expected to be incurred by, the FDIC, in connection with: (i) the default of a commonly controlled FDIC-insured depository institution; or (ii) any assistance provided by the FDIC to any commonly controlled FDIC-insured depository institution in danger of default. Default is defined generally as the appointment of a conservator or a receiver and in danger of default is defined generally as the existence of certain conditions indicating that a default is likely to occur in the absence of regulatory assistance.

Payment of Dividends. To date, the principal source of cash flow of Federal Trust, including cash flow to pay cash dividends, has been through borrowings, the trust preferred debt, sale of common stock and cash dividends from the Bank. There are statutory and regulatory limitations on the payment of dividends by the Bank. The ability of the Bank to pay a dividend to Federal Trust is governed by the OTS's capital distribution regulation. Under the regulation, the Bank may make a capital distribution without the approval of the OTS, provided the OTS is notified 30 days before declaration of the capital distribution. The Bank must also meet the following requirements: (i) it has a regulatory rating in one of the two top examination categories; (ii) it is not of supervisory concern, and will remain adequately or

Table of Contents

well-capitalized, as defined in the OTS prompt corrective action regulations, following the proposed distribution; and (iii) the distribution does not exceed the Bank's net income for the calendar year-to-date plus retained net income for the previous two calendar years (less any dividends previously paid). If the Bank does not meet the above-stated requirements, it must obtain the prior approval of the OTS before declaring any proposed distributions. The OTS can prohibit a proposed capital distribution by a savings institution, which would otherwise be permitted by the regulation if the OTS determines that such distribution would constitute an unsafe or unsound practice. Federal Trust did not pay a dividend in 2002, but did pay \$0.05 per share in dividends during 2003 and \$0.02 per share in the first quarter of 2004.

34 Act Reporting

As a publicly traded company with its shares of common stock registered under the Securities Act of 1933, Federal Trust is required to file periodic public disclosure reports with the Securities and Exchange Commission, pursuant to the Securities and Exchange Act of 1934, and the regulations promulgated thereunder. A Form 10-KSB is a required annual report that must contain a complete overview of the company's business, financial, management, regulatory, legal, ownership and organizational status. Federal Trust must file Form 10-KSB by March 31 of each year.

Similarly, Form 10-QSB must contain information concerning Federal Trust on a quarterly basis. Although Form 10-KSB requires the inclusion of audited financial statements, unaudited statements are sufficient for inclusion on Form 10-QSB. Additionally, any significant non-recurring events that occur during the subject quarter, as well as changes in securities, any defaults and the submissions of any matters to a vote of security holders, must also be reported on Form 10-QSB.

Recently, the national securities exchanges, including the American Stock Exchange, adopted a rule requiring the audit committees of Boards of Directors of reporting corporations, such as Federal Trust, to undertake certain organizational and operational steps. The Securities and Exchange Commission adopted a similar rule. These standards require our Audit Committee to be comprised of independent, non-employee directors who are financially literate. Furthermore, the Audit Committee has adopted a formal charter defining the scope of its operations. The Securities and Exchange Commission's rule also requires our auditors to review the financial statements contained in our Form 10-KSBs, in addition to our Form 10-QSBs.

The Sarbanes-Oxley Act of 2002 increases the responsibility of the audit committee and imposes significant corporate governance standards on public companies, such as Federal Trust. Included in these standards are requirements that our senior officers certify that our financial statements meet certain standards of completeness and accuracy, that we adopt an ethics policy and that our auditors meet stringent standards of independence.

Regulation of the Bank

Capital Requirements. Both the OTS and FDIC have promulgated regulations setting forth capital requirements applicable to depository institutions. The OTS capital regulations require savings institutions to meet three capital standards: (i) a 1.5% tangible capital ratio (defined as the ratio of tangible capital to adjusted total assets); (ii) a 4% leverage (core capital) ratio (defined as the ratio of core capital to adjusted total assets); and (iii) an 8% risk-based capital standard as defined below. At March 31, 2004 and December 31, 2003, the Bank exceeded all required capital standards.

Edgar Filing: - Form

Core capital is defined as common stockholder's equity (including retained earnings), certain noncumulative perpetual preferred stock and related surplus, minority interests in equity accounts of consolidated subsidiaries, certain goodwill and certain mortgage servicing rights less certain intangible

Table of Contents

assets, and investments in nonincludable subsidiaries. Tangible capital is defined in the same manner as core capital, except that all intangible assets (excluding certain mortgage servicing rights) must be deducted. Adjusted total assets is defined as GAAP total assets, minus intangible assets (except those included in core capital). The OTS regulations also require that in calculating the leverage ratio, tangible and risk-based capital standards, savings institutions must deduct investments in and loans to subsidiaries engaged in activities not permissible for a national bank. The Bank had only one subsidiary that is currently inactive, FTB Financial Services, Inc., which was in the business of selling non-FDIC insured annuities.

The OTS risk-based capital standard for savings institutions requires that total capital (comprised of core capital and supplementary capital) be at least 8% of risk-weighted assets. In determining risk-weighted assets, all assets, including certain off-balance sheet assets, are multiplied by a risk-weight of 0% to 100%, as assigned by the OTS capital regulation based on the risks OTS believes are inherent in the type of asset. Generally, zero weight is assigned to risk-free assets, such as cash and unconditionally guaranteed United States Government securities. A weight of 20% is assigned to, among other things, certain obligations of United States Government-sponsored agencies (such as the FNMA and the FHLMC) and certain high quality mortgage-related securities. A weight of 50% is assigned to qualifying residential mortgage loans and certain other residential mortgage-related securities. The components of core capital are equivalent to those discussed above. The components of supplementary capital include permanent capital instruments (such as cumulative perpetual preferred stock, mandatory convertible subordinated debt and perpetual subordinated debt), maturing capital instruments (such as mandatory convertible subordinated debt and intermediate-term preferred stock) and the allowance for loan and lease losses. Allowance for loan and lease losses includable in supplementary capital is limited to a maximum of 1.25% of risk-weighted assets. Overall, the amount of capital counted toward supplementary capital cannot exceed 100% of core capital.

The OTS incorporated an interest-rate component as part of the calculation of a savings institution's regulatory capital. Savings institutions with above normal interest-rate risk exposure are subject to a deduction from total capital for purposes of calculating their risk-based capital requirements. A savings institution's interest-rate risk is measured by the decline in the net portfolio value of its assets (i.e. the difference between incoming and outgoing discounted cash flows from assets, liabilities and off-balance sheet contracts) that would result from a hypothetical 200 basis point increase or decrease in market interest rates (whichever results in a lower net portfolio value) divided by the estimated economic value of the savings institution's assets, as calculated in accordance with guidelines set forth by the OTS. A savings institution whose measured interest-rate risk exposure exceeds 2% must deduct an interest-rate component in calculating its total capital under the risk-based capital rule. The interest-rate risk component is an amount equal to one-half of the difference between the savings institution's measured interest-rate risk and 2%, multiplied by the estimated economic value of the savings institution's assets. That dollar amount is deducted from the savings institution's total capital in calculating compliance with its risk-based capital requirement. The interest rate-risk rule includes an assessment of exposure to declines in the economic value of a savings institution's capital due to changes in interest rates. Under the rule, there is a three-quarter lag between the reporting date of an institution's financial data and the effective date for the new capital requirement based on that data. Each quarter, the OTS calculates a savings institution's interest-rate risk exposure and advises the savings institution of any interest-rate risk capital component resulting from greater than normal exposure. The rule also provides that the Director of the OTS may waive or defer a savings institution's interest-rate risk component on a case by case basis. As of March 31, 2004, the Bank's interest rate-risk exposure, according to OTS calculations, would not have been above the threshold requiring an additional capital component.

Table of Contents

At March 31, 2004, and December 31, 2003, the Bank exceeded each of its minimum capital requirements. The following table sets forth the regulatory capital calculations of the Bank at March 31, 2004, and December 31, 2003 (\$ in thousands):

	Tier 1		Risk-Based	
	Percent of		Percent of	
	Amount	Assets	Amount	Assets
At March 31, 2004:				
Regulatory capital Requirement	\$ 32,051	6.8%	\$ 35,298	11.6%
	18,944	4.0	24,441	8.0
Excess	\$ 13,107	2.8%	\$ 10,857	3.6%
At December 31, 2003:				
Regulatory capital Requirement	31,149	6.8	33,877	11.6
	18,385	4.0	23,391	8.0
Excess	\$ 12,764	2.8%	\$ 10,486	3.6%

Standards for Safety and Soundness. The FDICIA, as amended by the Reigle Community Development and Regulatory Improvement Act of 1994, requires each federal banking agency to prescribe for all insured depository institutions and their holding companies standards relating to internal controls, information systems and audit systems, loan documentation, credit underwriting, interest rate risk exposure, asset growth, and compensation, fees and benefits and such other operational and managerial standards as the agency deems appropriate. The OTS and the other federal banking agencies have adopted guidelines requiring depository institutions to maintain internal controls, information systems and internal audit systems that are appropriate for the size, nature and scope of the institution's business. The guidelines also establish certain basic standards for loan documentation, credit underwriting, interest rate-risk exposure, and asset growth. The guidelines further provide that savings institutions should maintain safeguards to prevent the payment of compensation, fees and benefits that are excessive or that could lead to material financial loss, and that they should take into account factors such as compensation practices at comparable institutions. The interagency guidelines also include asset quality and earnings standards.

If the OTS determines that a savings institution is not in compliance with the safety and soundness guidelines, it may require the institution to submit an acceptable plan to achieve compliance with the guidelines. A savings institution is required to submit an acceptable compliance plan to the OTS within 30 days after receipt of a request for such a plan. Failure to submit or implement a compliance plan may subject the institution to regulatory sanctions.

Insurance of Deposit Accounts. The FDIC is the administrator for the Savings Association Insurance Fund (SAIF) and the Bank Insurance Fund (BIF), independently setting insurance premiums for each Fund. The Bank's deposit accounts are insured by the SAIF.

The FDIC applies a risk-based assessment system for insured depository institutions that takes into account the risks attributable to different categories and concentrations of assets and liabilities. In accordance with its rule, the FDIC assigns a depository institution to one of three capital categories based on the institution's financial information, as of the reporting period ending seven months before the assessment period. A depository institution's assessment rate depends on the capital category and supervisory category to which it is assigned. There are nine assessment risk classifications (i.e.,

Table of Contents

combinations of capital groups and supervisory subgroups) to which different assessment rates are applied.

The current regular semi-annual SAIF assessments range between 0% - 0.27% of deposits. The Bank's assessments at March 31, 2004 and at December 31, 2003, was 0.0078 basis points on deposits and the Bank paid approximately \$46,000 in SAIF assessments during the year ended December 31, 2003, and expensed approximately \$12,000 in the first quarter of 2004.

Qualified Thrift Lender Test (QTL). The HOLA requires savings institutions to meet a QTL test. The QTL test, requires savings institutions to maintain at least 65% of its portfolio assets (as defined by regulation) in qualified thrift investments, primarily residential mortgages and related investments on a monthly basis in nine out of every twelve months.

As of March 31, 2004, and December 31, 2003, the Bank exceeded the QTL test, maintaining 89.1% and 90.9%, respectively, of its portfolio assets in qualified thrift investments.

Interstate Banking. Federally chartered savings institutions are allowed to branch nationwide to the extent allowed by federal statute. This ability permits savings institutions with interstate networks to diversify their loan portfolios and lines of business. The OTS authority preempts any state law purporting to regulate branching by federal savings institutions. Prior approval of the OTS is required for a savings institution to branch interstate or intrastate. To obtain supervisory clearance for branching, an applicant's regulatory capital must meet or exceed the minimum requirements established by law and by the OTS regulations. In addition, the savings institution must have a satisfactory record under the Community Reinvestment Act (CRA). The Bank does not conduct interstate branching operations and does not plan to do so in the foreseeable future.

The Reigle-Neal Interstate Banking and Branching Efficiency Act of 1994 (Interstate Act) eliminated many existing restrictions on interstate banking by authorizing interstate acquisitions of financial institutions by bank holding companies without geographic limitations. Under the Interstate Act, existing restrictions on interstate acquisitions of banks by bank holding companies were repealed. Bank holding companies located in Florida are able to acquire any Florida-based bank, subject to certain deposit percentage and other restrictions. The legislation also provides that *de novo* branching by an out-of-state bank is permitted only if it is expressly permitted by the laws of the host state. The authority of a bank to establish and operate branches within a state is subject to applicable state branching laws. Florida law permits interstate branching through the acquisition of a bank in existence for more than three years, but prohibits *de novo* branching by out-of-state-banks.

OTS Assessments. Savings institutions are required by OTS regulations to pay assessments to the OTS to fund the operations of the OTS. The general assessment, to be paid on a semiannually basis, is computed upon the savings institution's total assets, including consolidated subsidiaries, as reported in the institution's latest quarterly thrift financial report. The Bank paid approximately \$88,000 in OTS assessments for the year-ended December 31, 2003, and expensed approximately \$25,000 in the first quarter of 2004.

Federal Home Loan Bank System

The Bank is a member of the Federal Home Loan Bank (FHLB) System which consists of twelve regional FHLBs. The FHLB provides a central credit facility primarily for member institutions. As a member of the FHLB-Atlanta, the Bank is required to acquire and hold shares of capital stock in the FHLB in an amount at least equal to 1% of the aggregate principal amount of its unpaid residential mortgage loans and similar obligations at the beginning of each year, or 1/20th of its advances (borrowings) from the FHLB-Atlanta, whichever is greater. The Bank is in

compliance with this

Table of Contents

requirement and at December 31, 2003, the Bank held \$5.7 million in FHLB stock and \$5.4 million as of March 31, 2004. FHLB advances must be secured by specified types of collateral and may be obtained only for the purpose of providing funds to finance residential housing.

The FHLBs are required to provide funds for the resolution of insolvent savings institutions and to contribute funds for affordable housing programs. These requirements could reduce the amount of dividends that the FHLBs pay to their members and could also result in the FHLBs imposing a higher rate of interest on advances to members. For the year ended December 31, 2003, dividends paid by the FHLB-Atlanta to the Bank amounted to approximately \$185,000 for a yield of approximately 3.8%. In the first quarter of 2004, these dividends were \$49,000 or an annualized yield of 3.5%. Should dividends be reduced, or interest on FHLB advances increased, the consolidated net interest income might also be reduced for the Bank. Furthermore, there can be no assurance that the value of the FHLB-Atlanta stock held by the Bank will not decrease as a result of any new legislation.

Federal Reserve System

The Federal Reserve regulations require depository institutions to maintain non-interest-earning reserves against their transaction accounts (primarily NOW and regular checking accounts). The Federal Reserve regulations generally require that reserves of 3% must be maintained against aggregate transaction accounts of \$38.8 million or less (subject to adjustment by the Federal Reserve) plus 10% of accounts in excess of \$38.8 million. The first \$6.6 million of otherwise reservable balances (subject to adjustments by the Federal Reserve) are exempted from the reserve requirements. The Bank is in compliance with the foregoing requirements. The balances maintained to meet the reserve requirements imposed by the Federal Reserve may be used to satisfy liquidity requirements imposed by the OTS. Because required reserves must be maintained in the form of either vault cash, a non-interest-bearing account at a Federal Reserve or a pass-through account as defined by the Federal Reserve, the effect of this reserve requirement is to reduce the Bank's interest-earning assets. FHLB System members are also authorized to borrow from the Federal Reserve discount window, however, Federal Reserve regulations require institutions to exhaust all funding sources (including the FHLB) before borrowing from a Federal Reserve.

MARKET FOR COMMON STOCK AND RELATED STOCK HOLDER MATTERS

During June 2003, Federal Trust's stock began trading on the American Stock Exchange under the symbol FDT. Prior to that, Federal Trust's common stock traded on the NASDAQ Small Cap Market under the symbol FDTR. As of March 9, 2004, there were 382 holders of record of common stock of the Company. Federal Trust has paid cash dividends of \$0.04 in 2004 through May 25, 2004, and \$0.05 per share during 2003. The Company did not pay dividends during 2002.

On June __, 2004, the closing sales price of Federal Trust's common stock was \$ _____. From January 1, 2002, through March 31, 2004, the range of sale prices was \$3.20 to \$8.25.

	<u>Calendar Year 2004</u>		<u>Calendar Year 2003</u>		<u>Calendar Year 2002</u>

DESCRIPTION OF SECURITIES

Federal Trust has 15,000,000 shares of authorized common stock, par value, \$0.01 per share, of which 6,661,813 shares are currently issued.

Florida law allows our Board of Directors to issue additional shares of stock up to the total amount of common stock authorized without obtaining the prior approval of stockholders. The number of authorized shares of common stock is greater than that issued in order to provide our Board of Directors with as much flexibility as possible to effect, among other things, financing, acquisitions, stock dividends, stock splits, and employee stock option transactions. The holders of common stock are entitled to elect the members of our Board of Directors, and such holders are entitled to vote as a class on all matters required or permitted to be submitted to our stockholders.

No holder of our stock has preemptive rights with respect to the issuance of shares of that or any other class of stock, and the common stock is not entitled to cumulative voting rights with respect to the election of directors. Each share of common stock entitles the holder thereof to one vote on all matters, including the election of directors. The holders of common stock are entitled to dividends and other distributions if, as, and when declared by our Board of Directors out of assets legally available therefore. Upon our liquidation, dissolution, or winding up, the holder of each share of common stock would be entitled to share equally in the distribution of our assets. The holders of common stock are not entitled to the benefit of any sinking fund provision. Our shares of common stock are not subject to any redemption provisions, nor are they convertible into any other security or property. All shares of common stock outstanding upon completion of this offering will be fully paid and nonassessable.

Funds for the payment of dividends are expected to be obtained primarily from dividend payments by the Bank to Federal Trust. There can be no assurance that we will continue to have funds available for cash dividends, or if funds are available, that dividends will be declared by the Board of Directors.

Table of Contents

Anti-Takeover Provisions

General - The Florida Business Corporation Act contains provisions designed to enhance the ability of our Board of Directors to respond to attempts to acquire control of a Florida Corporation such as Federal Trust. These provisions may discourage takeover attempts which have not been approved by the Board of Directors. This could include takeover attempts that some shareholders would deem to be in their best interest. These provisions may:

adversely affect the price that a potential purchaser would be willing to pay for our common stock;

deprive you of or delay the opportunity to obtain a takeover premium for your shares;

make the removal of incumbent management more difficult;

enable a minority of our directors and the holders of a minority of our outstanding voting stock to prevent, discourage or make more difficult a merger, tender offer or proxy contest, even though the transaction may be favorable to the interests of shareholders; and or

potentially adversely affect the market price of the common stock.

The following summarizes some of the anti-takeover provisions contained in the Florida Business Corporation Act.

Staggered Terms for Directors - Florida law permits and our Articles of Incorporation provide that directors shall be elected to three-year terms with terms divided into three classes. The number of directors in each class shall be as nearly equal as possible. Only one class of directors is elected by the shareholders each year at our annual meeting.

Authorized but Unissued Stock - The authorized but unissued shares of our common stock will be available for future issuance without shareholder approval. These additional shares may be used for a variety of corporate purposes, including future public offerings to raise additional capital, corporate acquisitions and employee benefit plans. The existence of authorized but unissued shares of common stock may enable our Board of Directors to issue shares of stock to persons friendly to existing management.

Evaluation of Acquisition Proposals - The Florida Business Corporation Act expressly permits our Board of Directors, when evaluating any proposed tender or exchange offer, any merger, consolidation or sale of substantially all of the assets of Federal Trust, or any similar extraordinary transaction, to consider all relevant factors including, without limitation, the social, legal, and economic effects on the employees, customers, suppliers, and other constituencies of Federal Trust and its subsidiaries, and on the communities and geographical areas in which they operate. Our Board of Directors may also consider the amount of consideration being offered in relation to the then current market price for our outstanding shares of capital stock and our then

Table of Contents

current value in a freely negotiated transaction. Our Board of Directors believes that these provisions are in the long-term best interests of Federal Trust and our shareholders.

Control Share Acquisitions - We are subject to the Florida control share acquisitions statute. This statute is designed to afford shareholders of public corporations in Florida protection against acquisitions in which a person, entity or group seeks to gain voting control. With enumerated exceptions, the statute provides that shares acquired within certain specific ranges will not possess voting rights in the election of directors unless the voting rights are approved by a majority vote of the public corporation's disinterested shareholders. Disinterested shares are shares other than those owned by the acquiring person or by a member of a group with respect to a control share acquisition, or by any officer of the corporation or any employee of the corporation who is also a director. The specific acquisition ranges that trigger the statute are:

acquisitions of shares possessing one-fifth or more but less than one-third of all voting power;

acquisitions of shares possessing one-third or more but less than a majority of all voting power; or

acquisitions of shares possessing a majority or more of all voting power.

Under certain circumstances, the statute permits the acquiring person to call a special shareholders meeting for the purpose of considering the granting of voting rights to the holder of the control shares. The statute also enables a corporation to provide for the redemption of control shares with no voting rights under certain circumstances.

Transactions with Interested Shareholders - We are subject to the Florida affiliated transactions statute which generally requires approval by the disinterested directors or super-majority approval by shareholders for certain specified transactions between a corporation and a holder, or its affiliates, of more than 10% of the outstanding shares of the corporation. These provisions could prohibit or delay the accomplishment of mergers or other takeover or change in control attempts. Accordingly, these provisions may discourage attempts to acquire Federal Trust.

Limited Liability and Indemnification

Under the Florida Business Corporation Act, a director is not personally liable for monetary damages to the corporation or any other person for any statement, vote, decision, or failure to act unless:

a director breached or failed to perform his duties as a director; and

a director's breach of, or failure to perform, those duties constitutes:

a violation of the criminal law, unless the director had reasonable cause to believe his conduct was lawful or had no reasonable cause to believe his conduct was unlawful;

Table of Contents

a transaction from which the director derived an improper personal benefit, either directly or indirectly;

a circumstance under which an unlawful distribution is made;

in a proceeding by or in the right of the corporation to procure a judgment in its favor or by or in the right of a shareholder, conscious disregard for the best interest of the corporation or willful misconduct; or

in a proceeding by or in the right of someone other than the corporation or a shareholder, recklessness or an act or omission which was committed in bad faith or with malicious purpose or in a manner exhibiting wanton and willful disregard of human rights, safety, or property.

A corporation may purchase and maintain insurance on behalf of any director, or officer against any liability asserted against him and incurred by him in his capacity or arising out of his status as such, whether or not the corporation would have the power to indemnify him against such liability under the Florida Business Corporation Act.

Our Articles of Incorporation and bylaws provide that we shall, to the fullest extent permitted by applicable law, as amended from time to time, indemnify all of our directors as well as any of our officers or employees to whom we have agreed to grant indemnification.

INDEMNIFICATION

Our Articles of Incorporation provide for the indemnification of our directors and executive officers to the maximum extent permitted by Florida law as authorized by the Board of Directors. The Articles also provide for the advancement of expenses incurred in connection with the defense of any action, suit or proceeding that a director or executive officer was a party to because he or she is or was our director or executive officer, upon the receipt of an undertaking or promise to repay such amount, unless it is ultimately determined that the individual is not entitled to indemnification.

Our bylaws provide that we shall indemnify our officers, directors and employees, but not our agents unless specifically approved in writing by the Board of Directors, to the fullest extent authorized by Section 607.0850 of the FBCA as it now exists or may thereafter be amended. This includes, but is not limited to, any person who was or is made a party or is threatened to be made a party to any action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that he or she is or was our director or officer, or is or was serving at our request as a director, officer, employee or agent of another bank or affiliated entity. Such indemnification shall continue as to a person who has ceased to be a director, officer, employee or agent; provided, however, that we shall indemnify any such person seeking indemnity in connection with an action, suit or proceeding initiated by such person only if such action, suit or proceeding was authorized by our Board of Directors.

Table of Contents

Our bylaws specifically provide that we may maintain insurance, at our expense, to protect us and our directors, officers, employees, or agents, against any liability asserted against and incurred by them in their capacity as directors, officers, employees, or agents, whether or not we would have had the power to indemnify against such liability.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to our directors, officers and controlling persons under the foregoing provisions, or otherwise, we have been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable.

ADDITIONAL INFORMATION

We file annual, quarterly, and special reports, proxy statements, and other information with the Securities and Exchange Commission. This prospectus constitutes a part of a registration statement filed by us with the Securities and Exchange Commission. This prospectus omits certain of the information contained in the registration statement, and we refer you to the registration statement and the related exhibits for further information with respect to us and the securities offered under this prospectus. Any statements in this prospectus concerning any exhibit are not necessarily complete and in such instances we refer you to the copy of such exhibit filed with the Securities and Exchange Commission. Each statement is qualified in its entirety by such reference.

Our Form 10-KSB for the year ended December 31, 2003, and Form 10-QSB from the three-months ended March 31, 2004, are hereby incorporated by reference into this prospectus. We will provide copies of these documents to any person who requests copies orally or in writing. To obtain a copy, please contact: *Executive Vice President and Chief Financial Officer Gregory E. Smith at P.O. Box 1867, Sanford, Florida 32772-1867, (407) 323-1833 or (800) 226-2829.*

You can obtain and copy the registration statement, including the exhibits and any other reports we have filed, in person or by mail, by paying prescribed rates at the Public Reference Room of the Securities and Exchange Commission at 450 Fifth Street, N.W., Washington, D.C. 20549, or at the Securities and Exchange Commission's regional office located at 1401 Brickell Avenue, Suite 200, Miami, Florida 33131. You may obtain information on the operation of the Public Reference Room by calling the Securities and Exchange Commission at 1-800-SEC-0330. In addition, the Securities and Exchange Commission maintains a World Wide Web site at <http://www.sec.gov> that contains reports, proxy and information statements that are filed electronically with the Securities and Exchange Commission.

You may obtain more information about us and our products at our website located at www.federaltrust.com.

EXPERTS

Report of Independent Registered Public Accounting Firm

Federal Trust Corporation

Sanford, Florida:

We have audited the accompanying consolidated balance sheets of Federal Trust Corporation and Subsidiary (the Company) as of December 31, 2003 and 2002 and the related consolidated statements of earnings, stockholders' equity and cash flows for each of the three years in the period ended December 31, 2003. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2003 and 2002, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2003, in conformity with U.S. generally accepted accounting principles.

FEDERAL TRUST CORPORATION AND SUBSIDIARY

Notes to Consolidated Financial Statements

At December 31, 2003 and 2002 and for Each of the Three Years in the Period

Ended December 31, 2003 and at March 31, 2004 (Unaudited) and

for the Three Months Ended March 31, 2004 and 2003 (Unaudited)

(1) Organization and Summary of Significant Accounting Policies

General. The accompanying consolidated financial statements at March 31, 2004 and for the three-month periods ended March 31, 2004 and 2003 are unaudited; however, in the opinion of management, all adjustments necessary for the fair presentation of the consolidated financial statements have been included. All such adjustments are of a normal recurring nature. The results for the three months ended March 31, 2004 are not necessarily indicative of the results which may be expected for the entire year.

Organization. Federal Trust Corporation (Federal Trust) is the sole shareholder of Federal Trust Bank (the Bank). Federal Trust operates as a unitary savings and loan holding company. Federal Trust's primary business activity is the operation of the Bank. The Bank is federally-chartered as a stock savings bank. The Bank's deposits are insured up to the applicable limits by the Federal Deposit Insurance Corporation. The Bank provides a wide range of banking services to individual and corporate customers through its six offices located in Orange, Seminole and Volusia Counties, Florida. FTB Financial, Inc., a wholly-owned subsidiary of the Bank, was established in May 1996, to provide investment services to customers of the Bank. FTB Financial, Inc. ceased operations in September 2003, and is currently inactive. The other wholly-owned subsidiary of the Bank, Vantage Mortgage Service Center, Inc., (Vantage) operated as a broker for the residential mortgage secondary market. Vantage ceased operations on March 31, 2001 and was dissolved on September 21, 2001.

In September 2003, Federal Trust Statutory Trust I (the Statutory Trust I) was formed for the sole purpose of issuing \$5,000,000 of trust preferred securities as more fully discussed in Note 9. In accordance with Financial Accounting Standards Interpretation No. 46 *Consolidation of Variable Interest Entities* (as revised December 2003), Federal Trust accounts for Statutory Trust I under the equity method of accounting.

Basis of Financial Statement Presentation. The consolidated financial statements include the accounts of Federal Trust, the Bank and the Bank's subsidiaries (together, the Company). All significant intercompany accounts and transactions have been eliminated in consolidation.

The accounting and reporting policies of the Company conform to accounting principles generally accepted in the United States of America and prevailing practices within the banking industry. The following summarizes the more significant of these policies and practices.

Use of Estimates. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of

Edgar Filing: - Form

contingent assets and liabilities at the date of the consolidated financial statements and the reported amount of revenues and expenses during the reporting period. The most significant estimates made by management that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses and foreclosed assets. Actual results could differ from these estimates.

Table of Contents

FEDERAL TRUST CORPORATION AND SUBSIDIARY

Notes to Consolidated Financial Statements, Continued

(1) Organization and Summary of Significant Accounting Policies, Continued

Cash and Cash Equivalents. For the purposes of reporting cash flows, cash and cash equivalents includes cash and due from banks and interest-earning deposits with maturities of three months or less.

The Bank is required by law or regulation to maintain cash reserves in the form of vault cash or in a noninterest-earning account with the Federal Reserve Bank or in noninterest-earning accounts with other qualified banks. These reserve balances at March 31, 2004 (unaudited), December 31, 2003 and 2002 were approximately \$658,000, \$472,000 and \$311,000, respectively.

Securities. The Company may classify its securities as either trading, held to maturity or available for sale. Trading securities are held principally for resale and recorded at their fair values. Unrealized gains and losses on trading securities are included immediately in earnings. Held-to-maturity securities are those which the Company has the positive intent and ability to hold to maturity and are reported at amortized cost. Available-for-sale securities consist of securities not classified as trading securities nor as held-to-maturity securities. Unrealized holding gains and losses, net of tax, on available-for-sale securities are excluded from earnings and reported in other comprehensive income. Gains and losses on the sale of available-for-sale securities are recorded on the trade date and determined using the specific-identification method. Premiums and discounts on securities available for sale are recognized in interest income using the interest method over the period to maturity.

Loans. Loans that management has the intent and the Company has the ability to hold until maturity or payoff, are reported at their outstanding unpaid principal balance, adjusted for premiums or discounts on loans purchased, charge-offs and recoveries, the allowance for loan losses and deferred fees and costs on originated loans.

Loan origination fees are deferred and certain direct loan origination costs are capitalized. Both are recognized in earnings over the contractual life of the loans, adjusted for estimated prepayments based on the Company's historical prepayment experience. If the loan is prepaid, the remaining unamortized fees and costs are charged to earnings. Amortization is ceased on nonaccrual loans.

Loans are placed on nonaccrual status when the loan becomes more than 90 days past due as to interest or principal, unless the loan is both well collateralized and in the process of collection, or when the full, timely collection of interest or principal becomes uncertain. When a loan is placed on nonaccrual status, the accrued and unpaid interest receivable is written off and the loan is accounted for on the cash or cost recovery method thereafter, until qualifying for return to accrual status.

The Company considers a loan to be impaired when it is probable that the Company will be unable to collect all amounts due, both principal and interest, according to the contractual terms of the loan agreement. When a loan is impaired, the Company may measure impairment based on (a) the present value of the expected future cash flows of the impaired loan discounted at the loan's original effective interest rate, (b) the observable market price of the impaired loan, or (c) the fair value of the collateral of a collateral-dependent loan. The Company selects the measurement method on a loan-by-loan basis, except for collateral-dependent loans for which foreclosure is probable, are measured at the fair value of the

Edgar Filing: - Form

collateral. In a troubled debt restructuring involving a restructured loan, the Company measures impairment by discounting the total expected future cash flows at the loan's original effective rate of interest.

Table of Contents

FEDERAL TRUST CORPORATION AND SUBSIDIARY

Notes to Consolidated Financial Statements, Continued

(1) Organization and Summary of Significant Accounting Policies, Continued

Loans Held for Sale. Loans originated that are intended to be sold in the secondary market are carried at the lower of cost or estimated fair value in the aggregate. Net unrealized losses are recognized through a valuation allowance by charges to earnings. The Company had approximately \$579,000, \$679,000 and \$1,801,000 of loans held for sale at March 31, 2004 (unaudited), December 31, 2003 and 2002, respectively, which are included in loans on the accompanying consolidated balance sheets and the fair value of these loans exceeded book value in the aggregate.

Loan origination fees are deferred and direct loan origination costs are capitalized until the related loan is sold, at which time the net fees are included in the gain on sale of loans held for sale in the consolidated statements of earnings.

Allowance for Loan Losses. The Company follows a consistent procedural discipline and accounts for loan loss contingencies in accordance with Statement of Financial Accounting Standards No.5, *Accounting for Contingencies* (Statement 5). The following is a description of how each portion of the allowance for loan losses is determined.

The Company segregates the loan portfolio for loan loss purposes into the following broad segments: commercial real estate; residential real estate; commercial business; and consumer loans. The Company provides for a general allowance for losses inherent in the portfolio by the above categories, which consists of two components. First, general loss percentages are calculated based upon historical analyses. Second, a supplemental portion of the allowance is calculated for inherent losses which probably exist as of the evaluation date even though they might not have been identified by the more objective processes used for the portion of the allowance described above. This is due to the risk of error and/or inherent imprecision in the process. This supplemental portion of the allowance is particularly subjective and requires judgments based on qualitative factors which do not lend themselves to exact mathematical calculations such as; trends in delinquencies and nonaccruals; migration trends in the portfolio; trends in volume, terms, and portfolio mix; new credit products and/or changes in the geographic distribution of those products; changes in lending policies and procedures; loan review reports; changes in the outlook for local, regional and national economic conditions and concentrations of credit risk.

Specific allowances are provided in the event that the specific collateral analysis on each classified loan indicates that the probable loss upon liquidation of collateral would be in excess of the general percentage allocation. The provision for loan losses is debited or credited in order to state the allowance for loan losses to the required level.

Regulatory examiners may require the Company to recognize additions to the allowance based upon their judgments about the information available to them at the time of their examination. Management believes that the allowance for loan losses is adequate.

Mortgage Servicing Rights. Mortgage servicing rights are the rights to receive a portion of the interest coupon and fees collected from the mortgagor for performing specified servicing activities when loans are sold, with servicing retained. The total cost of loans originated or acquired is allocated between the mortgage servicing rights and the mortgage loans, without the servicing rights, based on relative fair values.

Table of Contents**FEDERAL TRUST CORPORATION AND SUBSIDIARY****Notes to Consolidated Financial Statements, Continued****(1) Organization and Summary of Significant Accounting Policies, Continued**

Mortgage Servicing Rights, Continued. Mortgage servicing rights are amortized in proportion to and over the period of the estimated net servicing revenue. They are evaluated for impairment by comparing the carrying amount of the servicing rights to their fair value. Fair value is estimated based on the market prices of similar mortgage servicing assets and on discounted future net cash flows considering market prepayment estimates, historical prepayment rates, portfolio characteristics, interest rates and other economic factors. For purposes of measuring impairment, the mortgage servicing rights are stratified by the predominant risk characteristics which include product types of the underlying loans and interest rates of mortgage notes. Impairment, if any, is recognized through a valuation reserve for each impaired stratum and is included in amortization of mortgage servicing rights. At March 31, 2004 (unaudited) and December 31, 2003, the Company had a valuation allowance of \$100,000 and \$70,000, respectively. There was no valuation allowance at December 31, 2002.

Foreclosed Assets. Assets acquired in the settlement of loans are initially recorded at the lower of cost (principal balance of the former loan plus costs of obtaining title and possession) or estimated fair value at the date of acquisition. Subsequently, such assets acquired are carried at the lower of cost or fair value less estimated costs to sell. Costs relating to development and improvement of foreclosed assets are capitalized, whereas costs relating to holding the foreclosed assets are charged to earnings.

Premises and Equipment. Land is stated at cost. Premises and equipment and leasehold improvements are stated at cost less accumulated depreciation and amortization. Depreciation is computed using the straight-line method over the estimated useful lives of the related assets. Amortization of leasehold improvements is computed using the straight-line method over the lesser of the estimated useful lives or the respective lease terms, including renewal options expected to be exercised. Major renovations and betterments of property are capitalized; maintenance, repairs, and minor renovations and betterments are expensed in the period incurred. Upon retirement or other disposition of the assets, the asset cost and related accumulated depreciation or amortization are removed from the accounts, and gains or losses are included in earnings.

Stock Compensation Plans. Statement of Financial Accounting Standards (SFAS) No. 123, *Accounting for Stock-Based Compensation*, as amended by SFAS No. 148 *Accounting for Stock-Based Compensation Transition and Disclosure*, (collectively, SFAS No. 123), encourages all entities to adopt a fair value based method of accounting for employee stock compensation plans, whereby compensation cost is measured at the grant date based on the value of the award and is recognized over the service period, which is usually the vesting period. However, it also allows an entity to continue to measure compensation cost for those plans using the intrinsic value based method of accounting prescribed by Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* (APB No. 25), whereby compensation cost is the excess, if any, of the quoted market price of the stock at the grant date (or other measurement date) over the amount an employee must pay to acquire the stock. The Company accounts for their stock option plans under the recognition and measurement principles of APB No. 25.

Comprehensive Income. Accounting principles generally require that recognized revenue, expenses, gains and losses be included in net earnings. Although certain changes in assets and liabilities, such as unrealized gains and losses on available-for-sale securities, are reported as a separate component of the equity section of the consolidated balance sheets, such items, along with net earnings, are components of comprehensive income.

The components of other comprehensive income and related tax effects are as follows (in thousands):

	Three Months Ended		Year Ended December 31,

Earnings Per Share of Common Stock. The Company follows the provisions of Financial Accounting Standards No. 128, *Earnings Per Share* (SFAS No. 128). SFAS No. 128 provides accounting and reporting standards for calculating earnings per share. Basic earnings per share of common stock has been computed by dividing the net earnings for the period by the weighted-average number of shares outstanding. Shares of common stock purchased by the Company's Employee Stock Ownership Plan (ESOP) are considered outstanding when the shares are allocated to participants. Diluted earnings per share is computed by dividing net earnings by the weighted-average number of shares outstanding including the dilutive effect of stock options computed using the treasury stock method. The following table presents the calculation of basic and diluted earnings per share of common stock (in thousands, except per share amounts):

	Three Months Ended		Year Ended December 31,		
	March 31,		2003		
	2004	2003	2003	2002	2001
	(Unaudited)				
Weighted-average shares outstanding before adjustment for unallocated ESOP shares	6,662	6,591	6,592	5,991	5,060

Additional dilutive shares using the average market value for the period utilizing the treasury stock method regarding stock options	154	90	113	12	
Weighted-average shares and equivalents outstanding for diluted earnings per share	6,683	6,681	6,662	6,003	5,060
Diluted earnings per share	\$.12	.10	.42	.34	.25

Income Taxes. Federal Trust, the Bank and the Bank's subsidiaries file a consolidated income tax return. Income taxes are allocated between Federal Trust, the Bank and the Bank's subsidiaries as though separate income tax returns were filed.

F-17

Table of Contents

FEDERAL TRUST CORPORATION AND SUBSIDIARY

Notes to Consolidated Financial Statements, Continued

(1) Organization and Summary of Significant Accounting Policies, Continued

Income Taxes, Continued. The Company accounts for income taxes under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be realized or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in earnings in the period that includes the enactment date. Valuation allowances are provided against assets which are not likely to be realized.

Off-Balance-Sheet Financial Instruments. In the ordinary course of business, the Company has entered into off-balance-sheet financial instruments consisting of commitments to extend credit, unused lines of credit, standby letters of credit and undisbursed construction loans in process. Such financial instruments are recorded in the consolidated financial statements when they are funded.

Recent Pronouncements. In November 2002, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 45, *Guarantor s Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness to Others* (FIN 45), which expands previously issued accounting guidance and disclosure requirements for certain guarantees. FIN 45 requires the Company to recognize an initial liability for the fair value of an obligation assumed by issuing a guarantee. The provision for initial recognition and measurement of the liability is applied on a prospective basis to guarantees issued or modified after December 31, 2002. The adoption of FIN 45 did not have a material affect on the Company s consolidated financial statements.

In June 2002, the FASB issued SFAS No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*. SFAS No. 146 provides guidance on the recognition and measurement of liabilities for costs associated with exit or disposal activities. SFAS No. 146 is effective for exit and disposal activities that are initiated after December 31, 2002. The adoption of this Statement had no effect on the Company s consolidated financial statements.

In April 2003, the FASB issued SFAS No. 149, *Amendment of Statement 133 on Derivative Instruments and Hedging Activities*. This Statement amends and clarifies financial accounting and reporting for derivative instruments, including certain derivative instruments embedded in other contracts (collectively referred to as derivatives) and for hedging activities under FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*. This Statement is effective for contracts entered into or modified after June 30, 2003. The adoption of this Statement had no effect on the Company s consolidated financial statements.

In May 2003, the FASB issued SFAS No. 150, *Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity*. This Statement establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. This Statement is effective for financial instruments entered into or modified after May 31, 2003, and otherwise is effective at the beginning of the first interim period beginning after June 15, 2003. The adoption of this Statement had no effect on the Company s consolidated financial statements.

Edgar Filing: - Form

At March 31, 2004 (unaudited) and December 31, 2003, the Company did not have any securities that have been in a unrealized loss position for over twelve months. The unrealized losses are due to a decline in market rates. Management believes that these losses are temporary and due to the nature of the securities expects all principal balances to be collected.

Gross losses from sales	(33)			(27)	

Edgar Filing: - Form

Net (loss) gain	\$	(1)	195	363	229	170
-----------------	----	-----	-----	-----	-----	-----

In March 1996, the Company transferred a security in the amount of \$7,000,000 from the available for sale category to the held to maturity category at its then fair value resulting in an unrealized loss of approximately \$781,000. The unrealized loss was being amortized over the remaining term of the security. During 2001, the Company sold this security at a gain of approximately \$81,000 and the remaining unrealized loss was fully amortized.

(4) Loan Servicing

Edgar Filing: - Form

Loans serviced for other entities are not included in the accompanying consolidated balance sheets. The unpaid principal balances of these loans were approximately \$86.6 million, \$92.7 million and \$114.1 million at March 31, 2004 (unaudited), December 31, 2003 and 2002, respectively. Loan servicing income (expense), net of amortization of mortgage servicing rights, was approximately \$(19,000), \$15,000, \$(123,000), \$97,000 and \$335,000 for the three months ended March 31, 2004 and 2003 (unaudited) and the years ended December 31, 2003, 2002 and 2001, respectively and is included in other noninterest income on the consolidated statements of earnings.

Table of Contents**FEDERAL TRUST CORPORATION AND SUBSIDIARY****Notes to Consolidated Financial Statements, Continued****(4) Loan Servicing, Continued**

The balance of capitalized servicing rights, net of valuation allowances, at March 31, 2004 (unaudited), December 31, 2003 and 2002, was approximately \$856,000, \$973,000 and \$1,325,000, respectively. The fair value of these rights were approximately \$856,000, \$973,000 and \$1,426,000, respectively. The fair value of servicing rights at March 31, 2004 (unaudited) and December 31, 2003 was determined using discount rates ranging from 8% to 10% and prepayment speeds ranging from 8% to 36%, depending upon the stratification of the specific right.

The following summarizes mortgage servicing rights capitalized and amortized, along with the aggregate activity in related valuation allowances (in thousands):

	Three Months Ended		Year Ended December 31,		
	March 31,		Year Ended December 31,		
	2004	2003	2003	2002	2001
	(Unaudited)

Accumulated depreciation of approximately \$136,000, \$124,000 and \$74,000 at March 31, 2004 (unaudited), and December 31, 2003 and 2002, respectively related to bank premises under capital lease.

During February 2002, the Company entered into a land lease for a branch facility in Casselberry, Florida. As part of the lease, the Company paid cash of \$200,000 and issued 83,333 shares of common stock. The Company expended approximately \$788,000 in construction costs and the branch opened in December 2002.

During 2003, the Company completed the construction of another branch facility in Orange City, Florida that opened in September 2003. The Company also opened a leased branch facility in Deltona, Florida in June 2003. The Company owns land near this leased branch and is in the process of constructing a permanent facility. The Company expects to expend approximately \$800,000 in construction and equipment costs to complete the new Deltona branch and it is expected to open by the end of the second quarter of 2004.

During 2001, the Company entered into a lease agreement for its administrative office building, which qualifies as a capital lease. The lease term for the building is fifteen years with fixed annual lease payments and an option to purchase the building for \$1 at the end of the term. Future minimum lease payments under this capital lease are as follows at March 31, 2004 (unaudited) and December 31, 2003 (in thousands):

Table of Contents**FEDERAL TRUST CORPORATION AND SUBSIDIARY****Notes to Consolidated Financial Statements, Continued****(7) Federal Home Loan Bank Advances, Continued**

The security agreement with FHLB includes a blanket floating lien requiring the Company to maintain qualifying first mortgage loans, discounted at 75% of the unpaid principal balances, as pledged collateral in an amount equal to at least 100% of the total advances outstanding. The FHLB also requires the purchase of FHLB common stock in proportion to the amount of advances outstanding. The FHLB stock is also pledged as collateral for these advances.

(8) Other Borrowings

At December 31, 2002, the Company had a line of credit agreement with a commercial bank that permitted the Company to borrow up to \$6,000,000. The line of credit bore interest at the prime lending rate plus 50 basis points and was secured by all the Bank's common stock. Borrowings under the line of credit agreement were to mature five years after the date of the borrowing. At December 31, 2002, the outstanding balance under the line of credit agreement was approximately \$915,000.

During 2003, the Company entered into a new loan agreement with another correspondent bank. Under this agreement, the Company can borrow up to \$6,000,000 under a revolving line of credit (LOC) for general operations and up to \$2,000,000 on a separate nonrevolving line of credit (ESOP LOC) for common stock purchases relating to the Company's Employee Stock Ownership Plan. Both lines are secured by all the Bank's common stock and both have interest rates of prime minus 12.5 basis points as long as the Company maintains certain loan-to-Company book value percentages. The Company initially used the proceeds from the LOC to pay off the old line of credit. The new loan agreement also has certain covenants that the Company is required to meet. There were no changes to these balances during the three months ended March 31, 2004 (unaudited). The following summarizes the balances and other information pertaining to these loans at March 31, 2004 (unaudited) and December 31, 2003 (\$ in thousands):

	<u>Outstanding Balance</u>	<u>Available Balance</u>	<u>Interest Rate</u>	<u>Interest Due</u>	<u>Principal Due</u>
LOC	\$ 4,212	1,788	3.875%	Quarterly	Beginning in June 2005 principal amortizes over 10 year schedule-due June 2015
ESOP LOC	1,005	995	3.875%	Quarterly	Annual principal repayments of 10% of outstanding balance increasing 5% per year, due in full in June 2009
Total	\$ 5,217	2,783			

Edgar Filing: - Form

Total interest expense on other borrowings for the three months ended March 31, 2004 and 2003 (unaudited) and the years ended December 31, 2003, 2002 and 2001, was approximately \$51,000, \$12,000, \$137,000, \$84,000 and \$187,000, respectively.

FEDERAL TRUST CORPORATION AND SUBSIDIARY

Notes to Consolidated Financial Statements, Continued

(9) Junior Subordinated Debentures

On September 17, 2003, Statutory Trust I sold adjustable-rate Trust Preferred Securities due September 17, 2033 in the aggregate principal amount of \$5,000,000 (the Trust Preferred Securities) in a pooled trust preferred securities offering. The interest rate on the Trust Preferred Securities adjusts quarterly, to a rate equal to the then current three-month London Interchange Bank Offering Rate (LIBOR), plus 295 basis points (4.05% at March 31, 2004 (unaudited) and December 31, 2003). In addition, Federal Trust contributed capital of \$155,000 to Statutory Trust I for the purchase of the common securities of Statutory Trust I. The proceeds from these sales were paid to Federal Trust in exchange for \$5,155,000 of its adjustable-rate Junior Subordinated Debentures (the Debentures) due September 17, 2033. The Debentures have the same terms as the Trust Preferred Securities. The sole asset of Statutory Trust I, the obligor on the Trust Preferred Securities, is the Debentures.

Federal Trust has guaranteed Statutory Trust I's payment of distributions on, payments on any redemptions of, and any liquidation distribution with respect to, the Trust Preferred Securities. Cash distributions on both the Trust Preferred Securities and the Debentures are payable quarterly in arrears on March 17, June 17, September 17 and December 17 of each year.

The Trust Preferred Securities are subject to mandatory redemption: (i) in whole, but not in part, upon repayment of the Debentures at stated maturity or, at the option of Federal Trust, their earlier redemption in whole upon the occurrence of certain changes in the tax treatment or capital treatment of the Trust Preferred Securities, or a change in the law such that Statutory Trust I would be considered an Investment Company; and (ii) in whole or in part at any time on or after September 17, 2008 contemporaneously with the optional redemption by Federal Trust of the Debentures in whole or in part. The Debentures are redeemable prior to maturity at the option of Federal Trust: (i) on or after September 17, 2008, in whole at any time or in part from time to time; or (ii) in whole, but not in part, at any time within 90 days following the occurrence and continuation of certain changes in the tax treatment or capital treatment of the Trust Preferred Securities, or a change in law such that Statutory Trust I would be considered an Investment Company, required to be registered under the Investment Company Act of 1940.

(10) Fair Value of Financial Instruments

The fair value of a financial instrument is the current amount that would be exchanged between willing parties, other than in a forced liquidation. Fair value is best determined based upon quoted market prices. However, in many instances, there are no quoted market prices for the Company's various financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Accordingly, the fair value estimates may not be realized in an immediate settlement of the instrument or may not necessarily represent the underlying fair value of the Company. The following methods and assumptions were used by the Company in estimating fair values of financial instruments:

Cash and Cash Equivalents - The carrying amount of cash and cash equivalents represents fair value.

Edgar Filing: - Form

Securities Available for Sale - The fair value of securities available for sale are based on quoted market prices. If quoted market prices are not available, fair values are based on quoted market values of comparable instruments.

(continued)

F-28

Table of Contents

FEDERAL TRUST CORPORATION AND SUBSIDIARY

Notes to Consolidated Financial Statements, Continued

(10) Fair Value of Financial Instruments, Continued

Federal Home Loan Bank Stock - The stock is not publicly traded and the estimated fair value is based on its redemption value of \$100 per share.

Loans - For variable rate loans that reprice frequently and have no significant change in credit risk, fair values are based on carrying values. Fair values for residential, commercial real estate, commercial and consumer loans other than variable rate loans are estimated using discounted cash flow analysis, using the Office of Thrift Supervision (OTS) pricing model. Fair values of impaired loans are estimated using discounted cash flow analysis or underlying collateral values, where applicable.

Mortgage Servicing Rights - The fair value of mortgage servicing rights is based on a valuation performed by an independent third-party using certain assumptions relating to the Company's servicing portfolio.

Deposits - The fair values disclosed for noninterest-bearing demand, interest-bearing demand, money-market and savings deposits are, by definition, equal to the amount payable on demand (that is their carrying amounts). Fair values for time deposits are estimated using the OTS pricing model.

Federal Home Loan Bank Advances - Fair value for Federal Home Loan Bank advances are estimated using the OTS pricing model.

Other Borrowings and Junior Subordinated Debentures - Fair values of these borrowings are estimated using discounted cash flow analysis based on the Company's current borrowing rates for similar types of borrowing arrangements.

Accrued Interest - The carrying amounts of accrued interest receivable and accrued interest payable approximates fair value.

Off-Balance-Sheet Instruments - Fair values for off-balance-sheet lending commitments are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing.

Table of Contents

FEDERAL TRUST CORPORATION AND SUBSIDIARY

Notes to Consolidated Financial Statements, Continued

(10) Fair Value of Financial Instruments, Continued

Because many commitments expire without being funded in whole or part, the contract amounts are not estimates of future cash flows.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since some of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained if deemed necessary by the Company upon extension of credit is based on management's credit evaluation of the counterparty.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loans to customers.

Loan commitments written have off-balance-sheet credit risk because only original fees are recognized in the balance sheet until the commitments are fulfilled or expire. Credit risk represents the accounting loss that would be recognized at the reporting date if counterparties failed completely to perform as contracted. The credit risk amounts are equal to the contractual amounts, assuming that the amounts are fully advanced, and that collateral or other security is of no value.

The Company's policy is to require customers to provide collateral prior to the disbursement of approved loans. The amount of collateral obtained, if it is deemed necessary by the Company upon extension of credit, is based on management's credit evaluation of the counterparty. Collateral held varies but may include accounts receivable, inventory, real estate and income producing commercial properties.

(12) Regulatory Capital

The Bank is subject to certain restrictions on the amount of dividends that it may declare and distribute to the Holding Company without prior regulatory approval.

The Bank is also subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a

Edgar Filing: - Form

direct material effect on the Bank's and the Company's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of the Bank's assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts and percentages (set forth in the table below) of total and Tier I capital (as defined in the regulations) to total and risk-weighted assets (as defined in the regulations). Management believes, as of March 31, 2004 (unaudited) and December 31, 2003, that the Bank meets all capital adequacy requirements to which it is subject.

(continued)

F-34

Table of Contents**FEDERAL TRUST CORPORATION AND SUBSIDIARY****Notes to Consolidated Financial Statements, Continued****(12) Regulatory Capital, Continued**

As of March 31, 2004 (unaudited) and December 31, 2003, the most recent notification from the Office of Thrift Supervision categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain total risk-based, Tier I risk-based and Tier I leverage percentages as set forth in the table. There are no conditions or events since that notification that management believes have changed the institution's category. The following table summarizes the capital thresholds for each prompt corrective action capital category. An institution's capital category is based on whether it meets the threshold for all three capital ratios within the category. The Bank's actual capital amounts and percentages are also presented in the table (\$ in thousands).

	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	%	Amount	%	Amount	%
At March 31, 2004 (Unaudited):

(13) Stock Option Plans

The Company has two stock options plans. The Key Employee Stock Compensation Program (the Employee Plan) is authorized to issue up to 475,000 shares (amended) through the exercise of incentive stock options, compensatory stock options, stock appreciation rights or performance shares. All awards granted under the Employee Plan have been incentive stock options. These options have ten year lives and vest ratably over various terms up to five years. At March 31, 2004 (unaudited) and December 31, 2003, the Company had 24,142 and 27,113 options available for future grants under the Employee Plan.

(continued)

Edgar Filing: - Form

F-35

Table of Contents**FEDERAL TRUST CORPORATION AND SUBSIDIARY****Notes to Consolidated Financial Statements, Continued****(13) Stock Option Plans, Continued**

The Directors' Stock Option Plan (the Director Plan) is authorized to issue up to 140,000 shares (amended). All options granted under the Director Plan have ten year lives, vest immediately and are not exercisable for a period of six months after the grant date. At March 31, 2004 (unaudited) and December 31, 2003, no options under the Director Plan were available for future grants.

During 1998, 350,000 options were granted under both plans at an exercise price less than the then market price. This amount was being expensed over the related vesting periods of options still outstanding. These options were fully vested during the second quarter of 2003, consequently there was no compensation costs relating to these options during the three months ended March 31, 2004 (unaudited). Compensation costs relating to these options was approximately \$6,000, \$10,000, \$27,000 and \$44,000 for the three months ended March 31, 2003 (unaudited) and the years ended December 31, 2003, 2002 and 2001, respectively.

A summary of stock option transactions follows (\$ in thousands, except per share data):

	Number of Options	Range of Per Share Option Price	Aggregate Option Price

	520,383	\$ 5.09	517,418	\$ 5.08

(14) Employee Benefit Plans

The Company maintains a qualified employee stock ownership plan (the ESOP). The ESOP is qualified under Section 4975(e)(7) of the Internal Revenue Code. In addition, the ESOP meets all applicable requirements of the Tax Reform Act of 1986 and is qualified under Section 401 (k) of the Internal Revenue Code. At the discretion of the Board of Directors (the BOD), the Company may make a contribution to the ESOP of up to 15% of total compensation paid to employees during the year. Employees are 100% vested after five years of service. Forfeited shares, if any, are redistributed to ESOP participants. The ESOP purchases the Company's common stock in the open market. During 2003, the ESOP began acquiring shares to hold for future allocations. At March 31, 2004 (unaudited) and December 31, 2003, the ESOP held 131,139 and 135,592 unallocated shares at a total cost of \$947,000 and \$979,000, respectively. For the three months ended March 31, 2004 and 2003 (unaudited) and the years ended December 31, 2003, 2002 and 2001, the Company incurred compensation costs of approximately \$43,000, \$19,000, \$140,000, \$238,500 and \$100,000, respectively related to the ESOP.

In addition, the Company sponsors an employee savings plan (the 401(k) Plan), which qualifies as a 401(k) plan under the Internal Revenue Code. Under the 401(k) Plan, employees may contribute up to 15% of their pre-tax compensation. The Company makes matching contributions based on a BOD-approved matching schedule. Participants vest immediately in their own contributions and after three years of service in matching contributions made by the Company. One of the options to 401(k) Plan participants is the Company's common stock. The 401(k) Plan Administrator will purchase the Company's common stock in open-market transactions after each pay period for those electing to purchase the Company's stock. 401(k) Plan expenses for the three months ended March 31, 2004 and 2003 (unaudited) and the years ended December 31,

Edgar Filing: - Form

2003, 2002 and 2001 were approximately \$21,000, \$17,000, \$62,000, \$65,000 and \$40,000, respectively.

Table of Contents

FEDERAL TRUST CORPORATION AND SUBSIDIARY

Notes to Consolidated Financial Statements, Continued

(14) Employee Benefit Plans, Continued

During 2002, the Company began sponsoring the Key Employee Stock Bonus Plan (the Bonus Plan). The Bonus Plan is authorized to acquire and issue up to 2% of the Company's outstanding common stock to non-executive officer employees of the Company. The Company makes BOD-approved contributions to the Bonus Plan. The Bonus Plan then purchases the Company's common stock in open-market transactions and distributes these shares to employees as they are awarded. During 2002, the Company recognized expense of \$36,500, in connection with the Bonus Plan. No expenses were recognized during 2004 (unaudited) or 2003.

(15) Executive Supplemental Income Plan

The Company has an executive supplemental income plan (the Plan) to provide supplemental income for certain executives after their retirement. The funding of the Plan involved the purchase of life insurance policies. The Plan is structured such that each participant is scheduled to receive specified levels of income after the retirement age of 65 for a certain number of years. In the event a participant leaves the employment of the Company before retirement, only the benefits vested through that date would be paid to the employee. The Plan also provides for 100% vesting in the event of a change in Company ownership. The accounting for the Plan is as follows: Monthly, the Company records the mortality cost as a reduction of the asset. Interest for the policies is recorded to the asset and salary continuation expenses are accrued.

The Company has approximately \$610,000, \$562,000 and \$316,000 in deferred compensation accrued at March 31, 2004 (unaudited) and December 31, 2003 and 2002, respectively, which is included in other liabilities in the accompanying consolidated balance sheets. The Company recognized net earnings (expense) of approximately \$22,000, \$1,000, \$(40,000), \$82,000 and \$57,000, consisting of the earnings on bank-owned life insurance policies, net of compensation expenses accrued, in connection with the Plan during the three months ended March 31, 2004 and 2003 (unaudited) and the years ended December 31, 2003, 2002 and 2001, respectively.

(16) Legal Contingencies

Various legal claims also arise from time to time in the normal course of business which, in the opinion of management of the Company, will not have a material effect on the Company's consolidated financial statements.

(17) Concentration of Credit Risk

The Company originates real estate, consumer and commercial loans primarily in its Central Florida market area but purchases loans on real estate throughout the continental United States. Although the Company has a diversified loan portfolio, a substantial portion of its borrowers ability to honor their contracts is dependent upon the economy of Central Florida. The Company does not have a significant exposure to any individual customer or counterparty.

Edgar Filing: - Form

The Company manages its credit risk by limiting the total amount of arrangements outstanding with individual customers, by monitoring the size and maturity structure of the loan portfolio, by obtaining collateral based on management's credit assessment of the customers, and by applying a uniform credit process for all credit exposures.

Accounting Fees	10,000
Printing expenses	5,000
Miscellaneous	5,000
	<hr/>
Total	\$ 392,216
	<hr/>

Item 15: *Indemnification of Directors and Officers*

As provided under Florida law, Federal Trust's directors shall not be personally liable to Federal Trust or its stockholders for monetary damages for breach of duty of care or any other duty owed to Federal Trust as a director, unless the breach of or failure to perform those duties constitutes:

a violation of criminal law, unless the director had reasonable cause to believe his conduct was lawful, or had no reasonable cause to believe his conduct was unlawful;

a transaction from which the director received an improper personal benefit;

an unlawful corporate distribution;

an act or omission which involves a conscious disregard for the best interests of the Corporation or which involves willful misconduct;
or

an act of recklessness or an act or omission which was committed in bad faith or with malicious purpose or in a manner exhibiting wanton and willful disregard of human rights, safety, or property.

Article XI of Federal Trust's articles of incorporation provides that Federal Trust shall indemnify a director who has been successful in the defense of any proceeding to which he was a party, or in defense of any claim, issue or matter therein, because he is or was a director of Federal Trust, against reasonable expenses incurred by him in connection with such defense.

Edgar Filing: - Form

Federal Trust's articles also provide that Federal Trust is required to indemnify any director, officer, employee or agent made a party to a proceeding because he is or was a director, employee or agent against liability incurred in the proceeding if he acted in a

II-1

manner he believed in good faith or to be in or not opposed to the best interests of Federal Trust and, in the case of any criminal proceeding, he had no reasonable cause to believe his conduct was unlawful. Determination concerning whether or not the applicable standard of conduct has been met can be made by:

a disinterested majority of the Board of Directors;

a majority of a committee of disinterested directors;

independent legal counsel; or

an affirmative vote of a majority of shares held by disinterested stockholders.

ITEM 16: Exhibits

The following exhibits are filed with or incorporated by reference into this report. The exhibits which are marked by an (a) were previously filed as a part of, and are hereby incorporated by reference from Registrant's Registration Statement on Form SB-1, as effective with the Securities and Exchange Commission (SEC) on October 7, 1997, Registration No. 333-30883. The exhibits which are marked by a (b) were previously filed as a part of, and are hereby incorporated by reference from Registrant's 1998 Definitive Proxy Statement. The exhibits which are marked with a (c) were previously filed with the SEC, and are hereby incorporated by reference from Registrant's 1999 Form 10-KSB. Item 17. Undertakings.

The undersigned registrant hereby undertakes:

Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers and controlling persons of the Registrant pursuant to the foregoing provisions, or otherwise, the Registrant has been advised that in the opinion of the Commission such indemnification is against public policy as expressed in the Act and is, therefore, unenforceable.

In the event that a claim for indemnification against such liabilities (other than the payment by the Registrant of expenses incurred or paid by a director, officer or controlling person of the Registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the Registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Act and will be governed by the final adjudication of such issue.
