Item 2.02 Results of Operations and Financial Condition.

First Quarter Results of Operations

On April 19, 2007, Cooper Industries, Ltd. (the "Company") issued the press release attached hereto as Exhibit 99.1 setting forth the Company's results of operations for the first quarter of 2007. The press release includes a reference to free cash flow and the Company's net debt-to-total capitalization ratio. Reconciliations of these non-GAAP financial measures to the most directly comparable GAAP financial measures are set forth in the press release.

Company management believes that the presentation of free cash flow provides investors an efficient means by which they can evaluate the Company's capacity in the period to reduce debt, repurchase shares and make acquisitions or other investments. Management also uses free cash flow to assess the Company's operating performance and includes free cash flow as a criteria for determining incentive compensation for key employees. Company management believes that the net debt-to-total capitalization ratio provides investors with a supplemental ratio that reflects the Company's debt leverage if the Company were to use its cash to pay down debt.

Item 9.01 Financial Statements and Exhibits.

Exhibits

99.1 Company press release dated April 19, 2007 titled, "Cooper Industries Reports First Quarter Revenues Up 12 Percent and Earnings Per Share Up 25 Percent."
