QUICKLOGIC CORPORATION

NOTES TO CONDENSED UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 1 — The Company and Basis of Presentation

QuickLogic Corporation, referenced herein as QuickLogic or the Company, was founded in 1988 and reincorporated in Delaware in 1999. The Company develops and markets low power programmable solutions that enable customers to add differentiated features and capabilities to their mobile, consumer and industrial products. The Company is a fabless semiconductor company that designs, markets and supports Customer Specific Standard Products, or CSSPs, Field Programmable Gate Arrays, or FPGAs, application solutions, associated design software and programming hardware.

The accompanying interim consolidated financial statements are unaudited. In the opinion of management, these statements have been prepared in accordance with generally accepted accounting principles, or GAAP, and include all adjustments, consisting only of normal recurring adjustments, necessary to provide a fair statement of results for the interim periods presented. The Company recommends that these consolidated financial statements be read in conjunction with the Company's Form 10-K for the year ended January 3, 2010. Operating results for the three and six months ended July 4, 2010 are not necessarily indicative of the results that may be expected for the full year. Included in the second quarter of 2010 is an out of period adjustment in the amount of \$78,000 that increased the loss in the quarter.

QuickLogic's fiscal year ends on the Sunday closest to December 31. QuickLogic's second fiscal quarter for 2010 and 2,009 ended Sunday, July 4, 2010 and June 28, 2009, respectively.

Liquidity

We have financed our operations and capital investments through sales of common stock, private equity investments, capital and operating leases and a bank line of credit. As of July 4, 2010, our principal sources of liquidity consisted of our cash and cash equivalents of \$17.8 million, available credit under our revolving line of credit with Silicon Valley Bank of \$4.0 million, which expires June 29, 2011, and our investment in TowerJazz Semiconductor Ltd. (formerly known as Tower Semiconductor Ltd.) with a fair value of approximately \$0.9 million.

The Company anticipates that its existing cash resources will fund operations, finance purchases of capital equipment and provide adequate working capital for the next twelve months. The Company's liquidity is affected by many factors including, among others, the level of revenue and gross profit as a result of the cyclical nature of the semiconductor industry and the rate of recovery, if any, from the global economic recession, the conversion of design opportunities into revenue, market acceptance of existing and new products including CSSPs based on our ArcticLink™ and PolarPro® solution platforms, fluctuations in revenue as a result of product end-of-life, fluctuations in revenue as a result of the stage in the product life cycle of our customers' products, costs of securing access to and availability of adequate manufacturing capacity, levels of inventories, wafer purchase commitments, customer credit terms, the amount and timing of research and development expenditures, the timing of new product introductions, production volumes, product quality, sales and marketing efforts, the value and liquidity of our investment portfolio, the amount and financing arrangements for purchases of capital equipment, changes in operating assets and liabilities, the ability to obtain or renew debt financing and to remain in compliance with the covenants of existing credit facilities, the ability to raise funds from the sale of shares of TowerJazz Semiconductor Ltd., or TowerJazz, the equity in the Company, the issuance and exercise of stock options and participation in the Company's employee stock purchase plan, and other factors related to the uncertainties of the industry and global economics. Accordingly, there can be no assurance that events in the future will not require the Company to seek additional capital or, if so required, that such capital will be available on terms acceptable to the Company.

Principles of Consolidation

The consolidated financial statements include the accounts of QuickLogic Corporation and its wholly owned subsidiaries, QuickLogic International, Inc., QuickLogic Canada Company, QuickLogic Kabushiki Kaisha and QuickLogic Software (India) Private Ltd. All inter-company transactions and balances have been eliminated in the accompanying financial statements.

Foreign Currency

The functional currency of the Company's non-U.S. operations is the U.S. dollar. Accordingly, all monetary assets and liabilities of these foreign operations are translated into U.S. dollars at current period-end exchange rates and non-monetary assets and related elements of expense are translated using historical exchange rates. Income and expense elements are

Table of Contents

QUICKLOGIC CORPORATION

NOTES TO CONDENSED UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS -- (Continued)

translated to U.S. dollars using average exchange rates in effect during the period. Gains and losses from the foreign currency transactions of these subsidiaries are recorded as interest income and other, net in the statement of operations.

Uses of Estimates

The preparation of these consolidated financial statements in conformity with GAAP, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates, particularly in relation to revenue recognition, the allowance for doubtful accounts, sales returns, valuation of investments, valuation of long-lived assets, valuation of inventories including identification of excess quantities, market value and obsolescence, measurement of stock-based compensation awards, accounting for income taxes and estimating accrued liabilities.

Concentration of Risk

The Company's accounts receivable are denominated in U.S. dollars and are derived primarily from sales to customers located in North America, Europe and Asia Pacific. The Company performs ongoing credit evaluations of its customers and generally does not require collateral. See Note 11 for information regarding concentrations associated with accounts receivable. The Company's investment in TowerJazz is subject to equity risk. See Note 4 for information regarding the Company's investment in TowerJazz.

Note 2 — Significant Accounting Policies

There have been no material changes in the Company's significant accounting policies for the second quarter of 2010 from its disclosure in the Annual Report on Form 10-K for the year ended January 3, 2010, except as described below. For a discussion of the significant accounting policies, please see the Annual Report on Form 10-K for the fiscal year ended January 3, 2010, filed with the Securities Exchange Commission, or SEC, on March 12, 2010.

New Accounting Pronouncements

In January 2010, the Financial Accounting Standards Board, or FASB, issued amended guidance on fair value measurements and disclosures. The new guidance requires a reporting entity to disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and to describe the reasons for the transfers. It also amends disclosures about post retirement benefit plan assets, and provides clarification regarding the level of disaggregation of fair value disclosures by investment class. This guidance is effective for interim and annual reporting periods beginning after December 15, 2009, except for certain Level 3 activity disclosure requirements that will be effective for reporting periods beginning after December 15, 2010. Accordingly, the Company adopted this amendment in the quarter ended April 4, 2010, except for the additional Level 3 requirements which will be adopted in 2011. See Note 7 - Fair Value Measurements.

In February 2010, the FASB issued amended guidance on subsequent events. Under this amended guidance, SEC filers are no longer required to disclose the date through which subsequent events have been evaluated in originally issued and revised financial statements. This guidance was effective immediately and we adopted this new guidance in the quarter ended April 4, 2010.

In April 2010, the FASB's EITF issued new authoritative guidance addressing the milestone method of revenue recognition. The guidance provides the criteria that should be met for determining whether the milestone method of revenue recognition is appropriate. A vendor can recognize consideration that is contingent upon achievement of a milestone in its entirety as revenue in the period in which the milestone is achieved only if the milestone meets all criteria to be considered substantive. The following criteria must be met for a milestone to be considered substantive: (1) be commensurate with either the level of effort required to achieve the milestone or the enhancement of the value of the item delivered as a result of a specific outcome resulting from the vendor's performance to achieve the milestone; (2) related solely to past performance; and (3) be reasonable relative to all deliverables and payment terms in the arrangement. No bifurcation of an individual milestone is allowed and there can be more than one milestone in an arrangement. Accordingly, an arrangement may contain both substantive and non-substantive milestones. This guidance is effective on a prospective basis for milestones achieved in fiscal years, and interim periods within those years, beginning on or after June 15, 2010. The Company will adopt the new guidance addressing certain milestone method of revenue recognition in the third quarter of fiscal 2010 beginning July 5, 2010 and the adoption is not expected to have any material impact on our condensed consolidated financial statements.

Table of Contents

QUICKLOGIC CORPORATION

NOTES TO CONDENSED UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS -- (Continued)

Note 3 — Net Loss Per Share

Basic net loss per share is computed by dividing net loss available to common stockholders by the weighted average number of common shares outstanding during the period. Diluted net loss per share was computed using the weighted average number of common shares outstanding during the period plus potentially dilutive common shares outstanding during the period under the treasury stock method. In computing diluted net loss per share, the weighted average stock price for the period is used in determining the number of shares assumed to be purchased from the exercise of stock options.

For the second quarter and the first half of 2010 and 2009, 9.5 million and 9.5 million shares, respectively, associated with equity awards outstanding and the estimated number of shares to be purchased under the current offering period of the 2009 Employee Stock Purchase Plan were not included in the calculation of diluted net loss per share, as they were considered antidilutive due to the net loss the Company experienced during these periods.

Note 4 — Investment in TowerJazz Semiconductor Ltd.

During the first quarter of fiscal year 2010, the Company sold 700,000 of the TowerJazz ordinary shares. As of July 4, 2010, the Company held 645,000 available-for-sale TowerJazz ordinary shares with an unrealized gain of \$0.8 million recorded in accumulated other comprehensive income on the balance sheet, representing the difference between the carrying value of \$0.13 per share and \$1.38 per share, their fair value on the last trading day of the reporting period. The fair value of TowerJazz marketable securities as of July 4, 2010 was determined based on “Level 1” inputs as described in Note 7. The Company plans to continue to hold at least 450,000 of the TowerJazz ordinary shares until the end of 2010 in order to receive preferred product pricing under the agreements with TowerJazz and has recorded these shares as a short-term investment on the balance sheets.

During the years of 2001 and 2002, the Company also received \$4.7 million in prepaid wafer credits in partial consideration for the investment. During 2008, the Company assessed the value of its TowerJazz wafer credit and incurred a long-lived asset impairment of \$1.3 million. During the third quarter of 2009, the Company assessed the value of its TowerJazz wafer credit and incurred a long-lived asset impairment of \$150,000. As of July 4, 2010, the net prepaid wafer credits balance after impairment and amortization was \$64,000. The Company has guaranteed capacity at TowerJazz through December 2010. These credits can be applied toward wafer purchases from TowerJazz at 15% of the value of purchases made through 2010.

Revolving Line of Credit

In June 2010, the Company entered into the Sixth Amendment to Second Amended and Restated Loan and Security Agreement with Silicon Valley Bank. The terms of the amended agreement include a \$6 million revolving line of credit available through June 2011, as long as the Company is in compliance with the loan covenants. Upon each advance, the Company can elect a variable interest rate, which is the prime rate plus one half of one percent (0.50%), or a fixed rate which is

Table of Contents

QUICKLOGIC CORPORATION

NOTES TO CONDENSED UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS -- (Continued)

LIBOR plus the LIBOR rate margin, as the case may be.

During the second quarter of 2010, the Company repaid \$2.0 million of revolving debt at an interest rate of 6% and borrowed \$2.0 million of revolving debt with an interest rate of 4.5% as of July 4, 2010.

The bank has a first priority security interest in substantially all of the Company's tangible and intangible assets to secure any outstanding amounts under the agreement. Under the terms of the agreement, except as noted above, the Company must maintain a minimum tangible net worth of at least \$15 million, adjusted quick ratio of 2 to 1 and a minimum cash balance of at least \$8 million with Silicon Valley Bank. The agreement also has certain restrictions including, among others, on the incurrence of other indebtedness, the maintenance of depository accounts, the disposition of assets, mergers, acquisitions, investments, the granting of liens and the payment of dividends. The Company was in compliance with the financial covenants of the agreement as of the end of the current reporting period.

Capital Leases

In January 2010, the Company leased design software and related maintenance under a two-year capital lease at an imputed interest rate of 5.75% per annum. Terms of the agreement require the Company to make quarterly payments of approximately \$38,000 through November 2011. The Company recorded a capital asset of \$233,000 and prepaid maintenance of \$51,000 that is being amortized over the term of the agreement and a capital lease obligation of \$284,000. As of July 4, 2010, \$214,000 was outstanding under the capital lease, of which \$141,000 was classified as a current liability.

In January 2009, the Company leased design software tools and related maintenance under a three-year capital lease at an imputed interest rate of 5.75% per annum. Terms of the agreement require the Company to make semi-annual payments of principal and interest of, approximately \$138,000 through August 2011, for a total of approximately \$825,000 over the three years period. As of July 4, 2010, \$390,000 was outstanding under the capital lease, of which \$256,000 was classified as a current liability.

Note 7 — Fair Value Measurements

The guidance for the fair value option for financial assets and financial liabilities provides companies the option to measure many financial assets and liabilities at fair value with changes in fair value recognized in earnings or equity. The Company has not elected to measure any financial assets or liabilities at fair value that were not previously required to be measured at fair value.

The authoritative guidance specifies a hierarchy of valuation techniques based upon whether the inputs to those valuation techniques reflect assumptions other market participants would use based upon market data obtained from independent sources (observable inputs) or reflect the company's own assumption of market participant valuation (unobservable inputs). The fair value hierarchy consists of the following three levels:

- Level 1 - Inputs are quoted prices in active markets for identical assets or liabilities.

- Level 2 - Inputs are quoted prices for similar assets or liabilities in an active market, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable and

market-corroborated inputs which are derived principally from or corroborated by observable market data.

-

Level 3 - Inputs are derived from valuation techniques in which one or more significant inputs or value drivers are unobservable.

The following table presents the Company's financial assets that are measured at fair value on a recurring basis as of July 4, 2010, consistent with the fair value hierarchy provisions of the authoritative guidance (in thousands):

11

(1) Money market funds which were invested in a U.S. Treasury money market fund, are presented as a part of cash and cash equivalents on the accompanying consolidated balance sheets as of July 4, 2010 and January 3, 2010.

As of July 4, 2010, there is no material difference between the fair value and the carrying amount of the debt outstanding under the Company's line of credit and capital leasing arrangements.

Note 8 — Employee Stock Plans

1999 Stock Plan

The Company adopted the 1999 Stock Plan, or 1999 Plan, in September 1999. The 1999 Plan provided for the issuance of incentive and nonqualified options, restricted stock units and restricted stock. Equity awards granted under the 1999 Plan have a term of up to ten years. Options typically vest at a rate of 25% one year after the vesting commencement date, and one forty-eighth for each month of service thereafter.

2009 Stock Plan

The 2009 Stock Plan, or 2009 Plan, was adopted by the Board of Directors in March 2009 and approved by the Company's stockholders on April 22, 2009. As of July 4, 2010, approximately 3.7 million shares were reserved for issuance under the 2009 Plan. Equity awards that are cancelled, forfeited or repurchased under the 1999 Plan also become available for grant under the 2009 Plan, up to a maximum of an additional 7,500,000 shares. Equity awards granted under the 2009 Plan have a term of up to ten years. Options typically vest at a rate of 25% one year after the vesting commencement date, and one forty-eighth for each month of service thereafter. The Company may implement different vesting schedules in the future with respect to any new equity awards.

Employee Stock Purchase Plan

The 2009 Employee Stock Purchase Plan, or 2009 ESPP, was adopted by the Board of Directors in March 2009 and approved by the Company's stockholders on April 22, 2009. The Company has reserved 2.3 million shares for issuance under the 2009 ESPP. The 2009 ESPP provides for six month offering periods. Participants purchase shares through payroll deductions of up to 20% of an employee's total compensation (maximum of 20,000 shares per offering period). The 2009 ESPP permits the Board of Directors to determine, prior to each offering period, whether participants purchase shares at: (i) 85% of the fair market value of the common stock at the end of the offering period;

or (ii) 85% of the lower of the fair market value of the common stock at the beginning or the end of an offering period. The Board of Directors has determined that, until further notice, for future offering periods the participant's purchase price will be the lower of (i) 85% of the fair market value of the common stock at the end of the offering period; or (ii) 85% of the lower of the fair market value of the common stock at the beginning or the end of an offering period.

Note 9 — Stock-Based Compensation

Stock-based compensation expense is recognized in the Company's consolidated statements of operations and includes compensation expense for the stock-based compensation awards granted or modified subsequent to January 1, 2006, based on the grant date fair value estimated in accordance with the provisions of the amended authoritative guidance. The impact of the amended authoritative guidance on the Company's consolidated financial statements for the second quarter of 2010 and 2009 was as follows (in thousands):

Table of Contents

QUICKLOGIC CORPORATION

NOTES TO CONDENSED UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS -- (Continued)

	Three Months Ended		Six Months Ended	
	July 4, 2010	June 28, 2009	July 4, 2010	June 28, 2009
Cost of revenue	\$ 39	\$ 71	\$ 86	\$ 122
Research and development	180	138	355	226
Selling, general and administrative	414	358	844	603
Total costs and expenses	\$ 633	\$ 567	\$ 1,285	\$ 951

The amount of stock-based compensation included in inventories for the second quarter of 2010 and 2009 was not significant.

Valuation Assumptions

The following weighted average assumptions are included in the estimated fair value calculations for stock option grants:

	Three Months Ended				Six Months Ended			
	July 4, 2010		June 28, 2009		July 4, 2010		June 28, 2009	
Expected term (years)	5.42		5.15		5.42		5.14	
Risk-free interest rate	2.40	%	1.98	%	2.40	%	1.97	%
Expected volatility	58.01	%	51.04	%	58.02	%	51.00	%
Expected dividend	—		—		—		—	

The weighted average estimated fair value for options granted during the second quarter of 2010 and 2009 were \$1.48 and \$0.75 per option, respectively. The weighted average estimated fair value for options granted during the first half of 2010 and 2009 was \$1.48 and \$0.74 per option, respectively. As of July 4, 2010, the fair value of unvested stock options, net of expected forfeitures, was approximately \$3.7 million. This unrecognized stock-based compensation expense is expected to be recorded over a weighted average period of 2.79 years.

Stock-Based Compensation Award Activity

The following table summarizes the shares available for grant under the 2009 Plan as of July 4, 2010:

	Shares Available for Grant (in thousands)
Balance at January 3, 2010	2,619
Authorized	—
Options granted	(1,739)
Options forfeited or expired	586
RSUs granted	(168)
RSUs forfeited or expired	—
Balance at July 4, 2010	1,298

Stock Options

The following table summarizes stock options outstanding and stock option activity under the 1999 Plan and the 2009 Plan, and the related weighted average exercise price, for the first half of 2010:

Table of Contents

QUICKLOGIC CORPORATION

NOTES TO CONDENSED UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS -- (Continued)

	Number of Shares (in thousands)	Weighted Average Exercise Price	Weighted Average Remaining Term (in years)	Aggregate Intrinsic Value (in thousands)
Balance outstanding at January 3, 2010	8,331	\$ 3.37		
Granted	1,739	2.79		
Forfeited or expired	(586)	9.62		
Exercised	(308)	1.49		
Balance outstanding at July 4, 2010	9,176	\$ 2.92	6.49	\$ 5,094
Exercisable at July 4, 2010	5,144	\$ 3.46	4.51	\$ 1,908
Vested and expected to vest at July 4, 2010	8,613	\$ 2.96	6.31	\$ 4,698

The aggregate intrinsic value in the table above represents the total pretax intrinsic value, based on the Company's closing stock price of \$2.94 as of the end of the Company's current reporting period, which would have been received by the option holders had all option holders exercised their options as of that date.

The total intrinsic value of options exercised during the first half of 2010 was \$409,000. Total cash received from employees as a result of employee stock option exercises during the first half of 2010 was approximately \$458,000. The Company settles employee stock option exercises with newly issued common shares. In connection with these exercises, there was no tax benefit realized by the Company due to its current loss position. There were no stock option exercises during the first half of 2009. Total stock-based compensation related to stock options were \$418,000 and \$793,000 for the second quarter and first half of 2010, respectively.

Restricted Stock Awards and Restricted Stock Units

The Company began issuing restricted stock awards, or RSAs in the second quarter of 2007 and restricted stock units, or RSUs, in the third quarter of 2007. RSAs entitle the holder to purchase shares of common stock at par value during a short period of time, and purchased shares are held in escrow until they vest. RSUs entitle the holder to receive, at no cost, one common share for each restricted stock unit as it vests. During the first quarter of 2010, the Company granted RSUs under the 2009 Plan, in lieu of cash compensation, that vest in one tranche on May 11, 2010. Total stock-based compensation related to RSUs was \$178,000 and \$407,000 for the second quarter and first half of 2010. The Company withheld shares in settlement of employee tax withholding obligations upon the vesting of restricted stock units. A summary of the Company's RSA and RSU activity and related information are as follows:

RSAs and RSUs Outstanding

	Number of Shares	Weighted Average Grant Date Fair Value
(in thousands)		
Nonvested at January 3, 2010	—	\$ —
Granted	168	2.43
Vested	(168)	2.43
Forfeited	—	—
Nonvested at July 4, 2010	—	\$ —

As of July 4, 2010, all RSUs are fully vested.

Employee Stock Purchase Plan

The weighted average estimated fair value, as defined by the amended authoritative guidance, of rights issued pursuant to the Company's 2009 ESPP plan during the second quarter of 2010 and 2009 was \$1.03 and \$0.63 per right, respectively.

As of July 4, 2010, 2,031,000 shares under the 2009 ESPP remained available for issuance. For the second quarter and

Table of Contents

QUICKLOGIC CORPORATION

NOTES TO CONDENSED UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS -- (Continued)

first half of 2010, the Company recorded compensation expense related to the ESPP of \$37,000 and \$85,000, respectively.

The fair value of rights issued pursuant to the Company's ESPP was estimated on the commencement date of each offering period using the following weighted average assumptions:

	Three Months Ended		Six Months Ended	
	July 4, 2010	June 28, 2009	July 4, 2010	June 28, 2009
Expected term (months)	6.00	6.00	6.00	6.00
Risk-free interest rate	0.22 %	0.29 %	0.22 %	0.29 %
Expected volatility	65.00 %	126.98 %	65.00 %	126.98 %
Expected dividend	—	—	—	—

As of July 4, 2010, the unrecognized stock-based compensation expense relating to the Company's ESPP was \$27,000 and is expected to be recognized over a weighted average period of approximately 4.5 months.

Note 10 — Income Taxes

In the second quarter of 2010 and 2009, the Company recorded an income tax expense of \$13,000 and an income tax benefit of \$15,000, respectively, which consisted primarily of income taxes on foreign operations offset by the monetization of prior year federal research credits. In the first half of 2010 and 2009, the Company recorded an income tax expense of \$28,000 and an income tax benefit of \$11,000, respectively, which consisted primarily of income taxes on foreign operations offset by the monetization of prior year federal research credits.

Based on the available objective evidence, management believes it is more likely than not that the net deferred tax assets will not be fully realizable. Accordingly, with the exception of foreign subsidiaries, the Company has provided a full valuation allowance against the associated deferred tax assets. The Company will continue to assess the realizability of the deferred tax assets in future periods.

The Company had approximately \$72,000 and \$70,000 of unrecognized tax benefits at July 4, 2010 and January 3, 2010, respectively. The Company recognizes interest and penalties related to uncertain tax positions in income tax expense. As of July 4, 2010, the Company had approximately \$17,000 of accrued interest and penalties related to uncertain tax positions.

The Company is no longer subject to U.S. federal, state and non-U.S. income tax audits by taxing authorities for fiscal years through 1992. It is reasonably possible that the Company's unrecognized tax benefits could decrease by \$32,000 within the next twelve months, depending on the outcome of certain statutes of limitation in foreign jurisdictions.

Note 11 — Information Concerning Product Lines, Geographic Information and Revenue Concentration

The Company identifies its business segments based on business activities, management responsibility and geographic location. For all periods presented, the Company operated in a single reportable business segment.

The following is a breakdown of revenue by product line (in thousands):

	Three Months Ended		Six Months Ended	
	July 4, 2010	June 28, 2009	July 4, 2010	June 28, 2009
Revenue by product line ⁽¹⁾ :				
New products	\$ 2,297	\$ 816	\$ 4,371	\$ 1,474
Legacy products	4,182	2,095	7,537	5,989
Total revenue	\$ 6,479	\$ 2,911	\$ 11,908	\$ 7,463

(1) For all periods presented: New products represent products introduced since 2005, and include ArcticLink, ArcticLink II, Eclipse™ II, PolarPro, PolarPro II, and QuickP®II. Legacy products include Eclipse, EclipsePlus, pASIC® 1, pASIC 2, pASIC 3, QuickFC, QuickMIPS, QuickPCI, QuickRAM®, and V3, as well as royalty revenue, programming hardware and software.

QUICKLOGIC CORPORATION

NOTES TO CONDENSED UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS -- (Continued)

The following is a breakdown of revenue by shipment destination (in thousands):

	Three Months Ended		Six Months Ended	
	July 4, 2010	June 28, 2009	July 4, 2010	June 28, 2009
Revenue by geography:				
United States	\$ 2,054	\$ 1,245	\$ 4,174	\$ 3,455
Europe	854	564	1,883	1,561
Taiwan	143	16	194	11
Japan	727	449	1,402	815
China	2,021	353	3,031	673
Rest of North America	84	111	269	328
Rest of Asia Pacific	596	173	955	620
Total revenue	\$ 6,479	\$ 2,911	\$ 11,908	\$ 7,463

The following distributors and customers accounted for 10% or more of the Company's revenue for the periods presented:

	Three Months Ended				Six Months Ended			
	July 4, 2010		June 28, 2009		July 4, 2010		June 28, 2009	
Distributor "A"	25	%	19	%	25	%	25	%
Distributor "B"	12	%	20	%	10	%	16	%
Distributor "C"	*		11	%	*		*	
Distributor "D"	25	%	*		20	%	*	
Customer "B"	10	%	*		*		14	%

* Represents less than 10% of revenue for the period presented.

Edgar Filing: QUICKLOGIC CORPORATION - Form 10-Q

The following distributors and customers accounted for 10% or more of the Company's accounts receivable as of the dates presented:

	July 4, 2010		January 3, 2010
Distributor "A"	24	%	15
			%
Distributor "C"	11	%	*
Distributor "D"	30	%	35
			%

* Represents less than 10% of accounts receivable as of the date presented.

As of July 4, 2010, less than 10% of the Company's long-lived assets, including property and equipment and other assets, were located outside the United States.

Note 12 — Commitments and Contingencies

Certain of the Company's wafer manufacturers require the Company to forecast wafer starts several months in advance. The Company is committed to take delivery of and pay for a portion of forecasted wafer volume. As of July 4, 2010 and January 3, 2010, the Company had \$3.2 million and \$2.8 million, respectively, of outstanding commitments for the purchase of wafer inventory.

The Company leases, with an option to renew, its primary facility under a non-cancelable operating lease that expires in 2012. In addition, the Company rents development facilities in Canada and India as well as sales offices in Europe and Asia. Total rent expense for the second quarter of 2010 and 2009 was approximately \$118,000 and \$145,000, respectively, and rent

Table of Contents

QUICKLOGIC CORPORATION

NOTES TO CONDENSED UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS -- (Continued)

expense for the first half of 2010 and 2009 was approximately \$237,000 and \$290,000, respectively.

Future minimum lease commitments under the Company's operating leases, excluding property taxes and insurance are as follows:

	Operating Leases (in thousands)
Fiscal Years	
Remainder of 2010	\$ 277
2011	536
2012	471
2013	40
2014 and thereafter	—
	\$ 1,324

Note 13 — Litigation

Initial Public Offering Securities Litigation

On October 26, 2001, a putative securities class action was filed in the U.S. District Court for the Southern District of New York against certain investment banks that underwrote QuickLogic's initial public offering, QuickLogic and some of QuickLogic's officers and directors. The complaint alleges excessive and undisclosed commissions in connection with the allocation of shares of common stock in QuickLogic's initial and secondary public offerings and artificially high prices through "tie-in" arrangements which required the underwriters' customers to buy shares in the aftermarket at pre-determined prices in violation of the federal securities laws. Plaintiffs seek an unspecified amount of damages on behalf of persons who purchased QuickLogic's stock pursuant to the registration statements between October 14, 1999 and December 6, 2000. Various plaintiffs have filed similar actions asserting virtually identical allegations against over 300 other public companies, their underwriters, and their officers and directors arising out of each company's public offering. These actions, including the action against QuickLogic, have been coordinated for pretrial purposes and captioned In re Initial Public Offering Securities Litigation, 21 MC 92, or IPO Securities Litigation.

The parties have reached a global settlement of the litigation. Under the settlement, the insurers are to pay the full amount of the settlement share allocated to the Company, and the Company will bear no financial liability. In addition, the Company, as well as the officer and director defendants who were previously dismissed from the action pursuant to tolling agreements, will receive complete dismissals from the case. On October 5, 2009, the Court entered an order granting final approval of the settlement. Certain objectors have filed appeals. The Company has not accrued any amount related to the proposed settlement because the amount is not reasonably estimable.

Patent Infringement Litigation

On August 31, 2009, Xpoint Technologies, Inc., served the Company with a complaint for patent infringement. The complaint was filed in the U.S. District Court for the District of Delaware against the Company and a number of other defendant companies in the mobile phone market. The complaint alleges wrongful manufacturing; and using, selling or offering to sell products that infringe patent number 5,913,028 (the “'028 Patent”) The '028 Patent pertains to a direct data-delivery system and method for program-controlled, direct transfer of data along a bus or data pathway between peer input/output devices in a data-processing apparatus or network. Plaintiff seeks a preliminary and permanent injunction enjoining defendants from further infringement of the claims of the patent, an unspecified amount of damages to compensate for defendants' infringement and treble damages based on defendants' copying and willful infringement of the '028 Patent. On September 21, 2009, Plaintiff served the Company with an Amended Complaint for Patent Infringement. The Company believes it has meritorious defenses and intends to defend the action vigorously.

No estimate can be made of the possible loss or possible range of loss associated with the resolution of these contingencies and, accordingly, the Company has not recorded a liability.

Table of Contents

QUICKLOGIC CORPORATION

NOTES TO CONDENSED UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS -- (Continued)

From time to time, the Company is involved in legal actions arising in the ordinary course of business, including but not limited to intellectual property infringement and collection matters. Absolute assurance cannot be given that third party assertions will be resolved without costly litigation in a manner that is not adverse to the Company's financial position, results of operations or cash flows or without requiring royalty or other payments in the future which may adversely impact gross profit.

Note 14 — Restructuring Charges

In April 2008, the Company decided to outsource certain development functions that were previously performed in-house. This reorganization resulted in a headcount reduction of approximately 13% of employees worldwide. In June 2008, the Company announced the completion of its CSSP focused operational realignment which included an additional 17% reduction in headcount worldwide, resulting in a total reduction in worldwide headcount of approximately 30%. The purpose of the operational realignment was to lower fixed costs in order to conserve cash, to reduce the Company's break-even revenue level and enable a quicker return to profitability, to provide optimal profitability scaling with revenue growth and to provide greater headroom for discretionary costs to enable new product revenue growth. Our restructuring liabilities are included in the "Accrued Liabilities" line item in our consolidated balance sheets as of July 4, 2010 and January 3, 2010. The remaining balance was paid out as of July 4, 2010.

Note 15 — Subsequent Events

In July 2010, the Company repaid \$2.0 million of revolving debt at an interest rate of 4.5%.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following Management's Discussion and Analysis of Financial Condition and Results of Operations, as well as information contained in "Risk Factors" in Part II, Item 1A and elsewhere in this Quarterly Report on Form 10-Q, contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. We intend that these forward-looking statements be subject to the safe harbors created by those provisions. Forward-looking statements are generally written in the future tense and/or are preceded by words such as "will," "may," "should," "forecast," "could," "expect," "suggest," "believe," "anticipate," "intend," "plan," or other similar words. Forward-looking statements include statements regarding (1) the conversion of our design opportunities into revenue, (2) our revenue levels, including the commercial success of our Customer Specific Standard Products, or CSSPs, and new products, (3) the effects of the worldwide economic downturn, (4) our liquidity, (5) our gross profit and breakeven revenue level and factors that affect gross profit and the breakeven revenue level, (6) our level of operating expenses, (7) our research and development efforts, (8) our partners and suppliers and (9) industry trends. The following discussion should be read in conjunction with the attached condensed unaudited consolidated financial statements and notes thereto, and with our audited consolidated financial statements and notes thereto for the fiscal year ended January 3, 2010, found in our Annual Report on Form 10-K filed with the Securities and Exchange Commission, or SEC, on March 12, 2010.

Overview

QuickLogic Corporation was founded in 1988 and reincorporated in Delaware in 1999. We develop and market low power customizable semiconductor solutions that enable customers to add new differentiated features to extend battery life in and improve the visual experience with their mobile consumer and mobile enterprise products. We are a fabless semiconductor company that designs, markets and supports primarily, Customer Specific Standard Products, or CSSPs, and, secondarily, Field Programmable Gate Arrays, or FPGAs, associated design software and programming hardware. Our CSSPs are customized semiconductor solutions created from our new solution platforms including ArcticLink®, ArcticLinkII, Eclipse™ II, PolarPro®, PolarPro II, and QuickPCI® II (all of which fall into our new product category). Our legacy products include Eclipse, EclipsePlus, pASIC® 1, pASIC 2, pASIC 3, QuickFC, QuickMIPS, QuickPCI, QuickRAM®, and V3, as well as royalty revenue, programming hardware and design software.

We market CSSPs to Original Equipment Manufacturers, or OEMs, and Original Design Manufacturers, or ODMs, that offer differentiated mobile products. The market for differentiated mobile devices is highly competitive and dynamic, with short end market product life cycles and rapid obsolescence of existing products.

Our target mobile markets include:

- Cellular - including Smartphones.
- Computing - including (i) Mobile Internet Devices, or MIDs, Netbooks, Smartbooks, Cloudbooks, Tablets, Ultra Mobile PCs, or UMPCs, and 3G USB broadband data cards and (ii) Mobile Enterprise applications such as USB secure authenticated data cards, personal digital assistants, or PDAs, portable thermal imaging printers, and handheld point-of-sales, or POS, terminals.
- Consumer Electronics - including E-Readers, portable media players, or PMPs, and personal navigation devices, or PNDs.

In addition to working directly with our customers, we partner with other companies with expertise in certain technologies to develop additional intellectual property, reference platforms and system software to provide application solutions. We also work with mobile processor manufacturers and companies that supply storage, networking or graphics components for embedded systems. The depth of these relationships varies depending on the partner and the dynamics of the end market being targeted, but is typically a co-marketing program that includes joint account calls, promotional activities and/or engineering collaboration and developments, such as reference designs.

During the third quarter of 2009, we introduced the latest in our family of Visual Enhancement Engine, or VEE, and Display Power Optimizer, or DPO, enabled solution platforms - ArcticLink II VX2 and VX4. The engineering validation has been completed for both platforms and the Company expects both platforms to go into production during the third quarter of 2010. CSSPs delivered from the VX2 and VX4 solution platforms will specifically address the power consumption and battery

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations — (Continued)

life issues associated with the market trend for larger, higher resolution displays in mobile products. iSuppli, a market research company, predicts global semiconductor revenue in 2010 to rise to \$300.3 billion, with revenue set to rise to \$300.3 billion, up 30.6% from \$229.9 billion in 2009. Consumer products, particularly in the wireless communications sector, are a strong driver for semiconductor sales. Moreover, the needs of the consumer market have a unique set of requirements. One important trend in the consumer market continues to be towards mobile, handheld devices.

Trends in the rapidly growing sub-segments of the consumer market in which we participate include:

- Mobile, Handheld Devices: Pyramid Research predicts that the Smartphone segment will capture 37% of the worldwide cell phone market by 2014, a leap from 16% in 2009. Pyramid is predicting more than 1.8 billion Smartphones will be sold over the next five years and the Smartphone segment is predicted to be one of the higher growth segments during the current economic downturn. According to figures from researchers at the NPD Group, Android-based handsets accounted for 28% of Smartphone shipments in the US in the first quarter of 2010, ahead of Apple's iPhone. During the first quarter of 2010, QuickLogic announced that it had successfully verified the first complete display controller solution using the Mobile Display Data Interface (MDDI) Type 2 interface for Smartbook, Smartphone, Cloudbook and Tablet applications using Qualcomm chipsets and running the Android operating system. The solution is implemented on an ArcticLink II VX4C solution platform, which includes QuickLogic's VEE and DPO technologies. This allows developers to deliver smoother, more fluid-like movement for multimedia and high-resolution gaming applications. According to Samsung Mobile Display, the world's number one maker of active-matrix OLEDs, "OLED screens could appear on 50% of all mobile phones within the next five years." To address this industry trend, in April 2010, QuickLogic announced the verification of QuickLogic's VEE and DPO technology with OLED displays. VEE technology greatly enhances the viewability of OLED displays under challenging conditions such as low brightness modes or bright ambient light by dynamically optimizing video characteristics to provide a better user experience. Working in concert with VEE, QuickLogic's DPO technology allows for display brightness to be lowered, consuming less power and extending battery life.

- Netbook/Smartbook/Cloudbook/Tablet Category: The Information Network, a market research company, predicts shipments of the combined Netbook, Smartbook and Cloudbook category will more than quadruple by 2012, rising to 96 million units, up from 23.5 million in 2009. This segment is largely driven by the desire for a consumer platform that combines the mobile computing and internet experience of notebooks with the day-long battery life of multimedia and Smartphones. During the third quarter of 2009, we announced the availability of a CSSP containing our VEE technology tailored to Intel Atom-based Netbooks that enabled reduced display backlight, delivering longer battery life to the consumer. Also in the third quarter of 2009, we announced a series of new Proven System Blocks, or PSBs, targeted at augmenting the functionality of ARM-based processors in Smartbooks and Cloudbooks including an I2C master controller, a pulse width modulator (PWM), a PS2 controller, and a low-power matrix keyboard controller. These new PSBs will be used by QuickLogic to deliver CSSPs for Smartbooks, Cloudbook and Tablets. Our DPO technology specifically addresses the power consumption issues associated with the large displays used in the high growth Smartbook, Cloudbooks and Tablet segments, whereas our VEE technology will be used to address the challenges of viewing multimedia content in bright sunlight viewing conditions. In July of 2010, we announced a collaboration with Texas Advanced Optoelectronic Solutions, Inc. (TAOS) whereby QuickLogic validated and approved the TAOS ambient light sensor products for use on QuickLogic's reference designs platforms. This collaboration will provide OEMs and ODMs a pre-verified starting point for managing backlight power and bright sunlight viewability through the use of QuickLogic and TAOS hardware and software.

•

USB-Based 3G Broadband Data Cards: Consumer demand for USB -based 3G data cards are expected to reach nearly 67 million units in 2010, according to the market research firm ABI Research. These data cards enable consumers to connect their Notebook, Netbook, Smartbook, Cloudbook or PC to the cellular network as a broadband Internet connection. A market trend in USB-Based 3G data cards is for operators to allow consumers to plug microSD memory cards into the modem. To help one of our partners, Icera Inc., quickly address this industry trend, QuickLogic developed multiple CSSPs that enable either microSD or High Speed USB, or both for adopters of Icera's 3G USB modem reference designs. In the first quarter of 2010, QuickLogic announced that its CSSPs are being adopted by Option® Wireless in a line of 3G Cat9 (10.1 Mbps) and Cat10 (14.4 Mbps) HSDPA USB modems - based on the Icera chipset - for wireless communications over cellular networks. Underlying industry trends affecting the large market for mobile

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations — (Continued)

devices include the use of platforms to enable rapid product proliferation, the need for high bandwidth solutions enabling mobile Internet and streaming video, miniaturization and the need to increase battery life. Another important trend is shrinking product life cycles, which drives a need for faster, lower risk product development. There is intense pressure on the total product cost of these devices, including per unit component costs and non-recurring development costs. As more people experience the advantages of a mobile lifestyle at home, they are demanding the same advantages in their professional lives while they are “on the go”, or mobile. Therefore, we believe that these trends toward mobile, handheld products that have a small form factor and maximize battery life will also be evident in other segments such as industrial, medical and military.

We have transitioned from being a broad-based supplier of FPGA devices to being a supplier of CSSPs primarily to the mobile market. Besides the global economic condition and competition in the semiconductor market, there are two other factors affecting our future growth: the rate at which we can increase revenue through the success of our CSSP strategy and an expected decline in revenue from end-of-life products. Accordingly, we expect our business growth to be driven by CSSPs and our CSSP revenue growth needs to be strong enough to enable us to achieve profitability while we continue to invest in the development, sales and marketing of our new silicon solution platforms, PSBs, and CSSPs. The gross margin associated with our CSSPs and new products is generally lower than the gross margin of our legacy products, due primarily to the price sensitive nature of the higher volume mobile consumer opportunities that we are pursuing with CSSPs.

As a cash conservation measure, we implemented a salary reduction plan for the second half of 2009 and first half of 2010. As a result, except for our CEO who took a 20% reduction, all executives and most of our other employees took a 10% reduction in cash based compensation. In lieu of cash based compensation, participating employees received grants of restricted stock units in July 2009 and again in February 2010 representing 10%, and in the case of our CEO, 20%, of each employee's salary for the remainder of the year. In connection with the Company's cash conservation program, each of our directors received a grant of fully vested RSUs in lieu of cash compensation equal to 20% of his/her base compensation payable for each of the third and fourth quarters of fiscal year 2009 and first and second quarters of 2010.

Critical Accounting Estimates

The methods, estimates and judgments we use in applying our most critical accounting policies have a significant impact on the results we report in our consolidated financial statements. The SEC has defined critical accounting policies as those that are most important to the portrayal of our financial condition and results of operations and require us to make our most difficult and subjective judgments, often as a result of the need to make estimates of matters that are inherently uncertain. Based on this definition, our critical policies include revenue recognition, valuation of inventories including identification of excess quantities and product obsolescence, allowance for doubtful accounts, sales returns, valuation of investments, valuation of long-lived assets, valuation of inventories including identification of excess quantities, market value and obsolescence, measurement of stock-based compensation, accounting for income taxes, fair value measurements of financial assets and liabilities, and measuring accrued liabilities. We believe that we apply judgments and estimates in a consistent manner and that such consistent application results in consolidated financial statements and accompanying notes that fairly represent all periods presented. However, any factual errors or errors in these judgments and estimates may have a material impact on our statements of operations and financial condition. For a discussion of critical accounting policies and estimates, please see Item 7 in our Annual Report on Form 10-K for the fiscal year ended January 3, 2010 filed with the SEC on March 12, 2010.

Results of Operations

The following table sets forth the percentage of revenue for certain items in our statements of operations for the periods indicated:

21

⁽¹⁾ The second quarter of 2009 includes \$58,000 of costs for the write-down of inventories and related charges, which represents 2.0% of revenue. The first half of 2010 and the first half of 2009 include \$73,000 and \$236,000, respectively, of costs for the write-down of inventories and related charges, which represents 0.6% and 3.2% of revenue, respectively.

Three Months Ended July 4, 2010 and June 28, 2009

Revenue

The table below sets forth the changes in revenue for the three months ended July 4, 2010 as compared to the three months ended June 28, 2009 (in thousands, except percentage data):

Revenue by product line ⁽¹⁾ :	Three Months Ended								
	July 4, 2010			June 28, 2009			Change		
	Amount	% of Total Revenues		Amount	% of Total Revenues		Amount	Percentage	
New products	\$ 2,297	35	%	\$ 816	28	%	\$ 1,481	181	%

Edgar Filing: QUICKLOGIC CORPORATION - Form 10-Q

Legacy products	4,182	65	%	2,095	72	%	2,087	100	%
Total revenue	\$ 6,479	100	%	\$ 2,911	100	%	\$ 3,568	123	%

(1) For all periods presented: New products represent products introduced since 2005, and include ArcticLink, ArcticLink II, Eclipse™ II, PolarPro, PolarPro II, and QuickP®III. Legacy products include Eclipse, EclipsePlus, pASIC® 1, pASIC 2, pASIC 3, QuickFC, QuickMIPS, QuickPCI, QuickRAM®, and V3, as well as royalty revenue, programming hardware and software.

We continued production shipments of new CSSPs to the mobile enterprise segment during the second quarter of 2010. The increase in legacy product revenue primarily resulted from the increase in customer demand for pASIC 3 products. One of our U.S. customers, purchasing primarily pASIC 3 devices, accounted for 10% and 8% of total revenue in the second quarters of 2010 and 2009, respectively.

In order to grow our revenue from its current level, we are dependent upon increased revenue from our existing new products, especially revenue from CSSPs designed using our ArcticLink, ArcticLink II, PolarPro and PolarPro II solution platforms and the development of additional new products and CSSPs.

We continue to seek to expand our revenue, including the pursuit of high volume sales opportunities in the consumer

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations — (Continued)

market segment, by providing CSSPs incorporating intellectual property such as boot from managed NAND or industry standard interfaces such as USB 2.0 OTG, SDIO and integrated drive electronics, or IDE, PS2, I2C, SPI, PWM and keyboard controllers. Our industry is characterized by intense price competition and by lower margins as order volumes increase. While winning large volume sales opportunities will increase our revenue, we believe these opportunities may decrease our gross profit as a percentage of revenue.

Gross Profit

The table below sets forth the changes in gross profit for the three months ended July 4, 2010 as compared to the three months ended June 28, 2009 (in thousands, except percentage data):

	Three Months Ended								
	July 4, 2010			June 28, 2009			Change		
	Amount	% of Total Revenues		Amount	% of Total Revenues		Amount	Percentage	
Revenue	\$ 6,479	100	%	\$ 2,911	100	%	\$ 3,568	123	%
Cost of revenue	2,553	39	%	1,589	55	%	964	61	%
Gross Profit	\$ 3,926	61	%	\$ 1,322	45	%	\$ 2,604	197	%

The \$2.6 million increase in gross profit in the first half of 2010 as compared to the first half of 2009 was mainly due to the increase in revenue in the second quarter of 2010 as compared to the second quarter of 2009. The second quarter 2010 revenue increase was due to a change in product mix towards legacy products which carry higher gross margins than new products; a reduction of excess and obsolescence write-downs in the second quarter of 2010 as compared to the second quarter of 2009; and a change to favorable purchase price variances in the second quarter of 2010 from unfavorable purchase price variances in the second quarter of 2009. The sale of previously reserved inventories contributed \$112,000, or 1.7% of revenue, to gross profit in the second quarter of 2010 and \$94,000, or 3.2% of revenue, in the second quarter of 2009. The amortization of TowerJazz prepaid wafer credit increased our cost of revenue by \$64,000 in the second quarter of 2009 and none in the second quarter of 2010.

Our semiconductor products have historically had a long product life cycle and obsolescence has not been a significant factor in the valuation of inventories. However, as we pursue opportunities in the mobile market and continue to develop new CSSPs and products, we believe our product life cycle will be shorter and increase the potential for obsolescence. We also regularly review the cost of inventories against estimated market value and record a lower of cost or market reserve for inventories that have a cost in excess of estimated market value, which could have a material impact on our gross margin and inventory balances based on additional write-downs to net realizable value or a benefit from inventories previously written down.

Operating Expenses

The table below sets forth the changes in operating expenses for the three months ended July 4, 2010 as compared to the three months ended June 28, 2009 (in thousands, except percentage data):

Three Months Ended

Edgar Filing: QUICKLOGIC CORPORATION - Form 10-Q

	July 4, 2010		June 28, 2009		Change	
	Amount	% of Total Revenues	Amount	% of Total Revenues	Amount	Percentage
R&D expense	\$ 1,533	24 %	\$ 1,877	65 %	\$ (344)	(18)%
SG&A expense	2,518	39 %	2,709	93 %	(191)	(7)%
Total operating expenses	\$ 4,051	63 %	\$ 4,586	158 %	\$ (535)	(12)%

Research and Development

Our research and development, or R&D, expenses consist primarily of personnel, overhead and other costs associated with engineering process improvements, programmable logic design, CSSP design and software development. The \$344,000 decrease in R&D expenses in the second quarter of 2010 as compared to the second quarter of 2009 is attributable primarily to

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations — (Continued)

\$509,000 or 76% decrease in third party chip design costs; and a \$38,000 or 31% decrease in depreciation due to decrease in leased software. These decreases were partially offset by an increase of \$123,000 or 30% in compensation expenses due to a higher headcount; a \$33,000 or 185% increase in travel and entertainment; a \$41,000 or 30% increase in stock-based compensation. The increase in stock-based compensation expenses was due to the issuance of RSUs to employees in lieu of 10% of their cash compensation.

Selling, General and Administrative Expense

Our selling, general and administrative, or SG&A, expenses consist primarily of personnel and related overhead costs for sales, marketing, finance, administration, human resources and general management. The \$191,000 decrease in SG&A expenses in the second quarter of 2010 as compared to the second quarter of 2009 resulted from our effort to realign resources with our expected revenue outlook and was primarily due to a \$288,000 or 21% decrease in compensation expenses as a result of headcount reductions; a \$80,000 or 20% decrease in occupancy costs; a \$50,000 or 86% decrease in depreciation expenses; and a \$30,000 or 30% decrease in equipment and supplies. These decreases were partially offset by a \$197,000 or 35% increase in outside services which include sales commissions and legal costs and a \$57,000 or 16% increase in stock-based compensation. The increase in stock-based compensation expense was due to the issuance of RSUs to employees in lieu of 10% of their cash compensation (20% in the case of the Company's CEO).

Interest Expense and Interest Income and Other, net

The table below sets forth the changes in Interest and Other Income (Expense), net, for the three months ended July 4, 2010 as compared to the three months ended June 28, 2009 (in thousands, except percentage data):

	Three Months Ended		Change	
	July 4, 2010	June 28, 2009	Amount	Percentage
Interest expense	\$ (27)	\$ (23)	\$ (4)	17 %
Interest income	(50)	45	(95)	(211)%
and other, net	\$ (77)	\$ 22	\$ (99)	(450)%

The decrease in interest expense is due primarily to the reduction of our average debt obligation to \$2.6 million in the second quarter of 2010 from \$3.1 million in the second quarter of 2009. The decrease in interest income and other, net was due primarily to the interest rate decrease and foreign exchange losses in the second quarter of 2010 as compared to the second quarter of 2009.

We conduct a portion of our research and development activities in Canada and India and we have sales and marketing activities in various countries outside of the United States. Most of these international expenses are incurred in local currency. Foreign currency transaction gains and losses are included in interest and other income (expense), net, as they occur. We do not use derivative financial instruments to hedge our exposure to fluctuations in foreign currency and, therefore, our results of operations are and will continue to be susceptible to fluctuations in foreign exchange gains or losses.

Provision for (Benefit from) Income Taxes

The table below sets forth the changes in provision for Income Taxes from the three months ended July 4, 2010 as compared to the three months ended June 28, 2009 (in thousands, except percentage data):

	Three Months Ended		Change	
	July 4, 2010	June 28, 2009	Amount	Percentage
Provision for (benefit from) income taxes	\$ 13	\$ (15)	\$ 28	(187)%

The provision for (benefit from) income taxes for the second quarters of 2010 and 2009 are primarily for our foreign

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations — (Continued)

operations which are cost-plus entities offset by the monetization of prior year federal research credits. As of the end of the second quarter of 2010, our ability to utilize our income tax loss carryforwards in future periods is uncertain and, accordingly, we recorded a full valuation allowance against the related US tax provision. We will continue to assess the realizability of deferred tax assets in future periods.

Six Months Ended July 4, 2010 and June 28, 2009

Revenue

The table below sets forth the changes in revenue for the six months ended July 4, 2010 as compared to the six months ended June 28, 2009 (in thousands, except percentage data):

	Six Months Ended			June 28, 2009			Change		
	July 4, 2010								
	Amount	% of Total Revenues		Amount	% of Total Revenues		Amount	Percentage	
Revenue by product line ⁽¹⁾ :									
New products	\$ 4,371	37 %		\$ 1,474	20 %		\$ 2,897	197 %	
Legacy products	7,537	63 %		5,989	80 %		1,548	26 %	
Total revenue	\$ 11,908	100 %		\$ 7,463	100 %		\$ 4,445	60 %	

(1) For all periods presented: New products represent products introduced since 2005, and include ArcticLink, ArcticLink II, Eclipse™ II, PolarPro, PolarPro II, and QuickP@II. Legacy products include Eclipse, EclipsePlus, pASIC® 1, pASIC 2, pASIC 3, QuickFC, QuickMIPS, QuickPCI, QuickRAM®, and V3, as well as royalty revenue, programming hardware and software.

In the first quarter of 2010, we began production shipments of new CSSPs to the mobile enterprise segment. We continued the shipments of CSSPs to the mobile consumer market during the second quarter of 2010. The increase in legacy product revenue primarily resulted from the increase in customer demand for pASIC 3 products. One of our U.S. customers, purchasing primarily pASIC 3 devices, accounted for 9% and 14% of total revenue in the first half of 2010 and 2009, respectively.

In order to grow our revenue from its current level, we are dependent upon increased revenue from our existing new products, especially revenue from CSSPs designed using our ArcticLink, ArcticLink II, PolarPro and PolarPro II solution platforms and the development of additional new products and CSSPs.

We continue to seek to expand our revenue, including the pursuit of high volume sales opportunities in the consumer market segment, by providing CSSPs incorporating intellectual property such as boot from managed NAND or industry standard interfaces such as USB 2.0 OTG, SDIO and integrated drive electronics, or IDE, PS2, I2C, SPI, PWM and keyboard controllers. Our industry is characterized by intense price competition and by lower margins as order volumes increase. While winning large volume sales opportunities will increase our revenue, we believe these opportunities may decrease our gross profit as a percentage of revenue.

Gross Profit

The table below sets forth the changes in gross profit for the six months ended July 4, 2010 as compared to the six months ended June 28, 2009 (in thousands, except percentage data):

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations — (Continued)

	Six Months Ended								
	July 4, 2010			June 28, 2009			Change		
	Amount	% of Total Revenues		Amount	% of Total Revenues		Amount	Percentage	
Revenue	\$ 11,908	100	%	\$ 7,463	100	%	\$ 4,445	60	%
Cost of revenue	4,669	39	%	3,408	46	%	1,261	37	%
Gross Profit	\$ 7,239	61	%	\$ 4,055	54	%	\$ 3,184	79	%

The \$3.2 million increase in gross profit in the first half of 2010 as compared to the first half of 2009 was mainly due to the increase in revenue in the first half of 2010 as compared to the first half of 2009. The first half of 2010 revenue increase was due to a change in product mix towards legacy products which carry higher gross margins than new products; a reduction of excess and obsolescence write-downs in the first half of 2010 as compared to the first half of 2009; and a change to favorable purchase price variances in the first half of 2010 from unfavorable purchase price variances in the first half of 2009. The sale of previously reserved inventories contributed \$300,000, or 2.5% of revenue, to gross profit in the first half of 2010 and \$215,000 or 2.9% of revenue, in the first half of 2009. The amortization of TowerJazz prepaid wafer credit increased our cost of revenue by \$157,000 in the first half of 2009 and none in the first half of 2010.

Our semiconductor products have historically had a long product life cycle and obsolescence has not been a significant factor in the valuation of inventories. However, as we pursue opportunities in the mobile market and continue to develop new CSSPs and products, we believe our product life cycle will be shorter and increase the potential for obsolescence. We also regularly review the cost of inventories against estimated market value and record a lower of cost or market reserve for inventories that have a cost in excess of estimated market value, which could have a material impact on our gross margin and inventory balances based on additional write-downs to net realizable value or a benefit from inventories previously written down.

Operating Expenses

The table below sets forth the changes in operating expenses for the six months ended July 4, 2010 as compared to the six months ended June 28, 2009 (in thousands, except percentage data):

	Six Months Ended								
	July 4, 2010			June 28, 2009			Change		
	Amount	% of Total Revenues		Amount	% of Total Revenues		Amount	Percentage	
R&D expense	\$ 3,593	30	%	\$ 3,489	47	%	\$ 104	3	%
SG&A expense	4,853	41	%	5,352	72	%	(499)	(9)	%
Total operating	\$ 8,446	71	%	\$ 8,841	119	%	\$ (395)	(4)	%

expenses

Research and Development

Our R&D expenses consist primarily of personnel, overhead and other costs associated with engineering process improvements, programmable logic design, CSSP design and software development. The \$104,000 increase in R&D expenses in the first half of 2010 as compared to the first half of 2009 is attributable primarily to a \$258,000 or 99% increase in purchased IP; a \$194,000 or 22% increase in compensation expenses as a result of additional headcount; a \$127,000 or 56% increase in stock-based compensation expenses; a \$56,000 or 99% increase in travel and entertainment. These increases were partially offset by a decrease of \$508,000 in outside services due to a reduced level of third party chip design costs; a \$61,000 or 9% decrease in allocation expenses for facility; and other corporate costs. The increase in stock-based compensation expenses was due to the issuance of RSUs to employees in lieu of 10% of their cash compensation.

Selling, General and Administrative Expense

Our SG&A expenses consist primarily of personnel and related overhead costs for sales, marketing, finance, administration, human resources and general management. The \$499,000 decrease in SG&A expenses in the first half of 2010 as compared to the first half of 2009 resulted from our effort to realign resources with our expected revenue outlook and was primarily due to a \$780,000 or 27% decrease in compensation expenses due to headcount reduction; a \$113,000 or 15%

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations — (Continued)

decrease in occupancy costs; a \$104,000 or 85% decrease in depreciation expenses; and a \$50,000 or 25% decrease in equipment and supplies. These decreases were partially offset by a \$265,000 or 25% increase in outside services which include sales commissions and legal costs; a \$243,000 or 40% increase in stock-based compensation; a \$29,000 or 8% increase in travel and entertainment; \$14,000 or 2% increase in allocations for facility; and other corporate costs. The increase in stock-based compensation expense was due to the issuance of RSUs to employees in lieu of 10% of their cash compensation (20% in the case of the Company's CEO)

Interest Expense and Interest Income and Other, net

The table below sets forth the changes in Interest and Other Income (Expense), net, for the six months ended July 4, 2010 as compared to the six months ended June 28, 2009 (in thousands, except percentage data):

	Six Months Ended		Change	
	July 4, 2010	June 28, 2009	Amount	Percentage
Gain on sale of TowerJazz Semiconductor Ltd. Shares	\$ 993	\$ —	\$ 993	— %
Interest expense	(45)	(47)	2	(4)%
Interest income and other, net	(71)	(1)	(70)	7,000 %
	\$ 877	\$ (48)	\$ 925	(1,927)%

The decrease in interest expense is due primarily to the reduction of our average debt obligation to \$2.6 million in the first half of 2010 from \$2.9 million in the first half of 2009. The decrease in interest income and other, net was due primarily to interest rate decrease and foreign exchange losses in the first half of 2010 as compared to the first half of 2009.

We conduct a portion of our research and development activities in Canada and India and we have sales and marketing activities in various countries outside of the United States. Most of these international expenses are incurred in local currency. Foreign currency transaction gains and losses are included in interest and other income (expense), net, as they occur. We do not use derivative financial instruments to hedge our exposure to fluctuations in foreign currency and, therefore, our results of operations are and will continue to be susceptible to fluctuations in foreign exchange gains or losses.

Provision for (benefit from) Income Taxes

The table below sets forth the changes in provision for Income Taxes from the six months ended July 4, 2010 as compared to the six months ended June 28, 2009 (in thousands, except percentage data):

	Six Months Ended		Change	
	July 4, 2010	June 28, 2009	Amount	Percentage
Provision for (benefit from) Income Taxes	\$ 28	\$ (11)	\$ 39	(355)%

The provision for (benefit from) income taxes for the first half of 2010 and 2009 are primarily for our foreign operations which are cost-plus entities offset by the monetization of prior year federal research credits. As of the end of the first half of 2010, our ability to utilize our income tax loss carryforwards in future periods is uncertain and, accordingly, we recorded a full valuation allowance against the related US tax provision. We will continue to assess the realizability of deferred tax assets in future periods.

Liquidity and Capital Resources

We have financed our operating losses and capital investments through sales of common stock, private equity investments, capital and operating leases, our bank line of credit and cash flows from operations. As of July 4, 2010, our principal sources of liquidity consisted of our cash and cash equivalents of \$17.8 million, available credit under our revolving line of credit with Silicon Valley Bank of \$4.0 million, and our investment in TowerJazz with a market value of approximately \$0.9 million. As of July 4, 2010, there is no material difference between the fair value and the carrying amount of the debt

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations — (Continued)

outstanding under the Company's line of credit and capital leasing arrangements. The borrowing under the Company's line of credit is subject to maintaining a tangible net worth of at least \$15 million, unrestricted cash or cash equivalent balance of at least \$8 million and a quick ratio of 2 to 1.

Most of our cash and cash equivalents were invested in a US Treasury money market fund rated AAAM/Aaa. Our interest-bearing debt consisted of \$2.0 million of revolving debt outstanding from Silicon Valley Bank and \$0.6 million outstanding under capital leases (see Note 6 of the Condensed Unaudited Consolidated Financial Statements). The term of the revolving debt facility runs until June 2011. Upon each advance, the Company can elect a variable interest rate, which is the prime rate plus one half of one percent, or a fixed rate which is the LIBOR plus the LIBOR rate margin. We were in compliance with all loan covenants as of the end of the current reporting period. During the first half of 2010, we sold 700,000 shares of the TowerJazz ordinary shares. As of July 4, 2010, our investment in TowerJazz had a market value of approximately \$0.9 million. We intend to hold 450,000 shares as a short term investment in order to obtain preferred wafer pricing from TowerJazz.

Net cash from operating activities

Net cash used for operating activities was \$1.6 million in the first half of 2010. The cash used for operating activities resulted from the net loss in the first half of 2010 as well as changes in working capital. The net loss of \$358,000 included non-cash charges of \$1.1 million which consist of the gain on the sale of TowerJazz shares of \$993,000, stock-based compensation of \$1.3 million, depreciation and amortization of \$582,000, utilization of wafer credits of \$190,000, and a write-down of inventory of \$73,000. The changes in the working capital accounts included an increase in accounts receivable of \$836,000, an increase in inventories of \$177,000, an increase in other assets of \$618,000, and a decrease in trade payable of \$765,000 due to the timing of expenditures. These cash uses in the working capital accounts were partially offset by an increase in other long term liabilities of \$116,000.

Net cash used for operating activities was \$2.6 million in the first half of 2009. The cash used for operating activities resulted primarily from a net loss of \$4.8 million, which included \$2.3 million of non-cash charges. These non-cash charges included stock-based compensation of \$951,000, depreciation and amortization of \$914,000, a write-down of inventory of \$236,000 and utilization of wafer credits of \$213,000. In addition, changes in working capital accounts in the first half of 2009 accounted for used cash of \$71,000 which consisted of a decrease in current assets of \$114,000 partially offset by a decrease in current liabilities of \$185,000 in the first half of 2009. The decrease in current assets resulted from a decrease in accounts receivable of \$278,000 due primarily to higher collection effort in the last month of the quarter and a decrease in other current assets of \$228,000 partially offset by an increase in inventories of \$378,000. The decrease in current liabilities resulted primarily from a decrease in deferred income on shipments to distributors of \$271,000.

Net cash from investing activities

Net cash provided by investing activities for the first half of 2010 was \$1.0 million, resulting from proceeds from the sale of TowerJazz shares of \$1.1 million, partially offset by \$147,000 in capital expenditures made primarily to acquire manufacturing equipments.

Net cash used for investing activities for the first half of 2009 was \$46,000, as a result of capital expenditures made primarily to acquire software used in the development and production of our products and solutions. Capital expenditures, which are largely driven by the development of new products and manufacturing levels, are projected to be approximately \$380,000 during the remainder of fiscal year 2010.

Net cash from financing activities

Net cash provided by financing activities was \$275,000 for the first half of 2010, resulting from scheduled payments under the terms of our debt and capital lease obligations, partially offset by \$468,000 in proceeds related to the issuance of common shares to employees under our equity plans. During the first half of 2010, we repaid \$4.0 million of revolving debt at an interest rate of 6% and borrowed \$2.0 million of revolving debt with an interest rate of 6% in Q1 2010 and \$2.0 million of revolving debt with an interest rate of 4.5% in Q2 2010.

Net cash used for financing activities was \$327,000 for the first half of 2009, resulting from scheduled payments under the terms of our debt and capital lease obligations, partially offset by \$190,000 in proceeds related to the issuance of common shares to employees under our equity plans. During the first half of 2009, we repaid \$2.0 million of revolving debt and borrowed \$2.0 million of revolving debt with an interest rate of 6.0%.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations — (Continued)

We require substantial cash to fund our business. However, we believe that our existing cash resources will be sufficient to fund operations and capital expenditures, and provide adequate working capital for at least the next twelve months. After the next twelve months, our cash requirements will depend on many factors, including our level of revenue and gross profit, the market acceptance of our existing and new products, the levels at which we maintain inventories and accounts receivable, costs of securing access to adequate manufacturing capacity, new product development efforts, capital expenditures and the level of our operating expenses.

Contractual Obligations and Commercial Commitments

The following table summarizes our contractual obligations and commercial commitments as of July 4, 2010 and the effect such obligations and commitments are expected to have on our liquidity and cash flows in future fiscal periods (in thousands):

	Payments Due by Period			
	Total	Less than 1 Year	1-3 Years	More than 3 Years
Contractual cash obligations:				
Operating leases	\$ 1,324	\$ 549	\$ 759	\$ 16
Wafer purchases ⁽¹⁾	3,153	3,153	—	—
Other purchase commitments	2,326	2,326	—	—
Total contractual cash obligations	6,803	6,028	759	16
Other commercial commitments ⁽²⁾ :				
Revolving line of credit	2,000	2,000	—	—
Capital lease obligations	604	397	207	—
Total commercial commitments	2,604	2,397	207	—
Total contractual obligations and commercial commitments ⁽³⁾	\$ 9,407	\$ 8,425	\$ 966	\$ 16

⁽¹⁾ Certain of our wafer manufacturers require us to forecast wafer starts several months in advance. We are committed to take delivery of and pay for a portion of forecasted wafer volume. Wafer purchase commitments of \$3.2 million include both firm purchase commitments and a portion of our forecasted wafer starts as of July 4, 2010.

⁽²⁾ Other commercial commitments are included as liabilities on our balance sheets as of July 4, 2010.

⁽³⁾ Does not include unrecognized tax benefits of \$72,000 as of July 4, 2010. See Note 10 of the Condensed Unaudited Consolidated Financial Statements.

Concentration of Suppliers

We depend on a limited number of contract manufacturers, subcontractors, and suppliers for wafer fabrication, assembly, programming and testing of our devices, and for the supply of programming equipment. These services are typically provided by one supplier for each of our devices. We generally purchase these single or limited source

services through standard purchase orders or under our agreement with TowerJazz. Because we rely on independent subcontractors to perform these services, we cannot directly control product delivery schedules, costs or quality levels. Our future success also depends on the financial viability of our independent subcontractors. These subcontract manufacturers produce products for other companies and we must place orders in advance of expected delivery. As a result, we have only a limited ability to react to fluctuations in demand for our products, which could cause us to have an excess or a shortage of inventories of a particular product, and our ability to respond to changes in demand is limited by the ability of these suppliers to provide products with the quantity, quality, cost and timeliness that we require. The decision not to provide these services to us or the inability to supply these services to us, such as in the case of a natural or financial disaster, would have a significant impact on our business. Increased demand from other companies could result in these subcontract manufacturers allocating available capacity to customers that are larger or have long-term supply contracts in place and we may be unable to obtain adequate foundry and other capacity at acceptable prices, or we may experience delays or interruptions in supply. Additionally, volatility of economic, market, social and political conditions in countries where these suppliers operate may be unpredictable and could result in a reduction in product revenue

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations — (Continued)

or increase our cost of revenue and could adversely affect our business, financial condition and results of operations.

Off-Balance Sheet Arrangements

We do not maintain any off-balance sheet partnerships, arrangements or other relationships with unconsolidated entities or others, often referred to as structured finance or special purpose entities, which are established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

Recently Issued Accounting Pronouncements

See Note 2 of the Condensed Unaudited Consolidated Financial Statements for a description of recent accounting pronouncements, including the respective dates of adoption and effects on results of operations and financial condition.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Interest Rate Risk

Our exposure to market rate risk for changes in interest rates relates primarily to our investment portfolio and variable rate debt. We do not use derivative financial instruments to manage our interest rate risk. We are adverse to principal loss and ensure the safety and preservation of invested funds by limiting default, market risk and reinvestment risk. Our investment portfolio is generally comprised of investments that meet high credit quality standards and have active secondary and resale markets. Since these securities are subject to interest rate risk, they could decline in value if interest rates fluctuate or if the liquidity of the investment portfolio were to change. Due to the short duration and conservative nature of our investment portfolio, we do not anticipate any material loss with respect to our investment portfolio. A 10% move in interest rates as of the end of the second quarter of 2010 would have an immaterial effect on our financial position, results of operations and cash flows.

Foreign Currency Exchange Rate Risk

All of our sales and costs of manufacturing are transacted in U.S. dollars. We conduct a portion of our research and development activities in Canada and India and have sales and marketing offices in several locations outside of the United States. We use the U.S. dollar as our functional currency. Most of the costs incurred at these international locations are in local currency. If these local currencies strengthen against the U.S. dollar, our payroll and other local expenses will be higher than we currently anticipate. Since our sales are transacted in U.S. dollars, this negative impact on expenses would not be offset by any positive effect on revenue. Operating expenses denominated in foreign currencies were approximately 17% and 18% of total operating expenses for the first half of 2010 and 2009, respectively. A currency exchange rate fluctuation of 10% would have caused our operating expenses to change by approximately \$141,000 in the first half of 2010.

Equity Price Risk

Our exposure to equity price risk for changes in market value relates primarily to our investment in TowerJazz. TowerJazz's ordinary shares trade on the Nasdaq Global Market under the symbol "TSEM". Since these securities are publicly traded on the open market, they are subject to market fluctuations. Temporary market fluctuations are reflected by increasing or decreasing the presented value of the related securities and recording "accumulated other comprehensive income (loss)" in the equity section of the balance sheet. An "other than temporary" decline in market

value is reflected by decreasing the carrying value of the related securities and recording a charge to operating expenses in the income statement. The determination that the decline in market value was “other than temporary” included factors such as the then current market value and the period of time that the market value had been below the carrying value in each of the respective periods. During the first quarter of 2010, we sold 700,000 of the TowerJazz ordinary shares. In the first half of 2010 and 2009, we marked to market and recorded an unrealized loss of \$0.3 million and an unrealized gain of \$0.2 million, respectively, based on the quoted market price of the stock on the last day of the reporting period. As a result, the carrying value of the TowerJazz ordinary shares was \$1.38 per share as of the end of the second quarter of 2010.

There have been no changes since the end of the last fiscal year, in the risk exposures described above or the management of such exposures.

Item 4. Controls and Procedures

30

Table of Contents

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures designed to ensure that information required to be disclosed in the reports we file or submit pursuant to the Securities and Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Management, with the participation of the Chief Executive Officer and Chief Financial Officer, has performed an evaluation of our disclosure controls and procedures. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded to a reasonable assurance level that, as of July 4, 2010, our disclosure controls and procedures were effective.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during the period covered by this Quarterly Report on Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II. Other Information

Item 1. Legal Proceedings

See Note 13 of the Condensed Unaudited Consolidated Financial Statements for a description of legal proceedings.

Item 1A. Risk Factors

Our 2009 Annual Report on Form 10-K for the year ended January 3, 2010, includes a detailed discussion of our risk factors at Part I, Item 1A, Risk Factors. The information presented below updates and supplements, and should be read in conjunction with the risk factors and information disclosed in that Form 10-K and in conjunction with any subsequent updates disclosed in our quarterly filings on Form 10-Q.

Risk Factors

Our future results depend on our relationship with TowerJazz

TowerJazz is the primary manufacturer of our new products. Between 2001 and 2002, we invested \$21.3 million in equity and prepaid wafer credits to obtain guaranteed wafer fabrication capacity at TowerJazz through December 2010. Our inability to extend the current terms and conditions of our Foundry Agreement beyond December 2010, may cause us to experience higher prices for fabrication at TowerJazz as well as longer product lead times. In addition, we believe that TowerJazz's long-term operation of this fabrication facility depends on its ability to attract sufficient customer demand, to obtain additional financing, to increase capacity, to obtain the release of grants and approvals for changes in grant programs from the Israeli government's Investment Center and its ability to remain in compliance with the terms of its grant and credit agreements. The current political uncertainty and security situation in the Middle East where TowerJazz's fabrication facility is located, the cyclical nature of the market for foundry manufacturing services, TowerJazz's financial condition, or other factors may adversely impact TowerJazz's business prospects and may discourage future investments in TowerJazz from outside sources. If TowerJazz is unable to produce wafers, we will have to identify and qualify a substitute supplier to manufacture our products. This could

require significant development time, cause product shipment delays, impair long-lived assets and the value of our wafer credits, damage our liquidity and severely harm our business.

The value of our investment in TowerJazz may be adversely affected by a deterioration of conditions in the market for foundry manufacturing services, the market for semiconductor products, TowerJazz's financial health and TowerJazz's ability to remain in compliance with Nasdaq listing standards. As of July 4, 2010, we held 645,000 available for sale TowerJazz ordinary shares. During the past 52 weeks, the TowerJazz shares have, from time to time, traded below \$1.00. If TowerJazz does not remain in compliance with Nasdaq listing standards, or if TowerJazz's financial position is determined to be significantly impaired, the liquidity of our investment may be adversely affected.

Table of Contents

We have a history of losses and cannot assure you that we will again be profitable in the future

We incurred significant losses to date. Our accumulated deficit as of July 4, 2010 was \$158.1 million. We recorded a net loss of \$9.8 million in 2009, \$9.4 million in 2008 and \$11.1 million in 2007, and we may not return to profitability in any future periods.
