American Commerce Solutions, Inc. and Subsidiaries

Notes to Consolidated Financial Statements  
As of November 30, 2010 and for the  
Three and Nine Months Ended November 30, 2010 and 2009  
(unaudited)

1. Background Information

American Commerce Solutions, Inc., located and operating in West Central Florida, was incorporated in Rhode Island in 1991 under the name Jaque Dubois, Inc., and was re-incorporated in Delaware in 1994. In July 1995, Jaque Dubois, Inc. changed its name to JD American Workwear, Inc. In December 2000, the stockholders voted at the annual stockholders meeting to change the name of JD American Workwear, Inc. to American Commerce Solutions, Inc. (the "Company").

The Company is primarily a holding company with two wholly owned subsidiaries; International Machine and Welding, Inc. is engaged in the machining and fabrication of parts used in heavy industry, and parts sales and service for heavy construction equipment; Chariot Manufacturing Company, which was acquired on October 11, 2003 from a related party, manufactures motorcycle trailers with fiberglass bodies and other fiberglass parts by contract with affiliate owned, Tampa Fiberglass, Inc. Effective June 1, 2009, Chariot was sold and is classified as a discontinued operation, see note 10.

2. Recent Accounting Pronouncements

Recent accounting pronouncements issued by FASB (including EITF), the AICPA and the SEC did not or are not believed by management to have a material impact on the Company's present or future financial statements.

3. Stock Based Compensation

At November 30, 2010, the Company has two stock-based employee compensation plans, both which have been approved by the shareholders.

The Company recognizes all share-based payments to employees, including grants of employee stock options, as compensation expense in the financial statements based on their fair values. That expense will be recognized over the period during which an employee is required to provide services in exchange for the award, known as the requisite service period (usually the vesting period).

The value of each grant is estimated at the grant date using the Black-Scholes model. There were no options granted or exercised during the three and nine months ended November 30, 2010 and 2009.

4. Going Concern

The Company has incurred substantial operating losses since inception and has used approximately \$185,800 of cash in operations for the nine months ended November 30, 2010. The Company recorded losses from continuing operations of approximately \$309,500 for the nine months ended November 30, 2010. Current liabilities exceed current assets by approximately \$910,421 at November 30, 2010. Additionally, the Company is in default on several notes payable. The ability of the Company to continue as a going concern is dependent upon its ability to reverse negative operating trends, raise additional capital, and obtain debt financing.

Management has revised its business strategy to include expansion into other lines of business through the acquisition of other companies in exchange for the Company's stock to facilitate manufacturing contracts under negotiation. In conjunction with the anticipated new contracts, management is currently negotiating new debt and equity financing, the proceeds from which would be used to settle outstanding debts at more favorable terms, to finance operations, and to complete additional business acquisitions. However, there can be no assurance that the Company will be able to raise capital, obtain debt financing, or improve operating results sufficiently to continue as a going concern.

The accompanying consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded assets, or the amounts and classification of liabilities that might be necessary if the Company is unable to continue as a going concern.

## 5. Basis of Presentation

In the opinion of management, all adjustments consisting only of normal recurring adjustments necessary for a fair statement of (a) the results of operations for the three and nine month periods ended November 30, 2010 and 2009, (b) the financial position at November 30, 2010, and (c) cash flows for the nine month periods ended November 30, 2010 and 2009, have been made.

The unaudited consolidated financial statements and notes are presented as permitted by Form 10-Q. Accordingly, certain information and note disclosures normally included in condensed financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been omitted. The accompanying consolidated financial statements and notes should be read in conjunction with the audited consolidated financial statements and notes of the Company for the fiscal year ended February 28, 2010. The results of operations for the three and nine month periods ended November 31, 2010 are not necessarily indicative of those to be expected for the entire year.

## 6. Accounts Receivable, Factored

During the three and nine months ended November 30, 2010, the Company factored receivables of approximately \$197,700 and \$1,053,700, respectively. In connection with the factoring agreement, the Company incurred fees of approximately \$9,400 and \$34,900 during the three and nine months ended November 30, 2010. As of November 30, 2010 and February 28, 2010, certain customers had remitted \$2,620 and \$9,581, respectively, to the Company on factored receivables; the Company recorded this amount as due to the factor and it is included in accrued expenses on the accompanying consolidated balance sheets. Any and all of the Company's indebtedness and obligations to the Factoring Company is guaranteed by two directors and collateralized by the Company's inventory and fixed assets.

The loss is recorded in the accompanying Consolidated Statements of Operations under Other expense for the three and nine months ending November 30, 2009. As of November 30, 2010, the note has not been satisfied. The maturity date has been extended by PAC and is payable, in cash or stock, on demand.

The above amounts are not necessarily indicative of the amounts that would have been incurred had comparable transactions been entered into with independent parties.

The Company has completed negotiations with a related party to purchase the fiberglass manufacturing operations

On September 29, 2009, American Commerce Solutions, Inc. ("ACS") entered into an agreement with Public Acquisition Company, Inc. The Company does not have discrete financial information on each of the three manufacturing divisions, nor does the Company make decisions on the divisions separately; therefore they are not reported as segments.

#### Fiberglass Subsidiary (Discontinued Operations)

The fiberglass manufacturing operation, Chariot Manufacturing Company, Inc. was sold effective June 1, 2009, and therefore, had no operations for the nine months ended November 30, 2010.

#### LIQUIDITY AND CAPITAL RESOURCES

During the nine months ended November 30, 2010 and 2009, the Company used net cash from operating activities of \$185,845 and \$280,239, respectively. The decrease in cash used from operating activities is mainly due to the sale of the fiberglass subsidiary.

During the nine months ended November 30, 2010 and 2009, the Company used cash for investing activities of \$29,140 and \$10,140, respectively. The increase in net cash used by investing activities is primarily due to the increase in other receivables.

During the nine months ended November 30, 2010 and 2009, the Company provided cash from financing activities of \$236,123 and \$300,094, respectively. The decrease in net cash provided from financing activities is due to a decrease in the amount of proceeds from the issuance of notes payable and long term debt during the nine months ended November 30, 2010.

Cash flows from loans provided for working capital needs and principal payments on long-term debt through November 30, 2010. As of November 30, 2010, working capital deficit was \$910,421. To the extent that the cash flows from operations are insufficient to finance the Company's anticipated growth, or its other liquidity and capital requirements during the next twelve months, the Company will seek additional financing from alternative sources including bank loans or other bank financing arrangements, other debt financing, the sale of equity securities (including those issuable pursuant to the exercise of outstanding warrants and options), or other financing arrangements. However, there can be no assurance that any such financing will be available and, if available, that it will be available on terms favorable or acceptable to the Company. Also, a significant portion of the debt is owed to the officers, directors and affiliates of the Company. In the event that ongoing attempts to raise additional capital are unsuccessful, we expect to be able to negotiate conversion of a substantial portion of these obligations into equity.

As of February 28, 2010, the Company has had significant losses since inception, negative cash flows from operations and current assets exceed current liabilities. In view of these matters, recoverability of recorded asset amounts shown in the accompanying financial statements is dependent upon the Company's ability to reverse negative operating trends, raise additional capital and obtain financing. There can be no assurance that the Company will be successful at achieving its financing goals at reasonably commercial terms, if at all and therefore, our auditors have concluded that there is a substantial doubt about our ability to continue as a going concern opinion. Management has revised its business strategy to include the manufacture of additional products. Although management has reduced debt, new financing to finance operations and to facilitate additional production is still being sought. However, there can be no assurance that the Company will be able to raise capital, obtain debt financing, or improve operating results sufficiently to continue as a going concern.

#### Seasonality

The diversity of operations in the Manufacturing Segment protects it from seasonal trends except in the sales of agricultural processing equipment whereby the majority of the revenue is generated while the processors await the next harvest.

#### CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The Company has prepared the accompanying unaudited consolidated financial statements in conformity with accounting principles generally accepted in the United States for interim financial information. All intercompany transactions have been eliminated in consolidation. The preparation of consolidated unaudited financial statements requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated unaudited financial statements and the reported amounts of revenues and expenses during the reporting period. The Company reviews its estimates, including but not limited to, recoverability of long-lived assets, recoverability of prepaid expenses and allowance for doubtful accounts, on a regular basis and makes adjustments based on historical experiences and existing and expected future conditions. These evaluations are performed and adjustments are made as information is available. Management believes that these estimates are reasonable; however, actual results could differ from these estimates.

We believe that the following critical policies affect our more significant judgments and estimates used in preparation of our consolidated unaudited financial statements.

We maintain allowances for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments. We base our estimate on an analysis of the Company's prior collection experience, customer credit worthiness, and current economic trends. If the financial condition of our customers were to deteriorate, additional allowances may be required.

We value our inventories at the lower of cost or market. Cost is determined on a standard cost basis that approximates the first-in, first-out method; market is determined based on net realizable value. We write down inventory balances for estimated obsolescence or unmarketable inventory equal to the difference between the cost of the inventory and the estimated market value based upon assumptions about future demand and market conditions. If actual market conditions are less favorable than those projected by management, additional inventory write-downs may be required.

We value our property and equipment at cost. Amortization and depreciation are calculated using the straight-line and accelerated methods of accounting over the estimated useful lives of the assets. Maintenance and repairs are charged to operations when incurred. Betterments and renewals are capitalized. When property and equipment are sold or otherwise disposed of, the asset account and related accumulated depreciation account are relieved, and any gain or loss is included in operations.

Fair value estimates used in preparation of the consolidated unaudited financial statements are based upon certain market assumptions and pertinent information available to management. The respective carrying value of certain on-balance-sheet financial instruments approximated their fair values. These financial instruments include cash, accounts receivable, accounts payable, and accrued expenses. Fair values were assumed to approximate carrying values for these financial instruments since they are short-term in nature and their carrying amounts approximate fair values or they are receivable or payable on demand. The fair value of the Company's notes payable is estimated based upon the quoted market prices for the same or similar issues or on the current rates offered to the Company for debt of the same remaining maturities.

Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the consolidated unaudited financial statements carrying amounts of existing assets and liabilities and their respective income tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized as income in the period that included the enactment date.
