Form 10-Q

April 29, 2016

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

☒ Quarterly Report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended March 31, 2016

OR

☐ Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Commission file number 001-34095

FIRST BUSINESS FINANCIAL SERVICES, INC.

(Exact name of registrant as specified in its charter)

Wisconsin

39-1576570

(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

401 Charmany Drive, Madison, WI 53719

(Address of Principal Executive Offices) (Zip Code)

(608) 238-8008

Registrant's telephone number, including area code

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐ Accelerated filer ☒ Non-accelerated filer ☐ Smaller reporting company ☐

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

The number of shares outstanding of the registrant's sole class of common stock, par value \$0.01 per share, on April 22, 2016 was 8,700,172 shares.

Notes to Unaudited Consolidated Financial Statements

Note 1 — Nature of Operations and Summary of Significant Accounting Policies

Nature of Operations. The accounting and reporting practices of First Business Financial Services, Inc. (the “Corporation”), its wholly owned subsidiaries, First Business Bank (“FBB”), First Business Bank – Milwaukee (“FBB – Milwaukee”) and Alterra Bank (“Alterra”), have been prepared in accordance with U.S. generally accepted accounting principles (“GAAP”). FBB, FBB – Milwaukee and Alterra are sometimes referred to together as the “Banks.” FBB operates as a commercial banking institution in the Madison, Wisconsin market, consisting primarily of Dane County and the surrounding areas, with loan production offices in Northeast Wisconsin. FBB also offers trust and investment services through First Business Trust & Investments (“FBTI”), a division of FBB. FBB – Milwaukee operates as a commercial banking institution in the Milwaukee, Wisconsin market, consisting primarily of Waukesha County and the surrounding areas, with a loan production office in Kenosha, Wisconsin. Alterra operates as a commercial banking institution in the Kansas City market and the surrounding areas. The Banks provide a full range of financial services to businesses, business owners, executives, professionals and high net worth individuals. The Banks are subject to competition from other financial institutions and service providers and are also subject to state and federal regulations. FBB has the following wholly owned subsidiaries: First Business Capital Corp. (“FBCC”), First Madison Investment Corp. (“FMIC”), First Business Equipment Finance, LLC (“FBEF”), Rimrock Road Investment Fund, LLC (“Rimrock Road”) and BOC Investment, LLC (“BOC”). FMIC is located in and was formed under the laws of the state of Nevada. FBB-Milwaukee has one subsidiary, FBB – Milwaukee Real Estate, LLC (“FBBMRE”).

Basis of Presentation. The accompanying unaudited Consolidated Financial Statements were prepared in accordance with GAAP and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements and should be read in conjunction with the Corporation’s Consolidated Financial Statements and footnotes thereto included in the Corporation’s Annual Report on Form 10-K for the year ended December 31, 2015. The unaudited Consolidated Financial Statements include the accounts of the Corporation and its wholly owned subsidiaries. In accordance with the provisions of Accounting Standards Codification (“ASC”) Topic 810, the Corporation’s ownership interest in FBFS Statutory Trust II (“Trust II”) has not been consolidated into the financial statements. All significant intercompany balances and transactions have been eliminated in consolidation.

Management of the Corporation is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements as well as reported amounts of revenues and expenses during the reporting period. Actual results could differ significantly from those estimates. Material estimates that could significantly change in the near-term include the value of foreclosed property, lease residuals, property under operating leases, securities, income taxes and the level of the allowance for loan and lease losses. The results of operations for the three-month period ended March 31, 2016 are not necessarily indicative of results that may be expected for any other interim period or the entire fiscal year ending December 31, 2015. Certain amounts in prior periods may have been reclassified to conform to the current presentation. Subsequent events have been evaluated through the date of the issuance of the Consolidated Financial Statements. No significant subsequent events have occurred through this date requiring adjustment to the financial statements or disclosures. The Corporation has not changed its significant accounting and reporting policies from those disclosed in the Corporation’s Form 10-K for the year ended December 31, 2015 except as described further below in this Note 1.

Recent Accounting Pronouncements

In February 2015, the FASB issued ASU 2015-02, “Consolidation (Topic 810): Amendments to the Consolidation Analysis.” The ASU changes the way reporting enterprises evaluate whether (a) they should consolidate limited partnerships and similar entities, (b) fees paid to a decision maker or service provider are variable interests in a variable interest entity (“VIE”), and (c) variable interests in a VIE held by related parties of the reporting enterprise require the reporting enterprise to consolidate the VIE. It also eliminates the VIE consolidation model based on majority exposure to variability that applied to certain investment companies and similar entities. The new guidance excludes money market funds that are required to comply with Rule 2a-7 of the Investment Company Act of 1940 and similar entities from the U.S. GAAP consolidation requirements. The new consolidation guidance is effective for

public business entities for annual and interim periods in fiscal years beginning after December 15, 2015. At the effective date, all previous consolidation analysis that the guidance affects must be reconsidered. This includes the consolidation analysis for all VIEs and for all limited partnerships and similar entities that previously were consolidated by the general partner even though the entities were not VIEs. The Corporation adopted the standard during the first quarter of 2016, as required, with no material impact on its results of operations, financial position, or liquidity.

Table of Contents

In April 2015, the FASB issued ASU 2015-03, “Interest - Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs.” The ASU requires that debt issuance costs related to recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. Prior to this ASU, debt issuance costs were required to be presented as an asset. The ASU is effective for public business entities for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. In August 2015, the FASB expanded this amendment to include SEC staff views related to debt issuance costs associated with line-of-credit arrangements. The SEC staff would not object to an entity deferring and presenting debt issuance costs as an asset and subsequently amortizing the deferred debt issuance costs ratably over the term of the line-of-credit arrangement, regardless of whether there are any outstanding borrowings on the line-of-credit arrangement. This amendment is also effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. The Corporation adopted the standards during the first quarter of 2016, as required, and reclassified \$792,000 and \$810,000 of debt issuance costs from other assets and presented as a deduction from the debt liability as of March 31, 2016 and December 31, 2015, respectively. The adoption of the standards did not have a material impact on the Corporation’s consolidated results of operations, financial position, or liquidity.

In May 2014, the FASB issued ASU No. 2014-09, “Revenue from Contracts with Customers (Topic 606),” with an original effective date for annual reporting periods beginning after December 15, 2016. The ASU is a converged standard between the FASB and the IASB that provides a single comprehensive revenue recognition model for all contracts with customers across transactions and industries. The primary objective of the ASU is revenue recognition that represents the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In August 2015, the FASB issued ASU No. 2015-14, which defers the effective date of ASU 2014-09 to annual and interim reporting periods in fiscal years beginning after December 15, 2017. Earlier application is permitted only as of annual and interim reporting periods in fiscal years beginning after December 15, 2016. In March 2016, the FASB issued ASU No. 2016-08, “Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net.” The ASU intends to improve the operability and understandability of the implementation guidance of ASU 2014-09 on principal versus agent considerations. The Corporation intends to adopt the accounting standards during the first quarter of 2018, as required, and is currently evaluating the impact on its results of operations, financial position, and liquidity.

In September 2015, the FASB issued ASU No. 2015-16, “Business Combinations (Topic 805).” The ASU intends to simplify the accounting for measurement adjustments to prior business combinations. The amendment requires that an acquirer recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. The acquirer must record, in the same period’s financial statements, the effect on earnings of changes in depreciation, amortization, or other income effects, if any, as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date. The amendment also requires an entity to present separately on the face of the income statement or disclose in the notes the portion of the amount recorded in current-period earnings by line item that would have been recorded in previous reporting periods if the adjustment to the provisional amounts had been recognized as of the acquisition date. This amendment is effective for fiscal years beginning after December 15, 2015, including interim periods within those fiscal years. The amendments should be applied prospectively to adjustments to provisional amounts that occur after the effective date of this amendment with earlier application permitted for financial statements that have not been issued. The Corporation adopted the standard during the first quarter of 2016, as required, with no material impact on its results of operations, financial position, or liquidity.

In January 2016, the FASB issued ASU No. 2016-01, “Financial Instruments (Subtopic 825-10).” The ASU amends certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. This amendment supersedes the guidance to classify equity securities with readily determinable fair values into different categories, requires equity securities to be measured at fair value with changes in the fair value recognized through net income,

and simplifies the impairment assessment of equity investments without readily determinable fair values. The amendment requires public business entities that are required to disclose the fair value of financial instruments measured at amortized cost on the balance sheet to measure that fair value using the exit price notion. The amendment requires an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option. The amendment requires separate presentation of financial assets and financial liabilities by measurement category and form of financial asset on the balance sheet or in the accompanying notes to the financial statements. The amendment reduces diversity in current practice by clarifying that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available for sale securities in combination with the entity's other deferred tax assets. This amendment is effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Entities should apply the amendment by means of a cumulative-effect adjustment as of the beginning of the fiscal year of adoption, with the exception of the amendment related to equity securities without readily determinable fair values, which should be applied prospectively to

Table of Contents

equity investments that exist as of the date of adoption. The Corporation intends to adopt the accounting standard during the first quarter of 2018, as required, and is currently evaluating the impact on its results of operations, financial position, and liquidity.

In February 2016, the FASB issued ASU 2016-02, "Leases (Topic 842)." The ASU intends to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities and disclosing key information about leasing arrangements. The ASU will require lessees to recognize the following for all leases (with the exception of short-term leases) at the commencement date: (1) a lease liability, which is a lessees' obligation to make lease payments arising from a lease, measured on a discounted basis; and (2) a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term. Under the new guidance, lessor accounting is largely unchanged. Certain targeted improvements were made to align, where necessary, lessor accounting with the lessee accounting model and Topic 606, Revenue from Contracts with Customers. The new lease guidance simplifies the accounting for sale and leaseback transactions primarily because lessees must recognize lease assets and lease liabilities. Lessees (for capital and operating leases) and lessors (for sales-type, direct financing, and operating leases) must apply a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. The modified retrospective approach would not require any transition accounting for leases that expired before the earliest comparative period presented. The ASU is effective for public companies for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years, with early adoption permitted. The Corporation intends to adopt the accounting standard during the first quarter of 2019, as required, and is currently evaluating the impact on its results of operations, financial position, and liquidity.

Note 2 — Earnings Per Common Share

Earnings per common share are computed using the two-class method. Basic earnings per common share are computed by dividing net income allocated to common shares by the weighted average number of shares outstanding during the applicable period, excluding outstanding participating securities. Participating securities include unvested restricted shares. Unvested restricted shares are considered participating securities because holders of these securities receive non-forfeitable dividends at the same rate as holders of the Corporation's common stock. Diluted earnings per share are computed by dividing net income allocated to common shares, adjusted for reallocation of undistributed earnings of unvested restricted shares, by the weighted average number of shares determined for the basic earnings per common share computation plus the dilutive effect of common stock equivalents using the treasury stock method. There were no anti-dilutive employee share-based awards for the three-month periods ended March 31, 2016 and 2015.

Table of Contents

	For the Three Months Ended March 31, 2016 2015 (Dollars in Thousands, Except Per Share Data)	
Basic earnings per common share		
Net income	\$4,547	\$ 4,192
Less: earnings allocated to participating securities	70	73
Basic earnings allocated to common shareholders	\$4,477	\$ 4,119
Weighted-average common shares outstanding, excluding participating securities	8,565,050	8,525,127
Basic earnings per common share	\$0.52	\$ 0.48
Diluted earnings per common share		
Earnings allocated to common shareholders, diluted	\$4,477	\$ 4,119
Weighted-average common shares outstanding, excluding participating securities	8,565,050	8,525,127
Dilutive effect of share-based awards	—	4,531
Weighted-average diluted common shares outstanding, excluding participating securities	8,565,050	8,529,658
Diluted earnings per common share	\$0.52	\$ 0.48

Note 3 — Share-Based Compensation

The Corporation adopted the 2012 Equity Incentive Plan (the “Plan”) during the quarter ended June 30, 2012. The Plan is administered by the Compensation Committee of the Board of Directors of the Corporation and provides for the grant of equity ownership opportunities through incentive stock options and nonqualified stock options (together, “Stock Options”), restricted stock, restricted stock units, dividend equivalent units, and any other type of award permitted by the Plan. As of March 31, 2016, 310,584 shares were available for future grants under the Plan. Shares covered by awards that expire, terminate or lapse will again be available for the grant of awards under the Plan. The Corporation may issue new shares and shares from treasury for shares delivered under the Plan.

Stock Options

The Corporation may grant Stock Options to senior executives and other employees under the Plan. Stock Options generally have an exercise price that is equal to the fair value of the common shares on the date the option is awarded. Stock Options granted under the Plan are subject to graded vesting, generally ranging from 4 years to 8 years, and have a contractual term of 10 years. For any new awards issued, compensation expense is recognized over the requisite service period for the entire award on a straight-line basis. No Stock Options have been granted since the Corporation became a reporting company under the Securities Exchange Act of 1934, as amended, and no Stock Options have been modified, repurchased or canceled since such time. For that reason, no stock-based compensation expense related to Stock Options was recognized in the Consolidated Financial Statements for the three months ended March 31, 2016 and 2015. The benefits of tax deductions as a result of disqualifying dispositions upon exercise of stock options are recognized as a financing cash flow. No Stock Options remained outstanding as of March 31, 2016 and December 31, 2015.

Restricted Stock

Under the Plan, the Corporation may grant restricted shares to plan participants, subject to forfeiture upon the occurrence of certain events until the dates specified in the participant’s award agreement. While the restricted shares

are subject to forfeiture, the participant may exercise full voting rights and will receive all dividends and other distributions paid with respect to the

Table of Contents

restricted shares. The restricted shares granted under the Plan are typically subject to a vesting period. Compensation expense is recognized over the requisite service period of generally four years for the entire award on a straight-line basis. Upon vesting of restricted share awards, the benefit of tax deductions in excess of recognized compensation expense is recognized as a financing cash flow activity.

Restricted share activity for the year ended December 31, 2015 and the three months ended March 31, 2016 was as follows:

	Number of Restricted Shares	Weighted Average Grant-Date Fair Value
Nonvested balance as of December 31, 2014	154,998	\$ 16.97
Granted	53,790	22.52
Vested	(64,874)	15.23
Forfeited	(8,443)	15.03
Nonvested balance as of December 31, 2015	135,471	20.13
Granted	2,905	21.68
Vested	(2,246)	21.35
Forfeited	(2,044)	14.50
Nonvested balance as of March 31, 2016	134,086	\$ 20.23

As of March 31, 2016, the Corporation had \$2.0 million of deferred compensation expense, which the Corporation expects to recognize over a weighted-average period of approximately 2.63 years. As of March 31, 2016, all restricted shares that vested were issued.

For the three months ended March 31, 2016 and 2015, share-based compensation expense related to restricted stock included in the Consolidated Statements of Income was as follows:

	For the Three Months Ended March 31, 2016	2015
	(In Thousands)	
Share-based compensation expense	\$ 296	\$ 234

Collateralized mortgage obligations - government-sponsored enterprises	8,031	12	(44)	7,999
	\$37,282	\$ 377	\$ (101)	\$ 37,558

U.S. Government agency obligations - government-sponsored enterprises represent securities issued by the Federal Home Loan Mortgage Corporation ("FHLMC") and Federal National Mortgage Association ("FNMA"). Collateralized mortgage obligations - government issued represent securities guaranteed by the Government National Mortgage Association ("GNMA"). Collateralized mortgage obligations - government-sponsored enterprises include securities guaranteed by the FHLMC and the FNMA. Asset-backed securities represent securities issued by the Student Loan Marketing Association ("SLMA") which are 97% guaranteed by the U.S. government. Municipal obligations include securities issued by various municipalities located primarily within the State of Wisconsin and are primarily general obligation bonds that are tax-exempt in nature. There were no sales of securities available-for-sale for the three months ended March 31, 2016 and 2015.

At March 31, 2016 and December 31, 2015, securities with a fair value of \$21.2 million and \$23.0 million, respectively, were pledged to secure interest rate swap contracts, outstanding Federal Home Loan Bank ("FHLB") advances, if any, and additional FHLB availability.

The amortized cost and estimated fair value of securities by contractual maturity at March 31, 2016 are shown below. Actual maturities may differ from contractual maturities because issuers have the right to call or prepay certain obligations without call or prepayment penalties.

Table of Contents

	As of March 31, 2016			
	Available-for-Sale		Held-to-Maturity	
	Amortized cost	Estimated fair value	Amortized cost	Estimated fair value
	(In Thousands)			
Due in one year or less	\$1,000	\$1,000	\$—	\$—
Due in one year through five years	14,019	14,089	4,794	4,847
Due in five through ten years	91,048	91,897	12,727	13,113
Due in over ten years	33,537	33,837	18,964	19,253
	\$139,604	\$140,823	\$36,485	\$37,213

The tables below show the Corporation's gross unrealized losses and fair value of available-for-sale investments with unrealized losses, aggregated by investment category and length of time that individual investments were in a continuous loss position at March 31, 2016 and December 31, 2015. At March 31, 2016, the Corporation held 35 available-for-sale securities that were in an unrealized loss position, respectively. Such securities have not experienced credit rating downgrades; however, they have primarily declined in value due to the current interest rate environment. At March 31, 2016, the Corporation held 10 available-for-sale securities that had been in a continuous unrealized loss position for twelve months or greater.

The Corporation also has not specifically identified available-for-sale securities in a loss position that it intends to sell in the near term and does not believe that it will be required to sell any such securities. The Corporation reviews its securities on a quarterly basis to monitor its exposure to other-than-temporary impairment. Consideration is given to such factors as the length of time and extent to which the security has been in an unrealized loss position, changes in security ratings, and an evaluation of the present value of expected future cash flows, if necessary. Based on the Corporation's evaluation, it is expected that the Corporation will recover the entire amortized cost basis of each security. Accordingly, no other than temporary impairment was recorded in the Consolidated Statements of Income for the three months ended March 31, 2016 and 2015.

A summary of unrealized loss information for securities available-for-sale, categorized by security type follows:

	\$70,573	\$ 470	\$9,385	\$ 159	\$79,958	\$ 629

The tables below show the Corporation's gross unrecognized losses and fair value of held-to-maturity investments, aggregated by investment category and length of time that individual investments were in a continuous loss position at March 31, 2016 and December 31, 2015. At March 31, 2016, the Corporation held five held-to-maturity securities that were in an unrecognized loss position, respectively. Such securities have not experienced credit rating downgrades; however, they have primarily declined in value due to the current interest rate environment. There were four held-to-maturity securities that were in a continuous unrecognized loss position for twelve months or greater as of March 31, 2016. It is expected that the Corporation will recover the entire amortized cost basis of each held-to-maturity security based upon an evaluation of the present value of the expected future cash flows. Accordingly, no other than temporary impairment was recorded in the Consolidated Statements of Income for the three months ended March 31, 2016.

Commercial and industrial ⁽²⁾	461,573	473,592
Direct financing leases, net	31,617	31,093
Consumer and other		
Home equity and second mortgages	7,366	8,237
Other	18,510	16,319
Total consumer and other	25,876	24,556
Total gross loans and leases receivable	1,451,293	1,434,729
Less:		
Allowance for loan and lease losses	16,684	16,316
Deferred loan fees	1,010	1,062
Loans and leases receivable, net	\$ 1,433,599	\$ 1,417,351

(1) Includes residential real estate loans held for sale totaling \$1.7 million as of March 31, 2016 and \$1.3 million as of December 31, 2015.

(2) Includes guaranteed portion of SBA loans held for sale totaling \$1.4 million as of December 31, 2015. No guaranteed portion of SBA loans were held for sale as of March 31, 2016.

Loans transferred to third parties consist of the guaranteed portion of SBA loans as well as participation interests in other originated loans. The total principal amount of loans transferred during the three months ended March 31, 2016

and 2015 was \$18.1 million and \$15.8 million, respectively. Each of the transfers of these financial assets met the qualifications for sale

Table of Contents

accounting, including the requirements specific to loan participations, and therefore all of the loans transferred during the three months ended March 31, 2016 and December 31, 2015 have been derecognized in the unaudited Consolidated Financial Statements. The Corporation has a continuing involvement in each of the agreements by way of relationship management and servicing the loans; however, there are no further obligations to the third-party participant required of the Corporation, other than standard representations and warranties related to sold amounts, that would preclude the application of sale accounting treatment. The guaranteed portion of SBA loans were transferred at their fair value and the related gain was recognized upon the transfer as non-interest income in the unaudited Consolidated Financial Statements. No gain or loss was recognized on participation interests in other originated loans as they were transferred at or near the date of loan origination and the payments received for servicing the portion of the loans participated represents adequate compensation. The total amount of loan participations purchased on the Corporation's Consolidated Balance Sheets as of March 31, 2016 and December 31, 2015 was \$463,000 and \$467,000, respectively.

The total amount of outstanding loans transferred to third parties as loan participations sold at March 31, 2016 and December 31, 2015 was \$181.6 million and \$169.2 million, respectively, all of which was treated as a sale and derecognized under the applicable accounting guidance at the time of the transfers of the financial assets. The Corporation's continuing involvement with these loans is by way of partial ownership, relationship management and all servicing responsibilities; however, there are no further obligations of the Corporation, other than standard representations and warranties to the sold amount, that would preclude the application of sale accounting treatment. As of March 31, 2016 and December 31, 2015, the total amount of the Corporation's partial ownership of loans on the Corporation's Consolidated Balance Sheets was \$139.6 million and \$136.8 million, respectively. As of March 31, 2016, \$1.6 million loans in this participation sold portfolio were considered impaired as compared to \$1.8 million as of December 31, 2015. The Corporation does not share in the participant's portion of the charge-offs.

The Corporation sells residential real estate loans, servicing released, in the secondary market. The total principal amount of residential real estate loans sold during the three months ended March 31, 2016 and March 31, 2015 was \$7.2 million and \$9.1 million, respectively. Each of the transfers of these financial assets met the qualifications for sale accounting, and therefore all of the loans transferred during the three months ended March 31, 2016 have been derecognized in the unaudited Consolidated Financial Statements. The Corporation has a continuing involvement in each of the transactions, including by way of relationship management and standard representations and warranties related to the sold amount; however, there are no further obligations of the Corporation that would preclude the application of sale accounting treatment. The loans were transferred at their fair value and the related gain was recognized as non-interest income upon the transfer in the unaudited Consolidated Financial Statements.

According to ASC 310-30, Accounting for Certain Loans or Debt Securities Acquired in a Transfer, purchased credit-impaired loans exhibit evidence of deterioration in credit quality since origination for which it is probable at acquisition that the Corporation will be unable to collect all contractually required payments. Purchased credit-impaired loans are initially recorded at fair value, which is estimated by discounting the cash flows expected to be collected at the acquisition date. Because the estimate of expected cash flows reflects an estimate of future credit losses expected to be incurred over the life of the loans, an allowance for credit losses is not recorded at the acquisition date. The excess of cash flows expected at acquisition over the estimated fair value, referred to as the accretable yield, is recognized in interest income over the remaining life of the loan on a level-yield basis, contingent on the subsequent evaluation of future expected cash flows. The difference between the contractually required payments at acquisition and the cash flows expected to be collected at acquisition is referred to as the nonaccretable difference. A subsequent decrease in the estimate of cash flows expected to be received on purchased credit-impaired loans generally results in the recognition of an allowance for credit losses. Subsequent increases in cash flows result in reversal of any nonaccretable difference (or allowance for loan and lease losses to the extent any has been recorded) with a positive impact on interest income recognized. The measurement of cash flows involves assumptions and judgments for interest rates, prepayments, default rates, loss severity, and collateral values. All of these factors are

inherently subjective and significant changes in the cash flow estimates over the life of the loan can result.

The following table reflects the contractually required payments receivable and fair value of the Corporation's purchased credit impaired loans as of March 31, 2016 and December 31, 2015:

	March 31, 2016	December 31, 2015
	(In Thousands)	
Contractually required payments	\$5,166	\$ 5,291
Fair value of purchased credit impaired loans	\$3,160	\$ 3,250

Table of Contents

The following table presents a rollforward of the Corporation's accretable yield as of March 31, 2016 and December 31, 2015:

	As of and for the Three Months Ended March 31, 2016 (In Thousands)	As of and for the Year Ended December 31, 2015
Accretable yield, beginning of period	\$414	\$ 676
Accretion recognized in earnings	(33)	(50)
Reclassification to nonaccretable difference for loans with changing cash flows ⁽¹⁾	(9)	(60)
Changes in accretable yield for non-credit related changes in expected cash flows ⁽²⁾	9	(152)
Accretable yield, end of period	\$381	\$ 414

(1) Represents changes in accretable yield for those loans that are driven primarily by credit performance.

(2) Represents changes in accretable yield for those loans that are driven primarily by changes in actual and estimated payments.

The following information illustrates ending balances of the Corporation's loan and lease portfolio, including impaired loans by class of receivable, and considering certain credit quality indicators as of March 31, 2016 and December 31, 2015:

(1) Includes residential real estate loans held for sale totaling \$1.3 million in Category I.

(2) Includes guaranteed portion of SBA loans held for sale totaling \$1.4 million in Category I.

Credit underwriting through a committee process is a key component of the Corporation's operating philosophy. Business development officers have relatively low individual lending authority limits, and thus a significant portion of the Corporation's new credit extensions require approval from a loan approval committee regardless of the type of loan or lease, asset quality grade of the credit, amount of the credit, or the related complexities of each proposal. Each credit is evaluated for proper risk rating upon origination, at the time of each subsequent renewal, upon receipt and evaluation of updated financial information from the Corporation's borrowers, or as other circumstances dictate. The Corporation uses a nine grade risk rating system to monitor the ongoing credit quality of its loans and leases. The risk rating grades follow a consistent definition, and are then applied to specific loan types based on the nature of the loan. Each risk rating is subjective and, depending on the size and nature of the credit, subject to various levels of review and concurrence on the stated risk rating. In addition to its nine grade risk rating system, the Corporation groups loans into four loan and related risk categories which determine the level and nature of review by management. Category I — Loans and leases in this category are performing in accordance with the terms of the contract and generally exhibit no immediate concerns regarding the security and viability of the underlying collateral, financial stability of the borrower, integrity or strength of the borrower's management team or the industry in which the borrower operates. Loans and leases in this category are not subject to additional monitoring procedures above and beyond what is required at the origination or renewal of the loan or lease. The Corporation monitors Category I loans and leases through payment performance, continued maintenance of its personal relationships with such borrowers and continued review of such borrowers' compliance with the terms of their respective agreements. Category II — Loans and leases in this category are beginning to show signs of deterioration in one or more of the Corporation's core underwriting criteria such as financial stability, management strength, industry trends and collateral values. Management will place credits in this category to allow for proactive monitoring and resolution with the borrower to possibly mitigate the area of concern and prevent further deterioration or risk of loss to the Corporation. Category II loans are considered performing but are monitored frequently by the assigned business development

officer and by subcommittees of the Banks' loan committees.

18

Table of Contents

Category III — Loans and leases in this category are identified by management as warranting special attention. However, the balance in this category is not intended to represent the amount of adversely classified assets held by the Banks. Category III loans and leases generally exhibit undesirable characteristics such as evidence of adverse financial trends and conditions, managerial problems, deteriorating economic conditions within the related industry, or evidence of adverse public filings and may exhibit collateral shortfall positions. Management continues to believe that it will collect all contractual principal and interest in accordance with the original terms of the contracts relating to the loans and leases in this category, and therefore Category III loans are considered performing with no specific reserves established for this category. Category III loans are monitored by management and loan committees of the Banks on a monthly basis and the Banks' Boards of Directors at each of their regularly scheduled meetings.

Category IV — Loans and leases in this category are considered to be impaired. Impaired loans and leases have been placed on non-accrual as management has determined that it is unlikely that the Banks will receive the contractual principal and interest in accordance with the contractual terms of the agreement. Impaired loans are individually evaluated to assess the need for the establishment of specific reserves or charge-offs. When analyzing the adequacy of collateral, the Corporation obtains external appraisals at least annually for impaired loans and leases. External appraisals are obtained from the Corporation's approved appraiser listing and are independently reviewed to monitor the quality of such appraisals. To the extent a collateral shortfall position is present, a specific reserve or charge-off will be recorded to reflect the magnitude of the impairment. Loans and leases in this category are monitored by management and loan committees of the Banks on a monthly basis and the Banks' Boards of Directors at each of their regularly scheduled meetings.

Utilizing regulatory classification terminology, the Corporation identified \$33.9 million and \$26.8 million of loans and leases as Substandard as of March 31, 2016 and December 31, 2015, respectively. No loans were considered Special Mention, Doubtful or Loss as of either March 31, 2016 or December 31, 2015. The population of Substandard loans are a subset of Category III and Category IV loans.

Total	42	\$ 20,938	\$ 15,629	42	\$ 20,721	\$ 17,890

All loans and leases modified as a troubled debt restructuring are evaluated for impairment. The nature and extent of the impairment of restructured loans, including those which have experienced a default, is considered in the determination of an appropriate level of the allowance for loan and lease losses.

As of March 31, 2016 and December 31, 2015, the Corporation's troubled debt restructurings grouped by type of concession were as follows:

	As of March 31, 2016		As of December 31, 2015	
	Number of Loans	Recorded Investment	Number of Loans	Recorded Investment
(Dollars in Thousands)				
Commercial real estate				
Extension of term	1	\$ 20	1	\$ 24
Interest rate concession	1	54	1	55

(1) Average recorded investment is calculated primarily using daily average balances.

Table of Contents

The difference between the loans and leases recorded investment and the unpaid principal balance of \$3.4 million and \$3.9 million as of March 31, 2016 and December 31, 2015 represents partial charge-offs resulting from confirmed losses due to the value of the collateral securing the loans and leases being below the carrying values of the loans and leases. Impaired loans and leases also included \$1.6 million and \$1.7 million of loans as of March 31, 2016 and December 31, 2015 that were performing troubled debt restructurings, and thus, while not on non-accrual, were reported as impaired, due to the concession in terms. When a loan is placed on non-accrual, interest accrual is discontinued and previously accrued but uncollected interest is deducted from interest income. Cash payments collected on non-accrual loans are first applied to principal. Foregone interest represents the interest that was contractually due on the note but not received or recorded. To the extent the amount of principal on a non-accrual note is fully collected and additional cash is received, the Corporation will recognize interest income.

To determine the level and composition of the allowance for loan and lease losses, the Corporation breaks out the portfolio by segments and risk ratings. First, the Corporation evaluates loans and leases for potential impairment classification. The Corporation analyzes each loan and lease determined to be impaired on an individual basis to determine a specific reserve based upon the estimated value of the underlying collateral for collateral-dependent loans, or alternatively, the present value of expected cash flows. The Corporation applies historical trends from established risk factors to each category of loans and leases that has not been individually evaluated for the purpose of establishing the general portion of the allowance.

A summary of the activity in the allowance for loan and lease losses by portfolio segment is as follows:

As of and for the Three Months Ended March 31,

Note 7 — FHLB Advances, Other Borrowings and Junior Subordinated Notes Payable

The composition of borrowed funds at March 31, 2016 and December 31, 2015 was as follows. Average balances represent year-to-date averages.

	March 31, 2016				December 31, 2015		
	Balance	Average balance	Weighted average rate		Balance	Average balance	Weighted average rate
	(Dollars in Thousands)						
Federal funds purchased	\$—	\$—	— %		\$—	\$237	0.86 %
FHLB advances and other borrowings	8,646	9,033	2.00		9,790	15,457	1.14
Senior line of credit	3,910	3,064	3.22		2,510	1,619	3.18
Subordinated notes payable	22,455	22,446	7.14		22,440	22,410	7.14
Junior subordinated notes	9,993	9,991	11.09		9,990	9,982	11.14
	\$45,004	\$44,534	6.75		\$44,730	\$49,705	5.94
Short-term borrowings	\$6,910				\$7,010		
Long-term borrowings	38,094				37,720		
	\$45,004				\$44,730		

As of March 31, 2016, the Corporation was in compliance with its debt covenants under its third party secured senior line of credit. Per the promissory note dated February 19, 2016, the Corporation pays a commitment fee on this senior line of credit. During both the three months ended March 31, 2016 and 2015, the Corporation incurred additional interest expense due to this fee of \$3,000.

Note 8 — Fair Value Disclosures

The Corporation determines the fair values of its financial instruments based on the fair value hierarchy established in ASC Topic 820, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Fair value is defined as the price that would be received in an orderly transaction that is not a forced liquidation or distressed sale at the measurement date and is based on exit prices. Fair value includes assumptions about risk such as nonperformance risk in liability fair values and is a market-based measurement, not an entity-specific measurement. The standard describes three levels of inputs that may be used to measure fair value.

Level 1 — Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the Corporation has the ability to access at the measurement date.

Level 2 — Level 2 inputs are inputs, other than quoted prices included with Level 1, that are observable for the asset or liability either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 — Level 3 inputs are supported by little or no market activity and are significant to the fair value of the assets or liabilities.

In instances where the determination of the fair value measurement is based on inputs from different levels of the fair value hierarchy, the level in the fair value hierarchy within which the entire fair value measurement falls is based on the lowest level input that is significant to the fair value measurement in its entirety. The Corporation's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the asset or liability.

Table of Contents

Assets and liabilities measured at fair value on a recurring basis, segregated by fair value hierarchy level, are summarized below:

March 31, 2016	Fair Value Measurements Using			
	Level 1	Level 2	Level 3	Total
	1	2	3	
	(In Thousands)			
Assets:				
Securities available-for-sale:				
Municipal obligations	\$—	\$5,194	\$—	\$5,194
Asset backed securities	—	1,219	—	1,219
U.S. Government agency obligations - government-sponsored enterprises	—	8,067	—	8,067
Collateralized mortgage obligations - government issued	—	40,381	—	40,381
Collateralized mortgage obligations - government-sponsored enterprises	—	85,962	—	85,962
Interest rate swaps	—	1,139	—	1,139
Liabilities:				
Interest rate swaps	\$—	\$1,139	\$—	\$1,139
December 31, 2015	Fair Value Measurements Using			
	Level 1	Level 2	Level 3	Total
	1	2	3	
	(In Thousands)			
Assets:				
Securities available-for-sale:				
Municipal obligations	\$—	\$4,283	\$—	\$4,283
Asset backed securities	—	1,269	—	1,269
U.S. Government agency obligations - government-sponsored enterprises	—	8,017	—	8,017
Collateralized mortgage obligations - government issued	—	44,543	—	44,543
Collateralized mortgage obligations - government-sponsored enterprises	—	82,436	—	82,436
Interest rate swaps	—	552	—	552
Liabilities:				
Interest rate swaps	\$—	\$552	\$—	\$552

For assets and liabilities measured at fair value on a recurring basis, there were no transfers between the levels during the three months ended March 31, 2016 or the year ended December 31, 2015 related to the above measurements.

Table of Contents

Assets and liabilities measured at fair value on a non-recurring basis, segregated by fair value hierarchy are summarized below:

	Balance at March 31 2016 (In Thousands)	Fair Value Measurements Using Level 1 Level 2 Level 3	Total Gains (Losses)
Impaired loans	\$14,314	\$12,601	\$1,713
Foreclosed properties	1,677	—	—
Loan servicing rights	1,692	—	1,692

	Balance at December 31 2015 (In Thousands)	Fair Value Measurements Using Level 1 Level 2 Level 3	Total Gains (Losses)
Impaired loans	\$17,763	\$11,518	\$6,245
Foreclosed properties	1,677	—	(36)
Loan servicing rights	1,563	—	1,563

Impaired loans were written down to the fair value of their underlying collateral less costs to sell of \$14.3 million and \$17.8 million at March 31, 2016 and December 31, 2015, respectively, through the establishment of specific reserves or by recording charge-offs when the carrying value exceeded the fair value. Valuation techniques consistent with the market approach, income approach, or cost approach were used to measure fair value and primarily included observable inputs for the individual impaired loans being evaluated such as current appraisals, recent sales of similar assets or other observable market data, and are reflected within Level 2 of the hierarchy. In cases where an input is unobservable, specifically discounts applied to appraisal values to adjust such values to current market conditions or to reflect net realizable value, the impaired loan balance is reflected within Level 3 of the hierarchy. The quantification of unobservable inputs for Level 3 impaired loan values range from 10% - 93%. The weighted average of those unobservable inputs as of the measurement date of March 31, 2016 was 29%. The majority of the impaired loans in the Level 3 category are considered collateral dependent loans.

Loan servicing rights represent the asset retained upon sale of the guaranteed portion of certain SBA loans. When SBA loans are sold, servicing rights are initially recorded at fair value with the income statement effect recorded in gains on sales of loans. The servicing rights are subsequently measured using the amortization method, which requires amortization into non-interest income in proportion to, and over the period of, the estimated future net servicing income of the underlying loans.

The Corporation periodically reviews this portfolio for impairment and engages a third-party valuation firm to assess the fair value of the overall servicing rights portfolio. Loan servicing rights do not trade in an active, open market with readily observable prices. While sales of loan servicing rights do occur, the precise terms and conditions typically are not readily available to allow for a “quoted price for similar assets” comparison. Accordingly, the Corporation utilizes an independent valuation from a third party which uses a discounted cash flow model to estimate the fair value of its loan servicing rights. The valuation model incorporates prepayment assumptions to project loan servicing rights cash flows based on the current interest rate scenario, which is then discounted to estimate an expected fair value of the loan servicing rights. The valuation model considers portfolio characteristics of the underlying serviced portion of the SBA loans and uses the following significant unobservable inputs: (1) constant prepayment rate (“CPR”) assumptions based on the SBA sold pools historical CPR as quoted in Bloomberg and (2) a discount rate of 10%. Due to the nature of the valuation inputs, loan servicing rights are classified in Level 3 of the fair value hierarchy.

As of March 31, 2016 and December 31, 2015, the estimated fair value of the Corporation's loan servicing asset was \$1.7 million and \$1.6 million, respectively.

Table of Contents

Foreclosed properties, upon initial recognition, are re-measured and reported at fair value through a charge-off to the allowance for loan and lease losses, if deemed necessary, based upon the fair value of the foreclosed property. The fair value of a foreclosed property, upon initial recognition, is estimated using a market approach or Level 2 inputs based on observable market data, typically a current appraisal, or Level 3 inputs based upon assumptions specific to the individual property or equipment. Level 3 inputs typically include unobservable inputs such as management-applied discounts used to further reduce values to a net realizable value and may be used in situations when observable inputs become stale. Foreclosed property fair value inputs may transition to Level 1 upon receipt of an accepted offer for the sale of the related foreclosed property.

As of March 31, 2016 and December 31, 2015, there were no foreclosed properties supported by a Level 3 valuation. Subsequent impairments of foreclosed properties are recorded as a loss on foreclosed properties. Based upon an evaluation of value of certain of the Corporation's foreclosed properties, there were no impairment losses recognized for the three months ended March 31, 2016. The activity of the Corporation's foreclosed properties is summarized as follows:

	As of and for the Three Months Ended March 31, 2016 (In Thousands)	As of and for the Year Ended December 31, 2015
Foreclosed properties at the beginning of the period	\$1,677	\$ 1,693
Foreclosed properties acquired in acquisition, at fair value	—	—
Loans transferred to foreclosed properties, at lower of cost or fair value	—	341
Proceeds from sale of foreclosed properties	—	(528)
Net gain on sale of foreclosed properties	—	207
Impairment valuation	—	(36)
Foreclosed properties at the end of the period	\$1,677	\$ 1,677

Disclosure of fair value information about financial instruments, for which it is practicable to estimate that value, is required whether or not recognized in the Consolidated Balance Sheets. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. In that regard, the derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in immediate settlement of the instruments. Certain financial instruments and all non-financial instruments are excluded from the disclosure requirements. Accordingly, the aggregate fair value amounts presented do not necessarily represent the underlying value of the Corporation.

Cash and cash equivalents: The carrying amounts reported for cash and due from banks, interest-bearing deposits held by the Corporation, accrued interest receivable and accrued interest payable approximate fair value because of their immediate availability and because they do not present unanticipated credit concerns. As of March 31, 2016 and December 31, 2015, the Corporation held \$10.9 million and \$9.1 million, respectively, of commercial paper. The fair value of commercial paper is classified as a Level 3 input due to the lack of available independent pricing sources. The carrying value of brokered certificates of deposit purchased is equivalent to the purchase price of the instruments as the Corporation has not elected a fair value option for these instruments. The fair value of brokered certificates of deposits purchased is based on the discounted value of contractual cash flows using a discount rate reflective of rates currently offered for deposits of similar remaining maturities. As of March 31, 2016 and December 31, 2015, the Corporation held \$4.7 million and \$4.5 million, respectively, of brokered certificates of deposits.

Table of Contents

Securities: The fair value measurements of investment securities are determined by a third-party pricing service which considers observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, trade execution data, market consensus prepayment speeds, credit information and the securities' terms and conditions, among other things. The fair value measurements are subject to independent verification to another pricing source on a quarterly basis to review for reasonableness. Any significant differences in pricing are reviewed with appropriate members of management who have the relevant technical expertise to assess the results. The Corporation has determined that these valuations are classified in Level 2 of the fair value hierarchy. When the independent pricing service does not provide a fair value measurement for a particular security, the Corporation will estimate the fair value based on specific information about each security. Fair values derived in this manner are classified in Level 3 of the fair value hierarchy.

Loans Held for Sale: Loans held for sale, which consist of residential real estate mortgage loans and the guaranteed portion of SBA loans, are carried at the lower of cost or estimated fair value. The estimated fair value was based on what secondary markets are currently offering for portfolios with similar characteristics.

Loans and Leases: The fair value estimation process for the loan portfolio uses an exit price concept and reflects discounts that the Corporation believes are consistent with liquidity discounts in the market place. Fair values are estimated for portfolios of loans with similar financial characteristics. The fair value of performing and nonperforming loans is calculated by discounting scheduled and expected cash flows through the estimated maturity using estimated market rates that reflect the credit and interest rate risk inherent in the portfolio of loans and then applying a discount factor based upon the embedded credit risk of the loan and the fair value of collateral securing nonperforming loans when the loan is collateral dependent. The estimate of maturity is based on the Banks' historical experience with repayments for each loan classification, modified, as required, by an estimate of the effect of current economic and lending conditions. Significant unobservable inputs include, but are not limited to, discounts (investor yield premiums) applied to fair value calculations to further determine the exit price value of a portfolio of loans.

Federal Home Loan Bank and Federal Reserve Bank Stock: The carrying amount of FHLB and FRB stock equals its fair value because the shares may be redeemed by the FHLB and the FRB at their carrying amount of \$100 per share.

Cash Surrender Value of Life Insurance: The carrying amount of the cash surrender value of life insurance approximates its fair value as the carrying value represents the current settlement amount.

Deposits: The fair value of deposits with no stated maturity, such as demand deposits and money market accounts, is equal to the amount payable on demand. The fair value of time deposits is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities. The fair value estimates do not include the intangible value that results from the funding provided by deposit liabilities compared to borrowing funds in the market.

Borrowed Funds: Market rates currently available to the Corporation and Banks for debt with similar terms and remaining maturities are used to estimate fair value of existing debt.

Interest Rate Swaps: The carrying amount and fair value of existing derivative financial instruments are based upon independent valuation models, which use widely accepted valuation techniques, including discounted cash flow analysis on the expected cash flows of each derivative contract. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs, including interest rate curves and implied volatilities. The Corporation incorporates credit valuation adjustments to appropriately reflect both its own nonperformance risk and the respective counterparty's nonperformance risk in the fair value measurements. In adjusting the fair value of its derivative contracts for the effect of nonperformance risk, the Corporation considers the impact of netting and any applicable credit enhancements, such as collateral postings, thresholds, mutual puts and guarantees.

Financial Instruments with Off-Balance-Sheet Risks: The fair value of the Corporation's off-balance-sheet instruments is based on quoted market prices and fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the credit standing of the related counterparty. Commitments to extend credit and standby letters of credit are generally not marketable. Furthermore, interest rates on any amounts drawn under such commitments would generally be established at market rates at the time of the draw. Fair value would principally

derive from the present value of fees received for those products.

Limitations: Fair value estimates are made at a discrete point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Corporation's entire holding of a particular financial instrument. Because no market exists for a significant portion of the Corporation's financial instruments, fair value estimates are based on judgments regarding future expected loss

Table of Contents

experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Fair value estimates are based on existing balance sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and are not considered in the estimates.

Note 9 — Derivative Financial Instruments

The Corporation offers interest rate swap products directly to qualified commercial borrowers. The Corporation economically hedges client derivative transactions by entering into offsetting interest rate swap contracts executed with a third party. Derivative transactions executed as part of this program are not designated as accounting hedge relationships and are marked to market through earnings each period. The derivative contracts have mirror-image terms, which results in the positions' changes in fair value primarily offsetting through earnings each period. The credit risk and risk of non-performance embedded in the fair value calculations is different between the dealer counterparties and the commercial borrowers, which may result in a difference in the changes in the fair value of the mirror-image swaps. The Corporation incorporates credit valuation adjustments to appropriately reflect both its own non-performance risk and the counterparty's risk in the fair value measurements. When evaluating the fair value of its derivative contracts for the effects of non-performance and credit risk, the Corporation considers the impact of netting and any applicable credit enhancements such as collateral postings, thresholds and guarantees.

At March 31, 2016, the aggregate amortizing notional value of interest rate swaps with various commercial borrowers was 23.3 million. The Corporation receives fixed rates and pays floating rates based upon LIBOR on the swaps with commercial borrowers. These interest rate swaps mature in August, 2018 through February, 2023. Commercial borrower swaps are completed independently with each borrower and are not subject to master netting arrangements. These commercial borrower swaps were reported on the Consolidated Balance Sheets as a derivative asset of \$1.1 million and are included in accrued interest receivable and other assets. In the event of default on a commercial borrower interest rate swap by the counterparty, a right of offset exists to allow the commercial borrower to set off amounts due against the related commercial loan. As of March 31, 2016, no interest rate swaps were in default and therefore all values for the commercial borrower swaps are recorded on a gross basis within the Corporation's financial position.

At March 31, 2016, the aggregate amortizing notional value of interest rate swaps with dealer counterparties was also 23.3 million. The Corporation pays fixed rates and receives floating rates based upon LIBOR on the swaps with dealer counterparties. These interest rate swaps mature in August, 2018 through February, 2023. Dealer counterparty swaps are subject to master netting agreements among the contracts within each of the Banks and are reported on the Consolidated Balance Sheets as a net derivative liability of \$1.1 million, included in accrued interest payable and other liabilities as of March 31, 2016. The gross amount of dealer counterparty swaps was also \$1.1 million as no right of offset existed with the dealer counterparty swaps as of March 31, 2016.

The table below provides information about the location and fair value of the Corporation's derivative instruments as of March 31, 2016 and December 31, 2015.

	Interest Rate Swap Contracts			
	Asset Derivatives		Liability Derivatives	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
	(In Thousands)			
Derivatives not designated as hedging instruments				
March 31, 2016	Accrued interest receivable and other assets	\$ 1,139	Accrued interest payable and other liabilities	\$ 1,139

December 31, 2015	Accrued interest receivable and other assets	\$552	Accrued interest payable and other liabilities	\$552
-------------------	---	-------	---	-------

Table of Contents

No derivative instruments held by the Corporation for the three months ended March 31, 2016 were considered hedging instruments. All changes in the fair value of these instruments are recorded in other non-interest income. Given the mirror-image terms of the outstanding derivative portfolio, the change in fair value for the three months ended March 31, 2016 and 2015 had an insignificant impact on the unaudited Consolidated Statements of Income.

Note 10 — Regulatory Capital

The Corporation and the Banks are subject to various regulatory capital requirements administered by Federal, State of Wisconsin and State of Kansas banking agencies. Failure to meet minimum capital requirements can result in certain mandatory, and possibly additional discretionary actions on the part of regulators, that if undertaken, could have a direct material effect on the Banks' assets, liabilities and certain off-balance-sheet items as calculated under regulatory practices. The Corporation's and the Banks' capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings and other factors. The Corporation regularly reviews and updates when appropriate its Capital and Liquidity Action Plan (the "Capital Plan"), which is designed to help ensure appropriate capital adequacy, to plan for future capital needs and to ensure that the Corporation serves as a source of financial strength to the Banks. The Corporation's and the Banks' Boards of Directors and management teams adhere to the appropriate regulatory guidelines on decisions which affect their respective capital positions, including but not limited to, decisions relating to the payment of dividends and increasing indebtedness.

As a bank holding company, the Corporation's ability to pay dividends is affected by the policies and enforcement powers of the Board of Governors of the Federal Reserve system (the "Federal Reserve"). Federal Reserve guidance urges companies to strongly consider eliminating, deferring or significantly reducing dividends if: (i) net income available to common shareholders for the past four quarters, net of dividends previously paid during that period, is not sufficient to fully fund the dividend; (ii) the prospective rate of earnings retention is not consistent with the bank holding company's capital needs and overall current prospective financial condition; or (iii) the bank holding company will not meet, or is in danger of not meeting, its minimum regulatory capital ratios. Management intends, when appropriate under regulatory guidelines, to consult with the Federal Reserve Bank of Chicago and provide it with information on the Corporation's then-current and prospective earnings and capital position in advance of declaring any cash dividends. As a Wisconsin corporation, the Corporation is subject to the limitations of the Wisconsin Business Corporation Law, which prohibit the Corporation from paying dividends if such payment would: (i) render the Corporation unable to pay its debts as they become due in the usual course of business, or (ii) result in the Corporation's assets being less than the sum of its total liabilities plus the amount needed to satisfy the preferential rights upon dissolution of any stockholders with preferential rights superior to those stockholders receiving the dividend.

The Banks are also subject to certain legal, regulatory and other restrictions on their ability to pay dividends to the Corporation. As a bank holding company, the payment of dividends by the Banks to the Corporation is one of the sources of funds the Corporation could use to pay dividends, if any, in the future and to make other payments. Future dividend decisions by the Banks and the Corporation will continue to be subject to compliance with various legal, regulatory and other restrictions as defined from time to time.

Qualitative measures established by regulation to ensure capital adequacy require the Corporation and the Banks to maintain minimum amounts and ratios of Total, common equity Tier 1 and Tier 1 capital to risk-weighted assets and of Tier 1 capital to average assets. These risk-based capital requirements presently address credit risk related to both recorded and off-balance-sheet commitments and obligations. Management believes, as of March 31, 2016, that the Corporation and the Banks met all applicable capital adequacy requirements.

In July 2013, the FRB and the FDIC approved the final rules implementing the Basel Committee on Banking Supervision's ("BCBS") capital guidelines for U.S. banks. These rules are applicable to all financial institutions that are subject to minimum capital requirements, including federal and state banks and savings and loan associations, as well as bank and savings and loan holding companies other than "small bank holding companies" (generally non-publicly

traded bank holding companies with consolidated assets of less than \$1 billion). Under the final rules, minimum requirements will increase for both the quantity and quality of capital held by the Corporation. The rules include a new Common Equity Tier 1 capital to risk-weighted assets minimum ratio of 4.5%, raise the minimum ratio of Tier 1 capital to risk-weighted assets from 4.0% to 6.0%, require a minimum ratio of Total Capital to risk-weighted assets of 8.0%, and require a minimum Tier 1 leverage ratio of 4.0%. The rules also permit banking organizations with less than \$15 billion to retain, through one-time election, the existing treatment for accumulated other comprehensive income, which would not affect regulatory capital. The Corporation elected to retain this treatment, which reduces the volatility of regulatory capital ratios. A new capital conservation buffer, comprised of common equity Tier 1 capital, is also established above the regulatory minimum capital requirements. This capital conservation buffer

Table of Contents

will be phased in beginning January 1, 2016 at 0.625% of risk-weighted assets and increase each subsequent year by an additional 0.625% until reaching its final level of 2.5% on January 1, 2019.

The phase-in period for the final rules became effective for the Corporation on January 1, 2015, with full compliance with all of the final rules' requirements phased in over a multi-year schedule, to be fully phased-in by January 1, 2019. As of March 31, 2016, the Corporation's and the Bank's capital levels remained characterized as well capitalized under the new rules.

The following table summarizes the Corporation's and Banks' capital ratios and the ratios required by their federal regulators at March 31, 2016 and December 31, 2015, respectively:

	Actual		Minimum Required for Capital Adequacy Purposes		Minimum Required to Be Well Capitalized Under Prompt Corrective Action Requirements	
	Amount	Ratio	Amount	Ratio	Amount	Ratio

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

General

Unless otherwise indicated or unless the context requires otherwise, all references in this Report to the "Corporation," "we," "us," "our," or similar references mean First Business Financial Services, Inc. together with our subsidiaries. "FBB", "FBB - Milwaukee" and "Alterra" are used to refer to our subsidiaries, First Business Bank, First Business Bank - Milwaukee, and Alterra Bank, respectively, and the "Banks" is used to refer to FBB, FBB - Milwaukee, and Alterra together.

Forward-Looking Statements

When used in this report the words or phrases "may," "could," "should," "hope," "might," "believe," "expect," "plan," "assume," "estimate," "anticipate," "project," "likely," or similar expressions are intended to identify "forward-looking statements." Such statements are subject to risks and uncertainties, including among other things:

- Competitive pressures among depository and other financial institutions nationally and in our markets.
 - Adverse changes in the economy or business conditions, either nationally or in our markets.
 - Increases in defaults by borrowers and other delinquencies.
 - Our inability to manage growth effectively, including the successful expansion of our client support, administrative infrastructure and internal management systems.
 - Fluctuations in interest rates and market prices.
 - The consequences of continued bank acquisitions and mergers in our market areas, resulting in fewer but much larger and financially stronger competitors.
 - Changes in legislative or regulatory requirements applicable to us and our subsidiaries.
 - Changes in tax requirements, including tax rate changes, new tax laws and revised tax law interpretations.
 - System failure or breaches of our network security, including with respect to our internet banking activities.
- These risks could cause actual results to differ materially from what we have anticipated or projected. These risk factors and uncertainties should be carefully considered by our shareholders and potential investors. See Item 1A — Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2015 for discussion relating to risk factors impacting us. Investors should not place undue reliance on any such forward-looking statements, which speak only as of the date made. The factors described within this Form 10-Q could affect our financial performance and could cause actual results for future periods to differ materially from any opinions or statements expressed with respect to future periods.

Where any such forward-looking statement includes a statement of the assumptions or bases underlying such forward-looking statement, we caution that, while our management believes such assumptions or bases are reasonable and are made in good faith, assumed facts or bases can vary from actual results, and the differences between assumed facts or bases and actual results can be material, depending on the circumstances. Where, in any forward-looking statement, an expectation or belief is expressed as to future results, such expectation or belief is expressed in good faith and believed to have a reasonable basis, but there can be no assurance that the statement of expectation or belief will be achieved or accomplished.

We do not intend to, and specifically disclaim any obligation to, update any forward-looking statements.

The following discussion and analysis is intended as a review of significant events and factors affecting our financial condition and results of operations for the periods indicated. The discussion should be read in conjunction with the Unaudited Consolidated Financial Statements and the Notes thereto presented in this Form 10-Q.

Overview

We are a registered bank holding company incorporated under the laws of the State of Wisconsin and are engaged in the commercial banking business through our wholly owned banking subsidiaries, FBB, FBB-Milwaukee and Alterra. All of our operations are conducted through the Banks and certain subsidiaries of FBB. We operate with a business banking focus delivering a full line of commercial banking products and services tailored to meet the specific needs of small and medium sized businesses, business owners, executives, professionals and high net worth individuals. Our commercial banking products and services include commercial lending, SBA lending, asset-based lending, equipment

financing, factoring, residential mortgage lending, trust and investment services, treasury management services and a broad range of deposit products. We do not utilize a branch network to attract retail clients. Our operating philosophy incorporates local decision making and local client service from each of our primary banking locations in Madison, Brookfield and Appleton, Wisconsin and Leawood, Kansas combined with the efficiency of centralized administrative functions, such as credit, information technology, marketing,

Table of Contents

finance and accounting and human resources. We have a niche business banking model and we consistently operate within this model to provide value-added financial solutions to our clients through the high touch service of our experienced staff.

Operational Highlights

• Total assets increased to \$1.790 billion as of March 31, 2016 compared to \$1.782 billion as of December 31, 2015.

• Net income for the three months ended March 31, 2016 was \$4.5 million compared to net income of \$4.2 million for the three months ended March 31, 2015.

• Diluted earnings per common share for the three months ended March 31, 2016 were \$0.52 compared to diluted earnings per common share of \$0.48 for the three months ended March 31, 2015.

• Net interest margin decreased by 20 basis points to 3.59% for the three months ended March 31, 2016 compared to 3.79% for the three months ended March 31, 2015.

Excluding the impact of net accretion/amortization on purchase accounting adjustments on Alterra balances in both quarters, net interest margin measured 3.51% for the first quarter of 2016, improving four basis points from 3.47% for the first quarter of 2015.

• Top line revenue, the sum of net interest income and non-interest income, increased 7.2% to \$20.1 million for the three months ended March 31, 2016 compared to \$18.8 million for the three months ended March 31, 2015.

• Annualized return on average assets ("ROAA") and return on average equity ("ROAE") were 1.00% and 11.68%, respectively, for the three-month period ended March 31, 2016, compared to 1.00% and 11.98%, respectively, for the same time period in 2015.

• Our efficiency ratio was 62.4% for the three months end March 31, 2016, compared to 62.5% for the three months ended March 31, 2015.

• Our effective tax rate was 34.2% and 34.1% for the three months ended March 31, 2016 and 2015, respectively.

• Our provision for loan and lease losses was \$525,000 for the three months ended March 31, 2016 compared to \$684,000 for the same period in the prior year.

• Allowance for loan and lease losses as a percentage of gross loans and leases was 1.15% at March 31, 2016 compared to 1.14% at December 31, 2015.

• Non-performing assets as a percentage of total assets was 1.09% at March 31, 2016 compared to 1.35% at December 31, 2015.

• Non-accrual loans decreased by \$4.4 million, or 19.9%, to \$17.9 million at March 31, 2016 from \$22.3 million at December 31, 2015.

• Net charge-offs of \$157,000 represented 0.04% of annualized average gross loans and leases for the three months ended March 31, 2016, compared to \$319,000 and 0.10% for the three months ended March 31, 2015.

Table of Contents

Results of Operations

Top Line Revenue

Top line revenue is comprised of net interest income and non-interest income. This measurement is also commonly referred to as operating revenue. Top line revenue increased 7.2% for the three months ended March 31, 2016, compared to the same period in the prior year, primarily due to strong loan growth, stable net interest margin exclusive of purchase accounting and robust SBA loan production. The increase in net interest income was partially offset by the diminishing impact of purchase accounting accretion/amortization when compared to the same period in the prior year. The components of top line revenue were as follows:

	For the Three Months Ended March 31,		
	2016	2015	Change
	(Dollars in Thousands)		
Net interest income	\$ 15,539	\$ 14,930	4.1 %
Non-interest income	4,594	3,848	19.4
Total top line revenue	\$ 20,133	\$ 18,778	7.2

Return on Average Assets and Return on Average Equity

ROAA was 1.00% for the three months ended March 31, 2016 and March 31, 2015 as net income and total average assets both increased by approximately 9% year over year. ROAA is a critical metric used by us to measure the profitability of our organization and how efficiently our assets are deployed. It is a measurement that allows us to better benchmark our profitability to our peers without the need to consider different degrees of leverage which can ultimately influence return on equity measures.

ROAE for the three months ended March 31, 2016 was 11.68% compared to 11.98% for the three months ended March 31, 2015 as total average equity increased at a slightly greater pace than net income year over year. We view ROAE to be an important measure of profitability, and we continue to focus on improving our return to our shareholders by enhancing the overall profitability of our client relationships, controlling our expenses and minimizing our credit costs.

Table of Contents

Efficiency Ratio

Efficiency ratio is a non-GAAP measure representing non-interest expense excluding the effects of losses or gains on foreclosed properties, amortization of other intangible assets and other discrete items, if any, divided by top line revenue. We believe the efficiency ratio allows investors and analysts to better assess the Corporation's operating expenses in relation to its top line revenue by removing the volatility that is associated with certain one-time and other discrete items. The information provided below reconciles the efficiency ratio to its most comparable GAAP measure.

Please refer to the Non-Interest Expense section below for discussion on the primary drivers of the year-over-year increase in the efficiency ratio.

	For the Three Months Ended March 31,			
	2016	2015	Change	
	(Dollars in Thousands)			
Total non-interest expense	\$12,699	\$11,732	8.2	%
Less:				
Net gain on foreclosed properties	—	(16)	NM
Amortization of other intangible assets	16	18		NM
Amortization of tax credit investments	112	—		NM
Total adjusted operating expense	\$12,571	\$11,730	7.2	
Net interest income	\$15,539	\$14,930	4.1	
Total non-interest income	4,594	3,848	19.4	
Top line revenue	\$20,133	\$18,778	7.2	
Efficiency ratio	62.44	% 62.47	% (0.03)	
NM = Not meaningful				

Table of Contents

Net Interest Income

Net interest income levels depend on the amount of and yield on interest-earning assets as compared to the amount of and rate paid on interest-bearing liabilities. Net interest income is sensitive to changes in market rates of interest and the asset/liability management processes to prepare for and respond to such changes.

The following table provides information with respect to (1) the change in net interest income attributable to changes in rate (changes in rate multiplied by prior volume) and (2) the change in net interest income attributable to changes in volume (changes in volume multiplied by prior rate) for the three months ended March 31, 2016 compared to the same period of 2015. The change in net interest income attributable to changes in rate and volume (changes in rate multiplied by changes in volume) has been allocated to the rate and volume changes in proportion to the relationship of the absolute dollar amounts of the change in each.

	Increase (Decrease) for the Three Months Ended March 31, 2016 Compared to 2015

- (1) The average balances of loans and leases include non-performing loans and leases. Interest income related to non-performing loans and leases is recognized when collected.
- (2) Includes amortized cost basis of assets available for sale and held to maturity.
- (3) Yields on tax-exempt municipal obligations are not presented on a tax-equivalent basis in this table.
- (4) Represents annualized yields/rates.

Table of Contents

Comparison of Net Interest Income for the Three Months Ended March 31, 2016 and 2015

Net interest income increased \$609,000, or 4.1%, during the three months ended March 31, 2016 compared to the same period in 2015. The increase in net interest income was primarily attributable to a favorable volume variance on the loan and the lease portfolio, specifically commercial real estate. This favorable variance was partially offset by an overall unfavorable variance on wholesale deposits. The percentage increase in net interest income is less than the percentage increase in average loans and leases primarily due to the diminishing year over year impact of purchase accounting accretion/amortization. Excluding purchase accounting accretion/amortization, net interest income increased \$1.5 million, or 11.0%.

The yield on average earning assets for the three months ended March 31, 2016 was 4.47% compared to 4.62% for the three months ended March 31, 2015. The decrease in the yield was principally attributable to the diminishing impact of accretion related to purchase accounting adjustments on the Alterra loan portfolio. Excluding purchase accounting accretion, the yield on average earning assets increased five basis points year over year from 4.36% to 4.41%.

The overall weighted average rate paid on interest-bearing liabilities was 1.07% for the three months ended March 31, 2016, an increase of eight basis points from 0.99% for the three months ended March 31, 2015. The increase in the overall rate on the interest-bearing liabilities was primarily caused by an increase in the rate paid on our wholesale deposits. This increase was partially offset by an overall favorable variance on in-market deposits led by strong money market growth.

The weighted average rate paid on our interest-bearing deposits was 0.89% for the three months ended March 31, 2016, an increase of nine basis points from 0.80% for the three months ended March 31, 2015. The increase in the weighted average rate paid on our interest-bearing deposits was primarily driven by the replacement of maturing in-market certificates of deposit with a relatively equal mix of in-market non-maturity deposit balances and wholesale funding. Despite an uncertain rate environment in 2016, management expects to effectively manage the Company's liability structure in both term and rate to deliver a stable net interest margin. Further, we expect continued success in attracting in-market deposit relationships in our Wisconsin and Kansas-based markets which we believe will contribute to our ability to maintain an appropriate cost of funds. Average in-market client deposits - comprised of all transaction accounts, money market accounts and non-wholesale deposits - increased 5.0% to \$1.111 billion for the three months ended March 31, 2016 from \$1.058 billion for the three months ended March 31, 2015.

Net interest margin decreased 20 basis points to 3.59% for the three months ended March 31, 2016 compared to 3.79% for the three months ended March 31, 2015. Net accretion/amortization on the Alterra purchase accounting adjustments was \$333,000 for the three months end March 31, 2016 and \$1.2 million for the same period in 2015. While management expects the net accretion/amortization to trend lower, it may be volatile due to the uncertain nature of loan prepayments. Excluding purchase accounting accretion/amortization, net interest margin increased four basis points to 3.51% from 3.47%. Loan and lease growth positively impacted the mix of earning assets for the three months ended March 31, 2016 which drove a seven basis point increase in net interest margin. Despite the Company's record in-market deposit balances as of March 31, 2016, the year over year deposit mix change increased the overall cost of funds which negatively affected our net interest margin by approximately two basis points. Other factors, primarily the declining yield on our investment portfolio, negatively influenced the net interest margin by one basis point in the aggregate.

Provision for Loan and Lease Losses

We determine our provision for loan and lease losses based upon credit risk and other subjective factors pursuant to our allowance for loan and lease loss methodology, the magnitude of current and historical net charge-offs recorded in the period and the amount of reserves established for impaired loans that present collateral shortfall positions. During the fourth quarter of 2015, the methodology used to determine the amount of loan and lease loss provision was refined by increasing the look-back period from three years to eight years, estimating the loss emergence period using a more granular approach, and further emphasizing the application of quantitative factors to support the inherent risk of the loan and lease portfolio and less emphasis on subjective analysis. The impact of these refinements was not significant. Refer to Allowance for Loan and Lease Losses for further information regarding our refined allowance for loan and lease loss methodology.

We recorded provision expense of \$525,000 and \$684,000 for the three months ended March 31, 2016 and 2015, respectively. Provision for the three months ended March 31, 2016 primarily reflects adjustments to certain subjective factors and additions commensurate with loan growth, partially offset by a reduction of the historical loss factors applied in calculating the probable losses inherent within the loan and lease portfolio for which a reserve should be established.

Table of Contents

During the three months ended March 31, 2016 and 2015, the factors influencing the provision for loan and lease losses were the following:

	For the Three Months Ended March 31, 2016 2015 (In Thousands)	
Components of the provision for loan and lease losses:		
Net (decrease) increase in specific reserves on impaired loans	\$(216)	\$1
Net increase in allowance for loan and lease loss reserve due to subjective factor changes	332	—
Charge-offs	244	324
Recoveries	(87)	(5)
Net increase in inherent risk of the loan and lease portfolio, including loan and lease growth	252	364
Total provision for loan and lease losses	\$525	\$684

The addition of specific reserves on impaired loans represents new specific reserves established on impaired loans for which, although collateral shortfalls are present, we believe we will be able to recover our principal. The release of specific reserves represents the reduction of previously established reserves that are no longer required. A decrease in allowance for loan and lease losses due to subjective factor changes reflects management's evaluation of the level of risk within the portfolio based upon several factors for each portfolio category, including but not limited to: management's ongoing review and grading of the loan and lease portfolios, consideration of delinquency experience, changes in the size of the loan and lease portfolios, existing economic conditions, level of loans and leases subject to more frequent review by management, changes in underlying collateral, concentrations of loans to specific industries, and other qualitative factors that could affect credit losses. As overall asset quality metrics improve and the level and trend of the factors improve for a sustainable period of time, the level of general reserve due to these factors may be reduced causing an overall reduction in the level of the required reserve deemed to be appropriate by management. Conversely, increases in the level and trend of these factors may warrant an increase to our overall allowance for loan and lease losses. Charge-offs in excess of specific reserves represent an additional provision for loan and lease losses required to maintain the allowance for loan and lease losses at a level deemed appropriate by management. This amount is net of the release of any specific reserve that may have already been provided. Charge-offs in excess of specific reserves can occur in situations where: (i) a loan has previously been partially written down to its estimated fair value and continues to decline, (ii) rapid deterioration of a credit requires an immediate partial or full charge-off, or (iii) the specific reserve was not adequate to cover the amount of the required charge-off. Change in the inherent risk of the portfolio is primarily influenced by the overall growth in gross loans and leases and an analysis of loans previously charged off, as well as, movement of existing loans and leases in and out of an impaired loan classification where a specific evaluation of a particular credit may be required rather than the application of a general reserve ratio. Refer to Asset Quality for further information regarding the overall credit quality of our loan and lease portfolio.

Non-interest Income

Comparison of Non-Interest Income for the Three Months Ended March 31, 2016 and 2015

Non-interest income increased \$746,000, or 19.4%, to \$4.6 million for the three months ended March 31, 2016, from \$3.8 million for the three months ended March 31, 2015. The increase was primarily due to SBA loan production and increased fees earned for trust and investment services, partially offset by the diminishing impact of the reserve for unfunded commitments related to the Alterra acquisition.

Gains on sale of SBA loans for the three months ended March 31, 2016 totaled \$1.4 million, an increase of \$871,000, or 172.5%, from the same period in 2015 as the Company continues to successfully execute its SBA strategy across its footprint. In addition, loan fees related to the origination and servicing of SBA loans increased \$84,000, or 59.0%.

Trust and investment services fee income increased by \$66,000, or 5.5%, to \$1.3 million for the three months ended March 31, 2016 from \$1.2 million for the three months ended March 31, 2015. This increase was primarily driven by record assets under management and administration. At March 31, 2016, we had a record \$896.4 million of trust assets under management compared to \$817.9 million at December 31, 2015 and \$814.2 million at March 31, 2015. Assets under administration were a record \$210.4 million at March 31, 2016 compared to \$203.2 million at December 31, 2015 and \$195.1 million at March 31, 2015.

Table of Contents

Other non-interest income decreased by \$350,000 to \$206,000 for the three months ended March 31, 2016, compared to \$556,000 for the three months ended March 31, 2015. The decrease in other income was primarily due to the diminishing impact of the reserve for unfunded commitments related to the Alterra acquisition. For the three months ended March 31, 2016, we recognized \$8,000 in non-interest income due to the decrease of the reserve, as the associated loans continue to fully fund, renew or mature, compared to \$285,000 for the same period in 2015. The remaining reserve for unfunded commitments was \$31,000 as of March 31, 2016. Should the commitment be withdrawn for any reason or become fully funded prior to maturity, we will accelerate the remaining liability accordingly.

Non-Interest Expense**Comparison of Non-Interest Expense for the Three Months Ended March 31, 2016 and 2015**

Non-interest expense increased by \$1.0 million, or 8.2%, to \$12.7 million for the three months ended March 31, 2016 from \$11.7 million for the comparable period of 2015. The increase in non-interest expense was primarily caused by an increase in compensation expense, partially offset by a decrease in professional fees.

Compensation expense increased by \$1.0 million, or 13.8%, to \$8.4 million for the three months ended March 31, 2016 from \$7.4 million for the three months ended March 31, 2015. The overall increase reflects growth in compensation costs related to annual merit increases, employee benefit costs and incentive compensation accruals on a larger base of employees than in the comparative period of the prior year. Full time equivalent employees as of March 31, 2016 were 255, up 20.3% from 212 at March 31, 2015. We expect to continue investing in talent throughout 2016 to support our strategic growth efforts, both in the form of additional business development and operational staff.

Professional fees expense decreased by \$128,000, or 12.9%, to \$861,000 for the three months ended March 31, 2016 from \$989,000 for the three months ended March 31, 2015. The decrease is consistent with management's expectations as technology platforms introduced in 2015 are now largely in place. Management will evaluate additional technology platforms, and expand the capabilities of existing platforms, in 2016 as we continue to strategically focus on scaling the Company to efficiently facilitate our strong growth trajectory.

Income Taxes

Income tax expense was \$2.4 million for the three months ended March 31, 2016, with an effective tax rate of 34.2%, compared to income tax expense of \$2.2 million for the three months ended March 31, 2015, with an effective tax rate of 34.1%. The effective tax rate differs from the federal statutory corporate tax rate as follows:

	For the Three Months Ended March 31,	
	2016	2015
Statutory federal tax rate	35.0 %	34.4 %
State taxes, net of federal benefit	4.5	4.6
FIN 48 expense, net of federal benefit	—	—
Bank owned life insurance	(1.2)	(1.3)
Tax-exempt security and loan income, net of TEFRA adjustments	(3.7)	(3.2)
Federal new market tax credit	(0.9)	(1.0)
Other	0.5	0.6
	34.2 %	34.1 %

Generally, the provision for income taxes is determined by applying an estimated annual effective income tax rate to income before taxes and adjusting for discrete items. Typically, the rate is based on the most recent annualized forecast of pre-tax income, book versus tax differences and tax credits, if any. If we conclude that a reliable estimated annual effective tax rate cannot be determined, the actual effective tax rate for the year-to-date period may be used. We re-evaluate the income tax rates each quarter. Therefore, the current projected effective tax rate for the entire year may change.

Table of Contents

Financial Condition

General

Our total assets increased by \$8.1 million, or 0.5%, to \$1.790 billion as of March 31, 2016 compared to \$1.782 billion at December 31, 2015. The increase in total assets was primarily driven by growth in our loan and lease portfolio.

Short-term investments

Short-term investments decreased by \$7.2 million, or 7.2%, to \$91.8 million at March 31, 2016 from \$98.9 million at December 31, 2015. Our short-term investments primarily consist of interest-bearing deposits held at the FRB. We value the safety and soundness provided by the FRB and therefore we incorporate short-term investments in our on-balance-sheet liquidity program. As of March 31, 2016, our total investment in commercial paper, which is also considered a short-term investment, was \$10.9 million as compared to \$9.1 million at December 31, 2015. We approach our decisions to purchase commercial paper with similar rigor and underwriting standards as applied to our loan and lease portfolio. The original maturities of the commercial paper are usually 60 days or less and provide an attractive yield in comparison to other short-term alternatives. These investments also assist us in maintaining a shorter duration of our overall investment portfolio which we believe is necessary to take advantage of an anticipated rising-rate environment. In general, the level of our short-term investments will be influenced by the timing of deposit gathering, scheduled maturities of wholesale deposits, funding of loan growth when opportunities are presented and the level of our available-for-sale securities portfolio. Please refer to Liquidity and Capital Resources for further discussion.

Securities

Total securities, including available-for-sale and held-to-maturity, decreased by \$522,000 to \$177.3 million at March 31, 2016 compared to \$177.8 million at December 31, 2015. During the three months ended March 31, 2016, we recognized unrealized holding gains of \$876,000 before income taxes through other comprehensive income. As of March 31, 2016 and December 31, 2015, our overall securities portfolio, including available-for-sale securities and held-to-maturity securities, had an estimated weighted average expected maturity of 2.81 and 2.94 years, respectively. Generally, our investment philosophy remains unchanged from our statements made in our most recent Annual Report on Form 10-K.

We use a third-party pricing service as our primary source of market prices for our securities portfolio. On a quarterly basis, we validate the reasonableness of prices received from this source through independent verification of a representative sample of the portfolio, data integrity validation through comparison of current price to prior period prices, and an expectation-based analysis of movement in prices based upon the changes in the related yield curves and other market factors. No securities within our portfolio were deemed to be other-than-temporarily impaired as of March 31, 2016. There were no sales of securities during the three months ended March 31, 2016.

Loans and Leases Receivable

Loans and leases receivable, including loans held for sale and net of allowance for loan and lease losses, increased by \$16.2 million, or 1.1%, to \$1.434 billion at March 31, 2016 from \$1.417 billion at December 31, 2015. The increase was primarily due to the successful execution of the Company's strategic plan, which includes additional loans to both new and existing clients. Construction and land development loans were the largest contributor to loan growth in the first quarter of 2016 increasing \$19.4 million, or 12.1%, to \$179.8 million at March 31, 2016 from \$160.4 million at December 31, 2015. Of the \$19.4 million in growth, \$17.2 million consisted of construction loans that generally result in the Company obtaining the end financing relationship once the project is completed. While we continue to have a concentration in commercial real estate ("CRE"), as CRE loans represent approximately 64% of our total loans as of March 31, 2016, in general our composition of total loans and leases has remained relatively consistent due to balanced growth across our product offerings. As of March 31, 2016, of the 64% concentration in CRE loans, approximately 19% was owner-occupied CRE. We consider owner-occupied CRE more characteristic of the Company's C&I portfolio as, in general, the client's primary source of repayment are the cash flows from the operating entity occupying the commercial real estate property.

Our C&I portfolio decreased \$12.0 million, or 2.5%, to \$461.6 million at March 31, 2016 from \$473.6 million at December 31, 2015 while our CRE portfolio increased by \$26.7 million, or 3.0%, to \$932.2 million at March 31, 2016 from \$905.5 million at December 31, 2015. We will continue to emphasize actively pursuing C&I loans across the

Company as this segment of our loan and lease portfolio provides an attractive yield commensurate with an appropriate level of credit risk and creates opportunities for in-market deposit, treasury management and trust and investment relationships which generate additional fee revenue.

Table of Contents

While we continue to experience significant competition as banks operating in our primary geographic areas attempt to deploy excess liquidity, we remain committed to our underwriting standards and will not deviate from those standards for the sole purpose of growing our loan and lease portfolio. We expect our new loan and lease activity to be more than adequate to replace normal amortization and to continue to grow in future quarters. The types of loans and leases we originate and the various risks associated with these originations remain consistent with information previously outlined in our most recent Annual Report on Form 10-K.

Non-performing loans decreased \$4.4 million, or 19.9%, to \$17.9 million, compared to \$22.3 million at December 31, 2015. The Company's non-performing loans as a percentage of total gross loans and leases measured 1.23% and 1.55% at March 31, 2016 and December 31, 2015, respectively. Likewise, the ratio of non-performing assets to total assets decreased to 1.09% at March 31, 2016, compared to 1.35% at December 31, 2015. We do not expect any material changes in non-accrual loans as a percentage of gross loans and leases; however, we may experience some volatility from time to time. Please refer to Asset Quality for additional information.

Deposits

As of March 31, 2016, deposits increased by \$4.4 million to \$1.582 billion from \$1.577 billion at December 31, 2015. The increase in deposits was primarily due to an increase in the level of in-market deposits, specifically money market accounts, which increased by \$33.7 million to \$646.3 million at March 31, 2016 from \$612.6 million at December 31, 2015. The increase in money market balances was offset by a decrease of in-market certificate of deposits and wholesale deposits. Deposit ending balances associated with in-market relationships will fluctuate based upon maturity of time deposits, client demands for the use of their cash, our ability to service and maintain client relationships and new client deposit relationships.

Our strategic efforts continue to be focused on adding in-market relationships and related transaction deposit accounts. We measure the success of deposit gathering efforts based on our ability to maintain the average balances of our in-market deposit accounts consistent with our current period mix and recent trends. Our Banks' in-market deposits, consisting of all transaction accounts, money market accounts and non-wholesale deposits, are obtained primarily from the South Central, Northeastern and Southeastern regions of Wisconsin and the greater Kansas City area. Of our total average deposits, approximately \$1.111 billion, or 69.1%, were considered in-market deposits for the three months ended March 31, 2016. This compares to in-market deposits of \$1.058 billion, or 71.4%, for the same period in 2015.

The Corporation's targeted operating range of wholesale deposits to total deposits is 30%-40%. As of March 31, 2016, the ratio of end of period wholesale deposits to end of period total deposits was 30.1%. Consistent with our unique funding strategy, we will continue to use wholesale deposits in specific maturity periods needed to match-fund fixed rate loans, typically three to five years but extending longer depending on client needs, to effectively mitigate interest rate risk measured through our asset/liability management process and to support asset growth initiatives while taking into consideration our operating goals and desired level of wholesale deposits. Refer to Liquidity and Capital Resources for further information regarding our use and monitoring of wholesale deposits.

FHLB Advances and Other Borrowings

As of March 31, 2016, FHLB advances and other borrowings increased by \$271,000, or 0.8%, to \$35.0 million from \$34.7 million at December 31, 2015.

Asset Quality

Non-performing Assets

Our total impaired assets consisted of the following at March 31, 2016 and December 31, 2015, respectively:

	March 31, 2016	December 31, 2015	
	(Dollars in Thousands)		
Non-accrual loans and leases			
Commercial real estate:			
Commercial real estate - owner occupied	\$2,817	\$ 2,907	
Commercial real estate - non-owner occupied	262	1,678	
Construction and land development	4,502	4,729	
Multi-family	—	2	
1-4 family	2,631	2,611	
Total non-accrual commercial real estate	10,212	11,927	
Commercial and industrial	6,718	9,136	
Direct financing leases, net	—	38	
Consumer and other:			
Home equity and second mortgages	290	542	
Other	641	655	
Total non-accrual consumer and other loans	931	1,197	
Total non-accrual loans and leases	17,861	22,298	
Foreclosed properties, net	1,677	1,677	
Total non-performing assets	19,538	23,975	
Performing troubled debt restructurings	1,628	1,735	
Total impaired assets	\$21,166	\$ 25,710	
 Total non-accrual loans and leases to gross loans and leases	1.23	% 1.55	%
Total non-performing assets to gross loans and leases plus foreclosed properties, net	1.34	1.67	
Total non-performing assets to total assets	1.09	1.35	
Allowance for loan and lease losses to gross loans and leases	1.15	1.14	
Allowance for loan and lease losses to non-accrual loans and leases	93.41	73.17	
As of March 31, 2016 and December 31, 2015, \$14.0 million and \$16.2 million of the non-accrual loans were considered troubled debt restructurings, respectively.			

Table of Contents

A summary of our non-accrual loan and lease activity from December 31, 2015 through March 31, 2016 is as follows:
(In Thousands)

Non-accrual loans and leases as of the beginning of the period	\$22,298
Loans and leases transferred to non-accrual status	102
Accretion of the fair value discount on purchased credit impaired loans	33
Non-accrual loans and leases returned to accrual status	—
Non-accrual loans and leases transferred to foreclosed properties	—
Non-accrual loans and leases partially or fully charged-off	(244)
Cash received and applied to principal of non-accrual loans and leases	(4,328)
Non-accrual loans and leases as of the end of the period	\$17,861

We use a wide variety of available metrics to assess the overall asset quality of the portfolio and no one metric is used independently to make a final conclusion as to the asset quality of the portfolio. As of March 31, 2016, non-performing assets as a percentage of total assets decreased to 1.09% from 1.35% at December 31, 2015. The Company's successful efforts to manage impaired relationships contributed to the linked quarter decline, including the previously disclosed \$1.8 million payoff of a non-performing energy sector relationship. The remaining improvement in non-performing assets primarily reflected additional loan payoffs and paydowns.

As of March 31, 2016, the Company's direct exposure to the energy sector declined by \$2.4 million to \$7.6 million in loans and leases, or 0.53% of total gross loans and leases, with no remaining unfunded commitments. The associated reserve for loan and lease losses related to this portfolio was 8.25% of carrying value at March 31, 2016. Of this population of energy sector loans and leases, \$5.8 million was considered non-performing as of March 31, 2016. Management believes the portfolio is adequately collateralized, net of specific reserves, as of March 31, 2016.

We also monitor early stage delinquencies to assist in the identification of potential future problems. As of March 31, 2016, we believe the payment performance did not point to any new areas of concern, as approximately 99.6% of the loan and lease portfolio was in a current payment status. This metric can change rapidly however, if factors unknown to us change. We also monitor our asset quality through our established credit quality indicator categories. While overall asset quality remains strong, we will continue to actively monitor the credit quality of our loan and lease portfolios. Through this monitoring effort, we may identify additional loans and leases for which the borrowers or lessees are having difficulties making the required principal and interest payments based upon factors including, but not limited to, the inability to sell the underlying collateral, inadequate cash flow from the operations of the underlying businesses, liquidation events, or bankruptcy filings. We generally work proactively with our impaired loan borrowers to find meaningful solutions to difficult situations that are in the best interests of the Banks.

Table of Contents

The following represents additional information regarding our impaired loans and leases:

	As of and for the Three Months Ended March 31,		As of and for the Year Ended December 31,
	2016	2015	2015
(In Thousands)			
Impaired loans and leases with no impairment reserves required	\$11,663	\$10,475	\$ 15,175
Impaired loans and leases with impairment reserves required	7,826	849	8,858
Total impaired loans and leases	19,489	11,324	24,033
Less:			
Impairment reserve (included in allowance for loan and lease losses)	897	391	1,113
Net impaired loans and leases	\$18,592	\$10,933	\$ 22,920
Average impaired loans and leases	\$20,649	\$11,961	\$ 11,443
Foregone interest income attributable to impaired loans and leases	\$311	\$179	\$ 750
Less: Interest income recognized on impaired loans and leases	152	1	87
Net foregone interest income on impaired loans and leases	\$159	\$178	\$ 663

Non-performing assets also include foreclosed properties. A summary of our current-period foreclosed properties activity is as follows:

(In Thousands)

Foreclosed properties as of December 31, 2015	\$1,677
Loans transferred to foreclosed properties	—
Proceeds from sale of foreclosed properties	—
Net gain on sale of foreclosed properties	—
Impairment valuation	—
Foreclosed properties as of March 31, 2016	\$1,677

Allowance for loan and lease losses

The allowance for loan and lease losses as a percentage of gross loans and leases was 1.15% as of March 31, 2016 and 1.14% as of December 31, 2015. During the three months ended March 31, 2016, we recorded net charge-offs on impaired loans and leases of approximately \$157,000, comprised of \$244,000 of charge-offs and \$87,000 of recoveries. During the three months ended March 31, 2015, we recorded net charge-offs on impaired loans and leases of approximately \$319,000, comprised of \$324,000 of charge-offs and \$5,000 of recoveries.

While charge-offs have been relatively low in recent periods, we will continue to experience some level of periodic charge-offs in the future as exit strategies are considered and executed. Loans and leases with previously established specific reserves may ultimately result in a charge-off under a variety of scenarios. There have been no substantive changes to our methodology for estimating the appropriate level of allowance for loan and lease loss reserves from what was previously outlined in our most recent Annual Report on Form 10-K. Based upon this methodology, which includes actively monitoring the asset quality and inherent risks within the loan and lease portfolio, management concluded that an allowance for loan and lease losses of \$16.7 million, or 1.15% of total loans and leases, was appropriate as of March 31, 2016. Given ongoing complexities with current workout situations and the measured pace of improvement in economic conditions, further charge-offs and increased provisions for loan and lease losses may be recorded if additional facts and circumstances lead us to a different conclusion. In addition, various federal and state regulatory agencies review appropriateness of the allowance for loan and lease losses. These agencies could require certain loan and lease balances to be classified differently or charged off if their credit evaluations differ from those of management, based on their judgments about information available to them at the time of their examination.

Table of Contents

As of March 31, 2016 and December 31, 2015, our allowance for loan and lease losses to total non-accrual loans and leases was 93.41% and 73.17%, respectively. Impaired loans and leases exhibit weaknesses that inhibit repayment in compliance with the original terms of the note or lease. However, the measurement of impairment on loans and leases may not always result in a specific reserve included in the allowance for loan and lease losses. As part of the underwriting process, as well as our ongoing monitoring efforts, we endeavor to have appropriate collateral to protect our interest in the related loan or lease. As a result of this practice, a significant portion of our outstanding balance of non-performing loans or leases either does not require additional specific reserves or requires only a minimal amount of required specific reserve, as we believe the loans and leases are adequately collateralized as of the measurement period. In addition, management is proactive in recording charge-offs to bring loans to their net realizable value in situations where it is determined with certainty that we will not recover the entire amount of our principal. This practice may lead to a lower allowance for loan and lease loss to non-accrual loans and leases ratio as compared to our peers or industry expectations. As asset quality remains strong, our allowance for loan and lease loss is measured more through general characteristics, including historical loss experience of our portfolio rather than through specific identification and we therefore expect to see this ratio rise. Conversely, if we identify additional impaired loans or leases which are adequately collateralized and therefore require no specific or general reserve, this ratio could fall. Given our business practices and evaluation of our existing loan and lease portfolio, we believe this coverage ratio is appropriate for the probable losses inherent in our loan and lease portfolio as of March 31, 2016.

Table of Contents

A tabular summary of the activity in the allowance for loan and lease losses follows:

	As of and for the Three Months Ended March 31,

Table of Contents

Liquidity and Capital Resources

The Corporation expects to meet its liquidity needs through existing cash on hand, established cash flow sources, its third party senior line of credit and dividends received from the Banks. While the Banks are subject to certain regulatory limitations regarding their ability to pay dividends to the Corporation, we do not believe that the Corporation will be adversely affected by these dividend limitations. The Corporation's principal liquidity requirements at March 31, 2016 were the interest payments due on subordinated and junior subordinated notes. The Banks have paid no dividends through March 31, 2016 from the beginning of the year. During the year ended December 31, 2015, FBB declared and paid dividends totaling \$7.0 million. The capital ratios of the Corporation and its subsidiaries continue to meet all applicable regulatory capital adequacy requirements. The Corporation's and the Banks' respective Boards of Directors and management teams adhere to the appropriate regulatory guidelines on decisions which affect their capital positions, including but not limited to, decisions relating to the payment of dividends and increasing indebtedness.

The Banks maintain liquidity by obtaining funds from several sources. The Banks' primary sources of funds are principal and interest repayments on loans receivable and mortgage-related securities, deposits and other borrowings, such as federal funds and FHLB advances. The scheduled payments of loans and mortgage-related securities are generally a predictable source of funds. Deposit flows and loan prepayments, however, are greatly influenced by general interest rates, economic conditions and competition.

We view on-balance-sheet liquidity as a critical element to maintaining adequate liquidity to meet our cash and collateral obligations. We define our on-balance-sheet liquidity as the total of our short-term investments, our unencumbered securities' fair value and our unencumbered pledged loans. As of March 31, 2016 and December 31, 2015, our immediate on-balance-sheet liquidity was \$321.0 million and \$331.5 million, respectively. At March 31, 2016 and December 31, 2015, the Banks had \$76.1 million and \$84.9 million on deposit with the FRB, respectively. Any excess funds not used for loan funding or satisfying other cash obligations were maintained as part of our on-balance-sheet liquidity in our interest-bearing accounts with the FRB, as we value the safety and soundness provided by the FRB. We plan to utilize excess liquidity to fund loan and lease portfolio growth, pay down maturing debt, allow run-off of maturing brokered certificates of deposit, or invest in securities to maintain adequate liquidity at an improved margin.

We had \$476.0 million of outstanding wholesale deposits at March 31, 2016, compared to \$487.5 million of wholesale deposits as of December 31, 2015, which represented 30.1% and 30.9%, respectively, of the ending balance of total deposits. While we are committed to our continued efforts to raise in-market deposits and maintain our overall mix of wholesale deposits and in-market deposits, wholesale deposits continue to be an efficient source of funding for the Banks and allow them to gather funds across a larger geographic base at price levels and maturities that are more attractive than local time deposits when required to raise a similar level of in-market deposits within a short time period. Access to such deposits allows us the flexibility to refrain from pursuing single-service deposit relationships in markets that have experienced unfavorable pricing levels. In addition, the administrative costs associated with wholesale deposits are considerably lower than those that would be incurred to administer a similar level of local deposits with a similar maturity structure. During the time frames necessary to accumulate wholesale deposits in an orderly manner, we will use FHLB short-term advances to meet our temporary funding needs. The FHLB short-term advances will typically have terms of one week to one month to cover the overall expected funding demands. Our in-market relationships remain stable; however, deposit balances associated with those relationships will fluctuate. We expect to establish new client relationships and continue marketing efforts aimed at increasing the balances in existing clients' deposit accounts. Nonetheless, we will continue to use wholesale deposits in specific maturity periods, typically three to five years, needed to effectively mitigate the interest rate risk measured through our asset/liability management process or in shorter time periods if in-market deposit balances decline. In order to provide for ongoing liquidity and funding, all of our wholesale deposits are certificates of deposit which do not allow for withdrawal at the option of the depositor before the stated maturity with the exception of deposits accumulated through the internet listing service which have the same early withdrawal privileges and fees as do our other in-market deposits. The Banks limit the percentage of wholesale deposits to total deposits in accordance with liquidity policies approved by their respective Boards of Directors. The Corporation's targeted operating range of wholesale deposits to

total deposits is 30%-40%. The Banks were in compliance with their respective policy limits as of March 31, 2016 and December 31, 2015.

The Banks were able to access the wholesale deposit market as needed at rates and terms comparable to market standards during the three-month period ended March 31, 2016. In the event there is a disruption in the availability of wholesale deposits at maturity, the Banks have managed the maturity structure, in compliance with our approved liquidity policy, so at least one year of maturities could be funded through on-balance-sheet liquidity. These potential funding sources include deposits with the FRB and borrowings from the FHLB or Federal Reserve Discount Window utilizing currently unencumbered securities and acceptable loans as collateral. As of March 31, 2016, the available liquidity was in excess of the

Table of Contents

stated policy minimum. As on-balance-sheet liquidity is utilized to fund growth, asset quality remains stable and the ratio of in-market deposits to total deposits remains within an acceptable range, management may consider reducing the number of months of maturity coverage slightly while remaining confident in its ability to manage the maturities of wholesale deposits in the event of a disruption in the wholesale market. We believe the Banks will also have access to the unused federal funds lines, cash flows from borrower repayments and cash flows from security maturities. The Banks also have the ability to raise local market deposits by offering attractive rates to generate the level required to fulfill their liquidity needs.

The Banks are required by federal regulation to maintain sufficient liquidity to ensure safe and sound operations. We believe the Banks have sufficient liquidity to match the balance of net withdrawable deposits and short-term borrowings in light of present economic conditions and deposit flows.

During the three months ended March 31, 2016, operating activities resulted in a net cash inflow of \$9.8 million. Operating cash flows included net income of \$4.5 million. Net cash used in investing activities for the three months ended March 31, 2016 was approximately \$22.2 million which consisted of cash outflows to fund net loan growth and reinvestment of cash flows within purchases of additional securities available-for-sale offset by cash inflows from maturities, redemptions and paydowns of available-for-sale and held-to-maturity securities. Net cash provided by financing activities for the three months ended March 31, 2016 was \$3.7 million primarily from net increases in deposits and the use of our unsecured senior line of credit for general operations and other temporary cash flow mismatches, partially offset by cash dividends paid to shareholders and repayment of maturing FHLB advances. Please refer to the Consolidated Statements of Cash Flows for further details regarding significant sources of cash flow for the Corporation.

Contractual Obligations and Off-Balance-Sheet Arrangements

As of March 31, 2016, there were no significant changes to our contractual obligations and off-balance-sheet arrangements disclosed in our Annual Report on Form 10-K for the year ended December 31, 2015. We continue to believe that we have adequate capital and liquidity available from various sources to fund projected contractual obligations and commitments.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Interest rate risk, or market risk, arises from exposure of our financial position to changes in interest rates. It is our strategy to reduce the impact of interest rate risk on net interest margin and net interest income by maintaining a favorable match between the maturities and repricing dates of interest-earning assets and interest-bearing liabilities. This strategy is monitored by the Banks' respective Asset/Liability Management Committees, in accordance with policies approved by the Banks' respective Boards of Directors. These committees meet regularly to review the sensitivity of each Bank's assets and liabilities to changes in interest rates, liquidity needs and sources, and pricing and funding strategies.

We use two techniques to measure interest rate risk. The first is simulation of earnings. In this measurement technique the balance sheet is modeled as an ongoing entity whereby future growth, pricing, and funding assumptions are implemented. These assumptions are modeled under different rate scenarios that include a simultaneous, instant and sustained change in interest rates. The second measurement technique used is static gap analysis. Gap analysis involves measurement of the difference in asset and liability repricing on a cumulative basis within a specified time frame. In general, a positive gap indicates that more interest-earning assets than interest-bearing liabilities reprice/mature in a time frame and a negative gap indicates the opposite. In addition to the gap position, other determinants of net interest income are the shape of the yield curve, general rate levels and the corresponding effect of contractual interest rate floors, reinvestment spreads, balance sheet growth and mix and interest rate spreads. We manage the structure of interest-earning assets and interest-bearing liabilities by adjusting their mix, yield, maturity and/or repricing characteristics based on market conditions. Currently, we do not employ any derivatives to assist in managing our interest rate risk exposure; however, management has the authorization, as permitted within applicable approved policies, and ability to utilize such instruments should they be appropriate to manage interest rate exposure.

The process of asset and liability management requires management to make a number of assumptions as to when an asset or liability will reprice or mature. Management believes that its assumptions approximate actual experience and considers them reasonable, although the actual amortization and repayment of assets and liabilities may vary substantially. Our economic sensitivity to changes in interest rates at March 31, 2016 has not changed materially since December 31, 2015.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

The Corporation's management, with the participation of the Corporation's Chief Executive Officer and Chief Financial Officer, has evaluated the Corporation's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended). Based upon that evaluation, the Corporation's Chief Executive Officer and Chief Financial Officer have concluded that the Corporation's disclosure controls and procedures were effective as of March 31, 2016.

Changes in Internal Control over Financial Reporting

There was no change in the Corporation's internal controls over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended) that occurred during the quarter ended March 31, 2016 that has materially affected, or is reasonably likely to materially affect, the Corporation's internal control over financial reporting.

PART II. Other Information

Item 1. Legal Proceedings

From time to time, the Corporation and its subsidiaries are engaged in legal proceedings in the ordinary course of their respective businesses. Management believes that any liability arising from any such proceedings currently existing or threatened will not have a material adverse effect on the Corporation's financial position, results of operations, or cash flows.

Item 1A. Risk Factors

There were no material changes to the risk factors previously disclosed in Item 1A. to Part I of the Corporation's Form 10-K for the year ended December 31, 2015.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) None.

(b) Not applicable.

(c) Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
