QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2014, or
.. TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 1-3754

ALLY FINANCIAL INC.

(Exact name of registrant as specified in its charter)

Delaware

38-0572512

(State or other jurisdiction of
incorporation or organization)

(I.R.S. Employer
Identification No.)

200 Renaissance Center

P.O. Box 200, Detroit, Michigan

48265-2000

(Address of principal executive offices)

(Zip Code)

(866) 710-4623

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing for the past 90 days.

Yes No

Indicate by checkmark whether the registrant has submitted electronically and posted on its corporate Web site, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for a shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a nonaccelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

At April 30, 2014, the number of shares outstanding of the Registrant's common stock was 479,767,540 shares.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

1. Description of Business, Basis of Presentation, and Changes in Significant Accounting Policies

Ally Financial Inc. (formerly GMAC Inc. and referred to herein as Ally, we, our, or us) is a leading, independent, diversified, financial services firm. Founded in 1919, we are a leading automotive financial services company with over 90 years of experience, providing a broad array of financial products and services to automotive dealers and their customers. We operate as a financial holding company and a bank holding company. Our banking subsidiary, Ally Bank, is an indirect wholly owned subsidiary of Ally Financial Inc. and a leading franchise in the growing direct (internet, telephone, mobile, and mail) banking market.

Our accounting and reporting policies conform to accounting principles generally accepted in the United States of America (GAAP). Additionally, where applicable, the policies conform to the accounting and reporting guidelines prescribed by bank regulatory authorities. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and that affect income and expenses during the reporting period. In developing the estimates and assumptions, management uses all available evidence; however, actual results could differ.

The Condensed Consolidated Financial Statements at March 31, 2014, and for the three months ended March 31, 2014, and 2013, are unaudited but reflect all adjustments that are, in management's opinion, necessary for the fair presentation of the results for the interim periods presented. All such adjustments are of a normal recurring nature.

These unaudited Condensed Consolidated Financial Statements should be read in conjunction with the audited Consolidated Financial Statements (and the related notes) included in our Annual Report on Form 10-K for the year ended December 31, 2013, as filed on March 3, 2014, with the U.S. Securities and Exchange Commission (SEC).

Initial Public Offering of Common Stock, Stock Split, and Changes in Number of Shares Authorized

In April 2014, we completed an initial public offering (IPO) of 95 million shares of common stock at \$25 per share. Proceeds from the offering amounted to \$2.4 billion, which were obtained by the U.S. Department of the Treasury (Treasury) as the single selling stockholder. In connection with the IPO, we effected a 310-for-one stock split on shares of our common stock, \$0.01 par value per share. Accordingly, all references in the Condensed Consolidated Financial Statements to share and per share amounts relating to common stock have been adjusted, on a retroactive basis, to recognize the 310-for-one stock split. In addition, on April 9, 2014, we increased the number of shares authorized for issuance of common stock to 1.1 billion and decreased the number of shares authorized for issuance of Series A Preferred Stock to approximately 41 million. The changes in the number of shares authorized will be reflected in the Condensed Consolidated Financial Statements in future reporting periods.

Significant Accounting Policies

Income Taxes

In calculating the provision for interim income taxes, in accordance with Accounting Standards Codification (ASC) 740, Income Taxes, we apply an estimated annual effective tax rate to year-to-date ordinary income. At the end of each interim period, we estimate the effective tax rate expected to be applicable for the full fiscal year. This method differs from that described in Note 1 to the Consolidated Financial Statements in our 2013 Annual Report on Form 10-K, which describes our annual significant income tax accounting policy and related methodology.

Recently Adopted Accounting Standards

Liabilities — Obligations Resulting from Joint and Several Liability Arrangements for Which the Total Amount of the Obligation Is Fixed at the Reporting Date (ASU 2013-04)

As of January 1, 2014, we adopted ASU 2013-04. The guidance within the ASU requires an entity to measure obligations resulting from joint and several liability arrangements for which the total amount of the obligation within the scope of this guidance is fixed at the reporting date, as the sum of the following: (a) The amount the reporting entity agreed to pay on the basis of its arrangement among its co-obligors and (b) any additional amount the reporting entity expects to pay on behalf of its co-obligors. The amendments were effective retrospectively for all arrangements within its scope. It further requires an entity to disclose the nature and amount of the obligation as well as other

information about those obligations. The adoption of this guidance did not have a material effect on our consolidated financial condition or results of operations.

Foreign Currency Matters — Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity (ASU 2013-05)

As of January 1, 2014, we adopted ASU 2013-05. The guidance within the ASU closes diversity in practice in this area and requires a reporting entity that ceases to have a controlling financial interest, in a subsidiary or group of assets or a business, within a foreign entity to release any related Cumulative Translation Adjustment (CTA) into net income. The CTA should be released into net income only if the sale or transfer results in the complete or substantially complete liquidation of the foreign entity. For an equity method investment that is a foreign entity, a pro rata portion of the CTA should be released into net income upon a partial sale of such an investment. This ASU further clarifies that the sale of an investment in a foreign entity includes both events that result in the loss of a controlling financial interest in a foreign entity, irrespective of any retained investment, and events that result in step acquisition under which an acquirer obtains control of an acquiree in which it held an equity interest immediately before the acquisition date. Under these circumstances, the CTA should be released into net income upon their occurrence. The amendments are to be applied prospectively for all transactions within its scope. Since the guidance is

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

prospective and we have previously sold or exited substantially all of our international businesses and released the related CTA upon those dispositions, the implementation will not have a material effect on our consolidated financial condition or results of operations.

Income Taxes — Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists (ASU 2013-11)

As of January 1, 2014, we adopted ASU 2013-11. The guidance within the ASU closes diversity in practice and requires an unrecognized tax benefit, or a portion of an unrecognized tax benefit, to be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. The guidance further includes an exception that if a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available to settle any additional income taxes that would result from the disallowance of a tax position at the reporting date or the tax law of the applicable jurisdiction does not require the entity to use them and the entity does not intend to use them, the unrecognized tax benefit for such purpose should be presented in the financial statements as a liability and should not be combined with deferred tax assets. The assessment of whether a deferred tax asset is available is based on the unrecognized tax benefit and deferred tax asset that exist at the reporting date and should be made presuming disallowance of the tax position at the reporting date. The amendments are to be applied prospectively to all unrecognized tax benefits that exist at the effective date. The adoption of this guidance did not have a material effect to our consolidated financial condition or results of operations.

Investments — Accounting for Investments in Qualified Affordable Housing Projects (ASU 2014-01)

As of January 1, 2014, we adopted ASU 2014-01. The amendments in this ASU allow an entity to make an accounting policy election to account for investments in qualified affordable housing projects using a proportional amortization method, if certain conditions are met. Under the election, the entity would amortize the initial cost of the investment in proportion to the tax credits and other benefits received while recognizing the net investment performance in the statement of comprehensive income as a component of income tax expense. The amendments are to be applied retrospectively to all periods presented. We have elected to utilize the proportional amortization method for qualifying affordable housing investments and therefore will be presenting the amortization and tax impacts of such investments as a component income tax expense under the proportional amortization method. The adoption of this guidance did not have a material effect to our consolidated financial condition or results of operations.

Recently Issued Accounting Standards

Receivables — Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure (ASU 2014-04)

In January 2014, the FASB issued ASU 2014-04. The amendments in this ASU clarify the timing for which an entity should reclassify a loan that has been foreclosed or where an in substance repossession has occurred to real estate owned. The guidance requires such reclassification to occur when the entity obtains legal title upon completion of foreclosure or the borrower conveys all interest in the residential real estate property to the entity to satisfy the loan through completion of a deed in lieu of foreclosure or similar legal agreement. In addition, the ASU clarifies that redemption rights of the borrower should be ignored for purposes of determining whether legal title has transferred. The amendments are effective for us beginning on January 1, 2015. The amendments can be applied using either a modified retrospective or prospective basis. Under the modified retrospective approach, the entity should record a cumulative-effect adjustment to residential consumer mortgage loans and residential real estate owned as of the beginning of the annual period for which the amendments are effective. Early adoption is permitted. Management is assessing the impact of the adoption of this guidance.

2. Discontinued and Held-for-sale Operations

Discontinued Operations

We classify operations as discontinued when operations and cash flows will be eliminated from our ongoing operations and we do not expect to retain any significant continuing involvement in their operations after the respective sale transactions. For all periods presented, the operating results for these discontinued operations have

been removed from continuing operations and presented separately as discontinued operations, net of tax, in the Condensed Consolidated Statement of Comprehensive Income. The Notes to the Condensed Consolidated Financial Statements have been adjusted to exclude discontinued operations unless otherwise noted.

Select Mortgage Operations

During the first quarter of 2013, the operations of ResCap were classified as discontinued.

Select Insurance Operations

During the second quarter of 2013, we sold our Mexican insurance business, ABA Seguros. During the first quarter of 2013, we completed the sale of our U.K.-based operations.

Select Automotive Finance Operations

During the fourth quarter of 2012, we committed to sell our automotive finance operations in Europe and Latin America to General Motors Financial Company, Inc. (GM Financial). On the same date, we entered into an agreement with GM Financial to acquire our 40% interest in a motor vehicle finance joint venture in China. During the second quarter of 2013, we completed the sale of our operations in Europe and the majority of Latin America. The transaction included European operations in Germany, the United Kingdom, Italy, Sweden, Switzerland, Austria, Belgium, France and the Netherlands, and Latin American operations in Mexico, Chile, and Colombia. On October 1,

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

2013, we completed the sale of the remaining Latin American operations in Brazil. We expect to complete the sale of the joint venture in China during 2014. If required regulatory approvals related to this sale are not received by July 1, 2014, subject to certain limited exceptions, and if this date is not extended, either party would have the right to terminate the sale.

During the first quarter of 2013, we sold our Canadian automotive finance operations, Ally Credit Canada Limited and ResMor Trust.

Select Corporate and Other Operations

During the fourth quarter of 2012, we ceased operations at our Commercial Finance Group's European division and classified it as discontinued.

Select Financial Information

Select financial information of discontinued operations is summarized below. The pretax income or loss, including direct costs to transact a sale, includes any impairment recognized to present the operations at the lower-of-cost or fair value. Fair value was based on the estimated sales price, which could differ from the ultimate sales price due to price volatility, changing interest rates, changing foreign-currency rates, and future economic conditions.

The following table presents interest and dividends on available-for-sale securities.

(\$ in millions)	Three months ended March 31,	
	2014	2013
Taxable interest	\$86	\$63
Taxable dividends	5	5
Interest and dividends exempt from U.S. federal income tax	4	—
Interest and dividends on available-for-sale securities	\$95	\$68

Certain available-for-sale securities were sold at a loss in 2014 and 2013 as a result of market conditions within these respective periods (e.g., change in market interest rates or a downgrade in the rating of a debt security). The table below summarizes available-for-sale securities in an unrealized loss position in accumulated other comprehensive income. Based on the methodology described below that was applied to these securities, we believe that the unrealized losses relate to factors other than credit losses in the current market environment. As of March 31, 2014, we did not have the intent to sell the debt securities with an unrealized loss position in accumulated other comprehensive income, and it is not more likely than not that we will be required to sell these securities before recovery of their amortized cost basis. As of March 31, 2014, we had the ability and intent to hold equity securities with an unrealized loss position in accumulated other comprehensive income, and it is not more likely than not that we will be required to sell these securities before recovery of their amortized cost basis. As a result, we believe that the securities with an unrealized loss position in accumulated other comprehensive income are not considered to be other-than-temporarily impaired at March 31, 2014. Refer to Note 1 to the Consolidated Financial Statements in our 2013 Annual Report on Form 10-K for additional information related to investment securities and our methodology for evaluating potential other-than-temporary impairments.

Total commercial	\$32,736	\$1,975	\$34,711	\$33,352	\$2,115	\$35,467

Includes loans classified as special mention, substandard, or doubtful. These classifications are based on regulatory (a) definitions and generally represent loans within our portfolio that have a higher default risk or have already defaulted.

Impaired Loans and Troubled Debt Restructurings**Impaired Loans**

Loans are considered impaired when we determine it is probable that we will be unable to collect all amounts due according to the terms of the loan agreement. For more information on our impaired finance receivables and loans, refer to Note 1 to the Consolidated Financial Statements in our 2013 Annual Report on Form 10-K.

Troubled Debt Restructurings

Troubled Debt Restructurings (TDRs) are loan modifications where concessions were granted to borrowers experiencing financial difficulties. Numerous initiatives are in place to provide support to our mortgage customers in financial distress, including principal forgiveness, maturity extensions, delinquent interest capitalization, and changes to contractual interest rates. Additionally for automobile loans, we may offer several types of assistance to aid our customers, including extension of the loan maturity date and rewriting the loan terms. Total TDRs recorded at historical cost and reported at carrying value before allowance for loan losses were \$1.3 billion at both March 31,

2014, and December 31, 2013. Refer to Note 1 to the Consolidated Financial Statements in our 2013 Annual Report on Form 10-K for additional information.

Remarketing gains	(109)	(64)
Depreciation expense on operating lease assets	\$542	\$435

8. Securitizations and Variable Interest Entities

Overview

We are involved in several types of securitization and financing transactions that utilize special-purpose entities (SPEs). An SPE is an entity that is designed to fulfill a specified limited need of the sponsor. Our principal use of SPEs is to obtain liquidity by securitizing certain of our financial assets and operating lease assets.

The SPEs involved in our securitization and other financing transactions are generally considered variable interest entities (VIEs). VIEs are entities that have either a total equity investment at risk that is insufficient to permit the entity to finance its activities without additional subordinated financial support or whose equity investors lack the ability to control the entity's activities.

Due to the deconsolidation of ResCap, our mortgage securitization activity and involvement with certain mortgage-related VIEs has substantially decreased. We no longer securitize consumer mortgage loans through transactions involving the Federal National Mortgage Association (Fannie Mae), the Federal Home Loan Mortgage Corporation (Freddie Mac), and the Government National Mortgage Association (Ginnie Mae) (collectively, the Government-sponsored Enterprises, or GSEs), or through private-label mortgage securitizations. Accordingly, the discussion below represents our current involvement with variable interest entities as of March 31, 2014, except where otherwise stated or where comparative information is presented.

Securitizations

We provide a wide range of consumer and commercial automobile loans, operating leases, and commercial loans to a diverse customer base. We often securitize these loans (also referred to as financial assets) and leases through the use of securitization entities, which may or may not be consolidated on our Condensed Consolidated Balance Sheet. We securitize consumer and commercial automobile loans, operating leases, and other commercial loans through private-label securitizations.

In executing a securitization transaction, we typically sell pools of financial assets to a wholly owned, bankruptcy-remote SPE, which then transfers the financial assets to a separate, transaction-specific securitization entity for cash, servicing rights, and in some transactions, other retained interests. The securitization entity is funded through the issuance of beneficial interests in the securitized financial assets. The beneficial interests take the form of either notes or trust certificates, which are sold to investors and/or retained by us. These beneficial interests are collateralized by the transferred leases and loans and entitle the investors to specified cash flows generated from the underlying securitized assets. In addition to providing a source of liquidity and cost-efficient funding, securitizing these leases and financial assets also reduces our credit exposure to the borrowers beyond any economic interest we may retain.

Each securitization is governed by various legal documents that limit and specify the activities of the securitization entity. The securitization entity is generally allowed to acquire the loans, to issue beneficial interests to investors to fund the acquisition of the loans, and to enter into derivatives or other yield maintenance contracts to hedge or mitigate certain risks related to the financial assets or beneficial interests of the entity. A servicer, who is generally us, is appointed pursuant to the underlying legal documents to service the assets the securitization entity holds and the beneficial interests it issues. Servicing functions include, but are not limited to, general collection activity on current and noncurrent accounts, loss mitigation efforts including repossession and sale of collateral, as well as advancing

principal and interest payments before collecting them from individual borrowers. Our servicing responsibilities, which constitute continued involvement in the transferred financial assets, consist of primary servicing (i.e., servicing the underlying transferred financial assets) and master servicing (i.e., servicing the beneficial interests that result from the securitization transactions).

Cash flows from the assets initially transferred into the securitization entity represent the sole source for payment of distributions on the beneficial interests issued by the securitization entity and for payments to the parties that perform services for the securitization entity, such as the servicer or the trustee. In certain securitization transactions, a liquidity facility may exist to provide temporary liquidity to the entity. The liquidity provider generally is reimbursed prior to other parties in subsequent distribution periods.

We typically hold retained beneficial interests in our securitizations, which may represent a form of significant continuing economic interest. These retained interests include, but are not limited to, senior or subordinate asset-backed securities and residuals; and other residual interests. Certain of these retained interests provide credit enhancement to the trust as they may absorb credit losses or other cash shortfalls. Additionally, the securitization agreements may require cash flows to be directed away from certain of our retained interests due to specific over-collateralization requirements, which may or may not be performance-driven.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

We generally hold certain conditional repurchase options specific to securitizations that allow us to repurchase assets from the securitization entity. The majority of the securitizations provide us, as servicer, with a call option that allows us to repurchase the remaining transferred financial assets or outstanding beneficial interests at our discretion once the asset pool reaches a predefined level, which represents the point where servicing becomes burdensome (a clean-up call option). The repurchase price is typically the par amount of the loans plus accrued interest. Additionally, we may hold other conditional repurchase options that allow us to repurchase a transferred financial asset if certain events outside our control occur. The typical conditional repurchase option is a delinquent loan repurchase option that gives us the option to purchase the loan or contract if it exceeds a certain prespecified delinquency level. We generally have discretion regarding when or if we will exercise these options, but we would do so only when it is in our best interest. Other than our customary representation and warranty provisions, these securitizations are nonrecourse to us, thereby transferring the risk of future credit losses to the extent the beneficial interests in the securitization entities are held by third parties. Representation and warranty provisions generally require us to repurchase loans or indemnify the investor or other party for incurred losses to the extent it is determined that the loans were ineligible or were otherwise defective at the time of sale. Refer to Note 25 for detail on representation and warranty provisions. We did not provide any noncontractual financial support to any of these entities during the three months ended March 31, 2014 or 2013.

Consolidation of Variable Interest Entities

The determination of whether the assets and liabilities of the VIEs are consolidated on our balance sheet (also referred to as on-balance sheet) or not consolidated on our balance sheet (also referred to as off-balance sheet) depends on the terms of the related transaction and our continuing involvement (if any) with the VIE. We are deemed the primary beneficiary and therefore consolidate VIEs for which we have both (a) the power, through voting rights or similar rights, to direct the activities that most significantly impact the VIE's economic performance, and (b) a variable interest (or variable interests) that (i) obligates us to absorb losses that could potentially be significant to the VIE and/or (ii) provides us the right to receive residual returns of the VIE that could potentially be significant to the VIE. We determine whether we hold a significant variable interest in a VIE based on a consideration of both qualitative and quantitative factors regarding the nature, size, and form of our involvement with the VIE. We assess whether we are the primary beneficiary of a VIE on an ongoing basis.

We are generally determined to be the primary beneficiary in VIEs established for our securitization activities when we have a controlling financial interest in the VIE, primarily due to our servicing activities, and we hold a significant beneficial interest in the VIE. The consolidated VIEs included in the Condensed Consolidated Balance Sheet represent separate entities with which we are involved. The third-party investors in the obligations of consolidated VIEs have legal recourse only to the assets of the VIEs and do not have such recourse to us, except for the customary representation and warranty provisions or when we are the counterparty to certain derivative transactions involving the VIE. In addition, the cash flows from the assets are restricted only to pay such liabilities. Thus, our economic exposure to loss from outstanding third-party financing related to consolidated VIEs is significantly less than the carrying value of the consolidated VIE assets. All assets of consolidated VIEs, presented below based upon the legal transfer of the underlying assets in order to reflect legal ownership, are restricted for the benefit of the beneficial interest holders. Refer to Note 21 for discussion of the assets and liabilities for which the fair value option has been elected.

The nature, purpose, and activities of nonconsolidated securitization entities are similar to those of our consolidated securitization entities with the primary difference being the nature and extent of our continuing involvement. We are generally not determined to be the primary beneficiary in VIEs established for our securitization activities when we either do not hold potentially significant variable interests or do not provide servicing or asset management functions for the financial assets held by the securitization entity. Additionally, to qualify for off-balance sheet treatment, transfers of financial assets must meet appropriate sale accounting conditions. For nonconsolidated securitization entities, the transferred financial assets are removed from our balance sheet provided the conditions for sale accounting are met. The financial assets obtained from the securitization are primarily reported as cash, servicing

rights, or retained interests (if applicable). Typically, we conclude that the fee we are paid for servicing consumer automobile finance receivables represents adequate compensation, and consequently, we do not recognize a servicing asset or liability. Liabilities incurred as part of these securitization transactions, such as representation and warranty provisions, are recorded at fair value at the time of sale and are reported as accrued expenses and other liabilities on our Condensed Consolidated Balance Sheet. Upon the sale of the loans, we recognize a gain or loss on sale for the difference between the assets recognized, the assets derecognized, and the liabilities recognized as part of the transaction.

We have involvement with various other on-balance sheet, immaterial VIEs. Most of these VIEs are used for additional liquidity whereby we sell certain financial assets into the VIE and issue beneficial interests to third parties for cash. We also provide long-term guarantee contracts to investors in certain nonconsolidated affordable housing entities and have extended a line of credit to provide liquidity and minimize our exposure under these contracts. Since we do not have control over the entities or the power to make decisions, we do not consolidate the entities and our involvement is limited to the guarantee and the line of credit.

We have involvement with various other nonconsolidated affordable housing entities and venture capital funds. We do not consolidate these entities and our involvement is limited to the capital contributed and committed to these funds.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

Our involvement with consolidated and nonconsolidated VIEs in which we hold variable interests is presented below.

(\$ in millions)	Consolidated involvement with VIEs (a)	Assets of nonconsolidated VIEs (a)	Maximum exposure to loss in nonconsolidated VIEs	
March 31, 2014				
On-balance sheet variable interest entities				
Consumer automobile	\$21,424			
Commercial automobile	18,563			
Commercial other	563			
Off-balance sheet variable interest entities				
Consumer automobile	—	\$776	\$776	(b)
Commercial other	112	(c) —	(d) 302	
Total	\$40,662	\$776	\$1,078	
December 31, 2013				
On-balance sheet variable interest entities				
Consumer automobile	\$19,072			
Commercial automobile	20,511			
Commercial other	564			
Off-balance sheet variable interest entities				
Consumer automobile	—	\$899	\$899	(b)
Commercial other	(24)	(c) —	(d) 40	
Total	\$40,123	\$899	\$939	

(a) Asset values represent the current unpaid principal balance of outstanding consumer finance receivables and loans within the VIEs.

(b) Maximum exposure to loss represents the current unpaid principal balance of outstanding loans based on our customary representation and warranty provisions. This measure is based on the unlikely event that all of the loans have underwriting defects or other defects that trigger a representation and warranty provision and the collateral supporting the loans is worthless. This required disclosure is not an indication of our expected loss.

(c) Amounts classified as accrued expenses and other liabilities.

(d) Includes a VIE for which we have no management oversight and therefore we are not able to provide the total assets of the VIE.

Cash Flows with Off-balance Sheet Variable Interest Entities

The following table summarizes cash flows received and paid related to securitization entities, asset-backed financings, or other similar transfers of financial assets where the transfer is accounted for as a sale and we have a continuing involvement with the transferred assets (e.g., servicing) that were outstanding during the three months ended March 31, 2014 and 2013. Additionally, this table contains information regarding cash flows received from and paid to nonconsolidated securitization entities that existed during each period.

Three months ended March 31, (\$ in millions)	Consumer automobile	Consumer mortgage GSEs
2014		
Servicing fees	\$2	\$—
Representations and warranties obligations	—	1
2013		
Cash proceeds from transfers completed during the period	\$—	\$7,580
Servicing fees	4	119

9. Servicing Activities

Mortgage Servicing Rights

The following table summarizes past activity related to mortgage servicing rights (MSRs), which were carried at fair value. Management estimated fair value using our transaction data and other market data or, in periods when there were limited MSR market transactions that were directly observable, internally developed discounted cash flow models (an income approach) were used to estimate the fair value. These internal valuation models estimated net cash flows based on internal operating assumptions that we believed would be used by market participants in orderly transactions combined with market-based assumptions for loan prepayment rates, interest rates, and discount rates that we believed approximate yields required by investors in this asset.

Three months ended March 31, (\$ in millions)	2014	2013
Estimated fair value at January 1,	\$—	\$952
Additions	—	54
Changes in fair value		
Due to changes in valuation inputs or assumptions used in the valuation model	—	(28)
Other changes in fair value	—	(61)
Estimated fair value at March 31,	\$—	\$917

Changes in fair value due to changes in valuation inputs or assumptions used in the valuation model included all changes due to a revaluation by a model or by a benchmarking exercise. Other changes in fair value primarily included the accretion of the present value of the discount related to forecasted cash flows and the economic runoff of the portfolio.

Risk Mitigation Activities

The primary risk of servicing rights is interest rate risk and the resulting impact on prepayments. A significant decline in interest rates could lead to higher-than-expected prepayments that could reduce the value of the MSRs. We previously economically hedged the impact of these risks with both derivative and nonderivative financial instruments. Refer to Note 19 for additional information regarding the derivative financial instruments used to economically hedge MSRs.

The components of servicing valuation and hedge activities, net, were as follows.

(\$ in millions)	Three months ended March 31,	
	2014	2013
Change in estimated fair value of mortgage servicing rights	\$—	\$(89)
Change in fair value of derivative financial instruments	—	(112)
Servicing asset valuation and hedge activities, net	\$—	\$(201)

Mortgage Servicing Fees

The components of mortgage servicing fees were as follows.

(\$ in millions)	Three months ended March 31,	
	2014	2013
Contractual servicing fees, net of guarantee fees and including subservicing	\$—	\$58
Late fees	—	1
Ancillary fees	—	4
Total mortgage servicing fees	\$—	\$63

Automobile Finance Servicing Activities

We service consumer automobile contracts. Historically, we have sold a portion of our consumer automobile contracts. With respect to contracts we sell, we retain the right to service and earn a servicing fee for our servicing function. Typically, we conclude that the fee we are paid for servicing consumer automobile finance receivables

represents adequate compensation, and consequently, we do not recognize a servicing asset or liability. We recognized automobile servicing fees of \$9 million and \$19 million during the three months ended March 31, 2014 and 2013, respectively.

Ally Financial Inc. • Form 10-Q

Automobile Finance Serviced Assets

The total serviced automobile finance loans outstanding were as follows.

(\$ in millions)	March 31, 2014	December 31, 2013
On-balance sheet automobile finance loans and leases		
Consumer automobile	\$56,775	\$56,417
Commercial automobile	32,984	33,803
Operating leases	18,187	17,680
Other	48	54
Off-balance sheet automobile finance loans		
Loans sold to third-party investors		
Securitized	765	887
Whole-loan	2,109	2,748
Total serviced automobile finance loans and leases	\$110,868	\$111,589

10. Other Assets

The components of other assets were as follows.

(\$ in millions)	March 31, 2014	December 31, 2013
Property and equipment at cost	\$723	\$709
Accumulated depreciation	(492)	(474)
Net property and equipment	231	235
Restricted cash collections for securitization trusts (a)	2,129	3,664
Deferred tax assets	1,918	2,040
Cash reserve deposits held-for-securitization trusts (b)	388	402
Other accounts receivable	350	290
Unamortized debt issuance costs	275	312
Fair value of derivative contracts in receivable position (c)	252	362
Nonmarketable equity securities	236	337
Collateral placed with counterparties	220	328
Off-lease vehicles held for sale	203	158
Restricted cash and cash equivalents	175	205
Other assets	1,013	1,256
Total other assets	\$7,390	\$9,589

(a) Represents cash collections from customer payments on securitized receivables. These funds are distributed to investors as payments on the related secured debt.

(b) Represents credit enhancement in the form of cash reserves for various securitization transactions.

(c) For additional information on derivative instruments and hedging activities, refer to Note 19.

11. Deposit Liabilities

Deposit liabilities consisted of the following.

(\$ in millions)	March 31, 2014	December 31, 2013
Noninterest-bearing deposits	\$71	\$60
Interest-bearing deposits		
Savings and money market checking accounts	23,535	21,210
Certificates of deposit	31,340	31,640
Dealer deposits	421	440
Total deposit liabilities	\$55,367	\$53,350

At March 31, 2014, and December 31, 2013, certificates of deposit included \$13.2 billion and \$13.1 billion, respectively, of certificates of deposit in denominations of \$100 thousand or more.

12. Short-term Borrowings

The following table presents the composition of our short-term borrowings portfolio.

(\$ in millions)	March 31, 2014			December 31, 2013		
	Unsecured	Secured (a)	Total	Unsecured	Secured (a)	Total
Demand notes	\$3,404	\$—	\$3,404	\$3,225	\$—	\$3,225
Federal Home Loan Bank	—	750	750	—	3,570	3,570
Securities sold under agreements to repurchase (b)	—	759	759	—	1,500	1,500
Other (c)	—	250	250	—	250	250
Total short-term borrowings	\$3,404	\$1,759	\$5,163	\$3,225	\$5,320	\$8,545

(a) Refer to Note 13 for further details on assets restricted as collateral for payment of the related debt.

We periodically enter into term repurchase agreements, short-term borrowing arrangements in which we sell financial instruments to one or more investors while simultaneously committing to repurchase them at a specified future date, at the stated price plus accrued interest. The financial instruments sold under agreement to repurchase typically consist of U.S. government and agency securities.

(c) Other relates to secured borrowings at our Commercial Finance Group at March 31, 2014 and December 31, 2013.

13. Long-term Debt

The following table presents the composition of our long-term debt portfolio.

(\$ in millions)	March 31, 2014			December 31, 2013		
	Unsecured	Secured	Total	Unsecured	Secured	Total
Long-term debt						
Due within one year	\$4,365	\$11,632	\$15,997	\$5,321	\$11,851	\$17,172
Due after one year (a)	19,108	32,731	51,839	21,425	30,423	51,848
Fair value adjustment	459	—	459	445	—	445
Total long-term debt	\$23,932	\$44,363	\$68,295	\$27,191	\$42,274	\$69,465

(a) Includes \$2.6 billion and \$2.6 billion of trust preferred securities at both March 31, 2014 and December 31, 2013, respectively.

The following table presents the scheduled remaining maturity of long-term debt, assuming no early redemptions will occur. The actual payment of secured debt may vary based on the payment activity of the related pledged assets.

Year ended December 31, (\$ in millions)	2014	2015	2016	2017	2018	2019 and thereafter	Fair value adjustment	Total
Unsecured

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

The following summarizes assets restricted as collateral for the payment of the related debt obligation primarily arising from securitization transactions accounted for as secured borrowings and repurchase agreements.

(\$ in millions)	March 31, 2014		December 31, 2013	
	Total	Ally Bank (a)	Total	Ally Bank (a)
Investment securities	\$771	\$771	\$2,864	\$2,864
Mortgage finance receivables and loans	8,247	8,247	8,524	8,524
Consumer automobile finance receivables	32,847	11,193	32,947	12,332
Commercial automobile finance receivables	21,204	20,418	21,249	21,249
Investment in operating leases, net	8,040	4,249	5,810	3,190
Other assets	563	—	563	—
Total assets restricted as collateral (b)	\$71,672	\$44,878	\$71,957	\$48,159
Secured debt (c)	\$46,122	\$24,351	\$47,594	\$27,818

(a) Ally Bank is a component of the total column.

Ally Bank has an advance agreement with the Federal Home Loan Bank of Pittsburgh (FHLB) and had assets pledged to secure borrowings that were restricted as collateral to the FHLB totaling \$11.1 billion and \$12.7 billion at March 31, 2014, and December 31, 2013, respectively. These assets were composed primarily of consumer and commercial mortgage finance receivables and loans, net. Ally Bank has access to the Federal Reserve Bank

(b) Discount Window. Ally Bank had assets pledged and restricted as collateral to the Federal Reserve Bank totaling \$3.0 billion and \$3.2 billion at March 31, 2014, and December 31, 2013, respectively. These assets were composed of consumer automobile finance receivables and loans, net and investment in operating leases, net. Availability under these programs is only for the operations of Ally Bank and cannot be used to fund the operations or liabilities of Ally or its subsidiaries.

(c) Includes \$1.8 billion and \$5.3 billion of short-term borrowings at March 31, 2014, and December 31, 2013, respectively.

Funding Facilities

We utilize both committed and other credit facilities. The amounts outstanding under our various funding facilities are included on our Condensed Consolidated Balance Sheet.

As of March 31, 2014, Ally Bank had exclusive access to \$3.5 billion of funding capacity from committed credit facilities. Funding programs supported by the Federal Reserve and the FHLB, together with repurchase agreements, complement Ally Bank's private committed facilities.

The total capacity in our committed funding facilities is provided by banks and other financial institutions through private transactions. The committed secured funding facilities can be revolving in nature and allow for additional funding during the commitment period, or they can be amortizing and not allow for any further funding after the closing date. At March 31, 2014, \$22.4 billion of our \$24.5 billion of committed capacity was revolving. Our revolving facilities generally have an original tenor ranging from 364 days to two years. As of March 31, 2014, we had \$15.5 billion of committed funding capacity from revolving facilities with a remaining tenor greater than 364 days.

Committed Funding Facilities

(\$ in millions)	Outstanding		Unused Capacity (a)		Total Capacity	
	March 31, 2014	December 31, 2013	March 31, 2014	December 31, 2013	March 31, 2014	December 31, 2013
Bank funding						
Secured	\$2,500	\$2,750	\$1,000	\$250	\$3,500	\$3,000
Parent funding						
Secured (b)	16,392	15,159	4,641	6,497	21,033	21,656
Total committed facilities	\$18,892	\$17,909	\$5,641	\$6,747	\$24,533	\$24,656

- (a) Funding from committed secured facilities is available on request in the event excess collateral resides in certain facilities or is available to the extent incremental collateral is available and contributed to the facilities.
- (b) Includes the secured facilities of our Commercial Finance Group.

17. Earnings per Common Share

The following table presents the calculation of basic and diluted earnings per common share.

	Three months ended March 31,	
(\$ in millions, except per share data)	2014	2013
Net income from continuing operations	\$ 198	\$ 60
Preferred stock dividends — U.S. Department of the Treasury	—	(133)
Preferred stock dividends	(68)	(67)
Net income (loss) from continuing operations attributable to common shareholders	130	(140)
Income from discontinued operations, net of tax	29	1,033
Net income attributable to common shareholders	\$ 159	\$ 893
Basic weighted-average common shares outstanding	479,767,540	412,600,700
Diluted weighted-average common shares outstanding (a)	479,767,540	412,600,700
Basic earnings per common share		
Net income (loss) from continuing operations	\$0.27	\$(0.34)
Income from discontinued operations, net of tax	0.06	2.50
Net income	\$0.33	\$2.16
Diluted earnings per common share (a)		
Net income (loss) from continuing operations	\$0.27	\$(0.34)
Income from discontinued operations, net of tax	0.06	2.50
Net income	\$0.33	\$2.16

Due to the antidilutive effect of converting the Fixed Rate Cumulative Mandatorily Convertible Preferred Stock into common shares for the three months ended March 31, 2013 and the net loss from continuing operations (a) attributable to common shareholders for the three months ended March 31, 2013, net income (loss) from continuing operations attributable to common shareholders and basic weighted-average common shares outstanding were used to calculate basic and diluted earnings per share.

The effects of converting the outstanding Fixed Rate Cumulative Mandatorily Convertible Preferred Stock into common shares are not included in the diluted earnings per share calculation for the three months ended March 31, 2013 as the effects would be antidilutive for that period. As such, 178 million of the potential common shares were excluded from the diluted earnings per share calculation for the three months ended March 31, 2013.

18. Regulatory Capital and Other Regulatory Matters

As a bank holding company, we and our wholly owned state-chartered banking subsidiary, Ally Bank, are subject to risk-based and leverage capital requirements issued by U.S. banking regulators that require us to maintain regulatory capital ratios above minimum levels. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary action by regulators that, if undertaken, could have a direct material effect on the consolidated financial statements or the results of operations and financial condition of Ally and Ally Bank. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, we must meet specific capital guidelines that involve quantitative measures of our assets and certain off-balance sheet items. Our capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk-weightings, and other factors.

A risk-based capital ratio is the ratio of a banking organization's regulatory capital (numerator) to its risk-weighted assets (denominator). Under the existing Basel I capital rules, regulatory capital is divided into two tiers: Tier 1 capital and Tier 2 capital. Tier 1 capital generally consists of common equity, minority interests, qualifying noncumulative preferred stock, and the fixed rate cumulative preferred stock sold to Treasury under the Troubled Asset Relief Program (TARP), less goodwill and other adjustments. Tier 2 capital generally consists of perpetual preferred stock not qualifying as Tier 1 capital, limited amounts of subordinated debt and the allowance for loan losses, and other

adjustments. The amount of Tier 2 capital may not exceed the amount of Tier 1 capital. Total regulatory capital is the sum of Tier 1 and Tier 2 capital. Under the existing Basel I capital rules, risk-weighted assets are determined by allocating assets and specified off-balance sheet financial instruments into several broad risk-weight categories with higher risk weights (expressed in percentage) assigned to asset classes that present greater perceived risk. Under the existing Basel I capital rules, banking organizations are required to maintain a minimum Total risk-based capital ratio (Total capital to risk-weighted assets) of 8% and a Tier 1 risk-based capital ratio (Tier 1 capital to risk-weighted assets) of 4%.

The U.S. banking regulators also have established minimum leverage capital ratio requirements. The Tier 1 leverage ratio is defined as Tier 1 capital divided by adjusted quarterly average total assets (which reflect adjustments for disallowed goodwill and certain intangible assets). Under the existing Basel I capital rules, the minimum U.S. Tier 1 leverage ratio is 3% or 4% depending on factors specified in the regulations.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

Under the U.S. banking regulators' existing regulations, a banking organization meets the regulatory definition of "well-capitalized" when its Total risk-based capital ratio equals or exceeds 10% and its Tier 1 risk-based capital ratio equals or exceeds 6%; and for insured depository institutions, when its leverage ratio equals or exceeds 5%, unless subject to a regulatory directive to maintain higher capital levels. To maintain its status as a financial holding company, Ally and its bank subsidiary, Ally Bank, must remain "well-capitalized" and "well-managed," as defined under applicable law.

In the context of capital planning and stress testing, the U.S. banking regulators have also developed a measure of capital called "Tier 1 common," which is defined as Tier 1 capital less noncommon elements, including qualifying perpetual preferred stock, minority interest in subsidiaries, trust preferred securities, and mandatory convertible preferred securities. Tier 1 common is used by banking regulators, investors and analysts to assess and compare the quality and composition of Ally's capital with the capital of other financial services companies. Also, bank holding companies with total consolidated assets of \$50 billion or more, such as Ally, must develop and maintain a capital plan annually, and among other elements, the capital plan must include a discussion of how we will maintain a pro forma Tier 1 common risk-based capital ratio (Tier 1 common to risk-weighted assets) above 5% under expected conditions and certain stressed scenarios.

During 2010, Ally, IB Finance Holding Company, LLC, Ally Bank, and the FDIC entered into a Capital and Liquidity Maintenance Agreement (CLMA). The effective date of the CLMA was August 24, 2010. The CLMA requires capital at Ally Bank to be maintained at a level such that Ally Bank's leverage ratio is at least 15%. For this purpose, the leverage ratio is determined in accordance with the FDIC's regulations related to capital maintenance.

The U.S. banking regulators have issued the U.S. Basel III final rules to replace the existing Basel I capital rules. Refer to Note 20 to the Consolidated Financial Statements in our 2013 Annual Report on Form 10-K for additional information about the U.S. Basel III final rules and their applicability to Ally and Ally Bank. Compliance with evolving capital requirements is a strategic priority for Ally. We expect to be in compliance with all applicable requirements within the established timeframes.

The following table summarizes our capital ratios.

(\$ in millions)	March 31, 2014		December 31, 2013		Required minimum	Well-capitalized minimum
	Amount	Ratio	Amount	Ratio		
Risk-based capital						
Tier 1 (to risk-weighted assets)						
Ally Financial Inc.	\$ 15,479	12.12	% \$ 15,165	11.79	% 4.00	% 6.00
Ally Bank	15,403	17.34	15,159	16.73	4.00	6.00
Total (to risk-weighted assets)						
Ally Financial Inc.	\$ 16,633	13.02	% \$ 16,405	12.76	% 8.00	% 10.00
Ally Bank	16,019	18.03	15,809	17.45	8.00	10.00
Tier 1 leverage (to adjusted quarterly average assets) (a)						
Ally Financial Inc.	\$ 15,479	10.39	% \$ 15,165	10.23	% 3.00–4.00%	(b)
Ally Bank	15,403	15.70	15,159	15.77	15.00	(c) 5.00
Tier 1 common (to risk-weighted assets)						
Ally Financial Inc.	\$ 11,679	9.14	% \$ 11,366	8.84	% n/a	n/a
Ally Bank	15,403	17.34	15,159	16.73	n/a	n/a

n/a = not applicable

(a) Federal regulatory reporting guidelines require the calculation of adjusted quarterly average assets using a daily average methodology.

(b) There is no Tier 1 leverage component in the definition of "well-capitalized" for a bank holding company.

(c) Ally Bank, in accordance with the CLMA, is required to maintain a Tier 1 leverage ratio of at least 15%. At March 31, 2014, Ally and Ally Bank were “well-capitalized” and met all capital requirements to which each was subject.

Capital Planning and Stress Tests

As a bank holding company with \$50 billion or more of consolidated assets, Ally is required to conduct periodic stress tests and submit a proposed capital plan to the FRB every January, which the FRB must take action on by the following March. The proposed capital plan must include a description of all planned capital actions over a nine-quarter planning horizon. The proposed capital plan must also include a discussion of how Ally will maintain capital above the minimum regulatory capital ratios and above a Tier 1 common equity-to-total risk-weighted assets ratio of 5%, and serve as a source of strength to Ally Bank. The FRB must approve Ally's proposed capital plan before Ally may take any proposed capital action.

In November 2013, the FRB issued instructions for the 2014 Comprehensive Capital Analysis and Review (CCAR) and the 2014 supervisory stress test scenarios. On January 6, 2014, Ally and Ally Bank submitted the 2014 capital plan and stress tests as required by the rules and the 2014 CCAR instructions, and in March 2014, the FRB indicated that it did not object to our 2014 capital plan.

Ally Financial Inc. • Form 10-Q

19. Derivative Instruments and Hedging Activities

We enter into interest rate, foreign-currency, and equity swaps, futures, forwards, options, and swaptions in connection with our market risk management activities. Derivative instruments are used to manage interest rate risk relating to specific groups of assets and liabilities, including automotive loan assets and debt. We use foreign exchange contracts to mitigate foreign-currency risk associated with foreign-currency-denominated debt, foreign exchange transactions, and our net investment in foreign subsidiaries. In addition, we also enter into equity option contracts to manage our exposure to the equity markets. Our primary objective for utilizing derivative financial instruments is to manage interest rate risk associated with our fixed and variable rate assets and liabilities, foreign exchange risks related to our foreign-currency denominated assets and liabilities, and market risks related to our investment portfolio.

Interest Rate Risk

We monitor our mix of fixed- and variable-rate assets and liabilities. When it is cost-effective to do so, we may enter into interest rate swaps, forwards, futures, options, and swaptions to achieve our desired mix of fixed- and variable-rate assets and liabilities. We execute interest rate swaps, forwards, futures, options, and swaptions to modify our exposure to interest rate risk by converting certain fixed-rate instruments to a variable-rate and certain variable-rate instruments to a fixed-rate. We use a mix of both derivatives that qualify for hedge accounting treatment and economic hedges.

Derivatives qualifying for hedge accounting consist of receive-fixed swaps designated as fair value hedges of specific fixed-rate debt obligations, pay-fixed swaps designated as fair value hedges of specific portfolios of fixed-rate held-for-investment retail automotive loan assets, and pay-fixed swaps designated as cash flow hedges of the expected future cash flows in the form of interest payments on certain outstanding variable-rate borrowings associated with our secured debt.

We also execute economic hedges, which consist of interest rate swaps and interest rate caps held to mitigate interest rate risk associated with our debt portfolio. We also use interest rate swaps to hedge our net fixed versus variable interest rate exposure. We enter into economic hedges in the form of short-dated, exchange-traded Eurodollar futures to hedge the interest rate exposure of our fixed-rate automotive loans, as well as forwards, options, and swaptions to economically hedge our net fixed versus variable interest rate exposure.

In the past, we used a multitude of derivative instruments to manage interest rate risk related to MSRMs, mortgage loan commitments, and mortgage loans held-for-sale. They included, but were not limited to, interest rate swaps, forward sales of mortgage backed securities, interest rate futures contracts, options on U.S. Treasuries, swaptions, interest rate floors, and interest rate caps. Since we no longer have exposures to these activities, we no longer utilize these hedge strategies.

Foreign Exchange Risk

We enter into derivative financial instrument contracts to mitigate the risk associated with variability in cash flows related to our various foreign-currency exposures.

We enter into foreign-currency forwards with external counterparties as net investment hedges of foreign exchange exposure on our investments in foreign subsidiaries. However, we have reduced our foreign exchange exposure to net investments in foreign operations through the sales of discontinued international businesses. Refer to Note 2 for further details on these sales.

Our remaining foreign subsidiaries maintain both assets and liabilities in local currencies. These local currencies are generally the subsidiaries' functional currencies for accounting purposes. Foreign-currency-exchange-rate gains and losses arise when the assets or liabilities of our subsidiaries are denominated in currencies that differ from its functional currency. In addition, our equity is impacted by the cumulative translation adjustments resulting from the translation of foreign subsidiary results; this impact is reflected in our accumulated other comprehensive income (loss).

We utilize a cross-currency swap to economically hedge foreign exchange exposure on foreign-currency-denominated debt by converting the funding currency to our functional currency. This swap was entered into concurrent with the debt issuance with the terms of the derivative matching the terms of the underlying debt.

We also enter into foreign currency forwards to economically hedge both our foreign denominated debt and our centralized lending program. The hedge of foreign denominated debt was entered into concurrent with the debt issuance with the terms of the derivative matching the terms of the underlying debt. The centralized lending program manages liquidity for our subsidiary businesses, but as of March 31, 2014, this activity is immaterial.

Foreign-currency-denominated loan agreements are executed with our foreign subsidiaries in their local currencies.

We evaluate our foreign-currency exposure resulting from intercompany lending and manage our currency risk exposure by entering into foreign-currency derivatives with external counterparties. Our remaining foreign-currency derivatives are recorded at fair value with changes recorded as income offsetting the gains and losses on the associated foreign-currency transactions.

Market Risk

We enter into equity options to economically hedge our exposure to the equity markets. We purchase options to assume a long position on certain equities and write options to assume a short position.

Ally Financial Inc. • Form 10-Q

Counterparty Credit Risk

Derivative financial instruments contain an element of credit risk if counterparties are unable to meet the terms of the agreements. Credit risk associated with derivative financial instruments is measured as the net replacement cost should the counterparties that owe us under the contract completely fail to perform under the terms of those contracts, assuming no recoveries of underlying collateral as measured by the market value of the derivative financial instrument.

To mitigate the risk of counterparty default, we maintain collateral agreements with certain counterparties. The agreements require both parties to maintain collateral in the event the fair values of the derivative financial instruments meet established thresholds. In the event that either party defaults on the obligation, the secured party may seize the collateral. Generally, our collateral arrangements are bilateral such that we and the counterparty post collateral for the value of our total obligation to each other. Contractual terms provide for standard and customary exchange of collateral based on changes in the market value of the outstanding derivatives. The securing party posts additional collateral when their obligation rises or removes collateral when it falls. We also have unilateral collateral agreements whereby we are the only entity required to post collateral.

Certain derivative instruments contain provisions that require us to either post additional collateral or immediately settle any outstanding liability balances upon the occurrence of a specified credit risk-related event. If a credit risk-related event had been triggered, the amount of additional collateral required to be posted by us would have been insignificant.

We placed cash and securities collateral totaling \$220 million and \$328 million at March 31, 2014 and December 31, 2013, respectively, in accounts maintained by counterparties, \$18 million of which relates to non-derivative collateral at March 31, 2014 and December 31, 2013. We received cash collateral from counterparties totaling \$60 million and \$159 million at March 31, 2014 and December 31, 2013, respectively. The receivables for collateral placed and the payables for collateral received are included on our Condensed Consolidated Balance Sheet in other assets and accrued expenses and other liabilities, respectively. In certain circumstances, we receive or post securities as collateral with counterparties. We do not record such collateral received on our Condensed Consolidated Balance Sheet unless certain conditions are met. At March 31, 2014 and December 31, 2013, we received noncash collateral of \$17 million and \$18 million, respectively.

Balance Sheet Presentation

The following table summarizes the fair value amounts of derivative instruments reported on our Condensed Consolidated Balance Sheet. The fair value amounts are presented on a gross basis, are segregated by derivatives that are designated and qualifying as hedging instruments or those that are not, and are further segregated by type of contract within those two categories. At March 31, 2014 and December 31, 2013, \$252 million and \$362 million, respectively, of the derivative contracts in a receivable position were classified as other assets on the Condensed Consolidated Balance Sheet. At March 31, 2014 and December 31, 2013, \$252 million and \$317 million of derivative contracts in a liability position were classified as accrued expenses and other liabilities on the Condensed Consolidated Balance Sheet.

Statement of Comprehensive Income Presentation

The following table summarizes the location and amounts of gains and losses on derivative instruments reported in our Condensed Consolidated Statement of Comprehensive Income.

(\$ in millions)	Three months ended	
	March 31, 2014	2013
Derivatives qualifying for hedge accounting		
Gain (loss) recognized in earnings on derivatives		
Interest rate contracts		
Interest and fees on finance receivables and loans (a)	\$2	\$—
Interest on long-term debt (b)	34	(98)
Gain (loss) recognized in earnings on hedged items (c)		
Interest rate contracts		
Interest and fees on finance receivables and loans	11	—
Interest on long-term debt	(32)	101)
Total derivatives qualifying for hedge accounting	15	3
Economic derivatives		
(Loss) gain recognized in earnings on derivatives		
Interest rate contracts		
Servicing asset valuation and hedge activities, net	—	(112)
Loss on mortgage and automotive loans, net	—	(32)
Other income, net of losses	(8)	(1)
Total interest rate contracts	(8)	(145)
Foreign exchange contracts (d)		
Interest on long-term debt	(5)	39
Other income, net of losses	—	28
Total foreign exchange contracts	(5)	67
Gain (loss) recognized in earnings on derivatives	\$2	\$(75)

Amounts exclude losses related to interest for qualifying accounting hedges of portfolios of retail automotive loans (a) held-for-investment of \$13 million for the three months ended March 31, 2014. These losses are primarily offset by the fixed coupon receipts on the retail automotive loans held-for-investment.

Amounts exclude gains related to interest for qualifying accounting hedges of debt, which are primarily offset by (b) the fixed coupon payment on the long-term debt. The gains were \$35 million and \$33 million for the three months ended March 31, 2014 and 2013, respectively.

Amounts exclude gains related to amortization of deferred basis adjustments on the de-designated hedged item of (c) \$45 million and \$38 million for the three months ended March 31, 2014 and 2013, respectively.

Amounts exclude gains and losses related to the revaluation of the related foreign-denominated debt or receivable.

(d) Gains of \$4 million and losses of \$65 million were recognized for the three months ended March 31, 2014 and 2013, respectively.

Ally Financial Inc. • Form 10-Q

The following table summarizes derivative instruments used in cash flow and net investment hedge accounting relationships.

(\$ in millions)	Three months ended	
	March 31, 2014	2013
Cash flow hedges		
Interest rate contracts		
Loss reclassified from accumulated other comprehensive income to interest on long-term debt	\$—	\$(7)
(a)		
Total interest on long-term debt	\$—	\$(7)
Gain recognized in other comprehensive income	\$—	\$7
Net investment hedges		
Foreign exchange contracts		
Loss reclassified from accumulated other comprehensive income (loss) to income from discontinued operations, net	\$—	\$(149)
Total income (loss) from discontinued operations, net	\$—	\$(149)
Gain recognized in other comprehensive income (b)	\$11	\$169

(a) The amount represents losses reclassified from other comprehensive income (OCI) into earnings as a result of the discontinuance of hedge accounting because it is probable that the forecasted transaction will not occur.

The amounts represent the effective portion of net investment hedges. There are offsetting amounts recognized in accumulated other comprehensive income related to the revaluation of the related net investment in foreign operations. There were losses of \$19 million and \$519 million for the three months ended March 31, 2014 and 2013, respectively.

20. Income Taxes

We recognized total income tax expense from continuing operations of \$94 million during the three months ended March 31, 2014, compared to income tax benefit of \$123 million for the same period in 2013. The increase in income tax expense for the three months ended March 31, 2014, compared to the same period in 2013, was driven by tax expense attributable to higher pretax earnings and certain tax benefits recorded in the three months ended March 31, 2013, which did not occur in the three months ended March 31, 2014, related to the 2013 retroactive reinstatement of the active financing exception by the American Taxpayer Relief Act of 2012 and from the 2013 release of valuation allowance related to the measurement of foreign tax credit carryforwards anticipated to be utilized in the future.

As of each reporting date, we consider existing evidence, both positive and negative, that could impact our view with regard to future realization of deferred tax assets. We continue to believe it is more likely than not that the benefit for certain capital loss, foreign tax credit, and state net operating loss carryforwards will not be realized. In recognition of this risk, we continue to provide a partial valuation allowance on the deferred tax assets relating to these carryforwards.

With the extension of the active financing exception tax law being reasonably possible during 2014, the successful completion of the sale of our joint venture in China during 2014, which is currently held-for-sale, may result in additional capital gains that would allow us to realize additional capital loss carryforwards. Any resulting reversal of valuation allowance on these deferred tax assets would be recognized as an income tax benefit upon such reversal. We expect the unrecognized tax benefits disclosed in our 2013 Annual Report to change over the next 12 months. If certain tax matters ultimately settle with the applicable taxing jurisdiction as anticipated, the impact of these changes to previously recorded uncertain tax positions is expected to result in a tax benefit of approximately \$70 million.

21. Fair Value

Fair Value Measurements

For purposes of this disclosure, fair value is defined as the exchange price that would be received to sell an asset or paid to transfer a liability (exit price) in the principal or most advantageous market in an orderly transaction between market participants at the measurement date. Fair value is based on the assumptions market participants would use when pricing an asset or liability. Additionally, entities are required to consider all aspects of nonperformance risk, including the entity's own credit standing, when measuring the fair value of a liability.

GAAP specifies a three-level hierarchy that is used when measuring and disclosing fair value. The fair value hierarchy gives the highest priority to quoted prices available in active markets (i.e., observable inputs) and the lowest priority to data lacking transparency (i.e., unobservable inputs). An instrument's categorization within the fair value hierarchy is based on the lowest level of significant input to its valuation. The following is a description of the three hierarchy levels.

Inputs are quoted prices in active markets for identical assets or liabilities at the measurement date.

Level 1 Additionally, the entity must have the ability to access the active market, and the quoted prices cannot be adjusted by the entity.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

Inputs are other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices in active markets for similar assets or liabilities; Level 2 quoted prices in inactive markets for identical or similar assets or liabilities; or inputs that are observable or can be corroborated by observable market data by correlation or other means for substantially the full term of the assets or liabilities.

Unobservable inputs are supported by little or no market activity. The unobservable inputs represent management's best assumptions of how market participants would price the assets or liabilities. Generally, Level 3 assets and liabilities are valued using pricing models, discounted cash flow methodologies, or similar techniques that require significant judgment or estimation.

Transfers into or out of any hierarchy level are recognized at the end of the reporting period in which the transfer occurred. During the three months ended March 31, 2014, transfers from Level 3 into Level 2 included \$78 million of derivative contracts in a receivable position and \$81 million of derivative contracts in a payable position based on increased observability of significant inputs related to the valuation of our interest rate caps. There were no additional transfers between any levels during the three months ended March 31, 2014.

Following are descriptions of the valuation methodologies used to measure material assets and liabilities at fair value and details of the valuation models, key inputs to those models, and significant assumptions utilized.

Available-for-sale securities — Available-for-sale securities are carried at fair value based on observable market prices, when available. If observable market prices are not available, our valuations are based on internally developed discounted cash flow models (an income approach) that use a market-based discount rate and consider recent market transactions, experience with similar securities, current business conditions, and analysis of the underlying collateral, as available. To estimate cash flows, we are required to utilize various significant assumptions including market observable inputs (e.g., forward interest rates) and internally developed inputs (including prepayment speeds, delinquency levels, and credit losses).

Mortgage loans held-for-sale, net — Our mortgage loans held-for-sale are accounted for at fair value because of fair value option elections. Mortgage loans held-for-sale are typically pooled together and sold into certain exit markets depending on underlying attributes of the loan, such as GSE eligibility, product type, interest rate, and credit quality. Mortgage loans classified as Level 2 were mainly GSE-eligible mortgage loans carried at fair value due to fair value option election, which are valued predominantly using published forward agency prices. It also includes any domestic loans where recently negotiated market prices for the loan pool exist with a counterparty (which approximates fair value) or quoted market prices for similar loans are available.

Refer to the section within this note titled Fair Value Option for Financial Assets and Financial Liabilities for further information about the fair value elections.

MSRs — MSRs were classified as Level 3. Management estimated fair value using our transaction data and other market data or, in periods when there were limited MSR market transactions that were directly observable, internally developed discounted cash flow models (an income approach) were used to estimate the fair value. These internal valuation models estimated net cash flows based on internal operating assumptions that we believed would be used by market participants in orderly transactions combined with market-based assumptions for loan prepayment rates, interest rates, and discount rates that we believed approximate yields required by investors in this asset. Cash flows primarily included servicing fees, float income, and late fees in each case less operating costs to service the loans. The estimated cash flows were discounted using an option-adjusted spread-derived discount rate. As of June 30, 2013, we no longer held such positions as a result of our exit from the mortgage servicing business.

Interests retained in financial asset sales — The interests retained are in securitization trusts and deferred purchase prices on the sale of whole-loans. Due to inactivity in the market, valuations are based on internally developed discounted cash flow models (an income approach) that use a market-based discount rate; therefore, we classified these assets as Level 3. The valuation considers recent market transactions, experience with similar assets, current business

conditions, and analysis of the underlying collateral, as available. To estimate cash flows, we utilize various significant assumptions, including market observable inputs (e.g., forward interest rates) and internally developed inputs (e.g., prepayment speeds, delinquency levels, and credit losses).

Derivative instruments — We enter into a variety of derivative financial instruments as part of our risk management strategies. Certain of these derivatives are exchange traded, such as Eurodollar futures, options of Eurodollar futures, equity options, and centrally-cleared interest rate swaps. To determine the fair value of these instruments, we utilize the quoted market prices for the particular derivative contracts; therefore, we classified these contracts as Level 1. We also execute over-the-counter derivative contracts, such as interest rate swaps, a cross-currency swap, swaptions, forwards, caps, floors, and agency to-be-announced securities. We utilize third-party-developed valuation models that are widely accepted in the market to value these over-the-counter derivative contracts. The specific terms of the contract and market observable inputs (such as interest rate forward curves and interpolated volatility assumptions) are used in the model. We classified these over-the-counter derivative contracts as Level 2 because all significant inputs into these models were market observable. During the three months ended March 31, 2014, we began to value our bilateral interest rate swap and interest rate cap portfolio using Overnight Index Swap discount curves. We previously valued this portfolio using London Interbank Offered Rate (LIBOR) discount curves.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

Because we continued to use a third-party-developed valuation model in which all significant inputs were market observable, these contracts remained classified as Level 2.

Historically, we had a cross-currency swap and interest rate caps accounted for as derivative instruments that were classified as Level 3. However, as of March 31, 2014, we no longer have any positions classified as Level 3.

We are required to consider all aspects of nonperformance risk, including our own credit standing, when measuring fair value of a liability. We reduce credit risk on the majority of our derivatives by entering into legally enforceable agreements that enable the posting and receiving of collateral associated with the fair value of our derivative positions on an ongoing basis. In the event that we do not enter into legally enforceable agreements that enable the posting and receiving of collateral, we will consider our credit risk and the credit risk of our counterparties in the valuation of derivative instruments through a credit valuation adjustment (CVA), if warranted. The CVA calculation utilizes our credit default swap spreads and the spreads of the counterparty.

- (a) Fair value adjustment was reported as servicing-asset valuation and hedge activities, net, in the Condensed Consolidated Statement of Comprehensive Income.
- (b) Reported as other income, net of losses, in the Condensed Consolidated Statement of Comprehensive Income.
- (c) Refer to Note 19 for information related to the location of the gains and losses on derivative instruments in the Condensed Consolidated Statement of Comprehensive Income.

Nonrecurring Fair Value

We may be required to measure certain assets and liabilities at fair value from time to time. These periodic fair value measures typically result from the application of lower-of-cost or fair value accounting or certain impairment measures. These items would constitute nonrecurring fair value measures.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

The following tables display the assets and liabilities measured at fair value on a nonrecurring basis.

March 31, 2014 (\$ in millions)	Nonrecurring fair value measurements				Lower-of-cost or fair value or valuation reserve allowance	Total loss included in earnings for the three months ended	
	Level 1	Level 2	Level 3	Total			
Assets							
Commercial finance receivables and loans, net (a)							
Automotive	\$—	\$—	\$31	\$31	\$ (6)	n/m	(b)

Ally Financial Inc. • Form 10-Q

The following table presents quantitative information regarding the significant unobservable inputs used in significant Level 3 assets measured at fair value on a nonrecurring basis.

March 31, 2014 (\$ in millions)	Level 3		Unobservable input	Range
	nonrecurring measurements	Valuation technique		
Assets				
Commercial finance receivables and loans, net				
Automotive	\$31	Fair value of collateral	Adjusted appraisal value	65.0-95.0%
Other	53	Discounted cash flow	Non-public/non-rated credits	92.0-108.0%

Fair Value Option for Financial Assets

We elected the fair value option for conforming and government-insured mortgage loans held-for-sale. We elected the fair value option to mitigate earnings volatility by better matching the accounting for the assets with the related hedges. Our intent in electing fair value measurement was to mitigate a divergence between accounting losses and economic exposure for certain assets and liabilities.

Excluded from the fair value option were conforming and government-insured loans funded on or prior to July 31, 2009, and repurchased or rerecognized. The loans funded on or prior to July 31, 2009, were ineligible because the election must be made at the time of funding. Repurchased and rerecognized conforming and government-insured loans were not elected because the election would not mitigate earning volatility. We repurchase or rerecognize loans due to representation and warranty obligations or conditional repurchase options. Typically, we will be unable to resell these assets through regular channels due to characteristics of the assets. Since the fair value of these assets is influenced by factors that cannot be hedged, we did not elect the fair value option.

We carried the fair value-elected conforming and government-insured loans as loans held-for-sale, net, on the Condensed Consolidated Balance Sheet. Our policy is to separately record interest income on the fair value-elected loans (unless they are placed on nonaccrual status); however, the accrued interest was excluded from the fair value presentation. Upfront fees and costs related to the fair value-elected loans were not deferred or capitalized. The fair value adjustment recorded for these loans was classified as gain (loss) on mortgage loans, net, in the Condensed Consolidated Statement of Comprehensive Income. In accordance with GAAP, the fair value option election is irrevocable once the asset is funded even if it is subsequently determined that a particular loan cannot be sold.

The following tables summarize the fair value option elections and information regarding the amounts recorded as earnings for each fair value option-elected item.

Three months ended March 31, (\$ in millions)	Changes included in the Condensed Consolidated Statement of Comprehensive Income		
	Interest on loans held-for-sale (a)	Gain on mortgage loans, net	Total included in earnings
2014			
Assets			
Mortgage loans held-for-sale, net	\$—	\$—	\$—
2013			
Assets			
Mortgage loans held-for-sale, net	\$16	\$(41)	\$(25)

(a) Interest income is measured by multiplying the unpaid principal balance on the loans by the coupon rate and the number of days of interest due.

47

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

The following table provides the aggregate fair value and the aggregate unpaid principal balance for the fair value option-elected loans.

(\$ in millions)	March 31, 2014		December 31, 2013	
	Unpaid principal balance	Fair value (a)	Unpaid principal balance	Fair value (a)
Assets				
Mortgage loans held-for-sale, net				
Total loans	\$7	\$3	\$31	\$16
Nonaccrual loans	3	2	18	9
Loans 90+ days past due (b)	3	2	15	8

(a) Excludes accrued interest receivable.

(b) Loans 90+ days past due are also presented within the nonaccrual loan balance and the total loan balance; however, (b) excludes government-insured loans that are still accruing interest.

Fair Value of Financial Instruments

The following table presents the carrying and estimated fair value of financial instruments, except for those recorded at fair value on a recurring basis presented in the previous section of this note titled Recurring Fair Value. When possible, we use quoted market prices to determine fair value. Where quoted market prices are not available, the fair value is internally derived based on appropriate valuation methodologies with respect to the amount and timing of future cash flows and estimated discount rates. However, considerable judgment is required in interpreting market data to develop estimates of fair value, so the estimates are not necessarily indicative of the amounts that could be realized or would be paid in a current market exchange. The effect of using different market assumptions or estimation methodologies could be material to the estimated fair values. Fair value information presented herein was based on information available at March 31, 2014 and December 31, 2013.

(\$ in millions)	Carrying value	Estimated fair value			
		Level 1	Level 2	Level 3	Total
March 31, 2014					
Financial assets					
Loans held-for-sale, net (a)	\$43	\$—	\$43	\$—	\$43
Finance receivables and loans, net (a)	98,432	—	—	99,440	99,440
Nonmarketable equity investments	236	—	205	44	249
Financial liabilities					
Deposit liabilities	\$55,367	\$—	\$—	\$56,085	\$56,085
Short-term borrowings	5,163	—	—	5,163	5,163
Long-term debt (a)(b)	68,665	—	27,852	44,391	72,243
December 31, 2013					
Financial assets					
Loans held-for-sale, net (a)	\$35	\$—	\$17	\$18	\$35
Finance receivables and loans, net (a)	99,120	—	—	100,090	100,090
Nonmarketable equity investments	337	—	308	38	346
Financial liabilities					
Deposit liabilities	\$53,350	\$—	\$—	\$54,070	\$54,070
Short-term borrowings	8,545	—	—	8,545	8,545
Long-term debt (a)(b)	69,824	—	31,067	42,297	73,364
(a)					

Includes financial instruments carried at fair value due to fair value option elections. Refer to the previous section of this note titled Fair Value Option for Financial Assets and Liabilities for further information about the fair value elections.

(b) The carrying value includes deferred interest for zero-coupon bonds of \$370 million and \$359 million at March 31, 2014, and December 31, 2013, respectively.

The following describes the methodologies and assumptions used to determine fair value for the significant classes of financial instruments. In addition to the valuation methods discussed below, we also followed guidelines for determining whether a market was not active and a transaction was not distressed. As such, we assumed the price that would be received in an orderly transaction (including a market-based return) and not in forced liquidation or distressed sale.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

Cash and cash equivalents — Included in cash and cash equivalents are highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value due to interest rate, quoted price, or penalty on withdrawal. Classified as Level 1 under the fair value hierarchy, cash and cash equivalents generally expose us to limited credit risk and have no stated maturities or have short-term maturities and carry interest rates that approximate market. As such, the carrying value approximates the fair value of these instruments.

Loans held-for-sale, net — Loans held-for-sale classified as Level 2 included all GSE-eligible mortgage loans valued predominantly using published forward agency prices. It also included any domestic loans where recently negotiated market prices for the loan pool existed with a counterparty (which approximated fair value) or quoted market prices for similar loans were available. Loans held-for-sale classified as Level 3 included all loans valued using internally developed valuation models because observable market prices were not available. The loans were priced on a discounted cash flow basis utilizing cash flow projections from internally developed models that utilized prepayment, default, and discount rate assumptions. To the extent available, we utilized market observable inputs such as interest rates and market spreads. If market observable inputs were not available, we were required to utilize internal inputs, such as prepayment speeds, credit losses, and discount rates.

Finance receivables and loans, net — With the exception of mortgage loans held-for-investment, the fair value of finance receivables and loans was based on discounted future cash flows using applicable spreads to approximate current rates applicable to each category of finance receivables and loans (an income approach using Level 3 inputs). The carrying value of commercial receivables in certain markets and certain automotive and other receivables for which interest rates reset on a short-term basis with applicable market indices are assumed to approximate fair value either because of the short-term nature or because of the interest rate adjustment feature. The fair value of commercial receivables in other markets was based on discounted future cash flows using applicable spreads to approximate current rates applicable to similar assets in those markets.

For consumer mortgage loans, we used valuation methods and assumptions similar to those used for mortgage loans held-for-sale. These valuations consider unique attributes of the loans such as geography, delinquency status, product type, and other factors. Refer to the section above titled Loans held-for-sale, net, for a description of methodologies and assumptions used to determine the fair value of mortgage loans held-for-sale.

Deposit liabilities — Deposit liabilities represent certain consumer and brokered bank deposits, mortgage escrow deposits, and dealer deposits. The fair value of deposits at Level 3 were estimated by discounting projected cash flows based on discount factors derived from the forward interest rate swap curve.

Debt — Level 2 debt was valued using quoted market prices, when available, or other means for substantiation with observable inputs. Debt valued using internally derived inputs, such as prepayment speeds and discount rates, was classified as Level 3.

22. Offsetting Assets and Liabilities

Our qualifying master netting agreements are written, legally enforceable bilateral agreements that (1) create a single legal obligation for all individual transactions covered by the agreement to the non-defaulting entity upon an event of default of the counterparty, including bankruptcy, insolvency, or similar proceeding, and (2) provide the non-defaulting entity the right to accelerate, terminate, and close-out on a net basis all transactions under the agreement and to liquidate or set off collateral promptly upon an event of default of the counterparty. As it relates to derivative instruments, in certain instances we have the option to report derivatives that are subject to a qualifying master netting agreement on a net basis, we have elected to report these instruments as gross assets and liabilities on the Condensed Consolidated Balance Sheet.

To further mitigate the risk of counterparty default related to derivative instruments, we maintain collateral agreements with certain counterparties. The agreements require both parties to maintain collateral in the event the fair values of the derivative financial instruments meet established thresholds. In the event that either party defaults on the obligation, the secured party may seize the collateral. Generally, our collateral arrangements are bilateral such that we

and the counterparty post collateral for the value of our total obligation to each other. Contractual terms provide for standard and customary exchange of collateral based on changes in the market value of the outstanding derivatives. The securing party posts additional collateral when their obligation rises or removes collateral when it falls, such that the net replacement cost of the non-defaulting party is covered in the event of counterparty default.

23. Segment and Geographic Information

Operating segments are defined as components of an enterprise that engage in business activity from which revenues are earned and expenses incurred for which discrete financial information is available that is evaluated regularly by our chief operating decision maker in deciding how to allocate resources and in assessing performance.

We report our results of operations on a line-of-business basis through three operating segments - Automotive Finance operations, Insurance operations, and Mortgage operations, with the remaining activity reported in Corporate and Other. The operating segments are

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

determined based on the products and services offered, and reflect the manner in which financial information is currently evaluated by management. The following is a description of each of our reportable operating segments. Automotive Finance operations — Provides automotive financing services to consumers and automotive dealers. For consumers, we offer retail automotive financing and leasing for new and used vehicles, and through our commercial automotive financing operations, we fund dealer purchases of new and used vehicles through wholesale or floorplan financing.

Insurance operations — Offers both consumer financial and insurance products sold primarily through the automotive dealer channel, and commercial insurance products sold to dealers. As part of our focus on offering dealers a broad range of consumer finance and insurance products, we provide vehicle service contracts, maintenance coverage, and GAP products. We also underwrite selected commercial insurance coverages, which primarily insure dealers' vehicle inventories in the United States.

Mortgage operations — Our ongoing Mortgage operations include the management of our held-for-investment mortgage portfolio.

Corporate and Other primarily consists of our Commercial Finance Group, centralized corporate treasury activities, such as management of the cash and corporate investment securities portfolios, short- and long-term debt, retail and brokered deposit liabilities, derivative instruments, the amortization of the discount associated with new debt issuances and bond exchanges, and the residual impacts of our corporate funds-transfer pricing (FTP) and treasury asset liability management (ALM) activities. Corporate and Other also includes certain equity investments, overhead that was previously allocated to operations that have since been sold or classified as discontinued operations, and reclassifications and eliminations between the reportable operating segments.

We utilize an FTP methodology for the majority of our business operations. The FTP methodology assigns charge rates and credit rates to classes of assets and liabilities based on expected duration and the LIBOR swap curve plus an assumed credit spread. Matching duration allocates interest income and interest expense to these reportable segments so their respective results are insulated from interest rate risk. This methodology is consistent with our ALM practices, which includes managing interest rate risk centrally at a corporate level. The net residual impact of the FTP methodology is included within the results of Corporate and Other.

The information presented in our reportable operating segments and geographic areas tables that follow are based in part on internal allocations, which involve management judgment.

Financial information for our reportable operating segments is summarized as follows.

Three months ended March 31, (\$ in millions)	Automotive Finance operations	Insurance operations	Mortgage operations	Corporate and Other (a)	Consolidated (b)
2014

Total	\$1,026	\$(63)) \$1,093

(a) Revenue consists of net financing revenue and total other revenue as presented in our Condensed Consolidated Financial Statements.

(b) The domestic amounts include original discount amortization of \$48 million and \$60 million for the three months ended March 31, 2014 and 2013, respectively.

(c) Gain (loss) realized on sale of discontinued operations are allocated to the geographic area in which the business operated.

(d) Amounts include eliminations between our domestic and foreign operations.

(e) Amounts include eliminations between our foreign operations.

24. Parent and Guarantor Condensed Consolidating Financial Statements

Certain of our senior notes issued by the parent are guaranteed by 100% directly owned subsidiaries of Ally (the Guarantors). As of March 31, 2014, the Guarantors include Ally US LLC and IB Finance Holding Company, LLC (IB Finance), each of which fully and unconditionally guarantee the senior notes on a joint and several basis.

The following financial statements present condensed consolidating financial data for (i) Ally Financial Inc. (on a parent company-only basis), (ii) the Guarantors, (iii) the nonguarantor subsidiaries (all other subsidiaries), and (iv) an elimination column for adjustments to arrive at (v) the information for the parent company, the Guarantors, and nonguarantors on a consolidated basis. As of March 31, 2014, the financial statements have been restated to reflect the dissolution of a former nonguarantor subsidiary, GMAC Mortgage Group LLC.

Investments in subsidiaries are accounted for by the parent company and the Guarantors using the equity-method for this presentation. Results of operations of subsidiaries are therefore classified in the parent company's and the Guarantors' investment in subsidiaries accounts. The elimination entries set forth in the following condensed consolidating financial statements eliminate distributed and undistributed income of subsidiaries, investments in subsidiaries, and intercompany balances and transactions between the parent, the Guarantors, and nonguarantors.

25. Contingencies and Other Risks

In the normal course of business, we enter into transactions that expose us to varying degrees of risk. For additional information on contingencies and other risks arising from such transactions, refer to Note 29 to the Consolidated Financial Statements in our 2013 Annual Report on Form 10-K.

Legal Proceedings

We are or may be subject to potential liability under various governmental proceedings, claims, and legal actions that are pending or otherwise asserted against us. We are named as defendants in a number of legal actions, and we are involved in governmental proceedings arising in connection with our respective businesses. Some of the pending actions purport to be class actions, and certain legal actions include claims for substantial compensatory and/or punitive damages or claims for indeterminate amounts of damages. We establish reserves for legal claims when payments associated with the claims become probable and the payments can be reasonably estimated. Given the inherent difficulty of predicting the outcome of litigation and regulatory matters, it is generally very difficult to predict what the eventual outcome will be, and when the matter will be resolved. The actual costs of resolving legal claims may be higher or lower than any amounts reserved for the claims.

On the basis of information currently available, advice of counsel, available insurance coverage, and established reserves, it is the opinion of management that the eventual outcome of the current actions against us will not have a material adverse effect on our consolidated financial condition, results of operations, or cash flows. However, it is possible that the ultimate resolution of legal matters, if unfavorable, may be material to our consolidated financial condition, results of operations, or cash flows in a particular period.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

Regulatory Matters

Ally and its subsidiaries, including Ally Bank, are or may become involved from time to time in reviews, investigations, and proceedings (both formal and informal), and information-gathering requests, by government and self-regulatory agencies, including the FRB, FDIC, Utah DFI, CFPB, U.S. Department of Justice (DOJ), SEC, and the Federal Trade Commission regarding their respective operations. Such requests include subpoenas from each of the SEC and the DOJ. The subpoenas and document requests from the SEC include information covering a wide range of mortgage-related matters, and the subpoenas received from the DOJ include a broad request for documentation and other information in connection with its investigations of potential fraud and other potential legal violations related to mortgage-backed securities, as well as the origination and/or underwriting of mortgage loans.

Further, in December 2013, Ally Financial Inc. and Ally Bank entered into Consent Orders issued by the CFPB and the DOJ pertaining to the allegation of disparate impact in the automotive finance business, which resulted in a \$98 million charge in the fourth quarter of 2013. The Consent Orders require Ally to create a compliance plan addressing, at a minimum, the communication of Ally's expectations of Equal Credit Opportunity Act compliance to dealers, maintenance of Ally's existing limits on dealer finance income for contracts acquired by Ally, and monitoring for potential discrimination both at the dealer level and across all dealers. Ally formed a compliance committee consisting of Ally and Ally Bank directors to oversee Ally's execution of the Consent Orders' terms. Failure to achieve certain remediation targets could result in the payment of additional amounts in the future.

Investigations, proceedings or information-gathering requests that Ally is, or may become, involved in may result in material adverse consequences including without limitation, adverse judgments, settlements, fines, penalties, injunctions, or other actions.

Loan Repurchases and Obligations Related to Loan Sales

Representation and Warranty Obligation Reserve

The representation and warranty reserve was \$46 million at March 31, 2014 with respect to our sold and serviced loans for which we have retained representation and warranty obligation, compared to \$45 million at December 31, 2013. The liability for representation and warranty obligations reflects management's best estimate of probable losses with respect to Ally Bank's mortgage loans sold to Freddie Mac and Fannie Mae.

Other Contingencies

We are subject to potential liability under various other exposures including tax, nonrecourse loans, self-insurance, and other miscellaneous contingencies. We establish reserves for these contingencies when the loss becomes probable and the amount can be reasonably estimated. The actual costs of resolving these items may be substantially higher or lower than the amounts reserved for any one item. Based on information currently available, it is the opinion of management that the eventual outcome of these items will not have a material adverse impact on our results of operations, financial position, or cash flows.

26. Subsequent Events

Declaration of Quarterly Dividend Payments

On April 17, 2014, the Ally Board of Directors declared quarterly dividend payments on certain outstanding preferred stock. This included a cash dividend of \$16.92 per share, or a total of \$44 million, on Fixed Rate Cumulative Perpetual Preferred Stock, Series G; and a cash dividend of \$0.53 per share, or a total of \$22 million, on Fixed Rate/Floating Rate Perpetual Preferred Stock, Series A. The dividends are payable to shareholders of record as of May 1, 2014 and are payable on May 15, 2014.

Initial Public Offering of Common Stock, Stock Split, and Changes in Number of Shares Authorized

Refer to Note 1 to the Condensed Consolidated Financial Statements for further discussion regarding the IPO, stock split, and changes in the number of authorized shares for issuance of common stock and Series A Preferred Stock that occurred in April 2014.

Tier 1 common capital (non-GAAP) (g) — Basel I	\$ 11,679		
Adjustments from Basel I to Basel III	626		
Estimated Tier 1 common capital — Basel III (fully phased-in)	\$ 12,305		
Risk-weighted assets (h) — Basel I	\$ 127,734		
Adjustments from Basel I to Basel III	4,251		
Estimated risk-weighted assets — Basel III (fully phased-in)	\$ 131,985		
Estimated Tier 1 common ratio — Basel III (fully phased-in)	9.32	%	

(a) The ratios were based on average assets and average equity using a combination of monthly and daily average methodologies.

Return on tangible common equity (ROTCE) represents GAAP net income available to common shareholders (b) divided by a two-period average of tangible common equity, which is total shareholder's equity less preferred stock.

- (c) Net interest spread represents the difference between the rate on total interest-earning assets and the rate on total interest-bearing liabilities, excluding discontinued operations for the periods shown.
- (d) Net yield on interest-earning assets represents net financing revenue as a percentage of total interest-earning assets.
- (e) Tier 1 capital generally consists of common equity, minority interests, qualifying noncumulative preferred stock, and the fixed rate cumulative preferred stock sold to Treasury under TARP, less goodwill and other adjustments. Total risk-based capital is the sum of Tier 1 and Tier 2 capital. Tier 2 capital generally consists of preferred stock
- (f) not qualifying as Tier 1 capital, limited amounts of subordinated debt and the allowance for loan losses, and other adjustments. The amount of Tier 2 capital may not exceed the amount of Tier 1 capital.
- Tier 1 leverage equals Tier 1 capital divided by adjusted quarterly average total assets (which reflects adjustments
- (g) for disallowed goodwill and certain intangible assets). The minimum Tier 1 leverage ratio is 3% or 4% depending on factors specified in the regulations.
- We define Tier 1 common as Tier 1 capital less noncommon elements, including qualifying perpetual preferred stock, minority interest in subsidiaries, trust preferred securities, and mandatorily convertible preferred securities. Ally considers various measures when evaluating capital utilization and adequacy, including the Tier 1 common equity ratio, in addition to capital ratios defined by banking regulators. This calculation is intended to complement the capital ratios defined by banking regulators for both absolute and comparative purposes. Because GAAP does
- (h) not include capital ratio measures, Ally believes there are no comparable GAAP financial measures to these ratios. Tier 1 common equity is not formally defined by GAAP or codified in the federal banking regulations and, therefore, is considered to be a non-GAAP financial measure. Ally believes the Tier 1 common equity ratio is important because we believe analysts and banking regulators may assess our capital adequacy using this ratio. Additionally, presentation of this measure allows readers to compare certain aspects of our capital adequacy on the same basis to other companies in the industry.
- (i) Risk-weighted assets are defined by regulation and are determined by allocating assets and specified off-balance sheet financial instruments into several broad risk categories.

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

Overview

Ally Financial Inc. (formerly GMAC Inc.) is a leading, independent, financial services firm. Founded in 1919, we are a leading automotive financial services company with over 90 years of experience, providing a broad array of financial products and services to automotive dealers and their customers. We operate as a financial holding company and a bank holding company. Our banking subsidiary, Ally Bank, is an indirect wholly owned subsidiary of Ally Financial Inc. and a leading franchise in the growing direct (internet, telephone, mobile, and mail) banking market.

Initial Public Offering of Common Stock and Stock Split

In April 2014, we completed an initial public offering (IPO) of 95 million shares of common stock at \$25 per share. Proceeds from the offering amounted to \$2.4 billion, which were obtained by the U.S. Department of the Treasury (Treasury) as the single selling stockholder. In connection with the IPO, we effected a 310-for-one stock split on shares of our common stock, \$0.01 par value per share. Accordingly, all references in this MD&A and in the Condensed Consolidated Financial Statements to share and per share amounts relating to common stock have been adjusted, on a retroactive basis, to recognize the 310-for-one stock split.

Discontinued Operations

We committed to dispose of certain operations of our Automotive Finance operations, Insurance operations, Mortgage operations, and Commercial Finance Group, and have classified these operations as discontinued. For all periods presented, the operating results for these operations have been removed from continuing operations. Refer to Note 2 to the Condensed Consolidated Financial Statements for more details. The MD&A has been adjusted to exclude discontinued operations unless otherwise noted.

Primary Lines of Business

Dealer Financial Services, which includes our Automotive Finance and Insurance operations, and Mortgage are our primary lines of business. The following table summarizes the operating results excluding discontinued operations of each line of business. Operating results for each of the lines of business are more fully described in the MD&A sections that follow.

(\$ in millions)	Three months ended March 31,

Corporate and Other	(138) (263) 48
Total	\$292	\$(63) n/m

n/m = not meaningful

Our Dealer Financial Services operations offer a wide range of financial services and products to retail automotive consumers and automotive dealerships. Our Dealer Financial Services consist of two separate reportable segments — Automotive Finance and Insurance operations. Our automotive finance services include providing retail installment

sales financing, loans, and leases, offering term loans to dealers, financing dealer floorplans and other lines of credit to dealers, fleet financing, and vehicle remarketing services.

Our Insurance operations offer both consumer finance protection and insurance products sold primarily through the automotive dealer channel, and commercial insurance products sold to dealers. As part of our focus on offering dealers a broad range of consumer finance and insurance products, we provide vehicle service contracts, maintenance coverage, and Guaranteed Automobile Protection (GAP) products. We also underwrite selected commercial insurance coverage, which primarily insures dealers' vehicle inventories.

Our ongoing Mortgage operations include the management of our held-for-investment mortgage portfolio.

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

Corporate and Other primarily consists of our Commercial Finance Group, centralized corporate treasury activities, such as management of the cash and corporate investment securities portfolios, short- and long-term debt, retail and brokered deposit liabilities, derivative instruments, the amortization of the discount associated with new debt issuances and bond exchanges, and the residual impacts of our corporate funds-transfer pricing (FTP) and treasury asset liability management (ALM) activities. Corporate and Other also includes certain equity investments, overhead that was previously allocated to operations that have since been sold or classified as discontinued operations, and reclassifications and eliminations between the reportable operating segments. Our Commercial Finance Group provides senior secured commercial-lending products to primarily U.S.-based middle market companies. Effective May 1, 2014, our Commercial Finance Group, was renamed Ally Corporate Finance, and was aligned under Ally Bank, allowing this business to have a more competitive source of funding.

Income tax expense (benefit) from continuing operations	94	(123)) (176)
Net income from continuing operations	\$198	\$60	n/m

n/m = not meaningful

We earned net income from continuing operations of \$198 million for the three months ended March 31, 2014, compared to \$60 million for the three months ended March 31, 2013. Net income from continuing operations for the three months ended March 31, 2014 was favorably impacted by lower funding costs resulting from the maturity and repayment of higher-cost debt, and lower original issue discount (OID) amortization expense related to bond maturities and normal monthly amortization. Additional favorability was due to our Mortgage operations, as results for the three months ended March 31, 2013 were unfavorably impacted by the valuation of our mortgage servicing rights (MSRs) portfolio, which was subsequently sold during the second quarter of 2013. These items were partially offset by higher depreciation expense related to higher lease asset balances as a result of strong lease origination volume.

Total financing revenue and other interest income increased \$119 million for the three months ended March 31, 2014, compared to the same period in 2013. The increase resulted primarily from an increase in operating lease revenue for our Automotive Finance operations driven primarily by higher lease asset balances as a result of strong origination volume. Additionally, we continued to originate volume across a broad credit spectrum, resulting in margin expansion. This increase was partially offset by lower mortgage loan production as a result of the wind-down of our

consumer held-for-sale portfolio and runoff of our held-for-investment portfolio.

Interest expense decreased 19% for the three months ended March 31, 2014, compared to the same period in 2013, primarily due to lower funding costs as a result of continued deposit growth and the refinancing of higher-cost legacy debt, and a decrease in OID amortization expense.

Depreciation expense on operating lease assets increased 25% for the three months ended March 31, 2014, compared to the same period in 2013, primarily due to higher lease asset balances as a result of strong lease origination volume, partially offset by higher lease remarketing gains.

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

We earned net servicing income of \$9 million for the three months ended March 31, 2014, compared to net servicing loss of \$119 million for the same period in 2013. The increase was primarily due to the completed sales of our agency MSR portfolio to Ocwen Financial Corp. (Ocwen) and Quicken Loans Inc. (Quicken) in the second quarter of 2013. Gain on mortgage and automotive loans decreased \$38 million for the three months ended March 31, 2014, compared to the same period in 2013. The decrease was primarily related to our decision to cease mortgage-lending production through our direct lending channel, and margins associated with government-sponsored refinancing programs. Furthermore, while we continue to evaluate opportunistic use of whole-loan sales as a source of funding in our Automotive Finance operations, we have not executed any whole-loan sales during the three months ended March 31, 2014, and have primarily focused on securitization and deposit-based funding sources.

We incurred a loss on extinguishment of debt of \$39 million for the three months ended March 31, 2014, compared to no such activity for the same period in 2013. This increase was due to the accelerated recognition of issuance expenses related to calls of redeemable debt during the three months ended March 31, 2014.

Other income, net of losses, decreased 57% for the three months ended March 31, 2014, compared to the same period in 2013. The decrease was primarily due to lower fee income and net origination revenue related to our exit from consumer mortgage-lending production associated with government-sponsored refinancing programs.

The provision for loan losses was \$137 million for the three months ended March 31, 2014, compared to \$131 million for the same period in 2013. The increase was primarily due to the continued execution of our underwriting strategy to originate consumer automotive assets across a broad credit spectrum, and growth in our consumer automotive portfolio. The increase was partially offset by a decrease in our Mortgage operations due to the continued runoff of legacy mortgage assets.

Total noninterest expense decreased 26% for the three months ended March 31, 2014, compared to the same period in 2013. The decrease was primarily due to our exit of all non-strategic mortgage-related activities and included lower broker fees from consumer mortgage-lending production associated with government-sponsored refinancing programs, lower representation and warranty expense, and lower insurance losses and loss adjustment expenses primarily resulting from lower weather-related losses, as well as lower non-weather losses driven by the wind-down of the Canadian personal lines portfolio.

We recognized total income tax expense from continuing operations of \$94 million for the three months ended March 31, 2014, compared to income tax benefit of \$123 million for the same period in 2013. The increase in income tax expense was driven by tax expense attributable to higher pretax earnings and certain tax benefits recorded during the three months ended March 31, 2013 that did not recur during the three months ended March 31, 2014 related to the 2013 retroactive reinstatement of the active financing exception by the American Taxpayer Relief Act of 2012 and from the 2013 release of valuation allowance related to the measurement of foreign tax credit carryforwards anticipated to be utilized in the future.

In calculating the continuing operations provision for income taxes, we apply an estimated annual effective tax rate to year-to-date ordinary income on an interim basis. Refer to Note 1 to the Condensed Consolidated Financial Statements for further details.

Commercial	264	281	(6)
Operating leases	870	734	19
Other interest income	3	7	(57)
Total financing revenue and other interest income	1,876	1,751	7
Interest expense	514	543	5
Depreciation expense on operating lease assets	542	435	(25)
Net financing revenue	820	773	6
Other revenue			
Servicing fees	9	19	(53)
Other income	55	63	(13)
Total other revenue	64	82	(22)
Total net revenue	884	855	3
Provision for loan losses	159	112	(42)
Noninterest expense			
Compensation and benefits expense	123	113	(9)
Other operating expenses	263	287	8
Total noninterest expense	386	400	4
Income from continuing operations before income tax expense (benefit)	\$339	\$343	(1)
Total assets	\$109,307	\$118,882	(8)

Our Automotive Finance operations earned income from continuing operations before income tax expense of \$339 million for the three months ended March 31, 2014, compared to \$343 million for the three months ended March 31, 2013. Results for the three months ended March 31, 2014 were unfavorably impacted by lower commercial revenue, higher depreciation expense on our growing operating lease portfolio, and higher provision for loan losses due to the continued execution of our underwriting strategy to originate consumer automotive assets across a broad credit spectrum. These items were mostly offset by higher operating lease revenue driven by growth in the operating lease portfolio.

Consumer financing revenue increased \$10 million for the three months ended March 31, 2014, compared to the same period in 2013, due to continued growth in the used vehicle portfolio; however, our GM and Chrysler penetration levels for new retail automotive loans were lower than those in 2013, and we continue to see lower yields as a result of the competitive market environment for automotive financing.

Commercial financing revenue decreased 6% for the three months ended March 31, 2014, compared to the same period in 2013, primarily due to lower yields as a result of increased competition in the wholesale marketplace.

Operating lease revenue increased 19% for the three months ended March 31, 2014, compared to the same period in 2013, primarily due to higher lease asset balances as a result of strong origination volume.

Depreciation expense on operating lease assets increased 25% for the three months ended March 31, 2014, compared to the same period in 2013, primarily due to higher lease asset balances as a result of strong lease origination volume, partially offset by higher lease remarketing gains.

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

Servicing fee income decreased \$10 million for the three months ended March 31, 2014, compared to the same period in 2013, due to lower levels of off-balance sheet retail serviced assets.

Other income decreased \$8 million for the three months ended March 31, 2014, compared to the same period in 2013.

The decrease was primarily due to a one-time fee earned from a vendor during the three months ended March 31, 2013 that did not occur during the three months ended March 31, 2014, partially offset by an increase in remarketing fee income.

The provision for loan losses was \$159 million for the three months ended March 31, 2014, compared to \$112 million for the same period in 2013. The increase was primarily due to the continued execution of our underwriting strategy to originate consumer automotive assets across a broad credit spectrum, and growth in our consumer automotive portfolio.

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

Automotive Financing Volume

Consumer Automotive Financing Volume

The following table summarizes our new and used vehicle consumer financing volume, including lease, and our share of consumer sales in the United States.

	Consumer automotive financing volume		% Share of manufacturer consumer sales	
	2014	2013	2014	2013
Three months ended March 31, (units in thousands)				
GM new vehicles	144	151	28	31
Chrysler new vehicles	32	71	8	24
Other non-GM and non-Chrysler new vehicles	23	19		
Used vehicles	142	126		
Total consumer automotive financing volume	341	367		

Consumer automotive financing volume decreased during the three months ended March 31, 2014, compared to the same period in 2013, primarily due to a decrease in Chrysler originations as a result of the expiration of our operating agreement on April 30, 2013. The decrease was partially offset by an increase in used vehicle volume and non-GM and non-Chrysler vehicle originations, as well as an increase in GM lease volume.

The following table presents the total U.S. consumer origination dollars and percentage mix by product type.

	Consumer automotive financing originations		% Share of Ally originations	
	2014	2013	2014	2013
Three months ended March 31, (\$ in millions)				
GM new vehicles				
New retail standard	\$1,528	\$1,496	17	15
New retail subvented	860	1,291	9	13
Lease	2,332	1,883	25	19
Total GM new vehicle originations	4,720	4,670		
Chrysler new vehicles				
New retail standard	708	1,046	8	11
New retail subvented	—	231	—	3
Lease	257	789	3	8
Total Chrysler new vehicle originations	965	2,066		
Other new retail vehicles	632	508	7	5
Other lease	82	38	1	1
Used vehicles	2,793	2,450	30	25
Total consumer automotive financing originations	\$9,192	\$9,732		

During the three months ended March 31, 2014, total GM new vehicle originations increased, compared to the same period in 2013, primarily due to strong lease volume, partially offset by lower new retail subvented volume. Chrysler new retail volume decreased primarily as a result of lower retail penetration after the expiration of our operating agreement on April 30, 2013. Other new retail and used vehicle originations were higher due to the continued strategic focus within the non-GM and non-Chrysler market.

For discussion of manufacturing marketing incentives, refer to our Annual Report on Form 10-K for the year ended December 31, 2013, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations — Automotive Finance Operations.

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

Commercial Wholesale Financing Volume

The following table summarizes the average balances of our commercial wholesale floorplan finance receivables of new and used vehicles and share of dealer inventory in the United States.

	Average balance		% Share of manufacturer franchise dealer inventory	
	2014	2013	2014	2013
Three months ended March 31, (\$ in millions)				
GM new vehicles (a)	\$16,716	\$16,291	64	69
Chrysler new vehicles (a)	8,015	7,211	46	54
Other non-GM and non-Chrysler new vehicles	3,077	2,541		
Used vehicles	2,978	3,052		
Total commercial wholesale finance receivables	\$30,786	\$29,095		

(a) Share of dealer inventory based on a 4-point average of dealer inventory (excludes in-transit units).

Commercial wholesale financing average volume increased during the three months ended March 31, 2014, compared to the same period in 2013, primarily due to growing dealer inventories required to support increasing automotive industry sales. Wholesale penetration with GM and Chrysler decreased during the three months ended March 31, 2014, compared to the same period in 2013, as a result of increased competition in the wholesale marketplace.

Insurance Operations

Results of Operations

The following table summarizes the operating results of our Insurance operations excluding discontinued operations for the periods shown. The amounts presented are before the elimination of balances and transactions with our other reportable segments.

(\$ in millions)	Three months ended March 31,		
	2014	2013	Favorable/ (unfavorable) % change
Insurance premiums and other income			
Insurance premiums and service revenue earned	\$241	\$259	(7)
Investment income	43	58	(26)
Other income	3	3	—
Total insurance premiums and other income	287	320	(10)
Expense			
Insurance losses and loss adjustment expenses	68	115	41
Acquisition and underwriting expense			
Compensation and benefits expense	16	15	(7)
Insurance commissions expense	90	92	2
Other expenses	39	37	(5)
Total acquisition and underwriting expense	145	144	(1)
Total expense	213	259	18
Income from continuing operations before income tax expense (benefit)	\$74	\$61	21
Total assets (a)	\$7,184	\$8,331	(14)
Insurance premiums and service revenue written	\$244	\$234	4
Combined ratio (b)	87.9	% 99.7	%

(a) The decrease in total assets from 2013 to 2014 was primarily due to the sale of select insurance operations. Refer to Note 2 to the Condensed Consolidated Financial Statements for further detail.

Management uses a combined ratio as a primary measure of underwriting profitability. Underwriting profitability is indicated by a combined ratio under 100% and is calculated as the sum of all incurred losses and expenses (excluding interest and income tax expense) divided by the total of premiums and service revenues earned and other fee income.

Our Insurance operations earned income from continuing operations before income tax expense of \$74 million for the three months ended March 31, 2014, compared to \$61 million for the three months ended March 31, 2013. The increase was primarily due to lower weather-related losses, partially offset by lower realized investment gains and the recognition of other-than-temporary impairment on certain equity securities.

Insurance premiums and service revenue earned was \$241 million for the three months ended March 31, 2014, compared to \$259 million for the same period in 2013. The decrease was primarily due to the wind-down of Canadian personal lines portfolio and slightly lower revenue on U.S. vehicle service products, partially offset by higher earned premium due to higher inventory levels in our wholesale business.

Investment income totaled \$43 million for the three months ended March 31, 2014, compared to \$58 million for the same period in 2013. The decrease was primarily due to lower realized investment gains and the recognition of other-than-temporary impairment on certain equity securities of \$10 million in 2014 as compared to \$8 million in 2013.

Insurance losses and loss adjustment expenses totaled \$68 million for the three months ended March 31, 2014, compared to \$115 million for the same period in 2013. The decrease was primarily due to lower weather-related

losses, as well as lower non-weather losses driven by the wind-down of the Canadian personal lines portfolio and lower losses in line with earned premium. This primarily drove the decrease in the combined ratio to 87.9% for the three months ended March 31, 2014 compared to 99.7% for the same period in 2013.

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

The following table shows premium and service revenue written by insurance product.

(\$ in millions)	Three months ended March 31,	
	2014	2013
Vehicle service contracts		
New retail	\$95	\$98
Used retail	127	125
Reinsurance	(35)	(34)
Total vehicle service contracts	187	189
Wholesale	44	27
Other finance and insurance (a)	13	18
Total	\$244	\$234

(a) Other finance and insurance includes Guaranteed Automobile Protection (GAP) coverage, excess wear and tear, and other ancillary products.

Insurance premiums and service revenue written was \$244 million for the three months ended March 31, 2014 compared to \$234 million for the same period in 2013. Insurance premiums and service revenue written increased due to higher wholesale premium driven by non-renewal of our catastrophic reinsurance policy in 2014. This is partially offset by the newly implemented, automotive manufacturer provided, maintenance and wear coverage for the first twelve months, the discontinuation of the Chrysler GAP products, and increased vehicle service reinsurance participation, which is in line with the market.

Cash and Investments

A significant aspect of our Insurance operations is the investment of proceeds from premiums and other revenue sources. We use these investments to satisfy our obligations related to future claims at the time these claims are settled. Our Insurance operations have an Investment Committee, which develops guidelines and strategies for these investments. The guidelines established by this committee reflect our risk tolerance, liquidity requirements, regulatory requirements, and rating agency considerations, among other factors.

The following table summarizes the composition of the cash and investment portfolio held at fair value by our Insurance operations.

(\$ in millions)	March 31, 2014	December 31, 2013
Cash		
Noninterest-bearing cash	\$166	\$166
Interest-bearing cash	1,013	810
Total cash	1,179	976
Available-for-sale securities		
Debt securities		
U.S. Treasury and federal agencies	379	568
U.S. States and political subdivisions	338	315
Foreign government	279	288

n/m = not meaningful

Our Mortgage operations earned income from continuing operations before income tax expense of \$17 million for the three months ended March 31, 2014, compared to incurring a loss from continuing operations before income tax expense of \$204 million for the three months ended March 31, 2013. Results for the three months ended March 31, 2013 were unfavorably impacted by the valuation of our MSR portfolio and representation and warranty liability, which were subsequently sold and transferred during the second quarter of 2013. Additional favorability during the three months ended March 31, 2014 was the result of lower noninterest expense driven by our exit in 2013 of all non-strategic mortgage-related activities, including consumer mortgage-lending production associated with government-sponsored refinancing programs, our warehouse lending operations, and our agency MSR portfolio. Net financing revenue was \$14 million for the three months ended March 31, 2014, compared to \$34 million for the same period in 2013. The decrease in net financing revenue was primarily due to the wind-down of our consumer held-for-sale portfolio and runoff of our held-for-investment portfolio, partially offset by lower interest expense as a result of lower funding costs.

We earned no net servicing income for the three months ended March 31, 2014, compared to a net servicing loss of \$138 million for the same period in 2013, due to the completed sales of our agency MSR portfolio to Ocwen and Quicken during the second quarter of 2013.

The net gain on mortgage loans decreased \$38 million for the three months ended March 31, 2014, compared to the same period in 2013. The decrease was primarily related to our decision to cease mortgage-lending production

through our direct lending channel, and margins associated with government-sponsored refinancing programs. Other income, net of losses, was \$4 million for the three months ended March 31, 2014, compared to \$81 million for the same period in 2013. The decrease was primarily due to lower fee income and net origination revenue related to our exit from consumer mortgage-lending production associated with government-sponsored refinancing programs. The provision for loan losses decreased \$43 million for the three months ended March 31, 2014, compared to the same period in 2013. The decrease was primarily due to lower reserve requirements as a result of the continued runoff of legacy mortgage assets, lower net charge-offs in 2014, and improvements in home prices.

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

Total noninterest expense decreased \$175 million for the three months ended March 31, 2014, compared to the same period in 2013. The decrease was primarily due to our exit of all non-strategic mortgage-related activities and included lower broker fees from consumer mortgage-lending production associated with government-sponsored refinancing programs, lower compensation and benefits expense driven by the exit of our consumer held-for-sale portfolio strategies, and lower representation and warranty expense.

Corporate and Other

The following table summarizes the activities of Corporate and Other excluding discontinued operations for the periods shown. Corporate and Other primarily consists of our Commercial Finance Group, centralized corporate treasury activities, such as management of the cash and corporate investment securities portfolios, short- and long-term debt, retail and brokered deposit liabilities, derivative instruments, the amortization of the discount associated with new debt issuances and bond exchanges, and the residual impacts of our corporate funds-transfer pricing (FTP) and treasury asset liability management (ALM) activities. Corporate and Other also includes certain equity investments, overhead that was previously allocated to operations that have since been sold or classified as discontinued operations, and reclassifications and eliminations between the reportable operating segments. Our Commercial Finance Group provides senior secured commercial-lending products to primarily U.S.-based middle market companies. Effective May 1, 2014, our Commercial Finance Group, was renamed Ally Corporate Finance, and was aligned under Ally Bank, allowing this business to have a more competitive source of funding.

(\$ in millions)	Three months ended March 31,

(a) Refer to the table that follows for further details on the components of net financing loss.

Includes a reduction of \$185 million for the three months ended March 31, 2014, and \$193 million for the three (b) months ended March 31, 2013, related to the allocation of corporate overhead expenses to other segments. The receiving segments record their allocation of corporate overhead expense within other operating expense.

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

The following table summarizes the components of net financing losses for Corporate and Other.

(\$ in millions)	Three months ended	
	March 31,	
	2014	2013
Original issue discount amortization (a)	\$ (48)	\$ (60)
Net impact of the funds transfer pricing methodology		
Unallocated liquidity costs (b)	(11)	(84)
Funds-transfer pricing / cost of funds mismatch (c)	146	61
Unassigned equity costs (d)	(132)	(109)
Total net impact of the funds transfer pricing methodology	3	(132)
Other (including Commercial Finance Group net financing revenue)	17	13
Total net financing losses for Corporate and Other	\$ (28)	\$ (179)
Outstanding original issue discount balance	\$1,548	\$1,780

(a) Amortization is included as interest on long-term debt in the Condensed Consolidated Statement of Comprehensive Income.

(b) Represents the unallocated cost of funding our cash and investment portfolio.

Represents our methodology to assign funding costs to classes of assets and liabilities based on expected duration and the London Interbank Offered Rate (LIBOR) swap curve plus an assumed credit spread. Matching duration

(c) allocates interest income and interest expense to the reportable segments so the respective reportable segments results are insulated from interest rate risk. The balance above is the resulting benefit (loss) due to holding interest rate risk at Corporate and Other.

(d) Primarily represents the unassigned cost of maintaining required capital positions for certain of our regulated entities, primarily Ally Bank and Ally Insurance.

The following table presents the scheduled remaining amortization of original issue discount at March 31, 2014.

Year ended December 31, (\$ in millions)	2014	2015	2016	2017	2018	2019 and thereafter (a)	Total
Original issue discount							
Outstanding balance	\$1,404	\$1,344	\$1,278	\$1,200	\$1,108	\$—	
Total amortization (b)	144	60	66	78	92	1,108	\$1,548

(a) The maximum annual scheduled amortization for any individual year is \$158 million in 2030.

(b) The amortization is included as interest on long-term debt on the Condensed Consolidated Statement of Comprehensive Income.

Loss from continuing operations before income tax expense for Corporate and Other was \$138 million for the three months ended March 31, 2014, compared to \$263 million for the three months ended March 31, 2013. Corporate and Other's loss from continuing operations before income tax expense was driven by net financing losses, which primarily represents original issue discount amortization expense and the net impact of our FTP methodology, which includes the unallocated cost of maintaining our liquidity and investment portfolios. The improvement in the loss from continuing operations before income tax expense for the three months ended March 31, 2014 was primarily due to decreases in OID amortization expense related to bond maturities and normal monthly amortization, lower funding costs as a result of maturity and repayment of high cost debt, and reduction in FTP revenue allocation. The improvement was partially offset by a loss on extinguishment of debt due to the accelerated recognition of issuance expenses related to calls of redeemable debt during the three months ended March 31, 2014.

Corporate and Other also includes the results of our Commercial Finance Group. Our Commercial Finance Group earned income from continuing operations before income tax expense of \$10 million for the three months ended March 31, 2014, compared to \$18 million for the three months ended March 31, 2013. The decrease was primarily due

to the gain on sale of certain non-core assets during the quarter ended March 31, 2013, partially offset by higher net financing revenue during the current quarter resulting from asset growth in the core business.

Risk Management

Managing the risk/reward trade-off is a fundamental component of operating our businesses. Our risk management program is overseen by the Ally Board of Directors (the Board), various risk committees, the executive leadership team, and our associates. The Board sets the risk appetite across our company while the risk committees, executive leadership team, and our associates identify and monitor potential risks and manage those risks to be within our risk appetite. Ally's primary risks include credit, lease residual, market, operational, insurance/underwriting, and liquidity. For more information on our risk management process, refer to the Risk Management MD&A section of our 2013 Annual Report on Form 10-K.

Loan and Lease Exposure

The following table summarizes the exposures from our loan and lease activities.

(\$ in millions)	March 31, 2014	December 31, 2013
Finance receivables and loans		
Dealer Financial Services	\$ 89,759	\$ 90,220
Mortgage operations	8,138	8,444
Corporate and Other	1,727	1,664

Held-for-sale loans		
Dealer Financial Services	—	—
Mortgage operations	43	16
Corporate and Other	—	19
Total held-for-sale loans	43	35
Total on-balance sheet loans	\$ 99,667	\$ 100,363
Off-balance sheet securitized loans		
Dealer Financial Services	\$ 776	\$ 899
Mortgage operations	—	—
Corporate and Other	—	—
Total off-balance sheet securitized loans	\$ 776	\$ 899
Operating lease assets		
Dealer Financial Services	\$ 18,187	\$ 17,680
Mortgage operations	—	—
Corporate and Other	—	—
Total operating lease assets	\$ 18,187	\$ 17,680
Serviced loans and leases		
Dealer Financial Services	\$ 110,868	\$ 111,589
Mortgage operations (a)	8,069	8,333
Corporate and Other	1,482	1,498
Total serviced loans and leases	\$ 120,419	\$ 121,420

(a) Represents primary mortgage loan-servicing portfolio only, which includes on-balance sheet loans of \$8.1 billion and \$8.3 billion at March 31, 2014, and December 31, 2013, respectively.

The risks inherent in our loan and lease exposures are largely driven by changes in the overall economy, used vehicle and housing price levels, unemployment levels, and their impact to our borrowers. The potential financial statement impact of these exposures varies depending on the accounting classification and future expected disposition strategy. We retain the majority of our automobile loans as they complement our core business model, but we do sell loans from time to time on an opportunistic basis. Historically, we primarily originated mortgage loans with the intent to sell and, as such, retained only a small percentage of the loans that we originated or purchased. Mortgage loans that we did

not intend to retain were sold to investors, primarily through securitizations guaranteed by the Federal National Mortgage Association (Fannie Mae), the Federal Home Loan Mortgage Corporation (Freddie Mac), and the Government National Mortgage Association (Ginnie Mae) (collectively, the Government-sponsored Enterprises, or GSEs). We ultimately manage the associated risks based on the underlying economics of the exposure. During 2013, we sold our mortgage business lending operations to Walter Investment Management Corp., completed the sales of agency MSR to Ocwen and Quicken, and exited the correspondent and direct lending channels. Our ongoing Mortgage operations are limited to the management of our held-for-investment mortgage portfolio.

Credit Risk Management

Credit risk is defined as the potential failure to receive payments when due from an obligor in accordance with contractual obligations. Therefore, credit risk is a major source of potential economic loss to us. Credit risk is monitored by enterprise and line of business committees and the Enterprise Risk Management organization. Together they oversee the credit decisioning and management processes, and monitor credit risk exposures to ensure they are managed in a safe-and-sound manner and are within our risk appetite. In addition, our Loan Review Group provides an independent assessment of the quality of our credit portfolios and credit risk management practices, and directly reports its findings to the Risk and Compliance Committee of the Board on a regular basis.

To mitigate risk, we have implemented specific policies and practices across all lines of business, utilizing both qualitative and quantitative analyses. This reflects our commitment to maintain an independent and ongoing assessment of credit risk and credit quality. Our policies require an objective and timely assessment of the overall quality of the consumer and commercial loan and lease portfolios. This includes the identification of relevant trends that affect the collectability of the portfolios, segments of the portfolios that are potential problem areas, loans and leases with potential credit weaknesses, as well as stress testing and the assessment of the adequacy of internal credit risk policies and procedures to monitor compliance with relevant laws and regulations. In addition, we maintain limits and underwriting policies that reflect our risk appetite.

We manage credit risk based on the risk profile of the borrower, the source of repayment, the underlying collateral, and current market conditions. We monitor the credit risk profile of individual borrowers and the aggregate portfolio of borrowers either within a designated geographic region or a particular product or industry segment. We perform ongoing analyses of the consumer automobile, consumer mortgage, and commercial portfolios using a range of indicators to assess the adequacy of the allowance based on historical and current trends. Refer to Note 6 to the Condensed Consolidated Financial Statements for additional information.

Additionally, we utilize numerous collection strategies to mitigate loss and provide ongoing support to customers in financial distress. For automobile loans, we work with customers when they become delinquent on their monthly payment. In lieu of repossessing their vehicle, we may offer several types of assistance to aid our customers based on their willingness and ability to repay their loan. Loss mitigation may include extension of the loan maturity date and rewriting the loan terms. For mortgage loans, as part of our participation in certain governmental programs, we offer mortgage loan modifications to qualified borrowers. Numerous initiatives are in place to provide support to our mortgage customers in financial distress, including principal forgiveness, maturity extensions, delinquent interest capitalization, and changes to contractual interest rates.

Furthermore, we manage our counterparty credit exposure based on the risk profile of the counterparty. Within our policies, we have established standards and requirements for managing counterparty risk exposures in a safe-and-sound manner. Counterparty credit risk is derived from multiple exposure types, including derivatives, securities trading, securities financing transactions, financial futures, cash balances (e.g., due from depository institutions, restricted accounts, and cash equivalents), and investment in debt securities. For more information on Derivative Counterparty Credit Risk, refer to Note 19 to the Condensed Consolidated Financial Statements.

During the three months ended March 31, 2014, the U.S. economy continued to expand, although the pace of growth likely slowed due to the severe winter weather in much of the country. The labor market recovered further during the period, with nonfarm payrolls increasing and the unemployment rate averaging 6.7%. Within the U.S. automotive market, new vehicle sales were unchanged quarter to quarter at a Seasonally Adjusted Annual Rate of 15.6 million. We continue to be cautious with the economic outlook given heightened geo-political risks and expected higher interest rates as the Federal Open Market Committee targets to end its large scale asset purchases by year end.

On-balance Sheet Portfolio

Our on-balance sheet portfolio includes both finance receivables and loans and held-for-sale loans. At March 31, 2014, this primarily included \$89.8 billion of automobile finance receivables and loans and \$8.1 billion of mortgage finance receivables and loans. Within our on-balance sheet portfolio, we have elected to account for certain mortgage

loans at fair value. The valuation allowance recorded on fair value-elected loans is separate from the allowance for loan losses. Changes in the fair value of loans are classified as gain on mortgage and automotive loans, net, in the Condensed Consolidated Statement of Comprehensive Income.

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

The following table presents our total on-balance sheet consumer and commercial finance receivables and loans reported at carrying value before allowance for loan losses.

(\$ in millions)	Outstanding		Nonperforming (a)		Accruing past due 90 days or more (b)	
	March 31, 2014	December 31, 2013	March 31, 2014	December 31, 2013	March 31, 2014	December 31, 2013
Consumer						
Finance receivables and loans						
Loans at historical cost	\$64,912	\$64,860	\$537	\$521	\$—	\$1
Loans at fair value	1	1	—	—	—	—
Total finance receivables and loans	64,913	64,861	537	521	—	1
Loans held-for-sale	43	16	2	9	2	—
Total consumer loans	64,956	64,877	539	530	2	1
Commercial						
Finance receivables and loans						
Loans at historical cost	34,711	35,467	173	204	—	—
Loans held for sale	—	19	—	—	—	—
Total commercial loans	34,711	35,486	173	204	—	—
Total on-balance sheet loans	\$99,667	\$100,363	\$712	\$734	\$2	\$1

(a) Includes nonaccrual troubled debt restructured loans (TDRs) of \$331 million and \$312 million at March 31, 2014, and December 31, 2013, respectively.

Generally, loans that are 90 days past due and still accruing represent loans with government guarantees. There (b) were no troubled debt restructured loans classified as 90 days past due and still accruing at March 31, 2014 and December 31, 2013.

Total on-balance sheet loans outstanding at March 31, 2014, decreased \$696 million to \$99.7 billion from December 31, 2013, reflecting a decrease of \$775 million in the commercial portfolio and an increase of \$79 million in the consumer portfolio. The decrease in commercial on-balance sheet loans outstanding was primarily driven by increased competition across the automotive lending market as well as the seasonality of dealer inventories. The increase in consumer on-balance sheet loans was primarily driven by automobile originations, which outpaced portfolio runoff.

The total TDRs outstanding at March 31, 2014 increased \$31 million to \$1.3 billion from December 31, 2013, primarily due to our loss mitigation efforts on consumer and commercial loans including continued foreclosure prevention and participation in a variety of government-sponsored refinancing programs. Refer to Note 6 to the Condensed Consolidated Financial Statements for additional information.

Total nonperforming loans at March 31, 2014, decreased \$22 million to \$712 million from December 31, 2013, reflecting a decrease of \$31 million of commercial nonperforming loans and an increase of \$9 million of consumer nonperforming loans. The decrease in total nonperforming loans from December 31, 2013 was driven, in part, by the improved performance of the commercial automobile portfolio. Nonperforming loans include finance receivables and loans on nonaccrual status when the principal or interest has been delinquent for 90 days or when full collection is determined not to be probable. Refer to Note 1 to the Consolidated Financial Statements included in our 2013 Annual Report on Form 10-K for additional information.

Edgar Filing: Ally Financial Inc. - Form 10-Q

The following table includes consumer and commercial net charge-offs from finance receivables and loans at historical cost and related ratios reported at carrying value before allowance for loan losses.

(\$ in millions)	Three months ended March 31,			
	Net charge-offs		Net charge-off ratios (a)	
	2014	2013	2014	2013
Consumer				
Finance receivables and loans at historical cost	\$133	\$114	0.8	% 0.7
Commercial				
Finance receivables and loans at historical cost	—	—	—	—
Total finance receivables and loans at historical cost	\$133	\$114	0.5	% 0.5

(a) Net charge-off ratios are calculated as net charge-offs divided by average outstanding finance receivables and loans excluding loans measured at fair value and loans held-for-sale during the period for each loan category.

Net charge-offs were \$133 million for the three months ended March 31, 2014, compared to \$114 million for the three months ended March 31, 2013. The increase during the period was largely due to the continued execution of our underwriting strategy to originate consumer

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

automotive assets across a broad credit spectrum and the seasoning of the broader portfolio mix. Loans held-for-sale are accounted for at the lower-of-cost or fair value and, therefore, we do not record charge-offs.

The Consumer Credit Portfolio and Commercial Credit Portfolio discussions that follow relate to consumer and commercial finance receivables and loans recorded at historical cost. Finance receivables and loans recorded at historical cost have an associated allowance for loan losses. Finance receivables and loans measured at fair value were excluded from these discussions since those exposures are not accounted for within our allowance for loan losses.

Consumer Credit Portfolio

During the three months ended March 31, 2014, the credit performance of the consumer portfolio remained strong and reflects the continued execution of our underwriting strategy to originate consumer automotive assets across a broad credit spectrum to include used, nonprime, extended term, non-GM, non-Chrysler, and non-subvented. For information on our consumer credit risk practices and policies regarding delinquencies, nonperforming status, and charge-offs, refer to Note 1 to the Consolidated Financial Statements included in our 2013 Annual Report on Form 10-K.

The following table includes consumer finance receivables and loans recorded at historical cost reported at carrying value before allowance for loan losses.

(\$ in millions)	Outstanding		Nonperforming (a)		Accruing past due 90 days or more (b)	
	March 31, 2014	December 31, 2013	March 31, 2014	December 31, 2013	March 31, 2014	December 31, 2013
Consumer automobile (c)	\$56,775	\$56,417	\$329	\$329	\$—	\$—
Consumer mortgage	8,137	8,443	208	192	—	1
Total consumer finance receivables and loans	\$64,912	\$64,860	\$537	\$521	\$—	\$1

(a) Includes nonaccrual troubled debt restructured loans of \$256 million and \$237 million at March 31, 2014, and December 31, 2013, respectively.

(b) There were no troubled debt restructured loans classified as 90 days past due and still accruing at both March 31, 2014, and December 31, 2013.

(c) Includes \$12 million and \$1 million of fair value adjustment for loans in hedge accounting relationships at March 31, 2014 and December 31, 2013, respectively. Refer to Note 19 to the Condensed Consolidated Financial Statements for additional information.

Total consumer outstanding finance receivables and loans increased \$52 million at March 31, 2014 compared with December 31, 2013. This increase was related to our automobile consumer loan originations, which outpaced portfolio runoff. This increase was largely offset by the continued runoff of legacy mortgage assets.

Total consumer nonperforming finance receivables and loans at March 31, 2014 increased \$16 million to \$537 million from December 31, 2013, reflecting an increase of \$16 million of consumer mortgage nonperforming finance receivables and loans. Nonperforming consumer mortgage finance receivables and loans increased primarily due to increased TDRs as we continue foreclosure prevention and loss mitigation procedures. Refer to Note 6 to the Condensed Consolidated Financial Statements for additional information. Nonperforming consumer finance receivables and loans as a percentage of total outstanding consumer finance receivables and loans remained flat at 0.8% at March 31, 2014 and December 31, 2013.

Consumer automotive loans accruing and past due 30 days or more decreased \$421 million to \$904 million at March 31, 2014, compared with December 31, 2013. The decrease is predominantly due to seasonality.

The following table includes consumer net charge-offs from finance receivables and loans at historical cost and related ratios reported at carrying value before allowance for loan losses.

	Three months ended March 31,
Net charge-offs	Net charge-off ratios (a)

Edgar Filing: Ally Financial Inc. - Form 10-Q

(\$ in millions)	2014	2013	2014	2013		
Consumer automobile	\$121	\$93	0.9	% 0.7	%	
Consumer mortgage	12	21	0.6	0.9		
Total consumer finance receivables and loans	\$133	\$114	0.8	% 0.7	%	

(a) Net charge-off ratios are calculated as net charge-offs divided by average outstanding finance receivables and loans excluding loans measured at fair value and loans held-for-sale during the period for each loan category.

Our net charge-offs from total consumer automobile finance receivables and loans were \$121 million for the three months ended March 31, 2014, compared to \$93 million for the three months ended March 31, 2013. The increase was driven primarily by the change in our portfolio mix as we continued the execution of our underwriting strategy to originate consumer automotive assets across a broad credit spectrum and the seasoning of the broader portfolio mix.

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

Our net charge-offs from total consumer mortgage receivables and loans were \$12 million for the three months ended March 31, 2014, compared to \$21 million for the same period in 2013. The decrease was driven by continued runoff of legacy mortgage assets and improvements in home prices.

The following table summarizes the unpaid principal balance of total consumer loan originations for the periods shown. Total consumer loan originations include loans classified as finance receivables and loans and loans held-for-sale during the period.

(\$ in millions)	Three months ended March 31,	
	2014	2013
Consumer automobile	\$6,521	\$7,022
Consumer mortgage	—	6,116
Total consumer loan originations	\$6,521	\$13,138

Total automobile-originated loans decreased \$501 million for the three months ended March 31, 2014, compared to the same period in 2013. The decrease was primarily due to lower new vehicle originations as a result of more competition within the automotive finance market. Total mortgage-originated loans decreased \$6.1 billion for the three months ended March 31, 2014. The decline in loan production was driven by our strategic exit from the direct lending channel and our decision announced on April 17, 2013 to exit the correspondent lending channel and cease production of any new jumbo mortgage loans at that time.

Consumer loan originations retained on-balance sheet as held-for-investment were \$6.5 billion for the three months ended March 31, 2014, compared to \$7.5 billion for the three months ended March 31, 2013. The decrease was primarily due to lower new vehicle originations as a result of more competition within the automotive finance market. The following table shows the percentage of total consumer finance receivables and loans recorded at historical cost reported at carrying value before allowance for loan losses by state concentration. Total automobile loans were \$56.8 billion and \$56.4 billion at March 31, 2014, and December 31, 2013, respectively. Total mortgage and home equity loans were \$8.1 billion and \$8.4 billion at March 31, 2014 and December 31, 2013, respectively.

	March 31, 2014 (a)		December 31, 2013	
	Automobile	1st Mortgage and home equity	Automobile	1st Mortgage and home equity
Texas	13.2	% 5.7	% 13.2	% 5.8
California	5.8	29.6	5.8	29.5
Florida	7.1	3.6	7.0	3.6
Pennsylvania	5.3	1.6	5.3	1.7
Illinois	4.4	4.4	4.4	4.4
Michigan	4.3	3.9	4.4	3.9
New York	4.2	1.9	4.3	1.9
Georgia	4.0	2.1	4.0	2.1
Ohio	4.0	0.7	4.0	0.7
North Carolina	3.4	1.9	3.4	1.9
Other United States	44.3	44.6	44.2	44.5
Total consumer loans	100.0	% 100.0	% 100.0	% 100.0

(a) Presentation is in descending order as a percentage of total consumer finance receivables and loans at March 31, 2014.

We monitor our consumer loan portfolio for concentration risk across the geographies in which we lend. The highest concentrations of loans in the United States are in Texas and California, which represented an aggregate of 21.1% of our total outstanding consumer finance receivables and loans at both March 31, 2014, and December 31, 2013.

Concentrations in our Mortgage operations are closely monitored given the volatility of the housing markets. Our consumer mortgage loan concentrations in California, Florida, and Michigan receive particular attention as the real estate value depreciation in these states has been amongst the most severe.

Reposessed and Foreclosed Assets

We classify an asset as reposessed or foreclosed (included in Other Assets on the Condensed Consolidated Balance Sheet) when physical possession of the collateral is taken. We dispose of the acquired collateral in a timely fashion in accordance with regulatory

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

requirements. For more information on repossessed and foreclosed assets, refer to Note 1 to the Consolidated Financial Statements included in our 2013 Annual Report on Form 10-K.

Repossessed assets in our Automotive Finance operations at March 31, 2014 increased \$4 million to \$105 million from December 31, 2013. Foreclosed mortgage assets at March 31, 2014 increased \$1 million to \$11 million from December 31, 2013.

Commercial Credit Portfolio

During the three months ended March 31, 2014, the credit performance of the commercial portfolio remained strong as nonperforming finance receivables and loans improved and no net charge-offs were realized for the period. For information on our commercial credit risk practices and policies regarding delinquencies, nonperforming status, and charge-offs, refer to Note 1 to the Consolidated Financial Statements included in our 2013 Annual Report on Form 10-K.

The following table includes total commercial finance receivables and loans reported at carrying value before allowance for loan losses.

(\$ in millions)	Outstanding		Nonperforming (a)		Accruing past due 90 days or more (b)	
	March 31, 2014	December 31, 2013	March 31, 2014	December 31, 2013	March 31, 2014	December 31, 2013
Commercial and industrial						
Automobile	\$30,062	\$30,948	\$92	\$116	\$—	\$—
Other (c)	1,727	1,664	73	74	—	—
Commercial real estate — Automobile	2,922	2,855	8	14	—	—
Total commercial finance receivables and loans	\$34,711	\$35,467	\$173	\$204	\$—	\$—

(a) Includes nonaccrual troubled debt restructured loans of \$75 million at both March 31, 2014, and December 31, 2013.

(b) There were no troubled debt restructured loans classified as 90 days past due and still accruing at March 31, 2014 and December 31, 2013.

(c) Other commercial primarily includes senior secured commercial lending.

Total commercial finance receivables and loans outstanding decreased \$756 million to \$34.7 billion at March 31, 2014, from December 31, 2013. The commercial and industrial finance receivables and loans outstanding decreased \$823 million primarily due to increased competition across the automotive lending market and the seasonality of dealer inventories.

Total commercial nonperforming finance receivables and loans were \$173 million at March 31, 2014, a decrease of \$31 million when compared to December 31, 2013. The decrease was primarily due to our continued efforts to resolve nonperforming loans. Total nonperforming commercial finance receivables and loans as a percentage of outstanding commercial finance receivables and loans decreased to 0.5% as of March 31, 2014, from 0.6% as of December 31, 2013.

The following table includes total commercial net charge-offs from finance receivables and loans at historical cost and related ratios reported at carrying value before allowance for loan losses.

(\$ in millions)	Three months ended March 31,			
	Net charge-offs (recoveries)		Net charge-off ratios (a)	
	2014	2013	2014	2013
Commercial and industrial				

Edgar Filing: Ally Financial Inc. - Form 10-Q

Automobile	\$—	\$—	—	% —	%
Other	—	(1) —	(0.2)
Commercial real estate — Automobile	—	1	—	0.1	
Total commercial finance receivables and loans	\$—	\$—	—	% —	%

(a) Net charge-off ratios are calculated as net charge-offs divided by average outstanding finance receivables and loans excluding loans measured at fair value and loans held-for-sale during the period for each loan category.

Our net charge-offs from commercial finance receivables and loans resulted in no net charge-offs for the three months ended March 31, 2014, and the three months ended March 31, 2013.

Commercial Real Estate

The commercial real estate portfolio consists of finance receivables and loans issued primarily to automotive dealers. Commercial real estate finance receivables and loans were \$2.9 billion at both March 31, 2014 and December 31, 2013.

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

The following table presents the percentage of total commercial real estate finance receivables and loans by geographic region. These finance receivables and loans are reported at carrying value before allowance for loan losses.

	March 31, 2014		December 31, 2013	
Geographic region				
Texas	13.9	%	13.2	%
Florida	12.5		12.6	
Michigan	11.5		11.6	
California	9.2		9.2	
New York	4.2		4.5	
North Carolina	4.1		4.1	
Virginia	3.8		3.8	
Pennsylvania	3.2		3.3	
Georgia	3.0		3.1	
Illinois	2.6		2.5	
Other United States	32.0		32.1	
Total commercial real estate finance receivables and loans	100.0	%	100.0	%

Commercial Criticized Exposure

Finance receivables and loans classified as special mention, substandard, or doubtful are deemed criticized. These classifications are based on regulatory definitions and generally represent finance receivables and loans within our portfolio that have a higher default risk or have already defaulted. These finance receivables and loans require additional monitoring and review including specific actions to mitigate our potential economic loss.

The following table presents the percentage of total commercial criticized finance receivables and loans by industry concentrations. These finance receivables and loans within our automobile and commercial finance portfolios are reported at carrying value before allowance for loan losses.

	March 31, 2014		December 31, 2013	
Industry				
Automotive	90.5	%	91.4	%
Services	2.3		2.5	
Health/Medical	1.8		1.6	
Other	5.4		4.5	
Total commercial criticized finance receivables and loans	100.0	%	100.0	%

Total criticized exposures decreased \$140 million from December 31, 2013 to \$2.0 billion at March 31, 2014, primarily due to our continued efforts to resolve criticized loans.

Allowance for loan losses to total nonperforming finance receivables and loans at March 31, 2013 (a)	225.1	% 112.2	% 157.1	% 54.5	% 127.6	%
Ratio of allowance for loan losses to annualized net charge-offs at March 31,	1.6	5.4	2.3	—	2.6	

2013

(a) Coverage percentages are based on the allowance for loan losses related to finance receivables and loans excluding those loans held at fair value as a percentage of the unpaid principal balance, net of premiums and discounts.

The allowance for consumer loan losses at March 31, 2014, declined \$2 million compared to March 31, 2013. The decrease was primarily due to continued runoff of legacy mortgage assets. The decrease was largely offset by increases in the allowance for consumer automotive assets due to the continued execution of our underwriting strategy to originate consumer automotive assets across a broad credit spectrum, and growth in our automotive consumer portfolio.

The allowance for commercial loan losses declined \$3 million at March 31, 2014, compared to March 31, 2013, primarily related to improved portfolio performance.

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

Allowance for Loan Losses by Type

The following table summarizes the allocation of the allowance for loan losses by product type.

March 31, (\$ in millions)	2014			2013		
	Allowance for loan losses	Allowance as a % of loans outstanding	Allowance as a % of allowance for loan losses	Allowance for loan losses	Allowance as a % of loans outstanding	Allowance as a % of allowance for loan losses
Consumer						
Consumer automobile	\$715	1.3	% 60.0	% \$599	1.1	% 50.0
Consumer mortgage	333	4.1	27.9	451	4.7	37.7
Total consumer loans	1,048	1.6	87.9	1,050	1.6	87.7
Commercial						
Commercial and industrial						
Automobile	64	0.2	5.4	61	0.2	5.1
Other	50	2.9	4.2	48	1.9	4.0
Commercial real estate — Automobile	30	1.0	2.5	38	1.5	3.2
Total commercial loans	144	0.4	12.1	147	0.4	12.3
Total allowance for loan losses	\$1,192	1.2	% 100.0	% \$1,197	1.2	% 100.0

Provision for Loan Losses

The following table summarizes the provision for loan losses by product type.

(\$ in millions)	Three months ended March 31,	
	2014	2013
Consumer		
Consumer automobile	\$163	\$107
Consumer mortgage	(23)) 20
Total consumer loans	140	127
Commercial		
Commercial and industrial		
Automobile	(4)) 5
Other	1	(1)
Commercial real estate — Automobile	—	—
Total commercial loans	(3)) 4
Total provision for loan losses	\$137	\$131

The provision for consumer loan losses increased \$13 million for the three months ended March 31, 2014, compared to the same period in 2013. The increase was primarily due to the continued execution of our underwriting strategy to originate consumer automotive assets across a broad credit spectrum, and growth in our automotive consumer portfolio. This increase was partially offset by a decrease in our Mortgage operations due to the continued runoff of legacy mortgage assets.

Provision for commercial loan losses was a credit of \$3 million for the three months ended March 31, 2014, compared to \$4 million for the same period in 2013. The decrease was largely driven by the improved portfolio performance.

Lease Residual Risk Management

We are exposed to residual risk on vehicles in the consumer lease portfolio. This lease residual risk represents the possibility that the actual proceeds realized upon the sale of returned vehicles will be lower than the projection of these values used in establishing the pricing at lease inception. The factors influencing lease residual risk most significantly include used vehicle market, residual value projections, remarketing abilities, and manufacturer vehicle and marketing programs. For additional information on our valuation of automobile lease assets and residuals, refer to the Critical Accounting Estimates — Valuation of Automobile Lease Assets and Residuals section within the MD&A included in our 2013 Annual Report on Form 10-K.

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

The following table summarizes the volume of Ally lease terminations in the United States over recent periods. It also summarizes the average sales proceeds on 24-, 36-, and 48-month scheduled lease terminations for those same periods.

	Three months ended March 31,	
	2014	2013
Off-lease vehicles remarketed (in units)	61,001	31,924
Average sales proceeds on scheduled lease terminations (\$ per unit)		
24-month	\$19,158	\$21,793
36-month (a)	19,165	16,302
48-month	16,417	16,084

(a) The majority of our outstanding consumer lease portfolio is comprised of 36-month leases.

The number of off-lease vehicles remarketed during the three months ended March 31, 2014 nearly doubled, reflecting growth in lease originations from 2010-2012 after curtailing lease originations in 2008-2009 as a result of the economic downturn. For more information on our Investment in Operating Leases, refer to Note 7 to the Condensed Consolidated Financial Statements, and Note 1 to the Consolidated Financial Statements in our 2013 Annual Report on Form 10-K.

Market Risk

Our automotive financing, mortgage, and insurance activities give rise to market risk representing the potential loss in the fair value of assets or liabilities and earnings caused by movements in market variables, such as interest rates, foreign-exchange rates, equity prices, market perceptions of credit risk, and other market fluctuations that affect the value of securities, assets held-for-sale, and operating leases. We are exposed to interest rate risk arising from changes in interest rates related to financing, investing, and cash management activities. More specifically, we have entered into contracts to provide financing and to retain various assets related to securitization activities all of which are exposed in varying degrees to changes in value due to movements in interest rates. Interest rate risk arises from the mismatch between assets and the related liabilities used for funding. We enter into various financial instruments, including derivatives, to maintain the desired level of exposure to the risk of interest rate and other fluctuations. Refer to Note 19 to the Condensed Consolidated Financial Statements for further information.

We are also exposed to some foreign-currency risk arising from foreign-currency denominated assets and liabilities. We enter into hedges to mitigate foreign exchange risk.

We also have exposure to equity price risk, primarily in our Insurance operations, which invests in equity securities that are subject to price risk influenced by capital market movements. We enter into equity options to economically hedge our exposure to the equity markets.

Although the diversity of our activities from our complementary lines of business may partially mitigate market risk, we also actively manage this risk. We maintain risk management control systems to monitor interest rates, foreign-currency exchange rates, equity price risks, and any of their related hedge positions. Positions are monitored using a variety of analytical techniques including market value, sensitivity analysis, and value at risk models.

Ally Financial Inc. • Form 10-Q

Liquidity Management, Funding, and Regulatory Capital

Overview

The purpose of liquidity management is to ensure our ability to meet loan and lease demand, debt maturities, deposit withdrawals, and other cash commitments under both normal operating conditions as well as periods of economic or financial stress. Our primary objective is to maintain cost-effective, stable and diverse sources of funding capable of sustaining the organization throughout all market cycles. Sources of funding include both retail and brokered deposits and secured and unsecured market-based funding across various maturity, interest rate, and investor profiles.

Additional liquidity is available through a pool of unencumbered highly liquid securities, borrowing facilities, repurchase agreements, as well as funding programs supported by the Federal Reserve and the Federal Home Loan Bank of Pittsburgh (FHLB).

We define liquidity risk as the risk that an institution's financial condition or overall safety and soundness is adversely affected by an inability, or perceived inability, to meet its financial obligations, and to withstand unforeseen liquidity stress events. Liquidity risk can arise from a variety of institution specific or market-related events that could have a negative impact on cash flows available to the organization. Effective management of liquidity risk helps ensure an organization's preparedness to meet uncertain cash flow obligations caused by unanticipated events. The ability of financial institutions to manage liquidity needs and contingent funding exposures has proven essential to their solvency.

The Asset-Liability Committee (ALCO) is chaired by the Corporate Treasurer and is responsible for monitoring Ally's liquidity position, funding strategies and plans, contingency funding plans, and counterparty credit exposure arising from financial transactions. Corporate Treasury is responsible for managing the liquidity positions of Ally within prudent operating guidelines and targets approved by ALCO and the Risk and Compliance Committee of the Ally Financial Board of Directors. We manage liquidity risk at the parent company, Ally Bank, and consolidated levels. The parent company and Ally Bank prepare periodic forecasts depicting anticipated funding needs and sources of funds with oversight and monitoring by the Liquidity Risk group within Corporate Treasury. Corporate Treasury executes our funding strategies and manages liquidity under baseline economic projections as well as more severe economic stressed environments.

We use multiple measures to frame the level of liquidity risk, manage the liquidity position, or identify related trends such as early warning indicators. These measures include coverage ratios that measure the sufficiency of the liquidity portfolio and stability ratios that measure longer-term structural liquidity. In addition, we have established internal management routines designed to review all aspects of liquidity and funding plans, evaluate the adequacy of liquidity buffers, review stress testing results, and assist senior management in the execution of its structured strategy and risk management accountabilities.

We maintain available liquidity in the form of cash, unencumbered highly liquid securities, and available credit facility capacity that, taken together, allows us to operate and to meet our contractual and contingent obligations in the event of market-wide disruptions and enterprise-specific events. We maintain available liquidity at various entities and consider regulatory restrictions and tax implications that may limit our ability to transfer funds across entities. At March 31, 2014, we maintained \$10.2 billion of total available parent company liquidity and \$8.9 billion of total available liquidity at Ally Bank. Parent company liquidity is defined as our consolidated operations less Ally Bank and the regulated subsidiaries of Ally Insurance's holding company. Absolute levels of liquidity decreased as a result of liability and equity management transactions. To optimize cash and secured facility capacity between entities, the parent company lends cash to Ally Bank on occasion under an intercompany loan agreement. At March 31, 2014, \$0.5 billion was outstanding under the intercompany loan agreement. Amounts outstanding are repayable to the parent company upon demand, subject to five days notice. As a result, this amount is included in the parent company available liquidity and excluded from the available liquidity at Ally Bank.

Funding Strategy

Liquidity and ongoing profitability are largely dependent on our timely and cost-effective access to retail deposits and funding in different segments of the capital markets. Our funding strategy largely focuses on the development of diversified funding sources across a broad investor base to meet all our liquidity needs throughout different market cycles, including periods of financial distress. These funding sources include capital market based unsecured debt, unsecured retail term notes, public and private asset-backed securitizations, committed credit facilities, brokered deposits, and retail deposits. We also supplement these sources with a modest amount of short-term borrowings, including Demand Notes, bank loans, and repurchase agreements. The diversity of our funding sources enhances funding flexibility, limits dependence on any one source, and results in a more cost-effective funding strategy over the long term. We evaluate funding markets on an ongoing basis to achieve an appropriate balance of unsecured and secured funding sources and the maturity profiles of both. In addition, we further distinguish our funding strategy between Ally Bank funding and parent company (nonbank) funding.

We diversify Ally Bank's overall funding in order to reduce reliance on any one source of funding and to achieve a well-balanced funding portfolio across a spectrum of risk, duration, and cost of funds characteristics. Over the past few years, we have been focused on optimizing our funding sources, in particular at Ally Bank by growing retail deposits, expanding public and private securitization programs, maintaining a prudent maturity profile of our brokered deposit portfolio while not exceeding a \$10.0 billion portfolio, maintaining repurchase agreements, and continuing to access funds from the Federal Home Loan Banks.

Since 2009, we have been directing certain assets originated in the United States to Ally Bank in order to reduce and minimize our parent company exposures and funding requirements and to utilize our growing consumer deposit-taking capabilities. This has allowed us to use bank funding for a wider array of our automotive finance assets and to provide a sustainable long-term funding channel for the business, while also improving the cost of funds for the enterprise.

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

Ally Bank

Ally Bank raises deposits directly from customers through the direct banking channel via the internet, over the telephone, and through mobile applications. These deposits provide our Automotive Finance and Mortgage operations with a stable and low-cost funding source. At March 31, 2014, Ally Bank had \$54.9 billion of total external deposits, including \$45.2 billion of retail deposits.

At March 31, 2014, Ally Bank maintained cash liquidity of \$2.5 billion and unencumbered highly liquid U.S. federal government and U.S. agency securities of \$5.9 billion. In addition, at March 31, 2014, Ally Bank had unused capacity in committed secured funding facilities of \$1.0 billion. Our ability to access unused capacity depends on having eligible assets to collateralize the incremental funding and, in some instances, the execution of interest rate hedges. To optimize cash and secured facility capacity between entities, the parent company lends cash to Ally Bank on occasion under an intercompany loan agreement. Amounts outstanding on this loan are repayable to the parent company upon demand, subject to five days notice. Ally Bank has total available liquidity of \$8.9 billion at March 31, 2014, excluding the intercompany loan of \$0.5 billion.

Maximizing bank funding continues to be a key part of our long-term liquidity strategy. We have made significant progress in migrating asset originations to Ally Bank and growing our retail deposit base since becoming a bank holding company in December 2008. Retail deposit growth is key to further reducing our cost of funds and decreasing our reliance on the capital markets. We believe deposits provide a stable, low-cost source of funds that are less sensitive to interest rate changes, market volatility, or changes in our credit ratings when compared to other funding sources. We have continued to expand our deposit gathering efforts through our direct and indirect marketing channels. Current retail product offerings consist of a variety of products including certificates of deposits (CDs), savings accounts, money market accounts, IRA deposit products, as well as an interest checking product. In addition, we utilize brokered deposits, which are obtained through third-party intermediaries. In the first three months of 2014 the deposit base at Ally Bank grew \$2.0 billion, ending the quarter at \$54.9 billion from \$52.9 billion at December 31, 2013. The growth in deposits has been attributable to our retail deposit portfolio, particularly within our savings and money market accounts, and our CDs. Strong retention rates continue to materially contribute to our growth in retail deposits. In the first quarter of 2014 we retained 93% of maturing CD balances up for renewal in the same period. Refer to Note 11 to the Condensed Consolidated Financial Statements for a summary of deposit funding by type. The following table shows Ally Bank's number of accounts and deposit balances by type as of the end of each quarter since 2013.

(\$ in millions)	1st Quarter 2014	4th Quarter 2013	3rd Quarter 2013	2nd Quarter 2013	1st Quarter 2013
Number of retail accounts	1,589,441	1,509,354	1,451,026	1,389,577	1,334,483
Deposits					
Retail	\$45,193	\$43,172	\$41,691	\$39,859	\$38,770
Brokered	9,683	9,678	9,724	9,552	9,877
Other	70	60	66	72	844
Total deposits	\$54,946	\$52,910	\$51,481	\$49,483	\$49,491

In addition to building a larger deposit base, we continue to remain active in the securitization markets to finance our Ally Bank automotive loan portfolios. During the first quarter of 2014, Ally Bank completed four term securitization transaction backed by dealer floorplan automotive loans and lease notes raising \$3.5 billion. Securitization has proven to be a reliable and cost-effective funding source. Additionally, for retail automotive loans and lease notes, the term structure of the transaction locks in funding for a specified pool of loans and leases for the life of the underlying asset creating an effective tool for managing interest rate and liquidity risk. We manage the execution risk arising from secured funding by maintaining a diverse investor base and maintaining capacity in our committed secured facilities. At March 31, 2014, Ally Bank had exclusive access to a \$3.5 billion syndicated facility that can fund automotive retail and dealer floorplan loans, as well as leases. In March 2014, this facility was increased and renewed by a syndicate of

nineteen lenders and extended until June 2015. At March 31, 2014, the amount outstanding under this facility was \$2.5 billion. Our ability to access the unused capacity in the secured facility depends on the availability of eligible assets to collateralize the incremental funding and, in some instances, on the execution of interest rate hedges.

Ally Bank also has access to funding through advances with the FHLB of Pittsburgh. These advances are primarily secured by consumer and commercial mortgage finance receivables and loans. As of March 31, 2014, Ally Bank had pledged \$11.1 billion of assets and investment securities to the FHLB resulting in \$6.1 billion in total funding capacity with \$3.8 billion of debt outstanding.

In addition, Ally Bank has access to repurchase agreements. A repurchase agreement is a transaction in which the firm sells financial instruments to a buyer, typically in exchange for cash, and simultaneously enters into an agreement to repurchase the same or substantially the same financial instruments from the buyer at a stated price plus accrued interest at a future date. The financial instruments sold in repurchase agreements typically include U.S. government and federal agency, and investment-grade sovereign obligations. As of March 31, 2014, Ally Bank had received \$759 million in cash under repurchase agreements.

Additionally Ally Bank has access to the Federal Reserve Bank Discount Window and can borrow funds to meet short-term liquidity demands. However, the Federal Reserve Bank is not a primary source of funding for day to day business. Instead, it is a liquidity source that

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

can be accessed in stressed environments or periods of market disruption. Ally Bank has assets pledged and restricted as collateral to the Federal Reserve Bank totaling \$3.0 billion. Ally Bank had no debt outstanding with the Federal Reserve as of March 31, 2014.

Parent Company (Nonbank) Funding

At March 31, 2014, the parent company maintained liquid cash and equivalents in the amount of \$2.9 billion and unencumbered highly liquid U.S. federal government and U.S. agency securities of \$2.2 billion. These assets can be used to obtain funding through repurchase agreements with third parties or through outright sales. At March 31, 2014, the parent company had no debt outstanding under repurchase agreements. In addition, at March 31, 2014, the parent company had available liquidity from unused capacity in committed credit facilities of \$4.6 billion. Parent company liquidity is defined as our consolidated operations less Ally Bank and the regulated subsidiaries of Ally Insurance's holding company. Our ability to access unused capacity in secured facilities depends on the availability of eligible assets to collateralize the incremental funding and, in some instances, on the execution of interest rate hedges.

Funding sources at the parent company generally consist of long-term unsecured debt, unsecured retail term notes, committed credit facilities, and asset-backed securitizations. To optimize cash and secured facility capacity between entities, the parent company lends cash to Ally Bank on occasion under an intercompany loan agreement. Amounts outstanding on this loan are repayable to the parent company upon demand, subject to five days notice. The parent company had total available liquidity of \$10.2 billion at March 31, 2014, which included the intercompany loan of \$0.5 billion.

In the first quarter of 2014, we completed two transactions through the unsecured debt capital markets totaling \$1.3 billion and we will continue to access those markets on an opportunistic basis.

In addition, we have short-term and long-term unsecured debt outstanding from retail term note programs. These programs generally consist of callable fixed-rate instruments with fixed-maturity dates. There were \$0.2 billion and \$1.8 billion of retail term notes outstanding at March 31, 2014, and December 31, 2013, respectively. In the first quarter of 2014, we redeemed \$1.6 billion of high-coupon callable retail notes as part of a liability management strategy to continue to improve Ally's cost of funds.

We also obtain unsecured funding from the sale of floating-rate demand notes under our Demand Notes program. The holder has the option to require us to redeem these notes at any time without restriction. Demand Notes outstanding were \$3.4 billion at March 31, 2014, compared to \$3.2 billion at December 31, 2013. Refer to Note 12 and Note 13 to the Condensed Consolidated Financial Statements for additional information about our outstanding short-term borrowings and long-term unsecured debt, respectively.

Secured funding continues to be a significant source of financing at the parent company. The total capacity in our committed funding facilities is provided by banks and other financial institutions through private transactions. The committed secured funding facilities can be revolving in nature and allow for additional funding during the commitment period, or they can be amortizing and not allow for any further funding after the closing date. At March 31, 2014, \$22.4 billion of our \$24.5 billion of committed capacity was revolving. Our revolving facilities generally have an original tenor ranging from 364 days to two years. As of March 31, 2014, we had \$15.5 billion of committed funding capacity from revolving facilities with a remaining tenor greater than 364 days. The parent company's largest facility is an \$8 billion revolving syndicated credit facility secured by automotive receivables. In March 2014, we reduced and renewed this facility until March 2016. In the event this facility is not renewed at maturity, the outstanding debt will be repaid over time as the underlying collateral amortizes. At March 31, 2014, there was \$7.6 billion outstanding under this facility. In addition to our syndicated revolving credit facility, we also maintain various bilateral and multilateral secured credit facilities that fund our Automotive Finance operations. These are primarily private securitization facilities that fund a specific pool of automotive assets.

During the first quarter of 2014, the parent company raised \$1.2 billion through a public securitization transactions comprised of non-prime retail automotive loan collateral.

At March 31, 2014, the parent company maintained exclusive access to \$20.1 billion of committed secured credit facilities in the U.S. with outstanding debt of \$15.5 billion. In addition, we have \$0.9 billion in automotive assets funded through forward purchase commitments.

Recent Funding Developments

During the first three months of 2014, we completed secured funding transactions, unsecured funding transactions, and renewed key existing funding facilities totaling \$17.7 billion as we accessed both the public and private markets. Key funding highlights from 2014 to date were as follows:

Ally Financial Inc. renewed, increased and/or extended \$11.5 billion in U.S. credit facilities. The \$11.5 billion capacity is secured by retail, lease, and dealer floorplan automotive assets and is allocated to two separate facilities; one is an \$8.0 billion facility maturing in March 2016, which is available to the parent company, while the other is a \$3.5 billion facility available to Ally Bank maturing in June 2015.

Ally Financial Inc. restructured an amortizing private U.S. credit facility to enhance the efficiency of the transaction. This resulted in \$0.3 billion of additional funding.

Ally Financial Inc. continued to access the public asset-backed securitization markets completing five U.S. transactions that raised \$4.7 billion, with \$3.5 billion and \$1.2 billion raised by Ally Bank and the parent company, respectively.

Ally Financial Inc. accessed the unsecured debt capital markets in the first quarter of 2014 and raised nearly \$1.3 billion.

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

Funding Sources

The following table summarizes debt and other sources of funding and the amount outstanding under each category for the periods shown.

(\$ in millions)	Bank	Parent	Total	%
March 31, 2014				
Secured financings	\$24,351	\$21,771	\$46,122	36
Institutional term debt	—	23,228	23,228	18
Retail debt programs (a)	—	3,649	3,649	3
Total debt (b)	24,351	48,648	72,999	57
Deposits (c)	54,946	421	55,367	43
Total on-balance sheet funding	\$79,297	\$49,069	\$128,366	100
December 31, 2013				
Secured financings	\$27,818	\$19,776	\$47,594	36
Institutional term debt	—	24,936	24,936	19
Retail debt programs (a)	—	5,035	5,035	4
Total debt (b)	27,818	49,747	77,565	59
Deposits (c)	52,910	440	53,350	41
Total on-balance sheet funding	\$80,728	\$50,187	\$130,915	100

(a) Includes \$0.2 billion and \$1.8 billion of Retail Term Notes at March 31, 2014 and December 31, 2013, respectively.

(b) Excludes fair value adjustment as described in Note 21 to the Condensed Consolidated Financial Statements.

(c) Bank deposits include retail, brokered, and other deposits. Parent deposits include dealer deposits. Intercompany deposits are not included.

As a result of our funding strategy to shift originations to Ally Bank and grow the retail deposit base, the proportion of funding provided by retail deposits and Ally Bank has increased in 2014 from 2013 levels. Refer to Note 13 to the Condensed Consolidated Financial Statements for a summary of the scheduled maturity of long-term debt at March 31, 2014.

Committed Funding Facilities

(\$ in millions)	Outstanding		Unused Capacity (a)		Total Capacity	
	March 31, 2014	December 31, 2013	March 31, 2014	December 31, 2013	March 31, 2014	December 31, 2013
Bank funding						
Secured	\$2,500	\$2,750	\$1,000	\$250	\$3,500	\$3,000
Parent funding						
Secured (b)	16,392	15,159	4,641	6,497	21,033	21,656
Total committed facilities	\$18,892	\$17,909	\$5,641	\$6,747	\$24,533	\$24,656

(a) Funding from committed secured facilities is available on request in the event excess collateral resides in certain facilities or is available to the extent incremental collateral is available and contributed to the facilities.

(b) Includes the secured facilities of our Commercial Finance Group.

Cash Flows

Net cash provided by operating activities was \$0.9 billion for the three months ended March 31, 2014, compared to \$2.3 billion for the same period in 2013. The decrease in net cash provided by operating activities was primarily due a decrease in net cash inflows from sales and repayment of mortgage loans held-for-sale. During the three months ended March 31, 2013, proceeds from sales and repayments of loans held-for-sale exceeded cash outflows from new originations and purchases of such loans by \$1.7 billion. During the three months ended March 31, 2014, this activity

resulted in a net cash inflow of \$13 million, reflecting our decrease in mortgage loan origination activities. Net cash provided by investing activities was \$2.1 billion for the three months ended March 31, 2014, compared to \$0.7 billion for the same period in 2013. The increase in net cash provided from investing activities was primarily due to a \$2.5 billion increase in cash provided by sales, maturities and repayment of available-for-sale securities, net of purchases. Also contributing to the increase was a \$0.6 billion decrease in net cash outflows from operating lease activity, primarily due to an increase in cash received from lease disposals, a \$0.5 billion increase in net cash provided by finance receivables and loans, and a \$0.5 billion increase in cash flows from the change in restricted cash balances. These increases were partially offset by a \$2.8 billion decrease in cash proceeds from the sale of international businesses.

Net cash used in financing activities for the three months ended March 31, 2014, totaled \$2.7 billion, compared to \$4.5 billion in the same period in 2013. Cash used to repay long-term debt exceeded cash generated from long-term debt issuances by \$1.3 billion for the three

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

months ended March 31, 2014. During the three months ended March 31, 2013, cash used to repay debt exceeded cash from long-term debt issuances by \$7.2 billion, as cash generated from the sale of international businesses was used in part to repay debt. Cash used to repay short-term debt totaled \$3.4 billion in the three months ended March 31, 2014. During the three months ended March 31, 2013, short term debt provided cash of \$0.5 billion. Cash provided by deposits decreased \$0.3 billion in the three months ended March 31, 2014, compared to the same period in 2013.

Capital Planning and Stress Tests

As a bank holding company with \$50 billion or more of consolidated assets, Ally is required to conduct periodic stress tests and submit a proposed capital plan to the FRB every January, which the FRB must take action on by the following March. The proposed capital plan must include a description of all planned capital actions over a nine-quarter planning horizon. The proposed capital plan must also include a discussion of how Ally will maintain capital above the minimum regulatory capital ratios and above a Tier 1 common equity-to-total risk-weighted assets ratio of 5 percent, and serve as a source of strength to Ally Bank. The FRB must approve Ally's proposed capital plan before Ally may take any proposed capital action.

In November 2013, the FRB issued instructions for the 2014 Comprehensive Capital Analysis and Review (CCAR) and the 2014 supervisory stress test scenarios. On January 6, 2014, Ally and Ally Bank submitted the 2014 capital plan and stress tests as required by the rules and the 2014 CCAR instructions, and in March 2014, the FRB indicated that it did not object to our 2014 capital plan.

Regulatory Capital

Refer to Note 18 to the Condensed Consolidated Financial Statements.

Credit Ratings

The cost and availability of unsecured financing are influenced by credit ratings, which are intended to be an indicator of the creditworthiness of a particular company, security, or obligation. Lower ratings result in higher borrowing costs and reduced access to capital markets. This is particularly true for certain institutional investors whose investment guidelines require investment-grade ratings on term debt and the two highest rating categories for short-term debt (particularly money market investors).

Nationally recognized statistical rating organizations rate substantially all our debt. The following table summarizes our current ratings and outlook by the respective nationally recognized rating agencies.

Rating agency	Short-term	Senior debt	Outlook	Date of last action
Fitch	B	BB+	Stable	April 1, 2014 (a)
Moody's	Not Prime	B1	Stable	December 19, 2013 (b)
S&P	B	BB	Stable	December 12, 2013 (c)
DBRS	R-4	BB	Stable	July 3, 2013 (d)

(a) Fitch upgraded our senior debt rating to BB+ from BB and affirmed our short term rating of B on April 1, 2014.

(b) Moody's upgraded our corporate family rating to Ba3 and confirmed our senior debt ratings of B1 and our short term ratings of Not Prime on December 19, 2013.

(c) Standard & Poor's upgraded our senior debt rating to BB from B+ and upgraded our short term rating to B from C on December 12, 2013.

(d) DBRS upgraded our senior debt rating to BB, confirmed our short term rating of R-4, and changed the outlook to Stable on July 3, 2013.

Insurance Financial Strength Ratings

Substantially all of our Insurance operations have a Financial Strength Rating (FSR) and an Issuer Credit Rating (ICR) from the A.M. Best Company. The FSR is intended to be an indicator of the ability of the insurance company to meet its senior most obligations to policyholders. Lower ratings generally result in fewer opportunities to write business as insureds, particularly large commercial insureds, and insurance companies purchasing reinsurance have guidelines requiring high FSR ratings. On April 17, 2014, A.M. Best affirmed the FSR of B++ (good) and upgraded the ICR to bbb+.

Off-balance Sheet Arrangements

Refer to Note 8 to the Condensed Consolidated Financial Statements.

Purchase Obligations

Certain of the structures related to whole-loan sales, securitization transactions, and other off-balance sheet activities contain provisions that are standard in the whole-loan sale and securitization markets where we may (or, in certain limited circumstances, are obligated to) purchase specific assets from entities. Our obligations are as follows.

Loan Repurchases and Obligations Related to Loan Sales

Ally Bank, within our Mortgage operations, previously sold loans that took the form of securitizations guaranteed by Fannie Mae and Freddie Mac; and in connection with these securitizations, provided certain representations and warranties related to the ownership of the loans, validity of liens securing the loans, and compliance with the criteria for the inclusion in the transaction. These representations and warranties may require Ally Bank to repurchase certain loans, indemnify the investor for incurred losses, or otherwise make the investor

Table of Contents

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

whole. For the three months ended March 31, 2014, Ally Bank received minimal repurchase claims. The representation and warranty reserve was \$46 million and \$45 million at March 31, 2014 and December 31, 2013, respectively.

Critical Accounting Estimates

We identified critical accounting estimates that, as a result of judgments, uncertainties, uniqueness, and complexities of the underlying accounting standards and operations involved could result in material changes to our financial condition, results of operations, or cash flows under different conditions or using different assumptions.

Our most critical accounting estimates are as follows.

• Allowance for loan losses

• Valuation of automobile lease assets and residuals

• Fair value of financial instruments

• Legal and regulatory reserves

• Loan repurchase and obligations related to loan sales

• Determination of provision for income taxes

There have been no significant changes in the methodologies and processes used in developing these estimates from what was described in our 2013 Annual Report on Form 10-K.

Refer to Note 1 to the Condensed Consolidated Financial Statements for further discussion regarding the methodology used in calculating the provision for income taxes for interim financial reporting.

Statistical Table

The accompanying supplemental information should be read in conjunction with the more detailed information, including our Condensed Consolidated Financial Statements and the notes thereto, which appears elsewhere in this Quarterly Report.

Net Interest Margin Table

The following table presents an analysis of net interest margin excluding discontinued operations for the periods shown.

Three months ended March 31, (\$ in millions)	2014			2013			(Decrease) increase due to (a)		
	Average balance (b)	Interest income/ interest expense	Yield/ rate	Average balance (b)	Interest income/ interest expense	Yield/ rate	Volume	Yield/rate	Total
Assets									
Interest-bearing cash and cash equivalents	\$5,304	\$3	0.23 %	\$6,565	\$3	0.19 %	\$(1)	\$ 1	\$—
Investment securities (c)	15,714	90	2.32	13,921	63	1.84	9	18	27
Loans held-for-sale, net	11	—	—	2,027	16	3.20	(8)	(8)	(16)
Finance receivables and loans, net (d)	99,048	1,107	4.53	98,595	1,135	4.67	5	(33)	(28)
Investment in operating leases, net (e)	17,998	328	7.39	14,205	299	8.54	73	(44)	29
Total interest-earning assets	138,075	1,528	4.49	135,313	1,516	4.54	78	(66)	12
Noninterest-bearing cash and cash equivalents	1,441			1,967					
Other assets (f)	11,888			38,257					
Allowance for loan losses	(1,206)			(1,172)					
Total assets	\$ 150,198			\$ 174,365					
Liabilities									
Interest-bearing deposit liabilities	\$54,203	\$163	1.22 %	\$47,985	\$164	1.39 %	\$20	\$(21)	\$(1)
Short-term borrowings	6,643	15	0.92	4,585	16	1.42	6	(7)	(1)
Long-term debt (g) (h) (i)	69,030	534	3.14	71,957	701	3.95	(28)	(139)	(167)
Total interest-bearing liabilities (g) (h) (j)	129,876	712	2.22	124,527	881	2.87	(2)	(167)	(169)
Noninterest-bearing deposit liabilities	66			1,579					
Total funding sources (h) (k)	129,942	712	2.22	126,106	881	2.83			
Other liabilities (l)	5,933			28,087					
Total liabilities	135,875			154,193					
Total equity	14,323			20,172					
Total liabilities and equity	\$ 150,198			\$ 174,365					
Net financing revenue		\$816			\$635		\$80	\$ 101	\$181
Net interest spread (m)			2.27 %			1.67 %			

Edgar Filing: Ally Financial Inc. - Form 10-Q

Net interest spread excluding original issue discount (m)	2.43 %	1.89 %
Net interest spread excluding original issue discount and including noninterest-bearing deposit liabilities (m)	2.43 %	1.93 %
Net yield on interest-earning assets (n)	2.40 %	1.90 %
Net yield on interest-earning assets excluding original issue discount (n)	2.53 %	2.07 %

(a) Changes in interest not solely due to volume or yield/rate are allocated in proportion to the absolute dollar amount of change in volume and yield/rate.

(b) Average balances are calculated using a combination of monthly and daily average methodologies.

Excludes income on equity investments of \$5 million and \$5 million during the three months ended March 31, (c) 2014 and 2013, respectively. Yields on available-for-sale debt securities are based on fair value as opposed to historical cost.

Nonperforming finance receivables and loans are included in the average balances. For information on our (d) accounting policies regarding nonperforming status, refer to Note 1 to the Consolidated Financial Statements in our 2013 Annual Report on Form 10-K.

Includes gains on sale of \$109 million and \$64 million during the three months ended March 31, 2014 and 2013, (e) respectively. Excluding these gains on sale, the annualized yield would be 4.93% and 6.72% at March 31, 2014 and 2013, respectively.

(f) Includes average balances of assets of discontinued operations.

(g) Includes the effects of derivative financial instruments designated as hedges.

Average balance includes \$1,510 million and \$1,753 million related to original issue discount at March 31, (h) 2014 and 2013, respectively. Interest expense includes original issue discount amortization of \$44 million and \$57 million during the three months ended March 31, 2014 and 2013, respectively.

(i) Excluding original issue discount the rate on long-term debt was 2.82% and 3.54% at March 31, 2014 and 2013, respectively.

(j) Excluding original issue discount the rate on total interest-bearing liabilities was 2.06% and 2.65% at March 31, 2014 and 2013, respectively.

(k) Excluding original issue discount the rate on total funding sources was 2.06% and 2.61% at March 31, 2014 and 2013, respectively.

(l) Includes average balances of liabilities of discontinued operations.

(m) Net interest spread represents the difference between the rate on total interest-earning assets and the rate on total interest-bearing liabilities.

(n) Net yield on interest-earning assets represents net financing revenue as a percentage of total interest-earning assets.

Management's Discussion and Analysis

Ally Financial Inc. • Form 10-Q

Recently Issued Accounting Standards

Refer to Note 1 to the Condensed Consolidated Financial Statements.

Forward-looking Statements

The foregoing Management's Discussion and Analysis of Financial Condition and Results of Operations and other portions of this Form 10-Q contain various forward-looking statements within the meaning of applicable federal securities laws, including the Private Securities Litigation Reform Act of 1995, that are based upon our current expectations and assumptions concerning future events that are subject to a number of risks and uncertainties that could cause actual results to differ materially from those anticipated.

The words "expect," "anticipate," "estimate," "forecast," "initiative," "objective," "plan," "goal," "project," "outlook," "priorit," "intend," "evaluate," "pursue," "seek," "may," "would," "could," "should," "believe," "potential," "continue," or the negative o words or similar expressions is intended to identify forward-looking statements. All statements herein, other than statements of historical fact, including without limitation statements about future events and financial performance, are forward-looking statements that involve certain risks and uncertainties.

While these statements represent our current judgment on what the future may hold and we believe these judgments are reasonable, these statements are not guarantees of any events or financial results, and Ally's actual results may differ materially due to numerous important factors that are described in the most recent reports on Forms 10-K and 10-Q for Ally, each of which may be revised or supplemented in subsequent reports on Forms 10-Q and 8-K. Such factors include, among others, the following: maintaining the mutually beneficial relationship between Ally and General Motors ("GM"), and Ally and Chrysler Group LLC ("Chrysler"); the profitability and financial condition of GM and Chrysler; our ability to realize the anticipated benefits associated with being a financial holding company, and the increased regulation and restrictions that we are now subject to; the potential for deterioration in the residual value of off-lease vehicles; disruptions in the market in which we fund our operations, with resulting negative impact on our liquidity; changes in our accounting assumptions that may require or that result from changes in the accounting rules or their application, which could result in an impact on earnings; changes in the credit ratings of Ally, Chrysler, or GM; changes in economic conditions, currency exchange rates or political stability in the markets in which we operate; and changes in the existing or the adoption of new laws, regulations, policies or other activities of governments, agencies and similar organizations (including as a result of the Dodd-Frank Act and Basel III).

Use of the term "loans" describes products associated with direct and indirect lending activities of Ally's global operations. The specific products include retail installment sales contracts, loans, lines of credit, leases or other financing products. The term "originate" refers to Ally's purchase, acquisition, or direct origination of various "loan" products.

Controls and Procedures

Ally Financial Inc. • Form 10-Q

Item 4. Controls and Procedures

We maintain disclosure controls and procedures, as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act), designed to ensure that information required to be disclosed in reports filed under the Exchange Act is recorded, processed, summarized, and reported within the specified time periods. Our disclosure controls and procedures are also designed to ensure that information required to be disclosed in the reports we file and submit under the Exchange Act is accumulated and communicated to management, including our Chief Executive Officer (Principal Executive Officer) and Chief Financial Officer (Principal Financial Officer), to allow timely decisions regarding required disclosure.

As of the end of the period covered by this report, our Principal Executive Officer and Principal Financial Officer evaluated, with the participation of our management, the effectiveness of our disclosure controls and procedures and concluded that our disclosure controls and procedures were effective.

There were no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) that occurred during our most recent fiscal quarter that materially affected, or were reasonably likely to materially affect, our internal control over financial reporting.

Our management, including our Principal Executive Officer and Principal Financial Officer, does not expect that our disclosure controls or our internal controls will prevent or detect all errors and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within Ally have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with associated policies or procedures. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

PART II — OTHER INFORMATION

Ally Financial Inc. • Form 10-Q

Item 1. Legal Proceedings

Refer to Note 25 to the Condensed Consolidated Financial Statements (incorporated herein by reference) for a discussion related to our legal proceedings, which supplements the discussion of legal proceedings set forth in Note 29 to our 2013 Annual Report on Form 10-K.

Item 1A. Risk Factors

Other than with respect to the risk factor provided below, there have been no material changes to the Risk Factors described in our 2013 Annual Report on Form 10-K.

Risks Related to Our Business

The profitability and financial condition of our operations are heavily dependent upon the performance, operations, and prospects of the overall U.S. automotive market, and also upon GM and Chrysler.

GM and Chrysler dealers and their retail customers compose a significant portion of our customer base, and our Dealer Financial Services operations are highly dependent on GM and Chrysler production and sales volume. In 2013, 62% of our U.S. new vehicle dealer inventory financing and 69% of our U.S. new vehicle consumer automotive financing volume were for GM franchised dealers and customers, and 27% of our U.S. new vehicle dealer inventory financing and 22% of our U.S. new vehicle consumer automotive financing volume were for Chrysler dealers and customers.

On October 1, 2010, GM acquired AmeriCredit Corp. (which GM subsequently renamed General Motors Financial Company, Inc. (GMF)), an independent automotive finance company. Further, during 2013 we completed the sale of our automotive finance operations in Europe and Latin America to GMF and expect to complete the sale of our interest in the joint venture in China to GMF in the next twelve months. As GMF continues to grow and offer new products, and as GM directs additional business to GMF, it could reduce GM's reliance on our services over time, which could have a material adverse effect on our profitability and financial condition. In addition, GMF has begun to offer certain insurance products that we also offer. In addition, GM or other automotive manufacturers could utilize other existing companies to support their financing needs including offering products or terms that we would not or could not offer, which could have a material adverse impact on our business and operations. Furthermore, other automotive manufacturers could expand or establish or acquire captive finance companies to support their financing needs thus reducing their need for our services.

A significant adverse change in GM's or Chrysler's business, including the production or sale of GM or Chrysler vehicles; the quality or resale value of GM or Chrysler vehicles; the use of GM or Chrysler marketing incentives; GM's or Chrysler's relationships with its key suppliers; or GM's or Chrysler's relationship with the United Auto Workers and other labor unions and other factors impacting GM or Chrysler or their respective employees, or significant adverse changes in their respective liquidity position and access to the capital markets; could have a material adverse effect on our profitability and financial condition. GM is currently subject to various inquiries relating to the recalls of certain of its vehicles as well as the timing of the recalls. Although we do not know what impact these inquiries will have on the sale of GM vehicles, if they were to result in a reduction in the sales of GM vehicles, it could have an adverse effect on Ally's profitability and financial condition.

There is no assurance that the automotive market or GM's and Chrysler's respective share of that market will not suffer downturns in the future, and any negative impact could in turn have a material adverse effect on our business, results of operations, and financial position.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds
