Item 2.02 Results of Operations and Financial Condition

On July 30, 2015, Kennametal Inc. (Kennametal or the Company) issued an earnings announcement for its fiscal fourth quarter and fiscal year ended June 30, 2015.

The press release contains certain non-generally accepted accounting principles (GAAP) financial measures. The following GAAP financial measures have been presented on an adjusted basis: gross profit and margin, operating expense, operating expense as a percentage of sales, operating income (loss) and margin, net income (loss), diluted EPS (LPS), effective tax rate, Industrial operating income and margin and Infrastructure operating income (loss) and margin. Adjustments for the three months ended June 30, 2015 include: (1) restructuring and related charges, (2) tax impact of prior impairment charges and (3) tax redeployment expense. Adjustments for the three months ended June 30, 2014 include: (1) acquisition-related charges, (2) restructuring and related charges and (3) loss on divestiture. Adjustments for the twelve months ended June 30, 2015 include: (1) restructuring and related charges, (2) technology asset impairment charge, (3) goodwill and other intangible asset impairment charges and (4) tax redeployment expense. Adjustments for the twelve months ended June 30, 2014 include: (1) TMB inventory step-up, (2) acquisition-related charges, (3) restructuring and related charges, (4) tax repatriation expense and (5) loss on divestiture. Management adjusts for these items in measuring and compensating internal performance and to more readily compare the Company's financial performance period-to-period. The press release also contains free operating cash flow which is a non-GAAP measure and is defined below.

Management believes that presentation of these non-GAAP financial measures provides useful information about the results of operations of the Company for the current and past periods. Management believes that investors should have available the same information that management uses to assess operating performance, determine compensation and assess the capital structure of the Company. These non-GAAP measures should not be considered in isolation or as a substitute for the most comparable GAAP measures. Investors are cautioned that non-GAAP financial measures utilized by the Company may not be comparable to non-GAAP financial measures used by other companies.

Free Operating Cash Flow

Free operating cash flow is a non-GAAP financial measure and is defined by the Company as cash provided by operations (which is the most directly comparable GAAP measure) less capital expenditures plus proceeds from disposals of fixed assets. Management considers free operating cash flow to be an important indicator of Kennametal's cash generating capability because it better represents cash generated from operations that can be used for dividends, debt repayment, strategic initiatives (such as acquisitions), and other investing and financing activities.

Debt to Capital

Debt to Capital is a non-GAAP financial measure and is defined by Kennametal as total debt divided by the sum of total equity plus total debt. The most directly comparable GAAP measure is debt to equity, which is defined as total debt divided by total equity. Management believes that Debt to Capital provides additional insight into the underlying capital structure and performance of the Company.
