First Midwest Bancorp, Inc. is a bank holding company headquartered in the Chicago suburb of Itasca, Illinois with operations throughout the greater Chicago metropolitan area as well as central and western Illinois. Our principal subsidiary is First Midwest Bank, which provides a broad range of commercial and retail banking services to consumer, commercial and industrial, and public or governmental customers. We are committed to meeting the financial needs of the people and businesses in the communities where we live and work by providing customized banking solutions, quality products, and innovative services that truly fulfill those financial needs.

AVAILABLE INFORMATION

We file annual, quarterly, and current reports, proxy statements, and other information with the Securities and Exchange Commission ("SEC"), and we make this information available free of charge on or through the investor relations section of our web site at www.firstmidwest.com/aboutinvestor_overview.asp. The following documents are also posted on our web site or are available in print upon the request of any stockholder to our Corporate Secretary:

* Certificate of Incorporation

* Company By-laws

* Charters for our Audit, Compensation, and Nominating and Corporate Governance Committees

- * Related Person Transaction Policies and Procedures
- * Corporate Governance Guidelines
- * Code of Ethics and Standards of Conduct (the "Code"), which governs our directors, officers, and employees
- * Code of Ethics for Senior Financial Officers.

Within the time period required by the SEC and the Nasdaq Stock Market, we will post on our web site any amendment to the Code and any waiver applicable to any executive officer, director, or senior financial officer (as defined in the Code). In addition, our web site includes information concerning purchases and sales of our securities by our executive officers and directors, as well as any disclosure relating to certain non-GAAP financial measures (as defined in the SEC's Regulation G) that we may make public orally, telephonically, by webcast, by broadcast, or by similar means from time to time.

Our Corporate Secretary can be contacted by writing to First Midwest Bancorp, Inc., One Pierce Place, Itasca, Illinois 60143, Attn: Corporate Secretary. The Company's Investor Relations Department can be contacted by telephone at (630) 875-7463 or by e-mail at investor.relations@firstmidwest.com.

CAUTIONARY STATEMENT PURSUANT TO THE PRIVATE SECURITIES
LITIGATION REFORM ACT OF 1995

We include in this Quarterly Report on Form 10-Q, and from time to time our management may make, statements that may constitute "forward-looking statements" within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These statements are not historical facts, but instead represent only management's beliefs regarding future events, many of which, by their nature, are inherently uncertain and outside our control. Although we believe the expectations reflected in any forward-looking statements are reasonable, it is possible that our actual results and financial condition may differ, possibly materially, from the anticipated results and financial condition indicated in such statements. In some cases, you can identify these statements by forward-looking words such as "may," "might," "will," "should," "expect," "plan," "anticipate," "believe," "estimate," "predict," "potential," or "continue," and the negative of these terms and other comparable terminology. We caution you not to place undue reliance on forward-looking statements, which speak only as of the date of this report, or when made.

Forward-looking statements are subject to known and unknown risks, uncertainties, and assumptions and may include projections relating to our future financial performance including our growth strategies and anticipated trends in our business. For a detailed discussion of these and other risks and uncertainties that could cause actual results and events to differ materially from such forward-looking statements, you should refer to our Annual Report on Form 10-K for the year ended December 31, 2007, including the sections entitled "Risk Factors" in Part II Item 1A of this report and "Management's Discussion and Analysis of Results of Operations," as well as our subsequent periodic and current reports filed with the SEC. These risks and uncertainties are not exhaustive however. Other sections of this report describe additional factors that could adversely impact our business and financial performance. Moreover, we operate in a very competitive and rapidly changing environment. New risks and uncertainties emerge from time to time, and it is not possible to predict all risks and uncertainties, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. We are under no duty to update any of these forward-looking statements after the date of this report to conform our prior statements to actual results or revised expectations, and we do not intend to do so.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. BASIS OF PRESENTATION

The accompanying unaudited consolidated interim financial statements of First Midwest Bancorp, Inc. (the "Company"), a Delaware corporation, have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission for quarterly reports on Form 10-Q and do not include certain information and footnote disclosures required by U.S. generally accepted accounting principles ("GAAP") for complete annual financial statements. Accordingly, these financial statements should be read in conjunction with the Company's 2007 Annual Report on Form 10-K ("2007 10-K").

The accompanying unaudited consolidated interim financial statements have been prepared in accordance with U.S. GAAP and reflect all adjustments that are, in the opinion of management, necessary for the fair presentation of the financial position and results of operations for the periods presented. All such adjustments are of a normal recurring nature. The results of operations for the quarter and nine months ended September 30, 2008 are not necessarily indicative of the results that may be expected for the year ending December 31, 2008.

The consolidated financial statements include the accounts and results of operations of the Company and its subsidiaries after elimination of all significant intercompany accounts and transactions. Certain reclassifications have been made to prior periods to conform to the current period presentation. U.S. GAAP requires management to make certain estimates and assumptions. Although these and other estimates and assumptions are based on the best available information, actual results could be materially different from these estimates.

2. RECENT ACCOUNTING PRONOUNCEMENTS

Fair Value Measurements:

Effective January 1, 2008, the Company adopted Financial Accounting Standards Board ("FASB") Statement No. 157, *Fair Value Measurements* ("SFAS No. 157"), which, upon adoption, replaced various definitions of fair value in existing accounting literature with a single definition, established a framework for measuring fair value, and required additional disclosures about fair value measurements. SFAS No. 157 applies whenever an entity is measuring fair value under other accounting standards that require or permit fair value measurement. To clarify the application of SFAS No. 157 in inactive markets, on October 10, 2008, the FASB issued FASB Staff Position ("FSP") No. FAS 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset is Not Active*. Specifically, the FSP addresses the use of broker quotes and pricing services and how an entity's own input assumptions (such as discount rates used in cash flow projections) should be considered when measuring fair value when relevant observable market data does not exist. While SFAS No. 157 is effective for financial assets and liabilities on January 1, 2008 and for non-financial assets and liabilities on January 1, 2009, the FSP to address fair value measurements for inactive markets was effective on issuance, including prior periods for which financial statements had not been issued. The adoption of SFAS No. 157 on January 1, 2008 and the FSP during the third quarter of 2008 did not have a material impact on the Company's financial position, results of operations, or liquidity. Refer to Note 9, "Fair Value," for the Company's fair value measurement disclosures.

Fair Value Option

: Effective January 1, 2008, the Company adopted FASB Statement No. 159, *The Fair Value Option for Financial Assets and Liabilities* ("SFAS No. 159"). SFAS No. 159 permits entities to choose to measure certain financial assets and liabilities at fair value that are not currently required to be measured at fair value. The fair value option is applied on an instrument-by-instrument basis, is irrevocable and can only be applied to an entire instrument and not to specified risks, specified cash flows, or portions of that instrument. Changes in fair value (i.e. unrealized gains and losses) on items for which the fair value option has been elected will be reported in earnings at each subsequent reporting date and upfront fees and costs related to those items will be recognized in earnings as incurred and not deferred. SFAS No. 159 also requires entities to provide additional information that would help users of the financial statements understand how changes in fair values affect current-period earnings. While the Company did not elect the fair value option on the adoption date, it may elect this guidance for financial assets and liabilities in the future as permitted under the statement. Accordingly, the adoption of SFAS No. 159 on January 1, 2008 did not have an impact on the Company's financial position, results of operations, or liquidity.

Endorsement Split-Dollar Life Insurance Arrangements:

Effective January 1, 2008, the Company adopted Emerging Issues Task Force ("EITF") Issue 06-4, *Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements* ("EITF 06-4"). The EITF is limited to the recognition of a liability and related compensation costs for endorsement split-dollar life insurance arrangements that provide a benefit to an employee that extends to postretirement periods. The effect of initially applying the guidance would be accounted for as a cumulative-effect adjustment to beginning retained earnings with the option of retrospective application. As the Company had already

followed the provisions of this statement, the adoption of EITF 06-4 on January 1, 2008 did not have an impact on the Company's financial position, results of operations, or liquidity.

Business Combinations:

In December 2007, the FASB issued SFAS No. 141(R), *Business Combinations* ("SFAS No. 141(R)"). SFAS No. 141(R) will significantly change how entities apply the acquisition method to business combinations. The most significant changes affecting how the Company will account for business combinations under this statement include: (a) the acquisition date will be the date the acquirer obtains control; (b) all (and only) identifiable assets acquired, liabilities assumed, and noncontrolling interests in the acquiree will be stated at fair value on the acquisition date; (c) assets or liabilities arising from noncontractual contingencies will be measured at their acquisition date fair value only if it is more likely than not that they meet the definition of an asset or liability on the acquisition date; (d) adjustments subsequently made to the provisional amounts recorded on the acquisition date will be made retroactively during a measurement period not to exceed one year; (e) acquisition-related restructuring costs that do not meet the criteria in SFAS No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*, will be expensed as incurred; (f) transaction costs will be expensed as incurred, except for debt or equity issuance costs which will be accounted for in accordance with other generally accepted accounting principles; (g) reversals of deferred income tax valuation allowances and income tax contingencies will be recognized in earnings subsequent to the measurement period; and (h) the reserve for loan losses of an acquiree will not be permitted to be recognized by the acquirer. In addition, SFAS No. 141(R) will require new and modified disclosures surrounding subsequent changes to acquisition-related contingencies, contingent consideration, noncontrolling interests, acquisition-related transaction costs, fair values and cash flows not expected to be collected for acquired loans, and an enhanced goodwill rollforward. The Company will be required to prospectively apply SFAS No. 141(R) to all business combinations completed on or after January 1, 2009. Early adoption of SFAS No. 141(R) is not permitted, accordingly the Company will be required to record and disclose any business combinations in accordance with existing GAAP until January 1, 2009. The effect of these new requirements on the Company's financial position and results of operations will depend on the volume and terms of acquisitions in 2009 and beyond, but will likely increase the amount and change the timing of recognizing expenses related to acquisition activities.

Derivative Disclosures:

In March 2008, the FASB issued SFAS No. 161, *Disclosures About Derivative Instruments and Hedging Activities - an amendment of SFAS No. 133* ("SFAS No. 161"), which requires an entity to provide greater transparency about how its derivative and hedging activities affect its financial statements. SFAS No. 161 requires enhanced disclosures about: (a) how and why an entity uses derivative instruments; (b) how derivative instruments and related hedged items are accounted for under SFAS No. 133; and (c) how derivative instruments and related hedged items affect an entity's financial position, results of operations, and cash flows. SFAS No. 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. Since SFAS No. 161 affects only disclosures, it will not impact the Company's financial position or results of operation upon adoption.

Trading Securities				\$ 15,252				\$ 18,352

During the first nine months of 2008, the Company continued to closely monitor the fair value of the six asset-backed collateralized debt obligations that were subject to impairment charges in fourth quarter 2007 and recorded additional non-cash impairment charges on these securities of \$2.3 million in first quarter 2008, \$6.0 million in second quarter 2008, and \$1.8 million in third quarter 2008. The carrying value of these securities was zero at September 30, 2008.

At September 30, 2008, gross unrealized gains in the securities available-for-sale portfolio totaled \$5.9 million, and gross unrealized losses totaled \$79.2 million, resulting in a net unrealized depreciation of \$73.3 million. The unrealized loss on securities in an unrealized loss position for greater than 12 months totaled \$50.2 million. Management does not believe any individual unrealized loss as of September 30, 2008 represented an other-than-temporary impairment. The Company has both the intent and ability to hold the securities with unrealized losses for a period of time necessary to recover the amortized cost, or to maturity.

Trading securities held by the Company represent diversified investment securities held in a grantor trust under deferred compensation arrangements in which plan participants may direct amounts earned to be invested in securities other than Company stock. Net trading (losses) gains, representing changes in fair value of the portfolio, included in other noninterest income in the Consolidated Statements of Income totaled (\$1.8) million in third quarter 2008 and \$226,000 in third quarter 2007. Trading (losses) gains totaled (\$3.2) million for the nine months ended September 30, 2008 and \$1.4 million for the nine months ended September 30, 2007.

4. LOANS

Loan Portfolio

(Dollar amounts in thousands)

	September 30, 2008	December 31, 2007
Commercial and industrial	\$ 1,485,541	\$ 1,347,481

Real estate - residential land and development	509,974	505,194
Real estate - multifamily	204,029	178,602
Real estate - other commercial real estate	1,021,662	1,024,490
Consumer	545,040	563,741
Real estate - 1-4 family	205,851	220,741
Total loans	<u>\$ 5,223,582</u>	<u>\$ 4,963,672</u>

Total loans reported are net of deferred loan fees of \$9.6 million as of September 30, 2008 and \$8.8 million as of December 31, 2007 and include overdrawn demand deposits totaling \$11.9 million as of September 30, 2008 and \$11.0 million as of December 31, 2007.

The Company primarily lends to small to mid-sized businesses and consumers in the market areas in which the Company operates. Within these areas, the Company diversifies its loan portfolio by loan type, industry, and borrower.

It is the Company's policy to review each prospective credit in order to determine the appropriateness and, when required, the adequacy of security or collateral to obtain prior to making a loan. In the event of borrower default, the Company seeks recovery in compliance with state lending laws and the Company's lending standards and credit monitoring procedures.

10

5. RESERVE FOR LOAN LOSSES AND IMPAIRED LOANS

Reserve for Loan Losses

(Dollar amounts in thousands)

	Quarters Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Balance at beginning of period	\$ 66,104	\$ 62,391	\$ 61,800	\$ 62,370
Loans charged-off	(9,721)	(2,001)	(21,453)	(7,936)
Recoveries of loans previously charged-off	399	552	1,595	1,787
Net loans charged-off	(9,322)	(1,449)	(19,858)	(6,149)
Provision for loan losses	13,029	470	27,869	5,191
Balance at end of period	<u>\$ 69,811</u>	<u>\$ 61,412</u>	<u>\$ 69,811</u>	<u>\$ 61,412</u>

A portion of the Company's reserve for loan losses is allocated to loans deemed impaired. All impaired loans are included in nonperforming assets.

Impaired, Nonaccrual, and Past Due Loans

(Dollar amounts in thousands)

	September 30, 2008	December 31, 2007
Impaired loans:		
Impaired loans with valuation reserve required ⁽¹⁾	\$ 12,004	\$ 3,470
Impaired loans with no valuation reserve required	40,047	11,878
Total impaired loans	<u>\$ 52,051</u>	<u>\$ 15,348</u>
Nonperforming loans:		
Impaired loans on nonaccrual	\$ 49,793	\$ 15,068
Other nonaccrual loans ⁽²⁾	3,524	3,379
Total nonaccrual loans	\$ 53,317	\$ 18,447
Restructured loans	2,258	280
Total nonperforming loans	<u>\$ 55,575</u>	<u>\$ 18,727</u>
Loans past due 90 days and still accruing interest	\$ 37,316	\$ 21,149
Valuation reserve related to impaired loans	4,327	1,757

(1) These impaired loans require a valuation reserve because the estimated value of the loans is less than the recorded investment in the loans.

(2) These loans are not considered for impairment since they are part of a small balance, homogeneous portfolio.

The average recorded investment in impaired loans was \$25.7 million for the nine months ended 2008 and \$12.1 million for the nine months ended September 30, 2007. Interest income recognized on impaired loans was \$53,000 for the nine months ended 2008 and \$312,000 for the nine months ended September 30, 2007. Interest income recognized on impaired loans is recorded using the cash basis of accounting. As of September 30, 2008, the Company had \$659,000 of additional funds committed to be advanced in connection with impaired loans.

6. EARNINGS PER COMMON SHARE

Weighted-average diluted common shares outstanding	<u>48,556</u>	<u>49,447</u>	<u>48,573</u>	<u>49,915</u>

Edgar Filing: FIRST MIDWEST BANCORP INC - Form 10-Q

Basic earnings per share	\$ 0.50	\$ 0.55	\$ 1.57	\$ 1.73
Diluted earnings per share	0.50	0.55	1.57	1.71

7. PENSION PLAN

Net Periodic Benefit Pension Expense

(Dollar amounts in thousands)

	Quarters Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Components of net periodic benefit cost:				
Service cost	\$ 617	\$ 802	\$ 2,133	\$ 2,770
Interest cost	487	633	1,684	2,187
Expected return on plan assets	(609)	(792)	(2,106)	(2,735)
Recognized net actuarial loss	140	181	482	625
Amortization of prior service cost	1	1	2	3
Net periodic cost	<u>\$ 636</u>	<u>\$ 825</u>	<u>\$ 2,195</u>	<u>\$ 2,850</u>

The Company previously disclosed in Note 16 to the Consolidated Financial Statements in its 2007 10-K that it expected to contribute \$5.0 million to its Pension Plan in 2008. Based on updated actuarial assumptions, the Company contributed \$7.5 million to the Pension Plan in first quarter 2008.

8. COMMITMENTS, GUARANTEES, AND CONTINGENT LIABILITIES

Credit Extension Commitments and Guarantees

In the normal course of business, the Company enters into a variety of financial instruments with off-balance sheet risk to meet the financing needs of its customers, to reduce its exposure to fluctuations in interest rates, and to conduct lending activities. These instruments principally include commitments to extend credit, standby letters of credit, and commercial letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the Consolidated Statements of Condition.

Contractual or Notional Amounts of Financial Instruments

(Dollar amounts in thousands)

	September 30, 2008	December 31, 2007
Commitments to extend credit:		
Home equity lines	\$ 297,052	\$ 266,582
All other commitments	1,173,668	1,135,612
Letters of credit:		
Standby	139,829	128,281
Commercial	508	427
Recourse on assets securitized	9,943	13,252

Standby and commercial letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Standby letters of credit generally are contingent upon the failure of the customer to perform according to the terms of the underlying contract with the third party and are most often issued in favor of a municipality where construction is taking place to ensure the borrower adequately completes the construction. Commercial letters of credit are issued specifically to facilitate commerce and typically result in the commitment being drawn on when the underlying transaction is consummated between the customer and the third party. This type of letter of credit is issued through a correspondent bank on behalf of a customer who is involved in an international business activity such as the importing of goods.

The maximum potential future payments guaranteed by the Company under standby letters of credit arrangements are equal to the contractual amount of the commitment. The carrying value of the Company's standby letters of credit, which is included in other liabilities in the Consolidated Statements of Condition, totaled \$703,000 as of September 30, 2008 and \$669,000 as of December 31, 2007. As of September 30, 2008, standby letters of credit had a remaining weighted-average term of approximately 10.8 months, with remaining actual lives ranging from less than 1 year to 6.8 years. If a commitment is funded, the Company may seek recourse through the liquidation of the underlying collateral provided including real estate, physical plant and property, marketable securities, or cash.

Pursuant to the securitization of certain 1-4 family mortgage loans in fourth quarter 2004, the Company is obligated by agreement to repurchase at recorded value any nonperforming loans, defined as loans past due greater than 90 days. During the nine-months ended September 30, 2008, the Company repurchased \$686,000 of nonperforming loans and charged off \$28,000 related to these loans. The aggregate outstanding balance of securitized loans subject to this recourse obligation was \$9.9 million as of September 30, 2008 and \$13.3 million as of December 31, 2007. Per its agreement, the Company's recourse obligations will end on November 30, 2011. The carrying value of the Company's recourse liability, which is included in other liabilities in the Consolidated Statements of Condition, totaled approximately \$150,000 as of September 30, 2008 and December 31, 2007.

Legal Proceedings

At September 30, 2008, there were certain legal proceedings pending against the Company and its subsidiaries in the ordinary course of business. The Company does not believe that liabilities, individually or in the aggregate, arising from these proceedings, if any, would have a material adverse effect on the consolidated financial condition of the Company as of September 30, 2008.

9. FAIR VALUE

The Company measures, monitors, and discloses certain of its assets and liabilities on a fair value basis. Fair value is used on a recurring basis to account for trading securities, securities available-for-sale, mortgage servicing rights, derivative assets, and derivative liabilities. In addition, fair value is used on a non-recurring basis to apply lower-of-cost-or-market accounting to foreclosed real estate; evaluate assets or liabilities for impairment, including collateral-dependent impaired loans, goodwill, and other intangibles; and for disclosure purposes. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Depending on the nature of the asset or liability, the Company uses various valuation techniques (e.g., discounted cash flow analysis) and input assumptions when estimating fair value, all of which are in accordance with SFAS No. 157.

SFAS No. 157 requires the Company to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Furthermore, SFAS No. 157 establishes a fair value hierarchy that prioritizes the inputs used to measure fair value into three broad levels based on the reliability of the input assumptions. The hierarchy gives the highest priority to level 1 measurements and the lowest priority to level 3 measurements. The three levels of the fair value hierarchy are defined as follows:

- * Level 1 - Unadjusted quoted prices for identical assets or liabilities traded in active markets.
- * Level 2 - Observable inputs other than level 1 prices, such as quoted prices for similar instruments; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the asset or liability.
- * Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The categorization of where an asset or liability falls within the hierarchy is based on the lowest level of input that is significant to the fair value measurement.

Valuation Methodology

The following describes the valuation methodologies used by the Company for assets and liabilities measured at fair value, including the general classification of the assets and liabilities pursuant to the valuation hierarchy.

Trading Securities

- Trading securities represent diversified investment securities held in a grantor trust under deferred compensation arrangements in which plan participants may direct amounts earned to be invested in securities other than Company common stock. Trading securities are reported at fair value, with unrealized gains and losses included in noninterest income. The fair value of trading securities is based on quoted market prices in active exchange markets and, therefore, is classified in level 1 of the valuation hierarchy.

Securities Available-for-Sale

- Substantially all available-for-sale securities are fixed income instruments that are not quoted on an exchange, but may be traded in active markets. The fair value of these securities is based on quoted market prices obtained from external pricing services or dealer market participants where trading in an active market exists. In obtaining such data from external pricing services, the Company has evaluated the methodologies used to develop the fair values in order to determine whether such valuations are representative of an exit price in the Company's principal markets. The Company's principal markets for its securities portfolio are the secondary institutional markets, with an exit price that is predominantly reflective of bid level pricing in those markets. Examples of such securities measured at fair value are U.S. Treasury and Agency securities, municipal bonds, collateralized mortgage obligations, and other mortgage-backed securities. These securities are generally classified in level 2 of the valuation hierarchy. In certain cases where there is limited activity or less transparency for inputs to the valuation, securities are classified in level 3 of the valuation hierarchy. For instance, in the valuation of certain collateralized mortgage and debt obligations and high-yield debt securities, the determination of fair value may require benchmarking to similar instruments or analyzing default and recovery rates.

For asset-backed collateralized debt obligations ("CDOs"), the Company obtained price information from third-party dealer quotes, as this level of evidence is the strongest support absent current market activity for the fair value of these securities. Due to the illiquidity in the secondary market for CDOs, especially since the disruption in the sub-prime credit markets, these fair value estimates cannot be directly corroborated by observable market data. However one can perform a reasonable analysis of cash flows and estimate attendant fair value as rating agency downgrades result in events of default of these assets in accordance with the individual trustee indentures. Therefore the asset-backed CDO securities were classified in level 3 of the valuation hierarchy.

Prior to September 30, 2008 the Company relied on third-party dealer quotes to establish fair value for trust-preferred collateralized debt obligations ("TRUPs"). These were classified in level 3 of the valuation hierarchy. Due to the illiquidity in the secondary market for TRUPs, especially since the disruption in the credit markets, the Company enhanced its understanding of the information underlying the third-party dealer quotes and determined that these dealer quotes do not reflect the best estimate of fair value. Therefore the Company, with the assistance of a structured

credit valuation firm, developed a valuation model to estimate the value of these securities.

The model has been validated through back testing. It relies on independently verifiable historical balance sheet data, empirical default data, equity volatility, and current market values to estimate the likelihood any entity comprising the collateral underlying the individual TRUP will default on its trust-preferred obligation. Using simulation techniques, cash flows are then projected for each entity's obligation under the TRUP and used to estimate the ultimate cash flow to the Company. These cash flows are then modeled and assigned based upon the contractual terms of the TRUP, discounted to their present values, and used to derive the estimated fair value of the individual TRUP.

The model is dependent upon the following key assumptions based on the Company's judgment regarding how a market participant would assess these:

- * Estimated default rate - Based upon historical data obtained from the Federal Deposit Insurance Corporation ("FDIC") and outside sources, a target default level was developed as of the measurement date;
- * Deferral of cash flows - A deferral of cash flow by any entity within the collateral pool is assumed to be a default;
- * Equity volatility - Equity volatility is used to measure market risk over the life of the underlying entity's obligation based on a 6-year historical equity volatility period.

14

- * Discount rate - The discount rate used for valuing cash flows was derived by the Company by first establishing the implied discount rate at a time when a relatively active market existed for such securities and adjusting it for an estimate of the additional risk premium currently demanded by market participants. The Company established that an active market existed during 2006 and the implied discount rate used by the market during that period was approximately the 3-month Treasury bill rate. Since that time the spread between the 3-month Treasury bill rate and the 3-month LIBOR rate has increased between 300 and 400 basis points. Given the most recent volatility in the market, the Company used the current 3-month Treasury bill rate plus 550 basis points as an estimate of the current discount rate.

These assumptions have a direct and significant impact on the resulting fair values. For instance, for every 100 basis points added or subtracted to the discount rate, the total fair value for the 7 TRUPs increases or decreases by approximately \$7.5 million, respectively (approximately 9% of the \$85 million par value). If an equity volatility period of 2 years is used, the total fair value of the 7 TRUPS would decrease by approximately \$14 million (approximately 16% of the \$85 million par value). The Company's current fair value for these securities in total is approximately 84% of par value, with the unrealized loss recorded as a component of "Accumulated Other Comprehensive Income/(Loss)" in the Consolidated Statements of Changes in Stockholders' Equity.

Certain securities available-for-sale are carried at cost, including other miscellaneous marketable equity securities. The carrying value of these cost investments approximates fair value.

Collateral-Dependent Impaired Loans

- The carrying value of impaired loans is disclosed in Note 5, "Reserve for Loan Losses and Impaired Loans." The Company does not record loans at fair value on a recurring basis. However, from time to time, fair value adjustments are recorded on these loans to reflect (1) partial write-downs that are based on the current appraised or market-quoted value of the underlying collateral or (2) the full charge-off of the loan

Edgar Filing: FIRST MIDWEST BANCORP INC - Form 10-Q

carrying value. In some cases, the properties for which market quotes or appraised values have been obtained are located in areas where comparable sales data is limited, outdated, or unavailable. Accordingly, fair value estimates, including those obtained from real estate brokers or other third-party consultants, for collateral-dependent impaired loans are classified in level 3 of the valuation hierarchy.

Mortgage Servicing Rights

- The Company records its mortgage servicing rights at fair value in accordance with SFAS No. 156, *Accounting for Servicing of Financial Assets, an amendment of SFAS No. 140*. Mortgage servicing rights do not trade in an active market with readily observable prices. Accordingly, the Company determines the fair value of mortgage servicing rights by estimating the present value of the future cash flows associated with the mortgage loans being serviced. Key assumptions used in measuring the fair value of mortgage servicing rights include prepayment speeds and discount rates. While market-based data is used to determine the input assumptions, the Company incorporates its own estimates of assumptions market participants would use in determining the fair value of mortgage servicing rights and classifies them in level 3 of the valuation hierarchy.

Derivative Assets and Derivative Liabilities

- The interest rate swaps entered into by the Company are executed in the dealer market and priced based on market quotes obtained from the counterparty that transacted the derivative contract. The market quotes were developed by the counterparty using market observable inputs, which primarily include the London Interbank Offered Rate ("LIBOR") for swaps. As the fair value estimates for interest rate swaps are primarily based on LIBOR, which is a market observable input, derivatives are classified in level 2 of the valuation hierarchy. For its derivative assets and liabilities, the Company also considers nonperformance risk, including the likelihood of default by itself and its counterparties, when evaluating whether the market quotes from the counterparty are representative of an exit price. The Company has a policy of executing derivative transactions only with counterparties above a certain credit rating. Credit risk is also mitigated through the pledging of collateral when certain thresholds are reached. The likelihood of the Company's default is considered remote and its credit rating has remained stable over the past recent history. For these reasons, nonperformance risk is considered extremely low and accordingly, any such credit risk adjustments to the Company's derivative assets and liabilities would be immaterial.

Assets and Liabilities Measured at Fair Value

The following table provides the hierarchy level and fair value for each major category of assets and liabilities measured at fair value at September 30, 2008.

15

Fair Value Measurements

(Dollar amounts in thousands)

September 30, 2008

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Assets and liabilities measured at fair value on a recurring basis				
Assets:				
Trading securities	\$ 15,252	\$ -	\$ -	\$ 15,252
Securities available-for-sale				
(1)	-	1,936,852	88,029	2,024,881
Mortgage servicing rights				
(2)	-	-	1,500	1,500

Edgar Filing: FIRST MIDWEST BANCORP INC - Form 10-Q

Total assets	\$ 15,252	\$ 1,936,852	\$ 89,529	\$ 2,041,633
Liabilities:				
Derivative liabilities ⁽²⁾	\$ -	\$ 482	\$ -	\$ 482
Assets measured at fair value on a non-recurring basis				
Collateral-dependent impaired loans net of reserve for loan losses ⁽³⁾	\$ -	\$ -	\$ 3,227	\$ 3,227

- (1) Includes other miscellaneous marketable equity securities with an aggregate carrying value totaling \$2.9 million that is assumed to approximate fair value.
- (2) Mortgage servicing rights are included in other assets, and derivative liabilities are included in other liabilities in the Consolidated Statements of Financial Condition.
- (3) Represents the carrying value of loans for which adjustments are based on the appraised or market-quoted value of the collateral.

In accordance with the provisions of FASB Statement No. 114, *Accounting by Creditors for Impairment of a Loan*, collateral-dependent impaired loans with a carrying value of \$14.1 million, less transfers to foreclosed real estate of \$5.2 million, were written down to their fair value of \$3.2 million, resulting in a provision for loan losses of \$5.7 million, which was included in earnings for the nine months ended September 30, 2008.

Reconciliation of Beginning and Ending Fair Value For Those
Fair Value Measurements Using Significant Unobservable Inputs (Level 3)

	Securities Available- For-Sale	Mortgage Servicing Rights	Securities Available- For-Sale	Mortgage Servicing Rights
Balance at beginning of period	\$ 77,959	\$ 1,632	\$ 110,496	\$ 1,877
Total gains (losses):				
Included in earnings ⁽¹⁾	(1,794)	(132)	(8,631)	(377)
Included in other comprehensive income	12,398	-	(52)	-
Purchases, sales, issuances, and settlements	(534)	-	(3,134)	-
Transfers out of Level 3 ⁽²⁾	-	-	(10,650)	-
Balance at end of period	\$ 88,029	\$ 1,500	\$ 88,029	\$ 1,500
Change in unrealized losses in earnings relating to assets and liabilities still held at end of period	\$ (1,794)	\$ -	\$ (10,037)	\$ -

- (1) Total gains and losses included in earnings for securities available-for-sale are reported in securities gains (losses), net, and gains and losses on mortgage servicing rights are reported in other service charges, commissions, and fees in the Consolidated Statements of Income.

- (2) The transfer out of level 3 represents a single security that was manually priced using broker quotes (a level 3 input) at December 31, 2007, but valued by an external pricing service (a level 2 input) at September 30, 2008.

16

In the table above, the net losses recognized in earnings for securities available-for-sale represent additional non-cash impairment charges recognized during the periods in 2008 on certain asset-backed CDOs that were deemed to be other-than-temporarily impaired, net of the gain realized on the sale of an asset-backed CDO previously written down.

10. INCOME TAXES

The Company's provision for income taxes includes both federal and state income tax expense. Following is an analysis of the provision for income taxes and the effective income tax rates for the periods presented.

	Quarters Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Income before income tax expense	\$ 24,987	\$ 33,641	\$ 82,127	\$ 110,685
Income tax expense	796	6,404	5,901	25,108
Effective income tax rate	3.2%	19.0%	7.2%	22.7%
Federal effective income tax rate	11.1%	25.5%	16.8%	24.6%
State effective income tax rate, net of federal tax effect	(7.9%)	(6.5%)	(9.6%)	(1.9%)

The federal effective income tax rate and changes in that rate are greatly influenced by the amount of tax-exempt income derived from investment securities and bank owned life insurance ("BOLI"). The state effective income tax rate and changes in that rate are dependent upon Illinois, Indiana, and Iowa income tax rules relating to consolidated/combined reporting, sourcing of income and expense, and the amount of tax-exempt income derived from loans, investment securities, and BOLI. As a result of a favorable court decision and certain developments in pending tax audits, the Company increased the amount of benefit recognized with respect to certain previously identified uncertain tax positions under FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, an interpretation of FASB Statement No. 109, *Accounting for Income Taxes* ("FIN 48").

The increase in recognized tax benefit resulted in a \$2.5 million reduction in tax expense during the quarter and is the primary reason for the decrease in effective income tax rate from 2007 to 2008.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The discussion presented below provides an analysis of our results of operations and financial condition for the quarters ended September 30, 2008 and 2007. When we use the terms "First Midwest," the "Company," "we," "us," and "our," we mean First Midwest Bancorp, Inc., a Delaware Corporation, and its consolidated subsidiaries. When we use the term the "Bank," we are referring to our wholly-owned banking subsidiary, First Midwest Bank. Management's discussion and analysis should be read in conjunction with the consolidated financial statements and accompanying notes presented elsewhere in this report, as well as in our 2007 Annual Report on Form 10-K ("2007 10-K"). Results of operations for the quarter and nine months ended September 30, 2008 are not necessarily indicative of results to be expected for the year ending December 31, 2008. Unless otherwise stated, all earnings per share data included in this section and throughout the remainder of this discussion are presented on a diluted basis.

RECENT DEVELOPMENTS

Troubled Asset Relief Program ("TARP") Capital Purchase Program

In response to the financial crises affecting the financial markets and the banking system, on October 3, 2008, the President signed into law the *Emergency Economic Stabilization Act of 2008* ("EESA"). Among other things, the EESA establishes a \$700 billion Troubled Asset Relief Program. Under the TARP, the United States Department of the Treasury ("Treasury") has authority, among other things, to purchase mortgages, mortgage-backed securities, capital stock, and other financial instruments from financial institutions for the purpose of stabilizing and providing liquidity to the U.S. financial markets.

On October 14, 2008, the Treasury announced several initiatives under the TARP intended to help stabilize the banking industry, including a voluntary Capital Purchase Program ("CPP") designed to encourage qualifying financial institutions to

17

build capital. Under the CPP, the Treasury may purchase up to \$250 billion of senior preferred shares from eligible financial institutions on standardized terms with attached warrants to purchase common stock.

The Company has recently received preliminary approval to issue to the Treasury up to \$194 million of senior preferred shares, the maximum allowable under the CPP, and has until December 2, 2008 to effect such issuance. The issuance would bear an initial five-year dividend of 5%. Thereafter, the dividend would increase to 9%.

Proceeds from the issuance would further bolster the Company's already well-capitalized regulatory total capital ratio as of September 30, 2008, which stood at 12.04%, some \$132 million in excess of required levels.

The Federal Deposit Insurance Corporation ("FDIC") Temporary Liquidity Guaranty Program ("TLGP")

The FDIC insures deposits at its insured financial institutions up to certain limits, charging institutions such as the Bank premiums to maintain the Deposit Insurance Fund. The EESA includes a provision for an increase in the amount of deposits insured by the FDIC to \$250,000 until December 31, 2009. Furthermore, in October 2008, the FDIC announced the TLGP under which a participating depository institution would be able to provide full deposit insurance coverage for non-interest bearing transaction accounts, regardless of dollar amount. Under the TLGP, insured depository institutions that participate will be subject to a 0.10% surcharge applied to non-interest bearing transaction deposit account balances in excess of \$250,000, which surcharge will be added to the institution's existing risk-based deposit insurance assessments.

The TLGP also provides a three-year 100% guarantee of any newly issued senior unsecured debt that may be issued by the Company on or before June 30, 2009 (including promissory notes, commercial paper, inter-bank funding, and any unsecured portion of secured debt). The maximum amount of the potential Company debt that could be covered by this guarantee is approximately \$518 million. An annualized fee equal to 75 basis points multiplied by the amount of debt issued under this program is imposed.

The Company has until December 5, 2008 to elect to participate in the TLGP.

PERFORMANCE OVERVIEW

General Overview

Our banking network provides a full range of business and retail banking and trust and advisory services through 98 banking offices, primarily in suburban metropolitan Chicago. The primary sources of our revenue are net interest income and fees from financial services provided to customers. Business volumes tend to be influenced by overall economic factors including market interest rates, business spending, consumer confidence, and competitive conditions within the marketplace.

Third Quarter 2008 vs. 2007

Total assets	\$ 8,246,655	\$ 8,091,518	\$ 7,884,345	155,137	362,310	
Total loans	5,223,582	4,963,672	4,931,472	259,910	292,110	
Total deposits	5,658,284	5,778,861	5,834,175	(120,577)	(175,891)	

(1) All ratios are presented on an annualized basis.

Third quarter 2008 earnings per share were \$0.50 compared with \$0.55 for third quarter 2007. Actual results included noncore transactions consisting of net securities losses of \$1.7 million and \$5.2 million for the quarters ended September 30, 2008 and 2007, respectively, and the recognition of tax benefits of approximately \$2.5 million for third quarter 2008 and \$1.4 million for third quarter 2007.

Earnings per share were \$1.57 and \$1.71 for the nine-month periods ended September 30, 2008 and 2007, respectively. Likewise, these results included noncore transactions consisting of net securities losses of \$1.4 million and \$760,000 for 2008 and 2007, respectively, and the recognition of tax benefits of \$9.3 million for 2008 and \$1.4 million for 2007.

For further discussion of the noncore transactions, refer to the sections titled "Investment Portfolio Management" and "Income Taxes."

Income before income tax expense totaled \$25.0 million for third quarter 2008 compared to \$33.6 million for third quarter 2007, and \$82.1 million for the nine-month period ended September 30, 2008 compared to \$110.7 million for the same period of 2007. The declines from 2007 were due primarily to higher provisions for loan losses.

Total loan balances at September 30, 2008 increased \$292.1 million from a year ago and \$259.9 million from December 31, 2007. The growth was substantially all in the commercial real estate and commercial and industrial lines.

19

The ratio of nonperforming assets plus loans past due 90 days as a percent of total loans plus foreclosed real estate was 2.22% at September 30, 2008 compared to 0.92% at December 31, 2007 and 0.77% at September 30, 2007. The increase is related primarily to loans to home builders and developers and reflects the impact of declining home prices on sales of new developments.

Net interest margin of 3.63% remained unchanged from third quarter 2007, despite the Federal Reserve's 325 basis point decrease in the federal funds rate over the past year, and declined only 1 basis point for the nine-month period ended September 30, 2008 compared to the same period of 2007. Third quarter and year-to-date 2008 net interest margins reflect our strong core deposit base and our ability to effectively manage our cost of funds.

The declines in fee-based revenues for the quarter and nine-month periods ended September 30, 2008 from the same periods in 2007 were due primarily to the elimination of fees attendant to discontinuing both originating mortgages and the outsourcing of our cashier check balances. Operating efficiency remains solid with the efficiency ratio for third quarter 2008 at 50.3%, improved from 51.9% for third quarter 2007.

EARNINGS PERFORMANCE

Net Interest Income

Net interest income equals the difference between interest income plus fees earned on interest-earning assets and interest expense incurred on interest-bearing liabilities. The level of interest rates and the volume and mix of interest-earning assets and interest-bearing liabilities impact net interest income. Net interest margin represents net interest income as a percentage of total average interest-earning assets. The accounting policies underlying the recognition of interest income on loans, securities, and other interest-earning assets are included in the "Notes to Consolidated Financial Statements" contained in our 2007 10-K.

Our accounting and reporting policies conform to U.S. generally accepted accounting principles ("GAAP") and general practice within the banking industry. For purposes of this discussion, both net interest income and net interest margin have been adjusted to a fully tax-equivalent basis to more appropriately compare the returns on certain tax-exempt loans and securities to those on taxable interest-earning assets. Although we believe that these non-GAAP financial measures enhance investors' understanding of our business and performance, these non-GAAP financial measures should not be considered an alternative to GAAP. The reconciliation of such adjustment is presented in the following table.

Table 2
Effect of Tax-Equivalent Adjustment

(Dollar amounts in thousands)

	Quarters Ended September 30,			Nine Months Ended September 30,		
	2008	2007	% Change	2008	2007	% Change
Net interest income (GAAP)	\$ 62,758	\$ 60,697	3.4	\$ 181,584	\$ 182,031	(0.2)
Tax-equivalent adjustment	<u>5,572</u>	<u>4,988</u>	<u>11.7</u>	<u>16,729</u>	<u>15,670</u>	<u>6.8</u>
Tax-equivalent net interest income	<u>\$ 68,330</u>	<u>\$ 65,685</u>	<u>4.0</u>	<u>\$ 198,313</u>	<u>\$ 197,701</u>	<u>0.3</u>

Table 3 summarizes the changes in our average interest-earning assets and interest-bearing liabilities as well as the average interest rates earned and paid on these assets and liabilities, respectively, for the quarters ended September 30, 2008 and 2007. The table also details increases and decreases in income and expense for each of the major categories of interest-earning assets and interest-bearing liabilities and analyzes the extent to which such variances are attributable to volume and rate changes. Interest income and yields are presented on a tax-equivalent basis assuming a federal income tax rate of 35%, which includes the tax-equivalent adjustment as presented in Table 2 above.

Net interest margin for third quarter 2008 of 3.63% was unchanged from third quarter 2007 despite the Federal Reserve's 325 basis point decrease in the federal funds rate over the past year. Third quarter 2008 net interest margin reflects our strong core deposit base and our ability to effectively manage our cost of funds. With approximately one-half of our loan portfolio tied to floating indices, the decline in the Federal Reserve's federal funds rate resulted in a decline of 182 basis points in average loan yields from third quarter 2007. This negative impact was offset by a shift to less expensive wholesale borrowing from

money market and time deposits, a widening of loan spreads, and expanded spreads on our investment portfolio as the interest rate yield curve steepened.

As shown in Table 3, third quarter 2008 tax-equivalent interest income declined \$18.0 million compared to third quarter 2007. The increase in interest-earning assets increased interest income by \$6.7 million, while a decline in the average rate earned on interest-earning assets reduced interest income by \$24.7 million. Third quarter 2008 interest expense declined \$20.7 million compared to third quarter 2007. The increase in interest-bearing liabilities increased interest expense by \$9.9 million, but the shift to less expensive wholesale borrowing, coupled with an overall decrease in the average rate paid on interest-bearing liabilities reduced interest expense by \$30.6 million.

As shown in Table 4, net interest margin was 3.58% for the first nine months of 2008 compared to 3.59% for the first nine months of 2007. Tax equivalent interest income declined \$50.0 million for the first nine months of 2008

compared to the first nine months of 2007. The increase in interest-earning assets increased interest income by \$4.6 million, while a decline in the average rate earned on interest-earning assets reduced interest income by \$54.6 million. Interest expense for the first nine months of 2008 declined \$50.6 million compared to the first nine months of 2007. The increase in interest-bearing liabilities increased interest expense by \$4.6 million, but the shift from time deposits to less expensive wholesale borrowing, coupled with an overall decrease in the average rate paid on interest-bearing liabilities reduced interest expense by \$55.2 million.

We continue to use multiple interest rate scenarios to rigorously assess the direction and magnitude of changes in interest rates and their impact on net interest income. A description and analysis of our market risk and interest rate sensitivity profile and management policies is included in Item 3, "Quantitative and Qualitative Disclosures About Market Risk," of this Form 10-Q.

32

residential mortgages, and in first quarter 2008, we began to maintain cashier check balances in-house rather than outsource the service in exchange for a fee. If revenues from mortgage sales and formerly outsourced cashier check balances were excluded from the 2007 periods, fee-based revenues for third quarter 2008 would have been relatively unchanged from 2007, while fee-based revenues for the nine months ended September 30, 2008 would have increased 1.5% from the same 2007 period.

Other service charges, commissions, and fees declined 13.7% for third quarter 2008 compared to third quarter 2007 and 15.2% for the first nine months of 2008 compared to the same 2007 period primarily due to ceasing origination of traditional residential mortgages and formerly outsourced cashier check balances. Further contributing to the decrease were declines in commissions received from the sale of third-party annuity and investment products of \$115,000 for third quarter 2008 and \$265,000 for the nine months ended September 30, 2008 compared to the same periods in 2007.

Despite strong trust sales, trust and investment advisory fees for third quarter 2008 declined 2.9% from third quarter 2007, reflecting the deteriorating equity environment.

Card-based fees increased for both third quarter 2008 and the first nine months of 2008 from the same 2007 periods, with most of the increase related to higher usage.

Other income, which consists primarily of safe deposit box rentals, gain on sale of assets, and miscellaneous recoveries, declined for both of the 2008 periods. Third quarter 2007 included a \$325,000 gain on the sale of assets, and the nine months ended September 30, 2007 included a reduction of an accrual for credit card conversion costs and a favorable lawsuit settlement.

Bank owned life insurance ("BOLI") represents benefit payments received and the change in cash surrender value ("CSV") of the policies, net of premiums paid. In the first nine months of 2008, we received \$812,000 of benefit payments. The increase in the CSV was attributable to earnings credited to policies, based on investments made by the insurer. The tax-equivalent yield on BOLI was 7.3% for third quarter 2008 compared to 6.7% for third quarter 2007. See the section titled "Investment in Bank Owned Life Insurance" for a discussion of our investment in BOLI.

Trading (losses) gains, net represent the change during the quarter and nine-month periods ended September 30, 2008 in the fair value of trading securities held on behalf of participants in our non-qualified deferred compensation plan. Such change is substantially offset by an adjustment to salaries and benefits expense.

We recognized a net securities loss for each period presented. For a discussion of net securities losses, see the section titled "Investment Portfolio Management."

Noninterest Expense

Table 6
Noninterest Expense Analysis
(

Merchant card expense	1,949	1,842	5.8	5,375	5,120	5.0
Other expenses	5,636	6,436	(12.4)	20,997	18,957	10.8
Total noninterest expense	\$ 48,436	\$ 49,981	(3.1)	\$ 147,724	\$ 148,873	(0.8)
Efficiency ratio	50.3%	51.9%		52.0%	52.1%	

Salaries and wages decreased in third quarter 2008 and for the nine-month period ended September 30, 2008 compared to those periods in 2007 as annual general merit increases and an increase in share-based compensation expense were more than offset by targeted staff reductions instituted in December 2007 and the first quarter of 2008 and a reduction in the obligation due to participants under deferred compensation plans.

The increase in professional services was due primarily to a short-term contract with an outside consultant for revenue and process enhancement services.

The decreases in advertising and promotions for third quarter 2008 and the nine-month period ended September 30, 2008 compared to those periods in 2007 reflect a difference in timing of expenditures from one year to another.

Other expenses for third quarter 2008 declined due to timing of expenditures compared to third quarter 2007. The year-to-date increase from 2007 is due primarily to expenses associated with the increase in other real estate owned.

The efficiency ratio expresses noninterest expense as a percentage of tax-equivalent net interest income plus total fees and other income. Operating efficiency for the quarter and nine-month periods ended September 30, 2008 improved from the same periods in 2007.

Income Taxes

Our accounting policies underlying the recognition of income taxes in the Consolidated Statements of Condition and Income are included in Notes 1 and 16 to the Consolidated Financial Statements of our 2007 10-K.

The effective income tax rates for third quarter and nine-month periods ended September 30, 2008 were 3.2% and 7.2%, respectively, compared to 19.0% and 22.7% for the comparable periods in 2007.

Income tax expense totaled \$796,000 for third quarter 2008 compared to \$6.4 million for third quarter 2007 and \$5.9 million and \$25.1 million for the nine-month periods ended September 30, 2008 and 2007, respectively. During each period we recognized certain tax benefits due to favorable court decisions, tax audit developments, and legislative actions in accordance with FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, an

interpretation of FASB Statement No. 109, Accounting for Income Taxes ("FIN 48") that reduced our effective tax rate. We recognized tax benefits totaling \$2.5 million and \$1.4 million for third quarter 2008 and 2007, respectively, and \$9.3 million and \$1.4 million for the nine-month periods ended September 30, 2008 and 2007, respectively. In addition, we derive significant income from investments in tax-exempt securities and BOLI. In third quarter 2008 and the nine-month period ended September 30, 2008 we generated a greater portion of our pretax income from tax-exempt investments and BOLI than in the comparable periods in 2007, resulting in a lower effective tax rate.

The State of Illinois has enacted legislation that significantly changes the income sourcing rules relating to financial organizations. To date, the State has not issued regulations or other clarifying guidance. We have considered, to the extent possible, the impact of the legislation, and are currently evaluating opportunities under the new rules. Based on our assessment to date, the legislation is not expected to have a material impact on our 2008 state tax expense, but could result in a low single digit increase in our effective tax rate, excluding the \$9.3 million in recognized tax benefits, beginning in 2009.

FINANCIAL CONDITION

Investment Portfolio Management

We manage our investment portfolio to maximize the return on invested funds within acceptable risk guidelines, to meet pledging and liquidity requirements, and to adjust balance sheet interest rate sensitivity to insulate net interest income against the impact of changes in interest rates.

We adjust the size and composition of our securities portfolio according to a number of factors, including expected loan growth, anticipated changes in collateralized public funds on account, the interest rate environment, and the related value of various segments of the securities markets. The following provides a valuation summary of our investment portfolio.

Table 7

(1) The effective duration of the securities portfolio represents the estimated percentage change in the fair value of the securities portfolio given a 100 basis point change up or down in the level of interest rates. This measure is used as a gauge of the portfolio's price volatility at a single point in time and is not intended to be a precise predictor of future fair values, as such values will be influenced by a number of factors.

(2) Average life is presented in years and represents the weighted-average time to receive all future cash flows, using the dollar amount of principal paydowns, including estimated principal prepayments, as the weighting factor.

As of September 30, 2008, our securities portfolio totaled \$2.1 billion, decreasing 3.1% from December 31, 2007. During first quarter 2008 we took advantage of market conditions and the slope of the interest rate yield curve to sell \$221.1 million of securities, primarily collateralized mortgage obligations and other mortgage-backed securities, at a gain of \$5.9 million. We reinvested the majority of the proceeds back into similar investments and the remainder into higher-yielding debt securities, effectively replacing the yield with this new combination of securities. During the nine-month period ended September 30, 2008 we also recognized other-than-temporary impairments in the value of our collateralized debt obligations, totaling \$10.1 million, net of minor gains on sales of other investments.

Our collateralized debt obligations ("CDOs") are comprised of two distinct types of securities, trust-preferred CDOs and asset-backed CDOs, the latter having a book value of zero as of September 30, 2008.

Our investments in trust-preferred collateralized debt obligations are debt securities supported by the credit of the underlying banks and insurance companies. The unrealized loss on these securities as of September 30, 2008 of \$14.0 million reflects the market's temporary negative bias toward structured investment vehicles given the current interest rate and liquidity environment. We do not believe this loss is an other-than-temporary impairment. We expect no change in our net cash flows from these investments from what was originally anticipated, and we have both the intent and ability to hold them until maturity or recovery. Our estimation of cash flows for these investments and resulting fair values were based upon our own cash flow modeling in accordance with FASB No. 157, *Fair Value Measurements*, as described in Note 9 of "Notes to Consolidated Financial Statements".

Our investments in asset-backed collateralized debt obligations are debt securities supported by underlying collateral, including sub-prime mortgages. In first quarter 2008, we recognized a \$2.3 million impairment related to these CDOs. In second quarter 2008, we recognized an additional \$6.0 million impairment, and in third quarter 2008, we recognized an impairment of \$1.8 million. One of the securities for which we recorded an impairment in first quarter 2008 was subsequently sold in second quarter 2008 for a realized gain of \$1.4 million. This portfolio has a zero book value at September 30, 2008.

State and municipal securities have an unrealized loss of \$43.9 million at September 30, 2008 compared to an unrealized gain of \$5.2 million at December 31, 2007. This adverse change in fair value is due to the uncertainty in the marketplace and the significant lack of liquidity for these debt securities. These securities continue to carry investment grade ratings with the bulk

of them supported by the general revenues of the issuing governmental entity. We do not believe the unrealized loss on any of these is other than temporary.

Other securities include corporate bonds and other miscellaneous equity securities. We do not believe the unrealized loss on any of these is other than temporary.

Consumer loans excluding indirect installment	\$ 735,176		\$ 751,382		(2.9)
Total loans excluding indirect installment	\$ 5,207,867		\$ 4,930,572		7.5

Outstanding loans totaled \$5.2 billion as of September 30, 2008, an annualized increase of 6.9% from December 31, 2007. The increase since December 2007 was led by growth in commercial real estate, specifically office, retail, and industrial, and commercial and industrial lending. The decline in consumer loans was primarily due to continued run-off of indirect loans. The decline in indirect installment loans from December 31, 2007 reflects our election in 2004 to cease indirect auto lending activities. In December 2007, we elected to discontinue originating traditional home mortgages as well. The Company feels it is well positioned to both pursue and take advantage of prudent, targeted lending opportunities.

(1)

Certain loans presented here as of December 31, 2007 were subsequently redistributed to more appropriate categories.

Reserve for Loan Losses

We maintain a reserve for loan losses to absorb probable losses inherent in the loan portfolio. The reserve for loan losses consists of three components: (i) specific reserves established for expected losses on individual loans for which the recorded investment in the loan exceeds the value of the loan; (ii) reserves based on historical loan loss experience for each loan category; and (iii) reserves based on general, current economic conditions as well as specific economic factors believed to be relevant to the markets in which we operate. Management evaluates the sufficiency of the reserve for loan losses based on the combined total of specific, historical loss, and general components. Management believes that the reserve for loan losses of \$69.8 million is adequate to absorb credit losses inherent in the loan portfolio as of September 30, 2008.

For a summary of the changes in the reserve for loan losses during the quarters ended September 2008 and 2007, refer to Note 5 of "Notes to Consolidated Financial Statements."

Table 10
Reserve for Loan Losses

(Dollar amounts in thousands)

	2008			2007	
	September 30	June 30	March 31	December 31	September 30
As of the period ended					
Reserve for loan losses	\$ 69,811	\$ 66,104	\$ 64,780	\$ 61,800	\$ 61,412
Total loans	5,223,582	5,182,355	5,045,765	4,963,672	4,931,472
Reserve for loan losses to loans	1.34%	1.28%	1.28%	1.25%	1.25%
Reserve for loan losses to nonperforming loans	126%	259%	376%	330%	481%
For the quarter ended					
Provision for loan losses	\$ 13,029	\$ 5,780	\$ 9,060	\$ 2,042	\$ 470
Net loans charged-off	9,322	4,456	6,080	1,654	1,449
Net loans charged-off to average loans, annualized	0.71%	0.35%	0.49%	0.13%	0.12%

We increased our reserve for loan losses to \$69.8 million as of September 30, 2008, up \$3.7 million from June 30, 2008 and \$8.0 million from December 31, 2007. The reserve for loan losses to loans was 1.34% as of September 30, 2008, up from 1.25% as of December 31, 2007. Nonperforming loans were covered 1.26 times by the loan loss reserve as of September 30, 2008. Total loans charged-off, net of recoveries, in third quarter 2008 were 0.71% of average loans.

During third quarter 2008, net charge-offs totaled \$9.3 million as compared to \$1.4 million in third quarter 2007, with residential land and development loans accounting for substantially all of the increase. Provision for losses for third quarter 2008 totaled \$13.0 million and exceeded net charge-offs by 39.8%.

The accounting policies underlying the establishment and maintenance of the reserve for loan losses are discussed in Notes 1 and 6 to the Consolidated Financial Statements of our 2007 10-K.

Nonperforming Assets

Nonperforming assets include loans for which the accrual of interest has been discontinued, loans for which the terms have been renegotiated to provide for a reduction or deferral of interest and principal due to a weakening of the borrower's financial condition, and real estate that has been acquired primarily through foreclosure and is awaiting disposition. For a detailed discussion of our policy on accrual of interest on loans, see Note 1 to the Consolidated Financial Statements of our 2007 10-K.

Loans past due 90 days and still accruing interest are not included in nonperforming assets and continue to accrue interest because they are adequately secured by collateral, in the process of collection, and reasonably expected to result in repayment or restoration to current status.

--	-------	-------	-------	-------

N/A - Not applicable.

As expected, credit quality trends for the quarter were negatively impacted by continued housing market stress, particularly in the residential land and development segments of the loan portfolio. This segment, representing 9.8% of the overall loan

31

portfolio, was originally underwritten to loan-to-value guidelines of 65% for unimproved land and 75% for developed land, thus providing protection as values decline. We are aggressively engaged with our builder/developer clients to determine the best solutions to maximize value for the entire segment. In future quarters, the migration of troubled loans from performing to nonperforming and, in some cases, to OREO and finally to cash repayment will vary depending upon the adopted solution. We have both realigned and increased our credit remediation staffing in response to deteriorating credit trends both in this segment and overall.

Nonperforming assets plus 90 days past due loans to total loans plus foreclosed real estate was 2.22% at September 30, 2008 compared to 0.92% at December 31, 2007. Such increase is related primarily to loans to home builders and developers, substantially all of whom are in the greater Chicagoland area.

Nonperforming loans at September 30, 2008 were \$55.6 million, or 1.06% of total loans, an increase of \$36.8 million from December 31, 2007, with most of the increase in the residential land and development category.

The increase in the nonaccrual residential land and development loans of \$28.2 million from December 31, 2007 to September 30, 2008 was due to loans to five large Chicago homebuilders. In first quarter 2008, we charged off \$447,000 of the outstanding loan to one builder and reclassified the \$4.0 million remainder of the loan to nonaccrual. This loan was subsequently moved to OREO. The remaining balance is in line with a recent appraisal on the underlying collateral. In second quarter 2008, we reclassified a \$7.7 million loan to another builder to nonaccrual. The balance of this loan is also in line with a recent appraisal on the underlying collateral. In third quarter 2008, we reclassified three additional builder loans totaling \$20.6 million to nonaccrual. The balances for each are supported by recent appraisals on the underlying collateral.

The increase in nonaccrual commercial and industrial loans is primarily related to a single commercial credit of \$5.5 million operating in the transportation industry.

The increase in restructured loans relates to another residential real estate developer. Of a \$5.0 million loan to this developer, we received a payment of \$1.0 million, charged off \$2.0 million, and restructured the remaining \$2.0 million. The \$2.0 million currently included in restructured loans is expected to perform in accordance with the restructured terms.

OREO increased \$17.6 million from December 31, 2007 to September 30, 2008, with most of the increase occurring in the third quarter of 2008. We enforced our rights to collateral underlying troubled loans with residential land and development properties comprising 77.4% of total OREO. All properties are recorded at estimated net realizable values and are being aggressively marketed.

Loans past due 90 days and still accruing totaled \$37.3 million as of September 30, 2008, up \$16.2 million from December 31, 2007 but approximately the level as of June 30, 2008. Residential land and development loans represent 47.2% of this total. The increase in the 90 days past due loans from December 31, 2007 was due primarily to nine

loans, the majority of which are residential land and development loans. Concentrated in the Chicagoland market, residential development represents a business in which we have been profitably engaged for more than 20 years and represents 18.0% of our \$2.8 billion real estate commercial and construction portfolio. We remain fully engaged and proactive with our customers in order to recognize and deal with credit issues at their onset.

We expect our nonperforming assets will trend upward in the near term, given the pressure on housing sales and the resulting impact on our residential land and development portfolio, with charge-offs for the fourth quarter remaining at an elevated level.

Our disclosure with respect to impaired loans is contained in Note 5 of "Notes to Consolidated Financial Statements".

INVESTMENT IN BANK OWNED LIFE INSURANCE

We purchase life insurance policies on the lives of certain directors, officers, and employees and are the sole owner and beneficiary of the policies. We invest in these policies, known as BOLI, to provide an efficient form of funding for long-term retirement and other employee benefit costs. Therefore, our BOLI policies are intended to be long-term investments to provide funding for long-term liabilities. We record these BOLI policies as a separate line item in the Consolidated Statements of Condition at each policy's respective cash surrender value, with changes recorded in noninterest income in the Consolidated Statements of Income. As of September 30, 2008, our BOLI assets amounted to \$207.4 million, and the income we recorded for the nine-month period then ended was \$6.5 million.

32

Of our total BOLI portfolio, 22.3% is in general account life insurance distributed between 10 insurance carriers, all of whom carry investment grade ratings. This general account life insurance typically includes a feature guaranteeing minimum returns. The remaining 77.7% is in separate account life insurance, which is managed by third party investment advisors under pre-determined investment guidelines. Stable value protection is a feature available with respect to separate account life insurance policies that is designed to protect within limits a policy's cash surrender value from market fluctuations on underlying investments. Our entire separate account portfolio has stable value protection, purchased from a highly rated financial institution. To the extent the fair value of the underlying securities falls below 80% of the cash surrender value, the cash surrender value will either be adjusted for the difference or transferred to a short duration money market fund.

As of September 30, 2008, \$110.0 million, or 55%, was held in a separate account that had a fair value of 79.5%; requiring the cash surrender value to be adjusted for third quarter 2008 by \$477,000 to restore the fair value to 80% of cash surrender value. The investments underlying these holdings are invested in longer duration, investment-grade securities, the performance of which has been negatively impacted by continued market volatility and risk aversion. Future declines in fair value below current levels could require additional contributions and negatively impact BOLI income. Remaining separate account holdings reflect fair market values ranging from 84% to 96%.

For third quarter 2008, the underlying tax-equivalent investment yield on all BOLI holdings was 7.31%. Given the continued negative market performance and rapid decline in interest rates, subsequent quarters are expected to trend downward and be in the range of 3.30% to 4.30%. The Company is currently reviewing options to alter the mix of underlying separate account holdings, which could further influence income performance.

FUNDING AND LIQUIDITY MANAGEMENT

The following table provides a comparison of average funding sources for the quarters ended September 30, 2008, December 31, 2007, and September 30, 2007. We believe that average balances, rather than period-end balances, are more meaningful in analyzing funding sources because of the inherent fluctuations that may occur on a monthly basis within most deposit categories.

Table 12
Funding Sources - Average Balances

(Dollar amounts in thousands)

	Quarters Ended			% Change	
	September 30, 2008	December 31, 2007	September 30, 2007	09/30/08 vs. 12/31/07	09/30/08 vs. 09/30/07
Demand deposits	\$ 1,053,530	\$ 1,050,954	\$ 1,051,292	0.2	0.2

Brokered deposits	51,585	97,448	64,878	(47.1)	(20.5)
Total time deposits	2,170,030	2,240,336	2,208,876	(3.1)	(1.8)
Total deposits	5,762,537	5,820,191	5,839,790	(1.0)	(1.3)
Repurchase agreements	443,837	398,032	419,561	11.5	5.8
Federal funds purchased	362,232	111,771	141,582	224.1	155.8
Federal Home Loan Bank ("FHLB") advances	515,008	536,238	531,925	(4.0)	(3.2)
Other borrowed funds	155,326	-	-	NM	NM
Total borrowed funds	1,476,403	1,046,041	1,093,068	41.1	35.1
Subordinated debt	232,458	227,973	226,180	2.0	2.8
Total funding sources	\$ 7,471,398	\$ 7,094,205	\$ 7,159,038	5.3	4.4
Average interest rate paid on borrowed funds	2.55%	4.61%	4.97%		
Weighted-average maturity of FHLB advances	4.4 months	7.4 months	6.8 months		
Weighted-average interest rate of FHLB advances	2.27%	3.62%	4.99%		

N/M - Not meaningful.

Total transactional deposits increased \$12.7 million from December 31, 2007, due to increases in NOW account balances, partially offset by a decline in money market accounts.

Total average deposits for third quarter 2008 decreased 1.3% from third quarter 2007 and 1.0% from fourth quarter 2007. We funded loan growth with borrowed funds at advantageous rates compared to rates currently being paid by some in the marketplace for customer deposits, especially money market and time deposits.

Securities sold under agreements to repurchase and federal funds purchased generally mature within 1 to 90 days from the transaction date. Other borrowed funds consist of term auction facilities issued by the Federal Reserve Bank that mature within 90 days.

MANAGEMENT OF CAPITAL

Capital Measurements

The Federal Reserve Board ("FRB"), the primary regulator of the Company and the Bank, establishes minimum capital requirements that must be met by member institutions. We have managed our capital ratios to consistently maintain such measurements in excess of the FRB minimum levels to be considered "well-capitalized," which is the highest capital category established.

The following table presents our consolidated measures of capital as of the dates presented and the capital guidelines established by the FRB to be categorized as "well-capitalized."

Table 13
Capital Measurements

(Dollar amounts in thousands)

	September 30, 2008	September 30, 2007	December 31, 2007	Regulatory Minimum For "Well-Capitalized"	Excess Over Required Minimums at 9/30/08
Regulatory capital ratios:					
Total capital to risk-weighted assets	12.04%	12.17%	11.58%	10.00%	\$ 132,185
Tier 1 capital to risk-weighted assets	9.42%	9.59%	9.03%	6.00%	221,494
Tier 1 leverage to average assets	7.59%	7.75%	7.46%	5.00%	208,036
Tangible equity ratios:					
Tangible equity to tangible assets	5.44%	5.77%	5.58%	(1)	
Tangible equity, excluding other comprehensive loss, to tangible assets	6.09%	6.25%	5.73%	(1)	
Tangible equity to risk-weighted assets	6.69%	7.01%	6.87%	(1)	

(1) Ratio is not subject to formal FRB regulatory guidance. Tangible equity equals total equity less goodwill and other intangible assets, and tangible assets equals total assets less goodwill and other intangible assets.

Stock Repurchase Programs

If we elect to participate in the Capital Purchase Program, our ability to repurchase shares of the Company's common stock will be subject to the applicable restrictions of this program for 3 years following the sale of the preferred stock.

See "Recent Developments."

The following table summarizes purchases made by or on our behalf, or by any "affiliated purchaser" (as defined in Rule 10b-18(a)(3) under the Securities Exchange Act of 1934), of our common stock during the quarter ended September 30, 2008 pursuant to a repurchase program approved by our Board of Directors on November 27, 2007. Up to 2.5 million shares of our common stock may be repurchased, and the total remaining authorization under the program was 2,494,747 shares as of September 30, 2008. The repurchase program has no set expiration or termination date.

34

Table 14
Issuer Purchases of Equity Securities

(Number of shares in thousands)

	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of a Publicly Announced Plan or Program	Maximum Number of Shares that May Yet Be Purchased Under the Plan or Program
(1)				
July 1 - July 31, 2008	-	\$ -	-	2,494,747
August 1 - August 31, 2008	3,307	23.79	-	2,494,747
September 1 - September 30, 2008	-	-	-	2,494,747
Total	<u>3,307</u>	<u>\$ 23.79</u>	<u>-</u>	

(1) Consists of shares acquired pursuant to our share-based compensation plans. Under the terms of these plans, we accept shares of common stock from option holders if they elect to surrender previously-owned shares upon exercise to cover the exercise price of the stock options or, in the case of restricted shares of common stock, the withholding of shares to satisfy tax withholding obligations associated with the vesting of restricted shares.

Dividends

We declared dividends of \$0.31 per common share in third quarter 2008, up 5.1% from the quarterly dividend per share declared in third quarter 2007 of \$0.295. The dividend payout ratio, which represents the percentage of dividends declared to stockholders to earnings per share, was 62.0% for third quarter 2008 and 53.6% for third quarter 2007. Based on the closing stock price at September 30, 2008 of \$24.24, the annualized dividend yield on our common stock was 5.1%.

If we elect to participate in the Capital Purchase Program, our ability to increase common stock dividends will be subject to the applicable restrictions of this program for 3 years following the sale of the preferred stock.

CRITICAL ACCOUNTING POLICIES

Our consolidated financial statements are prepared in accordance with GAAP and are consistent with predominant practices in the financial services industry. Critical accounting policies are those policies that management believes are the most important to our financial position and results of operations. Application of critical accounting policies requires management to make estimates, assumptions, and judgments based on information available at the date of the financial statements that affect the amounts reported in the financial statements and accompanying notes. Future changes in information may affect these estimates, assumptions, and judgments, which, in turn, may affect amounts reported in the financial statements.

We have numerous accounting policies, of which the most significant are presented in Note 1, "Summary of Significant Accounting Policies," to the Consolidated Financial Statements of our 2007 10-K. These policies, along with the disclosures presented in the other financial statement notes and in this discussion, provide information on how significant assets and liabilities are valued in the financial statements and how those values are determined. Based on the valuation techniques used and the sensitivity of financial statement amounts to the methods, assumptions, and estimates underlying those amounts, management has determined that our accounting policies with respect to the reserve for loan losses, evaluation of impairment of securities, and income taxes are the accounting areas requiring subjective or complex judgments that are most important to our financial position and results of operations, and, as such, are considered to be critical accounting policies, as discussed below.

Reserve for Loan Losses

Determination of the reserve for loan losses is inherently subjective as it requires significant estimates, including the amounts and timing of expected future cash flows on impaired loans, estimated losses on pools of homogeneous loans based on historical loss experience, and consideration of current economic trends, all of which may be susceptible to significant change. Credit exposures deemed to be uncollectible are charged-off against the reserve, while recoveries of amounts previously charged-off are credited to the reserve. Additions to the reserve for loan losses are charged to operating expense through the provision for loan losses. The amount charged to operating expense in any given year is dependent upon a number of factors including historic loan growth and changes in the composition of the loan portfolio, net charge-off levels,

and our assessment of the reserve for loan losses. For a full discussion of our methodology of assessing the adequacy of the reserve for loan losses, see Note 1, "Summary of Significant Accounting Policies," to the Consolidated Financial Statements of our 2007 10-K.

Evaluation of Securities for Impairment

Securities that we have the ability and intent to hold until maturity are classified as securities held-to-maturity and are accounted for using historical cost, adjusted for amortization of premium and accretion of discount. Trading securities are carried at fair value, with unrealized gains and losses recorded in other noninterest income. All other securities are classified as securities available-for-sale and are carried at fair value.

The fair values of securities are based on quoted prices obtained from third party pricing services or dealer market participants where a ready market for such securities exists. Where such a market does not exist, as for our collateralized trust-preferred debt obligations ("TRUPs"), we have estimated fair value using our own cash flow model. This model was created by a structured credit valuation firm with our assistance. It uses independently verifiable historical data, as well as current information from the market, such as equity volatility, to calculate the probability of default by any of the entities comprising the underlying collateral pool and the ensuing cash flows to our particular tranche for each TRUP. The model uses assumptions that are subject to management's judgment and which can significantly impact the resulting fair values. We believe the model uses reasonable assumptions to estimate fair values where no market exists for these investments. Unrealized gains and losses on securities available-for-sale

are reported, on an after-tax basis, as a separate component of stockholders' equity in accumulated other comprehensive income. Interest income is reported net of amortization of premium and accretion of discount.

Realized securities gains or losses are reported in securities gains (losses), net in the Consolidated Statements of Income. The cost of securities sold is based on the specific identification method. On a quarterly basis, we make an assessment to determine whether there have been any events or circumstances to indicate that a security for which there is an unrealized loss is impaired on an other-than-temporary basis. The Company considers many factors including the severity and duration of the impairment; whether anticipated cash flows have been adversely affected, the intent and ability of the Company to hold the security for a period of time sufficient for a recovery in value; recent events specific to the issuer or industry; and for debt securities, external credit ratings and recent downgrades. The term other-than-temporary is not intended to indicate that the decline is permanent. It indicates that the prospects for near-term recovery are not necessarily favorable or that there is a lack of evidence to support fair values greater than or equal to the carrying value of the investment. Securities for which there is an unrealized loss that is deemed to be other than temporary are written down to fair value with the write-down recorded as a realized loss and included in securities gains (losses), net. For additional discussion on securities, see Notes 1 and 3 to the Consolidated Financial Statements of our 2007 Form 10-K.

Income Taxes

We determine our income tax expense based on management's judgments and estimates regarding permanent differences in the treatment of specific items of income and expense for financial statement and income tax purposes. These permanent differences result in an effective tax rate, which differs from the federal statutory rate. In addition, we recognize deferred tax assets and liabilities, recorded in the Consolidated Statements of Condition, based on management's judgments and estimates regarding timing differences in the recognition of income and expenses for financial statement and income tax purposes.

We must also assess the likelihood that any deferred tax assets will be realized through the reduction or refund of taxes in future periods and establish a valuation allowance for those assets for which recovery is unlikely. In making this assessment, management must make judgments and estimates regarding the ability to realize the asset through carryback or carryforward to taxable income in prior or future years, the future reversal of existing taxable temporary differences, future taxable income, and the possible application of future tax planning strategies. We have determined a valuation allowance is not required for any deferred tax assets as of September 30, 2008, although there is no guarantee that those assets will be recognizable in future periods. For additional discussion of income taxes, see Note 1, "Summary of Significant Accounting Policies," and Note 16, "Income Taxes," to the Consolidated Financial Statements of the our 2007 10-K.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the risk of loss arising from adverse changes in the fair value of financial instruments due to changes in interest rates, exchange rates, and equity prices. Interest rate risk is our primary market risk and is the result of repricing, basis, and option risk. A description and analysis of our interest rate risk management policies is included in Item 7A, "Quantitative and Qualitative Disclosures about Market Risk," contained in our 2007 10-K

We seek to achieve consistent growth in net interest income and net income while managing volatility that arises from shifts in interest rates. The Bank's Asset and Liability Management Committee ("ALCO") oversees financial risk management by developing programs to measure and manage interest rate risks within authorized limits set by the Bank's Board of Directors. ALCO also approves the Bank's asset/liability management policies, oversees the formulation and implementation of strategies to improve balance sheet positioning and earnings, and reviews the

Bank's interest rate sensitivity position. Management uses net interest income and economic value of equity simulation modeling tools to analyze and capture short-term and long-term interest rate exposures.

Net Interest Income Sensitivity

The analysis of net interest income sensitivities assesses the magnitude of changes in net interest income resulting from changes in interest rates over a 12-month horizon using multiple rate scenarios. These scenarios include, but are not limited to, a "most likely" forecast, a flat to inverted or unchanged rate environment, a gradual increase and decrease of 200 basis points that occurs in equal steps over a six-month time horizon, and immediate increases and decreases of 200 and 300 basis points.

This simulation analysis is based on actual cash flows and repricing characteristics for balance sheet and off-balance sheet instruments and incorporates market-based assumptions regarding the effect of changing interest rates on the prepayment rates of certain assets and liabilities. This simulation analysis includes management's projections for activity levels in each of the product lines we offer. The analysis also incorporates assumptions based on the historical behavior of deposit rates and balances in relation to interest rates. Because these assumptions are inherently uncertain, the simulation analysis cannot definitively measure net interest income or predict the impact of the fluctuation in interest rates on net interest income. Actual results may differ from simulated results due to timing, magnitude, and frequency of interest rate changes as well as changes in market conditions and management strategies.

We monitor and manage interest rate risk within approved policy limits. Our current interest rate risk policy limits are determined by measuring the change in net interest income over a 12-month horizon assuming a 200 basis point gradual increase and decrease in all interest rates compared to net interest income in an unchanging interest rate environment. Current policy limits this exposure to plus or minus 8% of the anticipated level of net interest income over the corresponding 12-month horizon assuming no change in current interest rates.

Analysis of Net Interest Income Sensitivity

(Dollar amounts in thousands)

	Gradual Change in Rates ⁽¹⁾		Immediate Change in Rates			
	-200	+200	-200	+200	-300	+300
September 30, 2008:						
Dollar change	\$ (8,233)	\$ (18,960)	\$ (13,089)	\$ (22,616)	\$ (30,232)	\$ (30,426)
Percent change	-3.5%	-7.9%	-5.5%	-9.5%	-12.7%	-12.7%
December 31, 2007:						
Dollar change	\$ 5,587	\$ (14,594)	\$ 5,928	\$ (18,088)	\$ 1,559	\$ (24,369)
Percent change	+2.2%	-5.8%	+2.3%	-7.1%	+0.6%	-9.6%

Reflects an assumed uniform change in interest rates across all terms that occurs in equal steps over a (1) six-month horizon.

At September 30, 2008, our interest rate sensitivity profile, assuming a gradual upward change in interest rates, reflected a slightly greater negative exposure to rising interest rates in comparison to December 31, 2007. Conversely, in a falling interest rate environment, our exposure reflected a negative position as of September 30, 2008 in comparison to a positive position as of December 31, 2007. The change in earnings risk is the result of a reduction in the duration of borrowed funds

and an increase in the amount of short-term funding. These short-term liabilities increase the sensitivity of interest expense to rising interest rates, which create a greater benefit in a lower interest rate environment. This benefit is mitigated, however, by a lack of repricing potential on transaction accounts. Market rates, specifically the federal funds target rate and the prime rate, have declined 275 basis points from December 31, 2007 to early October 2008. Rates on transaction accounts have also declined, but with the federal funds target currently at 1.50%, the opportunity to further reduce interest rates on short-term transactional account balances is minimal.

Economic Value of Equity

In addition to the simulation analysis, management uses an economic value of equity sensitivity technique to understand the risk in both shorter- and longer-term positions and to study the impact of longer-term cash flows on earnings and capital. In determining the economic value of equity, we discount present values of expected cash flows on all assets, liabilities, and off-balance sheet contracts under different interest rate scenarios. The discounted present value of all cash flows represents our economic value of equity. Economic value of equity does not represent the true fair value of asset, liability, or derivative positions because certain factors are not considered, such as credit risk, liquidity risk, and the impact of future changes to the balance sheet. Our policy guidelines call for preventive measures to be taken in the event that an immediate increase or decrease in interest rates of 200 basis points is estimated to reduce the economic value of equity by more than 20%.

Analysis of Economic Value of Equity

(Dollar amounts in thousands)

	Immediate Change in Rates	
	-200	+200
September 30, 2008:		
Dollar change	\$ (91,607)	\$ (86,500)
Percent change	-6.5%	-6.1%
December 31, 2007:		
Dollar change	\$ (40,870)	\$ (89,164)
Percent change	-3.2%	-7.1%

As of September 30, 2008, the estimated sensitivity of the economic value of equity to changes in interest rates reflected a greater negative exposure to lower interest rates and a slightly less negative exposure to higher interest rates compared to that existing at December 31, 2007. The increased exposure to falling interest rates is due primarily to the present value of transaction account balances already reflecting significant interest rate reductions since December 31, 2007, reducing the amount available for future interest rate reductions.

ITEM 4. CONTROLS AND PROCEDURES

At the end of the period covered by this report, (the "Evaluation Date"), the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's President and Chief Executive Officer and its Executive Vice President and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rules 13a-15(e) and 15d-15 of the Securities and Exchange Act of 1934 (the "Exchange Act"). Based on that evaluation, the President and Chief Executive Officer and Executive Vice President and Chief Financial Officer concluded that as of the Evaluation Date, the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized, and

reported within the time periods specified in Securities and Exchange Commission rules and forms. There were no changes in the Company's internal control over financial reporting during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The Company disclosed any material pending litigation matters relating to the Company in Item 3 of Part I of its Annual Report on Form 10-K for the year ended December 31, 2007. For the quarter ended September 30, 2008, there were no material developments with regard to any previously disclosed matters, and no other matters were reported during the period,

38

although there were certain legal proceedings pending against the Company and its subsidiaries in the ordinary course of business at September 30, 2008. Based on presently available information, the Company believes that any liabilities arising from these proceedings would not have a material adverse effect on the consolidated financial position of the Company.

ITEM 1A. RISK FACTORS

The Company provided a discussion of certain risks and uncertainties faced by the Company in its Annual Report on Form 10-K for the year ended December 31, 2007. However, these factors may not be the only risks or uncertainties the Company faces. Additional risks that the Company does not yet know of or that it currently thinks are immaterial may also impair its business operations.

Based on currently available information, the Company has identified the following additional risk factors:

The current environment in the financial sector may affect the Company's business.

The capital and credit markets have been experiencing volatility and disruption for more than 12 months. In addition, markets have produced significant downward pressure on financial stock prices, in some cases, without regard to the underlying financial strength of the issuer. If this disruption continues and the industry continues to experience a lack of confidence, lack of available credit, increased market volatility, and a reduction in business activity, the business of the Company, as well as its stock price, could be adversely affected.

There can be no assurance that the Emergency Economic Stabilization Act of 2008 will help stabilize the U.S. financial system.

On October 3, 2008, the President signed into law the *Emergency Economic Stabilization Act of 2008* (the "EESA") in response to the current crisis in the financial sector. The U.S. Department of the Treasury and banking regulators are implementing a number of programs under this legislation to address capital and liquidity issues in the banking system.

There can be no assurance as to the actual impact the EESA will have on the financial markets, including the extreme levels of volatility and limited credit availability currently being experienced by some institutions.

The market value of property securing certain real estate related loans might not, at any given time, be sufficient to satisfy the outstanding principal amount of the loan.

Significant decreases in the value of collateral securing certain real estate related loans could potentially affect the Company. In the event the Company is required to foreclose on a property securing a real estate related loan, there can be no assurance that it will recover funds in an amount equal to any remaining loan balance as a result of prevailing general economic conditions, real estate values, and other factors associated with the ownership of the property. As a result, the Company could sustain increased loan losses. Adverse changes in the economy may also have a negative effect on the ability of borrowers to make timely repayments of their loans, which could have an adverse impact on earnings. For detailed information regarding the Company's loan portfolio, including real estate related loans, please see Table 9, "Commercial Real Estate Loan Detail by Product Type," of Management's Discussion and Analysis.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Disclosure regarding the purchase of Company securities by the Company begins on page *35 of this Form 10-Q.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

ITEM 5. OTHER INFORMATION

None.
