

ARCHER DANIELS MIDLAND CO

Form 10-KT

February 28, 2013

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D. C. 20549
FORM 10-K

“ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

OR

x TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from July 1, 2012 to December 31, 2012

Commission file number 1-44
ARCHER-DANIELS-MIDLAND COMPANY
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

41-0129150
(I. R. S. Employer
Identification No.)

4666 Faries Parkway Box 1470
Decatur, Illinois
(Address of principal executive offices)

62525
(Zip Code)

217-424-5200
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, no par value	New York Stock Exchange Frankfurt Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes x No “

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes
" No x

Edgar Filing: ARCHER DANIELS MIDLAND CO - Form 10-KT

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☒

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer ☒

Non-accelerated Filer ☐

Accelerated Filer ☐

Smaller Reporting Company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

State the aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was last sold, or the average bid and asked price of such common equity, as of the last business day of the registrant's most recently completed second fiscal quarter.

Common Stock, no par value--\$17.6 billion

(Based on the closing sale price of Common Stock as reported on the New York Stock Exchange
as of December 31, 2012)

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date.

Common Stock, no par value—658,592,500 shares

(January 31, 2013)

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the proxy statement for the annual meeting of stockholders to be held May 2, 2013, are incorporated by reference into Part III.

SAFE HARBOR STATEMENT

This Form 10-K contains forward-looking information that is subject to certain risks and uncertainties that could cause actual results to differ materially from those projected, expressed, or implied by such forward-looking information. In some cases, you can identify forward-looking statements by our use of words such as "may, will, should, anticipates, believes, expects, plans, future, intends, could, estimate, predict, potential or contingent," the negative of these terms or other similar expressions. The Company's actual results could differ materially from those discussed or implied herein. Factors that could cause or contribute to such differences include, but are not limited to, those discussed in

this Form 10-K for the transition period ended December 31, 2012. Among these risks are legislative acts; changes in the prices of food, feed, and other commodities, including gasoline; and macroeconomic conditions in various parts of the world. To the extent permitted under applicable law, the Company assumes no obligation to update any forward-looking statements as a result of new information or future events.

PART I

Item 1. BUSINESS

Company Overview

Archer-Daniels-Midland Company (the Company) was incorporated in Delaware in 1923, successor to the Daniels Linseed Co. founded in 1902. The Company is one of the world's largest processors of oilseeds, corn, wheat, cocoa, and other agricultural commodities and is a leading manufacturer of protein meal, vegetable oil, corn sweeteners, flour, biodiesel, ethanol, and other value-added food and feed ingredients. The Company also has an extensive global grain elevator and transportation network to procure, store, clean, and transport agricultural commodities, such as oilseeds, corn, wheat, milo, oats, and barley, as well as processed agricultural commodities. The Company has significant investments in joint ventures. The Company expects to benefit from these investments, which typically aim to expand or enhance the Company's market for its products or offer other benefits including, but not limited to, geographic or product line expansion.

The Company's vision is to be the most admired global agribusiness while creating value and growing responsibly. The Company's strategy involves expanding the volume and diversity of crops that it merchandises and processes, expanding the global reach of its core model, and expanding its value-added product portfolio. The Company seeks to serve vital needs by connecting the harvest to the home and transforming crops into food and energy products. The Company desires to execute this vision and these strategies by conducting its business in accordance with its core values of operating with integrity, treating others with respect, achieving excellence, being resourceful, displaying teamwork, and being responsible.

During the past five years, the Company has significantly expanded its agricultural commodity processing and handling capacity through construction of new plants, expansion of existing plants, and the acquisition of plants and transportation equipment. There have been no significant dispositions during the last five years.

The Company's prior fiscal years ended annually on June 30. On May 3, 2012, the Board of Directors of the Company determined, in accordance with its Bylaws and upon the recommendation of the Audit Committee, that the Company's fiscal year shall begin on January 1 and end on December 31 of each year, starting January 1, 2013. The required transition period of July 1, 2012 to December 31, 2012 is included in this Form 10-K transition report.

Segment Descriptions

The Company's operations are classified into three reportable business segments: Oilseeds Processing, Corn Processing, and Agricultural Services. Each of these segments is organized based upon the nature of products and services offered. The Company's remaining operations are not reportable business segments, as defined by the applicable accounting standard, and are classified as Other. Financial information with respect to the Company's reportable business segments is set forth in Note 18 of "Notes to Consolidated Financial Statements" included in Item 8 herein, "Financial Statements and Supplementary Data."

Item 1. BUSINESS (Continued)

Oilseeds Processing

The Oilseeds Processing segment includes global activities related to the origination, merchandising, crushing, and further processing of oilseeds such as soybeans and soft seeds (cottonseed, sunflower seed, canola, rapeseed, and flaxseed) into vegetable oils and protein meals. Oilseeds products produced and marketed by the Company include ingredients for the food, feed, energy, and industrial products industries. Crude vegetable oils produced by the segment's crushing activities are sold "as is" or are further processed by refining, blending, bleaching, and deodorizing into salad oils. Salad oils are sold "as is" or are further processed by hydrogenating and/or interesterifying into margarine, shortening, and other food products. Partially refined oils are used to produce biodiesel or are sold to other manufacturers for use in chemicals, paints, and other industrial products. Oilseed protein meals are principally sold to third parties to be used as ingredients in commercial livestock and poultry feeds. In Europe and South America, the Oilseeds Processing segment includes origination and merchandising activities as adjuncts to its oilseeds processing assets. These activities include a network of grain elevators, port facilities, and transportation assets used to buy, store, clean, and transport grains and oilseeds. The Oilseeds Processing segment produces natural health and nutrition products and other specialty food and feed ingredients. In North America, cottonseed flour is produced and sold primarily to the pharmaceutical industry and cotton cellulose pulp is manufactured and sold to the chemical, paper, and filter markets. In South America, the Oilseeds Processing segment operates fertilizer blending facilities.

The Company has a 16.4% ownership interest in Wilmar International Limited (Wilmar), a Singapore publicly listed company. Wilmar, a leading agribusiness group in Asia, is engaged in the businesses of oil palm cultivation, oilseeds crushing, edible oils refining, sugar milling and refining, specialty fats, oleo chemicals, biodiesel and fertilizers manufacturing, and grains processing.

The Oilseeds Processing segment also includes activities related to the procurement, transportation and processing of cocoa beans into cocoa liquor, cocoa butter, cocoa powder, chocolate, and various compounds in North America, South America, Europe, Asia, and Africa for the food industry.

Golden Peanut Company LLC (Golden Peanut), a wholly owned subsidiary of the Company, is a major supplier of peanuts and peanut-derived ingredients to both the U.S. and export markets and operator of a peanut shelling facility in Argentina. The Company began consolidating the operating results of Golden Peanut in the third quarter of fiscal 2011.

Stratas Foods LLC, a joint venture between the Company and ACH Jupiter, LLC, a subsidiary of Associated British Foods, procures, packages, and sells edible oils in North America. The Company has a 50% ownership interest in this joint venture.

The Company has a 50% interest in Edible Oils Limited, a joint venture between the Company and Princes Limited to procure, package, and sell edible oils in the United Kingdom. The Company also formed a joint venture with Princes Limited in Poland to procure, package, and sell edible oils in Poland, Czech Republic, Slovakia, Hungary, and Austria.

The Company is a major supplier of agricultural commodity raw materials to Wilmar, Stratas Foods LLC, and Edible Oils Limited.

Item 1. BUSINESS (Continued)

Corn Processing

The Company's Corn Processing segment is engaged in corn wet milling and dry milling activities, with its asset base primarily located in the central part of the United States. The Corn Processing segment converts corn into sweeteners and starches, and bioproducts. Its products include ingredients used in the food and beverage industry including sweeteners, starch, syrup, glucose, and dextrose. Dextrose and starch are used by the Corn Processing segment as feedstocks for its bioproducts operations. By fermentation of dextrose, the Corn Processing segment produces alcohol, amino acids, and other specialty food and animal feed ingredients. Ethyl alcohol is produced by the Company for industrial use as ethanol or as beverage grade. Ethanol, in gasoline, increases octane and is used as an extender and oxygenate. The Corn Processing segment also includes amino acids such as lysine and threonine that are vital compounds used in swine feeds to produce leaner animals and in poultry feeds to enhance the speed and efficiency of poultry production. Corn gluten feed and meal, as well as distillers' grains, are produced for use as animal feed ingredients. Corn germ, a by-product of the wet milling process, is further processed into vegetable oil and protein meal. Other Corn Processing products include citric and lactic acids, lactates, sorbitol, xanthan gum, and glycols which are used in various food and industrial products. The Corn Processing segment includes the activities of a propylene and ethylene glycol facility and the Company's Brazilian sugarcane ethanol plant and related activities.

In fiscal 2012, the Company ended its commercial alliance with Metabolix, Inc. As a result of this decision, Telles LLC, the sales and marketing commercial alliance created to commercialize Mirel™, a bio-based plastic, will be dissolved and the production of Mirel™ on behalf of Telles LLC has ended.

Almidones Mexicanos S.A., in which the Company has a 50% interest, operates a wet corn milling plant in Mexico.

Eaststarch C.V. (Netherlands), in which the Company has a 50% interest, owns interests in companies that operate wet corn milling plants in Bulgaria, Hungary, Slovakia, and Turkey.

Red Star Yeast Company, LLC produces and sells fresh and dry yeast in the United States and Canada. The Company has a 40% ownership interest in this joint venture.

Agricultural Services

The Agricultural Services segment utilizes its extensive U.S. grain elevator, global transportation network, and port operations to buy, store, clean, and transport agricultural commodities, such as oilseeds, corn, wheat, milo, oats, rice, and barley, and resells these commodities primarily as food and feed ingredients and as raw materials for the agricultural processing industry. Agricultural Services' grain sourcing, handling, and transportation network provides reliable and efficient services to the Company's customers and agricultural processing operations. Agricultural Services' transportation network capabilities include barge, ocean-going vessel, truck, and rail freight services.

The Company has a 45% interest in Kalama Export Company, a grain export elevator in Washington.

Alfred C. Toepfer International (Toepfer), in which the Company has an 80% interest, is a global merchandiser of agricultural commodities and processed products. Toepfer consists of a headquarters in Hamburg, Germany and 36 sales offices worldwide. Toepfer operates inland, river, and export facilities in Argentina, Hungary, Romania, Ukraine, and the United States.

The Agricultural Services segment also includes the activities related to the origination and processing of wheat into wheat flour, the processing and distribution of formula feeds and animal health and nutrition products, and the

procurement, processing, and distribution of edible beans.

Prior to December 2012, the Company had a 23.2% interest in Gruma S.A.B. de C.V. (Gruma), the world's largest producer and marketer of corn flour and tortillas. Additionally, the Company had joint ventures in corn flour and wheat flour mills with and through Gruma. In December 2012, the Company sold its 23.2% interest in Gruma and the Gruma-related joint ventures.

Item 1. BUSINESS (Continued)

Other

Other includes the Company's remaining operations, primarily its financial business units, related principally to futures commission merchant activities and captive insurance.

ADM Investor Services, Inc., a wholly owned subsidiary of the Company, is a registered futures commission merchant and a clearing member of all principal commodities exchanges in the U.S. ADM Investor Services International, Ltd., a member of several commodity exchanges and clearing houses in Europe, ADMIS Hong Kong Limited, and ADMIS Singapore Pte. Limited, are wholly owned subsidiaries of the Company offering broker services in Europe and Asia. ADMISI Commodities Private Limited, in which the Company owns 51% interest, and ADMISI Forex India Private Limited, a wholly owned subsidiary of the Company, offer broker services in India.

Captive insurance, which includes Agrinational Insurance Company (Agrinational), a wholly owned subsidiary of the Company, provides insurance coverage for certain property, casualty, marine, credit, and other miscellaneous risks of the Company and participates in certain third-party reinsurance arrangements. ADM Crop Risk Services is a managing general agent which sells and services crop insurance policies to farmers. While Agrinational assumes some of the crop insurance risk, only an immaterial portion of this risk is retained by the Company after third-party reinsurance.

On September 30, 2011, the Company sold a majority ownership interest of Hickory Point Bank and Trust Company, fsb (Bank). The Bank was deconsolidated from the Company's consolidated financial statements in the first quarter of fiscal 2012. On December 12, 2012, the Company sold its remaining common equity interest in the Bank. The Bank continues to provide public banking and trust services, as well as cash management, transfer agency, and securities safekeeping services, for the Company.

Corporate

Compagnie Industrielle et Financiere des Produits Amylacs SA (Luxembourg) and affiliates, of which the Company has a 41.5% interest, is a joint venture which targets investments in food, feed ingredients and bioproducts businesses.

Methods of Distribution

Since the Company's customers are principally other manufacturers and processors, the Company's products are distributed mainly in bulk from processing plants or storage facilities directly to customers' facilities. The Company has developed a comprehensive transportation capability to efficiently move both commodities and processed products virtually anywhere in the world. The Company owns or leases large numbers of the trucks, trailers, railroad tank and hopper cars, river barges, towboats, and ocean-going vessels used to transport the Company's products to its customers.

Item 1. BUSINESS (Continued)

Concentration of Sales by Product

The following products account for 10% or more of net sales and other operating income for the following periods:

	% of Net Sales and Other Operating Income				
	Six Months Ended		Years Ended June 30,		
	December 31,		2012	2011	2010
	2012	2011	2012	2011	2010
Soybeans	20%	17%	19%	21%	22%
Corn	10%	12%	11%	12%	10%
Soybean Meal	11%	8%	9%	9%	12%

Status of New Products

The Company continues to expand the size and global reach of its business through the development of new products. The Company does not expect any of the following products to have a significant impact on the Company's net sales and other operating income in 2013.

The Company continues to broaden its portfolio of high stability low trans fats with the introduction of high oleic soy oil. This new high oleic soy oil is now being sold on a commercial basis.

The Company has begun commercial production of Clarisoy®, a unique transparent soy protein under an agreement with Burcon Technologies to exclusively manufacture, market, and sell the product. Clarisoy® is being used in low pH beverage applications as well as dairy replacement applications at a neutral pH.

New fiber products are also being developed that extend the current Fibersol® soluble fiber products as well as new insoluble fiber products from soybeans.

The Company, along with Phillips 66, is piloting a technology to produce renewable transportation biofuels from biomass and has successfully produced quantities of liquid transportation fuels. The Company is continuing to evaluate the economic viability of the technology.

The Company has developed a number of new biosurfactants for several new markets. Additional new products have been introduced in the agricultural adjuvant market that are used to emulsify herbicides and mineral nutrients in water for spray application on corn and soybean crops. Additional new products have also been developed for inks, paints, and coatings to serve as dispersants for pigments.

The Company has developed a feed product utilizing distillers dried yeast from corn wet mill stillage that will be introduced to customers in the aquaculture market in 2013. Efforts are underway to produce this product in early-stage commercial quantities. The feed product is a plant-based alternative to other protein sources such as fish meal or poultry meal.

The Company is producing commercial volumes of propylene glycol and semi-commercial quantities of isosorbide under its Evolution Chemicals™ line. The Company's propylene glycol is an industrial ingredient made from glycerin or sorbitol that is a drop-in replacement to petroleum-based propylene glycol. Derived from corn, isosorbide is a versatile chemical building block with wide ranging uses including the production of polyesters, polyurethanes,

polycarbonates, epoxy resins, detergents, surfactants, and additives for personal care and consumer products.

Item 1. BUSINESS (Continued)

Source and Availability of Raw Materials

Substantially all of the Company's raw materials are agricultural commodities. In any single year, the availability and price of these commodities are subject to factors such as changes in weather conditions, plantings, government programs and policies, competition, changes in global demand, changes in standards of living, and global production of similar and competitive crops. The Company's raw materials are procured from thousands of growers, grain elevators, and wholesale merchants in North America, South America, Europe, Asia, Australia, and Africa, pursuant primarily to short-term (less than one year) agreements or on a spot basis. The Company is not dependent upon any particular grower, elevator, or merchant as a source for its raw materials.

Patents, Trademarks, and Licenses

The Company owns valuable patents, trademarks, and licenses but does not consider any segment of its business dependent upon any single or group of patents, trademarks or licenses.

Seasonality, Working Capital Needs, and Significant Customers

Since the Company is widely diversified in global agribusiness markets, there are no material seasonal fluctuations in overall global processing volumes and the sale and distribution of its products and services. There is a degree of seasonality in the growing cycles, procurement, and transportation of the Company's principal raw materials: oilseeds, corn, wheat, cocoa beans, sugarcane, and other grains.

The price of agricultural commodities, which may fluctuate significantly and change quickly, directly affects the Company's working capital requirements. Because the Company has a higher portion of its operations in the northern hemisphere, principally North America and Europe, relative to the southern hemisphere, primarily South America, inventory levels typically peak after the northern hemisphere fall harvest and are generally lower during the northern hemisphere summer months. Working capital requirements have historically trended with inventory levels. No material part of the Company's business is dependent upon a single customer or very few customers. The Company has seasonal financing arrangements with farmers in certain countries around the world. Typically, advances on these financing arrangements occur during the planting season and are repaid at harvest.

Competition

The Company has significant competition in the markets in which it operates based principally on price, quality, and alternative products, some of which are made from different raw materials than those utilized by the Company. Given the commodity-based nature of many of its businesses, the Company, on an ongoing basis, focuses on managing unit costs and improving efficiency through technology improvements, productivity enhancements, and regular evaluation of the Company's asset portfolio.

Research and Development Expenditures

The Company's research and development expenditures are focused on responding to demand from customers' product development or formulation needs, improving processing efficiency, and developing food, feed, fuel, and industrial products from renewable agricultural crops. Research and development expense during the six months ended December 31, 2012 and 2011 and the years ended June 30, 2012, 2011, and 2010, net of reimbursements of government grants, was approximately \$28 million, \$29 million, \$56 million, \$60 million, and \$56 million, respectively. The Company does not expect these research and development expenses to have a significant effect on

net sales and other operating income in the next year.

Item 1. BUSINESS (Continued)

The Company is working with the U.S. Department of Energy's National Energy Technology Laboratory and other key academic and corporate partners on projects to demonstrate carbon capture and sequestration as a viable option for reducing carbon dioxide emissions from manufacturing operations. The first project, Illinois Basin Decatur Project led by Midwest Geological Sequestration Consortium, has finished construction and started operations in the first quarter of fiscal year ended June 30, 2012. The second project, the Illinois Industrial Carbon Capture & Sequestration, has met the milestone for completing the front end engineering designs and commenced construction in the fourth quarter of fiscal year ended June 30, 2012. This facility is expected to be operational in the third quarter of calendar year 2013.

The Company is continuing to invest in research to develop a broad range of industrial chemicals with an objective to produce key chemical building blocks that serve as a platform for producing a variety of commodity chemicals. The key chemical building blocks are derived from the Company's starch and oilseed-based feedstocks. Conversion technologies include utilizing expertise in both fermentation and catalysis. The chemicals pipeline includes the development of chemicals and intermediates that are currently produced from petrochemical resources as well as new-to-the-market bio-based products. The Company's current portfolio includes products that are in the early development phase and those that are close to pilot plant demonstration. In an effort to further advance the development of bio-based chemical technologies, the Company has partnered with the Center for Environmentally Beneficial Catalysis and has added research capabilities at the University of Kansas.

Environmental Compliance

During the six months ended December 31, 2012, \$36 million was spent specifically to improve equipment, facilities, and programs for pollution control and compliance with the requirements of various environmental agencies.

There have been no material effects upon the earnings and competitive position of the Company resulting from compliance with federal, state, and local laws or regulations enacted or adopted relating to the protection of the environment.

The Company's business could be affected in the future by national and global regulation or taxation of greenhouse gas emissions. In the United States, the U.S. Environmental Protection Agency (EPA) has adopted regulations requiring the owners of certain facilities to measure and report their greenhouse gas emissions, and the U.S. EPA has begun a process to regulate these emissions under the Clean Air Act. The U.S. EPA has also adopted rules regarding the construction and operation of new boilers that could greatly limit the construction of new coal-fired boilers. California is also moving forward with various programs to reduce greenhouse gases. Globally, a number of countries that are parties to the Kyoto Protocol have instituted or are considering climate change legislation and regulations. Most notable is the European Union Greenhouse Gas Emission Trading System. The Company has several facilities in Europe that participate in this system. It is difficult at this time to estimate the likelihood of passage, or predict the potential impact, of any additional legislation. Potential consequences could include increased energy, transportation and raw material costs and may require the Company to make additional investments in its facilities and equipment.

Number of Employees

The number of full-time employees of the Company was approximately 30,600 at December 31, 2012 and 30,200 at June 30, 2012. The net increase in the number of full-time employees is primarily related to business combinations and expansions.

Financial Information About Foreign and U.S. Operations

Item 1A, “Risk Factors,” and Item 2, “Properties,” includes information relating to the Company’s foreign and U.S. operations. Geographic financial information is set forth in Note 18 of “Notes to Consolidated Financial Statements” included in Item 8 herein, “Financial Statements and Supplementary Data”.

Item 1. BUSINESS (Continued)

Available Information

The Company's internet address is <http://www.adm.com>. The Company makes available, free of charge, through its website, the Company's annual reports on Form 10-K; quarterly reports on Form 10-Q; current reports on Form 8-K; Directors and Officers Forms 3, 4, and 5; and amendments to those reports, as soon as reasonably practicable after electronically filing such materials with, or furnishing them to, the Securities and Exchange Commission (SEC).

In addition, the Company makes available, through its website, the Company's Business Code of Conduct and Ethics, Corporate Governance Guidelines, and the written charters of the Audit, Compensation/Succession, Nominating/Corporate Governance, and Executive Committees.

References to our website address in this report are provided as a convenience and do not constitute, or should not be viewed as, an incorporation by reference of the information contained on, or available through, the website. Therefore, such information should not be considered part of this report.

The public may read and copy any materials filed by the Company with the SEC at the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains a website which contains reports, proxy and information statements, and other information regarding issuers that file information electronically with the SEC. The SEC's internet address is <http://www.sec.gov>.

Item 1A. RISK FACTORS

The availability and prices of the agricultural commodities and agricultural commodity products the Company procures, transports, stores, processes, and merchandises can be affected by weather conditions, disease, government programs, competition, and various other factors beyond the Company's control and could adversely affect the Company's operating results.

The availability and prices of agricultural commodities are subject to wide fluctuations due to changes in weather conditions, crop disease, plantings, government programs and policies, competition, changes in global demand, changes in standards of living, and global production of similar and competitive crops. These factors have historically caused volatility in the availability and prices of agricultural commodities and, consequently, in the Company's operating results and working capital requirements. Reduced supply of agricultural commodities due to weather-related factors or other reasons could adversely affect the Company's profitability by increasing the cost of raw materials and/or limiting the Company's ability to procure, transport, store, process, and merchandise agricultural commodities in an efficient manner. For example, the drought in North America in 2012 reduced the availability of corn and soybean inventories while prices increased. If the drought persists through 2013, the availability of agricultural commodities could be further diminished and prices could continue to be higher. High and volatile commodity prices can adversely affect the Company's ability to meet its liquidity needs.

Item 1A. RISK FACTORS (Continued)

The Company has significant competition in the markets in which it operates.

The Company faces significant competition in each of its businesses and has numerous competitors. The company competes for the acquisition of inputs such as agricultural commodities, workforce, and other materials and supplies. Additionally, competitors offer similar products and services, as well as alternative products and services, to the Company's customers. The Company is dependent on being able to generate net sales and other operating income in excess of cost of products sold in order to obtain margins, profits, and cash flows to meet or exceed its targeted financial performance measures and provide cash for operating, working capital, dividend, or capital expenditure needs. Competition impacts the Company's ability to generate and increase its gross profit as a result of the following factors. Pricing of the Company's products is partly dependent upon industry processing capacity, which is impacted by competitor actions to bring on-line idled capacity or to build new production capacity. Many of the products bought and sold by the Company are global commodities or are derived from global commodities. The markets for global commodities are highly price competitive and in many cases the commodities are subject to substitution. To compete effectively, the Company focuses on improving efficiency in its production and distribution operations, developing and maintaining appropriate market share, and providing high levels of customer service. Competition could increase the Company's costs to purchase raw materials, lower selling prices of its products, or reduce the Company's market share, which may result in lower and more inefficient operating rates and reduced gross profit.

Fluctuations in energy prices could adversely affect the Company's operating results.

The Company's operating costs and the selling prices of certain finished products are sensitive to changes in energy prices. The Company's processing plants are powered principally by electricity, natural gas, and coal. The Company's transportation operations are dependent upon diesel fuel and other petroleum-based products. Significant increases in the cost of these items, including any consequences of regulation or taxation of greenhouse gases, could adversely affect the Company's production costs and operating results.

The Company has certain finished products, such as ethanol and biodiesel, which are closely related to, or may be substituted for, petroleum products. Therefore, the selling prices of ethanol and biodiesel can be impacted by the selling prices of gasoline and diesel fuel. A significant decrease in the price of gasoline or diesel fuel could result in a significant decrease in the selling price of the Company's ethanol and biodiesel and could adversely affect the Company's revenues and operating results.

The Company is subject to economic downturns, which could adversely affect the Company's operating results.

The Company conducts its business and has substantial assets located in many countries and geographic areas. The Company's operations are principally in the United States and developed countries in Western Europe and South America, but the Company also operates in, or plans to expand or develop its business in, emerging market areas such as Asia, Eastern Europe, the Middle East, and Africa. Both developed and emerging market areas are subject to impacts of economic downturns, including decreased demand for the Company's products, reduced availability of credit, or declining credit quality of the Company's suppliers, customers, and other counterparties. In addition, emerging market areas could be subject to more volatile economic, political and market conditions. Economic downturns, such as what has occurred in Europe brought about by the European debt crisis, and volatile market conditions could adversely affect the Company's operating results and ability to execute its business strategies.

Item 1A. RISK FACTORS (Continued)

Government policies, mandates, and regulations, in general; government policies, mandates, and regulations specifically affecting the agricultural sector and related industries; and political instability and other risks of doing business globally could adversely affect the Company's operating results.

Agricultural production and trade flows are subject to government policies, mandates, and regulations. Governmental policies affecting the agricultural industry, such as taxes, tariffs, duties, subsidies, incentives, and import and export restrictions on agricultural commodities and commodity products, including policies related to genetically modified organisms, renewable fuel, and low carbon fuel mandates, can influence the planting of certain crops, the location and size of crop production, whether unprocessed or processed commodity products are traded, the volume and types of imports and exports, the availability and competitiveness of feedstocks as raw materials, the viability and volume of production of certain of the Company's products, and industry profitability. For example, changes in government policies or regulations of ethanol and biodiesel can have a significant impact on the Company's operating results. In addition, international trade disputes can adversely affect agricultural commodity trade flows by limiting or disrupting trade between countries or regions. Future government policies may adversely affect the supply of, demand for, and prices of the Company's products; restrict the Company's ability to do business in its existing and target markets; and adversely affect the Company's revenues and operating results.

The Company's operating results could be affected by changes in other governmental policies, mandates, and regulations including monetary, fiscal and environmental policies, laws, and regulations, and other activities of governments, agencies, and similar organizations. These risks include but are not limited to changes in a country's or region's economic or political conditions, local labor conditions and regulations, reduced protection of intellectual property rights, changes in the regulatory or legal environment, restrictions on currency exchange activities, currency exchange fluctuations, burdensome taxes and tariffs, enforceability of legal agreements and judgments, adverse tax, administrative agency or judicial outcomes, and regulation or taxation of greenhouse gases. International risks and uncertainties, including changing social and economic conditions as well as terrorism, political hostilities, and war, could limit the Company's ability to transact business in these markets and could adversely affect the Company's revenues and operating results.

The Company is subject to industry-specific risks which could adversely affect the Company's operating results.

The Company is subject to risks which include, but are not limited to, product quality or contamination; shifting consumer preferences; federal, state, and local food processing regulations; socially acceptable farming practices; environmental, health and safety regulations; and customer product liability claims. The liability which could result from certain of these risks may not always be covered by, or could exceed liability insurance related to product liability and food safety matters maintained by the Company. In addition, negative publicity caused by product liability and food safety matters may damage the Company's reputation. The occurrence of any of the matters described above could adversely affect the Company's revenues and operating results.

Certain of the Company's merchandised commodities and finished products are used as ingredients in livestock and poultry feed. The Company is subject to risks associated with economic or other factors which may adversely affect the livestock and poultry businesses, including the outbreak of disease in livestock and poultry. An outbreak of disease could adversely affect demand for the Company's products used as ingredients in livestock and poultry feed. A decrease in demand for ingredients in livestock and poultry feed could adversely affect the Company's revenues and operating results.

The Company is subject to numerous laws, regulations, and mandates globally which could adversely affect the Company's operating results.

The Company does business globally, connecting crops and markets in over 140 countries. The Company is required to comply with the numerous and broad-reaching laws and regulations administered by United States federal, state and local, and foreign governmental authorities. The Company must comply with other general business regulations such as accounting and income taxes, anti-corruption, anti-bribery, global trade, environmental, and handling of regulated substances. Any failure to comply with applicable laws and regulations could subject the Company to administrative penalties and injunctive relief, civil remedies including fines, injunctions, and recalls of its products, and damage to its reputation.

Item 1A. RISK FACTORS (Continued)

The production of the Company's products requires the use of materials which can create emissions of certain regulated substances, including greenhouse gas emissions. Although the Company has programs in place throughout the organization globally to guard against non-compliance, failure to comply with these regulations can have serious consequences, including civil and administrative penalties as well as a negative impact on the Company's reputation, business, cash flows, and results of operations.

In addition, changes to regulations or implementation of additional regulations, for example the imposition of regulatory restrictions on greenhouse gases, may require the Company to modify existing processing facilities and/or processes which could significantly increase operating costs and adversely affect operating results.

The Company is exposed to potential business disruption, including but not limited to disruption of transportation services, supply of non-commodity raw materials used in its processing operations, and other impacts resulting from acts of terrorism or war, natural disasters, severe weather conditions, and accidents which could adversely affect the Company's operating results.

The Company's operations rely on dependable and efficient transportation services. A disruption in transportation services could result in difficulties supplying materials to the Company's facilities and impair the Company's ability to deliver products to its customers in a timely manner. The Company relies on access to navigable rivers and waterways in order to fulfill its transportation obligations more effectively. If access to these navigable waters is interrupted, the Company's operating results could be adversely affected. In addition, if certain non-agricultural commodity raw materials, such as water or certain chemicals used in the Company's processing operations, are not available, the Company's business could be disrupted. Certain key regions of the U.S. experienced drought conditions in 2012. If the drought continues in 2013, the lack of available water for use in processing operations and the impact of low water levels in navigable waters could have a material adverse impact on operating results. Certain factors which may impact the availability of non-agricultural commodity raw materials are out of the Company's control including, but not limited to, disruptions resulting from weather, economic conditions, manufacturing delays or disruptions at suppliers, shortage of materials, and unavailable or poor supplier credit conditions.

The assets and operations of the Company could be subject to extensive property damage and business disruption from various events which include, but are not limited to, acts of terrorism or war, natural disasters and severe weather conditions, accidents, explosions, and fires. The potential effects of these conditions could adversely affect the Company's revenues and operating results.

The Company's business is capital intensive in nature and the Company relies on cash generated from its operations and external financing to fund its growth and ongoing capital needs. Limitations on access to external financing could adversely affect the Company's operating results.

The Company requires significant capital, including access to credit markets from time to time, to operate its current business and fund its growth strategy. The Company's working capital requirements are directly affected by the price of agricultural commodities, which may fluctuate significantly and change quickly. The Company also requires substantial capital to maintain and upgrade its extensive network of storage facilities, processing plants, refineries, mills, ports, transportation assets and other facilities to keep pace with competitive developments, technological advances, regulations and changing safety standards in the industry. Moreover, the expansion of the Company's business and pursuit of acquisitions or other business opportunities may require significant amounts of capital. Access to credit markets and pricing of the Company's capital is dependent upon maintaining sufficient credit ratings from credit rating agencies. If the Company is unable to maintain sufficiently high credit ratings, access to debt markets and costs of borrowings could be adversely impacted. If the Company is unable to generate sufficient cash flow or

raise adequate external financing, including as a result of significant disruptions in the global credit markets, it may restrict the Company's current operations and its growth opportunities which could adversely affect the Company's operating results.

Item 1A. RISK FACTORS (Continued)

The Company's risk management strategies may not be effective.

The Company's business is affected by fluctuations in agricultural commodity prices, transportation costs, energy prices, interest rates, and foreign currency exchange rates. The Company has processes in place to monitor exposures to these risks and engages in strategies to manage these risks. However, the Company's monitoring efforts may not be successful at detecting a significant risk exposure. If these controls and strategies are not successful in mitigating the Company's exposure to these fluctuations, it could adversely affect the Company's operating results.

The Company has limited control over and may not realize the expected benefits of its equity investments and joint ventures.

The Company has \$3.2 billion invested in or advanced to joint ventures and investments over which the Company has limited control as to the governance and management activities of these investments. Net sales to unconsolidated affiliates during the six months ended December 31, 2012 was \$4.0 billion. The Company faces certain risks, including risks related to the financial strength of the investment partner; loss of revenues and cash flows to the investment partner and related gross profit; the inability to implement beneficial management strategies, including risk management and compliance monitoring, with respect to the investment's activities; and the risk that the Company may not be able to resolve disputes with the investment partner. The Company may encounter unanticipated operating issues or financial results related to these investments that may impact the Company's revenues and operating results.

The Company's information technology systems, processes, and sites may suffer interruptions or failures which may affect the Company's ability to conduct its business.

The Company's information technology systems, some of which are dependent on services provided by third parties, provide critical data connectivity, information and services for internal and external users. These interactions include, but are not limited to, ordering and managing materials from suppliers, converting raw materials to finished products, inventory management, shipping products to customers, processing transactions, summarizing and reporting results of operations, human resources benefits and payroll management, complying with regulatory, legal or tax requirements, and other processes necessary to manage the business. The Company has put in place security measures to protect itself against cyber-based attacks and disaster recovery plans for its critical systems. However, if the Company's information technology systems are breached, damaged, or cease to function properly due to any number of causes, such as catastrophic events, power outages, security breaches, or cyber-based attacks, and the Company's disaster recovery plans do not effectively mitigate on a timely basis, the Company may suffer interruptions in the ability to manage its operations and damage to its reputation, which may adversely impact the Company's revenues, operating results, and financial condition.

Item 1B. UNRESOLVED STAFF COMMENTS

The Company has no unresolved staff comments.

Item 2. PROPERTIES

The Company owns or leases, under operating leases, the following processing plants and procurement facilities:

	Processing Plants			Procurement Facilities		
	Owned	Leased	Total	Owned	Leased	Total
U.S.	151	-	151	277	21	298
International	110	8	118	133	38	171
	261	8	269	410	59	469

The Company's operations are such that most products are efficiently processed near the source of raw materials. Consequently, the Company has many plants strategically located in agricultural commodity producing areas. The annual volume of commodities processed will vary depending upon availability of raw materials and demand for finished products.

To enhance the efficiency of transporting large quantities of raw materials and finished products between the Company's procurement facilities and processing plants and also the final delivery of products to our customers around the world, the Company owns approximately 2,000 barges, 14,300 rail cars, 400 trucks, 1,400 trailers, and 8 ocean going vessels; and leases, under operating leases, approximately 400 barges, 12,600 railcars, and 30 ocean going vessels.

Item 3. LEGAL PROCEEDINGS

Since August 2008, the Company has been conducting an internal review of its policies, procedures and internal controls pertaining to the adequacy of its anti-corruption compliance program and of certain transactions conducted by the Company and its affiliates and joint ventures, primarily relating to grain and feed exports, that may have violated company policies, the U.S. Foreign Corrupt Practices Act, and other U.S. and foreign laws. The Company initially disclosed this review to the U.S. Department of Justice, the Securities and Exchange Commission, and certain foreign regulators in March 2009 and has subsequently provided periodic updates to the agencies. The Company engaged outside counsel and other advisors to assist in the review of these matters and has implemented, and is continuing to implement, appropriate remedial measures. The Company has recently completed its internal review and has initiated discussions with the Department of Justice and the Securities Exchange Commission on the resolution of this matter. In connection with this review, government agencies could impose civil penalties or criminal fines and/or order that the Company disgorge any profits derived from any contracts involving inappropriate payments. The Company has not recorded any liability for any assessments that may be imposed by the government agencies pertaining to this matter because the amount cannot be reasonably estimated. These events have not had, and are not expected to have, a material impact on the Company's business or financial condition.

The Company is a party to routine legal proceedings that arise in the course of its business. The Company is not currently a party to any legal proceeding or environmental claim that it believes would have a material adverse effect on its financial position, results of operations, or liquidity.

Item 4. MINE SAFETY DISCLOSURES

None.

PART II

Item 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES

Common Stock Market Prices and Dividends

The Company's common stock is listed and traded on the New York Stock Exchange and the Frankfurt Stock Exchange. The following table sets forth, for the periods indicated, the high and low market prices of the common stock as reported on the New York Stock Exchange and common stock cash dividends declared per share.

	Market Price		Cash
	High	Low	Dividends Per Share
Transition Period 2012-Quarter Ended			
December 31	\$29.23	\$24.38	\$0.175
September 30	29.57	25.02	0.175
Fiscal Year 2012-Quarter Ended			
June 30	\$33.98	\$28.55	\$0.175
March 31	32.36	28.11	0.175
December 31	30.55	23.69	0.175
September 30	32.41	24.42	0.160
Fiscal Year 2011-Quarter Ended			
June 30	\$37.28	\$28.98	\$0.160
March 31	38.02	30.13	0.160
December 31	34.03	28.53	0.150
September 30	33.54	25.02	0.150

The number of registered shareholders of the Company's common stock at December 31, 2012, was 13,138. The Company expects to continue its policy of paying regular cash dividends, although there is no assurance as to future dividends because they are dependent on future earnings, capital requirements, and financial condition.

Item 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES (Continued)

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program (2)	Number of Shares Remaining to be Purchased Under the Program (2)
October 1, 2012 to October 31, 2012	474	\$ 28.930	50	68,399,057
November 1, 2012 to November 30, 2012	247	26.506	247	68,398,810
December 1, 2012 to December 31, 2012	77	26.800	77	68,398,733
Total	798	\$ 27.974	374	68,399,733

(1) Total shares purchased represent those shares purchased in the open market as part of the Company's publicly announced share repurchase program described below, shares received as payment for the exercise price of stock option exercises, and shares received as payment for the withholding taxes on vested restricted stock awards. During the three-month period ended December 31, 2012, the Company received 424 shares as payment for the exercise price of stock option exercises. There were no shares received as payment for the minimum withholding taxes on vested restricted stock awards.

(2) On November 5, 2009, the Company's Board of Directors approved a stock repurchase program authorizing the Company to repurchase up to 100,000,000 shares of the Company's common stock during the period commencing January 1, 2010 and ending December 31, 2014.

Item 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES (Continued)

Performance Graph

The graph below compares the Company's common stock with those of the S&P 500 Index and the S&P Consumer Staples Index. The graph assumes all dividends have been reinvested and assumes an initial investment of \$100 on June 30, 2007. Information in the graph is presented for fiscal years ended June 30 and the transition period ended December 31, 2012.

Graph produced by Research Data Group, Inc.

Weighted average shares outstanding-diluted	661	670	666	654	644	644	646

Significant items affecting the comparability of the financial data shown above are as follows:

- Net earnings attributable to controlling interests for the six months ended December 31, 2012 include an asset impairment charge of \$146 million (\$107 million after tax, equal to \$0.16 per share) related to the Company's investments associated with Gruma, a gain of \$62 million (\$49 million after tax, equal to \$0.07 per share) related to the Company's interest in GrainCorp, a gain of \$39 million (\$24 million after tax, \$0.04 per share) related to the sale of certain of the Company's exchange membership interests, and charges of \$68 million (\$44 million after tax, \$0.07 per share) related to pension settlements.

- Net earnings attributable to controlling interests for the six months ended December 31, 2011 include exit costs and asset impairment charges of \$352 million (\$222 million after tax, equal to \$0.33 per share) related primarily to the writedown of the Company's Clinton, IA bioplastics facility.
 - Net earnings attributable to controlling interests for the year ended June 30, 2012 include exit costs and asset impairment charges of \$437 million (\$274 million after tax, equal to \$0.41 per share) related primarily to the bioplastics facility and global workforce reduction program.
-

Item 6. SELECTED FINANCIAL DATA (Continued)

- Net earnings attributable to controlling interests for the year ended June 30, 2011 include a gain of \$71 million (\$44 million after tax, equal to \$0.07 per share) related to the acquisition of the remaining interest in Golden Peanut, start up costs for the Company's significant new greenfield plants of \$94 million (\$59 million after tax, equal to \$0.09 per share), charges on early extinguishment of debt of \$15 million (\$9 million after tax, equal to \$0.01 per share), gains on interest rate swaps of \$30 million (\$19 million after tax, equal to \$0.03 per share) and a gain of \$78 million (\$49 million after tax, equal to \$0.07 per share) related to the sale of bank securities held by the Company's equity investee, Gruma. During the second quarter of fiscal year 2011, the Company updated its estimates for service lives of certain of its machinery and equipment assets. The effect of this change in accounting estimate on pre-tax earnings for the year ended June 30, 2011 was an increase of \$133 million (\$83 million after tax, equal to \$0.13 per share). Basic and diluted weighted average shares outstanding for 2011 include 44 million shares issued on June 1, 2011 related to the Equity Unit conversion. Diluted weighted average shares outstanding for 2011 include 44 million shares assumed issued on January 1, 2011 as required using the "if-converted" method of calculating diluted earnings per share for the quarter ended March 31, 2011. See Note 11 in Item 8, Financial Statements and Supplementary Data (Item 8), for earnings per share calculation.
 - Net earnings attributable to controlling interests for the year ended June 30, 2010 include a charge of \$75 million (\$47 million after tax, equal to \$0.07 per share) related to loss on extinguishment of debt resulting from the repurchase of \$500 million in aggregate principal amount of the Company's outstanding debentures, and start up costs for the Company's significant new greenfield plants of \$110 million (\$68 million after tax, equal to \$0.11 per share).
 - Net earnings attributable to controlling interests for the year ended June 30, 2009 include a non-cash charge of \$275 million (\$171 million after tax, equal to \$0.27 per share) related to currency derivative losses of the Company's equity investee, Gruma, and a \$158 million income tax charge (equal to \$0.24 per share) related to the reorganization of the holding company structure in which the Company holds a portion of its equity investment in Wilmar.
-

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS

Company Overview

This MD&A should be read in conjunction with the accompanying consolidated financial statements.

The Company is principally engaged in procuring, transporting, storing, processing, and merchandising agricultural commodities and products. The Company uses its significant global asset base to originate and transport agricultural commodities, connecting to markets in more than 140 countries. The Company also processes corn, oilseeds, wheat and cocoa into products for food, animal feed, chemical and energy uses. The Company uses its global asset network, business acumen, and its relationships with suppliers and customers to efficiently connect the harvest to the home thereby generating returns for our shareholders, principally from margins earned on these activities.

The Company's operations are organized, managed and classified into three reportable business segments: Oilseeds Processing, Corn Processing, and Agricultural Services. Each of these segments is organized based upon the nature of products and services offered. The Company's remaining operations are not reportable segments, as defined by the applicable accounting standard, and are classified as Other.

The Oilseeds Processing segment includes global activities related to the origination, merchandising, crushing, and further processing of oilseeds such as soybeans and soft seeds (cottonseed, sunflower seed, canola, rapeseed, and flaxseed) into vegetable oils and protein meals. Oilseeds products produced and marketed by the Company include ingredients for the food, feed, energy, and industrial products industries. Crude vegetable oils produced by the segment's crushing activities are sold "as is" or are further processed by refining, blending, bleaching, and deodorizing into salad oils. Salad oils are sold "as is" or are further processed by hydrogenating and/or interesterifying into margarine, shortening, and other food products. Partially refined oils are used to produce biodiesel or are sold to other manufacturers for use in chemicals, paints, and other industrial products. Oilseed protein meals are principally sold to third parties to be used as ingredients in commercial livestock and poultry feeds. In Europe and South America, the Oilseeds Processing segment includes origination and merchandising activities as adjuncts to its oilseeds processing assets. These activities include a network of grain elevators, port facilities, and transportation assets used to buy, store, clean, and transport grains and oilseeds. The Oilseeds Processing segment produces natural health and nutrition products and other specialty food and feed ingredients. The Oilseeds Processing segment is a major supplier of peanuts and peanut-derived ingredients to both the U.S. and export markets. In North America, cottonseed flour is produced and sold primarily to the pharmaceutical industry and cotton cellulose pulp is manufactured and sold to the chemical, paper, and filter markets. In South America, the Oilseeds Processing segment operates fertilizer blending facilities. The Oilseeds Processing segment also includes activities related to the procurement, transportation and processing of cocoa beans into cocoa liquor, cocoa butter, cocoa powder, chocolate, and various compounds in North America, South America, Europe, Asia, and Africa for the food processing industry. The Oilseeds Processing segment also includes the Company's share of the results of its equity investment in Wilmar and its share of results for its Stratas Foods LLC and Edible Oils Limited joint ventures.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

The Company's Corn Processing segment is engaged in corn wet milling and dry milling activities, with its asset base primarily located in the central part of the United States. The Corn Processing segment converts corn into sweeteners and starches, and bioproducts. Its products include ingredients used in the food and beverage industry including sweeteners, starch, syrup, glucose, and dextrose. Dextrose and starch are used by the Corn Processing segment as feedstocks for its bioproducts operations. By fermentation of dextrose, the Corn Processing segment produces alcohol, amino acids, and other specialty food and animal feed ingredients. Ethyl alcohol is produced by the Company for industrial use as ethanol or as beverage grade. Ethanol, in gasoline, increases octane and is used as an extender and oxygenate. Bioproducts also include amino acids such as lysine and threonine that are vital compounds used in swine feeds to produce leaner animals and in poultry feeds to enhance the speed and efficiency of poultry production. Corn gluten feed and meal, as well as distillers' grains, are produced for use as animal feed ingredients. Corn germ, a by-product of the wet milling process, is further processed into vegetable oil and protein meal. Other Corn Processing products include citric and lactic acids, lactates, sorbitol, xanthan gum, and glycols which are used in various food and industrial products. The Corn Processing segment includes the activities of a propylene and ethylene glycol facility and the Company's Brazilian sugarcane ethanol plant and related operations. In fiscal 2012, the Company ended its commercial alliance with Metabolix, Inc. As a result of this decision, Telles LLC, the sales and marketing commercial alliance created to commercialize Mirel™, a bio-based plastic, will be dissolved and the production of Mirel™ on behalf of Telles LLC has ended. This segment also includes the Company's share of the results of its equity investments in Almidones Mexicanos S.A., Eaststarch C.V., and Red Star Yeast Company LLC.

The Agricultural Services segment utilizes its extensive U.S. grain elevator, global transportation network, and port operations to buy, store, clean, and transport agricultural commodities, such as oilseeds, corn, wheat, milo, oats, rice, and barley, and resells these commodities primarily as food and feed ingredients and as raw materials for the agricultural processing industry. Agricultural Services' grain sourcing, handling, and transportation network provides reliable and efficient services to the Company's customers and agricultural processing operations. Agricultural Services' transportation network capabilities include barge, ocean-going vessel, truck, and rail freight services. Agricultural Services segment also includes the activities related to the processing of wheat into wheat flour, the processing and distribution of formula feeds, animal health and nutrition products, and the procurement, processing, and distribution of edible beans. The Agricultural Services segment includes the activities of Alfred C. Toepfer International, an 80% owned global merchant of agricultural commodities and processed products. The Agricultural Services segment also includes the Company's share of the results of its Kalama Export Company joint venture and its equity investment in Gruma, which was sold in December 2012.

Other includes the Company's remaining operations, primarily its financial business units, related principally to futures commission merchant activities and captive insurance. On September 30, 2011, the Company sold a majority ownership interest of the Bank. The Bank was deconsolidated from the Company's consolidated financial statements in the first quarter of fiscal year ended June 30, 2012 resulting in no material effect to the Company's earnings. In December 2012, the Company sold its remaining common equity interest in the Bank resulting in no material effect to the Company's earnings.

Corporate results principally include the impact of LIFO-related inventory adjustments, unallocated corporate expenses, and interest cost net of investment income. Prior to January 1, 2012, Corporate results included the after-tax elimination of income attributable to mandatorily redeemable interests in consolidated subsidiaries. Upon expiration of the put options related to these interests, the results were included in noncontrolling interest.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Operating Performance Indicators

The Company's oilseeds processing and agricultural services operations are principally agricultural commodity-based businesses where changes in selling prices move in relationship to changes in prices of the commodity-based agricultural raw materials. Therefore, changes in agricultural commodity prices have relatively equal impacts on both net sales and other operating income and cost of products sold. Thus, changes in margins and gross profit of these businesses do not necessarily correspond to the changes in net sales and other operating income amounts.

The Company's corn processing operations and certain other food and animal feed processing operations also utilize agricultural commodities (or products derived from agricultural commodities) as raw materials. In these operations, agricultural commodity market price changes can result in significant fluctuations in cost of products sold, and such price changes cannot necessarily be passed directly through to the selling price of the finished products.

The Company has consolidated subsidiaries in over 75 countries. For the majority of the Company's subsidiaries located outside the United States, the local currency is the functional currency. Revenues and expenses denominated in foreign currencies are translated into U.S. dollars at the weighted average exchange rates for the applicable periods. For the majority of the Company's business activities in Brazil, the functional currency is the U.S. dollar; however, certain transactions, including taxes, occur in local currency and require conversion to the functional currency. Fluctuations in the exchange rates of foreign currencies, primarily the Euro, British pound, Canadian dollar, and Brazilian real, as compared to the U.S. dollar can result in corresponding fluctuations in the U.S. dollar value of revenues and expenses reported by the Company.

The Company measures the performance of its business segments using key financial metrics such as segment operating profit, profit per metric ton, return on invested capital, EBITDA, and cost per metric ton. The Company's operating results can vary significantly due to changes in factors such as fluctuations in energy prices, weather conditions, crop plantings, government programs and policies, changes in global demand, general global economic conditions, changes in standards of living, and global production of similar and competitive crops. Due to these unpredictable factors, the Company does not provide forward-looking information in "Management's Discussion and Analysis of Financial Condition and Results of Operations."

ADM's Proposals to Acquire GrainCorp Limited

As of December 31, 2012, the Company held a 19.9% common equity interest in GrainCorp Limited (GrainCorp), a Company listed on the Australian Securities Exchange. This interest was initially obtained through the use of two transactions with investment bank counterparties. These transactions were accounted for as derivatives, and the derivatives were settled in equity shares of GrainCorp during the quarter ended December 31, 2012. The Company recognized a pretax gain on these transactions of \$62 million that is reported in Agricultural Services operating profit for the six months ended December 31, 2012. The economic cost of these shares (i.e. net of the derivative gains) was approximately \$0.5 billion.

The purpose of these transactions was to facilitate the Company's planned acquisition of GrainCorp. During the quarter ended December 31, 2012, the Company delivered an initial non-binding proposal, followed later by a second non-binding proposal, with the aim of arriving at an agreement with GrainCorp's Board of Directors under which they would recommend to GrainCorp shareholders an acquisition by the Company of all of GrainCorp, with the most recent proposal of Australian \$12.20 per share in cash. GrainCorp's Board of Directors has rejected these proposals under their belief that this price materially undervalues GrainCorp. The share price of Australian \$12.20 values

GrainCorp's equity at approximately US\$3 billion.

The Company continues to consider all of its options with its 19.9% shareholding in GrainCorp. The three major credit rating agencies have put the Company's credit rating on negative watch or negative outlook pending the final outcome of the GrainCorp acquisition proposal and the form of acquisition financing. Should the Company's credit rating be downgraded due to the consummation of the acquisition, the Company is confident it will continue to be able to access liquidity cost efficiently to fund the operations.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Financial Overview - Six Months Ended December 31, 2012 Compared to Six Months Ended December 31, 2011

Net earnings attributable to controlling interests increased \$152 million to \$692 million. Asset impairment, exit, and restructuring costs in the current period decreased \$115 million after tax (\$206 million pretax). Current period results also include gains of \$49 million after tax related to the Company's interest in GrainCorp and a gain of \$24 million after tax related to the sale of certain of the Company's exchange membership interests, partially offset by charges of \$44 million after tax related to pension settlements.

Income taxes increased \$66 million due to higher earnings before income taxes. The effective income tax rate of 30.4% compares to the rate of 30.3% in the prior period.

Segment operating profit increased \$243 million due to a \$318 million improvement in operating results in the Oilseeds Processing segment, the absence of the prior period asset impairment charges of \$339 million in the Corn Processing segment related primarily to the write-down of assets at its Clinton, IA bioplastics facility, and higher results of the Company's Financial operations of \$76 million, in part due to a gain on sale of certain of the Company's exchange membership interests and favorable captive insurance loss reserve adjustments. Partially offsetting these improvements were lower results in the current period in Corn Processing's bioproducts business of \$408 million, excluding the Clinton, IA asset impairment charge discussed above, and the current period loss of \$146 million in the Agricultural Services segment related to the disposal of Gruma.

Corporate expenses were \$27 million higher in the current period, due primarily to \$68 million of pension settlement charges, partially offset by higher returns on corporate investments.

Total Other	69	56	13
Total	\$46,729	\$45,208	\$1,521

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

As an agricultural commodity-based business, the Company is subject to a variety of market factors which affect the Company's operating results. From a demand perspective, protein meal demand continued to increase, particularly for U.S. domestic and export markets. Demand for soybeans was solid. Weaker U.S. gasoline demand and unfavorable global ethanol trade flows resulted in continued excess industry ethanol capacity. From a supply perspective, following below-average harvests in the 2011/2012 crop year in North and South America, corn and soybean supplies were tight and commodity market prices were generally higher. In South America, farmers responded to high crop prices with record soybean plantings for the 2012/2013 crop year. The lower corn harvest in the U.S. due to the drought led to higher corn prices and higher demand for corn from South America.

Net sales and other operating income increased \$1.5 billion to \$46.7 billion. Higher average selling prices increased net sales and other operating income by \$4.9 billion, primarily due to increases in underlying commodity prices, while lower sales volumes, inclusive of the effects of acquisitions, reduced net sales and other operating income by \$2.4 billion. Changes in foreign currency exchange rates decreased net sales and other operating income by \$1.0 billion. Oilseeds Processing sales increased 4% to \$18.1 billion due principally to higher average selling prices of protein meal and soybeans and higher sales volumes of corn, primarily in South America, and protein meal. Corn Processing sales decreased 4% to \$6.2 billion due principally to lower average selling prices of ethanol. Agricultural Services sales increased 5% to \$22.4 billion, due to higher average selling prices of soybeans and wheat partially offset by lower sales volumes of corn.

Cost of products sold increased \$1.6 billion to \$44.9 billion due principally to higher costs of agricultural commodities partially offset by lower manufacturing costs and \$1.1 billion related to the effects of changing foreign currency rates. Manufacturing expenses decreased \$102 million or 3%, due principally to lower energy and repairs and maintenance costs, and savings in employee and benefit-related costs.

Selling, general and administrative expenses increased \$39 million to \$869 million. Included in selling, general, and administrative expenses are pension settlement charges of \$68 million for the six months ended December 31, 2012. Excluding these pension settlement charges, selling, general, and administrative expenses declined \$29 million or 3% due principally to lower employee and benefit-related costs.

Asset impairment charges in the current period represent impairments of \$146 million related to the Company's divestment of its equity method investments in Gruma and Gruma-related joint ventures. The prior year charges relate to the Company's Clinton, IA bioplastics facility. Property, plant, and equipment were written down to estimated fair value resulting in impairment charges of \$320 million. In addition, charges of \$32 million were recognized for exit activities and to impair other assets.

Other income increased \$97 million to \$109 million due primarily to \$62 million of gains related to the Company's interest in GrainCorp and \$39 million of gains on the sale of certain of the Company's exchange membership interests.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Operating profit by segment and earnings before income taxes for the six months ended December 31, 2012 and 2011 are as follows:

(In millions)	Six Months Ended December 31,		Change

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Oilseeds Processing operating profit increased \$318 million to \$747 million. Crushing and Origination operating profit increased \$290 million to \$517 million as results in North America, Europe and South America improved. The company's U.S. soybean operations delivered strong results, with high seasonal utilization amid good U.S. and export meal demand. In Europe, rapeseed and soybean crushing earnings improved significantly. In South America, results benefited from improved soybean crushing margins. Refining, Packaging, Biodiesel, and Other results decreased \$54 million to \$78 million primarily due to weaker European and U.S. biodiesel results. Cocoa and Other results increased \$93 million as weaker cocoa press margins were offset by the absence of last year's net unrealized mark-to-market losses related to certain forward purchase and sales commitments accounted for as derivatives. Asia results decreased \$11 million to \$87 million principally reflecting the Company's share of its results from equity investee, Wilmar.

Corn Processing operating profit increased \$17 million to \$71 million. The prior year results include \$339 million in asset impairment charges and exit costs related to the Company's Clinton, IA bioplastics facility. Excluding the bioplastics charges and exit costs, Corn Processing operating profit declined \$322 million. Sweeteners and Starches operating profit increased \$86 million to \$191 million, as tight sweetener industry capacity supported higher average selling prices. The prior period Sweeteners and Starches results were negatively impacted by higher net corn costs related to the timing effects of economic hedges. Bioproducts profit decreased \$69 million to a \$120 million loss. Excluding the \$339 million prior year asset impairment charges, Bioproducts profit decreased \$408 million. Weak domestic gasoline demand and unfavorable global ethanol trade flows resulted in continued excess industry capacity, keeping ethanol margins negative.

Agricultural Services operating profit, including the current period \$146 million Gruma asset impairment charge and \$62 million gain on the Company's interest in GrainCorp, decreased \$168 million to \$395 million. Merchandising and Handling earnings decreased \$16 million mostly due to weaker U.S. merchandising results impacted by the smaller U.S. harvest. Merchandising and Handling earnings in the current period include the \$62 million gain on the Company's interest in GrainCorp. Earnings from transportation operations decreased \$14 million to \$67 million due to increased barge operating expenses caused by low water on the Mississippi River partially offset by higher freight rates. Milling and Other operating profit decreased \$138 million to \$29 million due principally to a \$146 million impairment charge on the disposal of the Company's equity method investments in Gruma and Gruma-related joint ventures. Milling results remained strong, and the Company's feed business saw improved margins amid stronger demand.

Other financial operating profit increased \$76 million to \$93 million mainly due to asset disposal gains for certain of the Company's exchange membership interests and improved results of the Company's captive insurance subsidiary.

Corporate expenses increased \$27 million to \$309 million this period. The Company incurred \$68 million in pension settlement charges related to a one-time window for lump sum distributions in the U.S. and the conversion of a Dutch pension plan to a multi-employer plan. Excluding these pension charges, corporate expenses declined by \$41 million. Corporate interest expense - net increased \$22 million mostly due to the absence of interest income received in the prior year related to a contingent gain settlement. Unallocated corporate costs were lower by \$15 million primarily due to lower employee and employee benefit-related costs. The increase in other income of \$56 million is primarily due to improved equity earnings from corporate affiliate investments.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Year Ended June 30, 2012 Compared to Year Ended June 30, 2011

As an agricultural commodity-based business, the Company is subject to a variety of market factors which affect the Company's operating results. From a demand perspective, global protein meal consumption has continued to grow although at a slower rate. Excess industry crushing production capacity has pressured oilseeds margins, and the Company has adjusted production rates regionally to balance supply with current market demand. Biodiesel markets supported global demand for refined and crude vegetable oils. In the U.S., high biodiesel inventories associated with the December 31, 2011, expiration of blender's incentives dampened margins in the second half of the fiscal year. U.S. corn sweetener exports continue to support sales volumes and margins. Ethanol sales volumes were supported by favorable gasoline blending economics in the U.S. However, excess industry production of ethanol, together with recently reduced U.S. ethanol export demand, has negatively impacted ethanol margins. From a supply perspective, crop supplies in certain key growing regions at the beginning of fiscal 2012, including South America and the Black Sea region, were adequate, but a smaller-than-normal harvest in North America in the fall of 2011 resulted in low U.S. carryover stocks for corn and soybeans. Because of the smaller than expected South American harvest, global supplies of corn and soybeans were more dependent on the North American harvest. While plantings of corn increased in the U.S. during fiscal 2012, the drought conditions late in the fiscal year decreased expectations for the size of the harvest. These factors, combined with concerns about the European debt situation and ongoing geopolitical uncertainties, contributed to volatile commodity market price movements during fiscal 2012.

Net earnings attributable to controlling interests decreased \$0.8 billion to \$1.2 billion. Segment operating profit declined \$1.6 billion to \$2.5 billion amid more challenging conditions generally affecting all reportable segments. Segment operating profit in fiscal 2012 included \$349 million of asset impairment charges and exit costs comprised of \$335 million to exit the Company's Clinton, IA, bioplastics plant and \$14 million to shut down its Walhalla, ND, ethanol dry mill. Earnings before income taxes included a credit of \$10 million from the effect on LIFO inventory valuation reserves, including the liquidation of LIFO inventory layers, partially offset by increasing agricultural commodity prices, compared to charges of \$368 million in the prior year. Fiscal 2012 unallocated corporate expenses included \$71 million of charges related to the Company's global workforce reduction program.

Income taxes decreased \$0.5 billion due to lower earnings before income taxes and a lower effective income tax rate. The Company's effective income tax rate declined to 29.6% compared to 33.1% in the prior year primarily due to income tax benefits associated with foreign currency re-measurement of non-monetary assets partially offset by a geographic mix of earnings that shifted more to foreign jurisdictions.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Analysis of Statements of Earnings

Net sales and other operating income by segment are as follows:

	2012 (In millions)	2011	Change

Total	\$89,038	\$80,676	\$8,362

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Net sales and other operating income increased \$7.0 billion due to higher average selling prices, primarily related to higher underlying commodity costs, and \$2.1 billion due to increased sales volumes, including sales volumes from acquisitions, partially offset by changes in foreign currency exchange rates of \$0.7 billion. Oilseeds Processing sales increased 16% to \$34.7 billion due principally to higher average selling prices of vegetable oils, merchandised commodities, protein meal, and biodiesel and increased sales volumes of biodiesel, protein meal, and peanuts, in part due to the acquisition of Golden Peanut in December 2010. Corn Processing sales increased 22% to \$12.1 billion due principally to higher average selling prices of ethanol and sweeteners as well as higher sales volumes of sugar and ethanol. Agricultural Services sales increased 3% to \$42.1 billion, due to higher average selling prices of corn and wheat flour partially offset by lower sales volumes, in part due to lower export volumes from the U.S.

Cost of products sold increased 12% to \$85.4 billion due principally to higher costs of agricultural commodities and, to a lesser extent, increased sales volumes. Changes in foreign currency exchange rates reduced fiscal 2012 cost of products sold by \$0.7 billion. Manufacturing expenses increased \$0.2 billion due to higher costs for maintenance, employee and benefit-related expenses, energy, and chemicals. These higher costs were primarily due to higher production volumes, acquisitions, and higher unit costs for fuels and certain chemicals. Partially offsetting these higher costs was lower depreciation expense, in part due to the Company's change in estimated service lives for machinery and equipment during the second quarter of fiscal 2011.

Selling, general, and administrative expenses remained steady at \$1.6 billion. Loss provisions mainly due to an unfavorable arbitration award in the Company's Agricultural Services operating segment were partially offset by lower overhead expenses.

Asset impairment, exit, and restructuring costs of \$437 million were comprised of \$349 million in the Corn Processing segment related to the Company's exit from its Clinton, IA, bioplastics business and ethanol dry mill in Walhalla, ND, \$71 million in Corporate for the global workforce reduction, and \$17 million in Corporate for investment writedown and other facility exit-related costs.

Interest expense decreased 9% to \$441 million primarily due to lower long-term debt balances, higher interest expense capitalized on construction projects in progress, and lower interest expense related to uncertain income tax positions.

Equity in earnings of unconsolidated affiliates decreased 13% to \$472 million principally due to decreased equity earnings from the Company's equity investee, Gruma, which included a \$78 million gain in the prior year related to Gruma's disposal of certain assets.

Interest income declined 18% to \$112 million primarily related to the sale and deconsolidation of the Bank, effective September 30, 2011.

Other income – net declined \$113 million to \$17 million due primarily to the absence of income recognized in the prior year period of \$71 million for the Golden Peanut Gain and \$30 million for gains on interest rate swaps.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Oilseeds Processing operating profit decreased \$0.4 billion to \$1.3 billion. Crushing and Origination operating profit decreased \$284 million to \$641 million primarily due to weaker results in European softseeds, lower results in North American softseeds, and lower North American positioning results. Partially offsetting these lower results, were higher grain origination results in South America driven by higher volumes and favorable positioning. Poor European softseed results were driven by a small prior year rapeseed crop, positioning losses, and weaker demand for protein meal and oils. North American softseed results declined primarily as a result of lower margins generated from a tight cottonseed supply. Refining, Packaging, Biodiesel, and Other results declined \$47 million to \$295 million due primarily to declines in biodiesel margins in South America and Europe and lower margins for specialty fats and oils in Europe. These declines were partially offset by improved North American protein specialties and natural health and nutrition results due to higher margins and volumes. Cocoa and Other results declined \$57 million to \$183 million. Fiscal 2012 results in Cocoa and Other were reduced by \$100 million for net unrealized mark-to-market losses related to certain forward purchase and sales commitments accounted for as derivatives. The prior year included \$9 million of net unrealized mark-to-market losses. Excluding these timing effects, cocoa results improved in fiscal 2012 driven by improved press margins caused by strong cocoa powder demand. The prior year included the \$71 million Golden Peanut Gain which was partially offset in fiscal 2012 by higher earnings in the Company's peanut business in part due to the first full year of consolidated results for Golden Peanut being reported by the Company in fiscal 2012. Asia results remained steady at \$183 million, principally reflecting the Company's share of its results from equity investee, Wilmar.

Corn Processing operating results decreased \$818 million to \$261 million due principally to poor ethanol margins and \$349 million in asset impairment charges and exit costs. Excluding the asset impairment and exit costs related to the Company's bioplastics business and Walhalla, ND, ethanol dry grind facility, Corn Processing operating profit of \$610 million in fiscal 2012 represented a decline of \$469 million compared to the prior year. Processed volumes were up 5 percent while net corn costs increased compared to the prior year. Sweeteners and Starches operating profit increased \$5 million to \$335 million, as higher average selling prices more than offset higher net corn costs. Bioproducts profit decreased \$823 million to a loss of \$74 million, including the \$349 million asset impairment and exit charges. Lower ethanol margins were caused by excess supply as previously offline production restarted while industry demand declined, in part due to slowing export demand. Prior year bioproducts results were enhanced by favorable corn ownership positions, which lowered net corn costs in that period. Bioproducts results in the prior year were negatively impacted by startup costs of \$94 million related to the Company's new dry-grind ethanol, bioplastics, and glycol plants.

Agricultural Services operating profits decreased \$376 million to \$947 million. Merchandising and Handling earnings decreased primarily due to lower results from U.S. operations. Lower sales volumes were principally the result of the relatively higher cost of U.S. grains and oilseeds in the global market due to lower stocks caused by a smaller U.S. harvest in 2011. This relatively weaker position led to reduced U.S. grain exports. In the prior year, Merchandising and Handling results were positively impacted by higher quantities of U.S. grain exports by the Company. In addition, fiscal 2012 included \$40 million of increased loss provisions mainly due to an unfavorable arbitration award. Earnings from Transportation were steady. Prior year's operating results in Milling and Other operations included a \$78 million gain related to Gruma's disposal of certain assets.

Other financial operating profit decreased \$24 million to \$15 million mainly due to higher loss provisions at the Company's captive insurance subsidiary related to property and crop risk reserves.

Corporate expenses declined \$356 million to \$760 million in fiscal 2012. The effects of a liquidation of LIFO inventory layers partially offset by increasing commodity prices on LIFO inventory valuations resulted in a credit of

\$10 million in fiscal 2012 compared to a charge of \$368 million in the prior year primarily due to higher prices. Corporate interest expense decreased \$22 million primarily due to lower interest expense on lower long-term debt balances. Unallocated corporate costs include \$71 million of costs related to the global workforce reduction program. Excluding these costs, unallocated corporate costs declined \$37 million due primarily to lower administrative costs. Corporate other income increased due to higher investment income partially offset by \$17 million for investment writedown and facility exit-related costs. Also, in the prior year the Company recognized \$30 million of gains on interest rate swaps.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Year Ended June 30, 2011 Compared to Year Ended June 30, 2010

As an agricultural commodity-based business, the Company is subject to a variety of market factors which affect the Company's operating results. In fiscal 2011, prices for certain agricultural commodities were higher in response to growing global demand and tighter crop supplies. The projections of lower fiscal 2011 carryover stocks for certain key commodities, coupled with regional crop supply dislocations for certain commodities, also led to high commodity price volatility. Global demand for agricultural commodities grew in fiscal 2011, resulting in increased sales volumes for most of the Company's products. The large fiscal 2010 North American harvest resulted in global merchandising, handling, and processing opportunities. Protein meal markets for commercial livestock producers in the U.S., particularly poultry producers, faced challenging conditions. Biodiesel markets in Europe and South America, together with the 2011 extension of the U.S. biodiesel blender's credit, helped support global demand for refined and crude vegetable oils. Sweeteners and starches demand remained strong in fiscal 2011 due primarily to U.S. exports of sweeteners and improved demand for industrial starches. Ethanol sales volumes, including increased volumes as the Company's new dry mills ramped up, were supported by favorable gasoline blending economics in the U.S. and good export demand.

Net earnings increased \$106 million to \$2.0 billion due principally to a \$794 million increase in segment operating profit partially offset by a negative impact from changing LIFO inventory valuations and higher income taxes. In fiscal 2011, the Company successfully managed through significant increases in market prices for most of its agricultural commodity raw materials, resulting in increased segment operating profit. Earnings before income taxes include charges of \$368 million from the effect of increasing agricultural commodity prices on LIFO inventory valuation reserves, compared to credits of \$42 million in the prior year caused by decreasing agricultural commodity prices. Income taxes increased \$331 million due to a higher effective income tax rate and higher earnings before income taxes. The effective income tax rate of 33.1% for fiscal 2011 was the result of changes in the geographic mix of earnings and unfavorable specific tax items.

The fully diluted earnings per share calculation for fiscal 2011 was impacted by the completion of the Company's debt remarketing related to the \$1.75 billion Equity Units. While the approximately 44 million new common shares related to the \$1.75 billion Equity Units were not issued until June 1, 2011, the "if converted" method of accounting for diluted earnings per share required diluted EPS to be calculated as if the Company issued the shares on January 1, 2011, and this assumption resulted in a dilutive impact of \$0.04 on earnings per share (See Note 11 in the accompanying consolidated financial statements).

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Analysis of Statements of Earnings

Net sales and other operating income by segment are as follows:

	2011 (In millions)	2010	Change
Oilseeds Processing			
Crushing and Origination	\$ 16,518	\$ 14,411	\$ 2,107
Refining, Packaging, Biodiesel, and Other	9,476	7,133	2,343
Cocoa and Other	3,652	2,678	974
Asia	262	190	72
Total Oilseeds Processing	29,908	24,412	5,496
Corn Processing			
Sweeteners and Starches	3,766	3,264	502
Bioproducts	6,142	4,610	1,532
Total Corn Processing	9,908	7,874	2,034
Agricultural Services			
Merchandising and Handling	36,852	25,751	11,101
Transportation	222	167	55
Milling and Other	3,676	3,383	293
Total Agricultural Services	40,750	29,301	11,449
Other			
Financial	110	95	15
Total Other	110	95	15
Total	\$80,676	\$61,682	\$18,994

Net sales and other operating income increased \$19.0 billion, or 31%, to \$80.7 billion. Net sales and other operating income increased \$14.2 billion due to higher average selling prices, primarily related to higher underlying commodity costs, and increased \$4.8 billion due to increased sales volumes, including sales volumes from acquisitions. Agricultural Services sales increased 39% to \$40.8 billion due to higher average selling prices of agricultural commodities and higher global sales volumes. Oilseeds Processing sales increased 23% to \$29.9 billion primarily due to higher average selling prices for vegetable oils, soybeans, biodiesel, and protein meal. Corn Processing sales increased 26% to \$9.9 billion due to higher average selling prices and increased sales volumes of ethanol and other corn products, in part due to the Company's two new ethanol dry mills coming on-line.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Cost of products sold increased 32% to \$76.4 billion due to higher costs of agricultural commodities, negative impacts resulting from changes in LIFO inventory valuations, and higher manufacturing costs. Cost of products sold includes charges of \$368 million from the effect of increasing agricultural commodity prices on LIFO inventory valuation reserves, compared to credits of \$42 million in the prior year caused by decreasing agricultural commodity prices. Manufacturing expenses increased \$410 million due primarily to higher processed volumes, including the volumes of the Company's new greenfield operations coming on-line, and higher average unit costs for certain chemicals and fuels used in the Company's processing and transportation operations. During the second quarter of fiscal 2011, the Company updated its estimates for service lives of certain of its machinery and equipment assets. This change in estimate resulted in a \$133 million decrease in depreciation expense compared to the amount of depreciation expense the Company would have recorded using the previously estimated service lives. Manufacturing expenses included \$94 million in fiscal 2011 related to the start-up of new plants compared to \$110 million in the prior year.

Selling, general and administrative expenses increased 15% to \$1.6 billion. This increase was due to higher employee-related costs and higher administrative expenses. Higher employee-related costs principally reflect the increase in number of employees during the year and included higher salaries and wages, higher accruals for performance-based compensation and higher benefit expenses.

Equity in earnings of unconsolidated affiliates declined 3% to \$542 million. The decline in earnings from the Company's equity investee, Wilmar, was partially offset by higher earnings of the Company's equity investee, Gruma, in part due to a gain on Gruma's disposition of certain assets.

Interest income increased 8% to \$136 million principally resulting from higher interest earned on advances to affiliates.

Interest expense increased 14% to \$482 million. Interest costs capitalized as a component of major construction projects in progress was \$7 million compared to \$75 million in the prior year. Interest incurred on long-term debt declined \$24 million as a result of debt retirements while interest incurred on short-term debt increased \$15 million due to higher average borrowings driven by higher working capital requirements.

Other (income) expense – net increased \$255 million primarily due to the \$71 million gain resulting from the revaluation of the Company's previously held equity interest in Golden Peanut upon acquisition of the remaining 50% interest, gains on interest rate swaps of \$30 million compared to a loss of \$59 million in the prior year, and a decrease in charges related to early extinguishment of debt from \$75 million in the prior year to \$15 million in fiscal 2011.

Income taxes increased \$331 million to \$997 million due to a higher effective income tax rate and higher pretax earnings. The Company's effective income tax rate increased to 33.1% during 2011 compared to 25.8% in fiscal 2010. The increase in the 2011 rate was primarily due to a geographic mix of earnings that shifted more to the U.S., a higher U.S. effective income tax rate, income tax expense associated with foreign currency re-measurement of non-monetary assets in Brazil, and adjustments to deferred income tax balances.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Operating profit by segment is as follows:

	2011 (In millions)	2010	Change
Oilseeds Processing			
Crushing and Origination	\$925	\$834	\$91
Refining, Packaging, Biodiesel, and Other	342	300	42

Other	1	(13)	14
Total Corporate	\$(1,116)	\$(752)	\$(364)

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Oilseeds Processing operating profit increased 9% to \$1.7 billion. Crushing and Origination results increased \$91 million to \$925 million. Improved North American crushing results, particularly for cotton seed and canola, were partially offset by lower crushing margins in South America and Europe. Margins globally were enhanced by good positioning and by improved origination results. In South America, fertilizer results improved due to higher margins and volumes. Refining, Packaging, Biodiesel and Other results increased \$42 million to \$342 million due principally to higher packaged oils margins and improved North American and European biodiesel results. Cocoa and Other results increased \$114 million to \$240 million primarily due to the \$71 million gain on the revaluation of the Company's equity interest in Golden Peanut and higher peanut profits as a result of the December 31, 2010 acquisition of the remaining 50% interest of Golden Peanut. Asia results decreased \$108 million due principally to decreased earnings from the Company's equity investee, Wilmar.

Corn Processing operating profit increased 46% to \$1.1 billion, which includes favorable impacts from ownership positions, which were allocated to sweeteners and starches and bioproducts based on total grind. Sweeteners and Starches operating profit decreased \$208 million to \$330 million due to higher net corn costs partially offset by higher sales volumes. Sales volumes increased due to U.S. export shipments of sweeteners and improved U.S. demand for industrial starches. Bioproducts operating profit improved \$549 million primarily due to higher ethanol sales volumes and higher average selling prices leading to increased ethanol and lysine margins. Bioproducts margins were also enhanced by favorable corn ownership positions. Bioproducts results included startup costs related to the Company's new plants of \$94 million in 2011 compared to \$107 million in the prior year.

Agricultural Services operating profit increased 32% to \$1.3 billion. Merchandising and Handling results increased due to higher corn and wheat sales volumes and higher margins. A large 2010 U.S. harvest combined with strong international demand resulted in higher U.S. export shipments. Merchandising and Handling results in fiscal 2011 included an insurance recovery of \$67 million related to property damage and business interruption resulting from an October 2008 explosion at the Company's Destrehan, LA, export facility. International merchandising results were weaker in part due to positions impacted by unexpected shifts in crop supply caused by weather conditions and government actions in the Black Sea region. Transportation results increased \$21 million to \$117 million primarily due to higher barge freight rates and higher barge utilization levels, in part due to higher U.S. export volumes. Milling and Other results improved due principally to increased equity earnings from the Company's equity investee, Gruma which include a \$78 million gain related to Gruma's disposal of certain assets.

Other financial operating profit decreased 15% to \$39 million primarily due to higher captive insurance loss provisions principally related to a \$67 million loss related to the Company's Destrehan, LA, export facility insurance claim.

Corporate results decreased \$364 million primarily due to the negative impact from changing LIFO inventory valuations and higher interest expense - net. The effects of changing commodity prices on LIFO inventory reserves resulted in charges of \$368 million compared to credits of \$42 million for the prior year. Corporate interest expense increased \$64 million mostly due to lower capitalization of interest costs for construction projects in progress. Partially offsetting the higher LIFO and interest costs were \$30 million of gains on interest rate swaps compared to prior year losses on interest rate swaps of \$59 million. In addition, 2010 included charges of \$75 million on early debt extinguishment compared to \$8 million of similar charges in fiscal 2011.

Liquidity and Capital Resources

A Company objective is to have sufficient liquidity, balance sheet strength, and financial flexibility to fund the operating and capital requirements of a capital intensive agricultural commodity-based business. The primary source of funds to finance the Company's operations and capital expenditures is cash generated by operations and lines of credit, including a commercial paper borrowing facility. In addition, the Company believes it has access to funds from public and private equity and debt capital markets in both U.S. and international markets.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Cash provided by operating activities was \$2.5 billion for the six months compared to \$3.0 billion the same period last year. Working capital changes increased cash by \$1.2 billion in the current period and \$1.6 billion in the same period last year. Cash used in investing activities was \$1.0 billion for the six months compared to a \$0.9 billion use in the same period last year. Capital expenditures were \$0.62 billion in the current period compared to \$0.85 billion in the prior year period, as concerted efforts have been made to enhance the Company's capital allocation process and drive capital efficiency to improve returns. In the prior period, the Company reduced its holdings of marketable securities by a net \$0.3 billion and divested cash of \$0.1 billion as a result of deconsolidation of the Company's banking operations. In the current period, the Company reinvested a net \$0.9 billion of its excess cash into marketable securities, including its 19.9% equity stake in GrainCorp. Cash used in financing activities was \$1.1 billion for the six months comprised of dividend payments and debt payments net of borrowings. Cash used in financing activities of \$1.9 billion in the same period last year was primarily for repayment of debt, stock buybacks under publicly announced share repurchase programs, and dividend payments.

At December 31, 2012, the Company had \$2.3 billion of cash, cash equivalents, and short-term marketable securities and a current ratio, defined as current assets divided by current liabilities, of 1.8 to 1. Included in working capital is \$8.4 billion of readily marketable commodity inventories. At December 31, 2012, the Company's capital resources included net worth of \$19.1 billion and lines of credit totaling \$8.5 billion, of which \$5.7 billion was unused. The Company's ratio of long-term debt to total capital (the sum of long-term debt and shareholders' equity) was 25% at December 31, 2012 and 26% at June 30, 2012. This ratio is a measure of the Company's long-term indebtedness and is an indicator of financial flexibility. The Company's ratio of net debt (the sum of short-term debt, current maturities of long-term debt, and long-term debt less the sum of cash and cash equivalents and short-term marketable securities) to capital (the sum of net debt and shareholders' equity) was 27% at December 31, 2012 and 33% at June 30, 2012. Of the Company's total lines of credit, \$6.0 billion support a commercial paper borrowing facility, against which there were \$2.0 billion of commercial paper outstanding at December 31, 2012.

The Company has focused its efforts on achieving improvements in generating or conserving cash in its operations. During the six months ended December 31, 2012, the Company freed up cash from monetizing non-strategic equity investments and assets, using alternative forms of financing for margin requirements of futures transactions, maximizing cash flows from its joint ventures, and reducing certain agricultural commodity inventories.

On March 27, 2012, the Company entered into an amendment of its accounts receivable securitization program (as amended, the "Program") with certain commercial paper conduit purchasers and committed purchasers (collectively, the "Purchasers"). The Program provides the Company with up to \$1.0 billion in funding against accounts receivable transferred into the Program and expands the Company's access to liquidity through efficient use of its balance sheet assets. Under the Program, certain U.S.-originated trade accounts receivable are sold to a wholly-owned bankruptcy-remote entity, ADM Receivables, LLC ("ADM Receivables"). ADM Receivables in turn transfers such purchased accounts receivable in their entirety to the Purchasers pursuant to a receivables purchase agreement. In exchange for the transfer of the accounts receivable, ADM Receivables receives a cash payment of up to \$1.0 billion and an additional amount upon the collection of the accounts receivable (deferred consideration). ADM Receivables uses the cash proceeds from the transfer of receivables to the Purchasers and other consideration to finance the purchase of receivables from the Company and the ADM subsidiaries originating the receivables. The Company acts as master servicer, responsible for servicing and collecting the accounts receivable under the Program. The Program terminates on June 28, 2013. As of December 31, 2012, the fair value of trade receivables transferred to the Purchasers under the Program and derecognized from the Company's consolidated balance sheet was \$1.9 billion. In exchange for the transfer, the Company received cash of \$1.0 billion and recorded a receivable for deferred consideration included in other current assets (see Note 20 for more information and disclosures on the Program).

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

The Company has outstanding \$1.15 billion principal amount of convertible senior notes. As of December 31, 2012, none of the conditions permitting conversion of these notes had been satisfied. The Company has purchased call options and warrants intended to reduce the potential shareholder dilution upon future conversion of the notes. As of December 31, 2012, the market price of the Company's common stock was not greater than the exercise price of the purchased call options or warrants related to the convertible senior notes.

The Company is currently experiencing generally higher prices for agricultural commodities as a result of tight crop supplies, mostly due to weather impacts on Fall 2012 U.S. corn and soybean crop production. Higher prices of commodities have historically correlated with increases in the Company's working capital requirements. The Company depends on access to credit markets, which can be impacted by its credit rating and factors outside of the Company's control, such as the European debt situation, to fund its working capital needs and capital expenditures. The Company expects capital expenditures of \$1.0 billion during 2013.

As of December 31, 2012, the Company held a 19.9% common equity interest in GrainCorp. This interest was initially obtained through the use of two transactions with investment bank counterparties. These transactions were accounted for as derivatives, and the derivatives were settled in equity shares of GrainCorp during the quarter ended December 31, 2012. The Company recognized a gain on these transactions of \$62 million that is reported in Agricultural Services operating profit for the six months ended December 31, 2012. The economic cost of these shares (i.e. net of the derivative gains) was approximately \$0.5 billion.

The purpose of these transactions was to facilitate the Company's planned acquisition of GrainCorp. During the quarter ended December 31, 2012, the Company delivered an initial non-binding proposal, followed later by a second non-binding proposal, with the aim of arriving at an agreement with GrainCorp's Board of Directors under which they would recommend to GrainCorp shareholders an acquisition by the Company of all of GrainCorp, with the most recent proposal of Australian \$12.20 per share in cash. GrainCorp's Board of Directors has rejected these proposals under their belief that this price materially undervalues GrainCorp. The share price of Australian \$12.20 values GrainCorp's equity at approximately US\$3 billion.

The Company continues to consider all of its options with its 19.9% shareholding in GrainCorp. The three major credit rating agencies have put the Company's credit rating on negative watch or negative outlook pending the final outcome of the GrainCorp acquisition proposal and the form of acquisition financing. Should the Company's rating be downgraded due to the consummation of the acquisition, the Company is confident it will be able to access liquidity cost efficiently to fund the operations.

On November 5, 2009, the Company's Board of Directors approved a stock repurchase program authorizing the Company to repurchase up to 100,000,000 shares of the Company's common stock during the period commencing January 1, 2010 and ending December 31, 2014. The Company has acquired approximately 31.6 million shares under this program, resulting in remaining approval to acquire 68.4 million shares.

The Company's credit facilities and certain debentures require the Company to comply with specified financial and non-financial covenants including maintenance of minimum tangible net worth as well as limitations related to incurring liens, secured debt, and certain other financing arrangements. The Company is in compliance with these covenants as of December 31, 2012.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Contractual Obligations

In the normal course of business, the Company enters into contracts and commitments which obligate the Company to make payments in the future. The following table sets forth the Company's significant future obligations by time period. Purchases include commodity-based contracts entered into in the normal course of business, which are further described in Item 7A, "Quantitative and Qualitative Disclosures About Market Risk," energy-related purchase contracts entered into in the normal course of business, and other purchase obligations related to the Company's normal business activities. The following table does not include unrecognized income tax benefits of \$77 million as of December 31, 2012 as the Company is unable to reasonably estimate the timing of settlement. Where applicable, information included in the Company's consolidated financial statements and notes is cross-referenced in this table.

Contractual Obligations	Item 8 Note Reference	Payments Due by Period				
		Total	Less than 1 Year	1 - 3 Years (In millions)	3 - 5 Years	More than 5 Years
Purchases						
Inventories		\$ 18,532	\$ 17,937	\$ 519	\$ 63	\$ 13

Total		\$ 36,574	\$ 22,230	\$ 2,933	\$ 1,337	\$ 10,074

(1) Includes pension contributions of \$37 million for fiscal 2013. The Company is unable to estimate the amount of pension contributions beyond fiscal year 2013. For more information concerning the Company's pension and other postretirement plans, see Note 16 in Item 8.

At December 31, 2012, the Company estimates it will spend approximately \$2.1 billion through fiscal year 2017 to complete currently approved capital projects which are not included in the table above. The Company also has outstanding letters of credit and surety bonds of \$911 million at December 31, 2012.

In addition, the Company has entered into agreements, primarily debt guarantee agreements related to equity-method investees, which could obligate the Company to make future payments. The Company's liability under these agreements arises only if the primary entity fails to perform its contractual obligation. The Company has collateral for a portion of these contingent obligations. At December 31, 2012, these contingent obligations totaled approximately \$44 million.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Off Balance Sheet Arrangements

On March 27, 2012, the Company entered into an amendment of its accounts receivable securitization program (as amended, the "Program") with certain commercial paper conduit purchasers and committed purchasers (collectively, the "Purchasers"). Under the Program, certain U.S.-originated trade accounts receivable are sold to a wholly-owned bankruptcy-remote entity, ADM Receivables, LLC ("ADM Receivables"). ADM Receivables in turn transfers such purchased accounts receivable in their entirety to the Purchasers pursuant to a receivables purchase agreement. In exchange for the transfer of the accounts receivable, ADM Receivables receives a cash payment of up to \$1.0 billion and an additional amount upon the collection of the accounts receivable (deferred consideration). ADM Receivables uses the cash proceeds from the transfer of receivables to the Purchasers and other consideration to finance the purchase of receivables from the Company and the ADM subsidiaries originating the receivables. The Company accounts for these transfers as sales. The Company has no retained interests in the transferred receivables, other than collection and administrative responsibilities and its right to the deferred consideration. At December 31, 2012, the Company did not record a servicing asset or liability related to its retained responsibility, based on its assessment of the servicing fee, market values for similar transactions and its cost of servicing the receivables sold. The Program terminates on June 28, 2013.

As of December 31, 2012, the fair value of trade receivables transferred to the Purchasers under the Program and derecognized from the Company's consolidated balance sheet was \$1.9 billion. In exchange for the transfer, the Company received cash of \$1.0 billion and recorded a \$0.9 billion receivable for deferred consideration included in other current assets. Cash collections from customers on receivables sold were \$21.9 billion for the six months ended December 31, 2012 and \$8.9 billion for the year ended June 30, 2012. Of this amount, \$21.9 billion and \$8.9 billion pertains to cash collections on the deferred consideration for the periods ended December 31, 2012 and June 30, 2012, respectively. Deferred consideration is paid to the Company in cash on behalf of the Purchasers as receivables are collected; however, as this is a revolving facility, cash collected from the Company's customers is reinvested by the Purchasers daily in new receivable purchases under the Program.

The Company's risk of loss following the transfer of accounts receivable under the Program is limited to the deferred consideration outstanding. The Company carries the deferred consideration at fair value determined by calculating the expected amount of cash to be received and is principally based on observable inputs (a Level 2 measurement under applicable accounting standards) consisting mainly of the face amount of the receivables adjusted for anticipated credit losses and discounted at the appropriate market rate. Payment of deferred consideration is not subject to significant risks other than delinquencies and credit losses on accounts receivable transferred under the program which have historically been insignificant.

Transfers of receivables under the Program during the six months ended December 31, 2012 and the year ended June 30, 2012 resulted in an expense for the loss on sale of \$4 million for both periods, which is classified as selling, general, and administrative expenses in the consolidated statements of earnings.

The Company reflects all cash flows related to the Program as operating activities in its consolidated statement of cash flows for the six months ended December 31, 2012 and the year ended June 30, 2012 because the cash received from the Purchasers upon both the sale and collection of the receivables is not subject to significant interest rate risk given the short-term nature of the Company's trade receivables.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Critical Accounting Policies

The process of preparing financial statements requires management to make estimates and judgments that affect the carrying values of the Company's assets and liabilities as well as the recognition of revenues and expenses. These estimates and judgments are based on the Company's historical experience and management's knowledge and understanding of current facts and circumstances. Certain of the Company's accounting policies are considered critical, as these policies are important to the depiction of the Company's financial statements and require significant or complex judgment by management. Management has discussed with the Company's Audit Committee the development, selection, disclosure, and application of these critical accounting policies. Following are the accounting policies management considers critical to the Company's financial statements.

Fair Value Measurements - Inventories and Derivatives

Certain of the Company's assets and liabilities as of December 31, 2012 are valued at estimated fair values, including \$7.0 billion of merchandisable agricultural commodity inventories, \$2.7 billion of derivative assets, \$2.6 billion of derivative liabilities, and \$0.9 billion of inventory-related payables. Derivative assets and liabilities include forward fixed-price purchase and sale contracts for agricultural commodities, forward foreign exchange contracts, and over-the-counter instruments such as options contracts. The merchandisable agricultural commodities are freely traded, have quoted market prices, and may be sold without significant additional processing. Management estimates fair value for its commodity-related assets and liabilities based on exchange-quoted prices, adjusted for differences in local markets. The Company's fair value measurements are mainly based on observable market quotations without significant adjustments and are therefore reported as Level 1 or Level 2 within the fair value hierarchy. Level 3 fair value measurements represent fair value estimates where unobservable price components represent 10% or more of the total fair value price. For more information concerning amounts reported as Level 3, see Note 3 in Item 8. Changes in the market values of these inventories and contracts are recognized in the statement of earnings as a component of cost of products sold. If management used different methods or factors to estimate market value, amounts reported as inventories and cost of products sold could differ materially. Additionally, if market conditions change subsequent to year-end, amounts reported in future periods as inventories and cost of products sold could differ materially.

Derivatives – Designated Hedging Activities

The Company, from time to time, uses derivative contracts designated as cash flow hedges to fix the purchase price of anticipated volumes of commodities to be purchased and processed in a future month, to fix the purchase price of the Company's anticipated natural gas requirements for certain production facilities, and to fix the sales price of anticipated volumes of ethanol. These designated hedging programs principally relate to the Company's Corn Processing operating segment. The change in the market value of such derivative contracts has historically been, and is expected to continue to be, highly effective at offsetting changes in price movements of the hedged item. Gains and losses arising from open and closed hedging transactions are deferred in other comprehensive income, net of applicable income taxes, and recognized as a component of cost of products sold and net sales and other operating income in the statement of earnings when the hedged item is recognized. If it is determined that the derivative instruments used are no longer effective at offsetting changes in the price of the hedged item, then the changes in the market value of these exchange-traded futures and exchange-traded and over-the-counter option contracts would be recorded immediately in the statement of earnings as a component of cost of products sold. See Note 4 in Item 8 for additional information.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Investments in Affiliates

The Company applies the equity method of accounting for investments over which the Company has the ability to exercise significant influence, including its 16.4% investment in Wilmar. These investments in affiliates are carried at cost plus equity in undistributed earnings and are adjusted, where appropriate, for amortizable basis differences between the investment balance and the underlying net assets of the investee. Generally, the minimum ownership threshold for asserting significant influence is 20% ownership of the investee. However, the Company considers all relevant factors in determining its ability to assert significant influence including but not limited to, ownership percentage, board membership, customer and vendor relationships, and other arrangements. If management used a different accounting method for these investments, then the amount of earnings from affiliates the Company recognizes may differ.

Income Taxes

The Company frequently faces challenges from U.S. and foreign tax authorities regarding the amount of taxes due. These challenges include questions regarding the timing and amount of deductions and the allocation of income among various tax jurisdictions. In evaluating the exposure associated with various tax filing positions, the Company records reserves for estimates of potential additional tax owed by the Company. As examples, the Company has received tax assessments from the Brazilian Federal Revenue Service and Argentina tax authorities challenging income tax positions taken by subsidiaries of the Company. The Company evaluated its tax positions for these matters and concluded, based in part upon advice from legal counsel, that it was appropriate to recognize the tax benefits of these positions (see Note 14 in Item 8 for additional information).

Deferred tax assets represent items to be used as tax deductions or credits in future tax returns, and the related tax benefit has already been recognized in the Company's income statement. The realization of the Company's deferred tax assets is dependent upon future taxable income in specific tax jurisdictions, the timing and amount of which are uncertain. The Company evaluates all available positive and negative evidence including estimated future reversals of existing temporary differences, projected future taxable income, tax planning strategies, and recent financial results. Valuation allowances related to these deferred tax assets have been established to the extent the realization of the tax benefit is not likely. To the extent the Company were to favorably resolve matters for which accruals have been established or be required to pay amounts in excess of the aforementioned reserves, the Company's effective tax rate in a given financial statement period may be impacted.

Undistributed earnings of the Company's foreign subsidiaries and the Company's share of the undistributed earnings of affiliated corporate joint venture companies accounted for on the equity method amounting to approximately \$7.7 billion at December 31, 2012, are considered to be permanently reinvested, and accordingly, no provision for U.S. income taxes has been provided thereon. If the Company were to receive distributions from any of these foreign subsidiaries or affiliates or determine the undistributed earnings of these foreign subsidiaries or affiliates to not be permanently reinvested, the Company could be subject to U.S. tax liabilities which have not been provided for in the consolidated financial statements.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Property, Plant, and Equipment and Asset Abandonments and Write-Downs

The Company is principally engaged in the business of procuring, transporting, storing, processing, and merchandising agricultural commodities and products. This business is global in nature and is highly capital-intensive. Both the availability of the Company's raw materials and the demand for the Company's finished products are driven by factors such as weather, plantings, government programs and policies, changes in global demand, changes in standards of living, and global production of similar and competitive crops. These aforementioned factors may cause a shift in the supply/demand dynamics for the Company's raw materials and finished products. Any such shift will cause management to evaluate the efficiency and cash flows of the Company's assets in terms of geographic location, size, and age of its facilities. The Company, from time to time, will also invest in equipment, technology, and companies related to new, value-added products produced from agricultural commodities and products. These new products are not always successful from either a commercial production or marketing perspective. Management evaluates the Company's property, plant, and equipment for impairment whenever indicators of impairment exist. Assets are written down to fair value after consideration of the ability to utilize the assets for their intended purpose or to employ the assets in alternative uses or sell the assets to recover the carrying value. If management used different estimates and assumptions in its evaluation of these assets, then the Company could recognize different amounts of expense over future periods. During the six months ended December 31, 2012 and 2011 and the years ended June 30, 2012, 2011, and 2010, impairment charges for property, plant, and equipment were \$0, \$337 million, \$367 million, \$2 million, and \$9 million, respectively (see Note 19 in Item 8 for additional information on charges taken in the six months ended December 31, 2011 and the year ended June 30, 2012).

Goodwill and Other Intangible Assets

Goodwill and intangible assets deemed to have indefinite lives are not amortized but are subject to annual impairment tests. The Company evaluates goodwill for impairment at the reporting unit level annually on October 1 or whenever there are indicators that the carrying value of the assets may not be fully recoverable. Previously, when the Company's fiscal year ended on June 30, the Company performed its annual goodwill impairment test on April 1 (see Note 1 in Item 8 for additional information regarding this change in accounting policy). Definite-lived intangible assets are amortized over their estimated useful lives and are reviewed for impairment whenever there are indicators that the carrying value of the assets may not be fully recoverable. If management used different estimates and assumptions in its impairment tests, then the Company could recognize different amounts of expense over future periods.

Employee Benefit Plans

The Company provides substantially all U.S. employees and employees at certain international subsidiaries with pension benefits. Eligible U.S. employees with five or more years of service prior to January 1, 2009 participate in a defined benefit pension plan. Eligible U.S. employees hired on or after January 1, 2009 (and eligible salaried employees with less than five years of service prior to January 1, 2009) participate in a "cash balance" pension formula. The Company provides eligible U.S. employees who retire under qualifying conditions with certain postretirement health care benefits. In order to measure the expense and funded status of these employee benefit plans, management makes several estimates and assumptions, including interest rates used to discount certain liabilities, rates of return on assets set aside to fund these plans, rates of compensation increases, employee turnover rates, anticipated mortality rates, and anticipated future health care costs. These estimates and assumptions are based on the Company's historical experience combined with management's knowledge and understanding of current facts and circumstances. Management also uses third-party actuaries to assist in measuring the expense and funded status

of these employee benefit plans. If management used different estimates and assumptions regarding these plans, the funded status of the plans could vary significantly, and the Company could recognize different amounts of expense over future periods. See Note 16 in Item 8 for additional information.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Disclosure Pursuant to Section 219 of the Iran Threat Reduction and Syria Human Rights Act

On or about July 25, 2012, an 80% owned and controlled affiliate of the Company hired a vessel to transport a cargo of grain. The shipping arrangements and payment for \$481,800 for the transportation were made directly with the charterer of the vessel. Neither the names of the vessel nor the charterer were listed on the United States Department of the Treasury's Office of Foreign Assets Control's ("OFAC") List of Specially Designated Nationals (the "SDN List"). It was later determined by the Company and its bank that the vessel involved was beneficially owned by the Islamic Republic of Iran Shipping Lines (IRISL), a sanctioned party. The Company voluntarily disclosed the matter to OFAC. The involvement of a sanctioned party was inadvertent and unintentional and we believe the result of a concerted effort by Iran to hide its ownership of the vessel. Neither the Company nor its affiliate nor other of its subsidiaries have any intention of continuing such activity with a prohibited party. There was no profit that can be attributed to this specific transportation activity. This disclosure is made pursuant to Section 219 of the Iran Threat Reduction Act which requires that an issuer disclose in its annual or quarterly report filed with the Securities and Exchange Commission if any of its affiliates engaged in an OFAC reportable transaction.

Item 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The market risk inherent in the Company's market risk sensitive instruments and positions is the potential loss arising from adverse changes in: commodity market prices as they relate to the Company's net commodity position, foreign currency exchange rates, and interest rates as described below.

Commodities

The availability and prices of agricultural commodities are subject to wide fluctuations due to factors such as changes in weather conditions, crop disease, plantings, government programs and policies, competition, changes in global demand, changes in customer preferences and standards of living, and global production of similar and competitive crops.

The Company manages its exposure to adverse price movements of agricultural commodities used for, and produced in, its business operations, by entering into derivative and non-derivative contracts which reduce the Company's overall short or long commodity position. Additionally, the Company uses exchange-traded futures and exchange-traded and over-the-counter option contracts as components of merchandising strategies designed to enhance margins. The results of these strategies can be significantly impacted by factors such as the correlation between the value of exchange-traded commodities futures contracts and the cash prices of the underlying commodities, counterparty contract defaults, and volatility of freight markets. In addition, the Company, from time-to-time, enters into derivative contracts which are designated as hedges of specific volumes of commodities that will be purchased and processed, or sold, in a future month. The changes in the market value of such futures contracts have historically been, and are expected to continue to be, highly effective at offsetting changes in price movements of the hedged item. Gains and losses arising from open and closed designated hedging transactions are deferred in other comprehensive income, net of applicable taxes, and recognized as a component of cost of products sold or net sales and other operating income in the statement of earnings when the hedged item is recognized.

The Company's commodity position consists of merchandisable agricultural commodity inventories, related purchase and sales contracts, energy and freight contracts, and exchange-traded futures and exchange-traded and over-the-counter option contracts including contracts used to hedge portions of production requirements, net of sales.

Item 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK
(Continued)

The fair value of the Company's commodity position is a summation of the fair values calculated for each commodity by valuing all of the commodity positions at quoted market prices for the period, where available, or utilizing a close proxy. The Company has established metrics to monitor the amount of market risk exposure, which consist of volumetric limits, and value-at-risk (VaR) limits. VaR measures the potential loss, at a 95% confidence level, that could be incurred over a one year period. Volumetric limits are monitored daily and VaR calculations and sensitivity analysis are monitored weekly.

In addition to measuring the hypothetical loss resulting from an adverse two standard deviation move in market prices (assuming no correlations) over a one year period using VaR, sensitivity analysis is performed measuring the potential loss in fair value resulting from a hypothetical 10% adverse change in market prices. The highest, lowest, and average weekly position for the six months ended December 31, 2012 and the years ended June 30, 2012 and 2011 together with the market risk from a hypothetical 10% adverse price change is as follows:

Long/(Short)	December 31, 2012		June 30, 2012		June 30, 2011	
	Fair Value	Market Risk	Fair Value	Market Risk	Fair Value	Market Risk
	(In millions)					
Highest position	\$ 2,218	\$ 222	\$ 1,477	\$ 148	\$ 2,388	\$ 239
Lowest position	536	54	(383)	(38)	368	37
Average position	1,417	142	546	55	1,644	164

The increase in fair value of the average position for December 31, 2012 compared to June 30, 2012 was principally the result of the increase in average quantities underlying the weekly commodity position.

Currencies

The Company has consolidated subsidiaries in over 75 countries. For the majority of the Company's subsidiaries located outside the United States, the local currency is the functional currency. To reduce the risks associated with foreign currency exchange rate fluctuations, the Company enters into currency exchange contracts to minimize its foreign currency position related to transactions denominated primarily in Euro, British pound, Canadian dollar, and Brazilian real currencies. These currencies represent the major functional or local currencies in which recurring business transactions occur. The Company does not use currency exchange contracts as hedges against amounts permanently invested in foreign subsidiaries and affiliates. The currency exchange contracts used are forward contracts, swaps with banks, exchange-traded futures contracts, and over-the-counter options. The changes in market value of such contracts have a high correlation to the price changes in the currency of the related transactions. The potential loss in fair value for such net currency position resulting from a hypothetical 10% adverse change in foreign currency exchange rates is not material.

The amount the Company considers permanently invested in foreign subsidiaries and affiliates and translated into dollars using the year-end exchange rates is \$7.7 billion at December 31, 2012, and \$7.2 billion at June 30, 2012. This increase is due to the appreciation of foreign currencies versus the U.S. dollar partially and an increase in retained earnings of the foreign subsidiaries and affiliates. The potential loss in fair value, which would principally be recognized in Other Comprehensive Income, resulting from a hypothetical 10% adverse change in quoted foreign currency exchange rates is \$773 million and \$722 million for December 31, 2012 and June 30, 2012, respectively. Actual results may differ.

Item 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK
(Continued)

Interest

The fair value of the Company's long-term debt is estimated using quoted market prices, where available, and discounted future cash flows based on the Company's current incremental borrowing rates for similar types of borrowing arrangements. Such fair value exceeded the long-term debt carrying value. Market risk is estimated as the potential increase in fair value resulting from a hypothetical 50 basis points decrease in interest rates. Actual results may differ.

	December 31, 2012	June 30, 2012 (In millions)	June 30, 2011
Fair value of long-term debt	\$ 7,901	\$ 8,057	\$ 9,108
Excess of fair value over carrying value	1,445	1,522	842
Market risk	404	422	333

The decrease in fair value of long-term debt at December 31, 2012 is due to the October 2012 debt exchange and increased interest rates partially offset by new borrowings.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies

Nature of Business

The Company is principally engaged in procuring, transporting, storing, processing, and merchandising agricultural commodities and products.

Change in Fiscal Year

On May 3, 2012, the Board of Directors of the Company determined that, in accordance with its Bylaws and upon the recommendation of the Audit Committee, the Company's fiscal year shall begin on January 1 and end on December 31 of each year, starting on January 1, 2013. The required transition period of July 1, 2012 to December 31, 2012 is included in this Form 10-K transition report. Amounts included in this report for the six months ended December 31, 2011 are unaudited.

Principles of Consolidation

The consolidated financial statements as of December 31, 2012, June 30, 2012 and 2011, for the six months ended December 31, 2012 and 2011, and for the three years ended June 30, 2012, 2011, and 2010, include the accounts of the Company and its majority-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated. Investments in affiliates are carried at cost plus equity in undistributed earnings since acquisition and are adjusted, where appropriate, for basis differences between the investment balance and the underlying net assets of the investee. The Company's portion of the results of certain affiliates and results of certain majority-owned subsidiaries are included using the most recent available financial statements. In each case, the financial statements are within 93 days of the Company's year end and are consistent from period to period, except as described below. The Company evaluates and consolidates, where appropriate, its less than majority-owned investments.

Effective in the second quarter of fiscal year 2011, one of the Company's majority-owned subsidiaries changed its accounting period resulting in the elimination of a one-month lag in the reporting of the consolidated subsidiary's financial results. The effect of this change on after-tax earnings for the year ended June 30, 2011 was immaterial.

In the first quarter of fiscal 2012, the Company sold its majority ownership interest of Hickory Point Bank and Trust Company, fsb (Bank), previously a wholly-owned subsidiary. As a result, the accounts of the Bank were deconsolidated with no material effect to after-tax earnings. In the quarter ended December 31, 2012, the Company disposed of its remaining common equity interest in the Bank with no material effect to after-tax earnings.

The Company consolidates certain less than wholly-owned subsidiaries for which the minority interest was subject to a mandatorily redeemable put option. As a result of the put option, the associated minority interest was reported in other long-term liabilities. On December 31, 2011, the put option expired and the Company reclassified \$174 million of minority interest from other long-term liabilities to noncontrolling interests in shareholders' equity at that date.

Use of Estimates

The preparation of consolidated financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect amounts reported in its consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 1. Summary of Significant Accounting Policies (Continued)

During the second quarter of fiscal year 2011, the Company updated its estimates for service lives of certain of its machinery and equipment assets in order to better match the Company's depreciation expense with the periods these assets are expected to generate revenue based on planned and historical service periods. The new estimated service lives were established based on manufacturing engineering data, external benchmark data and on new information obtained as a result of the Company's then recent major construction projects. These new estimated service lives were also supported by biofuels legislation and mandates in many countries that are driving requirements over time for greater future usage and higher blend rates of biofuels.

The Company accounted for this service life update as a change in accounting estimate as of October 1, 2010 in accordance with the guidance of Accounting Standards Codification (ASC) Topic 250, Accounting Changes and Error Corrections, thereby impacting the quarter in which the change occurred and future quarters. The effect of this change on after-tax earnings and diluted earnings per share was an increase of \$83 million and \$0.13, respectively, for the year ended June 30, 2011.

Reclassifications

Other long-term assets and deferred income taxes in the prior years' consolidated balance sheets have been reclassified to conform to the current year's presentation. As a result, total investments and other assets, total long-term liabilities, total assets, and total liabilities and shareholders' equity changed from the previously reported amounts in June 30, 2012 and 2011.

Cash Equivalents

The Company considers all non-segregated, highly-liquid investments with a maturity of three months or less at the time of purchase to be cash equivalents.

Segregated Cash and Investments

The Company segregates certain cash and investment balances in accordance with regulatory requirements, commodity exchange requirements, insurance arrangements, and lending arrangements. These segregated balances represent deposits received from customers of the Company's registered futures commission merchant, securities pledged to commodity exchange clearinghouses, and cash and securities pledged as security under certain insurance or lending arrangements. Segregated cash and investments primarily consist of cash, United States government securities, and money-market funds.

Receivables

The Company records accounts receivable at net realizable value. This value includes an allowance for estimated uncollectible accounts of \$87 million, \$92 million, and \$100 million at December 31, 2012 and June 30, 2012 and 2011, respectively, to reflect any loss anticipated on the accounts receivable balances. The Company calculates this allowance based on its history of write-offs, level of past-due accounts, and its relationships with, and the economic status of, its customers. Portions of the allowance for uncollectible accounts are recorded in trade receivables, other current assets, and other assets.

Credit risk on receivables is minimized as a result of the large and diversified nature of the Company's worldwide customer base. The Company manages its exposure to counter-party credit risk through credit analysis and approvals, credit limits, and monitoring procedures. Collateral is generally not required for the Company's receivables.

Accounts receivable due from unconsolidated affiliates as of December 31, 2012 and June 30, 2012 and 2011 was \$566 million, \$266 million, and \$367 million, respectively.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 1. Summary of Significant Accounting Policies (Continued)

Inventories

Inventories of certain merchandisable agricultural commodities, which include inventories acquired under deferred pricing contracts, are stated at market value. In addition, the Company values certain inventories using the lower of cost, determined by either the first-in, first-out (FIFO) or last-in, first-out (LIFO) methods, or market.

Marketable Securities

The Company classifies its marketable securities as available-for-sale, except for certain designated securities which are classified as trading securities. Available-for-sale securities are carried at fair value, with the unrealized gains and losses, net of income taxes, reported as a component of other comprehensive income. The Company monitors its investments for impairment periodically, and recognizes an impairment charge when the decline in fair value of an investment is judged to be other-than-temporary. Trading securities are carried at fair value with unrealized gains and losses included in income on a current basis. The Company uses the specific identification method when securities are sold or reclassified out of accumulated other comprehensive income into earnings. The Company considers marketable securities maturing in less than one year as short-term. All other marketable securities are classified as long-term.

Property, Plant, and Equipment

Property, plant, and equipment is recorded at cost. Repair and maintenance costs are expensed as incurred. The Company generally uses the straight-line method in computing depreciation for financial reporting purposes and generally uses accelerated methods for income tax purposes. The annual provisions for depreciation have been computed principally in accordance with the following ranges of asset lives: buildings - 10 to 40 years; machinery and equipment - 3 to 30 years. The Company capitalized interest on major construction projects in progress of \$12 million, \$9 million, \$21 million, \$7 million, and \$75 million for the six months ended December 31, 2012 and 2011, and the years ended June 30, 2012, 2011, and 2010, respectively.

Goodwill and other intangible assets

Goodwill and other intangible assets deemed to have indefinite lives are not amortized but are subject to annual impairment tests. Prior to this transition period, the Company's accounting policy was to evaluate goodwill and other intangible assets with indefinite lives for impairment on April 1 of each fiscal year or whenever there were indicators that the carrying value of the assets may not be fully recoverable. Effective in the transition period ended December 31, 2012, the Company voluntarily changed its accounting policy to begin conducting the annual goodwill and indefinite life intangible assets impairment tests on October 1. The change to the annual goodwill and indefinite life intangible assets impairment testing date is preferable under the circumstances as the new impairment testing date is better aligned with the timing of the Company's annual strategic, planning, and budgeting process, and the timing is more closely aligned with the Company's annual financial reporting process as a result of the change in year end. The resulting change in accounting principle related to the annual testing date will not delay, accelerate, or avoid an impairment charge of the Company's goodwill. As it is impracticable to objectively determine the estimates and assumptions necessary to perform the annual goodwill impairment test as of October 1 for periods prior to October 1, 2012, the Company will prospectively apply the change in the annual goodwill impairment testing date effective

October 1, 2012. There were no goodwill impairment charges recorded during the six months ended December 31, 2012 and the years ended June 30, 2012, 2011, and 2010. The carrying value of the Company's other intangible assets is not material.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 1. Summary of Significant Accounting Policies (Continued)

Asset Abandonments and Write-Downs

The Company evaluates long-lived assets for impairment whenever indicators of impairment exist. Assets are written down to fair value after consideration of the ability to utilize the assets for their intended purpose or to employ the assets in alternative uses or sell the assets to recover the carrying value. During the six months ended December 31, 2012 and 2011 and the years ended June 30, 2012, 2011, and 2010, impairment charges were \$0, \$337 million, \$367 million, \$2 million, and \$9 million, respectively (see Note 19 for additional information on charges taken in the six months ended December 31, 2012 and 2011 and the year ended June 30, 2012).

Net Sales

The Company follows a policy of recognizing sales revenue at the time of delivery of the product and when all of the following have occurred: a sales agreement is in place, pricing is fixed or determinable, and collection is reasonably assured. The Company has sales contracts that allow for pricing to occur after title of the goods has passed to the customer. In these cases, the Company continues to report the goods in inventory until it recognizes the sales revenue once the price has been determined. Freight costs and handling charges related to sales are recorded as a component of cost of products sold.

Net sales to unconsolidated affiliates during the six months ended December 31, 2012 and 2011 and for the years ended June 30, 2012, 2011, and 2010 were \$4.0 billion, \$4.5 billion, \$7.7 billion, \$7.1 billion, and \$7.1 billion, respectively.

Stock Compensation

The Company recognizes expense for its share-based compensation based on the fair value of the awards that are granted. The Company's share-based compensation plans provide for the granting of restricted stock, restricted stock units, performance stock units, and stock options. The fair values of stock options and performance stock units are estimated at the date of grant using the Black-Scholes option valuation model and a lattice valuation model, respectively. These valuation models require the input of highly subjective assumptions. Measured compensation cost, net of estimated forfeitures, is recognized ratably over the vesting period of the related share-based compensation award.

Research and Development

Costs associated with research and development are expensed as incurred. Such costs incurred, net of expenditures subsequently reimbursed by government grants, were \$28 million, \$29 million, \$56 million, \$60 million, and \$56 million for the six months ended December 31, 2012 and 2011 and the years ended June 30, 2012, 2011, and 2010, respectively.

Per Share Data

Basic earnings per common share are determined by dividing net earnings attributable to controlling interests by the weighted average number of common shares outstanding. In computing diluted earnings per share, average number of

common shares outstanding is increased by common stock options outstanding with exercise prices lower than the average market price of common shares using the treasury share method.

As further described in Note 10, certain potentially dilutive securities (the \$1.75 billion Equity Units) were excluded from the diluted average shares calculation because their impact was anti-dilutive, except during the third quarter of fiscal 2011. See Note 11 for the earnings per share calculations.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 1. Summary of Significant Accounting Policies (Continued)

Adoption of New Accounting Standards

Effective July 1, 2012, the Company adopted the amended guidance of ASC Topic 220, Comprehensive Income, which requires the Company to present total comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The amended guidance eliminates the option to present components of other comprehensive income as part of the statement of shareholders' equity. The Company is required to apply the presentation and disclosure requirements of the amended guidance retrospectively. The adoption of this amended guidance changed the financial statement presentation and required expanded disclosures in the Company's consolidated financial statements but did not impact financial results.

Pending Accounting Standards

Effective January 1, 2013, the Company will be required to adopt the amended guidance of ASC Topic 220, Comprehensive Income, which requires the Company to present, either on the face of the consolidated statement of earnings or in the notes, the effect on the line items of net income of significant amounts reclassified out of accumulated other comprehensive income. The adoption of this amended guidance will require expanded disclosures in the Company's consolidated financial statements but will not impact results.

Note 2. Acquisitions

The Company's acquisitions are accounted for as purchases in accordance with ASC Topic 805, Business Combinations, as amended. Tangible assets and liabilities, based on preliminary purchase price allocations for 2012 acquisitions, were adjusted to fair values at acquisition date with the remainder of the purchase price, if any, recorded as goodwill. The identifiable intangible assets acquired as part of these acquisitions were not material. Operating results of these acquisitions are included in the Company's financial statements from the date of acquisition and are not significant to the Company's consolidated operating results.

Transition Period 2012 Acquisitions

During the six months ended December 31, 2012, the Company made eight acquisitions for a total cost of \$26 million in cash and recorded a preliminary allocation of the purchase price related to these acquisitions. The net cash purchase price for these eight acquisitions of \$26 million was preliminarily allocated to working capital, property, plant, and equipment, goodwill, and other long-term assets for \$4 million, \$24 million, \$2 million, and \$(4) million, respectively.

Fiscal Year 2012 Acquisitions

During fiscal year 2012, the Company made nine acquisitions for a total cost of \$241 million in cash and recorded a preliminary allocation of the purchase price related to these acquisitions. The net cash purchase price for these nine acquisitions of \$241 million was allocated to working capital, property, plant, and equipment, goodwill, other long-term assets, and long-term liabilities for \$(12) million, \$199 million, \$51 million, \$6 million, and \$3 million, respectively. The finalization of the purchase price allocations related to these acquisitions did not result in material

adjustments. There was no single material acquisition during the year.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 2. Acquisitions (Continued)

Fiscal Year 2011 Acquisitions

During fiscal year 2011, the Company made four acquisitions for a total cost of \$218 million in cash and recorded a preliminary allocation of the purchase price related to these acquisitions. The net cash purchase price for these four acquisitions of \$218 million plus the acquisition-date fair value of the equity interest the Company previously held in Golden Peanut was allocated to working capital, property, plant, and equipment, goodwill, other long-term assets, and long-term liabilities for \$113 million, \$235 million, \$63 million, \$11 million, and \$36 million, respectively. The finalization of the purchase price allocations related to these acquisitions did not result in material adjustments.

The acquisition of Alimenta (USA), Inc., the Company's former 50 percent partner in Golden Peanut, was the only significant acquisition during fiscal year 2011. This transaction resulted in the Company obtaining control of the remaining outstanding shares of Golden Peanut, the largest U.S. handler, processor and exporter of peanuts and operator of a facility in Argentina. This business fits well with the Company's existing U.S. oilseed and export operations in its global oilseed business. A pre-tax gain of \$71 million was recognized in the second quarter of fiscal year 2011 as a result of revaluing the Company's previously held investment in Golden Peanut in conjunction with the acquisition of the remaining 50 percent.

Fiscal Year 2010 Acquisitions

During fiscal year 2010, the Company acquired two businesses for a total cost of \$62 million in cash. The purchase price of \$62 million was allocated to current assets, property, plant, and equipment, and goodwill for \$2 million, \$57 million, and \$3 million, respectively.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 3. Fair Value Measurements

The following tables set forth, by level, the Company's assets and liabilities that were accounted for at fair value on a recurring basis as of December 31, 2012 and June 30, 2012 and 2011.

The Company determines fair value based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Three levels are established within the fair value hierarchy that may be used to report fair value:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 1 assets and liabilities include exchange-traded derivative contracts, U.S. treasury securities and certain publicly traded equity securities.

Level 2: Observable inputs, including Level 1 prices that have been adjusted; quoted prices for similar assets or liabilities; quoted prices in markets that are less active than traded exchanges; and other inputs that are observable or can be substantially corroborated by observable market data.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 3. Fair Value Measurements (Continued)

Level 3: Unobservable inputs that are supported by little or no market activity and that are a significant component of the fair value of the assets or liabilities. In evaluating the significance of fair value inputs, the Company generally classifies assets or liabilities as Level 3 when their fair value is determined using unobservable inputs that individually or when aggregated with other unobservable inputs, represent more than 10% of the fair value of the assets or liabilities. Judgment is required in evaluating both quantitative and qualitative factors in the determination of significance for purposes of fair value level classification. Level 3 amounts can include assets and liabilities whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as assets and liabilities for which the determination of fair value requires significant management judgment or estimation.

In many cases, a valuation technique used to measure fair value includes inputs from multiple levels of the fair value hierarchy. The lowest level of input that is a significant component of the fair value measurement determines the placement of the entire fair value measurement in the hierarchy. The Company's assessment of the significance of a particular input to the fair value measurement requires judgment, and may affect the classification of fair value assets and liabilities within the fair value hierarchy levels.

The Company's policy regarding the timing of transfers between levels, including both transfers into and transfers out of Level 3, is to measure and record the transfers at the end of the reporting period. For all periods presented, the Company had no transfers between Levels 1 and 2. Transfers into Level 3 of assets and liabilities previously classified in Level 2 were due to the relative value of unobservable inputs to the total fair value measurement of certain products and derivative contracts rising above the 10% threshold. Transfers out of Level 3 were primarily due to the relative value of unobservable inputs to the total fair value measurement of certain products and derivative contracts falling below the 10% threshold and thus permitting reclassification to Level 2.

The Company uses the market approach valuation technique to measure the majority of its assets and liabilities carried at fair value. Estimated fair values for inventories carried at market are based on exchange-quoted prices, adjusted for differences in local markets, broker or dealer quotations or market transactions in either listed or over-the-counter (OTC) markets. Market valuations for the Company's inventories are adjusted for location and quality because the exchange-quoted prices represent contracts that have standardized terms for commodity, quantity, future delivery period, delivery location, and commodity quality or grade. Generally, the valuations are based on price information that is observable by market participants, or rely only on insignificant unobservable information. In such cases, the inventory is classified in Level 2. Certain inventories may require management judgment or estimation for a more significant component of the fair value amount. For these inventories, the availability of sufficient third-party information is limited. In such cases, the inventory is classified as Level 3. Changes in the fair value of inventories are recognized in the consolidated statements of earnings as a component of cost of products sold.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 3. Fair Value Measurements (Continued)

The Company's derivative contracts are measured at fair value including forward commodity purchase and sale contracts, exchange-traded commodity futures and option contracts, and OTC instruments related primarily to agricultural commodities, ocean freight, energy, interest rates, and foreign currencies. Exchange-traded futures and options contracts are valued based on unadjusted quoted prices in active markets and are classified in Level 1. The majority of the Company's exchange-traded futures and options contracts are cash-settled on a daily basis and, therefore, are not included in these tables. Fair value for forward commodity purchase and sale contracts is estimated based on exchange-quoted prices adjusted for differences in local markets. These differences are generally determined using inputs from broker or dealer quotations or market transactions in either the listed or OTC markets. When observable inputs are available for substantially the full term of the contract, it is classified in Level 2. When unobservable inputs have a significant impact on the measurement of fair value, the contract is classified in Level 3. Based on historical experience with the Company's suppliers and customers, the Company's own credit risk and knowledge of current market conditions, the Company does not view nonperformance risk to be a significant input to fair value for the majority of its forward commodity purchase and sale contracts. However, in certain cases, if the Company believes the nonperformance risk to be a significant input, the Company records estimated fair value adjustments, and classifies the contract in Level 3. Except for certain derivatives designated as cash flow hedges, changes in the fair value of commodity-related derivatives are recognized in the consolidated statements of earnings as a component of cost of products sold. Changes in the fair value of foreign currency-related derivatives are recognized in the consolidated statements of earnings as a component of net sales and other operating income, cost of products sold, and other (income) expense-net. The effective portions of changes in the fair value of derivatives designated as cash flow hedges are recognized in the consolidated balance sheets as a component of accumulated other comprehensive income (loss) until the hedged items are recorded in earnings or it is probable the hedged transaction will no longer occur.

The Company's marketable securities are comprised of U.S. Treasury securities, obligations of U.S. government agencies, corporate and municipal debt securities, and equity investments. U.S. Treasury securities and certain publicly traded equity investments are valued using quoted market prices and are classified in Level 1. U.S. government agency obligations, corporate and municipal debt securities and certain equity investments are valued using third-party pricing services and substantially all are classified in Level 2. Security values that are determined using pricing models are classified in Level 3. Unrealized changes in the fair value of available-for-sale marketable securities are recognized in the consolidated balance sheets as a component of accumulated other comprehensive income (loss) unless a decline in value is deemed to be other-than-temporary at which point the decline is recorded in earnings.

The Company has deferred consideration under its accounts receivable securitization program (the "Program") which represents a note receivable from the purchasers under the Program. This amount is reflected in other current assets on the consolidated balance sheet (see Note 20). The Company carries the deferred consideration at fair value determined by calculating the expected amount of cash to be received. The fair value is principally based on observable inputs (a Level 2 measurement) consisting mainly of the face amount of the receivables adjusted for anticipated credit losses and discounted at the appropriate market rate. Payment of deferred consideration is not subject to significant risks other than delinquencies and credit losses on accounts receivable transferred under the program which have historically been insignificant.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 3. Fair Value Measurements (Continued)

The following tables present a rollforward of the activity of all assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) during the six months ended December 31, 2012 and the twelve months ended June 30, 2012 and 2011.

	Level 3 Fair Value Assets Measurements at December 31, 2012		
	Inventories Carried at Market	Commodity Derivative Contracts Gains (In millions)	Total
Balance, June 30, 2012	\$ 1,462	\$ 171	\$ 1,633

*Includes gains of \$109 million that are attributable to the change in unrealized gains or losses relating to Level 3 assets and liabilities still held at June 30, 2011.

Fair values for inventories and commodity purchase and sale contracts are generally estimated based on observable, exchange-quoted futures prices adjusted as needed to arrive at prices in local markets. Exchange-quoted futures prices represent quotes for contracts that have standardized terms for commodity, quantity, future delivery period, delivery location, and commodity quality or grade. In some cases, the price components that result in differences between the exchange-traded prices and the local prices are observable based upon available quotations for these pricing components, and in some cases, the differences are unobservable. These price components primarily include transportation costs and other adjustments required due to location, quality, or other contract terms. In the table below, these other adjustments are referred to as Basis.

The changes in unobservable price components are determined by specific local supply and demand characteristics at each facility and the overall market. Factors such as substitute products, weather, fuel costs, contract terms, and futures prices also impact the movement of these unobservable price components.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 3. Fair Value Measurements (Continued)

The following table sets forth the weighted average percentage of the unobservable price components included in the Company's Level 3 valuations as of December 31, 2012 and June 30, 2012. The Company's Level 3 measurements may include Basis only, transportation cost only, or both price components. As an example, for Level 3 inventories with Basis, the unobservable component is a weighted average 13.5% of the total price for assets and 26.2% for liabilities.

Component Type	December 31, 2012		June 30, 2012	
	Assets	Liabilities	Assets	Liabilities
Inventories				
Basis	13.5%	26.2%	8.8%	2.3%
Transportation cost	8.4%	9.1%	8.5%	7.9%
Commodity Derivative Contracts				
Basis	45.7%	17.0%	12.6%	11.8%
Transportation cost	16.2%	7.7%	12.6%	14.0%

In certain of the Company's principal markets, the Company relies on price quotes from third parties to value its inventories and physical commodity purchase and sale contracts. These price quotes are generally not further adjusted by the Company in determining the applicable market price. In some cases, availability of third-party quotes is limited to only one or two independent sources. In these situations, the Company considers these price quotes as 100 percent unobservable and, therefore, the fair value of these items is reported in Level 3.

Note 4. Inventories, Derivative Instruments & Hedging Activities

The Company values certain inventories using the lower of cost, determined by either the LIFO or FIFO method, or market. Inventories of certain merchandisable agricultural commodities, which include inventories acquired under deferred pricing contracts, are stated at market value.

	December 31 2012	June 30 2012 (In millions)	June 30 2011
LIFO inventories			
FIFO value	\$ 1,356	\$ 1,070	\$ 1,143
LIFO valuation reserve	(522)	(583)	(593)
LIFO inventories carrying value	834	487	550
FIFO inventories	5,966	4,946	5,590
Market inventories	7,036	6,759	5,915
Total inventories	\$ 13,836	\$ 12,192	\$ 12,055

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 4. Inventories, Derivative Instruments & Hedging Activities (Continued)

The Company recognizes all of its derivative instruments as either assets or liabilities at fair value in its consolidated balance sheet. The accounting for changes in the fair value (i.e., gains or losses) of a derivative instrument depends on whether it has been designated and qualifies as part of a hedging relationship and further, on the type of hedging relationship. The majority of the Company's derivatives have not been designated as hedging instruments. For those derivative instruments that are designated and qualify as hedging instruments, a reporting entity must designate the hedging instrument, based upon the exposure being hedged, as a fair value hedge, a cash flow hedge, or a hedge of a net investment in a foreign operation. As of December 31, 2012 and June 30, 2012 and 2011, the Company has certain derivatives designated as cash flow hedges. Within the Note 4 tables, zeros represent minimal amounts.

Derivatives Not Designated as Hedging Instruments

The Company generally uses exchange-traded futures and exchange-traded and OTC options contracts to manage its net position of merchandisable agricultural commodity inventories and forward cash purchase and sales contracts to reduce price risk caused by market fluctuations in agricultural commodities and foreign currencies. The Company also uses exchange-traded futures and exchange-traded and OTC options contracts as components of merchandising strategies designed to enhance margins. The results of these strategies can be significantly impacted by factors such as the correlation between the value of exchange-traded commodities futures contracts and the value of the underlying commodities, counterparty contract defaults, and volatility of freight markets. Exchange-traded futures and exchange-traded and OTC options contracts, and forward cash purchase and sales contracts of certain merchandisable agricultural commodities accounted for as derivatives by the Company are stated at fair value. Inventories of certain merchandisable agricultural commodities, which include amounts acquired under deferred pricing contracts, are stated at market value. Inventory is not a derivative and therefore is not included in the tables below. Changes in the market value of inventories of certain merchandisable agricultural commodities, forward cash purchase and sales contracts, exchange-traded futures and exchange-traded and OTC options contracts are recognized in earnings immediately. Unrealized gains and unrealized losses on forward cash purchase contracts, forward foreign currency exchange (FX) contracts, forward cash sales contracts, and exchange-traded and OTC options contracts represent the fair value of such instruments and are classified on the Company's consolidated balance sheets as other current assets and accrued expenses and other payables, respectively.

At March 31, 2010, the Company de-designated and discontinued hedge accounting treatment for certain interest rate swaps. At the date of de-designation of these hedges, \$21 million of after-tax gains was deferred in accumulated other comprehensive income (AOCI). In March 2011, these interest rate swaps were terminated upon the remarketing of the associated long-term debt. After discontinuing the hedge accounting, the Company recognized in earnings \$30 million of pre-tax gains and \$59 million in pre-tax losses from changes in fair value of these interest rate swaps for the years ended June 30, 2011 and 2010, respectively. The \$21 million of gains deferred in AOCI are being amortized over 30 years, the same period as the term of the related debt.

Prior to December 2012, the Company held an economic interest of 19.9% in GrainCorp Limited ("GrainCorp") shares through two transactions with investment bank counterparties. The purpose of these transactions was to facilitate the Company's planned acquisition of GrainCorp. One of the transactions is accounted for as an unfunded derivative instrument. The other transaction is a hybrid financial instrument, as defined by applicable accounting standards, whereby the accounting rules required the Company to account for a funded host instrument and a separate embedded derivative instrument. In December 2012, the Company settled the derivative instruments known as "Total Return

Swaps”, and recognized pre-tax gains reported as “Other Contracts” in the tables below. After the settlement, the 19.9% interest in GrainCorp is recorded as a long-term marketable security.

Archer-Daniels-Midland Company

Commodity Contracts	2,504	2,376	2,843	2,704	2,766	2,553
Other Contracts	-	-	1	-	-	-
Total	\$2,675	\$2,591	\$3,063	\$2,995	\$3,006	\$2,731

The following table sets forth the pre-tax gains (losses) on derivatives not designated as hedging instruments that have been included in the consolidated statements of earnings for the six months ended December 31, 2012 and 2011 and the years ended June 30, 2012, 2011, and 2010.

(In millions)	Six Months Ended December 31		Year Ended June 30		
	2012	2011 (Unaudited)	2012	2011	2010
Interest Contracts					
Interest expense	\$0	\$0	\$0	\$0	\$0
Other income (expense) - net	-	-	-	30	(57)
FX Contracts					
Net sales and other operating income	\$129	\$33	\$117	\$(14)	\$0
Cost of products sold	(49)	(116)	(255)	150	61
Other income (expense) - net	94	(69)	(21)	43	(42)
Commodity Contracts					
Cost of products sold	\$136	\$(4)	\$(527)	\$(1,303)	\$242
Other Contracts					
Other income (expense) - net	\$58	\$-	(1)	0	0
Total gain(loss) recognized in earnings	\$368	\$(156)	\$(687)	\$(1,094)	\$204

Inventories of certain merchandisable agricultural commodities, which include amounts acquired under deferred pricing contracts, are stated at market value. Inventory is not a derivative and therefore is not included in the table

above. Changes in the market value of inventories of certain merchandisable agricultural commodities, forward cash purchase and sales contracts, exchange-traded futures and exchange-traded and OTC options contracts are recognized in earnings immediately.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 4. Inventories, Derivative Instruments & Hedging Activities (Continued)

Derivatives Designated as Cash Flow Hedging Strategies

For derivative instruments that are designated and qualify as cash flow hedges (i.e., hedging the exposure to variability in expected future cash flows that is attributable to a particular risk), the effective portion of the gain or loss on the derivative instrument is reported as a component of AOCI and reclassified into earnings in the same line item affected by the hedged transaction and in the same period or periods during which the hedged transaction affects earnings. The remaining gain or loss on the derivative instrument that is in excess of the cumulative change in the cash flows of the hedged item, if any (i.e., the ineffective portion), hedge components excluded from the assessment of effectiveness, and gains and losses related to discontinued hedges are recognized in the consolidated statement of earnings during the current period.

For each of the commodity hedge programs described below, the derivatives are designated as cash flow hedges. The changes in the market value of such derivative contracts have historically been, and are expected to continue to be, highly effective at offsetting changes in price movements of the hedged item. Once the hedged item is recognized in earnings, the gains/losses arising from the hedge are reclassified from AOCI to either net sales and other operating income, cost of products sold, interest expense or other (income) expense – net, as applicable. As of December 31, 2012, the Company has \$16 million of after-tax losses in AOCI related to gains and losses from commodity cash flow hedge transactions. The Company expects to recognize the \$16 million of losses in its consolidated statement of earnings during the next 12 months.

The Company, from time to time, uses futures or options contracts to fix the purchase price of anticipated volumes of corn to be purchased and processed in a future month. The objective of this hedging program is to reduce the variability of cash flows associated with the Company's forecasted purchases of corn. The Company's corn processing plants currently grind approximately 76 million bushels of corn per month. During the past 6 months, the Company hedged between 19% and 26% of its monthly anticipated grind. At December 31, 2012, the Company has designated hedges representing between 1% to 18% of its anticipated monthly grind of corn for the next 14 months.

The Company, from time to time, also uses futures, options, and swaps to fix the purchase price of the Company's anticipated natural gas requirements for certain production facilities. The objective of this hedging program is to reduce the variability of cash flows associated with the Company's forecasted purchases of natural gas. These production facilities use approximately 3.8 million MMBtus of natural gas per month. During the past 6 months, the Company hedged between 11% and 19% of the quantity of its anticipated monthly natural gas purchases. At December 31, 2012, the Company has designated hedges representing between 13% to 66% of its anticipated monthly natural gas purchases for the next 12 months.

The Company, from time to time, also uses futures, options, and swaps to fix the sales price of certain ethanol sales contracts. The objective of this hedging program is to reduce the variability of cash flows associated with the Company's sales of ethanol under sales contracts that are indexed to unleaded gasoline prices. During the past 6 months, the Company hedged between 9 million and 15 million gallons of ethanol per month under this program. At December 31, 2012, the Company has designated hedges representing between 1 million to 6 million gallons of contracted ethanol sales per month over the next 6 months.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 4. Inventories, Derivative Instruments & Hedging Activities (Continued)

To protect against fluctuations in cash flows due to foreign currency exchange rates, the Company from time to time will use forward foreign exchange contracts as cash flow hedges. Certain production facilities have manufacturing expenses and equipment purchases denominated in non-functional currencies. To reduce the risk of fluctuations in cash flows due to changes in the exchange rate between functional versus non-functional currencies, the Company will hedge some portion of the forecasted foreign currency expenditures. During the past 6 months, the Company hedged between \$19 million and \$25 million of forecasted foreign currency expenditures. As of December 31, 2012, the Company has designated hedges of \$19 million of its forecasted foreign currency expenditures. At December 31, 2012, the Company has \$1 million of after-tax losses in AOCI related to foreign exchange contracts designated as cash flow hedging instruments. The Company will recognize the \$1 million of losses in its consolidated statement of earnings over the life of the hedged transactions.

The Company, from time to time, uses treasury lock agreements and interest rate swaps in order to lock in the Company's interest rate prior to the issuance or remarketing of its long-term debt. Both the treasury-lock agreements and interest rate swaps were designated as cash flow hedges of the risk of changes in the future interest payments attributable to changes in the benchmark interest rate. The objective of the treasury-lock agreements and interest rate swaps was to protect the Company from changes in the benchmark rate from the date of hedge designation to the date when the debt was actually issued. At December 31, 2012, AOCI included \$21 million of after-tax gains related to treasury-lock agreements and interest rate swaps, of which, \$19 million relates to the interest rate swaps that were de-designated at March 31, 2010 as discussed earlier in Note 4. The Company will recognize \$1 million of these after-tax gains in its consolidated statement of earnings during the next twelve months.

The following tables set forth the fair value of derivatives designated as hedging instruments as of December 31, 2012 and June 30, 2012 and 2011.

All of the \$5 million in unrealized losses at December 31, 2012, arose within the last 12 months and are related to the Company's investment in one security. The market value of the available-for-sale equity security that has been in an unrealized loss position for less than 12 months is \$17 million. The Company evaluated the near-term prospects of the issuer in relation to the severity and duration of the impairment. Based on that evaluation and the Company's ability and intent to hold this investment for a reasonable period of time sufficient for a forecasted recovery of fair value, the Company does not consider this investment to be other-than-temporarily impaired at December 31, 2012.

For information on other-than-temporary impairment charges, see Notes 13 and 18.

Note 8. Investments in and Advances to Affiliates

The Company applies the equity method for investments in investees over which the Company has the ability to exercise significant influence, including the Company's 16.4% share ownership in Wilmar. The Company had 60, 69, and 68 unconsolidated domestic and foreign affiliates as of December 31, 2012 and June 30, 2012 and 2011, respectively. The following table summarizes the combined balance sheets as of December 31, 2012 and June 30, 2012 and 2011, and the combined statements of earnings of the Company's unconsolidated affiliates for the six months ended December 31, 2012 and 2011 and for each of the three years ended June 30, 2012, 2011, and 2010.

(In millions)	December 31 2012	June 30 2012	June 30 2011
Current assets	\$ 26,569	\$ 28,196	\$ 26,222
Non-current assets	19,429	20,821	17,733
Current liabilities	(22,602)	(23,381)	(20,748)
Non-current liabilities	(5,553)	(6,379)	(5,160)
Noncontrolling interests	(850)	(1,176)	(1,072)
Net assets	\$ 16,993	\$ 18,081	\$ 16,975

(In millions)	Six Months Ended December 31			Year Ended June 30	
	2012	2011 (Unaudited)	2012	2011	2010
Net Sales	\$ 28,314	\$ 29,767	\$ 58,068	\$ 48,941	\$ 39,524
Gross profit	2,847	3,291	6,458	4,819	5,225
Net income	\$ 855	1,022	1,940	2,252	2,931

The Company's share of the undistributed earnings of its unconsolidated affiliates as of December 31, 2012, is \$1.7 billion. The Company has a direct investment in a foreign equity method investee who has a carrying value of \$1.9 billion as of December 31, 2012, and a market value of \$2.9 billion based on active market quoted prices converted to U.S. dollars at applicable exchange rates at December 31, 2012.

The Company provides credit facilities totaling \$337 million to seven unconsolidated affiliates. One facility that is due on demand and bears interest at the one month British pound LIBOR rate plus 1.5% has an outstanding balance of \$47 million. Two facilities that are also due on demand and bear interest at 2.78% have a combined outstanding balance of \$32 million. The other four facilities have no outstanding balances as of December 31, 2012. The outstanding balances are included in other current assets in the accompanying consolidated balance sheet.

For information on the Company's former equity method interest in Gruma, see Note 19.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 9. Goodwill

Goodwill balances attributable to consolidated businesses and investments in affiliates, by segment, are set forth in the following table.

	December 31, 2012			June 30, 2012			June 30, 2011		
	Consolidated	Investments		Consolidated	Investments		Consolidated	Investments	
	Businesses	in	Total	Businesses	in	Total	Businesses	in	Total
		(In millions)			(In millions)			(In millions)	
Oilseeds									
Processing	\$177	\$ 184	\$361	\$167	\$ 184	\$351	\$160	\$ 184	\$344
Corn									
Processing	85	7	92	85	7	92	85	7	92
Agricultural									
Services	89	1	90	85	67	152	91	67	158
Other	8	-	8	8	-	8	8	-	8
Total	\$359	\$ 192	\$551	\$345	\$ 258	\$603	\$344	\$ 258	\$602

The decrease in goodwill during the transition period ended December 31, 2012 is primarily related to the disposal of the Company's investment in Gruma.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 10. Debt Financing Arrangements (Continued)

In October 2012, the Company issued \$570 million of 4.016% debentures due in 2043 (the 2012 Debentures) in exchange for \$568 million of its previously issued and outstanding 5.765%, 5.935%, 6.45%, 6.625%, 6.75%, 6.95%, 7% and 7.5% debentures. The Company paid \$196 million of debt premium to certain bondholders associated with these exchanges. The discount on the 2012 Debentures and debt premium paid to the bondholders is being amortized over the life of the 2012 Debentures using the effective interest method.

On September 26, 2011, the Company issued \$528 million of 4.535% senior debentures due in 2042 (the 2011 Debentures) in exchange for \$404 million of its previously issued and outstanding 6.45%, 6.625%, 6.75%, 6.95%, 7% and 7.5% debentures. The Company paid \$32 million of debt premium to certain bondholders associated with these exchanges. The discount on the 2011 Debentures is being amortized over the life of the 2011 Debentures using the effective interest method.

In June 2008, the Company issued \$1.75 billion of Equity Units, which were a combination of debt and a forward contract for the holder to purchase the Company's common stock. The debt and equity instruments were deemed to be separate instruments as the investor may transfer or settle the equity instrument separately from the debt instrument. On March 30, 2011, the Company initiated a remarketing of the \$1.75 billion 4.7% debentures underlying the Equity Units into two tranches: \$0.75 billion principal amount of 4.479% notes due in 2021 and \$1.0 billion principal amount of 5.765% debentures due in 2041. As a result of the remarketing, the Company was required to use the "if-converted" method of calculating diluted earnings per share with respect to the forward contracts for the quarter ended March 31, 2011 (see Note 11). The Company incurred early extinguishment of debt charges of \$8 million as a result of the debt remarketing. The forward purchase contracts underlying the Equity Units were settled on June 1, 2011, for 44 million shares of the Company's common stock in exchange for receipt of \$1.75 billion in cash.

On February 11, 2011, the Company issued \$1.5 billion in aggregate principal amount of floating rate notes due on August 13, 2012. Interest on the notes accrued at a floating rate of three-month LIBOR reset quarterly plus 0.16% and was paid quarterly. In August 2012, the Company paid the remaining outstanding balance of these notes with funds available from short-term borrowings.

In February 2007, the Company issued \$1.15 billion principal amount of convertible senior notes due in 2014 (the Notes) in a private placement. The Notes were issued at par and bear interest at a rate of 0.875% per year, payable semiannually. The Notes are convertible based on an initial conversion rate of 22.8423 shares per \$1,000 principal amount of Notes (which is equal to a conversion price of approximately \$43.78 per share). The Notes may be converted, subject to adjustment, only under the following circumstances: 1) during any calendar quarter beginning after March 31, 2007, if the closing price of the Company's common stock for at least 20 trading days in the 30 consecutive trading days ending on the last trading day of the immediately preceding quarter is more than 140% of the applicable conversion price per share, which is \$1,000 divided by the then applicable conversion rate, 2) during the five consecutive business day period immediately after any five consecutive trading day period (the note measurement period) in which the average of the trading price per \$1,000 principal amount of Notes was equal to or less than 98% of the average of the product of the closing price of the Company's common stock and the conversion rate at each date during the note measurement period, 3) if the Company makes specified distributions to its common stockholders or specified corporate transactions occur, or 4) at any time on or after January 15, 2014, through the business day preceding the maturity date. Upon conversion, a holder would receive an amount in cash equal to the lesser of 1) \$1,000 and 2) the conversion value, as defined. If the conversion value exceeds \$1,000, the Company will deliver, at the Company's election, cash or common stock or a combination of cash and common stock for the conversion value

in excess of \$1,000. If the Notes are converted in connection with a change in control, as defined, the Company may be required to provide a make-whole premium in the form of an increase in the conversion rate, subject to a stated maximum amount. In addition, in the event of a change in control, the holders may require the Company to purchase all or a portion of their Notes at a purchase price equal to 100% of the principal amount of the Notes, plus accrued and unpaid interest, if any. In accordance with applicable accounting standards, the Company recognized the Notes proceeds received in 2007 as long-term debt of \$853 million and equity of \$297 million. The discount on the long-term debt is being amortized over the life of the Notes using the effective interest method. Discount amortization expense of \$24 million, \$22 million, \$45 million, \$43 million, and \$40 million for the six months ended December 31, 2012 and 2011 and the years ended June 30, 2012, 2011, and 2010, respectively, were included in interest expense related to the Notes.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 10. Debt Financing Arrangements (Continued)

Concurrent with the issuance of the Notes, the Company purchased call options in private transactions at a cost of \$300 million. The purchased call options allow the Company to receive shares of its common stock and/or cash from the counterparties equal to the amounts of common stock and/or cash related to the excess of the current market price of the Company's common stock over the exercise price of the purchased call options. In addition, the Company sold warrants in private transactions to acquire, subject to customary anti-dilution adjustments, 26.3 million shares of its common stock at an exercise price of \$62.56 per share and received proceeds of \$170 million. If the average price of the Company's common stock during a defined period ending on or about the respective settlement dates exceeds the exercise price of the warrants, the warrants will be settled, at the Company's option, in cash or shares of common stock. The purchased call options and warrants are intended to reduce the potential dilution upon future conversions of the Notes by effectively increasing the initial conversion price to \$62.56 per share. The net cost of the purchased call options and warrant transactions of \$130 million was recorded as a reduction of shareholders' equity. The purchased call options expire on the maturity date of the Notes and the warrants expire shortly thereafter.

As of December 31, 2012, none of the conditions permitting conversion of the Notes had been satisfied. In addition, as of December 31, 2012, the market price of the Company's common stock was not greater than the exercise price of the purchased call options or warrants. As of December 31, 2012, no share amounts related to the conversion of the Notes or exercise of the warrants are included in diluted average shares outstanding.

At December 31, 2012, the fair value of the Company's long-term debt exceeded the carrying value by \$1.4 billion, as estimated using quoted market prices (a Level 2 measurement under applicable accounting standards).

The aggregate maturities of long-term debt for the five years after December 31, 2012, are \$268 million, \$1.1 billion, \$19 million, \$13 million, and \$303 million, respectively.

At December 31, 2012, the Company had lines of credit totaling \$8.5 billion, of which \$5.7 billion were unused. The weighted average interest rates on short-term borrowings outstanding at December 31, 2012 and June 30, 2012 and 2011, were 0.70%, 0.78%, and 0.65%, respectively. Of the Company's total lines of credit, \$6.0 billion support a commercial paper borrowing facility, against which there was \$2.0 billion of commercial paper outstanding at December 31, 2012.

The Company's credit facilities and certain debentures require the Company to comply with specified financial and non-financial covenants including maintenance of minimum tangible net worth as well as limitations related to incurring liens, secured debt, and certain other financing arrangements. The Company is in compliance with these covenants as of December 31, 2012.

The Company has outstanding standby letters of credit and surety bonds at December 31, 2012 and June 30, 2012 and 2011, totaling \$911 million, \$644 million, and \$729 million, respectively.

On March 27, 2012, the Company entered into an amendment of its accounts receivable securitization program (the "Program"). The Program provides the Company with up to \$1.0 billion in funding resulting from the sale of accounts receivable. As of December 31, 2012, the Company utilized all of its \$1.0 billion facility under the Program (see Note 20 for more information on the Program).

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 11. Earnings Per Share

The computation of basic and diluted earnings per share is as follows:

(In millions, except per share amounts)	Six Months Ended December 31		2012	Year Ended June 30	
	2012	2011 (Unaudited)		2011	2010
Net earnings attributable to controlling interests	\$692	\$540	\$1,223	\$2,036	\$1,930
Average shares outstanding	660	669	665	642	643
Basic earnings per share	\$1.05	\$0.81	\$1.84	\$3.17	\$3.00
Net earnings attributable to controlling interests	\$692	\$540	\$1,223	\$2,036	\$1,930
Plus: After-tax interest on 4.7% debentures related to \$1.75 billion Equity Units	-	-	-	13	-
Adjusted net earnings attributable to controlling interests	\$692	\$540	\$1,223	\$2,049	\$1,930
Average shares outstanding	660	669	665	642	643
Plus: Incremental shares					
Share-based compensation awards	1	1	1	1	1
Shares assumed issued related to \$1.75 billion Units	-	-	-	11	-
Adjusted average shares outstanding	661	670	666	654	644
Diluted earnings per share	\$1.05	\$0.81	\$1.84	\$3.13	\$3.00

Average shares outstanding for 2011 include 44 million shares beginning June 1, 2011 related to equity unit conversion.

Adjusted net earnings attributable to controlling interests in 2011 include a \$13 million adjustment for after-tax interest. Adjusted average shares outstanding for 2011 include 44 million shares assumed issued on January 1, 2011 for the quarter ended March 31, 2011, or 11 million shares for the year ended June 30, 2011. These adjustments relate to the \$1.75 billion Equity Units and were made as a result of the requirement to use the "if-converted" method of calculating diluted earnings per share for the quarter ended March 31, 2011.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 12. Shareholder's Equity

The Company has authorized one billion shares of common stock and 500,000 shares of preferred stock, each with zero par value. No preferred stock has been issued. At December 31, 2012 and June 30, 2012 and 2011, the Company had approximately 57.5 million, 57.5 million, and 40.3 million shares, respectively, in treasury. Treasury stock of \$1.6 billion at December 31, 2012, \$1.6 billion at June 30, 2012, and \$1.1 billion at June 30, 2011, is recorded at cost as a reduction of common stock.

The Company's employee stock compensation plans provide for the granting of options to employees to purchase common stock of the Company pursuant to the Company's 2002 and 2009 Incentive Compensation Plans. These options are issued at market value on the date of grant, vest incrementally over five to nine years, and expire ten years after the date of grant.

The fair value of each option grant is estimated as of the date of grant using the Black-Scholes single option pricing model. The volatility assumption used in the Black-Scholes single option pricing model is based on the historical volatility of the Company's stock. The volatility of the Company's stock was calculated based upon the monthly closing price of the Company's stock for the period immediately prior to the date of grant corresponding to the average expected life of the grant. The average expected life represents the period of time that option grants are expected to be outstanding. The risk-free rate is based on the rate of U.S. Treasury zero-coupon issues with a remaining term equal to the expected life of option grants. The assumptions used in the Black-Scholes single option pricing model are as follows.

	Six Months Ended December 31 2012	2012	Year Ended June 30 2011	2010
Dividend yield	3%	2%	2%	2%
Risk-free interest rate	1%	2%	2%	2%
Stock volatility	30%	32%	31%	32%
Average expected life (years)	7	8	8	8

A summary of option activity during the transition period ended December 31, 2012 and the year ended June 30, 2012 is presented below:

	Shares (In thousands, except per share amounts)	Weighted-Average Exercise Price
Shares option at June 30, 2011	11,723	\$ 28.35
Granted	2,436	26.18
Exercised	(429)	19.61
Forfeited or expired	(238)	28.38
Shares under option at June 30, 2012	13,492	\$ 28.24
Granted	2,637	26.25
Exercised	(116)	18.18

Edgar Filing: ARCHER DANIELS MIDLAND CO - Form 10-KT

Forfeited or expired	(160)		27.40
Shares under option at December 31, 2012	15,853	\$	27.99
Exercisable at December 31, 2012	9,175	\$	28.65

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 12. Shareholder's Equity (Continued)

The weighted-average remaining contractual term of options outstanding and exercisable at December 31, 2012, is 6 years and 5 years, respectively. The aggregate intrinsic value of options outstanding and exercisable at December 31, 2012, is \$25 million and \$20 million, respectively. The weighted-average grant-date fair values of options granted during the six months ended December 31, 2012 and the years ended June 30, 2012, 2011, and 2010, were \$5.89, \$6.98, \$8.82, and \$8.50, respectively. The total intrinsic values of options exercised during the six months ended December 31, 2012 and the years ended June 30, 2012, 2011, and 2010, were \$1 million, \$5 million, \$21 million, and \$11 million, respectively. Cash proceeds received from options exercised during the six months ended December 31, 2012 and the years ended June 30, 2012, 2011, and 2010, were \$2 million, \$7 million, \$21 million, and \$11 million, respectively.

At December 31, 2012, there was \$21 million of total unrecognized compensation expense related to option grants. Amounts to be recognized as compensation expense during the next five years are \$8 million, \$6 million, \$4 million, \$2 million, and \$1 million, respectively.

The Company's 2002 and 2009 Incentive Compensation Plans provide for the granting of restricted stock and restricted stock units (Restricted Stock Awards) at no cost to certain officers and key employees. In addition, the Company's 2002 and 2009 Incentive Compensation Plans also provide for the granting of performance stock units (PSUs) at no cost to certain officers and key employees. Restricted Stock Awards are made in common stock or stock units with equivalent rights and vest at the end of a three-year restriction period. The awards for PSUs are made in common stock and vest at the end of a three-year vesting period subject to the attainment of certain future performance criteria. During the six months ended December 31, 2012 and the years ended June 30, 2012, 2011, and 2010, 1.3 million, 1.2 million, 1.1 million, and 1.0 million common stock or stock units, respectively, were granted as Restricted Stock Awards and PSUs. At December 31, 2012, there were 20.8 million shares available for future grants pursuant to the 2009 plan.

The fair value of Restricted Stock Awards is determined based on the market value of the Company's shares on the grant date. The fair value of PSUs is estimated at the date of grant using a lattice valuation model. The weighted-average grant-date fair values of awards granted during the six months ended December 31, 2012 and the years ended June 30, 2012, 2011, and 2010 were \$26.34, \$26.75, \$32.19, and, \$26.55, respectively.

A summary of Restricted Stock Awards and PSUs activity during the six months ended December 31, 2012 and year ended June 30, 2012 is presented below:

	Restricted Stock Awards and PSUs	Weighted Average Grant-Date Fair Value
	(In thousands, except per share amounts)	
Non-vested at June 30, 2011	3,115	\$ 28.39
Granted	1,249	26.75

Non-vested at December 31, 2012	3,635		\$ 28.17

At December 31, 2012, there was \$37 million of total unrecognized compensation expense related to Restricted Stock Awards and PSUs. Amounts to be recognized as compensation expense during the next three years are \$20 million, \$12 million, and \$5 million, respectively. At the vesting date, the total fair value of Restricted Stock Awards vested during the six months ended December 31, 2012 was \$17 million.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 12. Shareholder's Equity (Continued)

Compensation expense for option grants, Restricted Stock Awards and PSUs granted to employees is generally recognized on a straight-line basis during the service period of the respective grant. Certain of the Company's option grants, Restricted Stock Awards and PSUs continue to vest upon the recipient's retirement from the Company and compensation expense related to option grants and Restricted Stock Awards granted to retirement-eligible employees is recognized in earnings on the date of grant. Compensation expense for PSUs is based on the probability of meeting the performance criteria.

Total compensation expense for option grants, Restricted Stock Awards and PSUs recognized during the six months ended December 31, 2012 and 2011 and the years ended June 30, 2012, 2011, and 2010 was \$31 million, \$34 million, \$48 million, \$47 million, and \$45 million, respectively.

Note 13. Other (Income) Expense – Net

The following table sets forth the items in other (income) expense:

(In millions)	Six Months Ended December 31			Year Ended June 30	
	2012	2011	2012	2011	2010
		(Unaudited)			
Gain on Golden Peanut revaluation	\$-	\$-	\$-	\$(71)) \$-
Gain on interest in GrainCorp	(62)) -	-	-	-
Gain on sale of assets	(51)) (17) (30) (31) (21
Charges from early extinguishment of debt	5	12	12	15	75
(Gains) losses on interest rate swaps	-	-	-	(30)) 59
Net (gain) loss on marketable securities transactions	(6) (16) (25) (12) 6
Other – net	5	9	26	(1)) 6
	\$(109)) \$(12) \$(17) \$(130) \$125

The Company realized a \$62 million gain related to the settlement of the Total Return Swap instruments related to its investment in GrainCorp (see Note 4 for more information).

The gain on sale of assets for the six months ended December 31, 2012 includes a \$39 million gain related to the sale of certain of the Company's exchange membership interests.

The \$71 million gain on Golden Peanut revaluation was recognized as a result of revaluing the Company's previously held investment in Golden Peanut in conjunction with the acquisition of the remaining 50 percent interest ("Golden Peanut Gain").

Realized gains on sales of available-for-sale marketable securities totaled \$8 million, \$17 million, \$38 million, \$13 million, and \$12 million for the six months ended December 31, 2012 and 2011 and the years ended June 30, 2012,

2011, and 2010, respectively. Realized losses on sales of available-for-sale marketable securities were \$2 million, \$1 million, \$1 million, \$1 million, and \$3 million for the six months ended December 31, 2012 and 2011 and the years ended June 30, 2012, 2011, and 2010, respectively. Impairment losses on securities were \$12 million and \$15 million for the years ended June 30, 2012 and 2010, respectively. Additional impairment losses on securities of \$13 million for the six months ended December 31, 2011 and year ended June 30, 2012, were classified as asset impairment, exit, and restructuring charges in the consolidated statements of earnings.

Note 14. Income Taxes (Continued)

Reconciliation of the statutory federal income tax rate to the Company's effective income tax rate on earnings is as follows:

	Six Months Ended December 31				Year Ended June 30			
	2012	2011	2012	2011	2012	2011	2010	
	(Unaudited)							
Statutory rate	35.0	%	35.0	%	35.0	%	35.0	%
State income taxes, net of federal tax benefit	2.4		2.4		1.4		1.1	
Foreign earnings taxed at rates other than the U.S. statutory rate	(7.6)	(7.2)	(4.8)	(5.0)
Foreign currency remeasurement	2.6		(0.3)	(3.3)	0.9	
Income tax adjustment to filed returns	(1.5)	(0.7)	0.9		(0.2)
Other	(0.5)	1.1		0.4		1.3	
Effective income tax rate	30.4	%	30.3	%	29.6	%	33.1	%

The Company has \$344 million, \$241 million, and \$220 million of tax assets related to net operating loss carry-forwards of certain international subsidiaries at December 31, 2012, June 30, 2012, and 2011, respectively. As of December 31, 2012, approximately \$321 million of these assets have no expiration date, and the remaining \$23 million expire at various times through fiscal 2030. The annual usage of certain of these assets is limited to a percentage of taxable income of the respective foreign subsidiary for the year. The Company has recorded a valuation allowance of \$102 million, \$96 million, and \$52 million against these tax assets at December 31, 2012, June 30, 2012, and 2011, respectively, due to the uncertainty of their realization.

The Company has \$25 million of tax assets related to foreign and domestic capital loss carryforwards at December 31, 2012. The Company has recorded a valuation allowance of \$15 million against these tax assets at December 31, 2012.

The Company has \$32 million, \$31 million, and \$46 million of tax assets related to excess foreign tax credits at December 31, 2012, June 30, 2012, and 2011, respectively, which begin to expire in 2013. The Company has \$79 million, \$67 million, and \$57 million of tax assets related to state income tax attributes (incentive credits and net operating loss carryforwards), net of federal tax benefit, at December 31, 2012, June 30, 2012, and 2011, respectively, which will expire at various times through fiscal 2032. The Company has not recorded a valuation allowance against the excess foreign tax credits at December 31, 2012. The Company has recorded a valuation allowance against the state income tax assets of \$56 million, net of federal tax benefit as of December 31, 2012. Due to the uncertainty of realization, the Company had \$4 million and \$7 million of valuation allowance recorded related to the excess foreign tax credits as of June 30, 2012 and 2011, respectively, and \$45 million and \$36 million of valuation allowance related to state income tax assets net of federal tax benefit as of June 30, 2012 and 2011, respectively.

The Company remains subject to federal examination in the U.S. for the calendar tax year 2012.

Undistributed earnings of the Company's foreign subsidiaries and the Company's share of the undistributed earnings of affiliated corporate joint venture companies accounted for on the equity method amounting to approximately \$7.7 billion at December 31, 2012, are considered to be permanently reinvested, and accordingly, no provision for U.S. income taxes has been provided thereon. It is not practicable to determine the deferred tax liability for temporary differences related to these undistributed earnings.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 14. Income Taxes (Continued)

The Company accounts for its income tax positions under the provisions of ASC Topic 740, Income Taxes (ASC 740). ASC 740 prescribes a minimum threshold a tax position is required to meet before being recognized in the consolidated financial statements. This interpretation requires the Company to recognize in the consolidated financial statements tax positions determined more likely than not to be sustained upon examination, based on the technical merits of the position. A rollforward of activity of unrecognized tax benefits for the six months ended December 31, 2012 and the years ended June 30, 2012 and 2011 are as follows:

	December 31, 2012	Unrecognized Tax Benefits June 30, 2012 (In millions)	June 30, 2011
Beginning balance	\$ 80	\$ 79	\$ 84
Additions related to current year's tax positions	-	-	4
Additions related to prior years' tax positions	6	26	-
Reductions related to prior years' tax positions	(1)	(21)	(7)
Reductions related to lapse of statute of limitations	(1)	-	-
Settlements with tax authorities	(7)	(4)	(2)
Ending balance	\$ 77	\$ 80	\$ 79

The additions and reductions in unrecognized tax benefits shown in the table include effects related to net income and shareholders' equity. The changes in unrecognized tax benefits did not have a material effect on the Company's net income or cash flow.

The Company classifies interest on income tax-related balances as interest expense and classifies tax-related penalties as selling, general and administrative expenses. At December 31, 2012, June 30, 2012, and 2011, the Company had accrued interest and penalties on unrecognized tax benefits of \$17 million, \$16 million, and \$27 million, respectively.

The Company is subject to income taxation in many jurisdictions around the world. Resolution of the related tax positions, through negotiations with relevant tax authorities or through litigation, may take years to complete. Therefore, it is difficult to predict the timing for resolution of tax positions. However, the Company does not anticipate that the total amount of unrecognized tax benefits will increase or decrease significantly in the next twelve months. Given the long periods of time involved in resolving tax positions, the Company does not expect that the recognition of unrecognized tax benefits will have a material impact on the Company's effective income tax rate in any given period. If the total amount of unrecognized tax benefits were recognized by the Company at one time, there would be a reduction of \$56 million on the tax expense for that period.

The Company's wholly-owned subsidiary, ADM do Brasil Ltda. (ADM do Brasil), received three separate tax assessments from the Brazilian Federal Revenue Service (BFRS) challenging the tax deductibility of commodity hedging losses and related expenses for the tax years 2004, 2006 and 2007 in the amounts of \$474 million, \$20

million, and \$83 million, respectively (inclusive of interest and adjusted for variation in currency exchange rates). ADM do Brasil's tax return for 2005 was also audited and no assessment was received. The statute of limitations for 2005 has expired. If the BFRS were to challenge commodity hedging deductions in tax years after 2007, the Company estimates it could receive additional claims of approximately \$102 million (as of December 31, 2012 and subject to variation in currency exchange rates).

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 14. Income Taxes (Continued)

ADM do Brasil enters into commodity hedging transactions that can result in gains, which are included in ADM do Brasil's calculations of taxable income in Brazil, and losses, which ADM do Brasil deducts from its taxable income in Brazil. The Company has evaluated its tax position regarding these hedging transactions and concluded, based upon advice from Brazilian legal counsel, that it was appropriate to recognize both gains and losses resulting from hedging transactions when determining its Brazilian income tax expense. Therefore, the Company has continued to recognize the tax benefit from hedging losses in its financial statements and has not recorded any tax liability for the amounts assessed by the BFRS.

ADM do Brasil filed an administrative appeal for each of the assessments. During the second quarter of fiscal 2011, a decision in favor of the BFRS on the 2004 assessment was received and a second level administrative appeal has been filed. In January of 2012, a decision in favor of the BFRS on the 2006 and 2007 assessments was received and a second level administrative appeal has been filed. If ADM do Brasil continues to be unsuccessful in the administrative appellate process, further appeals are available in the Brazilian federal courts. While the Company believes its consolidated financial statements properly reflect the tax deductibility of these hedging losses, the ultimate resolution of this matter could result in the future recognition of additional payments of, and expense for, income tax and the associated interest and penalties. The Company intends to vigorously defend its position against the current assessments and any similar assessments that may be issued for years subsequent to 2007.

The Company's subsidiaries in Argentina have received tax assessments challenging transfer prices used to price grain exports totaling \$63 million (inclusive of interest and adjusted for variation in currency exchange rates) for the tax years 2004, 2005, and 2006. The Argentine tax authorities have been conducting a review of income and other taxes paid by large exporters and processors of cereals and other agricultural commodities resulting in allegations of income tax evasion. While the Company believes that it has complied with all Argentine tax laws, it cannot rule out receiving additional assessments, which could be material to the Company, challenging transfer prices used to price grain exports for years subsequent to 2006. The Company intends to vigorously defend its position against the current assessments and any similar assessments that may be issued for years subsequent to 2006. The Company believes that it has appropriately evaluated the transactions underlying these assessments, and has concluded, based on Argentine tax law, that its tax position would be sustained, and accordingly, the Company has not recorded a tax liability for these assessments.

In accordance with the accounting requirements for uncertain tax positions, the Company has concluded that it is more likely than not to prevail on the Brazil and Argentina matters based upon their technical merits. The Company has not recorded an uncertain tax liability for these assessments partly because the taxing jurisdictions' processes do not provide a mechanism for settling at less than the full amount of the assessment. The Company's consideration of these tax assessments requires judgments about the application of income tax regulations to specific facts and circumstances. The final outcome of these matters cannot reliably be predicted, may take many years to resolve, and could result in the payment and expense of up to the entire amount of these assessments.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 15. Leases

The Company leases manufacturing and warehouse facilities, real estate, transportation assets, and other equipment under non-cancelable operating leases, the majority of which expire at various dates through the year 2031. Rent expense for the six months ended December 31, 2012 and 2011 and the years ended June 30, 2012, 2011, and 2010 was \$106 million, \$103 million, \$209 million, \$251 million, and \$241 million, respectively. Additional amounts incurred for charges pertaining to time charters of ocean going vessels accounted for as leases for the six months ended December 31, 2012 and 2011 and the years ended June 30, 2012, 2011, and 2010 were \$62 million, \$76 million, \$164 million, \$176 million, and \$118 million, respectively. Future minimum rental payments for non-cancelable operating leases with initial or remaining terms in excess of one year are as follows:

		Minimum Rental Payments (In millions)
2013	\$	235
2014		184
2015		156
2016		137
2017		101
Thereafter		199
Total minimum lease payments	\$	1,012

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 16. Employee Benefit Plans

The Company provides substantially all U.S. employees and employees at certain foreign subsidiaries with pension benefits. Eligible U.S. employees with five or more years of service prior to January 1, 2009 participate in a defined benefit pension plan. Eligible U.S. employees hired on or after January 1, 2009 and eligible salaried employees with less than five years of service prior to January 1, 2009 participate in a “cash balance” pension formula. The Company provides eligible U.S. employees who retire under qualifying conditions with access to postretirement health care, at full cost to the retiree (certain employees are “grandfathered” into subsidized coverage).

On September 20, 2012, the Company amended its U.S. qualified pension plans and began notifying certain former employees of its offer to pay those employees’ pension benefit in a lump sum. This lump sum payment offer expired in December 2012. Former employees eligible for the voluntary lump sum payment option were generally those who were vested traditional formula participants of the U.S. qualified pension plans who terminated employments prior to August 1, 2012 and who had not started receiving monthly payments of their pension benefits. The voluntary lump sum payments which amounted to \$134 million reduced the Company’s global projected benefit obligations by \$174 million, resulting in a net improvement of its pension underfunding by \$40 million. The Company incurred a non-cash pre-tax charge of \$53 million as a result of the requirement to expense the unrealized actuarial losses recognized in accumulated other comprehensive income (loss) pertaining to the liabilities settled at December 31, 2012. Beginning in 2013, the Company expects a \$4 million reduction in ongoing annual pre-tax pension expense directly attributable to this amendment.

On November 16, 2012, the Company amended its U.S. postretirement benefit plan by providing participants with Health Care Reimbursement Accounts funded by credits, based on years of service, to be used to access post-65 supplemental Medicare insurance markets. The credit indexes annually at the maximum rate of 3% per year. As a result of this amendment, the Company recognized a prior service credit of \$109 million in accumulated other comprehensive income (loss). The prior service credit will be amortized over 8 years starting in 2013. Beginning in 2013, the Company expects a \$21 million reduction in ongoing annual pre-tax postretirement expense directly attributable to this amendment.

The Company maintains 401(k) plans covering substantially all U.S. employees. The Company contributes cash to the plans to match qualifying employee contributions, and also provides a non-matching employer contribution of 1% of pay to eligible participants. Under an employee stock ownership component of the 401(k) plans, employees may choose to invest in ADM stock as part of their own investment elections. The employer contributions are expensed when paid. Assets of the Company’s 401(k) plans consist primarily of listed common stocks and pooled funds. The Company’s 401(k) plans held 15 million shares of Company common stock at December 31, 2012, with a market value of \$412 million. Cash dividends received on shares of Company common stock by these plans during the six months ended December 31, 2012 were \$5 million.

Included in accumulated other comprehensive income for pension benefits at December 31, 2012, are the following amounts that have not yet been recognized in net periodic pension cost: unrecognized transition obligation of (\$1) million, unrecognized prior service cost of \$10 million, and unrecognized actuarial loss of \$975 million. The prior service cost and actuarial loss included in accumulated other comprehensive income expected to be recognized in net periodic pension cost during 2013 is \$3 million and \$70 million, respectively.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 16. Employee Benefit Plans (Continued)

Included in accumulated other comprehensive income for postretirement benefits at December 31, 2012, are the following amounts that have not yet been recognized in net periodic pension cost: unrecognized prior service credit of (\$123) million and unrecognized actuarial loss of \$67 million. The prior service credit and actuarial loss included in accumulated other comprehensive income expected to be recognized in net periodic benefit cost during 2013 is (\$18) million and \$6 million, respectively.

The following table sets forth the principal assumptions used in developing net periodic pension cost:

	Pension Benefits			Postretirement Benefits		
	December 31 2012	June 30 2012	June 30 2011	December 31 2012	June 30 2012	June 30 2011
Discount rate	4.0%	5.5%	5.2%	4.0%	5.5%	5.4%
Expected return on plan assets	7.0%	7.1%	7.1%	N/A	N/A	N/A
Rate of compensation increase	3.9%	3.9%	3.9%	N/A	N/A	N/A

The following table sets forth the principal assumptions used in developing the year-end actuarial present value of the projected benefit obligations:

	Pension Benefits			Postretirement Benefits		
	December 31 2012	June 30 2012	June 30 2011	December 31 2012	June 30 2012	June 30 2011
Discount rate	3.9%	4.0%	5.5%	3.6%	4.0%	5.5%
Rate of compensation increase	3.9%	4.0 %	3.9%	N/A	N/A	N/A

The projected benefit obligation, accumulated benefit obligation, and fair value of plan assets for the pension plans with projected benefit obligations in excess of plan assets were \$2.4 billion, \$2.2 billion, and \$1.6 billion, respectively as of December 31, 2012, \$2.8 billion, \$2.5 billion, and \$1.9 billion, respectively, as of June 30, 2012, and \$2.1 billion, \$1.9 billion, and \$1.7 billion, respectively, as of June 30, 2011. The projected benefit obligation, accumulated benefit obligation, and fair value of plan assets for the pension plans with accumulated benefit obligations in excess of plan assets were \$2.4 billion, \$2.2 billion, and \$1.6 billion, respectively, as of December 31, 2012, \$2.7 billion, \$2.5 billion, and \$1.8 billion, respectively, as of June 30, 2012, and \$671 million, \$657 million, and \$425 million, respectively, as of June 30, 2011. The accumulated benefit obligation for all pension plans as of December 31, 2012 and June 30, 2012 and 2011, was \$2.7 billion, \$2.7 billion, and \$2.3 billion, respectively.

For postretirement benefit measurement purposes, a 7.25% annual rate of increase in the per capita cost of covered health care benefits was assumed for the transition period ended December 31, 2012. The rate was assumed to decrease gradually to 5% by 2022 and remain at that level thereafter.

A 1% change in assumed health care cost trend rates would have the following effects:

	1% Increase	1% Decrease
	(In millions)	
Effect on combined service and interest cost components	\$ -	\$ -
Effect on accumulated postretirement benefit obligations	\$ 5	\$ (5)

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 16. Employee Benefit Plans (Continued)

Plan Assets

The Company's employee benefit plan assets are principally comprised of the following types of investments:

Common stock:

Equity securities are valued based on quoted exchange prices and are classified within Level 1 of the valuation hierarchy.

Mutual funds:

Mutual funds are valued at the closing price reported on the active market on which they are traded and are classified within Level 1 of the valuation hierarchy.

Common collective trust (CCT) funds:

The fair values of the CCTs are based on the cumulative net asset value (NAV) of their underlying investments. The investments in CCTs are comprised of international equity funds, a small cap U.S. equity fund, large cap U.S. equity funds, fixed income funds, and other funds. The fund units are valued at NAV based on the closing market value of the units bought or sold as of the valuation date and are classified in Level 2 of the fair value hierarchy. The CCTs seek primarily to provide investment results approximating the aggregate price, dividend performance, total return, and income stream of underlying investments of the funds. Issuances and redemptions of certain of the CCT investments may be restricted by date and/or amount.

Corporate debt instruments:

Corporate debt instruments are valued at the closing price reported on the active market on which they are traded and are classified within Level 2 of the valuation hierarchy.

U.S. Treasury instruments:

U.S. Treasury instruments are valued at the closing price reported on the active market on which they are traded and are classified within Level 1 of the valuation hierarchy.

U.S. government agency, state, and local government bonds:

U.S. government agency obligations and state and municipal debt securities are valued using third-party pricing services and are classified within Level 2 of the valuation hierarchy.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Company believes its valuation methods are appropriate and consistent with other market participants' methods, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 16. Employee Benefit Plans (Continued)

The following table sets forth the actual asset allocation for the Company's global pension plan assets as of the measurement date:

	December 31 2012(1)(2)	June 30 2012(2)	June 30 2011(2)
Equity securities	52%	51%	52%
Debt securities	47%	48%	47%
Other	1%	1%	1%
Total	100%	100%	100%

(1) The Company's U.S. pension plans contain approximately 67% of the Company's global pension plan assets. The actual asset allocation for the Company's U.S. pension plans as of the measurement date consists of 60% equity securities and 40% debt securities. The target asset allocation for the Company's U.S. pension plans is the same as the actual asset allocation. The actual asset allocation for the Company's foreign pension plans as of the measurement date consists of 36% equity securities, 61% debt securities, and 3% in other investments. The target asset allocation for the Company's foreign pension plans is approximately the same as the actual asset allocation.

(2) The Company's pension plans did not hold any shares of Company common stock as of the December 31, 2012 and June 30, 2012 and 2011 measurement dates. Cash dividends received on shares of Company common stock by these plans during the six-month period ended December 31, 2012 and the twelve-month period ended June 30, 2012 and 2011, were \$0 million, \$0 and \$0.1 million, respectively.

Investment objectives for the Company's plan assets are to:

- Optimize the long-term return on plan assets at an acceptable level of risk.
- Maintain a broad diversification across asset classes and among investment managers.
- Maintain careful control of the risk level within each asset class.

Asset allocation targets promote optimal expected return and volatility characteristics given the long-term time horizon for fulfilling the obligations of the pension plans. Selection of the targeted asset allocation for plan assets was based upon a review of the expected return and risk characteristics of each asset class, as well as the correlation of returns among asset classes. The U.S. pension plans target asset allocation is also based on an asset and liability study that is updated periodically.

Investment guidelines are established with each investment manager. These guidelines provide the parameters within which the investment managers agree to operate, including criteria that determine eligible and ineligible securities, diversification requirements, and credit quality standards, where applicable. In some countries, derivatives may be used to gain market exposure in an efficient and timely manner; however, derivatives may not be used to leverage the portfolio beyond the market value of underlying investments.

The Company uses external consultants to assist in monitoring the investment strategy and asset mix for the Company's plan assets. To develop the Company's expected long-term rate of return assumption on plan assets, the Company generally uses long-term historical return information for the targeted asset mix identified in asset and liability studies. Adjustments are made to the expected long-term rate of return assumption when deemed necessary based upon revised expectations of future investment performance of the overall investment markets.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 16. Employee Benefit Plans (Continued)

Contributions and Expected Future Benefit Payments

Based on actuarial calculations, the Company expects to contribute \$37 million to the pension plans and \$13 million to the postretirement benefit plan during 2013. The Company may elect to make additional discretionary contributions during this period.

The following benefit payments, which reflect expected future service, are expected to be paid by the benefit plans:

	Pension Benefits	Postretirement Benefits
	(In millions)	
2013	\$ 112	\$ 13
2014	115	11
2015	118	11
2016	121	12
2017	125	12
2018 – 2022	696	65

Note 17. Accumulated Other Comprehensive Income (Loss)

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 18. Segment and Geographic Information

The Company is principally engaged in procuring, transporting, storing, processing, and merchandising agricultural commodities and products. The Company's operations are organized, managed and classified into three reportable business segments: Oilseeds Processing, Corn Processing, and Agricultural Services. Each of these segments is organized based upon the nature of products and services offered. The Company's remaining operations are not reportable segments, as defined by ASC Topic 280, Segment Reporting, and are classified as Other.

The Oilseeds Processing segment includes global activities related to the origination, merchandising, crushing, and further processing of oilseeds such as soybeans and soft seeds (cottonseed, sunflower seed, canola, rapeseed, and flaxseed) into vegetable oils and protein meals. Oilseeds products produced and marketed by the Company include ingredients for the food, feed, energy, and other industrial products industries. Crude vegetable oils produced by the segment's crushing activities are sold "as is" or are further processed by refining, blending, bleaching, and deodorizing into salad oils. Salad oils are sold "as is" or are further processed by hydrogenating and/or interesterifying into margarine, shortening, and other food products. Partially refined oils are used to produce biodiesel or are sold to other manufacturers for use in chemicals, paints, and other industrial products. Oilseed protein meals are principally sold to third parties to be used as ingredients in commercial livestock and poultry feeds. The Oilseeds Processing segment also includes activities related to the procurement, transportation and processing of cocoa beans into cocoa liquor, cocoa butter, cocoa powder, chocolate, and various compounds in North America, South America, Europe, Asia, and Africa for the food processing industry. In Europe and South America, the Oilseeds Processing segment includes origination and merchandising activities as adjuncts to its oilseeds processing assets. These activities include a network of grain elevators, port facilities, and transportation assets used to buy, store, clean, and transport grains and oilseeds. The Oilseeds Processing segment produces natural health and nutrition products and other specialty food and feed ingredients. The Oilseeds Processing segment is a major supplier of peanuts and peanut-derived ingredients to both the U.S. and export markets. In North America, cottonseed flour is produced and sold primarily to the pharmaceutical industry and cotton cellulose pulp is manufactured and sold to the chemical, paper, and filter markets. In South America, the Oilseeds Processing segment operates fertilizer blending facilities. The Oilseeds Processing segment also includes the Company's share of the results of its equity investment in Wilmar and its share of results for its Stratas Foods LLC and Edible Oils Limited joint ventures.

The Company's Corn Processing segment is engaged in corn wet milling and dry milling activities, with its asset base primarily located in the central part of the United States. The Corn Processing segment converts corn into sweeteners and starches, and bioproducts. Its products include ingredients used in the food and beverage industry including sweeteners, starch, syrup, glucose, and dextrose. Dextrose and starch are used by the Corn Processing segment as feedstocks for its bioproducts operations. By fermentation of dextrose, the Corn Processing segment produces alcohol, amino acids, and other specialty food and animal feed ingredients. Ethyl alcohol is produced by the Company for industrial use as ethanol or as beverage grade. Ethanol, in gasoline, increases octane and is used as an extender and oxygenate. Bioproducts also include amino acids such as lysine and threonine that are vital compounds used in swine feeds to produce leaner animals and in poultry feeds to enhance the speed and efficiency of poultry production. Corn gluten feed and meal, as well as distillers' grains, are produced for use as animal feed ingredients. Corn germ, a by-product of the wet milling process, is further processed into vegetable oil and protein meal. Other Corn Processing products include citric and lactic acids, lactates, sorbitol, xanthan gum, and glycols which are used in various food and industrial products. The Corn Processing segment includes the activities of a propylene and ethylene glycol facility and the Company's Brazilian sugarcane ethanol plant and related operations. In

fiscal 2012, the Company ended its commercial alliance with Metabolix, Inc. As a result of this decision, Telles LLC, the sales and marketing commercial alliance created to commercialize Mirel™, a bio-based plastic, will be dissolved and the production of Mirel™ on behalf of Telles LLC has ended. This segment also includes the Company's share of the results of its equity investments in Almidones Mexicanos S.A., Eaststarch C.V., and Red Star Yeast Company LLC.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 18. Segment and Geographic Information (Continued)

The Agricultural Services segment utilizes its extensive U.S. grain elevator, global transportation network, and port operations to buy, store, clean, and transport agricultural commodities, such as oilseeds, corn, wheat, milo, oats, rice, and barley, and resells these commodities primarily as food and feed ingredients and as raw materials for the agricultural processing industry. Agricultural Services' grain sourcing, handling, and transportation network provides reliable and efficient services to the Company's customers and agricultural processing operations. Agricultural Services' transportation network capabilities include barge, ocean-going vessel, truck, and rail freight services. Agricultural Services segment also includes the activities related to the processing of wheat into wheat flour, the processing and distribution of formula feeds, animal health and nutrition products, and the procurement, processing, and distribution of edible beans. The Agricultural Services segment includes the activities of Alfred C. Toepfer International, an 80% owned global merchant of agricultural commodities and processed products. The Agricultural Services segment also includes the Company's share of the results of its Kalama Export Company joint venture. In December 2012, the Company sold its equity investment in Gruma S.A.B. de C.V.

Other includes the Company's remaining operations, primarily its financial business units, related principally to futures commission merchant activities and captive insurance. On September 30, 2011, the Company sold a majority ownership interest of the Bank. The Bank was deconsolidated from the Company's consolidated financial statements in the first quarter of fiscal 2012 resulting in no material effect to the Company's earnings. In December 2012, the Company sold its remaining common equity interest in the Bank resulting in no material effect to the Company's earnings.

Intersegment sales have been recorded at amounts approximating market. Operating profit for each segment is based on net sales less identifiable operating expenses. Also included in segment operating profit is equity in earnings of affiliates based on the equity method of accounting. Certain Corporate items are not allocated to the Company's reportable business segments. Corporate results principally include the impact of LIFO-related adjustments, unallocated corporate expenses, and interest cost net of investment income. Prior to January 1, 2012, Corporate results also included the after-tax elimination of income attributable to mandatorily redeemable interests in consolidated subsidiaries.

Note 19. Asset Impairment Charges and Exit Costs

As part of the Company's ongoing portfolio management, the Company decided to divest its interests in Gruma S.A.B. de C.V. and related joint ventures ("Gruma"). As a result, the Company's equity method investments in Gruma were evaluated for impairment. In the quarter ended September 30, 2012, the Company recorded a \$146 million pre-tax asset impairment charge (\$0.16 per share after tax) on its investments in Gruma by comparing the carrying value, including \$123 million of cumulative unrealized foreign currency translation losses, to estimated fair value. Fair value was estimated based on negotiations which resulted in the Company entering into a non-binding letter of intent to sell its interests in Gruma to a third party on October 16, 2012. The agreement was subject to the approvals of the Company and Gruma's boards of directors and to rights of first refusal on the part of Gruma's controlling

shareholder. In December 2012, Gruma's controlling shareholder exercised its rights of first refusal and entered into an equity purchase agreement with the Company to purchase the Company's interests in Gruma. Under the terms of the sale, the Company received \$450 million in December 2012, the estimated fair value at September 30, 2012. The Company may also receive up to \$60 million of contingent consideration over the next 42 months.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 19. Asset Impairment Charges and Exit Costs (Continued)

During the second quarter of fiscal 2012, the Company determined that the carrying values of its Clinton, IA, bioplastics facility's long-lived assets were greater than their future net undiscounted cash flows. Accordingly, the Company recorded charges of \$339 million in the Corn Processing segment related to the impairment of its Clinton, IA, bioplastics facility's property, plant, and equipment and inventories. In addition, the Company recognized an other-than-temporary impairment charge of \$13 million in Corporate related to its investment in Metabolix, Inc. The Company estimated the fair value of these assets based on limited market data available and on its ability to redeploy the assets within its own operations.

During the third quarter of fiscal 2012, the Company recorded in its Corn Processing segment \$14 million in facility exit and other related costs related to the closure of its ethanol facility in Walhalla, ND, which was partially offset by a \$4 million recovery of prior quarter bioplastic-related charges. In addition, the Company incurred \$4 million of facility exit and other related costs in Corporate.

In January 2012, the Company announced a plan to streamline its organizational structure, reducing its global workforce to enhance the cost structure of the Company. Over 1,200 positions, primarily salaried, were eliminated. To help achieve this reduction, the Company offered a voluntary early retirement incentive in the U.S. These actions, in concert with other targeted cost reductions have reduced the Company's annual pre-tax expenses by approximately \$150 million. The Company achieved a significant portion of the position reductions through the voluntary early retirement incentive in the U.S. and offered severance and outplacement assistance to other affected employees.

The following table summarizes the Company's significant asset impairment, exit, and restructuring costs for the six months ended December 31, 2012 and 2011 and the fiscal year ended June 30, 2012:

(In millions)	Six Months Ended December 31		Year Ended June 30, 2012
	2012	2011 (Unaudited)	
Employee-related costs (1)	\$ -	\$ -	\$ 71
Facility exit and other related costs (2)	146	352	366
Total asset impairment, exit, and restructuring costs	\$ 146	\$ 352	\$ 437

- (1) These costs primarily consist of one-time termination benefits provided to employees who have been involuntarily terminated and \$34 million for pension and postretirement remeasurement charges triggered by an amendment of its U.S. plans due to the voluntary early retirement program.
- (2) Facility exit and other related costs for the six months ended December 31, 2012 consist of an asset impairment charge of \$146 million related to the Gruma investment writedown in the Agricultural Services segment. Facility exit and other related costs for the six months ended December 31, 2011 consist of asset impairment charges and other costs of \$339 million related to the exit of the Clinton, IA, bioplastics facility in the Corn Processing segment and \$13 million investment writedown in Corporate. Facility exit and other related costs for the fiscal year ended June 30, 2012 consist of asset impairment charges and other costs of \$349 million related to the exit of the

Clinton, IA, bioplastics and Walhalla, ND, ethanol facilities in the Corn Processing segment and investment writedown and other facility exit-related costs of \$17 million in Corporate.

There were no significant asset impairment charges and exit costs recognized in fiscal years 2011 and 2010.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 20. Sale of Accounts Receivable

On March 27, 2012, the Company entered into an amendment of its accounts receivable securitization program (as amended, the “Program”) with certain commercial paper conduit purchasers and committed purchasers (collectively, the “Purchasers”). Under the Program, certain U.S.-originated trade accounts receivable are sold to a wholly-owned bankruptcy-remote entity, ADM Receivables, LLC (“ADM Receivables”). ADM Receivables in turn transfers such purchased accounts receivable in their entirety to the Purchasers pursuant to a receivables purchase agreement. In exchange for the transfer of the accounts receivable, ADM Receivables receives a cash payment of up to \$1.0 billion and an additional amount upon the collection of the accounts receivable (deferred consideration). ADM Receivables uses the cash proceeds from the transfer of receivables to the Purchasers and other consideration to finance the purchase of receivables from the Company and the ADM subsidiaries originating the receivables. The Company accounts for these transfers as sales. The Company has no retained interests in the transferred receivables, other than collection and administrative responsibilities and its right to the deferred consideration. At December 31, 2012 and June 30, 2012, the Company did not record a servicing asset or liability related to its retained responsibility, based on its assessment of the servicing fee, market values for similar transactions and its cost of servicing the receivables sold. The Program terminates on June 28, 2013.

As of December 31, 2012, the fair value of trade receivables transferred to the Purchasers under the Program and derecognized from the Company’s consolidated balance sheet was \$1.9 billion. In exchange for the transfer, the Company received cash of \$1.0 billion and recorded a \$0.9 billion receivable for deferred consideration included in other current assets. Cash collections from customers on receivables sold were \$21.9 billion for the six months ended December 31, 2012 and \$8.9 billion for the year ended June 30, 2012. Of this amount, \$21.9 billion and \$8.9 billion pertain to cash collections on the deferred consideration for the periods ended December 31, 2012 and June 30, 2012, respectively. Deferred consideration is paid to the Company in cash on behalf of the Purchasers as receivables are collected; however, as this is a revolving facility, cash collected from the Company’s customers is reinvested by the Purchasers daily in new receivable purchases under the Program.

The Company’s risk of loss following the transfer of accounts receivable under the Program is limited to the deferred consideration outstanding. The Company carries the deferred consideration at fair value determined by calculating the expected amount of cash to be received and is principally based on observable inputs (a Level 2 measurement under the applicable accounting standards) consisting mainly of the face amount of the receivables adjusted for anticipated credit losses and discounted at the appropriate market rate. Payment of deferred consideration is not subject to significant risks other than delinquencies and credit losses on accounts receivable transferred under the program which have historically been insignificant.

Transfers of receivables under the Program during the six months ended December 31, 2012 and the year ended June 30, 2012 resulted in an expense for the loss on sale of \$4 million for both periods, which is classified as selling, general, and administrative expenses in the consolidated statements of earnings.

The Company reflects all cash flows related to the Program as operating activities in its consolidated statements of cash flows for the six months ended December 31, 2012 and the year ended June 30, 2012 because the cash received from the Purchasers upon both the sale and collection of the receivables is not subject to significant interest rate risk given the short-term nature of the Company’s trade receivables.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 21. Contingencies, Guarantees and Commitments

Since August 2008, the Company has been conducting an internal review of its policies, procedures and internal controls pertaining to the adequacy of its anti-corruption compliance program and of certain transactions conducted by the Company and its affiliates and joint ventures, primarily relating to grain and feed exports, that may have violated company policies, the U.S. Foreign Corrupt Practices Act, and other U.S. and foreign laws. The Company initially disclosed this review to the U.S. Department of Justice, the Securities and Exchange Commission, and certain foreign regulators in March 2009 and has subsequently provided periodic updates to the agencies. The Company engaged outside counsel and other advisors to assist in the review of these matters and has implemented, and is continuing to implement, appropriate remedial measures. The Company has recently completed its internal review and has initiated discussions with the Department of Justice and the Securities and Exchange Commission on the resolution of this matter. In connection with this review, government agencies could impose civil penalties or criminal fines and/or order that the Company disgorge any profits derived from any contracts involving inappropriate payments. The Company has not recorded any liability for any assessments that may be imposed by the government agencies pertaining to this matter because the amount cannot be reasonably estimated. These events have not had, and are not expected to have, a material impact on the Company's business or financial condition.

The Company has entered into agreements, primarily debt guarantee agreements related to equity-method investees, which could obligate the Company to make future payments if the primary entity fails to perform its contractual obligations. The Company has not recorded a liability for payment of these contingent obligations, as the Company believes the fair value of these contingent obligations is immaterial. The Company has collateral for a portion of these contingent obligations. These contingent obligations totaled \$44 million at December 31, 2012.

Diluted Earnings Per Common Share	0.54	1.14	0.86	0.58	3.13

Net earnings attributable to controlling interests for the first quarter of the transition period ended December 31, 2012 include an after-tax asset impairment charge related to the Gruma investment writedown of \$107 million (equal to

\$0.16 per share) as discussed in Note 19. Net earnings attributable to controlling interests for the second quarter of the transition period ended December 31, 2012 include an after-tax gain of \$49 million (equal to \$0.07 per share) related to the Company's interest in GrainCorp, an after-tax gain of \$24 million (equal to \$0.04 per share) related to the sale of certain the Company's exchange membership interests, and an after-tax charge of \$44 million (equal to \$0.07 per share) related to pension settlements.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)

Note 22. Quarterly Financial Data (Unaudited) (Continued)

Net earnings attributable to controlling interests for the second and third quarters of fiscal year 2012 include after-tax exit costs and asset impairment charges related primarily to the bioplastics facility and global workforce reduction program of \$222 million and \$52 million (equal to \$0.33 and \$0.08 per share), respectively as discussed in Note 19.

Net earnings attributable to controlling interests for the first, second, third and fourth quarters of fiscal year 2011 include after-tax start up costs for the Company's new greenfield plants of \$20 million, \$14 million, \$14 million, and \$11 million (equal to \$0.03, \$0.02, \$0.02, and \$0.02 per share), respectively. Net earnings attributable to controlling interests for the fourth quarter ended June 30, 2011 include debt buyback costs of \$15 million (\$9 million after tax, equal to \$0.01 per share). Net earnings attributable to controlling interests for the fourth quarter ended June 30, 2011 include a gain of \$78 million (\$49 million after tax, equal to \$0.07 per share) related to the sale of bank securities held by the Company's equity investee, Gruma S.A.B. de C.V. Net earnings attributable to controlling interests for the second quarter ended December 31, 2010 include a gain of \$71 million (\$44 million after tax, equal to \$0.07 per share) related to the acquisition of the remaining interest in Golden Peanut. Net earnings attributable to controlling interests for the first, second, and third quarters of fiscal year 2011 include after-tax (losses) gains on interest rate swaps of (\$19) million, \$34 million, and \$4 million (equal to (\$0.03), \$0.05, and \$0.01 per share), respectively as discussed in Note 4. During the second quarter of fiscal year 2011, the Company updated its estimates for service lives of certain of its machinery and equipment assets. The effect of this change on net earnings attributable to controlling interests for the second, third and fourth quarters of fiscal year 2011 was an after-tax increase of \$24 million, \$31 million, and \$28 million (equal to \$0.04, \$0.05, and \$0.04 per share), respectively.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
Archer-Daniels-Midland Company
Decatur, Illinois

We have audited the accompanying consolidated balance sheets of Archer-Daniels-Midland Company (the Company) as of December 31, 2012 and June 30, 2012 and 2011, and the related consolidated statements of earnings, comprehensive income (loss), shareholders' equity, and cash flows for the six-month period ended December 31, 2012 and each of the three years in the period ended June 30, 2012. Our audits also included the financial statement schedule listed in the Index at Item 15(a)(2). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Archer-Daniels-Midland Company at December 31, 2012 and June 30, 2012 and 2011, and the consolidated results of its operations and its cash flows for the six-month period ended December 31, 2012 and each of the three years in the period ended June 30, 2012, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

As discussed in Note 1 to the consolidated financial statements, the Company has elected to change the date of its annual goodwill and indefinite-lived intangible asset impairment test from April 1 to October 1 in the transition period ended December 31, 2012.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Archer-Daniels-Midland Company's internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 28, 2013, expressed an unqualified opinion thereon.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
Archer-Daniels-Midland Company
Decatur, Illinois

We have audited Archer-Daniels-Midland Company's internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Archer-Daniels-Midland Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes, in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Archer-Daniels-Midland Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Archer-Daniels-Midland Company as of December 31, 2012 and June 30, 2012 and 2011, and the related consolidated statements of earnings, comprehensive income (loss), shareholders' equity, and cash flows for the six-month period ended December 31, 2012 and each of the three years in the period ended June 30, 2012, of Archer-Daniels-Midland Company and our report dated February 28, 2013, expressed an unqualified opinion thereon.

Item 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON
ACCOUNTING AND FINANCIAL DISCLOSURE

None.

Item 9A. CONTROLS AND PROCEDURES

As of December 31, 2012, an evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's "disclosure controls and procedures" (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act)). Based on that evaluation, the Company's management, including the Chief Executive Officer and Chief Financial Officer, concluded the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms and (ii) accumulated and communicated to the Chief Executive Officer and Chief Financial Officer to allow timely decisions regarding required disclosure. There was no change in the Company's internal controls over financial reporting during the Company's most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal controls over financial reporting.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Archer-Daniels-Midland Company's (ADM's) management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f). ADM's internal control system is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with generally accepted accounting principles.

Under the supervision and with the participation of management, including its Chief Executive Officer and Chief Financial Officer, ADM's management assessed the design and operating effectiveness of internal control over financial reporting as of December 31, 2012 based on the framework set forth in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Based on this assessment, management concluded that ADM's internal control over financial reporting was effective as of December 31, 2012. Ernst & Young LLP, an independent registered public accounting firm, has issued an attestation report on the Company's internal control over financial reporting as of December 31, 2012. That report is included herein.
