

NEW YORK TIMES CO
Form 10-K
February 24, 2015

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549
FORM 10-K

Annual Report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the fiscal year ended December 28, 2014
Commission file number 1-5837

THE NEW YORK TIMES COMPANY
(Exact name of registrant as specified in its charter)

New York
(State or other jurisdiction of
incorporation or organization)
620 Eighth Avenue, New York, N.Y.
(Address of principal executive offices)

13-1102020
(I.R.S. Employer
Identification No.)
10018
(Zip code)

Registrant's telephone number, including area code: (212) 556-1234

Securities registered pursuant to Section 12(b) of the Act:

Title of each class
Class A Common Stock of \$.10 par value

Name of each exchange on which registered
New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: Not Applicable

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).
Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate worldwide market value of Class A Common Stock held by non-affiliates, based on the closing price on June 27, 2014, the last business day of the registrant's most recently completed second quarter, as reported on the New York Stock Exchange, was approximately \$2.2 billion. As of such date, non-affiliates held 66,172 shares of Class B Common Stock. There is no active market for such stock.

The number of outstanding shares of each class of the registrant's common stock as of February 19, 2015 (exclusive of treasury shares), was as follows: 165,676,726 shares of Class A Common Stock and 816,635 shares of Class B Common Stock.

Documents incorporated by reference

Portions of the Proxy Statement relating to the registrant's 2015 Annual Meeting of Stockholders, to be held on May 6, 2015, are incorporated by reference into Part III of this report.

FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K, including the sections titled “Item 1A — Risk Factors” and “Item 7 — Management’s Discussion and Analysis of Financial Condition and Results of Operations,” contains forward-looking statements that relate to future events or our future financial performance. We may also make written and oral forward-looking statements in our Securities and Exchange Commission (“SEC”) filings and otherwise. We have tried, where possible, to identify such statements by using words such as “believe,” “expect,” “intend,” “estimate,” “anticipate,” “will,” “could,” “project” and similar expressions in connection with any discussion of future operating or financial performance. Any forward-looking statements are and will be based upon our then-current expectations, estimates and assumptions regarding future events and are applicable only as of the dates of such statements. We undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. By their nature, forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those anticipated in any such statements. You should bear this in mind as you consider forward-looking statements. Factors that we think could, individually or in the aggregate, cause our actual results to differ materially from expected and historical results include those described in “Item 1A — Risk Factors” below, as well as other risks and factors identified from time to time in our SEC filings.

ITEM 1. BUSINESS

OVERVIEW

The New York Times Company (the “Company”) was incorporated on August 26, 1896, under the laws of the State of New York. The Company and its consolidated subsidiaries are referred to collectively in this Annual Report on Form 10-K as “we,” “our” and “us.”

We are a global media organization focused on creating, collecting and distributing high-quality news and information. Our continued commitment to premium content and journalistic excellence makes The New York Times brand a trusted source of news and information for readers and viewers across various media. Recognized widely for the quality of our reporting and content, our publications have been awarded many industry and peer accolades, including 114 Pulitzer Prizes and citations.

The Company includes newspapers, digital businesses and investments in paper mills. We currently have one reportable segment with businesses that include:

- The New York Times (“The Times”);
- the International New York Times (“INYT”);
- our websites, NYTimes.com and international.nytimes.com; and
- related businesses, such as The Times news services division, digital archive distribution, our conferences business and other products and services under The Times brand.

We generate revenues principally from circulation and advertising. Circulation and advertising revenue information for the Company appears under “Item 7 — Management’s Discussion and Analysis of Financial Condition and Results of Operations.” Revenues, operating profit and identifiable assets of our foreign operations are not significant.

The Times’s award-winning content is available in print, online and through other digital platforms. The Times’s print edition, a daily (Mon. – Sat.) and Sunday newspaper in the United States, commenced publication in 1851. The NYTimes.com website was launched in 1996.

INYT is the international edition of The Times, tailored and edited for global audiences. First published in 2013, INYT succeeded the International Herald Tribune, a leading daily newspaper that commenced publishing in Paris in 1887. INYT’s content is also available at international.nytimes.com.

During 2014, the Company continued to focus on growing its digital business, while also making targeted investments in its print products. During the year, the Company introduced several new products, including NYT Now, a smartphone app targeted to a younger audience; Times Premier, a suite of exclusive online content and features offered to existing print and digital subscribers for an additional charge; and NYT Cooking, a collection of recipes and outstanding food journalism of The Times available on NYTimes.com and the iPad. NYT Now and NYT Cooking were named among the best apps of 2014 by Apple. We also made several investments in our print products, including a major redesign of The New York Times Magazine, which relaunched in early 2015.

The Company sold the New England Media Group in 2013 and the Regional Media Group and the About Group in 2012. The results of operations for these businesses have been presented as discontinued operations for all periods presented. See “Item 7 — Management’s Discussion and Analysis of Financial Condition and Results of Operations” and Note 13 of the Notes to the Consolidated Financial Statements for additional information regarding these discontinued operations.

CIRCULATION AND AUDIENCE

Our content reaches a broad audience through our print products, online and through other digital media, including smartphone, tablet and e-reader applications.

Circulation revenues are based on the number of copies of the printed newspaper (through home-delivery subscriptions and single-copy and bulk sales) and digital subscriptions sold and the rates charged to the respective customers. Since 2011, we have charged consumers for content provided on NYTimes.com and other digital platforms. NYTimes.com’s metered model offers users free access to a set number of articles per month and then charges users who are not print home-delivery subscribers, once they exceed that number. All print home-delivery subscribers receive free digital access.

The Times had the largest daily and Sunday circulation of all seven-day newspapers in the United States for the six-month period ended September 30, 2014, according to data collected by the Alliance for Audited Media (“AAM”), an independent agency that audits circulation of most U.S. newspapers and magazines.

For the fiscal year ended December 28, 2014, The Times’s average print circulation (which includes paid and qualified circulation of the newspaper in print) was approximately 648,900 for weekday (Monday to Friday) and 1,185,400 for Sunday. Under AAM’s reporting guidance, qualified circulation represents copies available for individual consumers that are either non-paid or paid by someone other than the individual, such as copies delivered to schools and colleges and copies purchased by businesses for free distribution.

Average circulation for INYT (which includes paid circulation of the newspaper in print and electronic replica editions) for the fiscal years ended December 28, 2014, and December 29, 2013, was approximately 219,500 (estimated) and 220,500, respectively. These figures follow the guidance of Office de Justification de la Diffusion, an agency based in Paris and a member of the International Federation of Audit Bureaux of Circulations that audits the circulation of most newspapers and magazines in France. The final 2014 figure will not be available until April 2015. According to comScore Media Metrix, an online audience measurement service, in 2014, NYTimes.com had a monthly average of approximately 31 million unique desktop/laptop visitors in the United States and approximately 42 million unique desktop/laptop visitors worldwide. In addition, according to comScore Mobile Metrix, in 2014, we had a monthly average of approximately 28 million unique visitors to The Times on mobile devices in the United States.

Paid subscribers to digital-only subscription packages, e-readers and replica editions totaled approximately 910,000 as of December 28, 2014, an increase of approximately 20% compared with December 29, 2013. This amount includes estimated paid subscribers through our group corporate and group education subscriptions (which collectively represent approximately 5% of total paid digital subscribers) and home-delivery subscribers who also subscribe to Times Premier (which represent approximately 2% of total paid digital subscribers). The number of paid subscribers through group subscriptions is derived using the value of the relevant contract and a discounted basic subscription rate. The actual number of users who have access to our products through group subscriptions is substantially higher.

ADVERTISING

We have a comprehensive portfolio of advertising products and services that we provide across multiple platforms, including print, online and mobile.

Beginning in the fourth quarter of 2014, we divide our advertising revenue into three main categories:

Display Advertising

Display advertising is principally from advertisers promoting products, services or brands, such as financial institutions, movie studios, department stores, American and international fashion and technology, in The Times and INYT. In print, column-inch ads are priced according to established rates, with premiums for color and positioning. The Times had the largest market share in 2014 in print advertising revenue among a national newspaper set that consists of USA Today, The Wall Street Journal and The Times, according to MediaRadar, an independent agency that measures advertising sales volume and estimates advertising revenue.

In digital, display advertising comprises banners, video, rich media and other interactive ads on our website and across other digital platforms. Advertisers pay for advertising based on a cost-per-thousand-impression, programmatic or flat rate, or through sponsorship fees.

Display advertising also includes “Paid Posts,” a native advertising product on The Times’s platforms. The Paid Posts product allows advertisers to present longer form marketing content that is distinct from the Times’s editorial content. In 2014, display advertising (print and digital) represented approximately 91% of advertising revenues.

Classified Advertising

Classified advertising includes line ads sold in the major categories of real estate, help wanted, automotive and other. In print, classified advertisers pay on a per-line basis. In digital, classified advertisers pay on either a per-listing basis for bundled listing packages, or as an add-on to their print ad. In 2014, classified advertising (print and digital) represented approximately 6% of advertising revenues.

Other Advertising

Other advertising primarily includes creative services fees associated with our branded content studio; revenues from preprinted advertising, also known as free-standing inserts; revenues generated from branded bags in which our newspapers are delivered; and advertising revenues from our News Services business. In 2014, other advertising (print and digital) represented approximately 3% of our advertising revenues.

Our businesses are affected in part by seasonal patterns in advertising, with generally higher advertising volume in the fourth quarter due to holiday advertising.

PRINT PRODUCTION AND DISTRIBUTION

The Times is currently printed at our production and distribution facility in College Point, N.Y., as well as under contract at 27 remote print sites across the United States. The Times is delivered to newsstands and retail outlets in the New York metropolitan area through a combination of third-party wholesalers and our own drivers. In other markets in the United States and Canada, The Times is delivered through agreements with other newspapers and third-party delivery agents.

INYT is printed under contract at 39 sites throughout the world and is sold in 140 countries and territories. INYT is distributed through agreements with other newspapers and third-party delivery agents.

OTHER BUSINESSES

Our other businesses primarily include:

The Times news services division, which transmits articles, graphics and photographs from The Times and other publications to over 1,900 newspapers, magazines and websites in over 100 countries and territories worldwide. It also comprises a number of other businesses that primarily include our online retail store, product licensing, book development and rights and permissions;

The Company’s conferences business, which is a platform for our live journalism, convenes thought leaders from business, academia and government to discuss topics ranging from education to sustainability to the luxury business; and

Digital archive distribution, which licenses electronic archive databases to resellers of that information in the business, professional and library markets.

FOREST PRODUCTS INVESTMENTS

We have non-controlling ownership interests in one newsprint company and one mill producing supercalendered paper, a polished paper used in some magazines, catalogs and preprinted inserts, which is a higher-value grade than newsprint (the “Forest Products Investments”). These investments are accounted for under the equity method and reported in “Investments in joint ventures” in our Consolidated Balance Sheets as of December 28, 2014. For additional information on our investments, see “Item 7 — Management’s Discussion and Analysis of Financial Condition and Results of Operations” and Note 5 of the Notes to the Consolidated Financial Statements.

We have a 49% equity interest in Donohue Malbaie Inc. (“Malbaie”), a Canadian newsprint company. The other 51% is owned by Resolute FP Canada Inc., a subsidiary of Resolute Forest Products Inc. (“Resolute”), a Delaware corporation. Resolute is a large global manufacturer of paper, market pulp and wood products. Malbaie manufactures newsprint on the paper machine it owns within Resolute’s paper mill in Clermont, Quebec. Malbaie is wholly dependent upon Resolute for its pulp, which is purchased by Malbaie from Resolute’s Clermont paper mill. In 2014, Malbaie produced approximately 214,000 metric tons of newsprint, of which approximately 11% was sold to us, with the balance sold to Resolute for resale.

We have a 40% equity interest in Madison Paper Industries (“Madison”), a partnership operating a supercalendered paper mill in Madison, Maine. Our Company and UPM-Kymmene Corporation, a Finnish paper manufacturing company, are partners through subsidiary companies in Madison. The Company’s percentage ownership is through an 80%-owned consolidated subsidiary. UPM-Kymmene owns 60% of Madison, including a 10% interest through a 20% noncontrolling interest in the consolidated subsidiary of the Company. Madison purchases the majority of its wood from local suppliers, mostly under long-term contracts. In 2014, Madison produced approximately 190,000 metric tons of supercalendered paper, of which approximately 4% was sold to us.

Malbaie and Madison are subject to comprehensive environmental protection laws, regulations and orders of provincial, federal, state and local authorities of Canada and the United States (the “Environmental Laws”). The Environmental Laws impose effluent and emission limitations and require Malbaie and Madison to obtain, and operate in compliance with the conditions of, permits and other governmental authorizations (“Governmental Authorizations”). Malbaie and Madison follow policies and operate monitoring programs designed to ensure compliance with applicable Environmental Laws and Governmental Authorizations and to minimize exposure to environmental liabilities. Various regulatory authorities periodically review the status of the operations of Malbaie and Madison. Based on the foregoing, we believe that Malbaie and Madison are in substantial compliance with such Environmental Laws and Governmental Authorizations.

RAW MATERIALS

The primary raw materials we use are newsprint and supercalendered and coated paper. We purchase newsprint from a number of North American producers. In 2014, the paper we used for our print products was purchased from both unrelated suppliers and related suppliers in which we hold equity interests (see “— Forest Products Investments”). A significant portion of newsprint is purchased from Resolute.

In 2014 and 2013, we used the following types and quantities of paper:

(In metric tons)	2014	2013
Newsprint	114,000	119,000
Supercalendered and Coated Paper ⁽¹⁾	17,000	17,200

⁽¹⁾ The Times uses supercalendered and coated paper for The New York Times Magazine and T: The New York Times Style Magazine.

COMPETITION

Our print and digital products compete for advertising and consumers with other media in their respective markets, including paid and free newspapers, digital media, broadcast, satellite and cable television, broadcast and satellite radio, magazines, other forms of media and direct marketing. Competition for advertising is generally based upon audience levels and demographics, advertising rates, service, targeting capabilities and advertising results, while competition for consumer revenue and readership is generally based upon platform, format, content, quality, service, timeliness and price.

The Times newspaper competes for print advertising and circulation primarily with national newspapers such as The Wall Street Journal and USA Today; newspapers of general circulation in New York City and its suburbs; other daily and weekly newspapers and television stations and networks in markets in which The Times circulates; and some national news and lifestyle magazines. INYT newspaper’s key competitors include all international sources of English-language news, including The Wall Street Journal’s European and Asian Editions, the Financial Times, Time, Bloomberg Business Week and The Economist.

As our industry continues to experience a secular shift from print to digital media, our print and digital products face increasing competition for audience and advertising from a wide variety of digital alternatives, such as news and other information websites and digital applications, news aggregation sites, sites that cover niche content, social media platforms, digital advertising networks and exchanges, real-time bidding and other programmatic buying channels and other new forms of media. Developments in methods of distribution, such as applications for mobile phones, tablets and other devices, also increase competition for users and digital advertising revenues.

Our websites most directly compete for traffic and readership with other news and information websites and mobile applications. NYTimes.com faces competition from sources such as WSJ.com, Google News, Yahoo! News, huffingtonpost.com, MSNBC and CNN.com. Internationally, international.nytimes.com competes against international online sources of English-language news, including bbc.co.uk, guardian.co.uk, ft.com, huffingtonpost.com and reuters.com. For digital advertising revenues, we face competition from a wide range of companies offering competing products, such as other advertising-supported websites and mobile applications, including websites that provide platforms for classified advertisements, as well as search engines, social media sites and other Internet companies.

EMPLOYEES AND LABOR RELATIONS

We had 3,588 full-time equivalent employees as of December 28, 2014.

As of December 28, 2014, approximately half of our full-time equivalent employees were represented by nine unions. The following is a list of collective bargaining agreements covering various categories of the Company's employees and their corresponding expiration dates. As indicated below, one collective bargaining agreement has expired and negotiations for a new contract are ongoing. We cannot predict the timing or the outcome of these negotiations.

Employee Category	Expiration Date
Paper handlers	March 30, 2014 (expired)
Electricians	March 30, 2015
Machinists	March 30, 2015
Mailers	March 30, 2016
New York Newspaper Guild	March 30, 2016
Typographers	March 30, 2016
Pressmen	March 30, 2017
Stereotypers	March 30, 2017
Drivers	March 30, 2020

Approximately 130 of our full-time equivalent employees are located in France, and the terms and conditions of employment of those employees are established by a combination of French national labor law, industry-wide collective agreements and Company-specific agreements.

AVAILABLE INFORMATION

Our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and all amendments to those reports, and the Proxy Statement for our Annual Meeting of Stockholders are made available, free of charge, on our website at <http://www.nytc.com>, as soon as reasonably practicable after such reports have been filed with or furnished to the SEC.

ITEM 1A. RISK FACTORS

You should carefully consider the risk factors described below, as well as the other information included in this Annual Report on Form 10-K. Our business, financial condition or results of operations could be materially adversely affected by any or all of these risks, or by other risks or uncertainties not presently known or currently deemed immaterial, that may adversely affect us in the future.

We face significant competition in all aspects of our business.

We operate in a highly competitive environment. Our print and digital products compete for advertising and circulation revenue with both traditional and new content providers. This competition has intensified as a result of the continued development of new digital media technologies and new media providers offering online news and other content. Competition among companies offering online content is intense, and new competitors can quickly emerge. Some of our current and potential competitors may have greater resources or better competitive positions in certain areas than we do. These factors may allow our competitors to respond more effectively than us to new technologies and changes in market conditions.

Our ability to compete effectively depends on many factors both within and beyond our control, including among others:

- our ability to continue to deliver high-quality journalism and content that is interesting and relevant to our audience;
- our ability to monetize new and existing print and digital products;
- the popularity, usefulness, ease of use, performance, and reliability of our digital products compared with our competitors' products;

the engagement of our readers with our print and digital products;
the maintenance and development of relevant print products in an environment that is increasingly digitally focused;
our ability to attract, retain, and motivate talented journalists and other employees and executives;
our ability to manage and grow our operations in a cost-effective manner; and
our reputation and brand strength relative to those of our competitors.

Our success depends on our ability to respond and adapt to changes in technology and consumer behavior.

Technology in the media industry continues to evolve rapidly. Advances in technology have led to an increasing number of methods for the delivery and consumption of news and other content. These developments are driving changes in consumer behavior as consumers seek more control over the ways in which they consume content. Unless we are able to use new and existing technologies to distinguish our products and services from those of our competitors and develop in a timely manner compelling new products and services that engage users across platforms, our business, financial condition and prospects may be adversely affected.

Changes in technology and consumer behavior pose a number of challenges that could adversely affect our revenues and competitive position. For example, among others:

we may be unable to develop products for mobile devices or other digital platforms that consumers find engaging, that work with a variety of operating systems and networks and that achieve a high level of market acceptance;

there may be changes in user sentiment about the quality or usefulness of our existing products;

news aggregation websites and customized news feeds may reduce our traffic levels by creating a disincentive for users to visit our websites or use our digital products;

failure to successfully manage changes in search engine optimization and social media traffic to increase our digital presence and visibility may reduce our traffic levels;

technical or other problems could prevent us from delivering our products in a rapid and reliable manner or otherwise affect the user experience;

new delivery platforms may lead to pricing restrictions, the loss of distribution control and the loss of a direct relationship with consumers;

mobile devices, including smartphones and tablets, may present challenges for traditional display advertising; and

technology developed to block the display of advertising on websites could proliferate.

Responding to these changes may require significant investment. We may be limited in our ability to invest funds and resources in digital products, services or opportunities, and we may incur research and development costs in building, maintaining and evolving our technology infrastructure.

Our advertising revenues are affected by numerous factors, including economic conditions, audience fragmentation and evolving digital advertising market dynamics.

We derive substantial revenues from the sale of advertising in The Times and INYT and in our digital products.

Advertising spending is sensitive to overall economic conditions, and our advertising revenues are adversely affected if advertisers respond to weak and uneven economic conditions by reducing their budgets or shifting spending patterns or priorities, or if they are forced to consolidate or cease operations.

In determining whether to buy advertising, our advertisers will consider the demand for our products, demographics of our reader base, advertising rates, results observed by advertisers, and alternative advertising options. The increasing number of digital media options available, through social networking tools and news aggregation websites, has expanded consumer choice significantly, resulting in audience fragmentation and increased competition for advertising.

Print advertising revenue represented approximately 73% of our total 2014 advertising revenues. However, the advertising industry continues to experience a secular shift toward digital advertising, which is less expensive and can offer more directly measurable returns than traditional print media. Because rates for digital advertising are generally lower than for traditional print advertising, our digital advertising revenue may not replace in full print advertising revenue lost as a result of the shift. In addition, growing consumer reliance on mobile devices exacerbates rate pressure, as rates for digital advertising are generally lower on mobile devices than on personal computers. Mobile advertising is a new and rapidly evolving market. If we are unable to grow revenues generated from mobile devices through the development of advertising products that are accepted by marketers and consumers, our advertising revenues will be adversely affected.

Digital advertising networks and exchanges, real-time bidding and other programmatic buying channels that allow advertisers to buy audiences at scale are also playing a more significant role in the advertising marketplace and causing downward pricing pressure. In addition, increased inventory in the digital marketplace and evolving standards for delivery of digital advertising, such as viewability, could adversely affect advertising revenues.

The inability of the Company to retain and grow our subscriber base could adversely affect our results of operations and business.

Circulation revenue comprises a majority of our total revenue. In recent years, we have experienced declining print circulation volume. This is primarily due to increased competition from digital media formats and sources other than traditional newspapers (which are often free to users), higher subscription rates and a growing preference among certain consumers to receive all or a portion of their news from sources other than a newspaper. If we are unable to offset continued revenue declines resulting from falling print circulation volume with revenue from home-delivery price increases, then our print circulation revenue will be adversely affected.

Digital subscriptions for content provided on NYTimes.com and other digital platforms generate substantial revenue for us. Our future growth depends upon our ability to retain and grow our digital subscription base and audience. To do so will require us to evolve our digital subscription model, address changing consumer requirements and develop and improve our digital products while continuing to deliver high-quality journalism and content that is interesting and relevant to our audience. There is no assurance that we will be able to successfully maintain and increase our digital audience or that we will be able to do so without taking steps such as reducing pricing or increasing costs that would affect our margin or profitability.

If we are unable to execute cost-control measures successfully, our total operating costs may be greater than expected, which would adversely affect our profitability.

Over the last several years, we have taken steps to reduce operating costs by reducing staff and employee benefits and implementing general cost-control measures across the Company, and we plan to continue these cost management efforts. If we do not achieve expected savings or our operating costs increase as a result of investments in strategic initiatives, our total operating costs would be greater than anticipated. In addition, if we do not manage our costs properly, such efforts may affect the quality of our products and our ability to generate future revenues. Reductions in staff and employee compensation and benefits could also adversely affect our ability to attract and retain key employees.

Significant portions of our expenses are fixed costs that neither increase nor decrease proportionately with revenues. In addition, our ability to make short-term adjustments to manage our costs or to make changes to our business strategy may be limited by certain of our collective bargaining agreements. If we are not able to implement further cost-control efforts or reduce our fixed costs sufficiently in response to a decline in our revenues, this could adversely affect our results of operations.

Security breaches and other network and information systems disruptions could affect our ability to conduct our business effectively.

Our online systems store and process confidential subscriber, employee and other sensitive personal data, and therefore maintaining our network security is of critical importance. The security of these network and information systems and other technologies is important to our business activities. We use third-party technology and systems for a variety of operations, including encryption and authentication technology, employee email, domain name registration, content delivery to customers, back-office support and other functions. Our systems, and those of third parties upon which our business relies, may be vulnerable to interruption or damage that can result from natural

disasters, fires, power outages, acts of terrorism or other similar events, or from deliberate attacks such as computer

THE NEW YORK TIMES COMPANY – P. 7

hacking, computer viruses, worms or other destructive or disruptive software, process breakdowns, denial of service attacks, malicious social engineering or other malicious activities, or any combination of the foregoing.

Despite the security measures we and our third-party service providers have taken, our computer systems, and those of our vendors, have been, and will likely continue to be, subject to attack. We have implemented controls and taken other preventative measures designed to strengthen our systems against attacks, including measures designed to reduce the impact of a security breach at our third-party vendors. Although the costs of the controls and other measures we have taken to date have not had a material effect on our financial condition, results of operations or liquidity, there can be no assurance as to the cost of additional controls and measures that we may conclude are necessary in the future.

There can also be no assurance that the actions, measures and controls we have implemented will be effective against future attacks or be sufficient to prevent a future security breach or other disruption to our network or information systems, or those of our third-party providers. Such an event could result in a disruption of our services or improper disclosure of personal data or confidential information, which could harm our reputation, require us to expend resources to remedy such a security breach or defend against further attacks, divert management's attention and resources or subject us to liability under laws that protect personal data, resulting in increased operating costs or loss of revenue.

Our international operations expose us to risks inherent in foreign operations.

We are focused on expanding the international scope of our operations. We face the inherent risks associated with doing business abroad, including:

- effectively managing and staffing foreign operations, including complying with diverse local labor laws and regulations;
- navigating local customs and practices;
- responding to government policies that restrict the digital flow of information;
- protecting and enforcing our intellectual property rights under varying legal regimes;
- complying with international laws and regulations, including those governing the collection, use, retention, sharing and security of consumer data;
- addressing political or social instability;
- adapting to currency exchange rate fluctuations; and
- complying with restrictions on repatriation of funds.

Adverse developments in any of these areas could have an adverse impact on our business, financial condition and results of operations. In addition, we have limited experience in operating and marketing our products in new international regions and could be at a disadvantage compared to competitors with more experience.

The underfunded status of our pension plans may adversely affect our operations, financial condition and liquidity.

We maintain qualified defined benefit pension plans. In addition, although we sold the New England Media Group in 2013 and the Regional Media Group in 2012, we retained pension assets and liabilities and postretirement obligations related to employees of those businesses. As a result, and although we have frozen participation and benefits under all but two of the qualified pension plans we maintain, our results of operations will be affected by the amount of income or expense we record for, and the contributions we are required to make to, these plans.

Pension income and expense is calculated using a number of actuarial valuations. These valuations reflect assumptions about mortality, as well as financial markets and other economic conditions, which may change based on changes in key economic indicators. The most significant year-end assumptions we use to estimate pension expense are the discount rate and the expected long-term rate of return on the plan assets. Our qualified defined benefit pension plans were underfunded by approximately \$264 million as of December 28, 2014. We are required to make contributions to our qualified defined benefit pension plans to comply with minimum funding requirements imposed by laws governing those plans. A decrease in the discount rate used to determine the liabilities for pension obligations may result in increased contributions.

Failure to achieve expected returns on plan assets driven by various factors, including a continued environment of low interest rates or sustained volatility and disruption in the stock and bond markets, could also result in an increase in the amount of cash we would be required to contribute to these pension plans. In addition, unfavorable changes in underlying assumptions or applicable laws or regulations could materially change the timing and amount of required plan funding. As a result, we may have less cash available for working capital and other corporate uses, which may have an adverse impact on our results of operations, financial condition and liquidity.

Our participation in multiemployer pension plans may subject us to liabilities that could materially adversely affect our results of operations, financial condition and cash flows.

We participate in, and make periodic contributions to, various multiemployer pension plans that cover many of our current and former union employees. Our required contributions to these plans could increase because of a shrinking contribution base as a result of the insolvency or withdrawal of other companies that currently contribute to these plans, the inability or failure of withdrawing companies to pay their withdrawal liability, low interest rates, lower than expected returns on pension fund assets or other funding deficiencies. Our withdrawal liability for any multiemployer pension plan will depend on the nature and timing of any triggering event and the extent of that plan's funding of vested benefits. If a multiemployer pension plan in which we participate has significant underfunded liabilities, such underfunding will increase the size of our potential withdrawal liability. In addition, under the Pension Protection Act of 2006, special funding rules apply to multiemployer pension plans that are classified as "endangered," "seriously endangered," or "critical" status. If plans in which we participate are in critical status, benefit reductions may apply and/or we could be required to make additional contributions. If, in the future, we elect to withdraw from these plans or if we trigger a partial withdrawal due to declines in contribution base units, additional liabilities would need to be recorded that could have an adverse effect on our business, results of operations, financial condition or cash flows.

We have recorded significant withdrawal liabilities with respect to multiemployer pension plans in which we formerly participated, primarily in connection with the sales of the New England and the Regional Media Groups. Until demand letters from some of the multiemployer plans' trustees are received, the exact amount of the withdrawal liability will not be fully known and, as such, a difference from the recorded estimate could have an adverse effect on our results of operations, financial condition and cash flows. In addition, in the event a mass withdrawal is deemed to have occurred at any of these plans, we may be required to make additional contributions under applicable law.

A significant number of our employees are unionized, and our business and results of operations could be adversely affected if labor agreements were to further restrict our ability to maximize the efficiency of our operations.

Approximately half of our full-time equivalent work force is unionized. As a result, we are required to negotiate the wages, salaries, benefits, staffing levels and other terms with many of our employees collectively. Our results could be adversely affected if future labor negotiations or contracts were to further restrict our ability to maximize the efficiency of our operations. If we are unable to negotiate labor contracts on reasonable terms, or if we were to experience labor unrest or other business interruptions in connection with labor negotiations or otherwise, our ability to produce and deliver our products could be impaired. In addition, our ability to make short-term adjustments to control compensation and benefits costs, change our strategy or otherwise adapt to changing business needs may be limited by the terms and duration of our collective bargaining agreements.

Our brand and reputation are key assets of the Company, and negative perceptions or publicity could adversely affect our business, financial condition and results of operations.

The New York Times brand is a key asset of the Company, and our continued success depends on our ability to preserve, grow and leverage the value of our brand. We believe that we have a very powerful and trusted brand with an excellent reputation for high-quality journalism and content. This reputation could be damaged by incidents that erode consumer trust. Our reputation could also be damaged by failures of third-party vendors we rely on in many contexts. To the extent consumers perceive the quality of our products to be less reliable or our reputation is damaged, our revenues and profitability could be adversely affected.

A significant increase in the price of newsprint, or significant disruptions in our newsprint supply chain, would have an adverse effect on our operating results.

The cost of raw materials, of which newsprint is the major component, represented approximately 6% of our total operating costs in 2014. The price of newsprint has historically been volatile and may increase as a result of

THE NEW YORK TIMES COMPANY – P. 9

various factors, including a reduction in the number of suppliers due to restructurings, bankruptcies and consolidations; declining newsprint supply as a result of paper mill closures and conversions to other grades of paper; and other factors that adversely impact supplier profitability, including increases in operating expenses caused by raw material and energy costs, and currency volatility.

In addition, we rely on our suppliers for deliveries of newsprint. The availability of our newsprint supply may be affected by various factors, including labor unrest, transportation issues and other disruptions that may affect deliveries of newsprint.

If newsprint prices increase significantly or we experience significant disruptions in the availability of our newsprint supply in the future, our operating results will be adversely affected.

Our debt agreements contain restrictions that limit our flexibility in operating our business.

Our debt agreements contain various covenants that limit our flexibility in operating our businesses, including our ability to engage in specified types of transactions. Subject to certain exceptions, these covenants restrict our ability and the ability of our subsidiaries to, among other things:

- incur or guarantee additional debt or issue certain preferred equity;
- pay dividends on or make distributions to holders of our common stock or make other restricted payments;
- create or incur liens on certain assets to secure debt;
- make certain investments, acquisitions or dispositions;
- consolidate, merge, sell or otherwise dispose of all or substantially all of our assets; and
- enter into certain transactions with affiliates.

Our credit ratings, as well as general macroeconomic conditions, may affect our liquidity by increasing borrowing costs and limiting our financing options.

Our long-term debt is currently rated below investment grade by Standard & Poor's and Moody's Investors Service. If our credit ratings remain below investment grade or are lowered further, borrowing costs for future long-term debt or short-term borrowing facilities may increase and our financing options, including our access to the unsecured borrowing market, would be limited. We may also be subject to additional restrictive covenants that would reduce our flexibility.

In addition, macroeconomic conditions, such as continued or increased volatility or disruption in the credit markets, could adversely affect our ability to refinance existing debt or obtain additional financing to support operations or to fund new acquisitions or other capital-intensive initiatives.

Our Class B Common Stock is principally held by descendants of Adolph S. Ochs, through a family trust, and this control could create conflicts of interest or inhibit potential changes of control.

We have two classes of stock: Class A Common Stock and Class B Common Stock. Holders of Class A Common Stock are entitled to elect 30% of the Board of Directors and to vote, with holders of Class B Common Stock, on the reservation of shares for equity grants, certain material acquisitions and the ratification of the selection of our auditors. Holders of Class B Common Stock are entitled to elect the remainder of the Board and to vote on all other matters. Our Class B Common Stock is principally held by descendants of Adolph S. Ochs, who purchased The Times in 1896. A family trust holds approximately 90% of the Class B Common Stock. As a result, the trust has the ability to elect 70% of the Board of Directors and to direct the outcome of any matter that does not require a vote of the Class A Common Stock. Under the terms of the trust agreement, the trustees are directed to retain the Class B Common Stock held in trust and to vote such stock against any merger, sale of assets or other transaction pursuant to which control of The Times passes from the trustees, unless they determine that the primary objective of the trust can be achieved better by the implementation of such transaction. Because this concentrated control could discourage others from initiating any potential merger, takeover or other change of control transaction that may otherwise be beneficial to our businesses, the market price of our Class A Common Stock could be adversely affected.

Our business may suffer if we cannot protect our intellectual property.

Our business depends on our intellectual property, including our valuable brands, content, services and internally developed technology. We believe our proprietary trademarks and other intellectual property rights are

important to our continued success and our competitive position. Unauthorized parties may attempt to copy or otherwise unlawfully obtain and use our content, services, technology and other intellectual property, and we cannot be certain that the steps we have taken to protect our proprietary rights will prevent any misappropriation or confusion among consumers and merchants, or unauthorized use of these rights.

Advancements in technology have made the unauthorized duplication and wide dissemination of content easier, making the enforcement of intellectual property rights more challenging. In addition, as our business and the risk of misappropriation of our intellectual property rights have become more global in scope, we may not be able to protect our proprietary rights in a cost-effective manner in a multitude of jurisdictions with varying laws.

If we are unable to procure, protect and enforce our intellectual property rights, including maintaining and monetizing our intellectual property rights to our content, we may not realize the full value of these assets, and our business and profitability may suffer. In addition, if we must litigate in the United States or elsewhere to enforce our intellectual property rights or determine the validity and scope of the proprietary rights of others, such litigation may be costly and divert the attention of our management.

We have been, and may be in the future, subject to claims of intellectual property infringement that could adversely affect our business.

We periodically receive claims from third parties alleging infringement, misappropriation or other violations of their intellectual property rights. These third parties often include patent holding companies seeking to monetize patents they have purchased or otherwise obtained through asserting claims of infringement or misuse. Even if we believe that these claims of intellectual property infringement are without merit, defending against the claims can be time-consuming, be expensive to litigate or settle, and cause diversion of management attention.

These intellectual property infringement claims may require us to enter into royalty or licensing agreements on unfavorable terms, use more costly alternative technology or otherwise incur substantial monetary liability.

Additionally, these claims may require us to significantly alter certain of our operations. The occurrence of any of these events as a result of these claims could result in substantially increased costs or otherwise adversely affect our business.

Acquisitions, divestitures and other transactions could adversely affect our costs, revenues, profitability and financial position.

In order to position our business to take advantage of growth opportunities, we conduct discussions, evaluate opportunities and enter into agreements for possible acquisitions, divestitures, investments and other transactions. We routinely evaluate our portfolio of businesses and may, as a result, buy or sell different properties. For example, in 2013, we completed the sale of the New England Media Group and our 49% equity interest in Metro Boston. We may also consider the acquisition of specific properties, businesses or technologies that fall outside our traditional lines of business and diversify our portfolio, including those that may operate in new and developing industries, if we deem such properties sufficiently attractive.

Acquisitions or divestitures affect our costs, revenues, profitability and financial condition. Acquisitions involve significant risks, including difficulties in integrating acquired operations, diversion of management resources, debt incurred in financing these acquisitions (including the related possible reduction in our credit ratings and increase in our cost of borrowing), differing levels of management and internal control effectiveness at the acquired entities and other unanticipated problems and liabilities. Competition for certain types of acquisitions, particularly digital properties, is significant. Even if successfully negotiated, closed and integrated, certain acquisitions or investments may prove not to advance our business strategy and may fall short of expected return on investment targets, which would adversely affect our business, results of operations and financial condition.

Legislative and regulatory developments may result in increased costs and lower revenues from our digital businesses. Our digital businesses are subject to government regulation in the jurisdictions in which we operate, and our websites, which are available worldwide, may be subject to laws regulating the Internet even in jurisdictions where we do not do business. We may incur increased costs necessary to comply with existing and newly adopted laws and regulations or penalties for any failure to comply. Revenues from our digital businesses could be adversely affected, directly or indirectly, in particular by existing or future laws and regulations relating to online privacy (including the evolving right to be forgotten) and the collection and use of consumer data in digital media.

Adverse results from litigation or governmental investigations can impact our business practices and operating results. From time to time, we are party to litigation and regulatory, environmental and other proceedings with governmental authorities and administrative agencies. See “Legal Proceedings” regarding certain matters. Adverse outcomes in lawsuits or investigations could result in significant monetary damages or injunctive relief that could adversely affect our results of operations or financial condition as well as our ability to conduct our business as it is presently being conducted.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our principal executive offices are located in our New York headquarters building in the Times Square area. The building was completed in 2007 and consists of approximately 1.54 million gross square feet, of which approximately 828,000 gross square feet of space have been allocated to us. We owned a leasehold condominium interest representing approximately 58% of the New York headquarters building until March 2009, when we entered into an agreement to sell and simultaneously lease back 21 floors, or approximately 750,000 rentable square feet, currently occupied by us (the “Condo Interest”). The sale price for the Condo Interest was \$225.0 million. We have an option exercisable in 2019 to repurchase the Condo Interest for \$250.0 million. The lease term is 15 years, and we have three renewal options that could extend the term for an additional 20 years. We continue to own a leasehold condominium interest in seven floors in our New York headquarters building, totaling approximately 216,000 rentable square feet that were not included in the sale-leaseback transaction, all of which are currently leased to third parties.

In addition, we have a printing and distribution facility with 570,000 gross square feet located in College Point, N.Y., on a 31-acre site owned by the City of New York for which we have a ground lease. We have an option to purchase the property at any time before the lease ends in 2019 for \$6.9 million. We also currently own other properties with an aggregate of approximately 2,200 gross square feet and lease other properties with an aggregate of approximately 269,200 rentable square feet in various locations.

P. 12 – THE NEW YORK TIMES COMPANY

ITEM 3. LEGAL PROCEEDINGS

We are involved in various legal actions incidental to our business that are now pending against us. These actions are generally for amounts greatly in excess of the payments, if any, that may be required to be made. It is the opinion of management after reviewing these actions with our legal counsel that the ultimate liability that might result from these actions would not have a material adverse effect on our Consolidated Financial Statements.

Newspaper and Mail Deliverers – Publishers’ Pension Fund

In September 2013, the Newspaper and Mail Deliverers - Publishers’ Pension Fund (the “Fund”) assessed a partial withdrawal liability to the Company in the amount of \$26 million for the plan years ending May 31, 2012 and 2013, an amount that was increased to approximately \$34 million in December 2014, when the Fund issued a revised partial withdrawal liability assessment for the plan year ending May 31, 2013. The Fund claims that when City & Suburban, a retail and newsstand distribution subsidiary of the Company and the largest contributor to the Fund, ceased operations in 2009, it triggered a decline of more than 70% in contribution base units in each of these two plan years. The Company disagrees with both the Fund’s determination that a partial withdrawal occurred and the methodology by which it calculated the withdrawal liability and has initiated arbitration proceedings. We do not believe that a loss is probable on this matter and have not recorded a loss contingency for the period ended December 28, 2014.

Pension Benefit Guaranty Corporation

In February 2014, the Pension Benefit Guaranty Corporation (“PBGC”) notified us that it believed the Company had a triggering event under Section 4062(e) of the Employee Retirement Income Security Act of 1974, as amended (“ERISA”), with respect to The Boston Globe Retirement Plan for Employees Represented by the Boston Newspaper Guild (the “Boston Globe Plan”) and The New York Times Companies Pension Plan on account of the Company’s sale of the New England Media Group.

In June 2014, the PBGC voluntarily withdrew its claim with respect to The New York Times Companies Pension Plan. In December 2014, Congress enacted major changes to Section 4062(e) of ERISA. In light of this amendment, the Company believes that it has no Section 4062(e) liability with respect to the Boston Globe Plan.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

EXECUTIVE OFFICERS OF THE REGISTRANT

Name	Age	Employed By Registrant Since	Recent Position(s) Held as of February 24, 2015
Arthur Sulzberger, Jr.	63	1978	Chairman (since 1997) and Publisher of The Times (since 1992); Chief Executive Officer (2011 to 2012); President and Chief Executive Officer (since 2012);
Mark Thompson	57	2012	Director-General, British Broadcasting Corporation (“BBC”) (2004 to 2012); Chief Executive, Channel 4 Television Corporation (2002 to 2004); and various positions of increasing responsibility at the BBC (1979 to 2001)
Michael Golden	65	1984	Vice Chairman (since 1997); President and Chief Operating Officer, Regional Media Group (2009 to 2012); Publisher of the International Herald Tribune (2003 to 2008); Senior Vice President (1997 to 2004)
James M. Follo	55	2007	Executive Vice President (since March 2013) and Chief Financial Officer (since 2007); Senior Vice President (2007 to March 2013); Chief Financial and Administrative Officer, Martha Stewart Living Omnimedia, Inc. (2001 to 2006)
R. Anthony Benten	51	1989	Senior Vice President, Finance (since 2008) and Corporate Controller (since 2007); Vice President (2003 to 2008); Treasurer (2001 to 2007)
Kenneth A. Richieri	63	1983	Executive Vice President (since March 2013) and General Counsel (since 2006); Senior Vice President (2007 to March 2013); Secretary (2008 to 2011); Vice President (2002 to 2007); Deputy General Counsel (2001 to 2005); Vice President and General Counsel, New York Times Digital (1999 to 2003)

PART II

ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES
MARKET INFORMATION

The Class A Common Stock is listed on the New York Stock Exchange. The Class B Common Stock is unlisted and is not actively traded.

The number of security holders of record as of February 19, 2015, was as follows: Class A Common Stock: 6,637; Class B Common Stock: 26.

In September 2013, we announced the initiation of a quarterly dividend in which both classes of our common stock participate equally. Since then, we have paid quarterly dividends of \$0.04 per share on the Class A and Class B Common Stock. We currently expect to continue to pay comparable cash dividends in the future, although changes in our dividend program will be considered by our Board of Directors in light of our earnings, capital requirements, financial condition and other factors considered relevant. In addition, our Board of Directors will consider restrictions in any existing indebtedness, such as the terms of our 6.625% senior unsecured notes due 2016, which restrict our ability to pay dividends. See also "Item 7 — Management's Discussion and Analysis of Financial Condition and Results of Operations — Executive Overview — Our Strategy" and "— Liquidity and Capital Resources — Third-Party Financing." The following table sets forth, for the periods indicated, the high and low closing sales prices for the Class A Common Stock as reported on the New York Stock Exchange.

Quarters	2014		2013	
	High	Low	High	Low
First Quarter	\$16.81	\$13.75	\$10.13	\$8.18
Second Quarter	17.26	14.64	11.06	8.73
Third Quarter	15.61	11.46	12.66	11.06
Fourth Quarter	13.61	11.22	15.47	11.94

ISSUER PURCHASES OF EQUITY SECURITIES⁽¹⁾

(1) On April 13, 2004, our Board of Directors authorized repurchases in an amount up to \$400 million of our Class A Common Stock. As of December 28, 2014, approximately \$91.4 million remained under this authorization. On January 13, 2015, the Board of Directors terminated this authorization and approved a new repurchase authorization of \$101.1 million, equal to the cash proceeds received by the Company from an exercise of warrants. As of February 19, 2015, approximately \$101.1 million remained under this authorization. Our Board of Directors has authorized us to purchase shares from time to time as market conditions permit. There is no expiration date

with respect to this authorization.

THE NEW YORK TIMES COMPANY – P. 15

PERFORMANCE PRESENTATION

The following graph shows the annual cumulative total stockholder return for the five fiscal years ending December 28, 2014, on an assumed investment of \$100 on December 27, 2009, in the Company, the Standard & Poor's S&P 400 MidCap Stock Index and the Standard & Poor's S&P 1500 Publishing and Printing Index. Stockholder return is measured by dividing (a) the sum of (i) the cumulative amount of dividends declared for the measurement period, assuming reinvestment of dividends, and (ii) the difference between the issuer's share price at the end and the beginning of the measurement period, by (b) the share price at the beginning of the measurement period. As a result, stockholder return includes both dividends and stock appreciation.

Stock Performance Comparison Between the S&P 400 Midcap Index, S&P 1500 Publishing & Printing Index and The New York Times Company's Class A Common Stock

ITEM 6. SELECTED FINANCIAL DATA

The Selected Financial Data should be read in conjunction with “Item 7 — Management’s Discussion and Analysis of Financial Condition and Results of Operations” and the Consolidated Financial Statements and the related Notes in Item 8. The results of operations for the New England Media Group, which was sold in 2013, as well as for the Regional Media Group and the About Group, which were sold in 2012, have been presented as discontinued operations for all periods presented (see Note 13 of the Notes to the Consolidated Financial Statements). The pages following the table show certain items included in Selected Financial Data. All per share amounts on those pages are on a diluted basis. Fiscal year 2012 comprises 53 weeks and all other fiscal years presented in the table below comprise 52 weeks.

The items below are included in the Selected Financial Data.

2014

The items below had a net unfavorable effect on our results from continuing operations of \$35.1 million, or \$.22 per share:

• \$36.7 million of expenses (\$21.7 million after tax, or \$.13 per share) for non-operating retirement costs.

• \$36.1 million pre-tax charge (\$21.4 million after tax, or \$.13 per share) for severance costs.

• \$21.1 million income tax benefit (\$.13 per share) primarily due to reductions in the Company's reserve for uncertain tax positions.

•

Edgar Filing: NEW YORK TIMES CO - Form 10-K

a \$9.5 million pre-tax pension settlement charge (\$5.7 million after tax, or \$.04 per share) in connection with lump-sum payments made under an immediate pension benefits offer to certain former employees.

a \$9.2 million pre-tax charge (\$5.9 million after tax or \$.04 per share) for the impairment related to the Company's investment in a joint venture.

a \$2.6 million pre-tax charge (\$1.5 million after tax, or \$.01 per share) for the early termination of a distribution agreement, which will result in distribution cost savings for the Company in future periods.

P. 18 – THE NEW YORK TIMES COMPANY

2013

The items below had a net unfavorable effect on our results from continuing operations of \$25.2 million, or \$.16 per share:

\$20.8 million of expenses (\$12.3 million after tax, or \$.08 per share) for non-operating retirement costs.

• \$12.4 million pre-tax charge (\$7.3 million after tax, or \$.05 per share) for severance costs.

• \$6.2 million pre-tax charge (\$3.7 million after tax, or \$.02 per share) for a partial withdrawal obligation under a multiemployer pension plan.

• \$3.2 million pre-tax pension settlement charge (\$1.9 million after tax, or \$.01 per share) in connection with lump-sum payments under an immediate pension benefit offer to certain former employees.

2012 (53-week fiscal year)

The items below had a net favorable effect on our results from continuing operations of \$69.2 million, or \$.45 per share:

• \$220.3 million pre-tax gain (\$134.7 million after tax, or \$.87 per share) on the sales of our ownership interest in Indeed.com and our remaining units in Fenway Sports Group.

• \$47.7 million pre-tax pension settlement charge (\$27.7 million after tax, or \$.18 per share) in connection with lump-sum payments made under an immediate pension benefit offer to certain former employees.

\$44.5 million of expenses (\$25.9 million after tax, or \$.17 per share) for non-operating retirement costs.

• \$12.3 million pre-tax charge (\$7.2 million after tax, or \$.04 per share) for severance costs.

• \$5.5 million pre-tax, non-cash charge (\$3.2 million after tax, or \$.02 per share) for the impairment of certain investments, primarily related to our investment in Ongo Inc., a consumer service for reading and sharing digital news and information from multiple publishers.

• \$2.6 million pre-tax charge (\$1.5 million after tax, or \$.01 per share) in connection with a legal settlement.

2011

The items below had a net unfavorable effect on our results from continuing operations of \$27.9 million, or \$.19 per share:

• \$71.2 million pre-tax gain (\$41.4 million after tax, or \$.27 per share) from the sales of 390 of our units in Fenway Sports Group and a portion of our interest in Indeed.com.

• a \$46.4 million pre-tax charge (\$27.6 million after tax, or \$.18 per share) in connection with the prepayment of all \$250.0 million aggregate principal amount of our 14.053% senior unsecured notes.

\$43.6 million of expenses (\$25.8 million after tax, or \$.17 per share) for non-operating retirement costs.

• \$10.0 million pre-tax charge (\$5.9 million after tax, or \$.04 per share) for severance costs.

• \$7.5 million pre-tax charge (\$4.7 million after tax, or \$.03 per share) for the impairment of assets related to certain assets held for sale, primarily of Baseline, Inc. (“Baseline”), an online subscription database and research service for information on the film and television industries and a provider of premium film and television data to websites.

• \$4.5 million pre-tax charge (\$2.6 million after tax, or \$.02 per share) for a retirement and consulting agreement in connection with the retirement of our former chief executive officer.

• a \$4.2 million estimated pre-tax charge (\$2.7 million after tax, or \$.02 per share) for a pension withdrawal obligation under a multiemployer pension plan at The Boston Globe (the “Globe”).

2010

The items below had a net unfavorable effect on our results from continuing operations of \$28.6 million, or \$.18 per share:

\$40.5 million of expenses (\$23.8 million after tax, or \$.16 per share) for non-operating retirement costs.

a \$12.7 million pre-tax gain from the sale of an asset at one of the paper mills in which we have an investment. Our share of the pre-tax gain, after eliminating the noncontrolling interest portion, was \$10.2 million (\$6.5 million after tax, or \$.04 per share).

- an \$11.4 million charge (\$.07 per share) for the reduction in future tax benefits for retiree health benefits resulting from the federal health-care legislation enacted in 2010.

a \$9.1 million pre-tax gain (\$5.4 million after tax, or \$.04 per share) from the sale of 50 of our units in Fenway Sports Group.

a \$6.3 million pre-tax charge (\$3.7 million after tax, or \$.02 per share) for an adjustment to estimated pension withdrawal obligations under several multiemployer pension plans at the Globe.

a \$2.7 million pre-tax charge (\$1.6 million after tax, or \$.01 per share) for severance costs.

P. 20 – THE NEW YORK TIMES COMPANY

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis provides information that management believes is relevant to an assessment and understanding of our consolidated financial condition as of December 28, 2014, and results of operations for the three years ended December 28, 2014. This item should be read in conjunction with our Consolidated Financial Statements and the related Notes included in this Annual Report.

EXECUTIVE OVERVIEW

We are a global media organization that includes newspapers, digital businesses and investments in paper mills. We currently have one reportable segment comprising businesses that include The Times, INYT, NYTimes.com, international.nytimes.com and related businesses.

We generate revenues principally from circulation and advertising. Other revenues primarily consist of revenues from news services/syndication, digital archives, office rental income, e-commerce and conferences/events. Our main operating costs are employee-related costs and raw materials, primarily newsprint.

In the accompanying analysis of financial information, we present certain information derived from consolidated financial information but not presented in our financial statements prepared in accordance with generally accepted accounting principles in the United States of America ("GAAP"). We are presenting in this report supplemental non-GAAP financial performance measures that exclude depreciation, amortization, severance, non-operating retirement costs and certain identified special items, as applicable. These non-GAAP financial measures should not be considered in isolation from or as a substitute for the related GAAP measures, and should be read in conjunction with financial information presented on a GAAP basis. For further information and reconciliations of these non-GAAP measures to the most directly comparable GAAP items, respectively, diluted (loss)/earnings per share, operating profit and operating costs, see "Results of Operations — Non-GAAP Financial Measures."

2014 Financial Highlights

In 2014, diluted earnings per share from continuing operations were \$0.21, compared with \$0.36 for 2013. Diluted earnings per share from continuing operations excluding severance, non-operating retirement costs and special items discussed below (or "adjusted diluted earnings per share," a non-GAAP measure) were \$0.43 for 2014, compared with \$0.52 for 2013.

Operating profit in 2014 was \$91.9 million, compared with \$156.1 million for 2013. The decline was primarily driven by investment spending related to the Company's strategic initiatives and severance expense. Operating profit before depreciation, amortization, severance, non-operating retirement costs and special items discussed below (or "adjusted operating profit," a non-GAAP measure) for 2014 was \$256.3 million, compared with \$277.1 million for 2013.

Total revenues increased slightly in 2014 to \$1.59 billion, compared with \$1.58 billion in 2013. This was driven by growth in circulation and other revenues, partially offset by declines in advertising revenues. Compared with 2013, circulation revenues increased 1.5% in 2014, as digital subscription growth and a print home-delivery price increase at The Times offset a decline in the number of print copies sold. Circulation revenues from our digital-only subscription packages increased 13.5% in 2014, compared with 2013. Paid subscribers to digital-only subscription packages totaled approximately 910,000 as of December 28, 2014, a nearly 20% increase compared with year-end 2013.

Advertising revenues remained under pressure during 2014 due to continuing secular trends. Total advertising revenues decreased 0.7% in 2014 compared with 2013, reflecting a 4.7% decrease in print advertising revenues and an 11.9% increase in digital advertising revenues.

Compared with 2013, other revenues increased 3.6% in 2014, driven by our e-commerce business and digital archives. Operating costs in 2014 increased 5.2% to \$1.48 billion, compared with \$1.41 billion in 2013. The increase was primarily due to investment spending related to the Company's strategic initiatives as well as severance expense associated with workforce reductions, partially offset by efficiencies in print distribution. Operating costs before depreciation, amortization, severance and non-operating retirement costs discussed below (or "adjusted operating costs," a non-GAAP measure) increased 2.5% to \$1.33 billion in 2014, compared with \$1.30 billion in 2013.

Non-operating retirement costs increased to \$36.7 million in 2014 from \$20.8 million in 2013, driven by lower expected returns on pension assets, higher retiree medical costs and higher pension interest cost.

Outlook

We remain in a challenging business environment, reflecting an increasingly competitive and fragmented landscape, and visibility remains limited.

For the first quarter of 2015, we expect circulation revenues to increase at a rate similar to that of the fourth quarter of 2014, driven by the benefit from our digital subscription initiatives and from the most recent home-delivery price increase, partially offset by print weakness, particularly in newsstand volume. We expect the number of net new digital subscriber additions in the first quarter of 2015 to be in the mid-30,000s.

We expect advertising trends to remain challenging and subject to significant month-to-month volatility. In the first quarter of 2015, we expect advertising revenues to decrease in the mid-single digits compared with the first quarter of 2014, in part due to more challenging year-over-year comparisons, particularly in print. We expect digital advertising revenue to increase in the low double digits in that period.

We expect other revenues to grow in the mid-single digits in the first quarter of 2015 compared with the first quarter of 2014.

We expect operating costs and adjusted operating costs to be roughly flat in the first quarter of 2015 compared with the first quarter of 2014. We also believe that recent expense management efforts, including workforce reductions announced in the fourth quarter of 2014, should allow us to maintain or slightly lower our operating costs and adjusted operating costs in 2015, relative to 2014 levels.

We expect non-operating retirement costs in the first quarter of 2015 to be approximately \$10 million compared with \$8.9 million in the first quarter of 2014 due to higher multiemployer pension withdrawal costs.

We also expect the following on a pre-tax basis in 2015:

• Results from joint ventures: breakeven to \$5 million,

• Depreciation and amortization: \$60 million to \$65 million,

• Interest expense, net: \$40 million to \$45 million, and

• Capital expenditures: \$35 million to \$45 million.

Business Environment

We believe that a number of factors and industry trends have had, and will continue to have, an adverse effect on our business and prospects. These include the following:

Competition in our industry

We operate in a highly competitive environment. Our print and digital products compete for advertising and circulation revenue with both traditional and new content providers, and this competition has intensified as a result of new digital media technologies and new media providers offering news and other online content. Competition among companies offering online content is intense; new competitors can quickly emerge, and some competitors may have greater resources or better competitive positions than we do.

Our ability to compete effectively depends, among other things, on our ability to continue delivering high-quality journalism and content that is interesting and relevant to our audience; the popularity, ease of use and performance of our products, and our ability to monetize them; our ability to attract, retain and motivate talented journalists and other employees to develop products that users find engaging; and our ability to manage and grow our business in a cost-effective manner.

Continuing shift to digital over print

Circulation revenue is a significant source of revenue for us and an increasingly important driver as the overall composition of our revenues has shifted in response to the transformations in our industry. The largest portion of our circulation revenue is currently from traditional print products, where we have experienced declining print circulation volume in recent years. This is due to, among other factors, increased competition from digital platforms and sources other than traditional newspapers (which are often free to users), higher subscription and single-copy rates and a growing preference among some consumers for receiving their news from a variety of sources.

Advances in technology have led to an increasing popularity in the distribution of news and other content through smartphones, tablets and other mobile devices, reshaping consumer behavior and expectations for consuming news and other information. Our ability to retain and continue to build on our digital subscription base and audience for our digital products depends on continued market acceptance of our evolving digital subscription model, consumer behavior, pricing, available alternatives from current and new competitors, continued delivery of high-quality journalism and content that is interesting and relevant to users and other factors.

In addition, the advertising industry continues to experience a secular shift toward digital advertising, which is less expensive and can offer more directly measurable returns than traditional print media. The digital advertising marketplace has become increasingly complex and fragmented, particularly as digital advertising networks and exchanges, real-time bidding and other programmatic-buying channels that allow advertisers to buy audience at scale play a more significant role. Competition from a wide variety of digital media and services, many of which charge lower rates than us, and a significant increase in inventory in the digital marketplace have affected, and will likely continue to affect, our ability to attract and retain advertisers and to maintain or increase our advertising rates.

Economic conditions

Global, national and local economic conditions affect various aspects of our business, particularly advertising spending, which drives a significant portion of our revenues. The level of advertising sales in any period may be affected by advertisers' decisions to increase or decrease their advertising expenditures in response to anticipated consumer demand and general economic conditions. Changes in spending patterns and priorities, including shifts in marketing strategies and budget cuts of key advertisers, in response to economic conditions, have depressed and may continue to depress our advertising revenues.

Fixed costs

A significant portion of our costs are fixed, and therefore we are limited in our ability to reduce these costs in the short term. Our most significant costs are employee-related costs and raw materials, which together accounted for approximately 50% of our total operating costs in 2014. Changes in employee-related costs and the price and availability of newsprint can materially affect our operating results.

For a discussion of these and other factors that could affect our business, results of operations and financial condition, see "Forward-Looking Statements" and "Item 1A — Risk Factors."

Our Strategy

Our business is operating during a period of transformation for our industry and amidst uneven economic conditions. We anticipate that the challenges we currently face will continue, and we believe that the following elements are key to our efforts to address them.

Strengthening and extending The New York Times brand through our digital offerings

Our priority is to better position our organization for innovation and growth, while maintaining a robust news-gathering operation capable of continuing to provide the high-quality news and information that sets our Company apart. As we continue to face a challenging advertising environment, we are focused on building consumer revenues. Our paid digital subscription model has created a meaningful revenue stream that has partially offset declines in our advertising and print circulation businesses. The continued growth in our digital subscriber base in 2014 underscores the willingness of our readers and users to pay for the high-quality journalism we provide across multiple platforms.

We aim to continue building our digital subscriber base by increasing engagement and subscription opportunities. In 2014, we introduced several new digital products, including NYT Now, Times Premier and NYT Cooking.

We believe we have a very powerful and trusted brand that, because of the quality of our journalism, attracts educated, affluent and influential audiences. We are continuing to focus on leveraging our brand and developing and innovating our digital advertising offerings. In early 2014, we introduced Paid Posts, our native advertising product, which has contributed to digital advertising growth. We will also continue to build on the strength of The New York Times brand to expand our presence into new products, markets and endeavors, such as expanding our conferences business and developing our e-commerce business.

As we continue to look for ways to optimize and monetize our products and services, we remain committed to creating quality content and a quality user experience, regardless of the distribution model of news and information.

Managing our expenses

Over the past few years, we have focused on realigning our cost base to ensure that we are operating our businesses efficiently, while maintaining our commitment to investing in high-quality content and achieving our long-term strategy. During the fourth quarter of 2014, we announced workforce reductions that we expect will allow us to strengthen our operating efficiencies while continuing to safeguard the quality of our journalism and invest in our digital products and strategic initiatives. See Note 7 of our Consolidated Financial Statements for additional information regarding these workforce reductions. We will endeavor to be diligent in reducing expenses and managing legacy costs going forward, but will also remain prepared to invest where appropriate.

Strengthening our liquidity

We have continued to strengthen our liquidity position and we remain focused on further de-leveraging and de-risking our balance sheet. As of December 28, 2014, we had cash, cash equivalents and marketable securities of approximately \$981 million and total debt and capital lease obligations of approximately \$650 million. Accordingly, our cash, cash equivalents and marketable securities exceeded total debt and capital lease obligations by approximately \$331 million. We believe our cash balance and cash provided by operations, in combination with other sources of cash, will be sufficient to meet our financing needs over the next 12 months.

In September 2013, we announced the initiation of a quarterly dividend in which both classes of our common stock participate equally. We believe this quarterly dividend allows us to return capital to our stockholders while also maintaining the financial flexibility necessary to continue to invest in our transformation and growth initiatives. Given current conditions and continued volatility in advertising revenues, we believe it is in the best interests of the Company to maintain a conservative balance sheet and a prudent view of our cash flow going forward.

Managing our retirement-related costs

We remain focused on managing the underfunded status of our pension plans and adjusting the size of our pension obligations relative to the size of our Company. Our qualified pension plans were underfunded (meaning the present value of future obligations exceeded the fair value of plan assets) as of December 28, 2014, by approximately \$264 million, compared with approximately \$80 million as of December 29, 2013. The increase was driven by a decline in interest rates and new mortality tables adopted by the Society of Actuaries during the fourth quarter of 2014, partially offset by solid returns on pension assets. The net impact to our qualified pension plans resulting from the new mortality assumptions was an increase of \$104 million. We made contributions of approximately \$15 million to certain qualified pension plans in 2014, compared with approximately \$74 million in 2013. We expect contributions in 2015 to total approximately \$9.0 million to satisfy minimum funding requirements.

We have taken steps over the last few years as part of our ongoing strategy to address our pension obligations, including freezing accruals under the qualified defined benefit pension plans that cover both our non-union employees and those covered by collective bargaining agreements. We have also offered an immediate pension benefit offer in the form of lump-sum payments to certain former employees and we will continue to look for ways to reduce the size of our pension obligations.

While we have made significant progress in our liability-driven investment strategy to reduce the funding volatility of our qualified pension plans, the size of our pension plan obligations relative to the size of our current operations will continue to have a significant impact on our reported financial results. We expect to continue to experience volatility in our retirement-related costs, including pension, multiemployer pension and retiree medical costs. In 2014, our retirement-related costs increased by approximately \$16 million to \$37 million (excluding a \$9.5 million pension settlement charge in 2014), due principally to a lower assumed return on pension plan assets resulting from a shift in asset mix to bonds from equity, higher retiree medical costs and higher pension interest costs. For 2015,

P. 24 – THE NEW YORK TIMES COMPANY

we expect retiree medical costs to be lower due to plan amendments that will reduce the Company's portion of premiums paid.

Since the first quarter of 2014, we have provided supplemental non-GAAP information on adjusted diluted earnings per share, adjusted operating costs and adjusted operating profit, in each case adjusted to exclude non-operating retirement costs. We believe that this supplemental information helps clarify how the employee benefit costs of our principal plans affect our financial position and how they may affect future operating performance, allowing for a better long-term view of the business. See "Results of Operations — Non-GAAP Financial Measures" for more information.

THE NEW YORK TIMES COMPANY – P. 25

RESULTS OF OPERATIONS

Overview

Fiscal years 2014 and 2013 each comprise 52 weeks and fiscal year 2012 comprises 53 weeks. The effect of the 53rd week (“additional week”) on revenues and operating costs is discussed below. The following table presents our consolidated financial results:

(In thousands)	Years Ended			% Change	
	December 28, 2014 (52 weeks)	December 29, 2013 (52 weeks)	December 30, 2012 (53 weeks)	14-13	13-12
Revenues					
Circulation	\$836,822	\$824,277	\$795,037	1.5	3.7
Advertising	662,315	666,687	711,829	(0.7)	(6.3)

Net income attributable to The New York Times Company common stockholders	\$33,307	\$65,105	\$135,847	(48.8)	(52.1)

* Represents an increase or decrease in excess of 100%.

Revenues

Circulation, advertising and other revenues were as follows:

(In thousands)	Years Ended			% Change	
	December 28, 2014 (52 weeks)	December 29, 2013 (52 weeks)	December 30, 2012 (53 weeks)	14-13	13-12
Circulation	\$836,822	\$ 824,277	\$ 795,037	1.5	3.7
Advertising	662,315	666,687	711,829	(0.7)	(6.3)
Other	89,391	86,266	88,475	3.6	(2.5)
Total	\$1,588,528	\$ 1,577,230	\$ 1,595,341	0.7	(1.1)

Circulation Revenues

Circulation revenues are based on the number of copies of the printed newspaper (through home-delivery subscriptions and single-copy and bulk sales) and digital subscriptions sold and the rates charged to the respective customers. Total circulation revenues consist of revenues from our print and digital products, including our digital-only subscription packages, e-readers and replica editions.

Circulation revenues increased in 2014 compared with 2013 primarily due to growth in our digital subscription base and the increase in print home-delivery prices at The Times, offset by a reduction in the number of print copies sold. Revenues from our digital-only subscription packages, e-readers and replica editions were \$169.3 million in 2014 compared with \$149.1 million in 2013, an increase of 13.5%.

Circulation revenues increased in 2013 compared with 2012 primarily due to growth in our digital subscription base and the increase in print home-delivery prices at The Times, offset by a reduction in the number of print copies sold and the effect of the additional week in 2012. Revenues from our digital-only subscription packages, e-readers and replica editions were \$149.1 million in 2013 compared with \$111.7 million in 2012, an increase of 33.5%.

Advertising Revenues

In the fourth quarter of 2014, the Company reclassified the categories under which advertising revenues are disclosed, including prior period information. Display advertising revenue is principally from advertisers promoting products, services or brands, such as financial institutions, movie studios, department stores, American and international fashion and technology in The Times and INYT. Classified advertising revenue includes line-ads sold in the major categories of real estate, help wanted, automotive and other. Other advertising revenue primarily includes creative services fees associated with our branded content studio; revenue from preprinted advertising, also known as free-standing inserts; revenue generated from branded bags in which our newspapers are delivered; and advertising revenues from our News Services business.

Advertising revenues (print and digital) by category were as follows:

(In thousands)	Years Ended			% Change	
	December 28, 2014 (52 weeks)	December 29, 2013 (52 weeks)	December 30, 2012 (53 weeks)	14-13	13-12
Display	\$606,838	\$609,920	\$649,755	(0.5)	(6.1)
Classified	36,689	37,453	40,922	(2.0)	(8.5)
Other	18,788	19,314	21,152	(2.7)	(8.7)
Total	\$662,315	\$666,687	\$711,829	(0.7)	(6.3)

Below is a percentage breakdown of 2014, 2013 and 2012 advertising revenues (print and digital):

	Display	Classified	Other	Total	
2014	91	% 6	% 3	% 100	%
2013	91	% 6	% 3	% 100	%
2012	91	% 6	% 3	% 100	%

Advertising revenues are primarily determined by the volume, rate and mix of advertisements. Advertising spending, which drives a significant portion of revenues, is sensitive to economic conditions and affected by the continuing transformation of our industry. During 2014, advertising revenues were affected by the ongoing secular shift from print to digital and continued to reflect changes in the spending patterns and marketing strategies of our advertisers as well as an increasingly complex and fragmented digital advertising marketplace. The market for standard web-based digital display advertising continues to experience challenges, due to an abundance of available advertising inventory and a shift toward automation, including digital advertising networks and exchanges, real-time bidding and other programmatic-buying channels that allow advertisers to buy audience at scale, which has led to downward pricing pressure.

In 2014, total advertising revenues decreased primarily due to lower print advertising revenues across most advertising categories. Print advertising revenues, which represented 73% of total advertising revenues, declined 4.7% in 2014 compared with 2013, mainly due to weakness in display advertising. This weakness resulted from reductions primarily in the technology, entertainment and corporate categories. The decline was partially offset by an increase in the financial services, advocacy and international fashion categories.

Digital advertising revenues, which represented 27% of total advertising revenues, increased 11.9% in 2014 compared with 2013 due to an increase in display advertising, partially offset by a decrease in classified advertising revenues. The increase in display advertising primarily resulted from the introduction of Paid Posts and from increases in the technology, telecommunications and media categories, partially offset by declines mainly in the financial services and entertainment categories.

In 2013, total advertising revenues declined mainly due to weakness in display and classified advertising. This weakness resulted from advertisers reducing spending in the face of uneven economic conditions, primarily in the entertainment, financial services and travel categories. The uncertain economic environment, coupled with secular changes in our industry, contributed to declines in total classified advertising revenues, primarily in the real estate, automotive and help wanted categories, partially offset by growth in the telecommunications and corporate categories.

Other Revenues

Other revenues consist primarily of revenues from news services/syndication, digital archives, office rental income, e-commerce and conferences/events.

Other revenues increased in 2014 compared with 2013 driven by higher revenues from our e-commerce business and digital archives.

Other revenues decreased in 2013 compared with 2012, mainly due to our exit from the education business at the end of 2012.

Operating Costs

Operating costs were as follows:

(In thousands)	Years Ended			% Change	
	December 28, 2014 (52 weeks)	December 29, 2013 (52 weeks)	December 30, 2012 (53 weeks)	14-13	13-12
Production costs:					
Raw materials	\$88,958	\$92,886	\$106,381	(4.2)	(12.7)
Wages and benefits	357,573	332,085	331,321	7.7	0.2
Other	197,464	201,942	213,616	(2.2)	(5.5)
Total production costs	643,995	626,913	651,318	2.7	(3.7)
Selling, general and administrative costs	761,055	706,354	711,112	7.7	(0.7)
Depreciation and amortization	79,455	78,477	78,980	1.2	(0.6)
Total operating costs	\$1,484,505	\$1,411,744	\$1,441,410	5.2	(2.1)

The components of operating costs as a percentage of total operating costs were as follows:

Components of operating costs as a percentage of total operating costs	Years Ended

Total	93	%90	%90	%

Production Costs

Production costs increased in 2014 compared with 2013 primarily due to higher wages and benefits (approximately \$25 million), offset in part by lower raw materials expense (approximately \$4 million). Newsprint expense declined 5.5% in 2014 compared with 2013, with 4.1% from lower consumption and 1.4% from lower pricing. Compensation costs increased mainly due to hiring related to strategic initiatives.

Production costs decreased in 2013 compared with 2012 primarily due to lower raw materials expense (approximately \$13 million), mainly newsprint, outside printing costs (approximately \$9 million) and pension expense (approximately \$3 million), offset in part by higher compensation costs (approximately \$4 million). Newsprint expense declined 16.2% in 2013, with 9.8% from lower consumption and 6.4% from lower pricing. Cost savings from contract negotiations mainly contributed to lower outside printing costs. Compensation costs increased

mainly due to new hires related to our digital initiatives and lower capitalized salary costs, offset by the additional week in 2012.

Selling, General and Administrative Costs

Selling, general and administrative costs increased in 2014 compared with 2013 primarily due to severance expense associated with workforce reductions as well as higher compensation and benefits (approximately \$58 million) and promotion costs (approximately \$7 million), offset by lower distribution costs (\$14 million). Benefits expense was higher mainly due to higher retirement costs. Promotion costs were higher mainly due to the launch of our new digital products and print circulation marketing. Lower distribution costs were mainly due to fewer print copies produced and transportation efficiency.

Selling, general and administrative costs decreased in 2013 compared with 2012 primarily due to lower pension expense (approximately \$18 million) and salaries and wage expenses (approximately \$10 million) offset by higher other compensation costs (approximately \$13 million). Compensation costs increased primarily due to new hires related to digital initiatives and annual salary merit increases.

Other Items

Early Termination Charge

During 2014, we recorded a \$2.6 million charge for the early termination of a distribution agreement, which we expect will result in distribution cost savings for the Company in future periods.

Reserve for Uncertain Tax Positions

During 2014, we recorded a \$21.1 million income tax benefit primarily due to a reduction in the Company's reserve for uncertain tax positions.

Pension Settlement Charges

As part of our strategy to reduce our pension obligations and the resulting volatility of our overall financial condition, during 2014, 2013 and 2012, we offered lump-sum payments to certain former employees participating in both our qualified and non-qualified pension plans. Each lump-sum payment offer resulted in pension settlement charges due to the acceleration of the recognition of the accumulated unrecognized actuarial loss.

2014

In the second quarter of 2014, we recorded a \$9.5 million pension settlement charge in connection with lump-sum payments made to certain former employees who participated in certain non-qualified pension plans. These lump-sum payments totaled approximately \$24 million and were paid out of Company cash. The effect of this lump-sum payment offer was to reduce our pension obligations by approximately \$32 million.

2013

In the fourth quarter of 2013, we recorded a \$3.2 million pension settlement charge in connection with lump-sum payments made to certain former employees who participated in certain non-qualified pension plans. These lump-sum payments totaled approximately \$11 million and were paid out of Company cash. The effect of this lump-sum payment offer was to reduce our pension obligations by approximately \$13 million.

2012

In the fourth quarter of 2012, we recorded a \$47.7 million pension settlement charge in connection with lump-sum payments made to certain former employees who participated in The New York Times Companies Pension Plan. These lump-sum payments totaled approximately \$112 million and were paid out of the existing assets of the plan. The effect of this lump-sum payment offer was to reduce our pension obligations by approximately \$30 million.

Multiemployer Pension Plan Withdrawal Expense

Over the past few years, certain events, such as amendments to various collective bargaining agreements and the sales of the New England Media Group and the Regional Media Group, resulted in withdrawals from multiemployer pension plans. These actions, along with a reduction in covered employees, have resulted in us estimating withdrawal liabilities to certain multiemployer pension plans for our proportionate share of any unfunded vested benefits.

Our multiemployer pension plan withdrawal liability was approximately \$116 million as of December 28, 2014 and \$119 million as of December 29, 2013. This liability represents the present value of the obligations related to complete and partial withdrawals that have already occurred, as well as an estimate of future partial withdrawals that we considered probable and reasonably estimable. For those plans that have yet to provide us with a demand letter, the actual liability will not be fully known until they complete a final assessment of the withdrawal liability and issue a demand to us. Therefore, the estimate of our multiemployer pension plan liability will be adjusted as more information becomes available that allows us to refine our estimates.

2013

In the third quarter of 2013, we recorded an estimated charge of \$6.2 million related to a partial withdrawal obligation under a multiemployer pension plan.

2012

There were nominal charges in 2012 for withdrawal obligations related to our multiemployer pension plans.

Advertising Expenses

Advertising expenses were \$89.5 million, \$86.0 million, and \$83.2 million for December 28, 2014, December 29, 2013 and December 30, 2012 respectively.

Capitalized Computer Software Costs

Capitalized computer software costs (included in depreciation expense) were \$29.4 million, \$27.4 million, and \$22.5 million for December 28, 2014, December 29, 2013 and December 30, 2012 respectively.

Other Expense

2012

In 2012, we recorded a \$2.6 million charge in connection with a legal settlement.

NON-OPERATING ITEMS

Gain on Sale of Investments

In the fourth quarter of 2012, Indeed.com, a search engine for jobs in which we had an ownership interest, was sold. The proceeds from the sale of our interest were approximately \$167 million and we recognized a pre-tax gain of \$164.6 million.

In the first quarter of 2012, we sold 100 of our units in Fenway Sports Group for an aggregate price of \$30.0 million, resulting in a pre-tax gain of \$17.8 million, and in the second quarter of 2012, we sold our remaining 210 units for an aggregate price of \$63.0 million, resulting in a pre-tax gain of \$37.8 million.

Impairment of Investments

In 2012, we recorded impairment charges of \$5.5 million to reduce the carrying value of certain investments to fair value. The impairment charges were primarily related to our investment in Ongo Inc., a consumer service for reading and sharing digital news and information from multiple publishers.

(Loss)/Income from Joint Ventures

As of December 28, 2014, we had investments in paper mills that were accounted for under the equity method (Malbaie and Madison). Our proportionate share of the operating results of these investments is recorded in “(Loss)/income from joint ventures” in our Consolidated Statements of Operations. See Note 5 of the Notes to the Consolidated Financial Statements for additional information regarding these investments.

During the fourth quarter of 2014, we recognized an impairment charge of \$9.2 million for one of our investments, Madison Paper Industries. Our proportionate share of the loss was \$4.7 million after adjusting for tax and the allocation of the loss to the non-controlling interest. See Note 5 of the Notes to the Consolidated Financial Statements for additional information.

In 2014, we had a loss from joint ventures of \$8.4 million compared with a loss of \$3.2 million in 2013.

In the fourth quarter of 2013, as part of the sale of the New England Media Group, we sold our 49% equity interest in Metro Boston, and classified the results as discontinued operations for all periods presented. See Note 13 of the Notes to the Consolidated Financial Statements for additional information.

In 2013, we had a loss from joint ventures of \$3.2 million compared with income of \$2.9 million in 2012. Joint venture results in 2013 were primarily due to lower results for the paper mills in which we have an investment.

Interest Expense, Net

Interest expense, net, was as follows:

(In thousands)	Years Ended			
	December 28, 2014	December 29, 2013	December 30, 2012	
Cash interest expense	\$51,877	\$52,913	\$58,291	
Premium on debt repurchases	2,538	2,127	428	
Amortization of debt costs and discount on debt	4,651	4,548	4,516	
Capitalized interest	(152) —	(17)
Interest income	(5,184) (1,515) (410)
Total interest expense, net	\$53,730	\$58,073	\$62,808	

Interest expense, net decreased in 2014 compared with 2013 mainly due to a lower level of debt outstanding as a result of debt repurchases made in 2013 and higher interest income.

Interest expense, net decreased in 2013 compared with 2012 due to a lower level of debt outstanding as a result of repurchases and, in the fourth quarter of 2012, a charge associated with the termination of our \$125.0 million revolving credit facility.

Income Taxes

We had income tax benefit of \$3.5 million on pre-tax income of \$29.9 million in 2014. The effective tax rate for 2014 was favorably affected by approximately \$21.1 million for the reversal of reserves for uncertain tax positions due to the lapse of applicable statutes of limitations.

We had income tax expense of \$37.9 million on pre-tax income of \$94.8 million in 2013. Our effective tax rate was 40.0% in 2013. The effective tax rate for 2013 was favorably affected by strong returns on corporate-owned life insurance investments and approximately \$1.8 million for the reversal of reserves for uncertain tax positions due to the lapse of applicable statutes of limitations.

We had income tax expense of \$94.6 million on pre-tax income of \$258.6 million in 2012. Our effective tax rate was 36.6% in 2012. The effective tax rate for 2012 was favorably affected by a lower income tax rate on the sale of our ownership interest in Indeed.com.

Discontinued Operations

New England Media Group

In the fourth quarter of 2013, we completed the sale of substantially all of the assets and operating liabilities of the New England Media Group, consisting of the Globe, BostonGlobe.com, Boston.com, the Worcester Telegram & Gazette ("T&G"), Telegram.com and related properties, and our 49% equity interest in Metro Boston, for approximately \$70 million in cash, subject to customary adjustments. The net after-tax proceeds from the sale, including a tax benefit, were approximately \$74 million. In 2013, we recognized a pre-tax gain of \$47.6 million on the sale (\$28.1 million after tax), which was almost entirely comprised of a curtailment gain. This curtailment gain is primarily related to an acceleration of prior service credits from retiree medical plan amendments announced in prior years, and is due to a cessation of service for employees at the New England Media Group. Post-closing adjustments in the first and fourth quarter of 2014 resulted in a nominal loss of \$0.3 million. The results of operations of the New England Media Group have been classified as discontinued operations for all periods presented.

About Group

In the fourth quarter of 2012, we completed the sale of the About Group, consisting of About.com, ConsumerSearch.com, CalorieCount.com and related businesses, to IAC/InterActiveCorp. for \$300.0 million in cash, plus a net working capital adjustment of approximately \$17 million. In 2012, the sale resulted in a pre-tax gain of \$96.7 million (\$61.9 million after tax). The net after-tax proceeds from the sale were approximately \$291 million. In the fourth quarter of 2014, there was a legal settlement that resulted in a nominal loss of \$0.2 million. The results of operations of the About Group, which had previously been presented as a reportable segment, have been classified as discontinued operations for all periods presented.

Regional Media Group

In the first quarter of 2012, we completed the sale of the Regional Media Group, consisting of 16 regional newspapers, other print publications and related businesses, to Halifax Media Holdings LLC for approximately \$140 million in cash. The net after-tax proceeds from the sale, including a tax benefit, were approximately \$150 million. The sale resulted in an after-tax gain of \$23.6 million (including post-closing adjustments recorded in the second and fourth quarters of 2012 totaling \$6.6 million). In the fourth quarter of 2014, there was an environmental contingency that resulted in a nominal loss of \$0.4 million. The results of operations for the Regional Media Group have been classified as discontinued operations for all periods presented.

Discontinued operations are summarized in the following charts:

(In thousands)	Year ended December 28, 2014

(1) The multiemployer pension plan withdrawal expense in 2013 is related to estimated charges for complete or partial withdrawal obligations under multiemployer pension plans triggered by the sale of the New England Media Group.

(2) Included the impairment of fixed assets related to the New England Media Group in 2013 and impairment of goodwill related to the About Group in 2012.

(3) The income tax benefit for the About Group in 2013 is related to a change in prior period estimated tax expense.

(4) Included in the gain on sale in 2013 is a \$49.1 million post-retirement curtailment gain related to the New England Media Group.

(5) The income tax benefit for the Regional Media Group in 2012 included a tax deduction for goodwill, which was previously non-deductible, triggered upon the sale of the Regional Media Group.

Impairment of Assets

2013

New England Media Group

The impairment of assets in 2013 reflects the impairment of fixed assets held for sale that related to the New England Media Group. During the third quarter of 2013, we estimated the fair value less cost to sell of the group held for sale, using unobservable inputs. We recorded a \$34.3 million non-cash charge in the third quarter of 2013 for fixed assets at the New England Media Group to reduce the carrying value of fixed assets to their fair value less cost to sell.

2012

About Group

Our policy is to perform our annual goodwill impairment test in the fourth quarter of our fiscal year. However, due to certain impairment indicators at the About Group, we performed an interim impairment test as of June 24, 2012. The interim impairment test resulted in a \$194.7 million non-cash charge in the second quarter of 2012 for the impairment of goodwill at the About Group. Our expectations for future operating results and cash flows at the About Group in the long term were lower than our previous estimates, primarily driven by a reassessment of the sustainability of our estimated long-term growth rate for display advertising. The reduction in our estimated long-term growth rate resulted in the carrying value of the net assets being greater than their fair value, and therefore a write-down of goodwill to its fair value was required.

Non-GAAP Financial Measures

We have included in this report certain supplemental financial information derived from consolidated financial information but not presented in our financial statements prepared in accordance with GAAP. Specifically, we have referred to the following non-GAAP financial measures in this report:

- diluted earnings per share from continuing operations excluding severance, non-operating retirement costs and the impact of special items (or adjusted diluted earnings per share from continuing operations);
- operating profit before depreciation, amortization, severance, non-operating retirement costs and special items (or adjusted operating profit); and
- operating costs before depreciation, amortization, severance and non-operating retirement costs (or adjusted operating costs).

The special items in 2014 consisted of a \$2.6 million charge for the early termination of a distribution agreement, a reduction in the reserve for uncertain tax positions of \$21.1 million, a \$9.5 million pension settlement charge in connection with a lump-sum payment offer to certain former employees and a \$9.2 million non-cash impairment charge related to the Company's investment in a joint venture. The special items in 2013 consisted of a \$3.2 million settlement charge in connection with the Company's immediate pension benefit offer to certain former employees and a \$6.2 million charge for a partial withdrawal obligation under a multiemployer pension plan.

We have included these non-GAAP financial measures because management reviews them on a regular basis and uses them to evaluate and manage the performance of our operations. We believe that, for the reasons outlined below, these non-GAAP financial measures provide useful information to investors as a supplement to reported diluted earnings/(loss) per share from continuing operations, operating profit/(loss) and operating costs. However, these measures should be evaluated only in conjunction with the comparable GAAP financial measures and should not be viewed as alternative or superior measures of GAAP results.

Adjusted diluted earnings per share provides useful information in evaluating our period-to-period performance because it eliminates items that we do not consider to be indicative of earnings from ongoing operating activities.

Adjusted operating profit is useful in evaluating the ongoing performance of our businesses as it excludes the significant non-cash impact of depreciation and amortization as well as items not indicative of ongoing operating activities. Total operating costs include depreciation, amortization, severance and non-operating retirement costs.

Adjusted operating costs, which exclude these items, provide investors with helpful supplemental information on our underlying operating costs that is used by management in its financial and operational decision-making.

Non-operating retirement costs include:

- interest cost, expected return on plan assets and amortization of actuarial gain and loss components of pension expense;
- interest cost and amortization of actuarial gain and loss components of retiree medical expense; and
- all expenses associated with multiemployer pension plan withdrawal obligations.

These non-operating retirement costs are primarily tied to financial market performance and changes in market interest rates and investment performance. Non-operating retirement costs do not include service costs and amortization of prior service costs for pension and retiree medical benefits, which we believe reflect the ongoing service-related costs of providing pension and retiree medical benefits to our employees. We consider non-operating retirement costs to be outside the performance of our ongoing core business operations and believe that presenting operating results excluding non-operating retirement costs, in addition to our GAAP operating results, will provide increased transparency and a better understanding of the underlying trends in our operating business performance. Reconciliations of non-GAAP financial measures from, respectively, diluted earnings per share from continuing operations, operating profit and operating costs, the most directly comparable GAAP items, as well as details on the components of non-operating retirement costs, are set out in the tables below.

Reconciliation of diluted earnings per share from continuing operations excluding severance, non-operating retirement costs and special items (or adjusted diluted earnings per share from continuing operations)

* Represents an increase in excess of 100%.

LIQUIDITY AND CAPITAL RESOURCES

Overview

The following table presents information about our financial position.

Financial Position Summary

	December 28,	December 29,	% Change
(In thousands, except ratios)	2014	2013	14-13
Cash and cash equivalents	\$176,607	\$482,745	(63.4)
Marketable securities	804,563	541,035	48.7
Current portion of long-term debt and capital lease obligations	223,662	21	*
Long-term debt and capital lease obligations	426,458	684,142	(37.7)
Total New York Times Company stockholders' equity	726,328	842,910	(13.8)
Ratios:			
Total debt and capital lease obligations to total capitalization	47	% 45	%
Current assets to current liabilities	1.91	3.36	

* Represents an increase in excess of 100%.

Our primary sources of cash inflows from operations are circulation and advertising sales. Circulation and advertising provided about 53% and 42%, respectively, of total revenues in 2014. The remaining cash inflows from operations are from other revenue sources such as news services/syndication, digital archives, office rental income, conferences/events and e-commerce. Our primary source of cash outflows are for employee compensation, pension and other benefits, raw materials, services and supplies, interest and income taxes. Contributions to our qualified pension plans can have a significant impact on cash flows. See “— Pensions and Other Postretirement Benefits” for additional information regarding our pension plans. We believe our cash balance and cash provided by operations, in combination with other sources of cash, will be sufficient to meet our financing needs over the next 12 months, including the repayment at maturity of approximately \$224 million aggregate principal amount of our 5.0% senior notes due March 2015 (“5.0% Notes”).

We have continued to strengthen our liquidity position and our debt profile. As of December 28, 2014, we had cash, cash equivalents and marketable securities of approximately \$981 million and total debt and capital lease obligations of approximately \$650 million. Accordingly, our cash, cash equivalents and marketable securities exceeded total debt and capital lease obligations by approximately \$331 million. Our cash and investment balances declined in 2014, primarily due to repurchases of our 5.0% Notes and our 6.625% senior notes due 2016 (“6.625% Notes”) in the open market, the repayment of borrowings against the cash surrender value of corporate-owned life insurance, and lump-sum payments made to certain former employees who participated in certain non-qualified pension plans. In September 2013, we announced the initiation of a quarterly dividend in which both classes of our common stock participate equally. Since then, we have paid quarterly dividends of \$0.04 per share on the Class A and Class B Common Stock. We currently expect to continue to pay comparable cash dividends in the future, although changes in our dividend program will be considered by our Board of Directors in light of our earnings, capital requirements, financial condition and other factors considered relevant.

On October 27, 2014, the Society of Actuaries (“SOA”) released new mortality tables that increased life expectancy assumptions. During the fourth quarter of 2014, we adopted the new mortality tables and revised the mortality assumptions used in determining our pension and postretirement benefit obligations. The net impact to our qualified and non-qualified pension and postretirement obligations resulting from the new mortality assumptions was an increase of \$117.0 million and \$4.2 million, respectively. See Note 9 and Note 10 of our Consolidated Financial Statements for additional information.

As part of the Company’s ongoing strategy to reduce the size of our legacy pension obligations, during the first quarter of 2014, we offered to certain former employees who participate in certain non-qualified pension plans the option to elect to receive a lump-sum payment equal to the present value of the participant’s pension benefit. The election period for this voluntary offer closed on April 25, 2014, and thereafter we made a lump-sum payment of approximately \$24 million to those former employees who accepted the offer, reducing pension obligations by

approximately \$32 million. As a result, during the second quarter of 2014, we recorded a pension settlement charge of \$9.5 million.

During the fourth quarter of 2014, the Company offered certain terminated vested participants in various qualified defined benefit pension plans the option to immediately receive a lump-sum payment equal to the present value of his or her pension benefit in full settlement of the plan's pension obligation, or to immediately commence a reduced monthly annuity. The election period for this voluntary offer closed on December 31, 2014. During the first quarter of 2015, we expect to record a pension settlement charge of approximately \$40 million. The lump-sum payments will approximate \$98 million, and will be funded with existing assets of the pension plans and not with Company cash. We remain focused on managing the underfunded status of our pension plans and adjusting the size of our pension obligations relative to the size of the Company. Our qualified pension plans were underfunded (meaning the present value of future obligations exceeded the fair value of plan assets) as of December 28, 2014, by approximately \$264 million, compared with approximately \$80 million as of December 29, 2013. The funded status of these pension plans were negatively impacted by interest rates in 2014 and the adoption of new mortality tables issued by the SOA, partially offset by solid returns on pension assets. The net impact to our qualified pension plans resulting from the new mortality assumptions was an increase of \$104 million. We made contributions of approximately \$15 million to certain qualified pension plans in 2014. We expect contributions to total approximately \$9 million to satisfy minimum funding requirements in 2015.

Capital Resources

Sources and Uses of Cash

Cash flows provided by/(used in) by category were as follows:

(In thousands)	Years Ended			% Change	
	December 28, 2014	December 29, 2013	December 30, 2012	14-13	13-12
Operating activities	\$80,491	\$ 34,855	\$ 79,310	*	(56.1)
Investing activities	\$(324,717)	\$(353,657)	\$ 646,813	(8.2)	*
Financing activities	\$(61,386)	\$(19,259)	\$(80,854)	*	(76.2)

* Represents an increase or decrease in excess of 100%.

Operating Activities

Cash from operating activities is generated by cash receipts from circulation, advertising sales and other revenue transactions. Operating cash outflows include payments for employee compensation, pension and other benefits, raw materials, interest and income taxes.

Net cash provided by operating activities increased in 2014 compared with 2013 due to lower income tax payments and pension contributions, including a pension settlement, partially offset by declines in operating performance. We made estimated tax payments of approximately \$11 million in 2014 compared with approximately \$53 million in 2013, with the amount in 2013 mainly driven by the 2012 sales of our ownership interests in Indeed.com and Fenway Sports Group. We made payments to certain pension plans of approximately \$39 million (including a lump-sum payment of \$24 million in connection with a pension settlement) in 2014 compared with approximately \$74 million in 2013.

Net cash provided by operating activities in 2013 decreased compared with 2012 primarily due to cash flows related to the About Group prior to its disposition in 2012 and higher income tax payments in 2013, offset in part by lower pension contributions in 2013. We made contributions to certain qualified pension plans of approximately \$74 million in 2013 compared with approximately \$144 million in 2012. We also made income tax payments of approximately \$53 million in 2013 compared with approximately \$7 million in 2012.

Investing Activities

Cash from investing activities generally includes proceeds from marketable securities that have matured and the sale of assets, investments or a business. Cash used in investing activities generally includes purchases of marketable securities, payments for capital projects, restricted cash primarily subject to collateral requirements for obligations under our workers' compensation programs, acquisitions of new businesses and investments.

Net cash used in investing activities in 2014 was primarily due to net purchases of marketable securities, capital expenditures and changes in restricted cash. Additionally during 2014, net cash used in investing activities included the repayment of approximately \$26 million of loans taken against the cash value of our corporate-owned life insurance policies.

Net cash used in investing activities in 2013 was primarily due to net purchases of marketable securities and payments for capital expenditures, offset by proceeds from the sale of the New England Media Group and our ownership interest in Metro Boston.

Net cash provided by investing activities in 2012 was primarily due to proceeds from the sales of the About and Regional Media Groups and our ownership interests in Indeed.com and Fenway Sports Group, offset in part by net purchases of marketable securities and payments for capital expenditures.

Capital expenditures were \$35.4 million in 2014, \$16.9 million in 2013 and \$34.9 million in 2012.

Financing Activities

Cash from financing activities generally includes borrowings under third-party financing arrangements, the issuance of long-term debt and funds from stock option exercises. Cash used in financing activities generally includes the repayment of amounts outstanding under third-party financing arrangements, the payment of dividends, long-term debt and capital lease obligations.

Net cash used in financing activities in 2014 was primarily due to repurchases of \$18.4 million of our 6.625% Notes, \$20.4 million of our 5.0% Notes and dividend payments of \$24.9 million offset by proceeds from stock option exercises.

Net cash used in financing activities in 2013 was primarily due to the repurchase of \$17.4 million principal amount of our 6.625% Notes in addition to dividends paid in the fourth quarter of 2013, offset by funds from stock option exercises.

Net cash used in financing activities in 2012 was primarily for the repayment at maturity in September 2012 of all \$75.0 million outstanding aggregate principal amount of the 4.610% senior notes (“4.610% Notes”) and the repurchase of \$5.9 million principal amount of the 5.0% Notes due March 15, 2015.

See “— Third-Party Financing” below and our Consolidated Statements of Cash Flows for additional information on our sources and uses of cash.

Restricted Cash

We were required to maintain \$30.2 million and \$28.1 million of restricted cash as of December 28, 2014 and December 29, 2013, respectively, primarily related to certain collateral requirements for obligations under our workers' compensation programs.

Third-Party Financing

Our current indebtedness included senior notes and the repurchase option related to a sale-leaseback of a portion of our New York headquarters. Our total debt and capital lease obligations consisted of the following:

(In thousands, except percentages)	Coupon Rate	December 28, 2014	December 29, 2013
Current portion of long-term debt and capital lease obligations			
Senior notes due in 2015, net of unamortized debt costs and discount of \$7 in 2014	5.0	% \$223,662	\$—
Short-term capital lease obligations ⁽¹⁾		—	21
Total current portion of debt and capital lease obligations		223,662	21
Long-term debt and capital lease obligations			
Senior notes due 2015, net of unamortized debt costs and discount of \$43 in 2013	5.0	%	—
Senior notes due in 2016, net of unamortized debt costs and discount of \$1,566 in 2014 and \$2,484 in 2013	6.625	%	187,604
Option to repurchase ownership interest in headquarters building in 2019, net of unamortized debt costs and discount of \$17,882 in 2014 and \$21,741 in 2013		232,118	228,259
Long-term capital lease obligations		6,736	6,715
Total long-term debt and capital lease obligations		426,458	684,142
Total debt and capital lease obligations		\$650,120	\$684,163

(1)Included in "Accrued expenses and other" in our Consolidated Balance Sheets.

Based on borrowing rates currently available for debt with similar terms and average maturities, the fair value of our long-term debt was approximately \$527 million as of December 28, 2014, and \$819 million as of December 29, 2013. We were in compliance with our covenants under our third-party financing arrangements as of December 28, 2014.

4.610% Notes

On September 26, 2012, we repaid in full all \$75.0 million aggregate principal amount of our 4.610% Notes due on that date.

5.0% Notes

In 2005, we issued \$250.0 million aggregate principal amount of 5.0% Notes due March 15, 2015. During 2014, we repurchased \$20.4 million principal amount of our 5.0% Notes and recorded a \$0.3 million pre-tax charge in connection with the repurchase. During 2012, we repurchased \$5.9 million principal amount of our 5.0% Notes and recorded a \$0.4 million pre-tax charge in connection with the repurchase. This charge is included in "Interest expense, net" in our Consolidated Statements of Operations.

The 5.0% Notes may be redeemed, in whole or in part, at any time, at a price equal to 100% of the principal amount of the notes redeemed, plus accrued and unpaid interest to the redemption date plus a "make-whole" premium. The 5.0% Notes are not otherwise callable.

The 5.0% Notes are subject to certain covenants that, among other things, limit (subject to customary exceptions) our ability and the ability of certain material subsidiaries to:

- create liens on certain assets to secure debt; and
- enter into certain sale-leaseback transactions.

The Company intends to repay the 5.0% Notes in full at their maturity on March 15, 2015 from cash on hand.

6.625% Notes

In November 2010, we issued \$225.0 million aggregate principal amount of the 6.625% Notes due on December 15, 2016. During 2014, we repurchased \$18.4 million principal amount of our 6.625% Notes and recorded a \$2.2 million pre-tax charge in connection with the repurchases. During 2013, we repurchased \$17.4 million principal amount of our 6.625% Notes and recorded a \$2.1 million pre-tax charge in connection with the repurchases.

We have the option to redeem all or a portion of the 6.625% Notes, at any time, at a price equal to 100% of the principal amount of the notes redeemed plus accrued and unpaid interest to the redemption date plus a “make-whole” premium. The 6.625% Notes are not otherwise callable.

The 6.625% Notes are subject to certain covenants that, among other things, limit (subject to customary exceptions) our ability and the ability of our subsidiaries to:

- incur additional indebtedness and issue preferred stock;
- pay dividends or make other equity distributions;
- agree to any restrictions on the ability of our restricted subsidiaries to make payments to us;
- create liens on certain assets to secure debt;
- make certain investments;
- merge or consolidate with other companies or transfer all or substantially all of our assets; and
- engage in sale-leaseback transactions.

Warrants

In January 2009, pursuant to a securities purchase agreement, we issued warrants to affiliates of Carlos Slim Helú, the beneficial owner of approximately 8% of our Class A Common Stock (excluding the warrants), to purchase 15.9 million shares of our Class A Common Stock at a price of \$6.3572 per share. On January 14, 2015, the warrant holders exercised these warrants in full and the Company received cash proceeds of approximately \$101.1 million from this exercise. The Company currently intends to use the cash proceeds to repurchase Class A shares from time to time in open market transactions as conditions permit.

Sale-Leaseback Financing

In March 2009, we entered into an agreement to sell and simultaneously lease back a portion of our leasehold condominium interest in our Company’s headquarters building located at 620 Eighth Avenue in New York City (the “Condo Interest”). The sale price for the Condo Interest was \$225.0 million. We have an option, exercisable in 2019, to repurchase the Condo Interest for \$250.0 million. The lease term is 15 years, and we have three renewal options that could extend the term for an additional 20 years.

The transaction is accounted for as a financing transaction. As such, we have continued to depreciate the Condo Interest and account for the rental payments as interest expense. The difference between the purchase option price of \$250.0 million and the net sale proceeds of approximately \$211 million, or approximately \$39 million, is being amortized over a 10-year period through interest expense. The effective interest rate on this transaction was approximately 13%.

Revolving Credit Facility

In November 2012, we terminated our \$125.0 million asset-backed five-year revolving credit facility and recorded a pre-tax charge of \$1.4 million in connection with the early termination, which is included in “Interest expense, net” in our Consolidated Statements of Operations.

Contractual Obligations

The information provided is based on management’s best estimate and assumptions of our contractual obligations as of December 28, 2014. Actual payments in future periods may vary from those reflected in the table.

(In thousands)	Payment due in				
	Total	2015	2016-2017	2018-2019	Later Years
Long-term debt ⁽¹⁾	\$806,034	\$268,176	\$255,661	\$282,197	\$—
Capital leases ⁽²⁾	9,453	552	1,104	7,797	—
Operating leases ⁽²⁾	45,608	12,031	16,516	7,116	9,945
Benefit plans ⁽³⁾	1,566,476	245,335	293,533	290,210	737,398
Total	\$2,427,571	\$526,094	\$566,814	\$587,320	\$747,343

(1) Includes estimated interest payments on long-term debt. See Note 6 of the Notes to the Consolidated Financial Statements for additional information related to our long-term debt.

(2) See Note 18 of the Notes to the Consolidated Financial Statements for additional information related to our capital and operating leases.

(3) Includes estimated benefit payments under our Company-sponsored pension and other postretirement benefit plans. Payments for these plans have been estimated over a 10-year period; therefore, the amounts included in the “Later Years” column only include payments for the period of 2020-2024. While benefit payments under these plans are expected to continue beyond 2024, we believe that an estimate beyond this period is impracticable. Payments under our Company-sponsored qualified pension plans will be made out of existing assets of the pension plans and not with Company cash. Benefit plans in the table above also include estimated payments for multiemployer pension plan withdrawal liabilities. See Notes 9 and 10 of the Notes to the Consolidated Financial Statements for additional information related to our pension and other postretirement benefits plans.

“Other Liabilities — Other” in our Consolidated Balance Sheets include liabilities related to (1) deferred compensation, primarily consisting of our deferred executive compensation plan (the “DEC plan”), (2) our liability for uncertain tax positions and (3) various other liabilities. These liabilities are not included in the table above primarily because the future payments are not determinable.

The DEC plan enables certain eligible executives to elect to defer a portion of their compensation on a pre-tax basis. While the initial deferral period is for a minimum of two years up to a maximum of 15 years (after which time taxable distributions must begin), the executive has the option to extend the deferral period. Therefore, the future payments under the DEC plan are not determinable. See Note 11 of the Notes to the Consolidated Financial Statements for additional information on “Other Liabilities — Other.”

Our tax liability for uncertain tax positions was approximately \$20 million, including approximately \$4 million of accrued interest and penalties as of December 28, 2014. Until formal resolutions are reached between us and the tax authorities, the timing and amount of a possible audit settlement for uncertain tax benefits is not practicable.

Therefore, we do not include this obligation in the table of contractual obligations. See Note 12 of the Notes to the Consolidated Financial Statements for additional information on “Income Taxes.”

We have a contract with a major paper supplier to purchase newsprint. The contract requires us to purchase annually the lesser of a fixed number of tons or a percentage of our total newsprint requirement at market rate in an arm’s length transaction. Since the quantities of newsprint purchased annually under this contract are based on our total newsprint requirement, the amount of the related payments for these purchases is excluded from the table above.

Ratings

The Company's senior notes are currently rated B1 by Moody's Investors Service with a stable outlook. In April 2014, Standard & Poor's upgraded its rating on the Company's senior notes to BB from BB- and revised favorably the recovery prospects for the senior notes, changing its recovery rating on these senior notes to 1 from 2, based on its anticipation of a lower balance of priority debt outstanding. The Company's overall rating remains B1 at Moody's Investors Service with a stable outlook, and B+ at Standard & Poor's with a stable outlook.

Off-Balance Sheet Arrangements

We did not have any material off-balance sheet arrangements as of December 28, 2014.

CRITICAL ACCOUNTING POLICIES

Our Consolidated Financial Statements are prepared in accordance with GAAP. The preparation of these financial statements requires management to make estimates and assumptions that affect the amounts reported in the Consolidated Financial Statements for the periods presented.

We continually evaluate the policies and estimates we use to prepare our Consolidated Financial Statements. In general, management's estimates are based on historical experience, information from third-party professionals and various other assumptions that are believed to be reasonable under the facts and circumstances. Actual results may differ from those estimates made by management.

We believe our critical accounting policies include our accounting for long-lived assets, retirement benefits, income taxes, self-insurance liabilities and accounts receivable allowances. Specific risks related to our critical accounting policies are discussed below.

Long-Lived Assets

We evaluate whether there has been an impairment of goodwill on an annual basis or in an interim period if certain circumstances indicate that a possible impairment may exist. All other long-lived assets are tested for impairment if certain circumstances indicate that a possible impairment exists.

(In thousands)	December 28, 2014	December 29, 2013
Property, plant and equipment, net	\$665,758	\$713,356
Goodwill	116,422	125,871
Long-lived assets	\$782,180	\$839,227
Total assets	\$2,566,474	\$2,572,552
Percentage of long-lived assets to total assets	30	% 33

The impairment analysis is considered critical because of the significance of long-lived assets to our Consolidated Balance Sheets.

We test for goodwill impairment at the reporting unit level, which is our operating segment. We first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. The qualitative assessment includes, but is not limited to, the results of our most recent quantitative impairment test, consideration of industry, market and macroeconomic conditions, cost factors, cash flows, changes in key management personnel and our share price. The result of this assessment determines whether it is necessary to perform the goodwill impairment two-step test. For the 2014 annual impairment testing, based on our qualitative assessment, we concluded that it is more likely than not that goodwill is not impaired.

If we determine that it is more likely than not that the fair value of our reporting unit is less than its carrying value, in the first step we compare the fair value of the reporting unit with its carrying amount, including goodwill. Fair value is calculated by a combination of a discounted cash flow model and a market approach model. In calculating fair value for each reporting unit, we generally weigh the results of the discounted cash flow model more heavily than the market approach because the discounted cash flow model is specific to our business and long-term projections. If the fair value exceeds the carrying amount, goodwill is not considered impaired. If the carrying amount exceeds the fair value, the second step must be performed to measure the amount of the impairment loss, if any. In the second step, we compare the implied fair value of the reporting unit's goodwill with the carrying amount of that

goodwill. An impairment loss would be recognized in an amount equal to the excess of the carrying amount of the goodwill over the implied fair value of the goodwill.

The discounted cash flow analysis requires us to make various judgments, estimates and assumptions, many of which are interdependent, about future revenues, operating margins, growth rates, capital expenditures, working capital and discount rates. The starting point for the assumptions used in our discounted cash flow analysis is the annual long-range financial forecast. The annual planning process that we undertake to prepare the long-range financial forecast takes into consideration a multitude of factors, including historical growth rates and operating performance, related industry trends, macroeconomic conditions, and marketplace data, among others. Assumptions are also made for perpetual growth rates for periods beyond the long-range financial forecast period. Our estimates of fair value are sensitive to changes in all of these variables, certain of which relate to broader macroeconomic conditions outside our control.

The market approach analysis includes applying a multiple, based on comparable market transactions, to certain operating metrics of the reporting unit.

The significant estimates and assumptions used by management in assessing the recoverability of goodwill and other long-lived assets are estimated future cash flows, discount rates, growth rates, as well as other factors. Any changes in these estimates or assumptions could result in an impairment charge. The estimates, based on reasonable and supportable assumptions and projections, require management's subjective judgment. Depending on the assumptions and estimates used, the estimated results of the impairment tests can vary within a range of outcomes.

In addition to annual testing, management uses certain indicators to evaluate whether the carrying values of its long-lived assets may not be recoverable and an interim impairment test may be required. These indicators include: (1) current-period operating or cash flow declines combined with a history of operating or cash flow declines or a projection/forecast that demonstrates continuing declines in the cash flow or the inability to improve our operations to forecasted levels, (2) a significant adverse change in the business climate, whether structural or technological, (3) significant impairments and (4) a decline in our stock price and market capitalization.

Management has applied what it believes to be the most appropriate valuation methodology for its impairment testing. Additionally, management believes that the likelihood of an impairment of goodwill is remote due to the excess market capitalization relative to its net book value. See Notes 4 and 13 of the Notes to the Consolidated Financial Statements.

Retirement Benefits

Our single-employer pension and other postretirement benefit costs are accounted for using actuarial valuations. We recognize the funded status of these plans – measured as the difference between plan assets, if funded, and the benefit obligation – on the balance sheet and recognize changes in the funded status that arise during the period but are not recognized as components of net periodic pension cost, within other comprehensive income/(loss), net of tax. The assets related to our funded pension plans are measured at fair value.

We also recognize the present value of pension liabilities associated with the withdrawal from multiemployer pension plans.

We consider accounting for retirement plans critical to our operations because management is required to make significant subjective judgments about a number of actuarial assumptions, which include discount rates, health-care cost trend rates, long-term return on plan assets and mortality rates. These assumptions may have an effect on the amount and timing of future contributions. Depending on the assumptions and estimates used, the impact from our pension and other postretirement benefits could vary within a range of outcomes and could have a material effect on our Consolidated Financial Statements.

On October 27, 2014, the SOA released new mortality tables that increased life expectancy assumptions. During the fourth quarter of 2014, we adopted the new mortality tables and revised the mortality assumptions used in determining our pension and postretirement benefit obligations. The net impact to our qualified and non-qualified pension and postretirement obligations resulting from the new mortality assumptions was an increase of \$117.0 and \$4.2 million, respectively. See Note 9 and Note 10 of our Consolidated Financial Statements for additional information.

See “— Pensions and Other Postretirement Benefits” below for more information on our retirement benefits.

Income Taxes

We consider accounting for income taxes critical to our operating results because management is required to make significant subjective judgments in developing our provision for income taxes, including the determination of deferred tax assets and liabilities, and any valuation allowances that may be required against deferred tax assets.

Income taxes are recognized for the following: (1) amount of taxes payable for the current year and (2) deferred tax assets and liabilities for the future tax consequence of events that have been recognized differently in the financial statements than for tax purposes. Deferred tax assets and liabilities are established using statutory tax rates and are adjusted for tax rate changes in the period of enactment.

We assess whether our deferred tax assets shall be reduced by a valuation allowance if it is more likely than not that some portion or all of the deferred tax assets will not be realized. Our process includes collecting positive (e.g., sources of taxable income) and negative (e.g., recent historical losses) evidence and assessing, based on the evidence, whether it is more likely than not that the deferred tax assets will not be realized.

We recognize in our financial statements the impact of a tax position if that tax position is more likely than not of being sustained on audit, based on the technical merits of the tax position. This involves the identification of potential uncertain tax positions, the evaluation of tax law and an assessment of whether a liability for uncertain tax positions is necessary. Different conclusions reached in this assessment can have a material impact on the Consolidated Financial Statements.

We operate within multiple taxing jurisdictions and are subject to audit in these jurisdictions. These audits can involve complex issues, which could require an extended period of time to resolve. Until formal resolutions are reached between us and the tax authorities, the timing and amount of a possible audit settlement for uncertain tax benefits is difficult to predict.

Self-Insurance

We self-insure for workers' compensation costs, automobile and general liability claims, up to certain deductible limits, as well as for certain employee medical and disability benefits. The recorded liabilities for self-insured risks are primarily calculated using actuarial methods. The liabilities include amounts for actual claims, claim growth and claims incurred but not yet reported. Actual experience, including claim frequency and severity as well as health-care inflation, could result in different liabilities than the amounts currently recorded. The recorded liabilities for self-insured risks were approximately \$43 million as of December 28, 2014 and December 29, 2013.

Accounts Receivable Allowances

Credit is extended to our advertisers and subscribers based upon an evaluation of the customers' financial condition, and collateral is not required from such customers. We use prior credit losses as a percentage of credit sales, the aging of accounts receivable and specific identification of potential losses to establish reserves for credit losses on accounts receivable. In addition, we establish reserves for estimated rebates, returns, rate adjustments and discounts based on historical experience.

(In thousands)	December 28, 2014	December 29, 2013	
Accounts receivable, net	\$212,690	\$202,303	
Accounts receivable allowances	12,860	14,252	
Accounts receivable - gross	\$225,550	\$216,555	
Total current assets	\$1,148,095	\$1,172,267	
Percentage of accounts receivable allowances to gross accounts receivable	6	%	7
Percentage of net accounts receivable to current assets	19	%	17

We consider accounting for accounts receivable allowances critical to our operations because of the significance of accounts receivable to our current assets and operating cash flows. If the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required, which could have a material effect on our Consolidated Financial Statements.

PENSIONS AND OTHER POSTRETIREMENT BENEFITS

We sponsor several single-employer defined benefit pension plans, the majority of which have been frozen. We also participate in joint Company and Guild-sponsored plans covering employees of The New York Times Newspaper Guild, including The Newspaper Guild of New York - The New York Times Pension Fund, which was frozen and replaced with a new defined benefit pension plan, The Guild-Times Adjustable Pension Plan.

The table below includes the liability for all of these plans.

(In thousands)	December 28, 2014	December 29, 2013		
Pension and other postretirement liabilities	\$728,577	\$563,162		
Total liabilities	\$1,838,125	\$1,726,018		
Percentage of pension and other postretirement liabilities to total liabilities	40	%	33	%

Pension Benefits

Our Company-sponsored defined benefit pension plans include qualified plans (funded) as well as non-qualified plans (unfunded). These plans provide participating employees with retirement benefits in accordance with benefit formulas detailed in each plan. All of our non-qualified plans, which provide enhanced retirement benefits to select employees, are currently frozen, except for a foreign-based pension plan discussed below. The New York Times Newspaper Guild pension plan is a qualified plan and is also included in the table below.

We also have a foreign-based pension plan for certain non-U.S. employees (the “foreign plan”). The information for the foreign plan is combined with the information for U.S. non-qualified plans. The benefit obligation of the foreign plan is immaterial to our total benefit obligation.

The funded status of our qualified and non-qualified pension plans as of December 28, 2014 is as follows:

(In thousands)	December 28, 2014		
	Qualified Plans	Non-Qualified Plans	All Plans
Pension obligation	\$2,101,573	\$267,824	\$2,369,397
Fair value of plan assets	1,837,250	—	1,837,250
Pension underfunded/unfunded obligation, net	\$264,323	\$267,824	\$532,147

We made contributions of approximately \$15 million to certain qualified pension plans in 2014. We expect contributions to total approximately \$9 million to satisfy minimum funding requirements in 2015.

Pension expense is calculated using a number of actuarial assumptions, including an expected long-term rate of return on assets (for qualified plans) and a discount rate. Our methodology in selecting these actuarial assumptions is discussed below.

In determining the expected long-term rate of return on assets, we evaluated input from our investment consultants, actuaries and investment management firms, including our review of asset class return expectations, as well as long-term historical asset class returns. Projected returns by such consultants and economists are based on broad equity and bond indices. Our objective is to select an average rate of earnings expected on existing plan assets and expected contributions to the plan during the year. The expected long-term rate of return determined on this basis was 7.00% at the beginning of 2014. Our plan assets had an average rate of return of approximately 14.3% in 2014 and an average annual return of approximately 12.6% over the three-year period 2012-2014. We regularly review our actual asset allocation and periodically rebalance our investments to meet our investment strategy.

The value (“market-related value”) of plan assets is multiplied by the expected long-term rate of return on assets to compute the expected return on plan assets, a component of net periodic pension cost. The market-related value of plan assets is a calculated value that recognizes changes in fair value over three years.

Based on the composition of our assets at the end of the year, we estimated our 2015 expected long-term rate of return to be 7.00%, equal to 2014. If we had decreased our expected long-term rate of return on our plan assets by 50

basis points to 6.50% in 2014, pension expense would have increased by approximately \$8 million in 2014 for our qualified pension plans. Our funding requirements would not have been materially affected.

We determined our discount rate using a Ryan ALM, Inc. Curve (the "Ryan Curve"). The Ryan Curve provides the bonds included in the curve and allows adjustments for certain outliers (e.g., bonds on "watch"). We believe the Ryan Curve allows us to calculate an appropriate discount rate.

To determine our discount rate, we project a cash flow based on annual accrued benefits. For active participants, the benefits under the respective pension plans are projected to the date of termination. The projected plan cash flow is discounted to the measurement date, which is the last day of our fiscal year, using the annual spot rates provided in the Ryan Curve. A single discount rate is then computed so that the present value of the benefit cash flow equals the present value computed using the Ryan Curve rates.

The weighted average discount rate determined on this basis was 4.05% for our qualified plans and 3.90% for our non-qualified plans as of December 28, 2014.

If we had decreased the expected discount rate by 50 basis points for our qualified plans and our non-qualified plans in 2014, pension expense would have increased by approximately \$2 million as of December 28, 2014 and our pension obligation would have increased by approximately \$159 million.

On October 27, 2014, the SOA released new mortality tables that increased life expectancy assumptions. During the fourth quarter of 2014, we adopted the new mortality tables and revised the mortality assumptions used in determining our pension benefit obligations. The net impact on our qualified and non-qualified pension obligations resulting from the new mortality assumptions was an increase of \$117.0 million. See Note 9 of our Consolidated Financial Statements for additional information.

We will continue to evaluate all of our actuarial assumptions, generally on an annual basis, and will adjust as necessary. Actual pension expense will depend on future investment performance, changes in future discount rates, the level of contributions we make and various other factors.

We also recognize the present value of pension liabilities associated with the withdrawal from multiemployer pension plans. Our multiemployer pension plan withdrawal liability was approximately \$116 million as of December 28, 2014. This liability represents the present value of the obligations related to complete and partial withdrawals that have already occurred as well as an estimate of future partial withdrawals that we considered probable and reasonably estimable. For those plans that have yet to provide us with a demand letter, the actual liability will not be known until they complete a final assessment of the withdrawal liability and issue a demand to us. Therefore, the estimate of our multiemployer pension plan liability will be adjusted as more information becomes available that allows us to refine our estimates.

See Note 9 of the Notes to the Consolidated Financial Statements for additional information regarding our pension plans.

Other Postretirement Benefits

We provide health benefits to retired employees (and their eligible dependents) who meet the definition of an eligible participant and certain age and service requirements, as outlined in the plan document. While we offer pre-age 65 retiree medical coverage to employees who meet certain retiree medical eligibility requirements, we no longer provide post-age 65 retiree medical benefits for employees who retired on or after March 1, 2009. We also contribute to a postretirement plan under the provisions of a collective bargaining agreement. We accrue the costs of postretirement benefits during the employees' active years of service and our policy is to pay our portion of insurance premiums and claims from our assets.

On October 27, 2014, the SOA released new mortality tables that increased life expectancy assumptions. During the fourth quarter of 2014, we adopted the new mortality tables and revised the mortality assumptions used in determining our postretirement benefit obligations. The net impact to our postretirement obligations resulting from the new mortality assumptions was an increase of \$4.2 million. See Note 10 of our Consolidated Financial Statements for additional information.

The annual postretirement expense was calculated using a number of actuarial assumptions, including a health-care cost trend rate and a discount rate. The health-care cost trend rate was 7.20% as of December 28, 2014. A one-percentage point change in the assumed health-care cost trend rate would result in an increase of \$0.1 million or a

decrease of \$0.1 million in our 2014 service and interest costs, respectively, two factors included in the calculation of postretirement expense. A one-percentage point change in the assumed health-care cost trend rate would result in an increase or decrease of approximately \$2 million in our accumulated benefit obligation as of December 28, 2014. Our discount rate assumption for postretirement benefits is consistent with that used in the calculation of pension benefits. See “— Pension Benefits” above for information on our discount rate assumption.

See Note 10 of the Notes to the Consolidated Financial Statements for additional information regarding our other postretirement benefits.

RECENT ACCOUNTING PRONOUNCEMENTS

In August 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2014-15, “Disclosure of Uncertainties About an Entity’s Ability to Continue as a Going Concern,” which provides guidance on determining when and how reporting entities must disclose going-concern uncertainties in their financial statements. The new standard requires management to perform interim and annual assessments of an entity’s ability to continue as a going concern within one year of the date of issuance of the entity’s financial statements. Further, an entity must provide certain disclosures if there is “substantial doubt about the entity’s ability to continue as a going concern. The new guidance becomes effective for the Company for fiscal years ending on or after December 26, 2016 and interim periods thereafter. Early adoption is permitted. We do not expect that the adoption of the new accounting guidance will have a material impact on our financial condition and results of operations.

In May 2014, the FASB issued ASU 2014-09, “Revenue from Contracts with Customers,” which prescribes a single comprehensive model for entities to use in the accounting of revenue arising from contracts with customers. The new guidance will supersede virtually all existing revenue guidance under GAAP and International Financial Reporting Standards. There are two transition options available to entities: the full retrospective approach or the modified retrospective approach. Under the full retrospective approach, the Company would restate prior periods in compliance with Accounting Standards Codification (“ASC”) 250, “Accounting Changes and Error Corrections.” Alternatively, the Company may elect the modified retrospective approach, which allows for the new revenue standard to be applied to existing contracts as of the effective date and record a cumulative catch-up adjustment to retained earnings. The new guidance becomes effective for the Company for fiscal years beginning on or after December 26, 2016. Early adoption is prohibited. We are currently in the process of evaluating the impact of the new revenue guidance; however, we do not expect that the adoption of the new accounting guidance will have a material impact on our financial condition and results of operations.

In April 2014, the FASB issued ASU 2014-08, “Amendment of Discontinued Operations,” which amends the definition of a discontinued operation in ASC 205-20, “Presentation of Financial Statements-Discontinued Operations,” and requires entities to provide expanded disclosures on all disposal transactions. The new guidance is effective for the Company for fiscal years beginning on or after December 29, 2014. We do not expect that the adoption of the new accounting guidance will have a material impact on our financial condition and results of operations.

In July 2013, the FASB issued ASU 2013-11, which prescribes that a liability related to an unrecognized tax benefit would be offset against a deferred tax asset for a net operating loss carryforward, a similar tax loss or a tax credit carryforward if such settlement is required or expected in the event the uncertain tax position is disallowed. In situations in which a net operating loss carryforward, a similar tax loss or a tax credit carryforward is not available at the reporting date under the tax law of a jurisdiction or the tax law of a jurisdiction does not require it, and the Company does not intend to use the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. At the beginning of our 2014 fiscal year, we adopted ASU 2013-11 and it did not have a material impact on our financial statements.

Recent accounting pronouncements not specifically identified in our disclosures are not expected to have a material effect on our financial condition and results of operations.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our market risk is principally associated with the following:

We do not have interest rate risk related to our debt because, as of December 28, 2014, our portfolio does not include variable-rate debt.

Newsprint is a commodity subject to supply and demand market conditions. We have equity investments in two paper mills, which provide a substantial hedge against price volatility. The cost of raw materials, of which newsprint expense is a major component, represented approximately 6% and 7% of our total operating costs in 2014 and 2013, respectively. Based on the number of newsprint tons consumed in 2014 and 2013, a \$10 per ton increase in newsprint prices would have resulted in additional newsprint expense of \$1.1 million (pre-tax) in 2014 and \$1.2 million (pre-tax) in 2013, but would also result in improved performance in our joint ventures.

The discount rate used to measure the benefit obligations for our qualified pension plans is determined by using the Ryan ACM Curve, which provides rates for the bonds included in the curve and allows adjustments for certain outliers (e.g., bonds on “watch”). Broad equity and bond indices are used in the determination of the expected long term rate of return on pension plan assets. Therefore, interest rate fluctuations and volatility of the debt and equity markets can have a significant impact on asset values, the funded status of our pension plans and future anticipated contributions. See “Item 7 — Management’s Discussion and Analysis of Financial Condition and Results of Operations — Pensions and Other Postretirement Benefits.”

A significant portion of our employees are unionized and our results could be adversely affected if future labor negotiations or contracts were to further restrict our ability to maximize the efficiency of our operations. In addition, if we are unable to negotiate labor contracts on reasonable terms, or if we were to experience labor unrest or other business interruptions in connection with labor negotiations or otherwise, our ability to produce and deliver our products could be impaired.

See Notes 5, 6, 9 and 18 of the Notes to the Consolidated Financial Statements.

REPORT OF MANAGEMENT

Management's Responsibility for the Financial Statements

The Company's consolidated financial statements were prepared by management, who is responsible for their integrity and objectivity. The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") and, as such, include amounts based on management's best estimates and judgments.

Management is further responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP. The Company follows and continuously monitors its policies and procedures for internal control over financial reporting to ensure that this objective is met (see "Management's Report on Internal Control Over Financial Reporting" below).

The consolidated financial statements were audited by Ernst & Young LLP, an independent registered public accounting firm, in 2014, 2013 and 2012. Its audits were conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States) and its report is shown on Page 56.

The Audit Committee of the Board of Directors, which is composed solely of independent directors, meets regularly with the independent registered public accounting firm, internal auditors and management to discuss specific accounting, financial reporting and internal control matters. Both the independent registered public accounting firm and the internal auditors have full and free access to the Audit Committee. Each year the Audit Committee selects, subject to ratification by stockholders, the firm which is to perform audit and other related work for the Company.

Management's Report on Internal Control Over Financial Reporting

Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP. The Company's internal control over financial reporting includes those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management, with the participation of our principal executive officer and principal financial officer, assessed the effectiveness of the Company's internal control over financial reporting as of December 28, 2014. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in Internal Control — Integrated Framework (2013 framework). Based on its assessment, management concluded that the Company's internal control over financial reporting was effective as of December 28, 2014.

The Company's independent registered public accounting firm, Ernst & Young LLP, that audited the consolidated financial statements of the Company included in this Annual Report on Form 10-K, has issued an attestation report on the Company's internal control over financial reporting as of December 28, 2014, which is included on Page 56 in this Annual Report on Form 10-K.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM
ON CONSOLIDATED FINANCIAL STATEMENTS

To the Board of Directors and Stockholders of
The New York Times Company
New York, NY

We have audited the accompanying consolidated balance sheets of The New York Times Company as of December 28, 2014 and December 29, 2013, and the related consolidated statements of operations, comprehensive (loss)/income, changes in stockholders' equity, and cash flows for each of the three fiscal years in the period ended December 28, 2014. Our audits also included the financial statement schedule listed at Item 15(A)(2) of The New York Times Company's 2014 Annual Report on Form 10-K. These financial statements and schedule are the responsibility of The New York Times Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of The New York Times Company at December 28, 2014 and December 29, 2013, and the consolidated results of its operations and its cash flows for each of the three fiscal years in the period ended December 28, 2014, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), The New York Times Company's internal control over financial reporting as of December 28, 2014, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework), and our report dated February 24, 2015 expressed an unqualified opinion thereon.

/s/ Ernst & Young LLP
New York, New York
February 24, 2015

P. 54 – THE NEW YORK TIMES COMPANY

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM
ON INTERNAL CONTROL OVER FINANCIAL REPORTING

To the Board of Directors and Stockholders of
The New York Times Company
New York, NY

We have audited The New York Times Company's internal control over financial reporting as of December 28, 2014, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). The New York Times Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on The New York Times Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, The New York Times Company maintained, in all material respects, effective internal control over financial reporting as of December 28, 2014 based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of The New York Times Company as of December 28, 2014 and December 29, 2013, and the related consolidated statements of operations, comprehensive (loss)/income, changes in stockholders' equity, and cash flows for each of the three fiscal years in the period ended December 28, 2014 and our report dated February 24, 2015 expressed an unqualified opinion thereon.

Non-Cash Investing Activities

Non-cash investing activities in 2012 included approximately \$14 million for amounts held in escrow to satisfy certain indemnification provisions related to the sale of our ownership interest in Indeed.com in 2012. In each of 2014 and 2013, we received approximately \$7 million of the total amount held in escrow, constituting the remaining balance. See Note 5 for additional information regarding the sale.

THE NEW YORK TIMES COMPANY – P. 63

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation

Nature of Operations

The New York Times Company is a global media organization that includes newspapers, digital businesses, investments in paper mills and other investments (see Note 5). The New York Times Company and its consolidated subsidiaries are referred to collectively as the “Company,” “we,” “our” and “us.” Our major sources of revenue are circulation and advertising.

Principles of Consolidation

The accompanying Consolidated Financial Statements have been prepared in accordance with generally accepted accounting principles in the United States of America (“GAAP”) and include the accounts of our Company and our wholly and majority-owned subsidiaries after elimination of all significant intercompany transactions.

The portion of the net income or loss and equity of a subsidiary attributable to the owners of a subsidiary other than the Company (a noncontrolling interest) is included as a component of consolidated stockholders’ equity in our Consolidated Balance Sheets, within net income or loss in our Consolidated Statements of Operations, within comprehensive income or loss in our Consolidated Statements of Comprehensive Income/(Loss) and as a component of consolidated stockholders’ equity in our Consolidated Statements of Changes in Stockholders’ Equity.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in our Consolidated Financial Statements. Actual results could differ from these estimates.

Fiscal Year

Our fiscal year end is the last Sunday in December. Fiscal years 2014 and 2013 each comprise 52 weeks and fiscal year 2012 comprises 53 weeks. Our fiscal years ended as of December 28, 2014, December 29, 2013, and December 30, 2012.

2. Summary of Significant Accounting Policies

Cash and Cash Equivalents

We consider all highly liquid debt instruments with original maturities of 3 months or less to be cash equivalents.

Marketable Securities

We have investments in marketable debt securities. We determine the appropriate classification of our investments at the date of purchase and reevaluate the classifications at the balance sheet date. Marketable debt securities with maturities of 12 months or less are classified as short-term. Marketable debt securities with maturities greater than 12 months are classified as long-term. We have the intent and ability to hold our marketable debt securities until maturity; therefore, they are accounted for as held-to-maturity and stated at amortized cost. We had a marketable equity security which was accounted for as available-for-sale and stated at fair value until the sale of the investment in the fourth quarter of 2013 (see Note 3). Changes in the fair value of our available-for-sale security were recognized as unrealized gains or losses, net of taxes, as a component of accumulated other comprehensive income/(loss) (“AOCI”).

Concentration of Risk

Financial instruments, which potentially subject us to concentration of risk, are cash and cash equivalents and investments. Cash and cash equivalents are placed with major financial institutions. As of December 28, 2014, we had cash balances at financial institutions in excess of federal insurance limits. We periodically evaluate the credit standing of these financial institutions as part of our ongoing investment strategy.

Our investment portfolio consists of investment-grade securities diversified among security types, issuers and industries. Our cash and investments are primarily managed by third-party investment managers who are required to adhere to investment policies approved by our Board of Directors designed to mitigate risk.

Accounts Receivable

Credit is extended to our advertisers and our subscribers based upon an evaluation of the customer's financial condition, and collateral is not required from such customers. Allowances for estimated credit losses, rebates, returns, rate adjustments and discounts are generally established based on historical experience.

Inventories

Inventories are stated at the lower of cost or current market value. Inventory cost is generally based on the last-in, first-out ("LIFO") method for newsprint and the first-in, first-out ("FIFO") method for other inventories.

Investments

Investments in which we have at least a 20%, but not more than a 50%, interest are generally accounted for under the equity method. Investment interests below 20% are generally accounted for under the cost method, except if we could exercise significant influence, the investment would be accounted for under the equity method.

Property, Plant and Equipment

Property, plant and equipment are stated at cost. Depreciation is computed by the straight-line method over the shorter of estimated asset service lives or lease terms as follows: buildings, building equipment and improvements – 10 to 40 years; equipment – 3 to 30 years; and software – 2 to 5 years. We capitalize interest costs and certain staffing costs as part of the cost of major projects.

We evaluate whether there has been an impairment of long-lived assets, primarily property, plant and equipment, if certain circumstances indicate that a possible impairment may exist. These assets are tested for impairment at the asset group level associated with the lowest level of cash flows. An impairment exists if the carrying value of the asset (1) is not recoverable (the carrying value of the asset is greater than the sum of undiscounted cash flows) and (2) is greater than its fair value.

Goodwill

Goodwill is the excess of cost over the fair value of tangible and other intangible net assets acquired. Goodwill is not amortized but tested for impairment annually or in an interim period if certain circumstances indicate a possible impairment may exist. Our annual impairment testing date is the first day of our fiscal fourth quarter.

We test for goodwill impairment at the reporting unit level, which is our single operating segment. We first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. The qualitative assessment includes, but is not limited to, the results of our most recent quantitative impairment test, consideration of industry, market and macroeconomic conditions, cost factors, cash flows, changes in key management personnel and our share price. The result of this assessment determines whether it is necessary to perform the goodwill impairment two-step test. For the 2014 annual impairment testing, based on our qualitative assessment, we concluded that it is more likely than not that goodwill is not impaired.

If we determine that it is more likely than not that the fair value of a reporting unit is less than its carrying value, in the first step, we compare the fair value of the reporting unit with its carrying amount, including goodwill. Fair value is calculated by a combination of a discounted cash flow model and a market approach model. In calculating fair value for our reporting unit, we generally weigh the results of the discounted cash flow model more heavily than the market approach because the discounted cash flow model is specific to our business and long-term projections. If the fair value exceeds the carrying amount, goodwill is not considered impaired. If the carrying amount exceeds the fair value, the second step must be performed to measure the amount of the impairment loss, if any. In the second step, we compare the implied fair value of the reporting unit's goodwill with the carrying amount of that goodwill. An impairment loss would be recognized in an amount equal to the excess of the carrying amount of the goodwill over the implied fair value of the goodwill.

The discounted cash flow analysis requires us to make various judgments, estimates and assumptions, many of which are interdependent, about future revenues, operating margins, growth rates, capital expenditures, working capital and discount rates. The starting point for the assumptions used in our discounted cash flow analysis is the annual long-range financial forecast. The annual planning process that we undertake to prepare the long-range financial forecast takes into consideration a multitude of factors, including historical growth rates and operating performance, related industry trends, macroeconomic conditions, and marketplace data, among others. Assumptions are also made for perpetual growth rates for periods beyond the long-range financial forecast period. Our estimates of

fair value are sensitive to changes in all of these variables, certain of which relate to broader macroeconomic conditions outside our control.

The market approach analysis includes applying a multiple, based on comparable market transactions, to certain operating metrics of the reporting unit.

All other long-lived assets were tested for impairment at the asset group level associated with the lowest level of cash flows. An impairment exists if the carrying value of the asset (1) was not recoverable (the carrying value of the asset was greater than the sum of undiscounted cash flows) and (2) was greater than its fair value.

The significant estimates and assumptions used by management in assessing the recoverability of goodwill acquired and other long-lived assets are estimated future cash flows, discount rates, growth rates, as well as other factors. Any changes in these estimates or assumptions could result in an impairment charge. The estimates, based on reasonable and supportable assumptions and projections, require management's subjective judgment. Depending on the assumptions and estimates used, the estimated results of the impairment tests can vary within a range of outcomes.

In addition to annual testing, management uses certain indicators to evaluate whether the carrying values of its long-lived assets may not be recoverable and an interim impairment test may be required. These indicators include: (1) current-period operating or cash flow declines combined with a history of operating or cash flow declines or a projection/forecast that demonstrates continuing declines in the cash flow or the inability to improve our operations to forecasted levels, (2) a significant adverse change in the business climate, whether structural or technological, (3) significant impairments and (4) a decline in our stock price and market capitalization.

Management has applied what it believes to be the most appropriate valuation methodology for its impairment testing. Additionally, management believes that the likelihood of an impairment of goodwill is remote due to the excess market capitalization relative to its net book value. See Notes 4 and 13 of the Notes to the Consolidated Financial Statements.

Self-Insurance

We self-insure for workers' compensation costs, automobile and general liability claims, up to certain deductible limits, as well as for certain employee medical and disability benefits. The recorded liabilities for self-insured risks are primarily calculated using actuarial methods. The liabilities include amounts for actual claims, claim growth and claims incurred but not yet reported. The recorded liabilities for self-insured risks were approximately \$43 million as of December 28, 2014 and December 29, 2013.

Pension and Other Postretirement Benefits

Our single-employer pension and other postretirement benefit costs are accounted for using actuarial valuations. We recognize the funded status of these plans – measured as the difference between plan assets, if funded, and the benefit obligation – on the balance sheet and recognize changes in the funded status that arise during the period but are not recognized as components of net periodic pension cost, within other comprehensive income/(loss), net of income taxes. The assets related to our funded pension plans are measured at fair value.

We make significant subjective judgments about a number of actuarial assumptions, which include discount rates, health-care cost trend rates, long-term return on plan assets and mortality rates. Depending on the assumptions and estimates used, the impact from our pension and other postretirement benefits could vary within a range of outcomes and could have a material effect on our Consolidated Financial Statements.

We also recognize the present value of pension liabilities associated with the withdrawal from multiemployer pension plans. We assess a liability, for obligations related to complete and partial withdrawals from multiemployer pension plans, as well as estimate obligations for future partial withdrawals that we consider probable and reasonably estimable. The actual liability is not known until each plan completes a final assessment of the withdrawal liability and issues a demand to us. Therefore, we adjust the estimate of our multiemployer pension plan liability as more information becomes available that allows us to refine our estimates.

See Notes 9 and 10 for additional information regarding pension and other postretirement benefits.

Revenue Recognition

Circulation revenues include single-copy and subscription revenues. Circulation revenues are based on the number of copies of the printed newspaper (through home-delivery subscriptions and single-copy sales) and digital subscriptions sold and the rates charged to the respective customers. Single-copy revenue is recognized based on date of publication, net of provisions for related returns. Proceeds from subscription revenues are deferred at the time of sale and are recognized in earnings on a pro rata basis over the terms of the subscriptions. When our digital subscriptions are sold through third parties, we are a principal in the transaction and, therefore, revenues and related costs to third parties for these sales are reported on a gross basis. Several factors are considered to determine whether we are a principal, most notably whether we are the primary obligor to the customer and have determined the selling price and product specifications.

Advertising revenues are recognized when advertisements are published in newspapers or placed on digital platforms or, with respect to certain digital advertising, each time a user clicks on certain advertisements, net of provisions for estimated rebates, rate adjustments and discounts.

We recognize a rebate obligation as a reduction of revenues, based on the amount of estimated rebates that will be earned and claimed, related to the underlying revenue transactions during the period. Measurement of the rebate obligation is estimated based on the historical experience of the number of customers that ultimately earn and use the rebate.

Rate adjustments primarily represent credits given to customers related to billing or production errors and discounts represent credits given to customers who pay an invoice prior to its due date. Rate adjustments and discounts are accounted for as a reduction of revenues, based on the amount of estimated rate adjustments or discounts related to the underlying revenues during the period. Measurement of rate adjustments and discount obligations are estimated based on historical experience of credits actually issued.

Other revenues are recognized when the related service or product has been delivered.

Income Taxes

Income taxes are recognized for the following: (1) amount of taxes payable for the current year and (2) deferred tax assets and liabilities for the future tax consequence of events that have been recognized differently in the financial statements than for tax purposes. Deferred tax assets and liabilities are established using statutory tax rates and are adjusted for tax rate changes in the period of enactment.

We assess whether our deferred tax assets should be reduced by a valuation allowance if it is more likely than not that some portion or all of the deferred tax assets will not be realized. Our process includes collecting positive (e.g., sources of taxable income) and negative (e.g., recent historical losses) evidence and assessing, based on the evidence, whether it is more likely than not that the deferred tax assets will not be realized.

We recognize in our financial statements the impact of a tax position if that tax position is more likely than not of being sustained on audit, based on the technical merits of the tax position. This involves the identification of potential uncertain tax positions, the evaluation of tax law and an assessment of whether a liability for uncertain tax positions is necessary. Different conclusions reached in this assessment can have a material impact on our Consolidated Financial Statements.

We operate within multiple taxing jurisdictions and are subject to audit in these jurisdictions. These audits can involve complex issues, which could require an extended period of time to resolve. Until formal resolutions are reached between us and the tax authorities, the timing and amount of a possible audit settlement for uncertain tax benefits is difficult to predict.

Stock-Based Compensation

We establish fair value for our stock-based awards to determine our cost and recognize the related expense over the appropriate vesting period. We recognize stock-based compensation expense for outstanding stock-settled long-term performance awards, stock-settled and cash-settled restricted stock units, stock options and stock appreciation rights. See Note 15 for additional information related to stock-based compensation expense.

Earnings/(Loss) Per Share

Basic earnings/(loss) per share is calculated by dividing net earnings/(loss) available to common stockholders by the weighted-average common stock outstanding. Diluted earnings/(loss) per share is calculated similarly, except that it includes the dilutive effect of the assumed exercise of securities, including outstanding warrants and the effect of shares issuable under our Company's stock-based incentive plans if such effect is dilutive.

The two-class method is an earnings allocation method for computing earnings/(loss) per share when a company's capital structure includes either two or more classes of common stock or common stock and participating securities. This method determines earnings/(loss) per share based on dividends declared on common stock and participating securities (i.e., distributed earnings), as well as participation rights of participating securities in any undistributed earnings.

Foreign Currency Translation

The assets and liabilities of foreign companies are translated at year-end exchange rates. Results of operations are translated at average rates of exchange in effect during the year. The resulting translation adjustment is included as a separate component in the Stockholders' Equity section of our Consolidated Balance Sheets, in the caption "Accumulated other comprehensive loss, net of income taxes."

Recent Accounting Pronouncements

In August 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-15, "Disclosure of Uncertainties About an Entity's Ability to Continue as a Going Concern," which provides guidance on determining when and how reporting entities must disclose going-concern uncertainties in their financial statements. The new standard requires management to perform interim and annual assessments of an entity's ability to continue as a going concern within one year of the date of issuance of the entity's financial statements. Further, an entity must provide certain disclosures if there is "substantial doubt about the entity's ability to continue as a going concern." The new guidance becomes effective for the Company for fiscal years ending on or after December 26, 2016 and interim periods thereafter. Early adoption is permitted. We do not expect that the adoption of the new accounting guidance will have a material impact on our financial condition and results of operations.

In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers," which prescribes a single comprehensive model for entities to use in the accounting of revenue arising from contracts with customers. The new guidance will supersede virtually all existing revenue guidance under GAAP and International Financial Reporting Standards. There are two transition options available to entities: the full retrospective approach or the modified retrospective approach. Under the full retrospective approach, the Company would restate prior periods in compliance with Accounting Standards Codification ("ASC") 250, "Accounting Changes and Error Corrections". Alternatively, the Company may elect the modified retrospective approach, which allows for the new revenue standard to be applied to existing contracts as of the effective date and record a cumulative catch-up adjustment to retained earnings. The new guidance becomes effective for the Company for fiscal years beginning December 26, 2016. Early application is prohibited. We are currently in the process of evaluating the impact of the new revenue guidance; however, we do not expect that the adoption of the new accounting guidance will have a material impact on our financial condition and results of operations.

In April 2014, the FASB issued ASU 2014-08, "Amendment of Discontinued Operations," which amends the definition of a discontinued operation in ASC 205-20, "Presentation of Financial Statements-Discontinued Operations," and requires entities to provide expanded disclosures on all disposal transactions. The new guidance is effective for the Company for fiscal years beginning on or after December 29, 2014.

In July 2013, the FASB issued ASU 2013-11, which prescribes that a liability related to an unrecognized tax benefit would be offset against a deferred tax asset for a net operating loss carryforward, a similar tax loss or a tax credit carryforward if such settlement is required or expected in the event the uncertain tax position is disallowed. In situations in which a net operating loss carryforward, a similar tax loss or a tax credit carryforward is not available at the reporting date under the tax law of a jurisdiction or the tax law of a jurisdiction does not require it, and the Company does not intend to use the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. At the beginning of our 2014 fiscal year, we adopted ASU 2013-11 and it did not have a material impact on our financial statements.

P. 68 – THE NEW YORK TIMES COMPANY

Recent accounting pronouncements not specifically identified in our disclosures are not expected to have a material effect on our financial condition and results of operations.

3. Marketable Securities

Our marketable debt securities consisted of the following:

(In thousands)	December 28, 2014	December 29, 2013
Short-term marketable securities		
Marketable debt securities		
U.S Treasury securities	\$238,488	\$143,510
Corporate debt securities	208,346	78,991
U.S. agency securities	32,009	31,518
Municipal securities	13,622	48,035
Certificates of deposit	109,293	31,949
Commercial paper	34,985	30,877
Total short-term marketable securities	\$636,743	\$364,880
Long-term marketable securities		
Marketable debt securities		
Corporate debt securities	\$71,191	\$98,979
U.S. agency securities	95,204	73,697
Municipal securities	1,425	3,479
Total long-term marketable securities	\$167,820	\$176,155
Marketable equity security		

As of December 28, 2014, our short-term and long-term marketable securities had remaining maturities of 1 month to 12 months and 13 months to 36 months, respectively.

Marketable equity security

Our investment in the common stock of Brightcove, Inc. was accounted for as available-for-sale and stated at fair value. Changes in the fair value of our available-for-sale security were recognized as unrealized gains or losses within “Long-term marketable securities” and “Accumulated other comprehensive loss, net of income taxes” in our Condensed Consolidated Balance Sheets and “Unrealized gain/(loss) on available-for-sale security” in our Condensed Consolidated Statements of Comprehensive Income/(Loss).

During the fourth quarter of 2013, we sold our remaining investment in the common stock of Brightcove, Inc. We received cash proceeds of \$5.5 million and recognized a gain of \$1.1 million, (\$0.7 million, net of tax). Upon sale, net realized gains were transferred from accumulated other comprehensive income into the Condensed Consolidated Statement of Income.

See Note 8 for additional information regarding the fair value of our marketable securities.

4. Goodwill

The changes in the carrying amount of goodwill in 2014 and 2013 were as follows:

(In thousands)	Total Company
Balance as of December 30, 2012	\$ 122,691
Goodwill transferred to held for sale ⁽¹⁾	—
Foreign currency translation	3,180
Balance as of December 29, 2013	125,871
Foreign currency translation	(9,449)
Balance as of December 28, 2014	\$ 116,422

⁽¹⁾ See Note 13 for additional information regarding the assets and liabilities held for sale for the New England Media Group.

The foreign currency translation line item reflects changes in goodwill resulting from fluctuating exchange rates related to the consolidation of certain international subsidiaries.

5. Investments

Equity Method Investments

As of December 28, 2014, our investments in joint ventures consisted of equity ownership interests in the following entities:

Company	Approximate % Ownership
Donohue Malbaie Inc.	49 %
Madison Paper Industries	40 %

Our investments above are accounted for under the equity method, and are recorded in “Investments in joint ventures” in our Consolidated Balance Sheets. Our proportionate shares of the operating results of our investments are recorded in “(Loss)/income from joint ventures” in our Consolidated Statements of Operations and in “Investments in joint ventures” in our Consolidated Balance Sheets.

In the first quarter of 2013, we recorded a nominal charge for the impairment of our investment in quadrantONE LLC as a result of its February 2013 announcement of the wind down of its operations.

In the fourth quarter of 2013, we completed the sale of the New England Media Group and our 49% equity interest in Metro Boston, and classified the results as discontinued operations for all periods presented. See Note 13 for additional information.

Malbaie & Madison

We have investments in Donohue Malbaie, Inc. (“Malbaie”), a Canadian newsprint company, and Madison Paper Industries (“Madison”), a partnership operating a supercalendered paper mill in Maine (together, the “Paper Mills”). We have a 49% equity interest in a Canadian newsprint company, Malbaie. The other 51% is owned by Resolute FP Canada Inc., a subsidiary of Resolute Forest Products Inc. (“Resolute”), a Delaware corporation. Resolute is a large global manufacturer of paper, market pulp and wood products. Malbaie manufactures newsprint on the paper machine it owns within Resolute’s paper mill in Clermont, Quebec. Malbaie is wholly dependent upon Resolute for its pulp, which is purchased by Malbaie from Resolute’s Clermont paper mill.

Our Company and UPM-Kymmene Corporation, a Finnish paper manufacturing company, are partners through subsidiary companies in Madison. The Company’s percentage ownership of Madison, which represents 40%, is through an 80%-owned consolidated subsidiary. UPM-Kymmene owns 60% of Madison, including a 10% interest through a 20% noncontrolling interest in the consolidated subsidiary of the Company.

We received distributions from Malbaie of \$3.9 million in 2014, \$1.4 million in 2013 and \$7.3 million in 2012. We received distributions from Madison of \$0.0 million in 2014, \$0.0 million in 2013 and \$2.0 million in 2012. We purchased newsprint and supercalendered paper from the Paper Mills at competitive prices. Such purchases aggregated approximately \$20 million in 2014, \$21 million in 2013 and \$26 million in 2012.

Impairment of Equity Method Investments

During the fourth quarter of 2014, we recognized an impairment charge of \$9.2 million for our investment in Madison. Our proportionate share of the loss was \$4.7 million after adjusting for tax and the allocation of the loss to the non-controlling interest.

Cost Method Investments

Gain on Sale of Investments

We recorded a gain on sale of investments totaling \$220.3 million in 2012.

Fenway Sports Group

In the first quarter of 2012, we sold 100 of our units in Fenway Sports Group for an aggregate price of \$30.0 million (pre-tax gain of \$17.8 million) and in the second quarter of 2012, we sold our remaining 210 units for an aggregate price of \$63.0 million (pre-tax gain of \$37.8 million). Effective with the first quarter of 2012 sale, given our reduced ownership level and lack of influence on the operations of Fenway Sports Group, we changed the accounting for this investment from the equity method to the cost method. Therefore, starting in the first quarter of 2012, we no longer recognized our proportionate share of the operating results of Fenway Sports Group in joint venture results in our Consolidated Statements of Operations.

Indeed.com

In the fourth quarter of 2012, Indeed.com, a search engine for jobs in which we had an ownership interest, was sold. We recorded a pre-tax gain of \$164.6 million. The pre-tax proceeds from the sale of our interest were approximately \$167 million.

Impairment of Cost Method Investments

In 2012, we recorded non-cash impairment charges of \$5.5 million to reduce the carrying value of certain investments to fair value. The impairment charges were primarily related to our investment in Ongo Inc., a consumer service for reading and sharing digital news and information from multiple publishers. See Note 8 for additional information regarding the fair value of these investments.

6. Debt Obligations

Our current indebtedness included senior notes and the repurchase option related to a sale-leaseback of a portion of our New York headquarters. Our total debt and capital lease obligations consisted of the following:

(In thousands, except percentages)	Coupon Rate	December 28, 2014	December 29, 2013
Current portion of long-term debt and capital lease obligations			
Senior notes due in 2015, net of unamortized debt costs and discount of \$7 in 2014	5.0	% \$223,662	\$—
Short-term capital lease obligations ⁽¹⁾		—	21
Total current portion of debt and capital lease obligations		223,662	21
Long-term debt and capital lease obligations			
Senior notes due 2015, net of unamortized debt costs and discount of \$43 in 2013	5.0	%	—
Senior notes due in 2016, net of unamortized debt costs and discount of \$1,566 in 2014 and \$2,484 in 2013	6.625	%	187,604
Option to repurchase ownership interest in headquarters building in 2019, net of unamortized debt costs and discount of \$17,882 in 2014 and \$21,741 in 2013			232,118
Long-term capital lease obligations			6,736
Total long-term debt and capital lease obligations			684,142
Total debt and capital lease obligations			\$684,163

(1)Included in "Accrued expenses and other" in our Condensed Consolidated Balance Sheets.

See Note 8 for information regarding the fair value of our long-term debt.

The aggregate face amount of maturities of debt over the next five years and thereafter is as follows:

(In thousands)	Amount
2015	\$223,669
2016	189,170
2017	—
2018	—
2019	250,000
Thereafter	—
Total face amount of maturities	662,839
Less: Unamortized debt costs and discount	(19,455)
Carrying value of debt (excludes capital leases)	\$643,384

Interest expense, net, as shown in the accompanying Consolidated Statements of Operations was as follows:

(In thousands)	December 28, 2014	December 29, 2013	December 30, 2012
Cash interest expense	\$51,877	\$52,913	\$58,291
Premium on debt repurchases	2,538	2,127	428
Amortization of debt costs and discount on debt	4,651	4,548	4,516
Capitalized interest	(152)	—	(17)
Interest income	(5,184)	(1,515)	(410)
Total interest expense, net	\$53,730	\$58,073	\$62,808

4.610% Notes

On September 26, 2012, we repaid in full all \$75.0 million aggregate principal amount of 4.610% senior notes due on that date (“4.610% Notes”).

5.0% Notes

In 2005, we issued \$250.0 million aggregate principal amount of 5.0% senior unsecured notes due March 15, 2015 (“5.0% Notes”). During 2014, we repurchased \$20.4 million principal amount of our 5.0% Notes and recorded a \$0.3 million pre-tax charge in connection with the repurchase. During 2012, we repurchased \$5.9 million principal amount of our 5.0% Notes and recorded a \$0.4 million pre-tax charge in connection with the repurchase. This charge is included in “Interest expense, net” in our Consolidated Statements of Operations.

The 5.0% Notes may be redeemed, in whole or in part, at any time, at a price equal to 100% of the principal amount of the notes redeemed, plus accrued and unpaid interest to the repurchase date plus a “make-whole” premium. The 5.0% Notes are not otherwise callable.

The 5.0% Notes are subject to certain covenants that, among other things, limit (subject to customary exceptions) our ability and the ability of certain material subsidiaries to:

- create liens on certain assets to secure debt; and
- enter into certain sale-leaseback transactions.

The Company intends to repay the 5.0% Notes in full at their maturity on March 15, 2015 from cash on hand.

6.625% Notes

In November 2010, we issued \$225.0 million aggregate principal amount of 6.625% senior unsecured notes due on December 15, 2016 (“6.625% Notes”). During 2014, we repurchased \$18.4 million principal amount of our 6.625% Notes and recorded a \$2.2 million pre-tax charge in connection with the repurchases. During 2013, we repurchased \$17.4 million principal amount of our 6.625% Notes and recorded a \$2.1 million pre-tax charge in connection with the repurchases.

We have the option to redeem all or a portion of the 6.625% Notes, at any time, at a price equal to 100% of the principal amount of the notes redeemed plus accrued and unpaid interest to the redemption date plus a “make-whole” premium. The 6.625% Notes are not otherwise callable.

The 6.625% Notes are subject to certain covenants that, among other things, limit (subject to customary exceptions) our ability and the ability of our subsidiaries to:

- incur additional indebtedness and issue preferred stock;
- pay dividends or make other equity distributions;
- agree to any restrictions on the ability of our restricted subsidiaries to make payments to us;
- create liens on certain assets to secure debt;
- make certain investments;
- merge or consolidate with other companies or transfer all or substantially all of our assets; and
- engage in sale-leaseback transactions.

Warrants

In January 2009, pursuant to a securities purchase agreement, we issued warrants to affiliates of Carlos Slim Helú, the beneficial owner of approximately 8% of our Class A Common Stock (excluding the warrants), to purchase 15.9 million shares of our Class A Common Stock at a price of \$6.3572 per share. On January 14, 2015, the warrant holders exercised these warrants in full and the Company received cash proceeds of approximately \$101.1 million from this exercise. The Company currently intends to use the cash proceeds to repurchase Class A shares from time to time in open market transactions as conditions permit. See Note 19 for additional information.

Sale-Leaseback Financing

In March 2009, we entered into an agreement to sell and simultaneously lease back a portion of our leasehold condominium interest in our Company’s headquarters building located at 620 Eighth Avenue in New York City (the “Condo Interest”). The sale price for the Condo Interest was \$225.0 million. We have an option, exercisable in 2019, to repurchase the Condo Interest for \$250.0 million. The lease term is 15 years, and we have three renewal options that could extend the term for an additional 20 years.

The transaction is accounted for as a financing transaction. As such, we have continued to depreciate the Condo Interest and account for the rental payments as interest expense. The difference between the purchase option price of \$250.0 million and the net sale proceeds of approximately \$210.5 million, or approximately \$39.0 million, is being amortized over a 10-year period through interest expense. The effective interest rate on this transaction was approximately 13%.

Revolving Credit Facility

In November 2012, we terminated our \$125.0 million asset-backed five-year revolving credit facility and recorded a pre-tax charge of \$1.4 million in connection with the early termination, which is included in “Interest expense, net” in our Consolidated Statements of Operations.

7. Other

Severance Costs

In October 2014, we announced cost-saving efforts that have resulted in a number of workforce reductions and layoffs across the Company. The workforce reductions are actions taken under our severance plan in connection with our continued focus on operating efficiencies. In accordance with ASC 712, “Compensation - Nonretirement Postemployment Benefits,” we accounted for this liability in the third quarter of 2014 when the liability was probable and reasonably estimable. In December 2014, we adjusted the liability upward to reflect the actual payout, which will occur in 2015. We recognized severance costs of \$36.1 million in 2014, \$12.4 million in 2013 and \$12.3 million in 2012. These costs are recorded in “Selling, general and administrative costs” in our Condensed Consolidated Statements of Operations.

We had a severance liability of \$34.6 million and \$10.3 million included in “Accrued expenses and other” in our Consolidated Balance Sheets as of December 28, 2014 and December 29, 2013, respectively. We anticipate most of the

expenditures associated with the workforce reductions will be recognized within the next twelve months. See recent developments in the “Management’s Discussion and Analysis of Financial Condition and Results of Operations” for additional information.

Early Termination Charge

In 2014, we recorded a \$2.6 million charge for the early termination of a distribution agreement.

Pension Settlement Charge

In 2014, we recorded a \$9.5 million pension settlement charge in connection with a lump-sum payment offer to certain former employees. See Note 9 for additional information regarding the pension settlement charge.

Reserve for Uncertain Tax Positions

In 2014, we recorded a \$21.1 million income tax benefit primarily due to a reduction in the Company’s reserve for uncertain tax positions.

Advertising Expenses

Advertising expenses were \$89.5 million, \$86.0 million, and \$83.2 million for December 28, 2014, December 29, 2013, and December 30, 2012 respectively.

Capitalized Computer Software Costs

Capitalized computer software costs (included in depreciation expense) were \$29.4 million, \$27.4 million, and \$22.5 million for December 28, 2014, December 29, 2013 and December 30, 2012 respectively.

Other Expense

In 2012, we recorded a \$2.6 million charge in connection with a legal settlement.

8. Fair Value Measurements

Fair value is the price that would be received upon the sale of an asset or paid upon transfer of a liability in an orderly transaction between market participants at the measurement date. The transaction would be in the principal or most advantageous market for the asset or liability, based on assumptions that a market participant would use in pricing the asset or liability.

The fair value hierarchy consists of three levels:

Level 1 – quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date;

Level 2 – inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and

Level 3 – unobservable inputs for the asset or liability.

Assets/Liabilities Measured and Recorded at Fair Value on a Recurring Basis

As of December 28, 2014 and December 29, 2013, we had assets related to our qualified pension plans measured at fair value. The required disclosures regarding such assets are presented in Note 9.

The following table summarizes our financial liabilities measured at fair value on a recurring basis as of December 28, 2014 and December 29, 2013:

(In thousands)	December 28, 2014				December 29, 2013			
	Total	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3
Deferred compensation	\$45,136	\$45,136	\$—	\$—	\$51,660	\$51,660	\$—	\$—

Certain financial liabilities are valued using market prices on the active markets. The deferred compensation liability, included in “Other liabilities — Other” in our Condensed Consolidated Balance Sheets, consists of deferrals under our deferred executive compensation plan, which enables certain eligible executives to elect to defer a portion of their compensation on a pre-tax basis (see Note 11). The deferred amounts are invested at the executives’ option in

various mutual funds. The fair value of deferred compensation is based on the mutual fund investments elected by the executives and on quoted prices in active markets for identical assets.

Assets Measured and Recorded at Fair Value on a Non-Recurring Basis

Certain non-financial assets, such as goodwill, other intangible assets, property, plant and equipment and certain investments, that were part of operations that have been classified as discontinued operations are only recorded at fair value if an impairment charge is recognized. We classified all of these measurements as Level 3, as we used unobservable inputs within the valuation methodologies that were significant to the fair value measurements, and the valuations required management's judgment due to the absence of quoted market prices. The following tables present non-financial assets that were measured and recorded at fair value on a non-recurring basis and the total impairment losses recorded during 2014, 2013 and 2012 on those assets.

2014

(In thousands)	Net Carrying Value as of December 28, 2014	Fair Value Measured and Recorded Using			Impairment Losses for the Year Ended December 28, 2014
		Level 1	Level 2	Level 3	
Investments in joint ventures	\$—	\$—	\$—	\$—	\$9,216 ⁽¹⁾

(1) Impairment losses related to Madison are included within “(Loss)/income from joint ventures” for the year ended December 28, 2014. See Note 5 for additional information.

The impairment of assets in 2014 reflects the impairment of one of our investments in joint ventures, Madison Paper Industries. During the fourth quarter of 2014, we estimated the fair value less cost to sell of the group held for sale, using unobservable inputs (Level 3). We recorded a \$9.2 million non-cash charge in the fourth quarter of 2014. Our proportionate share of the loss was \$4.7 million after tax and adjusted for the allocation of the loss to the non-controlling interest.

2013

(In thousands)	Net Carrying Value as of December 29, 2013	Fair Value Measured and Recorded Using			Impairment Losses for the Year Ended December 29, 2013
		Level 1	Level 2	Level 3	
Property, plant and equipment	\$—	\$—	\$—	\$—	\$34,300 ⁽¹⁾

(1) Impairment losses related to the New England Media Group and are included within “(Loss)/income from discontinued operations, net of income taxes” for the year ended December 29, 2013. We sold the New England Media Group in the fourth quarter of 2013. See Note 13 for additional information.

The impairment of assets in 2013 reflects the impairment of fixed assets held for sale that related to the New England Media Group. During the third quarter of 2013, we estimated the fair value less cost to sell of the group held for sale, using unobservable inputs (Level 3). We recorded a \$34.3 million non-cash charge in the third quarter of 2013 for fixed assets at the New England Media Group to reduce the carrying value of fixed assets to their fair value less costs to sell.

2012

(In thousands)	Net Carrying Value as of December 30, 2012	Fair Value Measured and Recorded Using			Impairment Losses for the Year Ended December 30, 2012
		Level 1	Level 2	Level 3	
Goodwill	\$—	\$—	\$—	\$—	\$194,732 ⁽¹⁾
Cost method investments	—	—	—	—	5,500

(1) Impairment losses related to the About Group and are included within “(Loss)/income from discontinued operations, net of income taxes” for the year ended December 30, 2012. We sold the About Group in September 2012. See Note 13 for additional information.

The impairment charge totaling \$194.7 million in the preceding table was related to goodwill at the About Group in the second quarter of 2012, which reduced the carrying value to its fair value. Goodwill is not amortized but tested for impairment annually or in an interim period if certain circumstances indicate a possible impairment may exist. Our policy is to perform our annual goodwill impairment test in the fourth quarter of our fiscal year. However,

due to certain impairment indicators at the About Group, we performed an interim impairment test as of June 24, 2012.

Our expectations for future operating results and cash flows at the About Group in the long-term were lower than our previous estimates, primarily driven by a reassessment of the sustainability of our estimated long-term growth rate for display advertising. The reduction in our estimated long-term growth rate resulted in the carrying value of the net assets being greater than their fair value, and therefore a write-down of goodwill to its fair value was required. The fair value of the About Group's goodwill was the residual fair value after allocating the total fair value of the About Group to its other assets, net of liabilities.

The total fair value of the About Group was determined using a discounted cash flow model (present value of future cash flows). We estimated a 3.5% annual growth rate to arrive at a residual year representing the perpetual cash flows of the About Group. The residual year cash flow was capitalized to arrive at the terminal value of the About Group. Utilizing a discount rate of 15.0%, the present value of the cash flows during the projection period and terminal value were aggregated to estimate the fair value of the About Group. In our 2011 annual impairment test, we had assumed a 5.0% annual growth rate and a 13.8% discount rate. In determining the appropriate discount rate, we considered the weighted-average cost of capital for comparable companies.

The impairment charge totaling \$5.5 million in the preceding table for the cost method investments in 2012, which was primarily related to our investment in Ongo Inc., was due to events surrounding ceasing the operations of our investments (see Note 5). We determined the fair value of these investments using the market and income approaches. The market approach includes the use of financial metrics and ratios of comparable companies. The income approach includes the use of a discounted cash flow model.

Financial Instruments Disclosed, But Not Reported, at Fair Value

Our marketable securities, which include U.S. Treasury securities, corporate debt securities, U.S. government agency securities, municipal securities, certificates of deposit and commercial paper, are recorded at amortized cost (see Note 3). As of December 28, 2014 and December 29, 2013, the amortized cost approximated fair value because of the short-term maturity and highly liquid nature of these investments. We classified these investments as Level 2 since the fair value estimates are based on market observable inputs for investments with similar terms and maturities.

The carrying value of our long-term debt was approximately \$420 million as of December 28, 2014 and \$677 million as of December 29, 2013. The fair value of our long-term debt was approximately \$527 million as of December 28, 2014 and \$819 million as of December 29, 2013. We estimate the fair value of our debt utilizing market quotations for debt that have quoted prices in active markets. Since our debt does not trade on a daily basis in an active market, the fair value estimates are based on market observable inputs based on borrowing rates currently available for debt with similar terms and average maturities (Level 2).

9. Pension Benefits

Single-Employer Plans

We sponsor several single-employer defined benefit pension plans, the majority of which have been frozen. We also participate in joint Company and Guild-sponsored plans covering employees of The New York Times Newspaper Guild, including The Newspaper Guild of New York - The New York Times Pension Fund, which was frozen and replaced with a new defined benefit pension plan, The Guild-Times Adjustable Pension Plan.

We also have a foreign-based pension plan for certain employees (the "foreign plan"). The information for the foreign plan is combined with the information for U.S. non-qualified plans. The benefit obligation of the foreign plan is immaterial to our total benefit obligation.

Net Periodic Pension Cost

The components of net periodic pension cost were as follows:

(In thousands)	December 28, 2014			December 29, 2013			December 30, 2012		
	Qualified Plans	Non-Qualified Plans	All Plans	Qualified Plans	Non-Qualified Plans	All Plans	Qualified Plans	Non-Qualified Plans	All Plans
Components of net periodic pension cost									
Service cost	\$9,543	\$184	\$9,727	\$11,225	\$1,162	\$12,387	\$11,903	\$1,656	\$13,559
Interest cost	84,447	10,450	94,897	77,136	10,681	87,817	94,113	12,635	106,748
Expected return on plan assets	(113,839)	—	(113,839)	(124,250)	—	(124,250)	(118,551)	—	(118,551)
Amortization and other costs	26,620	4,718	31,338	33,770	5,561	39,331	33,323	4,489	37,812
Amortization of prior service (credit)/cost	(1,945)	—	(1,945)	(1,945)	—	(1,945)	574	—	574
Effect of settlement	—	9,525	9,525	—	3,228	3,228	47,657	—	47,657
Effect of sale of Regional Media Group	—	—	—	—	—	—	(5,097)	—	(5,097)
Net periodic pension cost/(income)	\$4,826	\$24,877	\$29,703	\$(4,064)	\$20,632	\$16,568	\$63,922	\$18,780	\$82,702

As part of our strategy to reduce the pension obligations and the resulting volatility of our overall financial condition, during 2014, 2013 and 2012, we offered lump-sum payments to certain former employees. The lump-sum payment offers each resulted in settlement charges due to the acceleration of the recognition of the accumulated unrecognized actuarial loss. Therefore, we recorded settlement charges of \$9.5 million, \$3.2 million and \$47.7 million in connection with lump-sum payments made in 2014, 2013 and 2012, respectively. Total lump-sum payments were approximately \$24 million, \$11 million and \$112 million in 2014, 2013 and 2012, respectively. The 2012 lump-sum payments were made out of the existing assets of The New York Times Companies Pension Plan and the 2014 and 2013 payments were made out of Company cash.

Following ratification of an amendment to a collective bargaining agreement covering the employees in The New York Times Newspaper Guild, in the fourth quarter of 2012, we amended The New York Times Newspaper Guild pension plan to freeze benefit accruals for participating employees. We adopted a new defined benefit pension plan for these employees. The amendment to The New York Times Newspaper Guild pension plan resulted in a reduction of the projected benefit obligation and underfunded status of the plan by approximately \$32 million. This amount is recognized within "Accumulated other comprehensive loss" in our Consolidated Balance Sheet as of December 30, 2012.

Other changes in plan assets and benefit obligations recognized in other comprehensive income/loss were as follows:

(In thousands)	December 28, 2014	December 29, 2013	December 30, 2012
Net actuarial loss/(gain)	\$ 254,525	\$ (178,088)	\$ 96,551
Prior service credit	—	—	(31,839)
Amortization of loss	(30,665)	(39,017)	(37,813)
Amortization of prior service cost/(credit)	1,945	1,945	(574)
Effect of settlement	(9,525)	(3,358)	(47,657)
Total recognized in other comprehensive loss/(income)	216,280	(218,518)	(21,332)
Net periodic pension cost	29,703	16,568	82,702
Total recognized in net periodic benefit cost and other comprehensive loss/(income)	\$ 245,983	\$ (201,950)	\$ 61,370

The estimated actuarial loss and prior service credit that will be amortized from accumulated other comprehensive loss into net periodic pension cost over the next fiscal year is approximately \$40 million and \$2 million, respectively. The amount of cost recognized for defined contribution benefit plans was approximately \$17 million for 2014 and \$18 million for 2013 and 2012.

P. 76 – THE NEW YORK TIMES COMPANY

Benefit Obligation and Plan Assets

The changes in the benefit obligation and plan assets and other amounts recognized in other comprehensive income/(loss) were as follows:

(In thousands)	December 28, 2014			December 29, 2013		
	Qualified Plans	Non-Qualified Plans	All Plans	Qualified Plans	Non-Qualified Plans	All Plans
Change in benefit obligation						
Benefit obligation at beginning of year	\$1,778,647	\$262,501	\$2,041,148	\$1,965,406	\$299,265	\$2,264,671
Service cost	9,543	184	9,727	11,225	1,162	12,387

Total	\$827,702	\$119,797	\$947,499	\$633,783	\$97,436	\$731,219

The accumulated benefit obligation for all pension plans was \$2.36 billion and \$2.03 billion as of December 28, 2014 and December 29, 2013, respectively.

Information for pension plans with an accumulated benefit obligation in excess of plan assets was as follows:

(In thousands)	December 28, 2014	December 29, 2013
Projected benefit obligation	\$2,369,397	\$2,041,148
Accumulated benefit obligation	\$2,362,050	\$2,034,145
Fair value of plan assets	\$1,837,250	\$1,698,091

Assumptions

Weighted-average assumptions used in the actuarial computations to determine benefit obligations for qualified pension plans were as follows:

(Percent)	December 28, 2014	December 29, 2013
Discount rate	4.05	% 4.90
Rate of increase in compensation levels	2.89	% 2.55

The rate of increase in compensation levels is applicable only for qualified pension plans that have not been frozen.

Weighted-average assumptions used in the actuarial computations to determine net periodic pension cost for qualified plans were as follows:

(Percent)	December 28, 2014	December 29, 2013	December 30, 2012
Discount rate	4.90	% 4.00	% 5.05
Rate of increase in compensation levels	2.87	% 3.50	% 3.00
Expected long-term rate of return on assets	7.02	% 7.85	% 8.00

Weighted-average assumptions used in the actuarial computations to determine benefit obligations for non-qualified plans were as follows:

(Percent)	December 28, 2014	December 29, 2013
Discount rate	3.90	% 4.60
Rate of increase in compensation levels	2.50	% 2.50

The rate of increase in compensation levels is applicable only for the non-qualified pension plans that have not been frozen.

Weighted-average assumptions used in the actuarial computations to determine net periodic pension cost for non-qualified plans were as follows:

(Percent)	December 28, 2014	December 29, 2013	December 30, 2012
Discount rate	4.60	% 3.70	% 4.80
Rate of increase in compensation levels	2.50	% 3.00	% 3.50

We determined our discount rate using a Ryan ALM, Inc. Curve (the "Ryan Curve"). The Ryan Curve provides the bonds included in the curve and allows adjustments for certain outliers (e.g., bonds on "watch"). We believe the Ryan Curve allows us to calculate an appropriate discount rate.

To determine our discount rate, we project a cash flow based on annual accrued benefits. For active participants, the benefits under the respective pension plans are projected to the date of termination. The projected plan cash flow is discounted to the measurement date, which is the last day of our fiscal year, using the annual spot rates provided in the Ryan Curve. A single discount rate is then computed so that the present value of the benefit cash flow equals the present value computed using the Ryan Curve rates.

In determining the expected long-term rate of return on assets, we evaluated input from our investment consultants, actuaries and investment management firms, including our review of asset class return expectations, as well as long-term historical asset class returns. Projected returns by such consultants and economists are based on broad equity and bond indices. Our objective is to select an average rate of earnings expected on existing plan assets and expected contributions to the plan during the year.

The value (“market-related value”) of plan assets is multiplied by the expected long-term rate of return on assets to compute the expected return on plan assets, a component of net periodic pension cost. The market-related value of plan assets is a calculated value that recognizes changes in fair value over three years.

On October 27, 2014, the Society of Actuaries (“SOA”) released new mortality tables that increased life expectancy assumptions. During the fourth quarter of 2014, we adopted the new mortality tables and revised the mortality assumptions used in determining our pension and postretirement benefit obligations. The net impact to our qualified and non-qualified pension obligations resulting from the new mortality assumptions was an increase of \$117.0 million.

Plan Assets

Company-Sponsored Pension Plans

The assets underlying the Company-sponsored qualified pension plans are managed by professional investment managers. These investment managers are selected and monitored by the pension investment committee, composed of certain senior executives, who are appointed by the Finance Committee of the Board of Directors of the Company. The Finance Committee is responsible for adopting our investment policy, which includes rules regarding the selection and retention of qualified advisors and investment managers. The pension investment committee is responsible for implementing and monitoring compliance with our investment policy, selecting and monitoring investment managers and communicating the investment guidelines and performance objectives to the investment managers.

Our contributions are made on a basis determined by the actuaries in accordance with the funding requirements and limitations of the Employee Retirement Income Security Act (“ERISA”) and the Internal Revenue Code.

Investment Policy and Strategy

The primary long-term investment objective is to allocate assets in a manner that produces a total rate of return that meets or exceeds the growth of our pension liabilities. Our plan objective is to transition the asset mix to hedge liabilities and minimize volatility in the funded status of the plans.

Asset Allocation Guidelines

In accordance with our asset allocation strategy, for substantially all of our Company-sponsored pension plan assets, investments are categorized into long duration fixed income investments whose value is highly correlated to that of the pension plan obligations (“Long Duration Assets”) or other investments, such as equities and high-yield fixed income securities, whose return over time is expected to exceed the rate of growth in our pension plan obligations (“Return-Seeking Assets”).

The proportional allocation of assets between Long Duration Assets and Return-Seeking Assets is dependent on the funded status of each pension plan. Under our policy, for example, a funded status between 85% and 90% requires an allocation of total assets of 46% to 56% to Long Duration Assets and 44% to 54% to Return-Seeking Assets. As our funded status increases, the allocation to Long Duration Assets will increase and the allocation to Return-Seeking Assets will decrease.

The following asset allocation guidelines apply to the Return-Seeking Assets:

Asset Category	Percentage Range		
Public Equity	70%	-	90 %
Growth Fixed Income	0%	-	15 %
Alternatives	0%	-	15 %
Cash	0%	-	10 %

The asset allocations of our Company-sponsored pension plans by asset category for both Long Duration and Return-Seeking Assets, as of December 28, 2014, were as follows:

Asset Category	Percentage	
Public Equity	32	%
Fixed Income	57	%
Alternatives	4	%
Cash	7	%

The specified target allocation of assets and ranges set forth above are maintained and reviewed on a periodic basis by the pension investment committee. The pension investment committee may direct the transfer of assets between investment managers in order to rebalance the portfolio in accordance with approved asset allocation ranges to accomplish the investment objectives for the pension plan assets.

Fair Value of Plan Assets

The fair value of the assets underlying our Company-sponsored qualified pension plans and The New York Times Newspaper Guild pension plan by asset category are as follows:

(In thousands)	Fair Value Measurement at December 28, 2014			
	Quoted Prices Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Asset Category ⁽¹⁾				
Equity Securities:

Hedge Fund	—	—	30,325	30,325
Assets at Fair Value	\$112,526	\$1,514,703	\$70,862	\$1,698,091

The underlying assets of the common/collective funds are primarily comprised of equity and fixed income (1) securities. The fair value in the above table represents our ownership share of the net asset value of the underlying funds.

(2) Represents investments that are not backed by the full faith and credit of the United States government.

Level 1 and Level 2 Investments

Where quoted prices are available in an active market for identical assets, such as equity securities traded on an exchange, transactions for the asset occur with such frequency that the pricing information is available on an ongoing/daily basis. We, therefore, classify these types of investments as Level 1 where the fair value represents the closing/last trade price for these particular securities.

For our investments where pricing data may not be readily available, fair values are estimated by using quoted prices for similar assets, in both active and not active markets, and observable inputs, other than quoted prices, such as interest rates and credit risk. We classify these types of investments as Level 2 because we are able to reasonably estimate the fair value through inputs that are observable, either directly or indirectly. There are no restrictions on our ability to sell any of our Level 1 and Level 2 investments.

Level 3 Investments

We have investments in private equity funds and a hedge fund as of December 28, 2014 and December 29, 2013 that have been determined to be Level 3 investments, within the fair value hierarchy, because the inputs to determine fair value are considered unobservable.

The general valuation methodology used for the private equity and hedge fund of funds is the market approach. The market approach utilizes prices and other relevant information such as similar market transactions, type of security, size of the position, degree of liquidity, restrictions on the disposition, latest round of financing data, current financial position and operating results, among other factors.

As a result of the inherent limitations related to the valuations of the Level 3 investments, due to the unobservable inputs of the underlying funds, the estimated fair value may differ significantly from the values that would have been used had a market for those investments existed.

The reconciliation of the beginning and ending balances of the fair value measurements using significant unobservable inputs (Level 3) as of December 28, 2014 is as follows:

(In thousands)	Fair Value Measurements Using Significant Unobservable Inputs (Level 3)		
	Hedge Fund	Private Equity	Total
Balance at beginning of year	\$30,325	\$40,537	\$70,862
Actual gain/(loss) on plan assets:			
Relating to assets still held	969	(1,775)	(806)
Capital contribution	—	2,008	2,008
Return of Capital	—	(5,043)	(5,043)
Balance at end of year	\$31,294	\$35,727	\$67,021

The reconciliation of the beginning and ending balances of the fair value measurements using significant unobservable inputs (Level 3) as of December 29, 2013 is as follows:

(In thousands)	Fair Value Measurements Using Significant Unobservable Inputs (Level 3)		
	Real Estate	Private Equity	Total
Balance at beginning of year	\$26,370	\$36,011	\$62,381
Actual gain on plan assets:			
Relating to assets still held	3,955	6,169	10,124
Capital contribution	—	3,018	3,018
Return of Capital	—	(4,661)	(4,661)
Balance at end of year	\$30,325	\$40,537	\$70,862

Cash Flows

In August 2014, the Highway and Transportation Funding Act of 2014 was enacted. The legislation extended interest rate stabilization for single-employer defined benefit pension plan funding for an additional five years. In 2014, we made contributions of \$15.0 million. We expect contributions to total approximately \$9.0 million to satisfy minimum funding requirements in 2015.

In January 2013, we made a contribution of approximately \$57 million to the New York Times Newspaper Guild pension plan, of which \$20 million was estimated to be necessary to satisfy minimum funding requirements in 2013. Mandatory contributions to other qualified pension plans increased our total contributions to approximately \$74 million for the full year of 2013.

The following benefit payments, which reflect future service for plans that have not been frozen, are expected to be paid:

(In thousands)	Plans		
	Qualified	Non-Qualified	Total
2015 ⁽¹⁾	\$200,873	\$16,044	\$216,917
2016	103,233	16,095	119,328
2017	105,296	16,865	122,161
2018	106,714	16,843	123,557
2019	109,229	17,244	126,473
2020-2024	572,392	83,987	656,379

Includes lump-sum payments that will approximate \$98 million in the first quarter of 2015 related to the Company's (1)qualified defined benefit pension plans. The lump-sum payments will be funded with existing assets of the pension plans and not with Company cash. See Note 19 for additional information.

Multiemployer Plans

We contribute to a number of multiemployer defined benefit pension plans under the terms of various collective bargaining agreements that cover our union-represented employees. Over the past few years, certain events, such as amendments to various collective bargaining agreements and the sales of the New England Media Group and the Regional Media Group, resulted in withdrawals from multiemployer pension plans. These actions, along with a reduction in covered employees, have resulted in us estimating withdrawal liabilities to the respective plans for our proportionate share of any unfunded vested benefits. We recorded an estimated charge for multiemployer pension plan withdrawal obligations of \$14.2 million in 2013, which includes \$8.0 million directly related to the sale of the New England Media Group. There were nominal charges in 2012 for withdrawal obligations related to our multiemployer pension plans. Our multiemployer pension plan withdrawal liability was approximately \$116 million as of December 28, 2014 and approximately \$119 million as of December 29, 2013. This liability represents the present value of the obligations related to complete and partial withdrawals that have already occurred as well as an estimate of future partial withdrawals that we considered probable and reasonably estimable. For those plans that have yet to provide us with a demand letter, the actual liability will not be fully known until they complete a final assessment of the withdrawal liability and issue a demand to us. Therefore, the estimate of our multiemployer pension plan liability will be adjusted as more information becomes available that allows us to refine our estimates.

The risks of participating in multiemployer plans are different from single-employer plans in the following aspects:

- Assets contributed to the multiemployer plan by one employer may be used to provide benefits to employees of other participating employers.

- If a participating employer stops contributing to the plan, the unfunded obligations of the plan may be borne by the remaining participating employers.

- If we choose to stop participating in some multiemployer pension plans, we may be required to pay those plans an amount based on the underfunded status of the plan (a withdrawal liability).

- If a multiemployer plan from which we have withdrawn subsequently experiences a mass withdrawal, we may be required to make additional contributions under applicable law.

Our participation in significant plans for the fiscal period ended December 28, 2014, is outlined in the table below. The “EIN/Pension Plan Number” column provides the Employer Identification Number (“EIN”) and the three-digit plan number. The zone status is based on the latest information that we received from the plan and is certified by the plan’s actuary. Among other factors, plans in the red zone are generally less than 65% funded, plans in the yellow zone are less than 80% funded, and plans in the green zone are at least 80% funded. The “FIP/RP Status Pending/Implemented” column indicates plans for which a financial improvement plan (“FIP”) or a rehabilitation plan (“RP”) is either pending or has been implemented. The “Surcharge Imposed” column includes plans in a red zone status that are required to pay a surcharge in excess of regular contributions. The last column lists the expiration date(s) of the collective bargaining agreement(s) to which the plans are subject.

Pension Fund	EIN/Pension Plan Number	Pension Protection Act Zone Status		FIP/RP Status Pending/Implemented	(In thousands) Contributions of the Company			Surcharge Imposed	Collective Bargaining Agreement Expiration Date

Paper-Handlers'-Publishers' Pension Fund	13-6104795-001	Green as of 4/01/14	Green as of 4/01/13	N/A	103	114	121	No	3/30/2014 ⁽⁵⁾
Contributions for individually significant plans					\$2,971	\$3,134	\$3,019		
Contributions to other multiemployer plans					—	945	2,503		
Total Contributions					\$2,971	\$4,079	\$5,522		

(1) There are two collective bargaining agreements (Mailers and Typographers) requiring contributions to this plan, which both expire March 30, 2016.

Elections under the Preservation of Access to Care for Medicare Beneficiaries and Pension Relief Act of 2010:

(2) Extended Amortization of Net Investment Losses (IRS Section 431(b)(8)(A)) and the Expanded Smoothing Period (IRS Section 431(b)(8)(B)).

We previously had two collective bargaining agreements requiring contributions to this plan. With the sale of the New England Media Group only one collective bargaining agreement remains for the Stereotypers, which expires March 30, 2017. The method for calculating actuarial value of assets was changed retroactive to January 1, 2009, as elected by the Board of Trustees and as permitted by IRS Notice 2010-83. This election includes smoothing 2008 investment losses over ten years and widening the asset corridor to 130% of market value of assets for 2009 and 2010.

(3) The Plan sponsor elected two provisions of funding relief under the Preservation of Access to Care for Medicare Beneficiaries and Pension Relief Act of 2010 (PRA 2010) to more slowly absorb the 2008 plan year investment loss, retroactively effective as of April 1, 2009. These included extended amortization under the prospective method and 10-year smoothing of the asset loss for the plan year beginning April 1, 2008.

(4) Board of Trustees elected funding relief. This election includes smoothing the March 31, 2009 investment losses over 10 years and widening the asset corridor to 130% of market value of assets for April 1, 2009 and April 1, 2010.

(5) The rehabilitation plan for the GCIU-Employer Retirement Benefit Plan includes minimum annual contributions no less than the total annual contribution made by us from September 1, 2008 through August 31, 2009.

The Company was listed in the plans' respective Forms 5500 as providing more than 5% of the total contributions for the following plans and plan years:

Pension Fund	Year Contributions to Plan Exceeded More Than 5 Percent of Total Contributions (as of Plan's Year-End)
CWA/ITU Negotiated Pension Plan	12/31/2013 & 12/31/2012 ⁽¹⁾
Newspaper and Mail Deliverers'-Publishers' Pension Fund	5/31/2013 & 5/31/2012 ⁽¹⁾
Pressmen's Publisher's Pension Fund	3/31/2014 & 3/31/2013
Paper-Handlers'-Publishers' Pension Fund	3/31/2014 & 3/31/2013

(1) Forms 5500 for the plans' year ended of 12/31/14 and 5/31/14 were not available as of the date we filed our financial statements.

The number of our employees covered by multiemployer plans decreased from 2012 to 2013, affecting period-to-period comparability, as a result of the sale of the New England Media Group.

The Company received a notice and demand for payment of withdrawal liability from the Newspaper and Mail Deliverers'-Publishers' Pension Fund September 2013 and December 2014 associated with alleged partial withdrawals. See Note 18 for further information.

10. Other Postretirement Benefits

We provide health benefits to retired employees (and their eligible dependents) who meet the definition of an eligible participant and certain age and service requirements, as outlined in the plan document. While we offer pre-age 65 retiree medical coverage to employees who meet certain retiree medical eligibility requirements, we no longer provide post-age 65 retiree medical benefits for employees who retired on or after March 1, 2009. We also contribute to a postretirement plan for Guild employees of New York Times Newspaper under the provisions of a collective bargaining agreement. We accrue the costs of postretirement benefits during the employees' active years of service and our policy is to pay our portion of insurance premiums and claims from our assets.

Net Periodic Other Postretirement Benefit Expense/(Income)

The components of net periodic postretirement benefit expense/(income) were as follows:

(In thousands)	December 28, 2014	December 29, 2013	December 30, 2012
Service cost	\$580	\$1,089	\$957
Interest cost	3,722	4,101	4,985
Amortization and other costs	7,299	4,440	3,328
Amortization of prior service credit	(7,199)	(13,051)	(15,112)
Effect of curtailment	—	(49,122)	(27,213)
Net periodic postretirement benefit expense/(income)	\$4,402	\$(52,543)	\$(33,055)

In 2012, we sold the Regional Media Group. The sale significantly reduced the expected years of future service for current employees, resulting in a remeasurement and curtailment of a postretirement benefit plan. We recognized a curtailment gain of \$27.2 million in the first quarter of 2012, which is included in the gain on the sale within “(Loss)/income from discontinued operations, net of income taxes” in the Consolidated Statement of Operations.

In 2013, we completed the sale of the New England Media Group, consisting of The Boston Globe, BostonGlobe.com, Boston.com, the Worcester Telegram & Gazette (“T&G”), Telegram.com and related properties. As a result of the sale, the Company recorded a \$49.1 million post-retirement curtailment gain in 2013, which is included in the gain on sale within “(Loss)/income from discontinued operations, net of income taxes” in the Consolidated Statement of Operations. This gain is primarily related to an acceleration of prior service credits from plan amendments announced in prior years, and is due to a reduction in the expected years of future Company service for employees at the New England Media Group.

In September 2014 and December 2014, the ERISA Management Committee approved certain changes to The New York Times Company Retiree Medical Plan provisions, which triggered a remeasurement under ASC 715-60, “Compensation — Retirement Benefits — Defined Benefit Plans — Other Postretirement.” The changes in the plan provisions decreased obligations by \$25.5 million and the change in discount rate as of the remeasurement date increased obligations by \$3.6 million. Overall, the remeasurement decreased our obligations by \$21.9 million as reflected in other comprehensive income in our Condensed Consolidated Balance Sheets and Condensed Consolidated Statements of Comprehensive Income/(Loss).

The changes in the benefit obligations recognized in other comprehensive loss were as follows:

(In thousands)	December 28, 2014	December 29, 2013	December 30, 2012
Net actuarial loss/(gain)	\$8,882	\$(13,500)	\$11,562
Prior service credit	(25,489)	(1,690)	—
Amortization of loss	(4,948)	(4,440)	(3,328)
Amortization of prior service credit	7,199	13,051	15,112
Recognition of prior service credit due to curtailment	—	49,122	27,213
Total recognized in other comprehensive (income)/loss	(14,356)	42,543	50,559
Net periodic postretirement benefit expense/(income)	4,402	(52,543)	(33,055)
Total recognized in net periodic postretirement benefit income and other comprehensive (income)/loss	\$(9,954)	\$(10,000)	\$17,504

The estimated actuarial loss and prior service credit that will be amortized from accumulated other comprehensive loss into net periodic benefit cost over the next fiscal year is approximately \$5.3 million and \$9.7 million, respectively.

In connection with collective bargaining agreements, we contribute to several multiemployer welfare plans. These plans provide medical benefits to active and retired employees covered under the respective collective bargaining agreement. Contributions are made in accordance with the formula in the relevant agreement. Postretirement costs related to these plans are not reflected above and were approximately \$18 million in 2014, \$20 million in 2013 and \$18 million in 2012.

The changes in the benefit obligation and plan assets and other amounts recognized in other comprehensive income/loss were as follows:

(In thousands)	December 28, 2014	December 29, 2013	
Change in benefit obligation			
Benefit obligation at beginning of year	\$ 100,932	\$ 120,767	
Service cost	580	1,089	
Interest cost	3,722	4,101	
Plan participants' contributions	3,834	4,861	
Actuarial loss/(gain)	12,091	(13,501)
Plan amendments	(25,489) (1,690)
Benefits paid	(14,616) (14,695)
Benefit obligation at the end of year	81,054	100,932	
Change in plan assets			
Fair value of plan assets at beginning of year	—	—	
Employer contributions	10,782	9,834	
Plan participants' contributions	3,834	4,861	
Benefits paid	(14,616) (14,695)
Fair value of plan assets at end of year	—	—	
Net amount recognized	\$(81,054) \$(100,932)
Amount recognized in the Consolidated Balance Sheets			
Current liabilities	\$(9,426) \$(10,329)
Noncurrent liabilities	(71,628) (90,603)
Net amount recognized	\$(81,054) \$(100,932)
Amount recognized in accumulated other comprehensive loss			
Actuarial loss	\$37,339	\$33,406	
Prior service credit	(51,950) (33,660)
Total	\$(14,611) \$(254)

Weighted-average assumptions used in the actuarial computations to determine the postretirement benefit obligations were as follows:

	December 28, 2014	December 29, 2013	
Discount rate	3.61	% 4.22	%
Estimated increase in compensation level	3.50	% 3.50	%

Weighted-average assumptions used in the actuarial computations to determine net periodic postretirement cost were as follows:

	December 28, 2014	December 29, 2013	December 30, 2012	
Discount rate	4.22	% 3.70	% 4.66	%
Estimated increase in compensation level	3.50	% 3.50	% 3.50	%

The assumed health-care cost trend rates were as follows:

	December 28, 2014	December 29, 2013	
Health-care cost trend rate	7.20	% 8.00	%
Rate to which the cost trend rate is assumed to decline (ultimate trend rate)	5.00	% 5.00	%
Year that the rate reaches the ultimate trend rate	2023	2023	

Because our health-care plans are capped for most participants, the assumed health-care cost trend rates do not have a significant effect on the amounts reported for the health-care plans. A one-percentage point change in assumed health-care cost trend rates would have the following effects:

(In thousands)	One-Percentage Point	
	Increase	Decrease
Effect on total service and interest cost for 2014	\$ 104	\$(88)
Effect on accumulated postretirement benefit obligation as of December 28, 2014	\$ 1,966	\$(1,670)

The following benefit payments (net of plan participant contributions) under our Company's postretirement plans, which reflect expected future services, are expected to be paid:

(In thousands)	Amount
2015	\$9,635
2016	8,254
2017	7,604
2018	7,019
2019	6,417
2020-2024	26,038

We accrue the cost of certain benefits provided to former or inactive employees after employment, but before retirement. The cost is recognized only when it is probable and can be estimated. Benefits include life insurance, disability benefits and health-care continuation coverage. The accrued cost of these benefits amounted to \$15.9 million as of December 28, 2014 and \$16.2 million as of December 29, 2013.

On October 27, 2014, the SOA released new mortality tables that increased life expectancy assumptions. During the fourth quarter of 2014, we adopted the new mortality tables and revised the mortality assumptions used in determining our pension and postretirement benefit obligations. The net impact to our postretirement obligations resulting from the new mortality assumptions was an increase of \$4.2 million.

11. Other Liabilities

The components of the “Other Liabilities — Other” balance in our Consolidated Balance Sheets were as follows:

(In thousands)	December 28, 2014	December 29, 2013
Deferred compensation	\$45,136	\$51,660
Other liabilities	62,639	106,775
Total	\$107,775	\$158,435

Deferred compensation consists primarily of deferrals under our deferred executive compensation plan (the “DEC Plan”). The DEC Plan enables certain eligible executives to elect to defer a portion of their compensation on a pre-tax basis. While the initial deferral period is for a minimum of 2 years up to a maximum of 15 years (after which time taxable distributions must begin), the executive has the option to extend the deferral period. Employees’ contributions earn income based on the performance of investment funds they select.

We invest deferred compensation in life insurance products designed to closely mirror the performance of the investment funds that the participants select. Our investments in life insurance products are included in “Miscellaneous assets” in our Consolidated Balance Sheets, and were \$72.1 million as of December 28, 2014 and \$68.6 million as of December 29, 2013.

Other liabilities in the preceding table primarily included our post employment liabilities as of December 28, 2014 and our contingent tax liability for uncertain tax positions as of December 29, 2013.

12. Income Taxes

Reconciliations between the effective tax rate on income/(loss) from continuing operations before income taxes and the federal statutory rate are presented below.

(In thousands)	December 28, 2014		December 29, 2013		December 30, 2012	
	Amount	% of Pre-tax	Amount	% of Pre-tax	Amount	% of Pre-tax
Tax at federal statutory rate	\$10,448	35.0	\$33,180	35.0	\$90,494	35.0
State and local taxes, net	4,620	15.5	8,312	8.8	11,507	4.4
Effect of enacted changes in tax laws	1,393	4.7	—	—	—	—
Reduction in uncertain tax positions	(21,147)	(70.8)	(1,803)	(1.9)	(6,721)	(2.6)
Gain on Company-owned life insurance	(1,250)	(4.2)	(3,673)	(3.9)	(2,690)	(1.0)
Nondeductible expense, net	1,847	6.2	2,039	2.2	866	0.3
Other, net	548	1.8	(163)	(0.2)	1,161	0.5
Income tax (benefit)/expense	\$(3,541)	(11.8)	\$37,892	40.0	\$94,617	36.6

The components of income tax expense as shown in our Consolidated Statements of Operations were as follows:

(In thousands)	December 28, 2014	December 29, 2013	December 30, 2012
Current tax (benefit)/expense			
Federal	\$17,397	\$18,903	\$51,836
Foreign	583	681	1,154
State and local	(25,625) 8,371	(6,680
Total current tax (benefit)/expense	(7,645) 27,955	46,310
Deferred tax expense			
Federal	4,014	5,426	38,845
Foreign	—	—	—
State and local	90	4,511	9,462
Total deferred tax expense	4,104	9,937	48,307
Income tax (benefit)/expense	\$(3,541) \$37,892	\$94,617

State tax operating loss carryforwards totaled \$7.5 million as of December 28, 2014 and \$9.3 million as of December 29, 2013. Such loss carryforwards expire in accordance with provisions of applicable tax laws and have remaining lives generally ranging from 1 to 20 years.

The components of the net deferred tax assets and liabilities recognized in our Consolidated Balance Sheets were as follows:

(In thousands)	December 28, 2014	December 29, 2013
Deferred tax assets		
Retirement, postemployment and deferred compensation plans	\$320,174	\$251,082
Accruals for other employee benefits, compensation, insurance and other	42,294	35,596
Accounts receivable allowances	1,746	1,478
Net operating losses	46,726	57,885
Other	41,186	63,821
Gross deferred tax assets	452,126	409,862
Valuation allowance	(41,136) (42,295
Net deferred tax assets	\$410,990	\$367,567
Deferred tax liabilities		
Property, plant and equipment	\$64,056	\$75,661
Intangible assets	11,607	11,902
Investments in joint ventures	13,971	19,625
Other	5,129	14,531
Gross deferred tax liabilities	94,763	121,719
Net deferred tax asset	\$316,227	\$245,848
Amounts recognized in the Consolidated Balance Sheets		
Deferred tax asset – current	\$63,640	\$65,859
Deferred tax asset – long-term	252,587	179,989
Net deferred tax asset	\$316,227	\$245,848

We assess whether a valuation allowance should be established against deferred tax assets based on the consideration of both positive and negative evidence using a “more likely than not” standard. In making such

judgments, significant weight is given to evidence that can be objectively verified. We evaluated our deferred tax assets for recoverability using a consistent approach that considers our three-year historical cumulative income/(loss), including an assessment of the degree to which any such losses were due to items that are unusual in nature (e.g., impairments of nondeductible goodwill and intangible assets).

We had a valuation allowance totaling \$41.1 million as of December 28, 2014 and \$42.3 million as of December 29, 2013 for deferred tax assets primarily associated with net operating losses of non-U.S. operations, as we determined these assets were not realizable on a more-likely-than-not basis. The valuation allowance was allocated in proportion to the related current and noncurrent gross deferred tax asset balances.

Income tax benefits related to the exercise or vesting of equity awards reduced current taxes payable by \$3.1 million in 2014, \$3.4 million in 2013 and \$2.4 million in 2012.

As of December 28, 2014 and December 29, 2013, “Accumulated other comprehensive loss, net of income taxes” in our Consolidated Balance Sheets and for the years then ended in our Consolidated Statements of Changes in Stockholders’ Equity was net of deferred tax assets of approximately \$369 million and \$283 million, respectively.

A reconciliation of unrecognized tax benefits is as follows:

(In thousands)	December 28, 2014	December 29, 2013	December 30, 2012
Balance at beginning of year	\$46,058	\$45,308	\$47,971
Gross additions to tax positions taken during the current year	2,116	2,249	5,241
Gross additions to tax positions taken during the prior year	—	127	258
Gross reductions to tax positions taken during the prior year
