Item 2.02 - Results of Operations and Financial Condition.

On October 27, 2014, Park National Corporation (“Park”) issued a news release (the “Financial Results News Release”) announcing financial results for the three and nine months ended September 30, 2014. A copy of this Financial Results News Release is included as Exhibit 99.1 to this Current Report on Form 8-K and incorporated by reference herein.

Park's management uses certain non-GAAP (generally accepted accounting principles) financial measures to evaluate Park's performance. Specifically, management reviews return on average tangible common equity, return on average tangible assets, tangible common equity to tangible assets and tangible common book value per common share. Management has included in the Financial Results News Release information relating to the return on average tangible common equity, return on average tangible assets, tangible common equity to tangible assets and tangible common book value per common share for the three and nine months ended September 30, 2014 and 2013. For purposes of calculating the return on average tangible common equity, a non-GAAP financial measure, net income available to common shareholders for each period is divided by average tangible common equity during the period. Average tangible common equity equals average shareholders' equity during the applicable period less average goodwill and other intangible assets during the applicable period. For the purpose of calculating the return on average tangible assets, a non-GAAP financial measure, net income available to common shareholders for each period is divided by average tangible assets during the period. Average tangible assets equals average assets during the applicable period less average goodwill and other intangible assets during the applicable period. For the purpose of calculating tangible common equity to tangible assets, a non-GAAP financial measure, tangible common equity is divided by tangible assets. Tangible common equity equals shareholders' equity less goodwill and intangible assets, in each case at period end. Tangible assets equals total assets less goodwill and intangible assets, in each case at period end. For the purpose of calculating tangible common book value per common share, a non-GAAP financial measure, tangible common equity is divided by common shares outstanding at period end. Management believes that the disclosure of return on average tangible common equity, return on average tangible assets, tangible common equity to tangible assets and tangible common book value per common share presents additional information to the reader of the consolidated financial statements, which, when read in conjunction with the consolidated financial statements prepared in accordance with GAAP, assists in analyzing Park's operating performance and ensures comparability of operating performance from period to period, and facilitates comparisons with the performance of Park's peer financial holding companies and bank holding companies, while eliminating certain non-operational effects of acquisitions. In the Financial Results News Release, Park has provided a reconciliation of average tangible common equity to average shareholders' equity, average tangible assets to average assets, tangible common equity to shareholders' equity and tangible assets to total assets solely for the purpose of complying with SEC Regulation G and not as an indication that return on average tangible common equity, return on average tangible assets, tangible common equity to tangible assets and tangible common book value per common share are substitutes for return on average equity, return on average assets, shareholders' equity to total assets and common book value per common share, respectively, as determined by GAAP.

Provision for (recovery of) loan losses of \$6.5 million for the three months ended September 30, 2014 included a provision of \$3.0 million related to loans moved to the held for sale portfolio in the current period. Management moved PNB loans with an outstanding book balance of \$15.5 million to the held for sale portfolio as of September 30, 2014. As a result of moving these loans to the held for sale portfolio, management recorded each of the loans at the lower of cost or fair value. U.S. GAAP requires management to record all loans held for sale at the lower of cost or fair value, recording a charge-off in each instance where fair value of an individual loan is deemed to be below the carrying cost at the time loans are moved to the held for sale portfolio and deferring any gains until the sale is finalized.

PNB results for the nine month period ended September 30, 2014 included \$3.6 million in net loan recoveries, \$1.25 million in other income from gain on OREO sales, and \$1.22 million in legal expenses related to participations in legacy Vision Bank ("Vision") assets. For the three month period ended September 30, 2014, PNB recognized no net loan recoveries, no other income from gain on OREO sales, and \$383,000 in legal expenses related to the participations in legacy Vision assets.

Similar to the PNB portfolio, the loans were moved to held for sale and recorded at the lower of cost or fair value, resulting in a charge-off and a subsequent provision for loan losses of \$140,000 in the third quarter related to those loans where fair value was deemed to be below the carrying cost. Any gains associated with the sale of the SEPH loans held for sale portfolio are deferred until the sale is finalized.

On February 16, 2012, when Vision merged with and into SEPH, the loans then held by Vision were transferred to SEPH by operation of law at their fair value and no allowance for loan loss is carried at SEPH. The loans included in both the performing and nonperforming portfolios have been charged down to their fair value. The table below provides additional information for SEPH regarding charge-offs as a percentage of unpaid principal balance, as of September 30, 2014.

As previously discussed, SEPH had net recoveries of \$8.1 million and PNB had net charge-offs of \$9.7 million for the nine - month period ended September 30, 2014, resulting in a small overall net charge-off for Park. Included in PNB net charge-offs for the nine month period ended September 30, 2014 are recoveries of \$3.6 million related to a participation from SEPH. Provision for loan losses for Park's ongoing operations (PNB and GFSC) was \$9.1 million for the nine - month period ended September 30, 2014, a \$3.3 million decline from the \$12.4 million provision for the same period in 2013.

As discussed in the PNB and SEPH segment results sections, management moved certain loans to the held for sale portfolio during the third quarter. The loans moved to the held for sale portfolio, with book balances of \$15.5 million and \$6.5 million at PNB and SEPH, respectively, were transferred at the lower of cost or fair value.

The table below provides additional information related to specific reserves and general reserves for Park's ongoing operations as of September 30, 2014, December 31, 2013 and September 30, 2013.

(In thousands)	9/30/2014	12/31/2013	9/30/2013	
Total allowance for loan losses	\$57,674	\$59,468	\$57,894	
Specific reserve	4,120	10,451	9,297	
General reserve	\$53,554	\$49,017	\$48,597	
Total loans	\$4,746,063	\$4,580,825	\$4,524,480	
Impaired loans	53,510	77,038	80,463	
Performing loans	\$4,692,553	\$4,503,787	\$4,444,017	
General reserve as a % of performing loans	1.14	% 1.09	% 1.09	%

Note: Table includes only those loans at PNB and GFSC, as these are the entities that have an ALLL balance. The table in the attached Exhibit 99.1 in the asset quality section includes all Park loans (including those at SEPH) and thus shows slightly different information.

As the table above shows, specific reserves were \$4.1 million at September 30, 2014, a decrease of \$6.4 million, compared to \$10.5 million at December 31, 2013. The decline in specific reserves was largely related to the second quarter 2014 charge-off of approximately \$4.7 million related to one loan relationship, which previously had a specific reserve of \$4.8 million that was established in the third quarter of 2013, and charge-offs of \$1.2 million related to the specific reserves previously established against the loans that are now classified as held for sale. General reserves for Park's ongoing operations increased to \$53.6 million at September 30, 2014, an increase of \$4.6 million, or 9.4%, compared to \$49.0 million at December 31, 2013. The general reserve as a percentage of performing loans increased to 1.14% at September 30, 2014, compared to 1.09% at December 31, 2013. The increase in general reserves was primarily due to additional reserves established in the consumer loan portfolio, as this portfolio of loans has experienced significant growth through the first nine months of 2014.

Overall, credit metrics continue to improve at Park. The table below provides additional information regarding the declines in nonaccrual loans as a percentage of period end loans and nonperforming assets as a percentage of period end assets for Park on a quarterly basis in 2014 and for the last four years.
