Earnings for the six months ended June 30, 2004, were \$896,393 or \$.32 per share, down 3% from the first six months of 2003, of \$927,119 or \$.33 per share. Our return on average assets and average equity for the six months ended June 30, 2004 were .97% and 9.09% respectively, compared to the six months ended June 30, 2003 of 1.10% and 9.5% respectively.

Hugh C. Lane, Jr., President of The Bank of South Carolina, stated: "During June we recaptured \$168,000 from our reserve for loan losses. We were required to do this because of the quality of our loan portfolio, supported by our methodology and formula for calculating our reserves. Since the third quarter of 2003, our loan portfolio has had a high level of payoffs. Deposit growth has been very strong due to the success of our business development efforts and our existing customers. Our mortgage department continues to make a strong contribution to our performance with loan originations for the first six months of 2004 of \$35,191,689. The recent increase in interest rates by the Federal Reserve will improve our net interest margin and earnings. We plan to extend the maturity of our investment portfolio, improve its contribution to our income and reduce our asset sensitivity when we feel the returns are adequate."
