(a) Variable or floating rate security. The interest rate shown was the current rate as of July 31, 2018 and changes periodically.

Benchmarks for Variable/Floating Rates:

LIBOR = London Interbank Offered Rate

- The stated interest rate represents the weighted average interest rate at July 31, 2018 of the underlying contracts within the Loan Assignment. Interest rates on the underlying contracts are primarily determined by reference to the indicated base lending rate and spread, which are indicated in the security description, and the reset period, which is generally weekly, monthly or quarterly.
- (b) All or a portion of this security was purchased on a delayed delivery basis.
 - (c) All or a portion of this security had not settled as of July 31, 2018 and thus may not have an interest rate in effect.
 - (d) Interest rates do not take effect until settlement.
 - (e) Illiquid security.
 - (f) Value determined using significant unobservable inputs.

^(c) Securities categorized as Level 3 are valued based on a single quotation obtained from a dealer. The Fund does not have access to unobservable inputs and therefore cannot disclose such inputs used in formulating such quotation.

As of the period ended July 31, 2018, these securities were valued in accordance with procedures approved by the ^(d)Board of Directors. These investments did not have a material impact on the Fund's net assets and, therefore, disclosure of unobservable inputs used in formulating valuations in not presented.

^(e) Amount less than one dollar.

As of the period ended July 31, 2018, certain securities were transferred from one level (as of October 31, 2017) to another. Based on beginning of period market values as of November 1, 2017, \$1,149,032 was transferred from Level 3 to Level 2. Transfers of loan assignments into or out of Level 3 were primarily due to the pricing methodology no longer using a single broker quote (Level 3) or a single observable input (Level 3) by the independent pricing service. As of the period ended July 31, 2018, the Fund had no transfers between Levels 1 and 2.

Notes to Schedule of Investments (Unaudited)

In accordance with Accounting Standards Codification 820 “Fair Value Measurement” (“ASC 820”), all investments held by Neuberger Berman High Yield Strategies Fund Inc. (the “Fund”) are carried at the value that Neuberger Berman Investment Advisers LLC (“Management”) believes the Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market for the investment under current market conditions. Various inputs, including the volume and level of activity for the asset or liability in the market, are considered in valuing the Fund’s investments, some of which are discussed below. Significant Management judgment may be necessary to value investments in accordance with ASC 820.

ASC 820 established a three-tier hierarchy of inputs to create a classification of value measurements for disclosure purposes. The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

Level 1 – quoted prices in active markets for identical investments

Level 2 – other observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, amortized cost, etc.)

Level 3 – unobservable inputs (including the Fund’s own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing an investment are not necessarily an indication of the risk associated with investing in those securities.

The value of the Fund’s investments in debt securities is determined by Management primarily by obtaining valuations from independent pricing services based on readily available bid quotations, or if quotations are not available, by methods which include various considerations based on security type (generally Level 2 inputs). In addition to the consideration of yields or prices of securities of comparable quality, coupon, maturity and type, indications as to values from dealers, and general market conditions, the following is a description of other Level 2 inputs and related valuation techniques used by independent pricing services to value certain types of debt securities held by the Fund:

Corporate Bonds. Inputs used to value corporate debt securities generally include relative credit information, observed market movements, sector news, U.S. Treasury yield curve or relevant benchmark curve, and other market information, which may include benchmark yields, reported trades, broker-dealer quotes, issuer spreads, benchmark securities, bids, offers, and reference data, such as market research publications, when available (“Other Market Information”).

Asset-Backed Securities. Inputs used to value asset-backed securities generally include models that consider a number of factors, which may include the following: prepayment speeds, cash flows, spread adjustments and Other Market Information.

Convertible Bonds. Inputs used to value convertible bonds generally include underlying stock data, dealer quotes, conversion premiums, listed bond and preferred stock prices and other market information, which may include benchmark curves, trade execution data, and sensitivity analysis, when available.

High Yield Securities. Inputs used to value high yield securities generally include a number of observations of equity and credit default swap curves related to the issuer and Other Market Information.

The value of loan assignments is determined by Management primarily by obtaining valuations from independent pricing services based on broker quotes (generally Level 2 or Level 3 inputs depending on the number of quotes available).

The value of interest rate swaps is determined by Management primarily by obtaining valuations from independent pricing services based on references to the underlying rates including the local overnight index swap rate and the respective interbank offered forward rate to produce the daily price. The present value is calculated based off of expected cash flows based on swap parameters along with reference to the underlying yield curve and reference rate (generally Level 2 inputs).

Management has developed a process to periodically review information provided by independent pricing services for all types of securities.

Investments in non-exchange traded investment companies are valued using the respective fund's daily calculated net

For information on the Fund's significant accounting policies, please refer to the Fund's most recent stockholder reports.

July 31, 2018

Notes to Schedule of Investments (Unaudited) (cont'd)

asset value per share (Level 2 inputs).

If a valuation is not available from an independent pricing service, or if Management has reason to believe that the valuation received does not represent the amount the Fund might reasonably expect to receive on a current sale in an orderly transaction, Management seeks to obtain quotations from brokers or dealers (generally considered Level 2 or Level 3 inputs depending on the number of quotes available). If such quotations are not readily available, the security is valued using methods the Fund's Board of Directors has approved in the good-faith belief that the resulting valuation will reflect the fair value of the security. Numerous factors may be considered when determining the fair value of a security based on Level 2 or Level 3 inputs, including available analyst, media or other reports, securities within the same industry with recent highly correlated performance, trading in futures or American Depositary Receipts and whether the issuer of the security being fair valued has other securities outstanding.

Fair value prices are necessarily estimates, and there is no assurance that such a price will be at or close to the price at which the security is next quoted or next trades.

For information on the Fund's significant accounting policies, please refer to the Fund's most recent stockholder reports.

Item 2. Controls and Procedures.

Based on an evaluation of the disclosure controls and procedures (as defined in Rule 30a-3(c) under the 1940 Act), as of a date within 90 days of the filing date of this report, the Chief Executive Officer and President and the Treasurer and Principal Financial and Accounting Officer of the Registrant have concluded that such disclosure controls and procedures are effectively designed to ensure that information required to be disclosed by the Registrant on Form N-Q is accumulated and communicated to the Registrant's management to allow timely decisions regarding required disclosure.

(a) There were no significant changes in the Registrant's internal controls over financial reporting (as defined in Rule (b)30a-3(d) under the 1940 Act) that occurred during the Registrant's last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Registrant's internal control over financial reporting.

Item 3. Exhibits.

The certifications required by Rule 30a-2(a) of the 1940 Act are filed herewith.
