Trigger Callable Contingent Yield Securities with Daily Coupon Observation and 6-Month Initial Non-Call Period due October 17, 2025

$7,566,000 Based on the worst performing of the Nikkei 225® Index, the Russell 2000® Index and the EURO STOXX 50® Index

UBS AG Trigger Callable Contingent Yield Securities with Daily Coupon Observation and 6-Month Initial Non-Call Period (the "securities") are unsubordinated, unsecured debt securities issued by UBS AG ("UBS" or the "issuer") linked to the worst performing of the Nikkei 225® Index, the Russell 2000® Index and the EURO STOXX 50® Index (each an "underlying index" and together the "underlying indices"). If the closing level of each underlying index is equal to or greater than its coupon barrier on each trading day during the applicable observation period, UBS will pay you a contingent coupon on the related coupon payment date. If the closing level of any underlying index is less than its coupon barrier on any trading day during an observation period, you will not receive any contingent coupon for that observation period on the related coupon payment date. UBS may elect, on or before any applicable observation end date (other than the first observation end date and the final valuation date), to call the securities at its discretion in whole, but not in part (an "issuer call"), on the coupon payment date corresponding to such coupon observation date (the "call settlement date"), regardless of the closing levels of the underlying indices on such observation end date. If UBS elects to call the securities prior to maturity, UBS will pay you on the call settlement date a cash payment per security equal to the stated principal amount plus any contingent coupon otherwise due, and no further payments will be made on the securities. If UBS does not elect to call the securities and a trigger event does not occur, at maturity, UBS will pay you a cash payment per security at maturity equal to the stated principal amount, in addition to any contingent coupon otherwise due. If, however, UBS does not elect to call the securities and a trigger event occurs, UBS will pay you less than the full stated principal amount per security, if anything, at maturity, resulting in a loss on your initial investment that is proportionate to the decline in the closing level of the underlying index with the lowest underlying index return (the "worst performing underlying index") from its initial level to its final level over the term of the securities and you will lose a significant portion or all of your initial investment. A trigger event is deemed to have occurred if the closing level of any underlying index is less than its trigger level on the "trigger observation date", which is the final valuation date. The securities are for investors who are willing to risk their principal and seek interest at a potentially above-market rate in exchange for the risk of receiving few or no contingent coupons if any underlying index's closing level is less than its coupon barrier on any trading day during each observation period and the risk of an early call at UBS' discretion. **Investing in the securities involves significant risks. You will lose a significant portion or all of your initial investment if UBS does not elect to call the securities and a trigger event occurs. The securities will not pay a contingent coupon if the closing level of any underlying index is less than its coupon barrier on any trading day during an observation period. UBS may elect to call the securities at its discretion regardless of the performance of the underlying indices. Higher contingent coupon rates are**

generally associated with a greater risk of loss. Investors will not participate in any appreciation of any of the underlying indices. The contingent repayment of principal only applies if you hold the securities until the call settlement date or the maturity date, as applicable. Any payment on the securities, including any repayment of principal, is subject to the creditworthiness of UBS. If UBS were to default on its payment obligations you may not receive any amounts owed to you under the securities and you could lose all of your initial investment.

SUMMARY TERMS	
Issuer:	UBS AG London Branch
Underlying indices:	Nikkei 225® Index (Bloomberg Ticker: "NKY") Russell 2000® Index (Bloomberg Ticker: "RTY") EURO STOXX 50® Index (Bloomberg Ticker: "SX5E")
Aggregate principal amount:	$7,566,000
Stated principal amount:	$1,000 per security
Issue price:	$1,000 per security (see "Commissions and issue price" below)
Term:	Approximately 7 years, unless called earlier.
Trade date:	October 12, 2018
Settlement date:	October 17, 2018 (3 business days after the trade date). We expect to deliver the securities against payment on or about the third business day following the trade date. Under Rule 15c6-1 of the Securities Exchange Act of 1934, as amended, trades in the secondary market generally are required to settle in two business days (T+2), unless the parties to a trade expressly agree otherwise. Accordingly, purchasers who wish to trade the securities in the secondary market on any date prior to two business days before delivery of the securities will be required, by virtue of the fact that each security initially will settle in three business days (T+3), to specify alternative settlement arrangements to prevent a failed settlement of the secondary market trade.
Final valuation date:	October 14, 2025, subject to postponement for certain market disruption events and as described under "General Terms of the Notes — Market Disruption Events" and "— Maturity Date" in the accompanying product supplement.
Maturity date:	October 17, 2025, subject to postponement for certain market disruption events and as described under "General Terms of the Notes — Market Disruption Events" and "— Final Valuation Date" in the accompanying product supplement.
Issuer call feature:	UBS may elect, on or before any observation end date (other than the first observation end date and the final valuation date), to call the securities at its discretion in whole, but not in part (an "issuer call"), on the coupon payment date corresponding to such observation end date (the "call settlement date"), regardless of the closing levels of the underlying indices on such observation end date. **The first potential call settlement date is the second coupon payment date, approximately six months after the original issue date.**
Issuer call amount:	If UBS elects to call the securities, UBS will pay you on the call settlement date a cash payment per security equal to the stated principal amount plus any contingent coupon otherwise due, and no further payments will be made on the securities. Before UBS elects to call the securities, UBS will deliver written notice to the trustee by the applicable observation end date.
Contingent coupon:	· If the closing level of **each** underlying index is **equal to or greater than** its coupon barrier on each trading day during the applicable observation period (including the final observation period), UBS will pay you the contingent coupon for that observation period on the relevant coupon payment date. · If the closing level of **any** underlying index is **less than** its coupon barrier on any trading day during an observation period, the contingent coupon for that observation period will not accrue

	or be payable and UBS will not make any payment to you on the relevant coupon payment date. The contingent coupon is a fixed amount based upon equal quarterly installments at the contingent coupon rate. The contingent coupon per security that would be applicable to each coupon payment date for which the closing level of each underlying index is equal to or greater than its coupon barrier on each trading day during the applicable observation period will be: **$27.25.** **Contingent coupons on the securities are not guaranteed. UBS will not pay you the contingent coupon for any observation period in which the closing level of any underlying index is less than its coupon barrier.**
Contingent coupon rate:	The contingent coupon rate is 10.90% per annum.
Coupon payment dates:	Three business days following the related observation end date on which the applicable observation period ends except that the coupon payment date for the final observation end date will be the maturity date.
Observation end dates:	January 15, 2019, April 12, 2019, July 12, 2019, October 15, 2019, January 14, 2020, April 14, 2020, July 13, 2020, October 13, 2020, January 12, 2021, April 12, 2021, July 12, 2021, October 12, 2021, January 12, 2022, April 12, 2022, July 12, 2022, October 12, 2022, January 12, 2023, April 12, 2023, July 12, 2023, October 12, 2023, January 12, 2024, April 12, 2024, July 12, 2024, October 15, 2024, January 14, 2025, April 14, 2025, July 14, 2025 and October 14, 2025, subject to postponement for non-trading days and certain market disruption events (as described under "General Terms of the Notes — Observation End Dates", " — Final Valuation Date" and "— Market Disruption Events" in the accompanying product supplement). We also refer to October 14, 2025 as the final valuation date.
Observation Period:	The first observation period will consist of each day from but excluding the trade date to and including the first observation end date. Each subsequent observation period will consist of each day from but excluding the prior observation end date to and including the next following observation end date.
Trigger event:	A trigger event is deemed to have occurred if the closing level of **any** of the underlying indices is **less than** its respective trigger level on the trigger observation date. *In this case, you will be fully exposed to the underlying index return of the worst performing underlying index.*
Trigger observation date:	October 14, 2025, which is the final valuation date. The final valuation date is subject to postponement for non-trading days and certain market disruption events (as described under "General Terms of the Notes —Final Valuation Date" and "— Market Disruption Events" in the accompanying product supplement).
Payment at maturity:	· If UBS does not elect to call the securities and a trigger event does not occur, UBS will pay you a cash payment per security on the maturity date equal to the stated principal amount of $1,000 plus any contingent coupon otherwise due with respect to the securities on the maturity date. · If UBS does not elect to call the securities and a trigger event occurs, UBS will pay you a cash payment per security on the maturity date that is significantly less than the stated principal amount, if anything, equal to: $1,000 x (1 + Underlying Index Return of the Worst Performing Underlying Index) **You will lose a significant portion or all of your initial investment if UBS does not elect to call the securities and a trigger event occurs.**
Underlying index return:	With respect to each underlying index, the quotient, expressed as a percentage, of the following formula: $\frac{\text{Final Level} - \text{Initial Level}}{\text{Initial Level}}$

Worst performing underlying index:	The underlying index with the lowest underlying index return as compared to any other underlying index.
Final level:	The closing level of each underlying index on the final valuation date, as determined by the calculation agent.
Initial level:	22,694.66, which is the closing level of the Nikkei 225® Index on the trade date; 1,546.679, which is the closing level of the Russell 2000® Index on the trade date ; 3,194.41, which is the closing level of the EURO STOXX® 50 Index on the trade date
Coupon barrier:	15,886.26, which is equal to 70% of the initial level of the Nikkei 225® Index; 1,082.675, which is equal to 70% of the initial level of the Russell 2000® Index; 2,236.09, which is equal to 70% of the initial level of the EURO STOXX® 50 Index
Trigger level:	15,886.26, which is equal to 70% of the initial level of the Nikkei 225® Index; 1,082.675, which is equal to 70% of the initial level of the Russell 2000® Index; 2,236.09, which is equal to 70% of the initial level of the EURO STOXX® 50 Index
CUSIP/ISIN:	90270KUU1 / US90270KUU14
Listing:	The securities will not be listed or displayed on any securities exchange or electronic communications network.
Calculation agent:	UBS Securities LLC

Commissions and issue price:	Price to Public[1]	Fees and Commissions[1]	Proceeds to Issuer
Per security:	100%	3.00%[a] +0.50%[b] 3.50%	96.50%
Total:	$7,566,000.00	$264,810.00	$7,301,190.00

(1) UBS Securities LLC has agreed to purchase from UBS AG the securities at the price to public less a fee of $35.00 per $1,000.00 stated principal amount of securities. UBS Securities LLC has agreed to resell all of the securities to Morgan Stanley Smith Barney LLC (“Morgan Stanley Wealth Management”) at an underwriting discount which reflects:

(a) a fixed sales commission of $30.00 per $1,000.00 stated principal amount of securities that Morgan Stanley Wealth Management sells and

(b) a fixed structuring fee of $5.00 per $1,000.00 stated principal amount of securities that Morgan Stanley Wealth Management sells,

each payable to Morgan Stanley Wealth Management. See “Supplemental information regarding plan of distribution (conflicts of interest); secondary markets (if any)".

The estimated initial value of the securities as of the trade date is $955.92. The estimated initial value of the securities was determined as of the close of the relevant markets on the date hereof by reference to UBS’ internal pricing models, inclusive of the internal funding rate. For more information about secondary market offers and the estimated initial value of the securities, see “Risk Factors — Fair value considerations” and “— Limited or no secondary market and secondary market price considerations” beginning on pages 13 and 14 of this document. **The securities involve risks not associated with an investment in ordinary debt securities. See “Risk Factors” beginning on page 12.**

Trigger Callable Contingent Yield Securities with Daily Coupon Observation and 6-Month Initial Non-Call Period due October 17, 2025

$7,566,000 Based on the worst performing of the Nikkei 225® Index, the Russell 2000® Index and the EURO STOXX 50® Index

Investment Summary

The Trigger Callable Contingent Yield Securities with Daily Coupon Observation and 6-Month Initial Non-Call Period due October 17, 2025 based on the worst performing of the Nikkei 225® Index, the Russell 2000® Index and the EURO STOXX 50® Index, which we refer to as the securities, provide an opportunity for investors to earn a contingent coupon, which will be an amount equal to $27.25 (equivalent to 10.90% per annum of the stated principal amount) per security, **but only if** the closing level of **each** underlying index is **equal to or greater than** 70% of its respective initial level, which we refer to as the coupon barrier, on each trading day during the applicable observation period. The contingent coupon, if any, will be payable on the relevant coupon payment date, which will be three business days after the related observation end date. **It is possible that the closing levels of one or more of the underlying indices could remain below their respective coupon barriers for extended periods of time or even throughout the term of the securities so that you may receive few or no contingent coupons.**

If the closing level of any underlying index is less than its coupon barrier on any trading day during the applicable observation period, the contingent coupon for that observation period will not accrue or be payable and UBS will not make any payment to you on the relevant coupon payment date. UBS may elect, on or before any applicable observation end date (other than the first observation end date and the final valuation date), to call the securities at its discretion in whole, but not in part (an "issuer call"), on the coupon payment date corresponding to such observation end date (the "call settlement date"), regardless of the closing levels of the underlying indices on such observation end date. If UBS elects to call the securities, UBS will pay you on the call settlement date a cash payment per security equal to the stated principal amount plus any contingent coupon otherwise due, and no further payments will be made on the securities. Before UBS elects to call the securities, UBS will deliver written notice to the trustee by the applicable observation end date. If UBS does not elect to call the securities, the closing levels of **all** of the underlying indices are equal to or greater than their respective coupon barriers on each trading day during the final observation period and a trigger event does not occur, UBS will pay you a cash payment per security on the maturity date equal to the stated principal amount of $1,000 plus the contingent coupon otherwise due on the maturity date. If UBS does not elect to call the securities and the final level of each of the underlying indices are equal to or greater than their respective trigger levels but the closing level of **any** underlying index is less than its coupon barrier on any trading day during the final observation period, the payment at maturity will be equal to the stated principal amount. If, however, UBS does not elect to call the securities and a trigger event occurs, UBS will pay you a cash payment per security on the maturity date that is significantly less than the stated principal amount, if anything, equal to (i) the stated principal amount *times* (ii) one *plus* the underlying index return of the worst performing underlying index. A trigger event is deemed to have occurred if the closing level of any underlying index is less than its trigger level on the trigger observation date. You will lose a significant portion or all of your initial investment if UBS does not elect to call the securities and a trigger event occurs. The value of such cash payment will be significantly less than the stated principal amount of the securities and could be zero. Investors in the securities must be willing to accept the risk of losing a significant portion or all of their initial investment and also the risk of not receiving any contingent coupons. In addition, investors will not participate in any appreciation of the underlying indices.

UBS may elect to call the securities at its discretion prior to the maturity date. UBS is less likely to exercise its issuer call right when the closing level of **any** of the underlying indices is less than its coupon barrier. As such, UBS will be more likely to exercise its issuer call right when the closing level of each underlying index is above its coupon barrier, which would otherwise result in an amount of interest payable on the securities that is greater than instruments of a comparable maturity and credit rating trading in the market. On the other hand, UBS will be less likely to exercise its issuer call right when the closing level of **any** underlying index is less than its coupon barrier and/or when the final level of any underlying index is expected to be less than its trigger level, such that you will receive no contingent coupons and/or that you will suffer a significant loss on your initial investment in the securities at maturity. Therefore, if UBS does not exercise its issuer call right, it is more likely that you will receive few or no contingent coupons and suffer a significant loss at maturity.

Trigger Callable Contingent Yield Securities with Daily Coupon Observation and 6-Month Initial Non-Call Period due October 17, 2025

$7,566,000 Based on the worst performing of the Nikkei 225® Index, the Russell 2000® Index and the EURO STOXX 50® Index
Key Investment Rationale

The securities do not guarantee the payment of interest or the repayment of the stated principal amount. Instead, the securities offer the opportunity for investors to earn a contingent coupon equal to $27.25 (equivalent to 10.90% per annum of the stated principal amount) per security, **but only if** the closing level of **each** underlying index is **equal to or greater than** 70% of its respective initial level, which we refer to as the coupon barrier, on **each** trading day during the applicable observation period. UBS may elect, on or before the applicable observation end date (other than the first observation end date and the final valuation date), to call the securities at its discretion in whole, but not in part, on the call settlement date for a cash payment equal to the stated principal amount per security *plus* any contingent coupon otherwise due with respect to the related observation end date. The payment at maturity will vary depending on the final level of each underlying index, as follows:

Scenario 1	On or before any observation end date other than the first observation end date and the final valuation date, UBS elects to call the securities in whole, but not in part. § On the call settlement date, the securities will be called and UBS will pay a cash payment equal to the stated principal amount *plus* any contingent coupon otherwise due with respect to the applicable observation period. The related contingent coupon will be paid only if all of the closing levels for all of the underlying indices were equal to or greater than their respective coupon barriers on each trading day during the applicable observation period. Following an issuer call, no further payments will be made on the securities. § Investors will not participate in any appreciation of the underlying indices from their respective initial levels.
Scenario 2	UBS does not elect to call the securities, a trigger event does not occur and the closing levels of all of the underlying indices are equal to or greater than their respective coupon barriers on each trading day during the final observation period. § UBS will pay you a cash payment per security on the maturity date equal to (i) the stated principal amount *plus* (ii) the contingent coupon otherwise due on the maturity date. § Investors will not participate in any appreciation of the underlying indices from their respective initial levels.
Scenario 3	UBS does not elect to call the securities, a trigger event does not occur and the closing level of at least one underlying index is less than its respective coupon barrier on at least one trading day during the final observation period. § UBS will pay you a cash payment per security on the maturity date equal to the stated principal amount. § Investors will not participate in any appreciation of the underlying indices from their respective initial index level and will not receive a contingent coupon on the maturity date.
Scenario 4	UBS does not elect to call the securities prior to maturity and a trigger event occurs. § The closing level of **any** underlying index is **less than** its respective trigger level.

- UBS will pay you a cash payment per security on the maturity date, if anything, that is significantly less than the stated principal amount, equal to (i) the stated principal amount *times* (ii) one *plus* the underlying index return of the worst performing underlying index.

- **Investors will lose a significant portion or all of their initial investment in this scenario.**

Investing in the securities involves significant risks. You may lose a significant portion or all of your initial investment. Any payment on the securities, including payments in respect of an issuer call, contingent coupon or any repayment of principal provided at maturity, is dependent on the ability of UBS to satisfy its obligations when they become due. If UBS were to default on its payment obligations, you may not receive any amounts due to you under the securities and you could lose all of your initial investment.

The securities will not pay a contingent coupon on a coupon payment date (including the maturity date) if the closing level of any underlying index is less than its coupon barrier on any trading day during the applicable observation period, and you may receive few or no contingent coupons during the term of the securities. UBS may elect, on or before any applicable observation end date (other than the first observation end date and the final valuation date), to call the securities on the related call settlement date, regardless of the closing levels of the underlying indices on such observation end date. If UBS does not elect to call the securities and a trigger event occurs, you will lose a significant portion or all of your initial investment at maturity.

Trigger Callable Contingent Yield Securities with Daily Coupon Observation and 6-Month Initial Non-Call Period due October 17, 2025

$7,566,000 Based on the worst performing of the Nikkei 225® Index, the Russell 2000® Index and the EURO STOXX 50® Index

Investor Suitability

The securities may be suitable for you if:

- You fully understand the risks of an investment in the securities, including the risk of loss of a significant portion or all of your initial investment.
- You can tolerate a loss of a significant portion or all of your investment and are willing to make an investment that may have the same downside market risk as an investment in the stocks comprising the worst performing underlying index.
- You understand and accept that an investment in the securities is linked to the performance of the worst performing underlying index and not a basket of the underlying indices, and that you will lose a significant portion or all of your initial investment if the closing level of **any** underlying index is **less than** its trigger level on the trigger observation date.
- You are willing to risk receiving no contingent coupons and believe the closing level of **each** underlying index will be **equal to or greater than** its coupon barrier on each trading day during each observation period.
- You believe a trigger event will not occur, meaning the closing level of **each** underlying index will be equal to or greater than its trigger level on the trigger observation date.
- You accept that the risks of each underlying index are not mitigated by the performance of any other underlying index and the risks of investing in securities with a return based on the performance of multiple underlying indices.
- You understand and accept that you will not participate in any appreciation in the level of any of the underlying indices and that your potential return is limited to any contingent coupons received.
- You can tolerate fluctuations in the price of the securities prior to maturity that may be similar to or exceed the downside fluctuations in the levels of the underlying indices.
- You are willing to invest in the securities based on the coupon barriers, trigger levels and contingent coupon rate specified on the cover hereof.
- You do not seek guaranteed current income from your investment and are willing to forgo any dividends paid on the stocks comprising the underlying indices (the “index constituents”).
- You are willing to invest in securities that UBS may elect to call early at its discretion and you are otherwise willing to hold such securities to maturity and accept that there may be little or no secondary market for the securities.
- You understand and are willing to accept the risks associated with the underlying indices.
- You are willing to assume the credit risk of UBS for all payments under the securities, and understand that if UBS defaults on its obligations you may not receive any amounts due to you including any repayment of principal.
- You understand that the estimated initial value of the securities determined by our internal pricing models is lower than the issue price and that should UBS Securities LLC or any affiliate make secondary markets for the securities, the price (not including their customary bid-ask spreads) will temporarily exceed the internal pricing model price.

The securities may not be suitable for you if:

- You do not fully understand the risks inherent in an investment in the securities, including the risk of loss of a significant portion or all of your initial investment.
- You are not willing to make an investment that may have the same downside market risk as an investment in the index constituents of the worst performing underlying index.
- You do not understand or are unwilling to accept that an investment in the securities is linked to the performance of the worst performing underlying index and not a basket of the underlying indices, and that you will lose a significant portion or all of your initial investment if the closing level of **any** underlying index is **less than** its trigger level on the trigger observation date.
- You require an investment designed to provide a full return of principal at maturity.

You are unwilling to risk receiving no contingent coupons during the term of the securities or believe that the closing level of at least one of the underlying indices will decline during the term of the securities and is likely to be less than its coupon barrier on at least one trading day during an observation period.

You believe a trigger event will occur, meaning the closing level of **any** underlying index will be **less than** its trigger level on the trigger observation date.

Trigger Callable Contingent Yield Securities with Daily Coupon Observation and 6-Month Initial Non-Call Period due October 17, 2025

$7,566,000 Based on the worst performing of the Nikkei 225® Index, the Russell 2000® Index and the EURO STOXX 50® Index

You cannot accept that the risks of each underlying index are not mitigated by the performance of any other underlying index and the risks of investing in securities with a return based on the performance of multiple underlying indices.

You seek an investment that participates in the full appreciation in the levels of the underlying indices or that has unlimited return potential.

You cannot tolerate fluctuations in the price of the securities prior to maturity that may be similar to or exceed the downside fluctuations in the levels of the underlying indices.

You are unwilling to invest in the securities based on the coupon barriers, trigger levels or contingent coupon rate specified on the cover hereof.

You seek guaranteed current income from this investment or prefer to receive any dividends paid on the index constituents.

You are unable or unwilling to hold securities that UBS may elect to call early at its discretion, or you are otherwise unable or unwilling to hold such securities to maturity or you seek an investment for which there will be an active secondary market.

You do not understand or are not willing to accept the risks associated with the underlying indices.

You are not willing to assume the credit risk of UBS for all payments under the securities, including any repayment of principal.

Trigger Callable Contingent Yield Securities with Daily Coupon Observation and 6-Month Initial Non-Call Period due October 17, 2025

$7,566,000 Based on the worst performing of the Nikkei 225® Index, the Russell 2000® Index and the EURO STOXX 50® Index
How the Securities Work

The following diagrams illustrate the potential outcomes for the securities depending on (1) the closing levels, (2) whether UBS elects to call the securities and (3) the final levels.

Diagram #1: Observation Periods (other than the First Observation Period and Final Observation Period)

Diagram #2: Payment at Maturity if No Issuer Call Occurs

For more information about the payout upon an early redemption or at maturity in different hypothetical scenarios, see "Hypothetical Examples" starting on page 8.

Trigger Callable Contingent Yield Securities with Daily Coupon Observation and 6-Month Initial Non-Call Period due October 17, 2025

$7,566,000 Based on the worst performing of the Nikkei 225® Index, the Russell 2000® Index and the EURO STOXX 50® Index
Hypothetical Examples

The below examples are based on the following terms and are purely hypothetical (the actual terms of your security are specified on the cover hereof; amounts may have been rounded for ease of analysis):

Hypothetical Initial Level:	
Underlying Index A:	24,000
Underlying Index B:	1,600
Underlying Index C:	3,200
Hypothetical Coupon Barrier:	
Underlying Index A:	16,800, which is 70% of the initial level
Underlying Index B:	1,120, which is 70% of the initial level
Underlying Index C:	2,240, which is 70% of the initial level
Hypothetical Trigger Level:	
Underlying Index A:	16,800, which is 70% of the initial level
Underlying Index B:	1,120, which is 70% of the initial level
Underlying Index C:	2,240, which is 70% of the initial level
Hypothetical Term:	Approximately 7 years
Hypothetical Contingent Coupon:	$27.25 per security (equivalent to 10.90% per annum of the stated principal amount)
Stated Principal Amount:	$1,000.00 per security

In Examples 1 and 2, on a specified observation end date UBS elects and delivers written notice to the trustee to call the securities on the related call settlement date. In Examples 3, 4 and 5, UBS does not elect to call the securities and the securities and remain outstanding until maturity.

	Example 1 - UBS calls the securities on the second observation end date.					**Example 2 - UBS calls the securities on the thir**

Trigger Callable Contingent Yield Securities with Daily Coupon Observation and 6-Month Initial Non-Call Period due October 17, 2025

$7,566,000 Based on the worst performing of the Nikkei 225® Index, the Russell 2000® Index and the EURO STOXX 50® Index

* The issuer call amount includes any unpaid contingent coupon with respect to the observation end date on which the issuer, at their sole discretion, decides to call the securities.

In **Example 1**, UBS notifies the trustee on the second observation end date (which is approximately 6 months after the original issue date) that it would like to call the securities and the closing level of each underlying index is equal to or greater than its coupon barrier on each trading day during the second observation period. On the first potential call settlement date, you receive the issuer call amount of $1,027.25 (reflecting your principal amount plus the applicable contingent coupon). When added to the contingent coupon of $27.25 received in respect of the prior observation period, you will have received a total of $1,054.50. You will not receive any further payments on the securities.

In this example, the issuer call feature limits the term of your investment to approximately 6 months and you may not be able to reinvest at comparable terms or returns. If the securities are subject to issuer call, you will stop receiving contingent coupons. Your total payment per security in this example is $1,054.50 (a 5.45% total return on the securities over 6 months).

In **Example 2**, UBS notifies the trustee on the third observation end date that it would like to call the securities. As the closing level of each underlying index is equal to or greater than its coupon barrier on each trading day during the first observation period, you receive the contingent coupon of $27.25 with respect to the first observation period. As the closing level of at least one of the underlying indices was less than its coupon barrier on a trading day during the second observation period, you will not receive a contingent coupon with respect to the second observation period. As the closing level of at least one of the underlying indices was less than its coupon barrier on a trading day during the third observation period, you will not receive a contingent coupon with respect to the third observation period. Following the third observation period, you receive an issuer call amount of $1,000.00, reflecting your principal amount. When added to the contingent coupon of $27.25 received in respect of the prior observation periods, you will have received a total of $1,027.25. You will not receive any further payments on the securities.

In this example, the issuer call feature limits the term of your investment to approximately 9 months and you may not be able to reinvest at comparable terms or returns. If the securities are subject to an issuer call, you will stop receiving contingent coupons. Further, although all of the underlying indices have appreciated by 20% from their respective initial levels on the third observation end date, you receive only $1,027.25 per security and do not benefit from such appreciation. Your total payment per security in this example is $1,027.25 (a 2.725% total return on the securities over 9 months).

Example 3- UBS does not call the securities and a trigger event does not occur.

Observation Periods	Underlying Index A	Underlying Index B	Underlying Index C	Contingent Coupon	Payment (per security)

Payment at Maturity	**$1,027.25**				

Trigger Callable Contingent Yield Securities with Daily Coupon Observation and 6-Month Initial Non-Call Period due October 17, 2025

$7,566,000 Based on the worst performing of the Nikkei 225® Index, the Russell 2000® Index and the EURO STOXX 50® Index

In **Example 3**, UBS does not elect to call the securities and the final level of each underlying index is equal to or greater than its trigger level. During each of the first through ninth observation periods, the closing levels of **at least one** of the underlying indices is less than its respective coupon barrier on a trading day during the applicable observation periods. As a result, you do not receive a contingent coupon with respect to any of those observation periods. Because the closing levels of **all** of the underlying indices are equal to or greater than their respective coupon barriers on each trading day during the final observation period, at maturity you receive the stated principal amount *plus* the contingent coupon with respect to the final observation period. Your payment at maturity is calculated as follows:

Stated Principal Amount + Contingent Coupon = $1,000.00 + $27.25 = $1,027.25

In this example, you receive the stated principal amount per security plus the contingent coupon, equal to a total payment of $1,027.25 per security at maturity. Your total payment per security in this example is $1,027.25 (a 2.725% total return over the 7-year term of the securities). You will not participate in the appreciation of any of the underlying indices.

	Example 4- UBS does not call the securities and a trigger event does not occur.			**Example 5- UBS does not elect to call the securities and a trigger event occurs.**
