ULTRAPETROL REPORTS FINANCIAL RESULTS
FOR FOURTH QUARTER AND FULL YEAR 2012

NASSAU, Bahamas, March 14, 2013 -- Ultrapetrol (Bahamas) Limited (NASDAQ: ULTR), an industrial transportation company serving marine transportation needs in three markets (River Business, Offshore Supply Business and Ocean Business), today announced financial results for the fourth quarter and full year ended December 31, 2012.

Full Year 2012 highlights:

On December 12, 2012, we announced the closing of the Investment Agreement entered into on November 13, 2012, with Sparrow Capital Investments Ltd. ("Sparrow"). Pursuant to the Investment Agreement, we sold 110,000,000 shares of newly issued common stock to Sparrow at a purchase price of \$2.00 per share and received proceeds of \$220.0 million from the transaction;

Recorded full year 2012 revenues of \$313.2 million;

Recorded adjusted consolidated EBITDA before financial income and other financial expense is \$34.1 million for 2012; 1 which includes adjusted EBITDA of \$3.8 million from our River Business segment, adjusted EBITDA of \$27.7 million from our Offshore Supply Business segment, and adjusted EBITDA of \$2.7 million from our Ocean Business segment. After including \$(2.1) million from financial income and other financial expense (mainly attributable to foreign currency exchange variance), our adjusted consolidated EBITDA for 2012 was \$32.0 million;

Total adjusted net loss and adjusted net loss per share of \$(46.0) million and \$(1.30), respectively, in 2012, which excludes the effect of a non-cash loss of \$(16.0) million corresponding to an impairment charge of our ocean tanker Amadeo, a \$1.4 million gain for deferred taxes on an unrealized foreign currency exchange loss on U.S. dollar-denominated debt of our Brazilian subsidiary in our Offshore Supply Business and a \$(0.9) million non-cash loss of expenses from our DVB/Natixis loan facility related to its partial extinguishment; and includes a \$2.1 million gain related to the sale of fourteen dry barges which were subsequently leased back to the Company (for accounting purposes such gain will be deferred over the term of the lease up to the present value of the lease payments). 2 Before including any of these effects, the net loss and net loss per share are \$(63.7) million and \$(1.80) per share, respectively;

FY 2012 Adjusted EBITDA for our Offshore Supply Business segment increased 39% to \$27.7 million as compared to \$19.9 million in the same period of 2011;

Fourth Quarter 2012 and subsequent events highlights:

During the fourth quarter of 2012, we entered into a barge building contract whereby we agreed to build and sell from our Punta Alvear yard 13 newbuilt jumbo dry barges to a third party with deliveries between March and June 2013;

During the fourth quarter of 2012, we entered into a Transshipment Services Agreement with a non-related third party to provide storage and transshipment services of cargo from river barges to ocean

export vessels through one of our ocean going barges. Under such Agreement, the Company agreed to transship approximately 800,000 metric tons per year until June 1, 2016;

During the fourth quarter of 2012, we entered into a barge building contract whereby we agreed to build and sell from our Punta Alvear yard two newbuilt jumbo dry uncovered barges to a third party;

During the fourth quarter of 2012, we delivered from our barge building facility a total of 15 barges related to the barge building contracts entered into with third parties; and

- 1 For a reconciliation of non-GAAP measures, please see the tables included under the supplemental information section of this release.
 - 2 For a detailed explanation of these adjustments and other adjustments elsewhere in this release, see "Overview of Financial Results" and the tables included under the Supplemental Information section of this release.
-

On January 23, 2013, we repurchased \$80.0 million of our outstanding Convertible Senior Notes in accordance with the provisions of the indenture governing the Convertible Senior Notes. The Convertible Senior Notes were repurchased at par plus accrued and unpaid interest to, but excluding, the date of repurchase, for a total price of \$1,001.61 per \$1,000.00 principal amount of Convertible Senior Notes. No Convertible Senior Notes remain outstanding.

Felipe Menéndez, Ultrapetrol's President and Chief Executive Officer, stated, "At the end of 2012, we received a \$220.0 million capital infusion from Southern Cross Group. This is a very important transaction that we believe will have a very positive effect for the Company. It strengthens our balance sheet, reduces our net debt and opens new doors for our future growth. While our River Business was impacted by a severe drought during the 2012 planting season combined with very low river levels during critical months of the year, we have entered 2013 in a strong position to take advantage of significantly improved conditions on the river and we have implemented measures to improve our results. This year's planting season has seen healthy rainfall and experts anticipate strong soybean yields in the regions we serve. In addition, we have been successfully renewing Contracts of Affreightments in this segment, which will enable the Company to take advantage of a stronger rate environment. We also continue to benefit from our new building yard, which is maintaining high productivity levels and is fully employed, building barges for both the Company and third parties. We believe that the combined effect of these developments, as well as our on-going re-engining and re-powering initiatives, will have a long-lasting positive impact on our River Business segment."

Mr. Menéndez continued, "We continue to grow our Offshore Supply Business and currently have nine vessels in operation, eight contracted with Petrobras and one with Nexen Petroleum UK Ltd. Our UP Amber, the second PSV which was under construction in India was delivered during the first quarter of 2013. We look forward to the delivery of two additional PSVs, with the first expected to take place during the second quarter of 2013. In addition, we have completed the refinancing for four PSVs and expect to have the balance of the program fully financed by the third quarter of 2013."

Mr. Menéndez concluded, "As we progress through 2013, we anticipate a strong year with higher transportation demand at increased average freight rates, an offshore fleet which will show progressive increases in operational results as new vessels come into service at attractive time charter rates and a good performance of our ocean feeder container service."

Overview of Financial Results

Total revenues for the fourth quarter 2012 were \$86.3 million as compared with \$96.2 million in the same period of 2011.

Adjusted EBITDA for the fourth quarter 2012 was \$6.2 million as compared with \$16.1 million in the same period of 2011. For a reconciliation of adjusted EBITDA to cash flows from operating activities, please see the tables at the end of this release.

Adjusted net loss for the fourth quarter of 2012 was \$(13.4) million, or \$(0.26) per share as compared with net loss of \$(7.0) million, or \$(0.24) per share, during the same period of 2011. Fourth quarter 2012 adjusted net loss excludes the effect of a non-cash loss of \$(16.0) million corresponding to an impairment charge of our ocean tanker Amadeo, a \$(0.9) million non-cash loss of expenses from our DVB/Natixis loan facility related to its partial extinguishment and a \$0.1 million gain for deferred taxes on an unrealized foreign currency exchange loss on U.S. dollar-denominated debt of our Brazilian subsidiary in our Offshore Supply Business; and includes a \$1.3 million gain related to the sale of eight dry barges which were subsequently leased back to the Company (for accounting purposes such gain will be deferred over the term of the lease up to the present value of the lease payments). Before including any of these

effects, the net loss and net loss per share for the fourth quarter of 2012 are \$(31.6) million and \$(0.60) per share, respectively.

Len Hoskinson, Ultrapetrol's Chief Financial Officer, said, " We experienced challenging operating conditions in 2012 in our River Business. However, a conservative profile of our debt and our diversified portfolio of businesses helped us to execute our growth plans as originally conceived. We have successfully concluded the new \$84.0 million financing of our Indian PSV newbuild program which is now jointly financed DVB, NIBC and ABN Amro Bank. The \$220.0 million equity infusion reduces our leverage and the resulting increased liquidity puts us on a stronger footing for the funding of our future growth plans."

Business Segment Highlights

River

Fourth quarter 2012 River Business segment adjusted EBITDA decreased to a \$(0.8) million loss from a \$10.6 million gain in the same period of 2011. For a reconciliation of segment adjusted EBITDA to operating profit (loss), please see the tables at the end of this release.

With soy and its by-products representing between 60% and 65% of our cargo, fourth quarter results were affected by a severe drought that impacted the soybean production in the region earlier in the year and significantly reduced the volumes of soy products transported. In addition, lower than usual water levels in the Upper Paraguay River impaired our ability to carry iron ore. The combined effect was a 28% decrease in the volume of cargo transported in the fourth quarter of 2012 as compared with the same period of 2011.

Our operating costs in the River Business, particularly manning and maintenance costs, have been impacted by salary increases and by inflationary pressure on costs not adjusted by a proportional devaluation of the local currencies with respect to the U.S. dollar.

According to the United States Department of Agriculture, the soybean crop in Paraguay for 2012 was 4.4 million tons down from 7.1 million tons in 2011, a decrease of 39% year over year. This decrease is mainly attributable to the effects of a severe drought and higher than average temperatures in January and February 2012 in large parts of Argentina, central Brazil, and Paraguay. Soybean, particularly the early variety crop in Paraguay suffered severe impacts on its yields. Compounding this effect, low river levels limited the draft at which we could operate through the Upper Paraguay River during the third and fourth quarter. As a result, longer transit times and fuel costs had a substantial effect on our river operations.

Despite the severe drought in 2012, the seeded area has grown considerably for 2013, driven by the strong prices of soybean and other agricultural commodities. Argentina, Brazil, Bolivia, Paraguay and Uruguay are estimated to account for approximately 55% of world soybean production in 2013, as compared to 30% in 1995. This steady long-term growth trend represents an important demand driver for Ultrapetrol's River Business. The Company continues to add capacity and implement various initiatives to expand margins in an effort to profitably capitalize on the long-term growing demand of the agricultural sector along the Hidrovia, which remains strong.

The Company's barge building shipyard, which we believe is one of the most modern in South America, has been in operation since the first quarter of 2010. During 2012, we delivered a total of 37 barges in connection with third party contracts entered into by the Company.

In addition to these contracts, in the fourth quarter we entered into another contract to build 13 dry barges for a total of \$12.7 million of which 30% has already been advanced by the buyer. The yard will continue to be fully employed until the end of 2013, focusing on the construction of barges to be delivered under the shipbuilding contracts already signed and also barges for the Company's River Business. The Company has successfully continued its re-engining and re-powering programs that aim to change the engines on a substantial portion of its line pushboats from diesel to heavy fuel consuming ones. Having finalized the re-engining of two pushboats in the second and third quarters of 2012, six heavy fuel-consuming pushboats are now in operation (compared to four pushboats in operation a year ago) and the next re-engined pushboat is expected to commence operation within the fourth quarter of 2013. This program has shown its potential to lead to substantial savings in fuel expense and to an increase in tow size and navigation speed, which we believe will enhance our EBITDA margins in the future.

Offshore Supply

In the Offshore Supply Business, with the commencement of operation of our UP Jade in August 2012 we now operate a fleet of nine PSVs. The adjusted EBITDA generated by the Offshore Supply Business segment during the fourth quarter of 2012 was \$8.1 million, 35% higher than the \$6.0 million generated in the same period of 2011. For a reconciliation of segment adjusted EBITDA to operating profit (loss), please see the tables at the end of this release.

Total revenues from the Offshore Supply Business for the fourth quarter of 2012 increased by \$4.5 million, or 25%, to \$22.5 million as compared to \$18.0 million in the same period of 2011. This increase was primarily attributable to the operation of our UP Jade, the full quarter operation of our UP Jasper and to the higher operating days of our UP Diamante during the fourth quarter of 2012 as compared to the same period of 2011 when it underwent drydock.

As already announced, we continued our PSV building program in India wherefrom two ships have already been delivered. The first PSV, UP Jade, commenced its time charter with Petrobras in August 2012 and the second vessel,

UP Amber, was delivered in January 2013. Two additional vessels remain to be delivered, the first of which, UP Pearl, is expected to take place during the second quarter of 2013.

Ocean

The Ocean Business segment adjusted EBITDA decreased by \$2.3 million from \$5.0 million for the full year of 2011 to \$2.7 million for 2012. In the fourth quarter of 2012 this decrease was of \$2.0 million when compared to the same period of 2011 mainly as a result of the drydock of our Argentino in the fourth quarter of 2012. For a reconciliation of segment adjusted EBITDA to operating profit (loss), please see the tables at the end of this release.

Revenues from the Ocean Business decreased from \$17.1 million in the fourth quarter of 2011 to \$15.6 million in the same period of 2012. While our Product Tanker fleet has experienced increases in revenues as a result of charter rate adjustments, overall ocean business revenues decreased mainly as a result of the drydock undergone by our Argentino and by the offhire days of our Amadeo on account of repairs, both during the fourth quarter of 2012.

The Company operated a total of four vessels in its Product Tanker fleet in the fourth quarter of 2012 (Miranda I, Amadeo, Alejandrina, and Austral) which continue to be employed in the South American coastal trade on charters with oil majors that operate in the region.

In our Ocean Business, inflationary pressures particularly in manning costs not compensated by a proportional devaluation of the local currency against the U.S. dollar have resulted in increased operating costs. The volumes in our container service particularly in the southbound leg have been sustained at high levels.

Use of Non-GAAP Measures

Ultrapetrol believes that the disclosed non-Generally Accepted Accounting Principles, or GAAP, measures such as adjusted EBITDA, adjusted net income and any other adjustments thereto, when presented in conjunction with comparable GAAP measures, are useful for investors to use in evaluating the liquidity of the company. These non-GAAP measures should not be considered a substitute for, or superior to, measures of liquidity prepared in accordance with GAAP. A reconciliation of adjusted EBITDA to segment operating profit and cash flow from operations is presented in the tables that accompany this press release.

Investment Community Conference Call

Ultrapetrol will host a conference call for investors and analysts on Friday, March 15, 2013, at 10:00 a.m. EDT accessible via telephone and Internet with an accompanying slide presentation. Investors and analysts may participate in the live conference call by dialing 1-888-282-0576 (toll-free U.S.) or +1-212-547-0230 (outside of the U.S.); passcode: ULTR. Please register at least 10 minutes before the conference call begins. A replay of the call will be available for one week via telephone starting approximately one hour after the call ends. The replay can be accessed at 1-866-419-2884 (toll-free U.S.) or +1-203-369-0764 (outside of the U.S.); passcode: 43773. The webcast will be archived on Ultrapetrol's Web site for 30 days after the call.

About Ultrapetrol

Ultrapetrol is an industrial transportation company serving the marine transportation needs of its clients in the markets on which it focuses. It serves the shipping markets for containers, grain and soya bean products, forest products, minerals, crude oil, petroleum, and refined petroleum products, as well as the offshore oil platform supply market with its extensive and diverse fleet of vessels. These include river barges and pushboats, platform supply vessels, tankers and two container feeder vessels. More information on Ultrapetrol can be found at www.ultrapetrol.net.

Forward-Looking Language

The forward-looking statements in this press release are based upon various assumptions, many of which are based, in turn, upon further assumptions, including without limitation, our management's examination of historical operating trends, data contained in our records and other data available from third parties. Although we believe that these assumptions were reasonable when made, because these assumptions are inherently subject to significant uncertainties and contingencies which are difficult or impossible to predict and are beyond our control, we cannot assure you that we will achieve or accomplish these expectations, beliefs or projections.

In addition to these important factors, other important factors that, in our view, could cause actual results to differ materially from those discussed in the forward-looking statements include future operating or financial results; pending or recent acquisitions, business strategy and expected capital spending or operating expenses, including dry docking and insurance costs; general market conditions and trends, including charter rates, vessel values, and factors affecting vessel supply and demand; our ability to obtain additional financing; our financial condition and liquidity, including our ability to obtain financing in the future to fund capital expenditures, acquisitions and other general corporate activities; our expectations about the availability of vessels to purchase, the time that it may take to construct new vessels, or vessels' useful lives; our dependence upon the abilities and efforts of our management team; changes in governmental rules and regulations or actions taken by regulatory authorities; adverse weather conditions that can affect production of the goods we transport and navigability of the river system; the highly competitive nature of the oceangoing transportation industry; the loss of one or more key customers; fluctuations in foreign exchange rates and devaluations; potential liability from future litigation; and other factors. Please see our filings with the Securities and Exchange Commission for a more complete discussion of these and other risks and uncertainties.

Adjusted Consolidated EBITDA (5)	\$ 32,045	\$ 54,028	\$ 61,293	\$ 57,129	\$ 116,859

(1) Operating and manufacturing expenses are voyage expenses and running costs. Voyage expenses, which are incurred when a vessel is operating under a contract of affreightment (as well as any time when they are not operating under time or bareboat charter), comprise all costs relating to a given voyage, including port charges, canal dues and fuel (bunkers) costs, are paid by the vessel owner and are recorded as voyage expenses. Voyage expenses also include charter hire payments made by us to owners of vessels that we have chartered in. Manufacturing expenses, which are incurred when a constructed river barge is sold, is comprised of steel cost, which is the largest component of our raw materials and the cost of labor. Running costs, or vessel operating expenses, include the cost of all vessel management, crewing, repairs and maintenance, spares and stores, insurance premiums, lubricants and certain drydocking costs.

(2) Net of income tax effect.

(3) Current assets less current liabilities.

(4) Includes accrued interest.

(5) The following table reconciles our EBITDA as defined in the Notes due 2014 and Adjusted Consolidated EBITDA to our cash flows from operating activities:

	Year Ended December 31,				
	2012	2011	2010	2009	2008
	(Dollars in thousands)				
Net cash (used in) provided by operating activities from continuing operations	\$ (3,935)	\$ 14,772	\$ 20,844	\$ 38,679	\$ 79,902
Net cash (used in) provided by operating activities from discontinued operations	--	(15)	(1,950)	37	(8,645)
Total cash flows from operating activities	(3,935)	14,757	18,894	38,716	71,257
Plus					
Adjustments from continuing operations
