PART I

ITEM 1. DESCRIPTION OF BUSINESS.

GENERAL DESCRIPTION OF BUSINESS

Kestrel Energy, Inc. (the "Company") was incorporated under the laws of the State of Colorado on November 1, 1978. The Company's principal business is the acquisition, either alone or with others, of interests in proved developed producing oil and gas leases, and exploratory and developmental drilling.

At June 30, 2002 the Company owned oil and gas interests in the states of Louisiana, New Mexico, Oklahoma, Texas, South Dakota and Wyoming

RECENT ACTIVITIES

On February 21, 2000, the Company entered into a Line of Credit agreement with Wells Fargo Bank West N.A., which provided the Company a borrowing base of \$600,000 with interest at Wells Fargo prime rate plus 2.5%. On September 27, 2000, the Company and Wells Fargo amended the Line of Credit Agreement to provide the Company a borrowing base of \$2,000,000 and reduced the interest rate to 1.5% over prime. In May 2001, the Company restructured its line of credit agreement with Wells Fargo. Under the prior terms the Company had a borrowing base of \$2,000,000 with interest paid monthly. The new agreement lowered the borrowing base to \$1,400,000 and required the Company to reduce the principal balance on the line of credit to \$1,400,000 by October 31, 2001 with interest on the outstanding balance paid monthly. The Company reduced the outstanding balance to \$1,396,000 by October 31, 2001. The Company finalized the restructuring of the line of credit with Wells Fargo in November 2001, which called for principal payments of \$1,340,000 by October 31, 2002. As of June 30, 2002, \$516,000 was outstanding on the line of credit. The line of credit was secured by deeds of trust on various oil and gas producing properties held by us. On August 6, 2002 the Company entered into a promissory agreement with Samson Exploration N.L. and borrowed \$500,000. Under the terms of the agreement the Company is required to pay interest at 12% per annum and a financing fee of 10% of the borrowed funds. The duration of the loan is 120 days and is due on December 4, 2002. The proceeds from the loan were used to retire and satisfy the outstanding debt to Wells Fargo.

In September 2001, we announced the appointment of Barry D. Lasker as President, Chief Executive Officer and Director. Mr. Lasker brings to the Company 21 years of experience in the oil and gas industry. Timothy L. Hoops, our former President and Chief Executive Officer, now serves as our operations manager, on a part-time basis and remains a Director of the Company.

In April 2002, the Company completed a private placement of 1,409,000 units at a price of \$0.70 per unit. Each unit consisted of one common share and one common share purchase warrant. Each of the common share purchase warrants sold in that offering entitles the holder to acquire an additional common share of the Company at a price of \$1.25 on or before March 10, 2003. The net proceeds of approximately \$950,000 were used for debt consolidation and for general corporate purposes.

On April 3, 2002, the Company sold, at auction, its over-riding royalty interests in 20 wells for gross proceeds of \$59,700. After expenses of \$6,104

Edgar Filing: KESTREL ENERGY INC - Form 10KSB/A

the Company received net proceeds of \$53,596. On April 30, 2002, the Company sold, at auction, its interest in 16 wells within the Kinta field, Grady County, Oklahoma for gross proceeds of \$170,000. After expenses of \$16,748, the Company paid all net proceeds of \$153,252 directly to Wells Fargo Bank, N.A. on the previously mentioned line of credit. On June 30, 2002, the Company sold its 36% working interest in the La Ward North field, Jackson County, Texas for total proceeds of \$50,000. The proceeds from this sale were not received until July, 2002 but were accrued into the year ended June 30, 2002. The aggregate net proceeds of approximately \$257,000 from these asset sales were used for debt consolidation and for general corporate purposes.

By letter dated February 14, 2002, The Nasdaq Stock Market, Inc. informed the Company that it did not meet all of the requirements for continued listing on the SmallCap Market because, as of that date, the Company's stock had traded below the minimum \$1.00 per share requirement for 30 consecutive

3

trading days. The Company was provided 180 calendar days, or until August 13, 2002, to regain compliance with the minimum trading price standard. If compliance could not be achieved by that date, but the Company met the initial listing criteria for the SmallCap Market on that date, the Company would receive an additional 180 calendar day grace period to demonstrate compliance with the \$1.00 per share requirement. On August 14, 2002, Nasdaq informed the Company that, even though it had not complied with the minimum \$1.00 per share trading requirement by August 13, 2002, because the Company satisfied the initial listing requirements as of March 31, 2002, it was granted the additional 180 calendar day grace period, or until February 10, 2003, to regain compliance with the minimum trading price standard. While the Company's stock continues to trade on the SmallCap Market today, even if the stock price does go above \$1.00 for the minimum 10 consecutive trading days before February 10, 2003 and thereby eliminates the threat of delisting, the Company cannot guarantee that its stock will continue to be traded on Nasdaq in the future. If delisting occurs, the Company's stock could be traded on the OTC Bulletin Board as long as the Company continues to file its reports with the SEC. Such a change, if it occurs, would probably reduce the liquidity of the Company's stock which, in turn, may result in a lower trading price for the stock.

OPERATIONS AND POLICIES

The Company currently is focusing its exploration, acquisition and development opportunities in areas where it has gained historical knowledge, specifically within its current project inventory. However, the acquisition, development, production and sale of oil and gas acreage are subject to many factors outside the Company's control. These factors include worldwide and domestic economic conditions; proximity to pipelines; existing oil and gas sales contracts on properties being evaluated; the supply and price of oil and gas as well as other energy forms; the regulation of prices, production, transportation and marketing by federal and state governmental authorities; and the availability of, and interest rates charged on, borrowed funds.

Historically, in attempting to acquire, explore and drill wells on oil and gas leases, the Company has often been at a competitive disadvantage since it had to compete with many companies and individuals with greater capital and financial resources and larger technical staffs. The Company has in the past sought to mitigate some of these problems by forming acquisition joint ventures with other companies. These joint ventures allow the Company access to more acquisition candidates and enable the Company to share the evaluation and other costs among the venture partners.

Edgar Filing: KESTREL ENERGY INC - Form 10KSB/A

The Company's operations are also subject to various provisions of federal, state and local laws regarding environmental matters. The impact of these environmental laws on the Company may necessitate significant capital outlays, which may materially affect the earnings potential of the Company's oil and gas business in particular, and could cause material changes in the industry in general. The Company strongly encourages the operators of the Company's oil and gas wells to do periodic environmental assessments of potential liabilities. To date, environmental laws have not materially hindered nor adversely affected the Company's business. Please see Item 3, Legal Proceedings, however, for a discussion of potential environmental litigation involving the Company.

The Company has three full-time employees, including the Company's President, Barry D. Lasker. The Company also hires outside professional consultants to handle certain additional aspects of the Company's business. Management believes this type of contracting for professional services is the most economical and practical means for the Company to obtain such services at this time.

RISK FACTORS

WE MUST CONTINUE TO EXPAND OUR OPERATIONS

Our long term success is ultimately dependent on our ability to expand our revenue base through the acquisition of producing properties and, to a much greater extent, by successful results in our exploration efforts. We will need to continue to raise capital to make additional acquisitions and to make further investments in our current portfolio of exploration properties. We have made significant investments in exploration properties in the Western Green River Basin in Wyoming. There is no assurance that any of these acquisitions or other acquisitions will be as successful as originally projected. In fact, while we have

4

already had some measure of success with these acquisitions, we have also had some disappointments. All of our exploration projects are subject to failure and the loss of our investment.

PRICES OF OIL AND NATURAL GAS FLUCTUATE WIDELY BASED ON MARKET CONDITIONS AND ANY DECLINE WILL ADVERSELY AFFECT OUR FINANCIAL CONDITION

Our revenues, operating results, cash flow and future rate of growth are very dependent upon prevailing prices for oil and gas. Historically, oil and gas prices and markets have been volatile and not predictable, and they are likely to continue to be volatile in the future. Prices for oil and gas are subject to wide fluctuations in response to relatively minor changes in the supply of and demand for oil and gas, market uncertainty and a variety of additional factors that are beyond our control, including:

- o the strength of the United States and global economy;
- o political conditions in the Middle East and elsewhere;
- o the supply and price of foreign oil and gas;
- o the level of consumer product demand;
- o the price and availability of alternative fuels;
- o the effect of federal and state regulation of production and transportation; and

Edgar Filing: KESTREL ENERGY INC - Form 10KSB/A

- o the proximity of our natural gas to pipelines and their capacity.

WE MUST REPLACE THE RESERVES WE PRODUCE

A substantial portion of our oil and gas properties contain proved undeveloped reserves. Successful development and production of those reserves cannot be assured. Additional drilling will be necessary in future years both to maintain production levels and to define the extent and recoverability of existing reserves. There is no assurance that our present oil and gas wells will continue to produce at current or anticipated rates of production, that development drilling will be successful, that production of oil and gas will commence when expected, that there will be favorable markets for oil and gas which may be produced in the future or that production rates achieved in early periods can be maintained.

THERE ARE MANY RISKS IN DRILLING OIL AND GAS WELLS

The cost of drilling, completing and operating wells is often uncertain. Moreover, drilling may be curtailed, delayed or canceled as a result of many factors, including title problems, weather conditions, shortages of or delays in delivery of equipment, as well as the financial instability of well operators, major working interest owners and well servicing companies. Our gas wells may be shut-in for lack of a market until a gas pipeline or gathering system with available capacity is extended into our area. Our oil wells may have production curtailed until production facilities and delivery arrangements are acquired or developed for them.

WE FACE INTENSE COMPETITION

The oil and natural gas industry is highly competitive. We compete with others for property acquisitions and for opportunities to explore or to develop and produce oil and natural gas. We have previously formed acquisition joint ventures with several other companies, including Victoria Petroleum N.L. and other affiliates, which have allowed us more access to acquisition candidates and to share the evaluation costs with them. We face strong competition from many companies and individuals with greater capital, financial resources and larger technical staffs. We also face strong competition in procuring services from a limited pool of laborers, drilling service contractors and equipment vendors.

THE AMOUNT OF INSURANCE WE CARRY MAY NOT BE SUFFICIENT TO PROTECT US

We, our partners, co-venturers and well operators maintain general liability insurance but it may not cover all future claims. If a large claim is successfully asserted against us, we might not be covered by insurance, or it might be covered but cause us to pay much higher insurance premiums or a large deductible or co-payment. Furthermore, regardless of the outcome, litigation involving our operations or even insurance companies disputing coverage could divert management's attentions and energies away from operations. The nature of the oil and gas business involves a variety of operating hazards such as

fires, explosions, cratering, blow-outs, adverse weather conditions, pollution and environmental risks, encountering formations with abnormal pressures, and, in horizontal wellbores, the increased risk of mechanical failure and collapsed holes, the occurrence of any of which could result in substantial losses to us.

OUR SUCCESS MAY BE DEPENDENT ON OUR ABILITY TO RETAIN BARRY LASKER AND BOB PETT

Edgar Filing: KESTREL ENERGY INC - Form 10KSB/A

AS KEY PERSONNEL

We believe that the oil and gas exploration and development and related management experience of our key personnel is important to our success. The active participation in the Company of our president, Barry Lasker and Robert J. Pett, our chairman is a necessity for our continued operations. We do not have any employment contracts with these individuals and we do not carry key person life insurance on their lives. We compete with bigger and better financed oil and gas exploration companies for these individuals. Our future success may depend on whether we can attract, retain and motivate highly qualified personnel. We cannot assure you that we will be able to do so.

OUR RESERVES ARE UNCERTAIN

Estimating our proved reserves involves many uncertainties, including factors beyond our control. Our annual report on Form 10-KSB for fiscal year 2002 contains estimates of our oil and natural gas reserves and the future cash flow to be realized from those reserves for fiscal years 2002, 2001 and 2000, as prepared by our independent petroleum engineers, Sproule Associates Inc. There are uncertainties inherent in estimating quantities of proved oil and natural gas reserves since petroleum engineering is not an exact science. Estimates of commercially recoverable oil and gas reserves and of the future net cash flows from them are based upon a number of variable factors and assumptions including:

- o historical production from the properties compared with production from other producing properties;
- o the effects of regulation by governmental agencies;
- o future oil and gas prices; and
- o future operating costs, severance and excise taxes, abandonment costs, development costs and workover and remedial costs.

GOVERNMENTAL REGULATION, ENVIRONMENTAL RISKS AND TAXES COULD ADVERSELY AFFECT OUR OIL AND GAS OPERATIONS IN THE UNITED STATES

Our oil and natural gas operations in the United States are subject to regulation by federal and state government, including environmental laws. To date, we have not had to expend significant resources in order to satisfy environmental laws and regulations presently in effect. However, compliance costs under any new laws and regulations that might be enacted could adversely affect our business and increase the costs of planning, designing, drilling, installing, operating and abandoning our oil and gas wells and other facilities. Additional matters that are, or have been from time to time, subject to governmental regulation include land tenure, royalties, production rates, spacing, completion procedures, water injections, utilization, the maximum price at which products could be sold, energy taxes and the discharge of materials into the environment.

FORWARD-LOOKING STATEMENTS

This prospectus contains forward-looking statements. We use words such as "anticipate", "believe", "expect", "future", "may", "will", "should", "plan", "intend", and similar expressions to identify forward-looking statements. These statements are based on our beliefs and the assurances we made using information currently available to us. Because these statements reflect our current views concerning future events, these statements involve risks, uncertainties and assumptions. Our actual results could differ materially from the results discussed in the forward-looking statements. Some, but not all, of the factors that may cause these differences include those discussed in the risk factors in this prospectus. You should not place undue reliance on these forward-looking

Edgar Filing: KESTREL ENERGY INC - Form 10KSB/A

statements. You should also remember that these statements are made only as of the date of this prospectus and future events may cause them to be less likely to prove to be true.

6

ITEM 2. DESCRIPTION OF PROPERTY.

OIL AND GAS INTERESTS

The following table describes the Company's leasehold interests in developed and undeveloped oil and gas acreage at June 30, 2002:

State	Total		Total	
	Developed Acreage	(1) (2)	Undeveloped Acreage	(1) (2)
-----	Gross	Net	Gross	Net
-----	-----	---	-----	---
Louisiana	480	365	-0-	-0-
New Mexico	240	91	320	87
Oklahoma	1,567	451	-0-	-0-
South Dakota	160	20	-0-	-0-
Texas	993	13	-0-	-0-
Wyoming	10,863	3,226	33,654	33,654
	-----	-----	-----	-----
TOTAL	14,303	4,166	33,974	33,741
Canada	-0-	-0-	-0-	-0-

(1) Gross acres are the total acreage involved in a single lease or group of leases. Net acres represent the number of acres attributable to an owner's proportionate working interest in a lease (e.g., a 50% working interest in a lease covering 320 acres is equivalent to 160 net acres).

(2) The acreage figures are stated on the basis of applicable state oil and gas spacing regulations.

ROYALTY INTERESTS UNDER PRODUCING PROPERTIES

At June 30, 2002, the Company held overriding royalty interests ranging from 1.5% to 9.26% in 23 producing oil and gas wells located on 3,034 gross developed acres in the United States. This compares with overriding royalty interest ranging from .013% to 9.26% in 124 producing oil and gas wells located on 6,019 gross developed acres in the U.S at June 30, 2001. The net production for the royalty interests for the year ended June 30, 2002 were 329 Bbls and 640 Mcf for oil and gas respectively. The net production for the Company's royalty interests for the fiscal year ended June 30, 2001 was, 502 Bbls and 558 Mcf for oil and gas respectively. The royalty interests are considered to be immaterial by the Company.

DRILLING ACTIVITIES

The Company has not participated in drilling any wells in the year ended June 30, 2002.

Kestrel Energy, Inc. owned interests in net exploratory and net development wells for the years ended June 30, 2002, and 2001 as set forth below. This information does not include wells drilled under farmout agreements.

United States

Edgar Filing: KESTREL ENERGY INC - Form 10KSB/A

6/30/02 6/30/01

Net Exploratory Wells: (1)		
Dry (2)	-	-
Productive (3)	-	-
	-----	-----
	-	-
	=====	=====
Net Development Wells: (1)		
Dry (2)	-	-
Productive (3)		1.76
	-----	-----
	-	1.76
	=====	=====

7

- (1) A net well is deemed to exist when the sum of fractional ownership working interests in gross wells equals one. The number of net wells is the sum of the fractional working interests owned in gross wells expressed as whole numbers and fractions thereof.
- (2) A dry well (hole) is a well found to be incapable of producing either oil or natural gas in sufficient quantities to justify completion as an oil or natural gas well.
- (3) Productive wells are producing wells and wells capable of production, including wells that are shut-in.

FARMOUT AGREEMENTS

Under a farmout agreement, outside parties undertake exploration activities using prospects owned by Kestrel. This enables the Company to participate in the exploration prospects without incurring additional capital costs, although with a substantially reduced ownership interest in each prospect.

During the year ended June 30, 2002, no wells were drilled under farmout agreements.

OIL AND GAS PRODUCTION, PRICES AND COSTS

As of June 30, 2002, the Company had a royalty and/or working interest in 93 gross (3.5 net) wells that produce oil only, 36 gross (9.7 net) wells that produce gas only, and 22 (1.3 net) wells that produce both oil and gas. All wells that produced gas are connected to pipelines. As of June 30, 2001, the Company had a royalty and/or working interest in 74 gross (10.06 net) wells that produce oil only, 51 gross (11.21 net) wells that produce gas only, and 229 (6.62 net) wells that produce both oil and gas. All wells that produced gas are connected to pipelines.

For information concerning the Company's oil and gas production, estimated oil and gas reserves, and estimated future cash inflows relating to proved oil and gas reserves, see Note 8 to the consolidated financial statements included in Item 7 of this Report. The reserve estimates for the reporting year were prepared by Sproule Associates Inc., an independent petroleum engineering firm. The Company did not file any oil and gas reserve estimates with any federal authority or agency during its fiscal year ended June 30, 2002.

For the year ended June 30, 2002, the Company's average operating cost (including taxes and marketing) per barrel of oil equivalent (BOE) (converting

Edgar Filing: KESTREL ENERGY INC - Form 10KSB/A

gas to oil at 6:1) was \$9.42. The average operating cost per BOE on an equivalent basis for fiscal years 2001 was \$11.96. The average sales price per barrel of oil sold was \$19.99 for 2002, \$28.18 for 2001 and \$24.78 for 2000. The average sales price per mcf of gas sold was \$2.16 for 2002, \$4.75 for 2001 and \$2.59 for 2000.

CUSTOMERS

During fiscal year 2002, the Company had two major customers: Kaiser Francis Oil Company and Duke Energy. Sales to these customers accounted for 27% and 13%, respectfully, of oil and gas sales in 2002. The Company does not believe that it is dependent on a single customer. The Company has the option at most properties to change purchasers if conditions so warrant.

OFFICE FACILITIES

The Company's executive offices are located at 999 18th Street, Suite 2490, Denver, Colorado 80202, which is comprised of approximately 3,953 square feet, at an annual rate of \$73,900. The Company's current lease obligation expires February 28, 2003. The Company also has, under sublease, approximately 781 square feet of office space located at 1502 Augusta Drive, Suite 316, Houston, Texas 77057, at a monthly rate of \$781. The current sublease obligation expires June 30, 2003.

8

ITEM 3. LEGAL PROCEEDINGS.

In the ordinary course of conducting its business, the Company becomes involved in litigation, administrative proceedings and governmental investigations, including environmental matters.

In May of 2000, the Company received a notice letter from the U.S. Environmental Protection Agency (EPA) stating that the Company is a potentially responsible party under the federal Comprehensive Environmental Response, Compensation and Liability Act of 1980 ("CERCLA") for the Casmalia Waste Disposal Site in Santa Barbara County, California. If the Company is ultimately determined to be a responsible party, it may be obligated to conduct remedial investigations, feasibility studies, remediation and/or removal of alleged releases of hazardous substances or to reimburse the EPA for such activities.

The Company does not believe that it has any liability under CERCLA for wastes disposed at Casmalia and believes that the EPA's notice was issued in error. The Company has responded to the EPA, explaining that the Company did not arrange to dispose of any waste at Casmalia. The Company's involvement with Casmalia is limited to the purchase of assets from another entity, which disposed of waste at Casmalia. The Company intends to defend allegations of its responsibility, if any, and will also rely upon an indemnification given by the previous owner of the properties at Casmalia, which previous owner has confirmed that the indemnification would apply to any such allegations.

The Company is unable to estimate the dollar amount of exposure to loss in connection with the above-referenced matter; however, the ultimate site-wide clean up costs, which could be borne by the persons or entities found to be responsible parties, have been estimated by the EPA at approximately \$271.9 million.

It is the opinion of Company's management that the outcome of these proceedings, individually or in the aggregate, will not have a material adverse effect on the Company's financial position, results of operations, or cash flows.

Edgar Filing: KESTREL ENERGY INC - Form 10KSB/A

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

None.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS.

OUTSTANDING SHARES OF COMMON STOCK

The Company's common stock trades over-the-counter on the NASDAQ SmallCap Market under the symbol "KEST." At June 30, 2002, the Company had 9,115,200 shares outstanding. At June 30, 2002, the Company had approximately 1,323 shareholders of record, although the Company believes that there are more beneficial owners of its stock, the number of which is unknown.

STOCK PRICE

These quotations reflect inter-dealer prices, without retail mark-up, markdown or commission and may not necessarily represent actual transactions.

9

FISCAL YEAR JUNE 30, 2001	Sales Price	
	High	Low
	-----	---
First Quarter	\$3.43	\$1.38
Second Quarter	2.41	1.56
Third Quarter	2.00	1.06
Fourth Quarter	1.89	.75
FISCAL YEAR JUNE 30, 2002	Sales Price	
	High	Low
	-----	---
First Quarter	\$1.58	\$0.69
Second Quarter	1.02	0.64
Third Quarter	.80	0.56
Fourth Quarter	1.24	0.17

DIVIDEND POLICY

While there are no covenants or other aspects of any finance agreements or bylaws that restrict the declaration or payment of cash dividends, the Company has not paid any dividends on its common stock and does not expect to do so in the foreseeable future.

ITEM 6. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

LIQUIDITY AND CAPITAL RESOURCES

Working Capital and Cash Flows: Net working capital deficit at June 30, 2002, was \$631,012 compared to a working capital deficit of \$1,750,853 at June 30, 2001. The reduction in working capital of \$1,119,841 resulted from issuance of stock and sales of securities in Victoria Petroleum, NL. In April 2002, the Company completed a private placement of 1,409,000 units at a price of \$0.70 per

Edgar Filing: KESTREL ENERGY INC - Form 10KSB/A

unit. Each unit consisted of one common share and one common share purchase warrant. Each of the common share purchase warrants sold in that offering entitles the holder to acquire an additional common share of the Company at a price of \$1.25 on or before March 10, 2003. The Company also sold 41,900,000 shares of common stock of Victoria Petroleum, NL during fiscal 2002. The common stock was acquired as part of the merger with Victoria Petroleum, NL in May of 2000. The Company received \$603,824 in proceeds from the sale and recorded a loss of \$561,282.

The decrease in working capital of \$1,002,021 for the year ended 2001 resulted from short term borrowings on the Company's line of credit which allowed the Company to re-complete the Greens Canyon 27-3 well and to fund the drilling of two development wells in Oklahoma and six development wells in Wyoming.

Net cash used by operating activities was \$444,362 for fiscal 2002 as compared to cash used by operating activities of \$994,010 for fiscal 2001, a decrease of \$549,648. The decrease in operating cash flows is primarily attributable to a loss on the sale of the Victoria Petroleum shares, a higher accounts payable and lower receivable position at the end of fiscal 2002. The decrease in operating cash flows for fiscal 2001 was primarily attributable to the reduction of accounts payable from fiscal 2000 levels.

Net cash provided by investing activities was \$564,959 in fiscal 2002 as compared to net cash used \$1,270,999 in fiscal 2001. For the year ended June 30, 2002, \$92,461 was used for capital expenditures including \$50,954 on completion of coalbed methane wells in Campbell County, Wyoming. A work-over was completed on the Pierce Waterflood Unit also in Campbell County, Wyoming, in the amount of \$19,025. The Company also received \$603,824 from the sale of 41,900,000 Victoria Petroleum, NL shares during the fiscal year ended June 30, 2002. The shares were acquired in May 2000 as part of the

10

merger agreement between the Company and Victoria Petroleum, NL. The sale resulted in a loss of \$561,282. The unrealized gain or loss on the Company's investment in Victoria Petroleum, NL shares is recorded as Other Accumulated Comprehensive Income or Loss on the Company's balance sheet as of June 30, 2002. Proceeds from the sale of several non-core assets during the year netted the Company approximately \$257,000. Of this amount, \$53,596 was accounted for under Investing Activities, \$153,252 was accounted for as repayment of debt and \$50,000 was accrued as accounts receivable.

Net cash used by financing activities was \$183,074 for fiscal 2002 versus \$1,882,000 provided by financing activities a year ago. Of the cash used during the fiscal year 2002, \$1,212,748 repaid a portion of the Company's line of credit with Wells Fargo Bank. Under the terms of the agreement, the Company had a revolving line of credit with a borrowing base of \$1,400,000. The Company restructured the line of credit with Wells Fargo Bank in November 2001, which required the Company to make scheduled principal payments to reduce the amount outstanding by \$1,400,000 by the October 31, 2002 due date with interest on the outstanding balance paid monthly. The Company reduced the outstanding balance to \$1,396,000 by October 31, 2001. The Company finalized the restructuring of the line of credit with Wells Fargo in November 2001, which called for principal payments of \$1,340,000 by October 31, 2002. As of June 30, 2002, \$516,000 was outstanding on the line of credit. In April 2002, the Company closed one private offering of 1,409,000 units of its common stock at \$0.70 per unit. Each unit consisted one share of common stock and one warrant to purchase one share at \$1.25 for a period of 12 months. This offering netted proceeds to the Company of \$963,624 after offering and related expenses of \$22,676. Of this, the Company issued 515,000 shares of stock to a unrelated party in exchange for previously

Edgar Filing: KESTREL ENERGY INC - Form 10KSB/A

recorded advances and accrued interest of \$360,500 by Victoria Petroleum, N.L., an affiliated company ("VP"), which had transferred the debt to the unrelated party. The Company also issued 20,000 shares of stock to an officer for \$14,000. Of the total net proceeds from this placement of \$611,800 was accounted for as cash proceeds and \$350,000 was accounted for as debt converted to common stock. The shares sold in the offering were sold to both US and offshore purchasers in accordance with SEC Regulation S and Regulation D. The Company is seeking to register the shares for resale in the United States by a Form S-3 registration statement.

The Company was advanced \$97,940 for working capital from VP in February, 2002. The Company also borrowed \$255,382 for working capital from a non-affiliated party in February, 2002, which was repaid in full. The Company borrowed \$350,000 from VP during the year. The debt was transferred to an unrelated party and subsequently converted to stock in the private placement.

Stockholders' Equity: Stockholders' equity decreased \$7,690,466 to \$3,066,167 from \$10,756,633 a year ago. The decrease is largely attributable to an increase in impairment to \$6,589,695 which was significantly attributable to a write down in the value of Greens Canyon gas reserves primarily due to significantly lower gas prices received at Greens Canyon at the end of fiscal 2002. At June 30, 2002 gas prices were \$1.45 per Mcf as compared to gas prices at the end of fiscal 2001 of \$2.55 per Mcf.

Debt Obligations: The Company had no long-term debt at June 30, 2002 or 2001.

Reserves and Future Cash Flows: For the fiscal year ended June 30, 2002, the Company's proved oil reserves decreased approximately 82,600 bbls. to 273,400 bbls., or 23%, from 356,000 in 2001. The Company's proved gas reserves decreased 1,315 Mmcf to 12,069 Mmcf, or 10%, from 13,384 Mmcf in 2001. The decrease in proved reserves is attributable primarily to production during the year, the sale of several non-core producing assets and lower oil and natural gas prices for the fiscal year ended June 30, 2002.

The Company's undiscounted net future cash flows have been estimated by Sproule Associates Inc., an independent petroleum engineering firm, to be approximately \$18,641,000 as of June 30, 2002. This compares to \$27,647,000 as of June 30, 2001. The decrease in the current year is the result of revisions of previous quantity estimates and lower oil and natural gas prices.

Gas Balancing: At June 30, 2002, the Company held no under-produced or over-produced properties. The Company at June 30, 2001 was under-produced by approximately 22,245 Mcf.

11

Natural Gas Sales Contracts: The Company's gas production is generally sold under short term contracts with pricing set on current spot markets with adjustments for marketing and transportation costs. All contracts are cancelable within 30-90 days notice by the Company. The Company has no contracts that are based on a fixed natural gas price.

Net Operating Loss and Tax Credit Carryforwards: At June 30, 2002, the Company estimated that, for United States federal income tax purposes, it had net operating loss carryforwards of approximately \$9,794,000. The utilization of approximately \$496,000 of these carryforwards are limited to an estimated \$80,000 annually. Of the balance of the loss carryforwards, \$9,298,000 is available to offset any future taxable income of the Company. If not utilized, the net operating loss carry forwards will expire during the period from 2003 through 2022.

Edgar Filing: KESTREL ENERGY INC - Form 10KSB/A

RESULTS OF OPERATIONS

FISCAL 2002 VS. FISCAL 2001

Net Earnings: The Company reported a net loss of \$8,111,561 in fiscal 2002 compared to a net loss of \$104,371 in fiscal 2001, which was a increase of \$8,007,190. The net loss in fiscal 2002 is attributable to abandonment and impaired expenses of \$6,589,695, depreciation and depletion expenses of \$327,353 and significantly lower oil and gas revenues. The abandonment and impairment expenses of \$6,589,695 was attributable to a write down in value of Greens Canyon gas reserves primarily due to significantly lower gas prices received at Greens Canyon at the end of 2002. At June 30, 2002 gas prices were \$1.45 per Mcf as compared to gas prices at the end of fiscal 2001 of \$2.55 per Mcf.

Revenue: Revenue from oil and gas sales decreased in fiscal 2002 by \$1,046,463, or 48%, to \$1,149,356 versus higher sales volumes for oil and gas. Average prices per barrel of oil decreased 29% to \$19.99 from \$28.18 a year ago. Average prices received per Mcf of gas decreased 54% to \$2.16 from \$4.75 a year ago. Sales volumes for oil increased 19% to 22,320 barrels from 18,688 barrels a year ago. Sales volumes for gas decreased 9% to 320 Mmcf from 350 Mmcf a year ago.

The Company recorded a gain on sale of property and equipment of \$20,278. On April 3, 2002, the Company sold, at auction, its over-riding royalty interests in 20 wells for gross proceeds of \$59,700. After expenses of \$6,104 the Company received net proceeds of \$53,596. On April 30, 2002, the Company sold, at auction, its interest in 16 wells within the Kinta Field, Grady County, Oklahoma for gross proceeds of \$170,000. After expenses of \$16,748 the Company paid all net proceeds of \$153,252 directly to Wells Fargo Bank, N.A. on the previously mentioned line of credit. On June 30, 2002, the Company sold its 36% working interest in the La Ward North field, Jackson County, Texas for total proceeds of \$50,000. The proceeds from this sale were not received until July, 2002 but were accrued into the year ended June 30, 2002. The net proceeds of approximately \$257,000 from these asset sales were used for debt consolidation and for general corporate purposes.

The Company also sold 41,900,000 shares of common stock of Victoria Petroleum, NL during fiscal 2002. The common stock was acquired as part of the merger with Victoria Petroleum, NL in May of 2000. The Company received \$603,824 in proceeds from the sale and recorded a loss of \$561,282.

Other income rose \$70,897 to \$182,038 from \$111,141 a year ago. The increase is attributable to overhead charges to a related party for the use of the Company's office space and personnel, transportation and gas gathering income, and adjustment of over-accrued severance taxes.

Lease Operating Expenses: Lease operating expenses decreased \$208,317, or 23%, to \$712,375 from \$920,692 a year ago. The caption "Lease Operating Expenses" includes not only the direct costs of operating a well, but workover costs and production taxes. Direct lease expense increased 3% to \$590,083 from \$575,296 a year ago. Workover costs decreased 95% to \$8,282 from \$151,390 last year. Production taxes decreased 41% to \$114,040 from \$194,006 a year ago. The increase in direct lease expenses is attributable to higher lease expenses at the Pierce Water-flood project in Campbell County, Wyoming. The decrease in workover expenses is attributable to lower workover costs in the Company's Greens Canyon Field. The decrease in production taxes was a result of lower oil and gas revenues. Lease operating costs on a BOE (barrel of oil equivalent) basis decreased 21% to \$9.42 from \$11.96 a year ago.

Edgar Filing: KESTREL ENERGY INC - Form 10KSB/A

Exploration Expenses: Exploration expenses decreased \$4,530, or 7%, to \$96,601 from \$101,131 in 2001. The decrease in exploration expense continued the slower pace of the Company's exploration program during fiscal 2002 as the Company's emphasis has been on reducing the outstanding debt obligation.

Dry Holes, Abandoned and Impaired Properties: Dry holes, abandoned and impaired property costs were \$6,589,695 in fiscal 2002 as compared to \$101,459 a year ago, an increase of \$6,488,236. No dry hole costs were recorded for fiscal 2002 or 2001. No wells were abandoned during fiscal 2002. During fiscal year 2001, the Company abandoned the Pinon Ridge Prospect in Colorado. Impairment expenses increased \$6,517,226 to \$6,589,695 from \$72,459 a year ago. The impairment was a result of the analysis of the Company's Greens Canyon properties as required by SFAS 121. The impairment of \$6,589,695, was attributable to a write down in value of Greens Canyon gas reserves primarily due to significantly lower gas prices received at Greens Canyon at the end of fiscal 2002. At June 30, 2002 gas prices were \$1.45 per Mcf as compared to gas prices at the end of fiscal 2001 of \$2.55 per Mcf.

General and Administrative Expense: General and administrative expenses increased \$108,688, or 12%, to \$1,007,118 as compared to \$898,430 a year ago. The increase in general and administrative expenses is attributable to higher legal, accounting, insurance, investor relations and taxation expenses offset by lower company personnel costs. The Company continues to review ways to reduce overhead expenses.

Interest Expense: Interest expense totaled \$121,655 for the fiscal year ended June 30, 2002 versus \$126,907 a year ago. The interest is attributable to the line of credit the Company had with Wells Fargo Bank and short term borrowings from Lakes Oil N.L and Victoria Petroleum, N.L. The Lakes loan has been satisfied in full, however \$53,369 remains owed to VP.

ITEM 7. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA.

See pages F-1 through F-18 for this information.

ITEM 8. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

KPMG LLP was previously the principal accountants for Kestrel Energy, Inc. On August 22, 2002, that firm's appointment as principal accountants was terminated and we have engaged Wheeler Wasoff P.C. as principal accountants. The decision to change accountants was recommended and approved by the audit committee of the board of directors and the board of directors.

In connection with the audits of the two fiscal years ended June 30, 2001 and the subsequent period through August 22, 2002, there were no disagreements with KPMG LLP on any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedures, which disagreements if not resolved to their satisfaction would have caused them to make reference in connection with their opinion to the subject matter of the disagreement.

During the two most recent fiscal years and the subsequent period through August 22, 2002, we have not consulted with Wheeler Wasoff P.C. regarding (i) the application of accounting principles to a specified transaction, either completed or proposed, or the type of audit opinion that might be rendered on our financial statements.

The audit reports of KPMG LLP on the financial statements of Kestrel Energy, Inc. as of and for the years ended June 30, 2001 and 2000 did not contain any adverse opinion or disclaimer of opinion, nor were they qualified or modified as to uncertainty, audit scope, or accounting principles.

CERTIFICATION

I, Barry D. Lasker, certify that:

1. I have reviewed this annual report on Form 10-KSB/A of Kestrel Energy, Inc.;

2. Based on my knowledge, this annual report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this annual report;

3. Based on my knowledge, the financial statements, and other financial information included in this annual report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this annual report;

4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:

a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this annual report is being prepared;

b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this annual report (the "Evaluation Date"); and

c) presented in this annual report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;

5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):

a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and

b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and

6. The registrant's other certifying officers and I have indicated in this

KESTREL ENERGY, INC.

Financial Statements

June 30, 2002 and 2001

(With Independent Auditors' Report Thereon)

INDEPENDENT AUDITORS' REPORT

The Board of Directors and Stockholders
Kestrel Energy, Inc.

We have audited the accompanying balance sheet of Kestrel Energy, Inc. as of June 30, 2002, and the related statements of operations and comprehensive (loss), stockholders' equity and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Kestrel Energy, Inc. as of June 30, 2002, and the results of its operations and its cash flows for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

INDEPENDENT AUDITORS' REPORT

The Board of Directors and Stockholders
Kestrel Energy, Inc.:

We have audited the accompanying consolidated statements of operations and comprehensive income (loss), stockholders' equity and cash flows of Kestrel Energy, Inc. and subsidiaries for the year ended June 30, 2001. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the results of operations and cash flows of Kestrel Energy, Inc. and subsidiaries for the year ended June 30, 2001, in conformity with accounting principles generally accepted in the United States of America.

F-6

(1) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(A) ORGANIZATION

Kestrel Energy, Inc. (the Company) was incorporated under the laws of the State of Colorado on November 1, 1978. The Company's principal business is the acquisition, either alone or with others, of interests in proved developed producing oil and gas leases, and exploratory and development drilling.

Edgar Filing: KESTREL ENERGY INC - Form 10KSB/A

The Company presently owns oil and gas interests in the states of Louisiana, New Mexico, Oklahoma, South Dakota, Texas and Wyoming.

Victoria Petroleum N. L. (VP) owns 15% of the common shares of the Company and the Company owns 4% of VP at June 30, 2002.

(B) PRINCIPLES OF CONSOLIDATION

Up until June 22, 2001, the financial statements included the accounts of the Company and its wholly-owned subsidiary, Victoria Exploration, Inc. (Victoria). All significant intercompany accounts and transactions have been eliminated in consolidation.

On June 22, 2001 (the Effective Date), the Company filed Articles of Merger of Victoria Exploration, Inc. into Kestrel Energy, Inc. pursuant to Section 7-111-104 of the Colorado Revised Statutes. In accordance with the agreement, on the Effective Date, Victoria ceased to exist and Kestrel Energy, Inc. became the surviving corporation.

(C) ESTIMATES

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(D) CASH EQUIVALENTS

Cash equivalents consist of certificates of deposit. At June 30, 2002, \$50,000 of the cash equivalent balance is pledged as security in lieu of posting oil and gas performance bonds in the state of Wyoming. The funds are restricted as to their use and cannot be accessed by the Company without the written release by the appropriate jurisdictional authority. For purposes of the statements of cash flows, the Company considers all highly liquid investments with original maturities of three months or less to be cash equivalents.

(E) PROPERTY AND EQUIPMENT

The Company follows the successful efforts method of accounting for its oil and gas activities. Accordingly, costs associated with the acquisition, drilling and equipping of successful exploratory wells are capitalized. Geological and geophysical costs, delay and surface rentals and drilling costs of unsuccessful exploratory wells are charged to expense as incurred. Costs of drilling development wells, both successful and unsuccessful, are capitalized. Upon the sale or retirement of oil and gas properties, the cost thereof and the accumulated depreciation or depletion are removed from the accounts and any gain or loss is credited or charged to operations.

F-7

Depreciation and depletion of capitalized oil and gas properties is computed on the units-of-production method by individual fields as the related proved reserves are produced. A reserve is provided for estimated future costs of site restoration, dismantlement, and abandonment activities, net of residual salvage value, as a component of depletion.

Pipeline and facilities are stated at original cost. Depreciation of pipeline and facilities is provided on a straight-line basis over the estimated useful life of the pipeline of twenty years.

Edgar Filing: KESTREL ENERGY INC - Form 10KSB/A

Furniture and equipment are depreciated using the straight-line method over estimated lives ranging from three to seven years.

Management periodically evaluates capitalized costs of unproved properties and provides for impairment, if necessary, through a charge to operations.

Proved oil and gas properties are assessed for impairment on a field-by-field basis. If the net capitalized costs of proved properties exceeds the estimated undiscounted future net cash flows from the property, a provision for impairment is recorded to reduce the carrying value of the property to its estimated fair value. The Company recorded a provision for impairment of its proved oil and gas properties of approximately \$6,558,000 and \$101,000 for the years ended June 30, 2002 and 2001, respectively.

(F) GAS BALANCING

The Company uses the sales method of accounting for gas balancing of gas production. Under this method, all proceeds from production credited to the Company are recorded as revenue until such time as the Company has produced its share of related reserves. Thereafter, additional amounts received are recorded as a liability.

As of June 30, 2002, the Company's gas production is in balance.

(G) INCOME TAXES

The Company accounts for income taxes under the provisions of Statement of Financial Accounting Standards No. 109 (SFAS 109), Accounting for Income Taxes. Under the asset and liability method of SFAS 109, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted income tax rates expected to apply to taxable income in the years in which those differences are expected to be recovered or settled. Under SFAS 109, the effect on deferred tax assets and liabilities of a change in income tax rates is recognized in the results of operations in the period that includes the enactment date.

(H) STOCK-BASED COMPENSATION

In October 1995, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 123, Accounting for Stock-Based Compensation (SFAS 123), effective for fiscal years beginning after December 15, 1995. This statement defines a fair value method of accounting for employee stock options and encourages entities to adopt that method of accounting for its stock compensation plans. SFAS 123 allows an entity to continue to measure compensation costs for these plans using the intrinsic value based method of accounting as prescribed in Accounting Pronouncement Bulletin Opinion No. 25, Accounting for Stock Issued to Employees (APB 25). The Company has elected to continue to account for

F-8

its employee stock compensation plans as prescribed under APB 25. The pro forma disclosures of net loss and loss per share required by SFAS 123 are included in note 5.

Edgar Filing: KESTREL ENERGY INC - Form 10KSB/A

(I) (LOSS) PER SHARE

Basic (loss) per share is based on the weighted average number of common shares outstanding during the period.

Diluted (loss) per share is computed by adjusting the weighted average number of common shares outstanding for the dilutive effect, if any, of stock options and warrants.

At June 30, 2002 and 2001, all outstanding options were excluded from the computation of diluted loss per share for the years then ended. The effect of the assumed exercises of these options was antidilutive.

(J) REVENUE RECOGNITION

Sales of oil and gas production are recognized at the time of delivery of the product to the purchaser.

(K) TRANSLATION OF FOREIGN CURRENCIES

Monetary items are translated at the rate of exchange in effect at the balance sheet date. Non-monetary items are translated at average rates in effect during the period in which they were earned or incurred. Gains and losses resulting from the fluctuation of foreign exchange rates have been included in the determination of income.

(L) MARKETABLE SECURITIES

The Company accounts for investments in marketable securities under SFAS 115, "Accounting for Certain Investments in Debt and Equity Securities." The Company determines the appropriate classification at the time of purchase. Securities are classified as held-to-maturity when the Company has the positive intent and ability to hold the securities to maturity. Held-to-maturity securities are stated at cost, adjusted for amortization of premiums and discounts to maturity. Marketable securities not classified as held-to-maturity are classified as available-for-sale. Available-for-sale securities are carried at fair value, which is based on quoted prices. Unrealized gains and losses, net of tax, are reported as a separate component of shareholders' equity. The cost of securities available-for-sale is adjusted for amortization of premiums and discounts to maturity. Interest and amortization of premiums and discounts for all securities are included in interest income. Realized gains and losses are included in other income. Cost of securities sold is determined on a specific identification basis.

(M) FAIR VALUE

The carrying amount reported in the balance sheet for cash, accounts receivable, accounts payable and accrued liabilities approximates fair value because of the immediate or short-term maturity of these financial instruments.

(N) CONCENTRATION OF CREDIT RISK

Financial instruments which potentially subject the Company to concentrations of credit risk consist of cash. The Company maintains cash accounts at two financial institutions. The Company periodically evaluates the credit worthiness of financial institutions, and maintains cash accounts only in large high quality financial institutions, thereby minimizing exposure for

F-9

deposits in excess of federally insured amounts. The Company believes that credit risk associated with cash is remote.

Edgar Filing: KESTREL ENERGY INC - Form 10KSB/A

(O) RECENT ACCOUNTING PRONOUNCEMENTS

In June 2001, the Financial Accounting Standards Board ("FASB"), issued SFAS 143, Accounting for Asset Retirement Obligations. SFAS 143 addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. SFAS 143 generally requires obligations associated with asset retirements to be recognized earlier and displayed as liabilities rather than as contra-assets. The pronouncement is effective for financial statements issued for fiscal years beginning after June 15, 2002. Management does not believe that the adoption of SFAS 143 will have any impact on its financial position or results of operations.

In August 2001, FASB issued SFAS 144, Accounting for the Impairment or Disposal of Long-Lived Assets. SFAS 144 addresses financial accounting and reporting for the impairment or disposal of long-lived assets. SFAS 144 establishes a single accounting model for long-lived assets to be disposed of by sale. The pronouncement is effective for financial statements issued for fiscal years beginning after December 15, 2001. Management does not believe that the adoption of SFAS 144 will have any impact on its financial position or results of operations.

In June 2002, FASB issued SFAS 146, Accounting for Costs Associated with Exit or Disposal Activities. SFAS 146 addresses financial accounting and reporting for costs associated with exit or disposal activities and nullifies Emerging Issues Task Force Issue No. 94-3, Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity. SFAS 146 generally requires a liability for a cost associated with an exit or disposal activity to be recognized and measured initially at its fair value in the period in which the liability is incurred. The pronouncement is effective for exit or disposal activities initiated after December 31, 2002. Management does not believe that the adoption of SFAS 146 will have any impact on its financial position or results of operations.

(P) RECLASSIFICATION

Certain amounts in the 2001 financial statements have been reclassified to conform to the 2002 financial statement presentation.

(2) INVESTMENT IN RELATED PARTY

On May 5, 2000, the Company sold six international permits, with a net book value of \$143,179, for petroleum drilling in Western Australia and New Guinea to Victoria Petroleum USA, Inc. (VP/USA), a Colorado corporation and wholly owned subsidiary of VP, in exchange for 8,250,000 shares of VP Common Stock. The stock was valued at \$0.029 per share and resulted in a gain on the sale of \$97,721. The investment is recorded at cost.

Also, on May 5, 2000, KEC, VP and VP/USA entered into an Agreement and Plan of Merger (Merger Agreement). Pursuant to the Merger Agreement, on May 12, 2000, the Company, as sole shareholder of KEC, acquired 66,750,000 shares of VP common stock and VP/USA acquired all of the issued and outstanding shares of KEC through a merger of KEC into VP/USA, with KEC as the surviving corporation. The stock was valued at \$0.029 per share and resulted in a gain on the sale of \$1,497,208, based upon sales of other assets totaling \$242, accounts payable totaling \$2,000, and property and equipment with a net book value of \$454,899. The investment is recorded at cost.

During the year ended June 30, 2002, the Company sold a total of 41,900,000 shares of VP stock and recorded a loss on the sale of \$561,282.

As a result of the above transactions, the Company owns 4% of VP at June 30, 2002.

(3) LINE OF CREDIT

On February 21, 2000, the Company entered into a \$2,000,000 Line of Credit agreement with Wells Fargo Bank, formerly Norwest Banks Colorado, N.A., which provided the Company with an initial borrowing base of \$600,000, based on reserves with interest at Wells Fargo's prime rate plus 2.5%. On September 27, 2000, the Company and Wells Fargo amended the Line of Credit Agreement to provide the Company with a borrowing base of \$2,000,000 and reduced the interest rate to 1.5% over the Wells Fargo prime rate. On May 31, 2001, Wells Fargo reduced the borrowing base to \$1,400,000. On October 31, 2001, Wells Fargo and the Company amended the Term Loan Agreement to extend the maturity date by 30 days to November 30, 2001. On November 30, 2001, the Company entered into a new Term Loan Agreement with Wells Fargo in the amount of the existing balance of the old Line of Credit, \$1,396,000, with interest at Wells Fargo's prime rate plus 1.75%. Terms of the Agreement require periodic payments of varying amounts to pay off the entire balance by the maturity of the Agreement, November 30, 2002. The line of credit is secured by Deeds of Trust on various oil and gas producing properties held by the Company. As of June 30, 2002, \$516,000 was outstanding on the line of credit.

Subsequent to June 30, 2002, the line of credit was paid in full and retired by applying proceeds of \$50,000 from the sale of oil and gas properties and obtaining a new loan in the amount of \$500,000 (See note 10).

(4) NOTES PAYABLE

On February 14, 2002, the Company borrowed \$97,940 from VP and \$255,382 from Lakes Oil N.L. ("Lakes") due May 15, 2002 with interest at 8%. The loans were secured by shares of VP and seismic data owned by the Company. As of June 30, 2002, an aggregate \$294,953 had been repaid by the Company and VP is owed \$58,369.

VP advanced an additional \$350,000 to the Company with interest at 7.5%. The loan of \$350,000 was assigned to an unrelated company and subsequent converted, including interest of \$10,500, to 515,000 shares of the Company's common stock.

(5) STOCKHOLDERS' EQUITY

(A) PREFERRED STOCK

The Company is authorized to issue up to 1 million shares of \$1 par value preferred stock, the rights and preferences of which are to be determined by the Board of Directors at or prior to the time of issuance.

(B) COMMON STOCK

On January 18, 2000, the Board of Directors of the Company declared a dividend distribution of 10 Warrants for every 100 shares of outstanding common stock of the Company held of record by the shareholders at the close of business on February 4, 2000 (record date). The Warrant Certificates were only issued in increments of 10 Warrants based upon a rounding of individual shareholders' record holdings. No Warrants were issued to shareholders holding less than 100 shares as of the Record Date.

Each Warrant entitled the registered holder to purchase from the Company one share of Common Stock at a price of \$3.125 per share,

Edgar Filing: KESTREL ENERGY INC - Form 10KSB/A

subject to adjustment. The Warrants were to expire on February 4, 2001. On January 24, 2001 the Board of Directors reduced the exercise

F-11

price to \$2.50 and extended the exercise period to September 4, 2002. On January 24, 2002, the Board of Directors reduced the exercise price to \$1.25 and extended the exercise period to March 10, 2003.

In April 2001, the Company paid \$6,000 and issued 20,000 shares of its common stock at \$1.24 per share to an unrelated third party in exchange for geophysical data.

During 2001, certificates for previously issued shares of the Company's common stock, representing 200 shares were presented for transfer. Prior to presentment, such shares had not been recorded as issued by the Company.

In July 2001, the Company issued 6,000 shares of its common stock at \$1.21 per share to an unrelated third party in exchange for geophysical services.

In April 2002, the Company completed a private offering of 1,409,000 units at \$.70 per unit. Each unit consisted of one share of common stock and one warrant to purchase an additional share of common stock for a period of 12 months, at \$1.25 per share. Net cash proceeds to the Company from the sale of 874,000 units was \$589,124 after offering and related expenses of \$22,676. Additionally, 20,000 units were issued to the Company's President in exchange for \$14,000 due for unreimbursed expenses and 515,000 units were issued in exchange for debt and related interest in the aggregate amount of \$360,500 (See note 4).

(C) STOCK OPTION PLANS

The Company has reserved 36,000 shares of its no par common stock for key employees of the Company under its 1993 Amended Restated Stock Incentive Plan (the Incentive Plan). Under the terms of the Incentive Plan, no stock options are exercisable more than ten years after the date of grant (five years after date of grant for 10% shareholders). As of June 30, 1998, all 36,000 options had been granted under the Incentive Plan.

The Company has reserved 75,000 shares of its no par common stock for employees, officers, directors, consultants and advisors of the Company under its 1993 Nonqualified Stock Option Plan (the Nonqualified Plan). Under the terms of the Nonqualified Plan, no stock options are exercisable more than ten years after the date of grant (five years after date of grant for 10% shareholders).

During fiscal 1998, the Company merged the Incentive Plan and the Nonqualified Plan into the Stock Option Plan (the Plan). The Company has reserved 1,200,000 shares of its no par common stock for employees, officers, directors, consultants and advisors of the Company under the Plan. Under the terms of the Plan, no stock options are exercisable more than ten years after the date of grant (five years after date of grant for 10% shareholders).

During fiscal 2002 and 2001, the Board of Directors granted options to purchase shares of common stock to key employees and directors pursuant to the Plan. The exercise prices of the options range from \$.68 to \$1.15 per share. The options granted are exercisable upon issuance.

Edgar Filing: KESTREL ENERGY INC - Form 10KSB/A

On December 1, 1998, the Board of Directors reduced the number of options outstanding and repriced certain options. The exercise prices of the repriced options range from \$1.875 to \$2.00 per share. The options are immediately exercisable.

On December 6, 2001, the Plan was amended to increase the number of shares reserved under the Plan to 2,233,000.

The Company applies APB Opinion 25 and related interpretations in accounting for its plan. Accordingly, no compensation cost has been recognized for stock options granted at or above

F-12

market value at the date of the grant to key employees and directors. Compensation expense of \$3,338 has been recorded during fiscal 2001, for options granted below the market value, based on the difference between the option price and the quoted market price at the date of grant. Had compensation cost for the Company's stock-based compensation plans been determined based on the fair value at the grant dates for awards under those plans consistent with the method prescribed in SFAS 123, the Company's net (loss) and (loss) per share would have been increased to the pro forma amounts indicated below:

	Years ended June 30,	
	2002	2001
Net (loss)		
As reported	\$ (8,111,561)	\$ (104,371)
Pro forma	(8,558,645)	(346,240)
(Loss) per share		
As reported	(1.00)	(0.01)
Pro forma	(1.06)	(0.05)

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model with the following assumptions used for grants in fiscal 2002 and 2001 respectively: no dividend yield for all years; expected volatility of 83% and 146%; weighted average risk-free interest rates of 4.35% and 5.36%; and expected lives of ten and seven years.

A summary of the status of the Company's fixed stock options plan as of June 30, 2002 and 2001, and changes during the years then ended is presented below:

	2002		2001	
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
Fixed Options				
Outstanding at beginning of year	1,148,964	\$ 1.58	1,133,964	\$ 1.60
Granted	545,000	.99	135,000	1.85

Edgar Filing: KESTREL ENERGY INC - Form 10KSB/A

Exercised	--	--	--	--
Cancelled	--	--	--	--
Expired	--	--	(120,000)	2.14
	-----	-----	-----	-----

Outstanding at end of year	1,693,96	\$ 1.39	1,148,964	\$ 1.58
	=====		=====	

Options exercisable at year end	1,688,964	1,123,964
Weighted average fair value of options granted during the year	\$.82	\$ 1.79
Weighted average remaining contractual life	6.6	6.3

(6) INCOME TAXES

At June 30, 2002 and 2001, the Company's significant deferred tax assets and liabilities are as follows:

F-13

	2002	2001
	-----	-----
Deferred tax assets:		
Net operating loss carryforwards	\$ 3,820,000	\$ 3,383,000
Depletion carryforwards	203,000	225,000
Oil and gas properties, principally due to differences in depreciation, depletion and impairment	2,850,000	30,000
	-----	-----
	6,873,000	3,638,000
Deferred liabilities:		
Oil and gas properties, principally due to differences in depreciation, depletion and impairment	(570,000)	(564,000)
	-----	-----
	(570,000)	(564,000)
Valuation allowance	(6,303,000)	(3,074,000)
	-----	-----
Net deferred tax assets	\$ --	\$ --
	=====	=====

The valuation allowance for deferred tax assets as of June 30, 2002 was \$6,303,000. The net change in the valuation allowance for the year ended June 30, 2002 was an increase of \$3,229,000.

At June 30, 2002, the Company had net operating loss carryforwards of approximately \$9,794,000. The utilization of approximately \$496,000 of these loss carryforwards is limited to an estimated \$80,000 per year as a result of a change of ownership which occurred June 30, 1994. Of the balance of the net operating loss carryforwards, \$9,298,000 is available to offset future taxable income of the Company. If not utilized, the tax net operating losses will expire during the period from 2003 through 2022.

Edgar Filing: KESTREL ENERGY INC - Form 10KSB/A

Income tax expense is different from amounts computed by applying the statutory federal income tax rate due primarily to the change in valuation allowance for net deferred tax assets and the expiration of tax carryforwards.

(7) LEASE COMMITMENTS

The Company has noncancelable operating leases, primarily for rent of office facilities that expire over the next five years. Rental expense for operating leases was \$83,377 and \$73,903 for the years ended June 30, 2002 and 2001, respectively.

F-14

Future minimum rental commitments under noncancelable operating leases as of June 30, 2002 are as follows:

Fiscal year:	
2003	\$ 55,704
2004	1,929

	\$ 116,320
	=====

(8) CONTINGENCIES

In the ordinary course of conducting its business, the Company becomes involved in litigation, administrative proceedings and governmental investigations, including environmental matters.

In May 2000, the Company received a notice letter from the U.S. Environmental Protection Agency (EPA) stating that the Company is a potentially responsible party under the federal Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA) at the Casmalia Waste Disposal Site in Santa Barbara County, California. If the Company is ultimately determined to be a responsible party, it may be obligated to conduct remedial investigations, feasibility studies, remediation and/or removal of alleged releases of hazardous substances or to reimburse the EPA for such activities.

The Company does not believe that it has any liability under CERCLA for wastes disposed at Casmalia and believes that the EPA's notice was issued in error. The Company has responded to the EPA, explaining that the Company did not arrange to dispose of any waste at Casmalia. The Company's involvement with Casmalia is limited to the purchase of assets from another entity, which disposed of waste at Casmalia. The Company intends to defend allegations of its responsibility, if any, and will also reply upon an indemnification given by the previous owner of the properties at Casmalia, which previous owner has confirmed that the indemnification would apply to any such allegations.

The Company is unable to estimate the dollar amount of exposure to loss in connection with the above-referenced matter; however, it has been estimated that the ultimate site-wide clean up costs will be approximately \$271.9 million.

It is the opinion of Company's management that the outcome of these proceedings, individually or in the aggregate, will not have a material adverse effect on the Company's financial position, results of operations or cash flows.

(9) DISCLOSURES ABOUT CAPITALIZED COSTS, COSTS INCURRED AND MAJOR CUSTOMERS

Capitalized costs related to oil and gas producing activities are as follows:

	June 30,	
	2002	2001
Unproved - Domestic	\$ 215,892	217,941
Proved	11,062,848	12,398,775
	-----	-----
	11,278,740	12,616,716
Accumulated depletion and impairment	(8,685,589)	(3,039,413)
	-----	-----
	\$ 2,593,151	9,577,303
	=====	=====

Costs incurred in oil and gas producing activities for the years ended June 30, 2002 and 2001 were approximately as follows:

	2002	2001
	-----	-----
Unproved property acquisition costs	\$ --	13,557
Proved property acquisition costs	257	38,594
Development costs	87,087	523,668
Exploration costs	96,601	654,035

During fiscal 2002, the Company had two major customers. Sales to those customers accounted for approximately 27% and 13% of fiscal 2002 oil and gas sales. During fiscal 2001, the Company had two major customers. Sales to these customers accounted for approximately 26% and 15% of fiscal 2001 oil and gas sales.

During fiscal 2002, the Company spent approximately \$51,000 converting proved undeveloped reserves at Amber field (1 well) into proved producing reserves. During fiscal 2001, the Company spent approximately \$514,000 converting proved undeveloped reserves at Amber field (2 wells) and Wagensen Waterflood field (4 wells) into proved producing reserves.

(10) SUBSEQUENT EVENT

On August 6, 2002, the Company borrowed \$500,000 from Samson Exploration N.L. ("Samson"), due December 4, 2002, or at any other date agreed to by the parties, with interest at 10%. The Company agreed to pay \$50,000 as a financing fee to Samson. Proceeds from the loan were used to repay the Company's outstanding balance on its line of credit to Wells Fargo (See note 3).

Samson owns 15% of the common shares of the Company.

(11) INFORMATION REGARDING PROVED OIL AND GAS RESERVES (UNAUDITED)

The information presented below regarding the Company's oil and gas reserves were prepared by independent petroleum engineering consultants. All reserves are located within the continental United States.

Proved oil and gas reserves are the estimated quantities of crude oil,

Edgar Filing: KESTREL ENERGY INC - Form 10KSB/A

natural gas and natural gas liquids which geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions.

F-16

Proved developed oil and gas reserves are those expected to be recovered through existing wells with existing equipment and operating methods. The determination of oil and gas reserves is highly complex and interpretive. The estimates are subject to continuing changes as additional information becomes available.

Estimated net quantities of proved developed and undeveloped reserves of oil and gas for the years ended June 30, 2002 and 2001, are as follows:

	2002		2001	
	OIL (BBLs)	GAS (MCF)	OIL (BBLs)	GAS (MCF)
Beginning of year	356,000	13,384,000	388,000	24,517,000
Revisions of previous quantity estimates	(17,000)	(611,000)	(13,000)	(12,739,000)
Extensions, discoveries and improved recovery	--	--	--	1,956,000
Sales of reserves in place	(42,000)	(351,000)	--	--
Production	(24,000)	(353,000)	(19,000)	(350,000)
End of year	273,000	12,069,000	356,000	13,384,000
Proved developed reserves - end of year	201,000	4,992,000	283,000	6,189,000

STANDARDIZED MEASURE OF DISCOUNTED FUTURE NET CASH FLOWS RELATING TO PROVED OIL AND GAS RESERVES

Future net cash flows presented below are computed using year-end prices and costs. Future corporate overhead expenses and interest expense have not been included.

	2002	2001
Future cash inflows	\$ 32,752,000	\$ 46,149,000
Future costs:		
Production	(9,386,000)	(13,843,000)
Development	(4,725,000)	(4,659,000)
Future net cash flows	18,641,000	27,647,000
10% discount factor	(9,743,000)	(13,822,000)
Standardized measure of discounted future net cash flows	\$ 8,898,000	\$ 13,825,000

To achieve the 2003 future cash inflows, the capital expenditure of

Edgar Filing: KESTREL ENERGY INC - Form 10KSB/A

approximately \$1.7 mm in fiscal 2003 and \$1.7 mm in fiscal 2004 will be required to develop existing proved undeveloped reserves.

The principal sources of changes in the standardized measure of discounted future net cash flows during the years ended June 30, 2002 and 2001, are as follows:

F-17

	2002	2001
	-----	-----
Beginning of year	\$ 13,825,000	\$ 36,003,000
Sales of oil and gas produced during the period, net of production costs	(437,000)	(1,275,000)
Net change in prices and production costs	(3,688,000)	(16,108,000)
Changes in estimated future development costs	(66,000)	3,319,000
Extensions, discoveries and improved recovery	--	1,852,000
Revisions of previous quantity estimates and other	(864,000)	(13,566,000)
Sales of reserves in place	(1,255,000)	--
Purchase of reserves in place	--	--
Accretion of discount	1,383,000	3,600,000
	-----	-----
End of year	\$ 8,898,000	\$ 13,825,000
	=====	=====

The standardized measure of discounted future net cash flows relating to proved oil and gas reserves and the changes in standardized measure of discounted future net cash flows relating to proved oil and gas reserves were prepared in accordance with the provisions of SFAS 69. Future cash inflows were computed by applying current prices at year-end to estimated future production. Future production and development costs are computed by estimating the expenditures to be incurred in developing and producing the proved oil and gas reserves at year-end, based on year-end costs and assuming continuation of existing economic conditions. Future income tax expenses are calculated by applying appropriate year-end tax rates to future pretax net cash flows relating to proved oil and gas reserves, less the tax basis of properties involved and tax credits and loss carryforwards relating to oil and gas producing activities. Future net cash flows are discounted at a rate of 10% annually to derive the standardized measure of discounted future net cash flows. This calculation procedure does not necessarily result in an estimate of the fair market value or the present value of the Company's oil and gas properties.

The complete definition of proved oil and gas reserves appears at Regulation S-X 4-10(a)(2), 17 CFR 210.4-10(a)(2). The complete definition of proved developed oil and gas reserves appears at Regulation S-X 4-10(a)(3), 17 CFR 210.4-10(a)(3). The complete definition of proved undeveloped reserves appears at Regulation S-X 4-10(a)(4), 17 CFR 210.4-10(a)(4).
