**Preliminary Terms**

**Issuer:** Citigroup Global Markets Holdings Inc.  
**Guarantor:** Citigroup Inc.  
**Underlyings:** Apple Inc. and Amazon.com, Inc  
**Pricing date:** August 21, 2018  
**Valuation dates:** November 21, 2018, February 21, 2019, May 21, 2019 and August 21, 2019 (the “final valuation date”)  
**Maturity date:** August 26, 2019  
**Contingent coupon payment dates:** The fifth business day after each valuation date, except that the contingent coupon payment date following the final valuation date will be the maturity date  
**Contingent coupon:** 2% to 2.25% per quarter (8% to 9% per annum)\*, **only if** the closing value of the worst performing underlying on the immediately preceding valuation date is greater than or equal to its coupon barrier value. **You are not assured of receiving any contingent coupon payments on the securities.**  
**Automatic early redemption:** If the closing value of the worst performing underlying on any potential autocall date is greater than or equal to its initial underlying value, the securities will be automatically redeemed on the immediately following contingent coupon payment date for an amount equal to the stated principal amount *plus* the related contingent coupon payment.  
**Potential autocall dates:** Each valuation date beginning in November 2018 and ending in May 2019  
**Coupon barrier value:** For each underlying, 75% of its initial underlying value  
**Final barrier value:** For each underlying, 75% of its initial underlying value  
**Payment at maturity (if the securities are not earlier automatically redeemed):** If the securities are not automatically redeemed prior to maturity, you will receive at maturity for each security you then hold:  
If the closing value of the worst performing underlying on the final valuation date is **greater than or equal to** its final barrier value: \$1,000 *plus* the contingent coupon payment due at maturity  
If the closing value of the worst performing underlying on the final valuation date is **less than** its final barrier value: a fixed number of underlying shares of the worst performing underlying on the final valuation date equal to its equity ratio (or, if we elect, the cash value of those shares based on its closing value on the final valuation date)  
**If the securities are not automatically redeemed prior to maturity and the closing value of the worst performing underlying on the final valuation date is less than its final barrier value, you will receive underlying shares (or, in our sole discretion, cash) expected to be worth significantly less than the stated principal amount of your**

**securities, and possibly nothing, at maturity, and you will not receive any contingent coupon payment at maturity.**

## Selected Risk Considerations

You may lose a significant portion or all of your investment. Unlike conventional debt securities, the securities do not provide for the repayment of the stated principal amount at maturity in all circumstances. If the securities are not automatically redeemed prior to maturity, your payment at maturity will depend on the closing value of the worst performing underlying on the final valuation date. If the closing value of the worst performing underlying on the final valuation date is less than its final barrier value, you will not receive the stated principal amount of your securities at maturity and, instead, will receive underlying shares of the worst performing underlying on the final valuation date (or, in our sole discretion, cash based on the value thereof) expected to be worth significantly less than the stated principal amount and may be worth nothing. There is no minimum payment at maturity on the securities, and you may lose up to all of your investment.

You will not receive any contingent coupon on the contingent coupon payment date following any valuation date on which the closing value of the worst performing underlying on that valuation date is less than its coupon barrier value.

The securities are subject to the risks of all of the underlyings and will be negatively affected if any of the underlyings perform poorly, even if the other underlyings perform well.

The return on the securities depends solely on the performance of the worst performing underlying, and you will not benefit in any way from the performance of the better performing underlyings.

You will be subject to risks relating to the relationship among the underlyings. The less correlated the underlyings, the more likely it is that any one of the underlyings will perform poorly over the term of the securities. All that is necessary for the securities to perform poorly is for one of the underlyings to perform poorly; the performance of the underlyings that are not the worst performing underlying is not relevant to your return on the securities at maturity or upon an earlier automatic redemption.

The securities may be automatically redeemed prior to maturity, limiting your opportunity to receive contingent coupon payments.

The securities offer downside exposure, but no upside exposure, to the underlyings.

The securities are particularly sensitive to the volatility of the closing values of the underlyings. Whether the contingent coupon will be paid, whether the securities will be automatically redeemed and whether you are repaid your principal at maturity will depend on the closing values of the worst performing underlying solely on the applicable valuation dates.

The securities are subject to the credit risk of Citigroup Global Markets Holdings Inc. and Citigroup Inc. If Citigroup Global Markets Holdings Inc. defaults on its obligations under the securities and Citigroup Inc. defaults on its guarantee obligations, you may not receive anything owed to you under the securities.

The securities will not be listed on any securities exchange and you may not be able to sell them prior to maturity.

## Edgar Filing: CITIGROUP INC - Form FWP

The estimated value of the securities on the pricing date will be less than the issue value. For more information about the estimated value of the securities, see the accompanying preliminary pricing supplement.

- The value of the securities prior to maturity will fluctuate based on many unpredictable factors.

The issuer and its affiliates may have economic interests that are adverse to yours as a result of its and their affiliates' business activities.

- The U.S. federal tax consequences of an investment in the securities are unclear.

**The above summary of selected risks does not describe all of the risks associated with an investment in the securities. You should read the accompanying preliminary pricing supplement and product supplement for a more complete description of risks relating to the securities.**
