**CAUTIONARY STATEMENT RELEVANT TO FORWARD-LOOKING INFORMATION
FOR THE PURPOSE OF SAFE HARBOR PROVISIONS OF THE
PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995**

This quarterly report on Form 10-Q of Chevron Corporation contains forward-looking statements relating to Chevron's operations that are based on management's current expectations, estimates and projections about the petroleum, chemicals and other energy-related industries. Words such as anticipates, expects, intends, plans, targets, projects, believes, seeks, schedules, estimates, budgets and similar expressions are intended to identify such forward-looking statements. These statements are not guarantees of future performance and are subject to certain risks, uncertainties and other factors, some of which are beyond the company's control and are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements. The reader should not place undue reliance on these forward-looking statements, which speak only as of the date of this report. Unless legally required, Chevron undertakes no obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise.

Among the important factors that could cause actual results to differ materially from those in the forward-looking statements are: changing crude-oil and natural-gas prices; changing refining, marketing and chemical margins; actions of competitors or regulators; timing of exploration expenses; timing of crude-oil liftings; the competitiveness of alternate-energy sources or product substitutes; technological developments; the results of operations and financial condition of equity affiliates; the inability or failure of the company's joint-venture partners to fund their share of operations and development activities; the potential failure to achieve expected net production from existing and future crude-oil and natural-gas development projects; potential delays in the development, construction or start-up of planned projects; the potential disruption or interruption of the company's net production or manufacturing facilities or delivery/transportation networks due to war, accidents, political events, civil unrest, severe weather or crude-oil production quotas that might be imposed by the Organization of Petroleum Exporting Countries; the potential liability for remedial actions or assessments under existing or future environmental regulations and litigation; significant investment or product changes under existing or future environmental statutes, regulations and litigation; the potential liability resulting from other pending or future litigation; the company's future acquisition or disposition of assets and gains and losses from asset dispositions or impairments; government-mandated sales, divestitures, recapitalizations, industry-specific taxes, changes in fiscal terms or restrictions on scope of company operations; foreign-currency movements compared with the U.S. dollar; the effects of changed accounting rules under generally accepted accounting principles promulgated by rule-setting bodies; and the factors set forth under the heading "Risk Factors" on pages 30 through 32 of the company's 2009 Annual Report on Form 10-K. In addition, such statements could be affected by general domestic and international economic and political conditions. Unpredictable or unknown factors not discussed in this report could also have material adverse effects on forward-looking statements.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****Note 1. Interim Financial Statements**

The accompanying consolidated financial statements of Chevron Corporation and its subsidiaries (the company) have not been audited by an independent registered public accounting firm. In the opinion of the company's management, the interim data include all adjustments necessary for a fair statement of the results for the interim periods. These adjustments were of a normal recurring nature. The results for the three-month period ended March 31, 2010, are not necessarily indicative of future financial results. The term "earnings" is defined as net income attributable to Chevron Corporation.

Effective January 1, 2010, Chevron's segment reporting reflects the reclassification of certain businesses. Prior period information was revised to conform to the 2010 presentation. Refer to Note 5. Operating Segments and Geographic Data for a discussion of the changes.

Certain notes and other information have been condensed or omitted from the interim financial statements presented in this Quarterly Report on Form 10-Q. Therefore, these financial statements should be read in conjunction with the company's 2009 Annual Report on Form 10-K.

Earnings for the first quarter 2010 included after-tax charges of \$175 million associated with employee reductions in the downstream businesses and corporate staffs. Refer to Note 15 of the Consolidated Financial Statements, page 21, for further discussion.

Earnings for first quarter 2009 included after-tax gains of \$400 million on the sale of international downstream assets.

Note 2. Time Deposits

In the first quarter 2010, the company began investing in bank time deposits with maturities greater than 90 days. The company believes that the investment in longer-term bank time deposits is consistent with its cash management strategy to preserve principal, maintain high levels of liquidity and earn a competitive return.

Note 3. Noncontrolling Interests

Ownership interests in the company's subsidiaries held by parties other than the parent are presented separately from the parent's equity on the Consolidated Balance Sheet. The amount of consolidated net income attributable to the parent and the noncontrolling interests are both presented on the face of the Consolidated Statement of Income.

Activity for the equity attributable to noncontrolling interests for the first three months of 2010 and 2009 is as follows:

2010			2009		
Chevron Corporation Stockholders Equity	Noncontrolling Interest	Total Equity (Millions of dollars)	Chevron Corporation Stockholders Equity	Noncontrolling Interest	Total Equity

Edgar Filing: CHEVRON CORP - Form 10-Q

Balance at January 1	\$91,914	\$647	\$92,561	\$86,648	\$469	\$87,117
Net income	4,552	28	4,580	1,837	17	1,854
Dividends	(1,357)		(1,357)	(1,295)		(1,295)
Distributions to noncontrolling interests		(17)	(17)		(7)	(7)
Treasury shares, net	53		53	25		25
Other changes, net*	187	45	232	98	24	122
Balance at March 31	\$95,349	\$703	\$96,052	\$87,313	\$503	\$87,816

* Includes components of comprehensive income, which are disclosed separately in the Consolidated Statement of Comprehensive Income.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 4. Information Relating to the Consolidated Statement of Cash Flows**

The Net decrease (increase) in operating working capital was composed of the following operating changes:

	Three Months Ended March 31	
	2010	2009
	(Millions of dollars)	
(Increase) decrease in accounts and notes receivable	\$ (233)	\$ 1,791
(Increase) decrease in inventories	(549)	308
(Increase) decrease in prepaid expenses and other current assets	(603)	53
Increase (decrease) in accounts payable and accrued liabilities	210	(3,367)
Increase (decrease) in income and other taxes payable	1,238	(198)
Net decrease (increase) in operating working capital	\$ 63	\$ (1,413)

The Net decrease (increase) in operating working capital includes reductions of \$8 million and \$2 million for excess income tax benefits associated with stock options exercised during the three months ended March 31, 2010, and 2009, respectively. These amounts are offset by an equal amount in Net sales of treasury shares.

Net Cash Provided by Operating Activities included the following cash payments for interest on debt and for income taxes:

	Three Months Ended March 31	
	2010	2009
	(Millions of dollars)	
Interest on debt (net of capitalized interest)	\$ 70	\$
Income taxes	1,885	1,173

The Net sales of marketable securities consisted of the following gross amounts:

	Three Months Ended March 31	
	2010	2009
	(Millions of dollars)	
Marketable securities purchased	\$	\$(3)
Marketable securities sold	20	58
Net sales of marketable securities	\$20	\$55

The Net sales of treasury shares represents the cost of common shares acquired less the cost of shares issued for share-based compensation plans. Net sales totaled \$40 million and \$11 million in the first three months of 2010 and 2009, respectively. No purchases were made under the company's stock repurchase program in the 2010 and 2009 periods.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The major components of Capital expenditures and the reconciliation of this amount to the capital and exploratory expenditures, including equity affiliates, are as follows:

	Three Months Ended March 31	
	2010	2009
	(Millions of dollars)	
Additions to properties, plant and equipment	\$ 3,770	\$ 3,664
Additions to investments	150	224
Current-year dry-hole expenditures	62	159
Payments for other liabilities and assets, net	(15)	1,937
Capital expenditures	3,967	5,984
Expensed exploration expenditures	114	197
Assets acquired through capital-lease obligations	3	
Capital and exploratory expenditures, excluding equity affiliates	4,084	6,181
Company's share of expenditures by equity affiliates	298	285
Capital and exploratory expenditures, including equity affiliates	\$ 4,382	\$ 6,466

Payments for other liabilities and assets, net in the 2009 period includes \$2 billion for a cash payment related to an accrual recorded in 2008 for an upstream operating agreement outside the United States.

Note 5. Operating Segments and Geographic Data

Although each subsidiary of Chevron is responsible for its own affairs, Chevron Corporation manages its investments in these subsidiaries and their affiliates. The investments are grouped into two business segments, Upstream and Downstream, representing the company's reportable segments and operating segments as defined in accounting standards for segment reporting (ASC 280). Upstream operations consist primarily of exploring for, developing and producing crude oil and natural gas; processing, liquefaction, transportation and regasification associated with liquefied natural gas (LNG); transporting crude oil by major international oil export pipelines; transporting, storage and marketing of natural gas; and a gas-to-liquids project. Downstream operations consist primarily of refining of crude oil into petroleum products; marketing of crude oil and refined products; transporting crude oil and refined products by pipeline, marine vessel, motor equipment and rail car; and manufacturing and marketing of commodity petrochemicals, plastics for industrial uses and fuel and lubricant additives. All Other activities of the company include mining operations, power generation businesses, worldwide cash management and debt financing activities, corporate administrative functions, insurance operations, real estate activities, energy services, alternative fuels and technology.

The segments are separately managed for investment purposes under a structure that includes segment managers who report to the company's chief operating decision maker (CODM) (terms as defined in the accounting standards). The CODM is the company's Executive Committee (EXCOM), a committee of senior officers that includes the Chief Executive Officer, and EXCOM reports to the Board of Directors of Chevron Corporation.

The operating segments represent components of the company as described in the accounting standards that engage in activities (a) from which revenues are earned and expenses are incurred; (b) whose operating results are regularly reviewed by the CODM, which makes decisions about resources to be allocated to the segments and to assess their performance; and (c) for which discrete financial information is available.

Segment managers for the reportable segments are directly accountable to and maintain regular contact with the company's CODM to discuss the segment's operating activities and financial performance. The CODM approves annual capital and exploratory budgets at the reportable segment level, as well as reviews capital and exploratory funding for major projects and approves major changes to the annual capital and exploratory budgets. However,

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

business-unit managers within the operating segments are directly responsible for decisions relating to project implementation and all other matters connected with daily operations. Company officers who are members of EXCOM also have individual management responsibilities and participate in other committees for purposes other than acting as the CODM.

The activities reported in Chevron's upstream and downstream operating segments have changed effective January 1, 2010. Chemicals businesses are now reported as part of the downstream segment. In addition, the company's significant upstream-enabling operations, primarily a gas-to-liquids project and major international export pipelines, have been reclassified from the downstream segment to the upstream segment. Prior period information in this report has been revised to conform to the 2010 presentation.

The company's primary country of operation is the United States of America, its country of domicile. Other components of the company's operations are reported as International (outside the United States).

Segment Earnings The company evaluates the performance of its operating segments on an after-tax basis, without considering the effects of debt financing interest expense or investment interest income, both of which are managed by the company on a worldwide basis. Corporate administrative costs and assets are not allocated to the operating segments. However, operating segments are billed for the direct use of corporate services. Nonbillable costs remain at the corporate level in All Other. Earnings by major operating area for the three-month periods ended March 31, 2010 and 2009 are presented in the following table:

Segment Earnings

	Three Months Ended March 31	
	2010	2009

---	-----------------	-----------------

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Segment Assets Segment assets do not include intercompany investments or intercompany receivables. All Other assets consist primarily of worldwide cash, cash equivalents, time deposits and marketable securities; real estate; information systems; mining operations; power generation businesses; alternative fuels; technology companies; and assets of the corporate administrative functions. Segment assets at March 31, 2010, and December 31, 2009, are as follows:

Segment Assets

	At March 31 2010	At December 31 2009
	(Millions of dollars)

Total Assets International	110,846	107,083
Goodwill	4,618	4,618
Total Assets	\$168,932	\$164,621

Segment Sales and Other Operating Revenues Segment sales and other operating revenues, including internal transfers, for the three-month periods ended March 31, 2010 and 2009, are presented in the following table. Products are transferred between operating segments at internal product values that approximate market prices. Revenues for the upstream segment are derived primarily from the production and sale of crude oil and natural gas, as well as the sale of third-party production of natural gas. Revenues for the downstream segment are derived from the refining and

marketing of petroleum products such as gasoline, jet fuel, gas oils, lubricants, residual fuel oils and other products derived from crude oil. This segment also generates revenues from the manufacture and sale of fuel and lubricant additives and the transportation and trading of refined products and crude oil. All Other activities include revenues from mining operations, power generation businesses, insurance operations, real estate activities and technology companies.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 6. Summarized Financial Data Chevron U.S.A. Inc.**

Chevron U.S.A. Inc. (CUSA) is a major subsidiary of Chevron Corporation. CUSA and its subsidiaries manage and operate most of Chevron's U.S. businesses. Assets include those related to the exploration and production of crude oil, natural gas and natural gas liquids and those associated with refining, marketing, and supply and distribution of products derived from petroleum, excluding most of the regulated pipeline operations of Chevron. CUSA also holds the company's investment in the Chevron Phillips Chemical Company LLC joint venture, which is accounted for using the equity method. The summarized financial information for CUSA and its consolidated subsidiaries is as follows:

	Three Months Ended March 31	
	2010	2009
	(Millions of dollars)	
Sales and other operating revenues	\$ 34,257	\$ 23,811
Total costs and other deductions	33,243	23,876
Net income (loss) attributable to CUSA	699	(140)

The amount of net loss attributable to CUSA for the three months ended March 31, 2009 has been adjusted by an immaterial amount associated with the allocation of income-tax liabilities among Chevron Corporation subsidiaries.

	At March 31 2010	At December 31 2009
	(Millions of dollars)	
Current assets	\$22,853	\$23,286
Other assets	32,472	32,827
Current liabilities	15,167	16,098
Other liabilities	<u>14,037</u>	<u>14,625</u>
Total CUSA net equity	\$26,121	\$25,390
Memo: Total debt	\$ 7,065	\$ 6,999

Note 7. Summarized Financial Data Chevron Transport Corporation

Chevron Transport Corporation Limited (CTC), incorporated in Bermuda, is an indirect, wholly owned subsidiary of Chevron Corporation. CTC is the principal operator of Chevron's international tanker fleet and is engaged in the marine transportation of crude oil and refined petroleum products. Most of CTC's shipping revenue is derived by providing transportation services to other Chevron companies. Chevron Corporation has fully and unconditionally guaranteed this subsidiary's obligations in connection with certain debt securities issued by a third party. Summarized financial information for CTC and its consolidated subsidiaries is as follows:

Three Months Ended

	March 31	
	2010	2009
	(Millions of dollars)	
Sales and other operating revenues	\$244	\$182
Total costs and other deductions	263	192
Net loss attributable to CTC	(21)	(10)

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

	At March 31 2010	At December 31 2009
	(Millions of dollars)	
Current assets	\$350	\$377
Other assets	169	173
Current liabilities	111	115
Other liabilities	<u>79</u>	<u>90</u>
Total CTC net equity	\$329	\$345

There were no restrictions on CTC's ability to pay dividends or make loans or advances at March 31, 2010.

Note 8. Income Taxes

Taxes on income for the first quarter 2010 were \$3.1 billion, compared with \$1.3 billion for the corresponding period in 2009. The associated effective tax rates (calculated as the amount of Income Tax Expense divided by Income Before Income Tax Expense) were 40 percent and 42 percent, respectively.

The decline in the effective tax rate between the quarterly periods was due to a lower effective tax rate in international upstream operations, driven primarily by increased tax credits and other benefits generated in foreign tax jurisdictions.

Tax positions for Chevron and its subsidiaries and affiliates are subject to income tax audits by many tax jurisdictions throughout the world. For the company's major tax jurisdictions, examinations of tax returns for certain prior tax years had not been completed as of March 31, 2010. For these jurisdictions, the latest years for which income tax examinations had been finalized were as follows: United States 2005, Nigeria 1994, Angola 2001 and Saudi Arabia 2003.

The company engages in ongoing discussions with tax authorities regarding the resolution of tax matters in the various jurisdictions. Both the outcome of these tax matters and the timing of resolution and/or closure of the tax audits are highly uncertain. However, it is reasonably possible that developments on tax matters in certain tax jurisdictions may result in significant increases or decreases in the company's total unrecognized tax benefits within the next 12 months. Given the number of years that still remain subject to examination and the number of matters being examined in the various tax jurisdictions, we are unable to estimate the range of possible adjustments to the balance of unrecognized tax benefits.

Note 9. Employee Benefits

Chevron has defined benefit pension plans for many employees. The company typically prefunds defined benefit plans as required by local regulations or in certain situations where prefunding provides economic advantages. In the United States, all qualified plans are subject to the Employee Retirement Income Security Act (ERISA) minimum funding standard. The company does not typically fund U.S. nonqualified pension plans that are not subject to funding requirements under laws and regulations because contributions to these pension plans may be less economic and investment returns may be less attractive than the company's other investment alternatives.

The company also sponsors other postretirement (OPEB) plans that provide medical and dental benefits, as well as life insurance for some active and qualifying retired employees. The plans are unfunded, and the company and the retirees share the costs. Medical coverage for Medicare-eligible retirees in the company's main U.S. medical plan is secondary to Medicare (including Part D) and the increase to the company contribution for retiree medical coverage is limited to no more than 4 percent each year. Certain life insurance benefits are paid by the company.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The components of net periodic benefit costs for 2010 and 2009 are as follows:

	Three Months Ended March 31	
	2010	2009
	(Millions of dollars)	
Pension Benefits		
United States		
Service cost	\$ 84	\$ 67
Interest cost	122	120
Expected return on plan assets	(135)	(99)

Amortization of actuarial losses	24	26
Total International	80	85
Net Periodic Pension Benefit Costs	\$ 284	\$ 296
Other Benefits*		
Service cost	\$ 10	\$ 8
Interest cost	43	44
Amortization of prior-service credits	(18)	(20)
Amortization of actuarial losses	6	7
Curtailment gains		(5)
Net Periodic Other Benefit Costs	\$ 41	\$ 34

* Includes costs for U.S. and international OPEB plans. Obligations for plans outside the U.S. are not significant relative to the company's total OPEB obligation.

At the end of 2009, the company estimated it would contribute \$900 million to employee pension plans during 2010 (composed of \$600 million for the U.S. plans and \$300 million for the international plans). Through March 31, 2010, a total of \$306 million was contributed (including \$266 million to the U.S. plans). Total contributions for the full year

are currently estimated at \$900 million (\$600 million for the U.S. plans and \$300 million for the international plans). Actual contribution amounts are dependent upon plan-investment returns, changes in pension obligations, regulatory environments and other economic factors. Additional funding may ultimately be required if investment returns are insufficient to offset increases in plan obligations.

During the first three months of 2010, the company contributed \$46 million to its OPEB plans. The company anticipates contributing about \$162 million during the remainder of 2010.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 10. Litigation**

MTBE Chevron and many other companies in the petroleum industry have used methyl tertiary butyl ether (MTBE) as a gasoline additive. Chevron is a party to 51 pending lawsuits and claims, the majority of which involve numerous other petroleum marketers and refiners. Resolution of these lawsuits and claims may ultimately require the company to correct or ameliorate the alleged effects on the environment of prior release of MTBE by the company or other parties. Additional lawsuits and claims related to the use of MTBE, including personal-injury claims, may be filed in the future. The company's ultimate exposure related to pending lawsuits and claims is not determinable, but could be material to net income in any one period. The company no longer uses MTBE in the manufacture of gasoline in the United States.

Ecuador Chevron is a defendant in a civil lawsuit before the Superior Court of Nueva Loja in Lago Agrio, Ecuador, brought in May 2003 by plaintiffs who claim to be representatives of certain residents of an area where an oil production consortium formerly had operations. The lawsuit alleges damage to the environment from the oil exploration and production operations and seeks unspecified damages to fund environmental remediation and restoration of the alleged environmental harm, plus a health monitoring program. Until 1992, Texaco Petroleum Company (Texpet), a subsidiary of Texaco Inc., was a minority member of this consortium with Petroecuador, the Ecuadorian state-owned oil company, as the majority partner; since 1990, the operations have been conducted solely by Petroecuador. At the conclusion of the consortium and following an independent third-party environmental audit of the concession area, Texpet entered into a formal agreement with the Republic of Ecuador and Petroecuador for Texpet to remediate specific sites assigned by the government in proportion to Texpet's ownership share of the consortium. Pursuant to that agreement, Texpet conducted a three-year remediation program at a cost of \$40 million. After certifying that the sites were properly remediated, the government granted Texpet and all related corporate entities a full release from any and all environmental liability arising from the consortium operations.

Based on the history described above, Chevron believes that this lawsuit lacks legal or factual merit. As to matters of law, the company believes first, that the court lacks jurisdiction over Chevron; second, that the law under which plaintiffs bring the action, enacted in 1999, cannot be applied retroactively; third, that the claims are barred by the statute of limitations in Ecuador; and, fourth, that the lawsuit is also barred by the releases from liability previously given to Texpet by the Republic of Ecuador and Petroecuador. With regard to the facts, the company believes that the evidence confirms that Texpet's remediation was properly conducted and that the remaining environmental damage reflects Petroecuador's failure to timely fulfill its legal obligations and Petroecuador's further conduct since assuming full control over the operations.

In April 2008, a mining engineer appointed by the court to identify and determine the cause of environmental damage, and to specify steps needed to remediate it, issued a report recommending that the court assess \$8 billion, which would, according to the engineer, provide financial compensation for purported damages, including wrongful death claims, and pay for, among other items, environmental remediation, health care systems and additional infrastructure for Petroecuador. The engineer's report also asserted that an additional \$8.3 billion could be assessed against Chevron for unjust enrichment. The engineer's report is not binding on the court. Chevron also believes that the engineer's work was performed and his report prepared in a manner contrary to law and in violation of the court's orders. Chevron submitted a rebuttal to the report in which it asked the court to strike the report in its entirety. In November 2008, the engineer revised the report and, without additional evidence, recommended an increase in the financial compensation for purported damages to a total of \$18.9 billion and an increase in the assessment for purported unjust enrichment to a total of \$8.4 billion. Chevron submitted a rebuttal to the revised report, which the court dismissed. In September 2009, following the disclosure by Chevron of evidence that the judge participated in meetings in which businesspeople and individuals holding themselves out as government officials discussed the case and its likely

outcome, the judge presiding over the case petitioned to be recused. In late September 2009, the judge was recused, and in October 2009, the full chamber of the provincial court affirmed the recusal, resulting in the appointment of a new judge. In February 2010, in accordance with local court process, another judge was elected as president of the provincial court and will preside over the trial.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The court has completed most of the procedural aspects of the case and could render a judgment at any time. Chevron will continue a vigorous defense of any attempted imposition of liability. In the event of an adverse trial court judgment, Chevron would expect to pursue its appeals in Ecuador. Because Chevron has no substantial assets in Ecuador, Chevron would expect enforcement actions following any adverse judgment to be brought in other jurisdictions. Chevron would expect to contest any such actions. The ultimate outcome, including any financial effect on Chevron, remains uncertain.

Management does not believe an estimate of a reasonably possible loss (or a range of loss) can be made in this case. Due to the defects associated with the engineer's report, management does not believe the report has any utility in calculating a reasonably possible loss (or a range of loss). Moreover, the highly uncertain legal environment surrounding the case provides no basis for management to estimate a reasonably possible loss (or a range of loss).

Note 11. Other Contingencies and Commitments

Guarantees The company and its subsidiaries have certain other contingent liabilities with respect to guarantees, direct or indirect, of debt of affiliated companies or third parties. Under the terms of the guarantee arrangements, generally the company would be required to perform should the affiliated company or third party fail to fulfill its obligations under the arrangements. In some cases, the guarantee arrangements may have recourse provisions that would enable the company to recover any payments made under the terms of the guarantees from assets provided as collateral.

Off-Balance-Sheet Obligations The company and its subsidiaries have certain other contingent liabilities relating to long-term unconditional purchase obligations and commitments, including throughput and take-or-pay agreements, some of which relate to suppliers' financing arrangements. The agreements typically provide goods and services, such as pipeline and storage capacity, drilling rigs, utilities, and petroleum products, to be used or sold in the ordinary course of the company's business.

Indemnifications The company provided certain indemnities of contingent liabilities of Equilon and Motiva to Shell and Saudi Refining, Inc., in connection with the February 2002 sale of the company's interests in those investments. The company would be required to perform if the indemnified liabilities become actual losses. Were that to occur, the company could be required to make future payments up to \$300 million. Through March 2010, the company paid \$48 million under these indemnities and continues to be obligated for possible additional indemnification payments in the future.

The company has also provided indemnities relating to contingent environmental liabilities related to assets originally contributed by Texaco to the Equilon and Motiva joint ventures and environmental conditions that existed prior to the formation of Equilon and Motiva or that occurred during the period of Texaco's ownership interest in the joint ventures. In general, the environmental conditions or events that are subject to these indemnities must have arisen prior to December 2001. Claims had to be asserted by February 2009 for Equilon indemnities and must be asserted no later than February 2012 for Motiva indemnities. Under the terms of these indemnities, there is no maximum limit on the amount of potential future payments. In February 2009, Shell delivered a letter to the company purporting to preserve unmaturing claims for certain Equilon indemnities. The letter itself provides no estimate of the ultimate claim amount. Management does not believe this letter or any other information provides a basis to estimate the amount, if any, of a range of loss or potential range of loss with respect to either the Equilon or the Motiva indemnities. The company posts no assets as collateral and has made no payments under the indemnities.

The amounts payable for the indemnities described in the preceding paragraph are to be net of amounts recovered from insurance carriers and others and net of liabilities recorded by Equilon or Motiva prior to September 30, 2001, for any applicable incident.

In the acquisition of Unocal, the company assumed certain indemnities relating to contingent environmental liabilities associated with assets that were sold in 1997. The acquirer of those assets shared in certain environmental remediation costs up to a maximum obligation of \$200 million, which had been reached at December 31, 2009. Under the indemnification agreement, after reaching the \$200 million obligation, Chevron is solely responsible

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

until April 2022, when the indemnification expires. The environmental conditions or events that are subject to these indemnities must have arisen prior to the sale of the assets in 1997.

Although the company has provided for known obligations under this indemnity that are probable and reasonably estimable, the amount of additional future costs may be material to results of operations in the period in which they are recognized. The company does not expect these costs will have a material effect on its consolidated financial position or liquidity.

Environmental The company is subject to loss contingencies pursuant to laws, regulations, private claims and legal proceedings related to environmental matters that are subject to legal settlements or that in the future may require the company to take action to correct or ameliorate the effects on the environment of prior release of chemicals or petroleum substances, including MTBE, by the company or other parties. Such contingencies may exist for various sites, including, but not limited to, federal Superfund sites and analogous sites under state laws, refineries, crude-oil fields, service stations, terminals, land development areas, and mining operations, whether operating, closed or divested. These future costs are not fully determinable due to such factors as the unknown magnitude of possible contamination, the unknown timing and extent of the corrective actions that may be required, the determination of the company's liability in proportion to other responsible parties, and the extent to which such costs are recoverable from third parties.

Although the company has provided for known environmental obligations that are probable and reasonably estimable, the amount of additional future costs may be material to results of operations in the period in which they are recognized. The company does not expect these costs will have a material effect on its consolidated financial position or liquidity. Also, the company does not believe its obligations to make such expenditures have had, or will have, any significant impact on the company's competitive position relative to other U.S. or international petroleum or chemical companies.

Financial Instruments The company believes it has no material market or credit risks to its operations, financial position or liquidity as a result of its commodities and other derivative activities.

Equity Redetermination For crude-oil and natural-gas producing operations, ownership agreements may provide for periodic reassessments of equity interests in estimated crude-oil and natural-gas reserves. These activities, individually or together, may result in gains or losses that could be material to earnings in any given period. One such equity redetermination process has been under way since 1996 for Chevron's interests in four producing zones at the Naval Petroleum Reserve at Elk Hills, California, for the time when the remaining interests in these zones were owned by the U.S. Department of Energy. A wide range remains for a possible net settlement amount for the four zones. For this range of settlement, Chevron estimates its maximum possible net before-tax liability at approximately \$200 million, and the possible maximum net amount that could be owed to Chevron is estimated at about \$150 million. The timing of the settlement and the exact amount within this range of estimates are uncertain.

Other Contingencies On April 26, 2010, a California appeals court issued a ruling related to the adequacy of an Environmental Impact Report (EIR) supporting the issuance of certain permits by the city of Richmond, California, to replace and upgrade certain facilities at Chevron's refinery in Richmond. The company is evaluating the ruling and its options going forward, which may include seeking a review of the decision by the California Supreme Court, requesting the city to revise the EIR to address the issues identified by the Court of Appeal, or other actions. Management believes the outcomes associated with the potential options for the project are uncertain. Due to the uncertainty of the company's future course of action, or potential outcomes of any action or combination of actions, management does not believe an estimate of the financial effects, if any, of the ruling can be made at this time.

However, the company's ultimate exposure may be significant to net income in any one future period.

Chevron receives claims from and submits claims to customers; trading partners; U.S. federal, state and local regulatory bodies; governments; contractors; insurers; and suppliers. The amounts of these claims, individually and in the aggregate, may be significant and take lengthy periods to resolve.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The company and its affiliates also continue to review and analyze their operations and may close, abandon, sell, exchange, acquire or restructure assets to achieve operational or strategic benefits and to improve competitiveness and profitability. These activities, individually or together, may result in gains or losses in future periods.

Note 12. Fair Value Measurements

Accounting standards for fair-value measurement (ASC 820) establish a framework for measuring fair value and stipulate disclosures about fair-value measurements. The standards apply to recurring and nonrecurring financial and nonfinancial assets and liabilities that require or permit fair-value measurements. Among the required disclosures is the fair-value hierarchy of inputs the company uses to value an asset or a liability. The three levels of the fair-value hierarchy are described as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets and liabilities. For the company, Level 1 inputs include exchange-traded futures contracts for which the parties are willing to transact at the exchange-quoted price and marketable securities that are actively traded.

Level 2: Inputs other than Level 1 that are observable, either directly or indirectly. For the company, Level 2 inputs include quoted prices for similar assets or liabilities, prices obtained through third-party broker quotes and prices that can be corroborated with other observable inputs for substantially the complete term of a contract.

Level 3: Unobservable inputs. The company does not use Level 3 inputs for any of its recurring fair-value measurements. Level 3 inputs may be required for the determination of fair value associated with certain nonrecurring measurements of nonfinancial assets and liabilities.

The fair value hierarchy for recurring assets and liabilities measured at fair value at March 31, 2010 and December 31, 2009, is as follows:

Assets and Liabilities Measured at Fair Value on a Recurring Basis

	At				At			
	March 31, 2010	March 31, 2010	March 31, 2010	March 31, 2010	December 31, 2009	December 31, 2009	December 31, 2009	December 31, 2009
	Liabilities	Inputs	Inputs	Inputs	Liabilities	Inputs	Inputs	Inputs
	(Level 1)	(Level 2)	(Level 3)	(Level 3)	(Level 1)	(Level 2)	(Level 3)	(Level 3)
	(Millions of dollars)							
Marketable Securities	\$ 84	\$ 84	\$	\$	\$106	\$106	\$	\$
Derivatives	190	31	159		127	14	113	
Total Recurring Assets at Fair Value	\$274	\$115	\$159	\$	\$233	\$120	\$113	\$

Derivatives	\$217	\$142	\$ 75	\$	\$101	\$ 20	\$ 81	\$
Total Recurring Liabilities at Fair Value	\$217	\$142	\$ 75	\$	\$101	\$ 20	\$ 81	\$

Marketable Securities The company calculates fair value for its marketable securities based on quoted market prices for identical assets and liabilities. The fair values reflect the cash that would have been received if the instruments were sold at March 31, 2010.

Derivatives The company records its derivative instruments other than any commodity derivative contracts that are designated as normal purchase and normal sale on the Consolidated Balance Sheet at fair value, with virtually all the offsetting amount to the Consolidated Statement of Income. For derivatives with identical or similar provisions as contracts that are publicly traded on a regular basis, the company uses the market values of the publicly traded instruments as an input for fair-value calculations.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The company's derivative instruments principally include crude-oil, natural-gas and refined-product futures, swaps, options and forward contracts. Derivatives classified as Level 1 include futures, swaps and options contracts traded in active markets such as the New York Mercantile Exchange.

Derivatives classified as Level 2 include swaps, options, and forward contracts principally with financial institutions and other oil and gas companies, the fair values for which are obtained from third-party broker quotes, industry pricing services and exchanges. The company obtains multiple sources of pricing information for the Level 2 instruments. Since this pricing information is generated from observable market data, it has historically been very consistent. The company does not materially adjust this information. The company incorporates internal review, evaluation and assessment procedures, including a comparison of Level 2 fair values derived from the company's internally developed forward curves (on a sample basis) with the pricing information to document reasonable, logical and supportable fair-value determinations and proper level of classification.

Impairments of Properties, plant and equipment The company did not have any assets and liabilities measured at fair value on a nonrecurring basis to report in the first quarter 2010. Before-tax losses associated with the impairment of property, plant and equipment held and used and held for sale in the first quarter 2009 were \$110 million and \$44 million, respectively. The losses in the comparative period were the result of fair values determined both from internal cash-flow models, using discount rates consistent with those used by the company to evaluate cash flows of other assets of a similar nature, and from bids received from prospective buyers of assets held for sale.

Assets and Liabilities not Required to be Measured at Fair Value The company holds cash equivalents and bank time deposits in U.S. and non-U.S. portfolios. The instruments classified as cash equivalents are primarily bank time deposits with maturities of 90 days or less and money market funds. Cash and cash equivalents had carrying/fair values of \$7.4 billion and \$8.7 billion at March 31, 2010 and December 31, 2009, respectively. The instruments held in Time deposits are bank time deposits with maturities greater than 90 days, and had carrying/fair values of \$3.7 billion at March 31, 2010. The fair values of cash, cash equivalents and bank time deposits reflect the cash that would have been received or paid if the instruments were settled at March 31, 2010.

Cash and cash equivalents does not include investments with a carrying/fair value of \$55 million and \$123 million at March 31, 2010 and December 31, 2009, respectively. These investments are restricted funds related to an international upstream development project and Pascagoula Refinery projects, which are reported in Deferred charges and other assets on the Consolidated Balance Sheet. Long-term debt of \$5.7 billion had an estimated fair value of \$6.2 billion at both March 31, 2010 and December 31, 2009.

Fair values of other financial instruments at March 31, 2010 were not material.

Note 13. Derivative Instruments and Hedging Activities

The company's derivative instruments principally include crude-oil, natural-gas and refined-product futures, swaps, options and forward contracts. None of the company's derivative instruments are designated as a hedging instrument, although certain of the company's affiliates make such designation. The company's derivatives are not material to the company's financial position, results of operations or liquidity. The company believes it has no material market or credit risks to its operations, financial position or liquidity as a result of its commodities and other derivatives activities.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Derivative instruments measured at fair value at March 31, 2010 and December 31, 2009, and their classification on the Consolidated Balance Sheet and Consolidated Statement of Income are as follows:

**Consolidated Balance Sheet:
Fair Value of Derivatives not Designated as Hedging Instruments**

Type of Derivative Contract	Balance Sheet Classification	Asset Derivatives Fair Value			Liability Derivatives Fair Value		
		(Millions of Dollars)					
		At March 31 2010	At December 31 2009		At March 31 2010	At December 31 2009

Commodity	Sales and other operating revenues	6	73
Commodity	Purchased crude oil and products	(31)	64
		\$ (25)	\$ 93

Note 14. New Accounting Standards

Transfers and Servicing (ASC 860), Accounting for Transfers of Financial Assets (ASU 2009-16) The FASB issued ASU 2009-16 in December 2009. This standard became effective for the company on January 1, 2010. ASU 2009-16 changes how companies account for transfers of financial assets and eliminates the concept of qualifying

special-purpose entities. Adoption of the guidance did not have an effect on the company's results of operations, financial position or liquidity.

Consolidation (ASC 810), Improvements to Financial Reporting by Enterprises Involved With Variable Interest Entities (ASU 2009-17) The FASB issued ASU 2009-17 in December 2009. This standard became effective for the company on January 1, 2010. ASU 2009-17 requires the enterprise to qualitatively assess if it is the primary beneficiary of a variable-interest entity (VIE), and, if so, the VIE must be consolidated. Adoption of the standard did not have an impact on the company's results of operations, financial position or liquidity.

Note 15. Restructuring and Reorganization Costs

In the first quarter 2010, the company announced employee reduction programs related to the restructuring and reorganization of its downstream businesses and corporate staffs. Approximately 3,200 employees in the refining, marketing, and supply and trading operations, and 600 employees from corporate staffs, are expected to be terminated under the programs. About 1,900 of the affected positions are located in the United States. It is

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

anticipated that 2,400 employees of the total covered under the programs will be terminated during 2010, and the programs are expected to be completed by the end of 2011.

A before-tax charge of \$244 million (\$175 million after-tax) was recorded in the first quarter 2010, with \$191 million reported as Operating Expenses and \$53 million as Selling, general and administrative expenses on the Consolidated Statement of Income. The accrued liability is classified as current on the Consolidated Balance Sheet. Approximately \$80 million (\$50 million after-tax) is associated with terminations in the U.S. Downstream, \$127 million (\$100 million after-tax) in International Downstream and \$37 million (\$25 million after-tax) in All Other.

(2) Includes foreign currency effects

(3) Also referred to as earnings in the discussions that follow.

\$ (198) \$ (54)

Net income attributable to Chevron Corporation for the first quarter 2010 was \$4.6 billion (\$2.27 per share diluted), compared with \$1.8 billion (\$0.92 per share diluted) in the corresponding 2009 period.

The activities reported in Chevron's upstream and downstream operating segments have changed effective January 1, 2010. Results for the Chemicals businesses are now reported as part of the downstream segment. In addition, the company's significant upstream-enabling operations, primarily a gas-to-liquids project and major international export pipelines, have been reclassified from the downstream segment to the upstream segment. Prior period information in this report has been revised to conform to the 2010 presentation.

Upstream earnings in the first quarter 2010 were \$4.7 billion, compared with \$1.4 billion in the 2009 quarter. The increase between the comparative periods was driven by higher prices for crude oil and natural gas, and increased production of crude oil.

Downstream earnings were \$196 million in the first quarter 2010, compared with \$753 million in the year-earlier period. The decrease was primarily associated with absence of 2009 gains on sales of assets and charges in 2010 related to planned employee reductions.

Refer to pages 27 through 29 for additional discussion of results by business segment and *All Other* activities for the first quarter 2010 versus the same period in 2009.

Business Environment and Outlook

Chevron is a global energy company with significant business activities in the following countries: Angola, Argentina, Australia, Azerbaijan, Bangladesh, Brazil, Cambodia, Canada, Chad, China, Colombia, Democratic Republic of the Congo, Denmark, Indonesia, Kazakhstan, Myanmar, the Netherlands, Nigeria, Norway, the

Table of Contents

Partitioned Zone between Saudi Arabia and Kuwait, the Philippines, Republic of the Congo, Singapore, South Africa, South Korea, Thailand, Trinidad and Tobago, the United Kingdom, the United States, Venezuela, and Vietnam.

Earnings of the company depend largely on the profitability of its upstream and downstream business segments. The single biggest factor that affects the results of operations for both segments is movement in the price of crude oil. In the downstream business, crude oil is the largest cost component of refined products. The overall trend in earnings is typically less affected by results from the company's other activities and investments. Earnings for the company in any period may also be influenced by events or transactions that are infrequent or unusual in nature.

The company's operations, especially Upstream, can also be affected by changing economic, regulatory and political environments in the various countries in which it operates, including the United States. Civil unrest, acts of violence or strained relations between a government and the company or other governments may impact the company's operations or investments. Those developments have at times significantly affected the company's operations and results and are carefully considered by management when evaluating the level of current and future activity in such countries.

To sustain its long-term competitive position in the upstream business, the company must develop and replenish an inventory of projects that offer attractive financial returns for the investment required. Identifying promising areas for exploration, acquiring the necessary rights to explore for and to produce crude oil and natural gas, drilling successfully, and handling the many technical and operational details in a safe and cost-effective manner are all important factors in this effort. Projects often require long lead times and large capital commitments. From time to time, certain governments have sought to renegotiate contracts or impose additional costs on the company. Governments may attempt to do so in the future. The company will continue to monitor these developments, take them into account in evaluating future investment opportunities, and otherwise seek to mitigate any risks to the company's current operations or future prospects.

The company also continually evaluates opportunities to dispose of assets that are not expected to provide sufficient long-term value or to acquire assets or operations complementary to its asset base to help augment the company's financial performance and growth. Asset dispositions and restructurings may also occur in future periods and could result in significant gains or losses.

In recent years, Chevron and the oil and gas industry at large experienced an increase in certain costs that exceeded the general trend of inflation in many areas of the world. This increase in costs affected the company's operating expenses and capital programs for all business segments, but particularly for Upstream. Softening of these cost pressures started in late 2008 and continued through most of 2009. Industry costs began to level out in the fourth quarter 2009 and were essentially unchanged during first quarter 2010. The company continues to actively manage its schedule of work, contracting, procurement and supply-chain activities to effectively manage costs. (Refer to the Upstream section below for a discussion of the trend in crude-oil prices.)

The company closely monitors developments in the financial and credit markets, the level of worldwide economic activity and the implications to the company of movements in prices for crude oil and natural gas. Management takes these developments into account in the conduct of daily operations and for business planning. The company remains confident of its underlying financial strength to address potential challenges presented in the current environment. (Refer also to the Liquidity and Capital Resources section beginning on page 32.)

Comments related to earnings trends for the company's major business areas are as follows:

Upstream Earnings for the upstream segment are closely aligned with industry price levels for crude oil and natural gas. Crude-oil and natural-gas prices are subject to external factors over which the company has no control, including

product demand connected with global economic conditions, industry inventory levels, production quotas imposed by the Organization of Petroleum Exporting Countries (OPEC), weather-related damage and disruptions, competing fuel prices, and regional supply interruptions or fears thereof that may be caused by military conflicts, civil unrest or political uncertainty. Moreover, any of these factors could also inhibit the company's production capacity in an affected region. The company monitors developments closely in the countries in which it operates and holds investments, and attempts to manage risks in operating its facilities and businesses. Besides the impact of the fluctuation in prices for crude oil and natural gas, the longer-term trend in earnings for the upstream segment is

Table of Contents

also a function of other factors, including the company's ability to find or acquire and efficiently produce crude oil and natural gas, changes in fiscal terms of contracts and changes in tax laws and regulations.

Price levels for capital and exploratory costs and operating expenses associated with the production of crude oil and natural gas can also be subject to external factors beyond the company's control. External factors include not only the general level of inflation but also commodity prices and prices charged by the industry's material and service providers, which can be affected by the volatility of the industry's own supply-and-demand conditions for such materials and services. Capital and exploratory expenditures and operating expenses also can be affected by damage to production facilities caused by severe weather or civil unrest.

The chart below shows the trend in benchmark prices for West Texas Intermediate (WTI) crude oil and U.S. Henry Hub natural gas. During 2009, industry price levels for WTI ranged from \$34 to \$81 per barrel and finished the year at \$79 per barrel. During the first quarter 2010, WTI averaged \$79 and ended April at \$86.

A differential in crude-oil prices exists between high quality (high-gravity, low-sulfur) crudes and those of lower-quality (low-gravity, high-sulfur). The amount of the differential in any period is associated with the supply of heavy crude available versus the demand that is a function of the number of refineries that are able to process this lower quality feedstock into light products (motor gasoline, jet fuel, aviation gasoline and diesel fuel). The differential widened in first quarter 2010

primarily due to greater availability of lower quality crudes. Chevron produces or shares in the production of heavy crude oil in California, Chad, Indonesia, the Partitioned Zone between Saudi Arabia and Kuwait, Venezuela and in certain fields in Angola, China and the United Kingdom sector of the North Sea. (See page 31 for the company's average U.S. and international crude-oil realizations.)

In contrast to price movements in the global market for crude oil, price changes for natural gas in many regional markets are more closely aligned with supply-and-demand conditions in those markets. In the United States, prices at Henry Hub averaged about \$5.29 per thousand cubic feet (MCF) in the first quarter 2010, compared with about \$4.40 during the first quarter 2009. At the end of April 2010, the Henry Hub spot price was about \$3.94 per MCF. Fluctuations in the price for natural gas in the United States are closely associated with customer demand relative to the volumes produced in North America and the level of inventory in underground storage.

Certain international natural-gas markets in which the company operates have different supply, demand and regulatory circumstances, which historically have resulted in lower average sales prices for the company's production of natural gas in these locations. Chevron continues to invest in long-term projects in these locations to install infrastructure to produce and liquefy natural gas for transport by tanker to other markets where greater demand results in higher prices. International natural-gas realizations averaged about \$4.60 per MCF during first quarter 2010, compared with about \$4.20 in the same quarter last year. (See page 31 for the company's average natural gas realizations for the U.S. and international regions.)

The company's worldwide net oil-equivalent production in first quarter 2010 averaged 2.78 million barrels per day. About one-fifth of the company's net oil-equivalent production in the first quarter occurred in the OPEC-member

countries of Angola, Nigeria and Venezuela and in the Partitioned Zone between Saudi Arabia and Kuwait. OPEC quotas had no effect on the company's net crude-oil production for the first quarter 2010, while production in the first quarter 2009 was reduced by approximately 50,000 barrels per day. At the March 2010 meeting, members of OPEC supported maintaining production quotas in effect since December 2008.

The company currently estimates that oil-equivalent production in 2010 will average approximately 2.73 million barrels per day. This estimate is subject to many factors and uncertainties, including additional quotas that may be imposed by OPEC, price effects on production volumes calculated under production-sharing and variable-royalty provisions of certain agreements, changes in fiscal terms or restrictions on the scope of company operations, delays in project startups, fluctuations in demand for natural gas in various markets, weather conditions that may shut in

Table of Contents

production, civil unrest, changing geopolitics, delays in completion of maintenance turnarounds, greater-than-expected declines in production from mature fields, or other disruptions to operations. The outlook for future production levels is also affected by the size and number of economic investment opportunities and, for new large-scale projects, the time lag between initial exploration and the beginning of production. Investments in upstream projects generally begin well in advance of the start of the associated crude-oil and natural-gas production. A significant majority of Chevron's upstream investment is made outside the United States.

On April 20, 2010, an incident occurred on a deepwater drilling rig in the Gulf of Mexico, resulting in loss of life, the sinking of the rig and a significant oil spill. The rig was drilling an exploratory well at the BP-operated Macondo prospect. Chevron is not a participant in the well. To date, the company's operations have not been impacted by the incident. The future effects of this incident, including any new or additional regulation that may be adopted in response, are not known at this time.

Refer to the Results of Operations section on pages 27 and 28 for additional discussion of the company's upstream business.

Downstream Earnings for the downstream segment are closely tied to margins on the refining, manufacturing and marketing of products that include gasoline, diesel, jet fuel, lubricants, fuel oil, fuel and lubricant additives, and petrochemicals. Industry margins are sometimes volatile and can be affected by the global and regional supply-and-demand balance for refined products and petrochemicals and by changes in the price of refinery crude-oil feedstocks, petrochemical feedstocks and fuel costs. Industry margins can also be influenced by inventory levels, geopolitical events, cost of materials and services, refinery or chemical plant capacity utilization, maintenance programs and disruptions at refineries or chemical plants resulting from unplanned outages due to severe weather, fires or other operational events.

Other factors affecting profitability for downstream operations include the reliability and efficiency of the company's refining and marketing network, the effectiveness of the crude-oil and product-supply functions and the volatility of tanker-charter rates for the company's shipping operations, which are driven by the industry's demand for crude-oil and product tankers. Other factors beyond the company's control include the general level of inflation and energy costs to operate the company's refinery and distribution network.

The company's most significant marketing areas are the West Coast of North America, the U.S. Gulf Coast, Latin America, Asia, southern Africa and the United Kingdom. Chevron operates or has significant ownership interests in refineries in each of these areas except Latin America. The company plans to discontinue, by the end of the third quarter 2010, sales of Chevron- and Texaco-branded motor fuels in the District of Columbia, Delaware, Indiana, Kentucky, North Carolina, New Jersey, Maryland, Ohio, Pennsylvania, South Carolina, Virginia, West Virginia and parts of Tennessee, where the company sold to retail customers through approximately 1,100 stations and to commercial and industrial customers through supply arrangements. During 2009, sales in these markets represented approximately 8 percent of the company's total U.S. retail fuel sales volumes. Additionally, in January 2010, the company sold the rights to the Gulf trademark in the United States and its territories that it had previously licensed for use in the U.S. Northeast and Puerto Rico.

The company's refining and marketing margins in the first quarter 2010 continued to be weak due to challenging industry conditions, including weak demand in certain regions reflecting the economic slowdown, excess refined-product supplies and surplus refining capacity. Expecting these conditions to continue for the next several years, in the first quarter 2010, the company announced that its downstream businesses will be restructured to improve operating efficiency and achieve sustained improvement in financial performance. As part of this restructuring, employee-reduction programs were announced for the United States and International downstream operations. Approximately 3,200 employees in the refining, marketing, and supply and trading operations are expected to be

terminated under the programs. About 1,300 of the affected positions are located in the United States. It is anticipated that 2,000 employees will be terminated during 2010, and the programs are expected to be completed by the end of 2011. Refer to Note 15 of the Consolidated Financial Statements, page 21, for further discussion. The company is also soliciting bids for 13 U.S. terminals and certain operations in Europe (including the company's Pembroke Refinery), the Caribbean and select Central America markets. These potential market exits, dispositions of assets and other actions, may result in gains or losses in future periods.

Table of Contents

Refer to the Results of Operations section on pages 28 and 29 for additional discussion of the company's downstream operations.

All Other consists of mining operations, power generation businesses, worldwide cash management and debt financing activities, corporate administrative functions, insurance operations, real estate activities, alternative fuels, and technology companies. In the first quarter 2010, employee-reduction programs were announced for the corporate staffs. Approximately 600 employees from the corporate staffs are expected to be terminated under the programs by the end of 2011, including 400 that will be terminated during 2010. Refer to Note 15 of the Consolidated Financial Statements, page 21, for further discussion.

Operating Developments

Noteworthy operating developments for the upstream business in recent months included the following:

United States

Achieved first oil at the nonoperated Perdido deepwater project in the Gulf of Mexico. Located in nearly 8,000 feet of water, Perdido is also the world's deepest offshore oil and gas drilling and production spar. Chevron has a 37.5 percent working interest in the Perdido regional host facility.

Commenced exploratory drilling operations with a second ultra-deep water drillship at the Moccasin prospect in the Gulf of Mexico.

Bid successfully for new exploration acreage in the recent central Gulf of Mexico lease sale.

In the downstream business, the company continued to progress restructuring plans to streamline its operations.

Results of Operations

Business Segments The following section presents the results of operations for the company's business segments Upstream and Downstream as well as for All Other the departments and companies managed at the corporate level. (Refer to Note 5 beginning on page 9 for a discussion of the company's reportable segments, as defined under the accounting standards for segment reporting.)

Upstream

	Three Months Ended March 31	
	2010	2009
	(Millions of dollars)	
U.S. Upstream Earnings	\$1,156	\$27

U.S. upstream earnings of \$1.16 billion in the first quarter 2010 were up \$1.13 billion from a year earlier. Higher prices for crude oil and natural gas increased earnings by about \$1.1 billion, and higher liquids production in the first quarter 2010 benefitted earnings by approximately \$150 million. Partially offsetting these effects was higher depreciation expense.

The company's average realization per barrel of crude oil and natural gas liquids was approximately \$71 in the 2010 quarter, compared with \$36 a year ago. The average natural-gas realization in the first quarter 2010 was \$5.29 per thousand cubic feet, up from \$4.14 in last year's first quarter.

Net oil-equivalent production of 734,000 barrels per day in the first quarter 2010 was up 63,000 barrels per day, or about 9 percent, from a year earlier. The increase was primarily associated with new production, mostly from the start-up of the Tahiti Field in second quarter 2009 and ramp-up of the Blind Faith Field, which began production in late 2008, along with the restoration of volumes that were offline in the first quarter 2009 due to 2008 hurricanes in the Gulf of Mexico. The net liquids component of production was up 15 percent to 505,000 barrels per day in the 2010 first quarter while net natural-gas production of 1.38 billion cubic feet per day was unchanged between periods.

Table of Contents

	Three Months Ended March 31	
	2010	2009
	(Millions of dollars)	
International Upstream Earnings*	\$3,568	\$1,351
* Includes foreign currency effects	\$ (102)	\$ 34

International upstream earnings of \$3.57 billion increased \$2.22 billion from the first quarter 2009. Higher prices for crude oil and natural gas in the first quarter 2010 benefitted earnings by about \$1.7 billion. Higher sales volumes increased earnings by about \$140 million, while various tax benefits increased earnings by approximately \$400 million.

The average realization per barrel of crude oil and natural gas liquids in the 2010 quarter was \$70, compared with \$39 a year earlier. The average natural-gas realization in the 2010 first quarter was \$4.61 per thousand cubic feet, up from \$4.21 in last year's first quarter.

Net oil-equivalent production of 2.05 million barrels per day in the first quarter 2010 increased 3 percent, or 57,000 barrels per day, from a year ago. The increase included approximately 115,000 barrels per day associated with the ramp-up of several major capital projects—the expansion at Tengiz in Kazakhstan, Agbami in Nigeria, and Tombua-Landana and Mafumeira Norte in Angola. The absence of the first quarter 2009 OPEC production curtailments was more than offset by the impact in first quarter 2010 of higher prices on certain production-sharing and variable-royalty agreements. The net liquids component of production increased about 3 percent from a year ago to 1.43 million barrels per day and net natural gas production was up about 2 percent to 3.72 billion cubic feet per day.

Downstream

	Three Months Ended March 31	
	2010	2009
	(Millions of dollars)	
U.S. Downstream Earnings	\$82	\$136

U.S. downstream earned \$82 million in the first quarter 2010, compared with earnings of \$136 million a year earlier. Lower refined-product margins of approximately \$150 million and charges related to employee reductions of approximately \$50 million were partially offset by an increase of about \$100 million in earnings from chemical operations, primarily from the 50 percent-owned Chevron Phillips Chemical Company LLC.

Refinery crude-input of 889,000 barrels per day in the first quarter 2010 decreased 49,000 barrels per day from the year-ago period primarily due to weaker demand for refined products and planned shutdown activity at the refinery in Richmond, California.

Refined-product sales of 1.35 million barrels per day were down 54,000 barrels per day from the first quarter 2009, mainly due to lower jet fuel and fuel oils sales. Branded gasoline sales decreased 5 percent to 581,000 barrels per day due mainly to lower demand.

	Three Months Ended March 31	
	2010	2009
	(Millions of dollars)	
International Downstream Earnings*	\$114	\$617
* Includes foreign currency effects	\$(98)	\$(59)

International downstream earned \$114 million in the first quarter 2010, compared with earnings of \$617 million a year earlier. The decline was due mainly to the absence of 2009 gains of about \$400 million from asset sales and charges in the first quarter 2010 of about \$100 million for employee reductions.

Refinery crude-input of 992,000 barrels per day was essentially unchanged from the first quarter 2009.

Table of Contents

Total refined-product sales of 1.7 million barrels per day in the 2010 first quarter were 12 percent lower than a year earlier, due mainly to asset sales in certain countries in Africa and Latin America since the first quarter of last year. Excluding the impact of 2009 asset sales, sales volumes were down 5 percent between periods mainly due to reduced trading activities in Europe.

All Other

**Three Months Ended
March 31**

	2010	2009
	(Millions of dollars)	

Net Charges*	\$(368)	\$(294)
---------------------	----------------	----------------

* Includes foreign currency effects	\$2	\$(29)
-------------------------------------	------------	---------------

All Other consists of mining operations, power generation businesses, worldwide cash management and debt financing activities, corporate administrative functions, insurance operations, real estate activities, alternative fuels, and technology companies.

Net charges in the first quarter 2010 were \$368 million, compared with \$294 million in the year-ago period. The increase between periods is primarily due to higher corporate tax expense and the effects of charges related to reductions in corporate staffs. Foreign-currency effects reduced net charges by \$2 million in the 2010 quarter, compared with a \$29 million increase in net charges last year.

Consolidated Statement of Income

Explanations of variations between periods for certain income statement categories are provided below:

**Three Months Ended
March 31**

	2010	2009
	(Millions of dollars)	

Sales and other operating revenues	\$46,741	\$34,987
---	-----------------	-----------------

Sales and other operating revenues for the first quarter 2010 increased \$12 billion mainly due to higher prices for crude oil, natural gas and refined products.

**Three Months Ended
March 31**

	2010	2009
	(Millions of dollars)	

Income from equity affiliates	\$1,235	\$611
--------------------------------------	----------------	--------------

Income from equity affiliates increased in the first quarter 2010 mainly due to higher upstream-related earnings from Tengizchevroil in Kazakhstan and Petropiar in Venezuela, as a result of higher prices for crude oil. Downstream-related earnings were higher between the periods due primarily to higher earnings from Chevron Phillips Chemical Company LLC, as a result of higher margins on the sales of commodity chemicals.

	Three Months Ended March 31	
	2010	2009
	(Millions of dollars)	
Other income	\$203	\$532

Other income for the quarterly period in 2010 decreased mainly due to lower gains on asset sales, partially offset by favorable foreign-exchange effects.

Table of Contents

	Three Months Ended March 31	
	2010	2009
	(Millions of dollars)	
Purchased crude oil and products	\$27,144	\$20,400

The increase in crude-oil and product purchases in the 2010 period was primarily the result of higher prices for crude oil, natural gas and refined products.

	Three Months Ended March 31	
	2010	2009
	(Millions of dollars)	
Operating, selling, general and administrative expenses	\$5,631	\$5,323

Operating, selling, general and administrative expenses increased approximately \$300 million between quarters, primarily due to charges of \$244 million related to employee reductions.

	Three Months Ended March 31	
	2010	2009
	(Millions of dollars)	
Exploration expenses	\$180	\$381

The decline in exploration expenses between quarters was primarily due to lower amounts for well write-offs.

	Three Months Ended March 31	
	2010	2009
	(Millions of dollars)	
Depreciation, depletion and amortization	\$3,082	\$2,867

The increase in first quarter 2010 was mainly associated with about \$300 million from higher crude-oil and natural-gas production, partially offset by the absence of upstream asset impairments.

Three Months Ended

	March 31	
	2010	2009
	(Millions of dollars)	
Taxes other than on income	\$4,472	\$3,978

Taxes other than on income increased primarily due to higher import duties in the company's U.K. downstream operations.

	Three Months Ended	
	March 31	
	2010	2009
	(Millions of dollars)	
Income tax expense	\$3,070	\$1,319

Effective income tax rates for the 2010 and 2009 first quarters were 40 percent and 42 percent, respectively.

The decline in the effective tax rate between the quarterly periods was due to a lower effective tax rate in international upstream operations, driven primarily by increased tax credits and other benefits generated in foreign tax jurisdictions.

Table of Contents

Liquidity and Capital Resources

Cash, cash equivalents, time deposits and marketable securities totaled approximately \$11.2 billion at March 31, 2010, up \$2.4 billion from year-end 2009. Cash provided by operating activities in the first three months of 2010 was \$7.5 billion, up from \$2.4 billion in the year-ago period due mainly to increased earnings driven by higher prices for crude oil and natural gas. These strong operating cash flows funded the company's \$4.1 billion capital and exploratory program and \$1.4 billion of dividend payments to common shareholders during the first three months of 2010. In the first quarter of 2010, the company also invested \$3.7 billion in bank time deposits with maturities greater than 90 days.

Dividends The company paid dividends of \$1.4 billion to common stockholders during the first three months of 2010. In April 2010, the company increased its quarterly dividend by 5.9 percent to 72 cents per common share payable on June 10, 2010 to shareholders of record on May 19, 2010.

Debt and Capital Lease Obligations Chevron's total debt and capital lease obligations were \$10.4 billion at March 31, 2010, down from \$10.5 billion at December 31, 2009.

The company's debt and capital lease obligations due within one year, consisting primarily of commercial paper and the current portion of long-term debt, totaled \$4.5 billion at March 31, 2010 and \$4.6 billion at December 31, 2009. Of these amounts, \$4.2 billion was reclassified to long-term at the end of both periods. At March 31, 2010, settlement of these obligations was not expected to require the use of working capital within one year, as the company had the intent and the ability, as evidenced by committed credit facilities, to refinance them on a long-term basis.

At March 31, 2010, the company had \$5.1 billion in committed credit facilities with various major banks, which enable the refinancing of short-term obligations on a long-term basis. These facilities support commercial paper borrowing and can also be used for general corporate purposes. The company's practice has been to continually replace expiring commitments with new commitments on substantially the same terms, maintaining levels management believes appropriate. Any borrowings under the facilities would be unsecured indebtedness at interest rates based on London Interbank Offered Rate or an average of base lending rates published by specified banks and on terms reflecting the company's strong credit rating. No borrowings were outstanding under these facilities at March 31, 2010. In addition, in March 2010, the prior shelf registration expired, and the company filed a new automatic shelf registration statement for an unspecified amount of nonconvertible debt securities issued or guaranteed by the company.

The company has outstanding public bonds issued by Chevron Corporation, Chevron Corporation Profit Sharing/Savings Plan Trust Fund, Texaco Capital Inc. and Union Oil Company of California. All of these securities are the obligations of, or guaranteed by, Chevron Corporation and are rated AA by Standard and Poor's Corporation and Aa1 by Moody's Investors Service. The company's U.S. commercial paper is rated A-1+ by Standard and Poor's and P-1 by Moody's. All of these ratings denote high-quality, investment-grade securities.

The company's future debt level is dependent primarily on results of operations, the capital-spending program and cash that may be generated from asset dispositions. The company believes that it has substantial borrowing capacity to meet unanticipated cash requirements and that during periods of low prices for crude oil and natural gas and narrow margins for refined products and commodity chemicals, it has the flexibility to increase borrowings and/or modify capital-spending plans to continue paying the common stock dividend and maintain the company's high-quality debt ratings.

Common Stock Repurchase Program In September 2007, the company authorized the acquisition of up to \$15 billion of its common shares at prevailing prices, as permitted by securities laws and other legal requirements and subject to

market conditions and other factors. The program is for a period of up to three years and may be discontinued at any time prior to expiration of the program in the third quarter 2010. The company did not acquire any shares during the first three months of 2010 and does not plan to acquire any shares in the second quarter 2010. From the inception of the program, the company has acquired 119 million shares at a cost of \$10.1 billion.

Table of Contents

Noncontrolling Interests The company reported noncontrolling interests of \$703 million and \$647 million at March 31, 2010 and December 31, 2009, respectively. Distributions to noncontrolling interests totaled \$17 million during the first three months of 2010.

Current Ratio current assets divided by current liabilities. The current ratio was 1.5 at March 31, 2010, and 1.4 at December 31, 2009. The current ratio is adversely affected by the fact that Chevron's inventories are valued on a Last-In, First-Out Basis. At March 31, 2010, the book value of inventory was lower than replacement costs.

Debt Ratio total debt as a percentage of total debt plus Chevron Corporation Stockholders' Equity. This ratio was 9.8 percent at March 31, 2010, and 10.3 percent at year-end 2009.

Pension Obligations At the end of 2009, the company estimated it would contribute \$900 million to employee pension plans during 2010 (composed of \$600 million for the U.S. plans and \$300 million for the international plans). Through March 31, 2010, a total of \$306 million was contributed (including \$266 million to the U.S. plans). Total estimated contributions for the full year continue to be \$900 million, but the company may contribute an amount that differs from this estimate. Actual contribution amounts are dependent upon investment returns, changes in pension obligations, regulatory environments and other economic factors. Additional funding may ultimately be required if investment returns are insufficient to offset increases in plan obligations.

Capital and Exploratory Expenditures Total expenditures, including the company's share of spending by affiliates, were \$4.4 billion in the first three months of 2010, compared with \$6.5 billion in the corresponding 2009 period. The amounts included the company's share of affiliates' expenditures of about \$298 million and \$285 million in the 2010 and 2009 periods, respectively. Outlays in the 2009 period included \$2 billion for the extension of an upstream concession. Expenditures for upstream projects in the first three months of 2010 were about \$3.9 billion, representing 89 percent of the companywide total.

Contingencies and Significant Litigation

MTBE Chevron and many other companies in the petroleum industry have used methyl tertiary butyl ether (MTBE) as a gasoline additive. Chevron is a party to 51 pending lawsuits and claims, the majority of which involve numerous other petroleum marketers and refiners. Resolution of these lawsuits and claims may ultimately require the company to correct or ameliorate the alleged effects on the environment of prior release of MTBE by the company or other parties. Additional lawsuits and claims related to the use of MTBE, including personal-injury claims, may be filed in the future. The company's ultimate exposure related to pending lawsuits and claims is not determinable, but could be material to net income in any one period. The company no longer uses MTBE in the manufacture of gasoline in the United States.

Table of Contents

Ecuador Chevron is a defendant in a civil lawsuit before the Superior Court of Nueva Loja in Lago Agrio, Ecuador, brought in May 2003 by plaintiffs who claim to be representatives of certain residents of an area where an oil production consortium formerly had operations. The lawsuit alleges damage to the environment from the oil exploration and production operations and seeks unspecified damages to fund environmental remediation and restoration of the alleged environmental harm, plus a health monitoring program. Until 1992, Texaco Petroleum Company (Texpet), a subsidiary of Texaco Inc., was a minority member of this consortium with Petroecuador, the Ecuadorian state-owned oil company, as the majority partner; since 1990, the operations have been conducted solely by Petroecuador. At the conclusion of the consortium and following an independent third-party environmental audit of the concession area, Texpet entered into a formal agreement with the Republic of Ecuador and Petroecuador for Texpet to remediate specific sites assigned by the government in proportion to Texpet's ownership share of the consortium. Pursuant to that agreement, Texpet conducted a three-year remediation program at a cost of \$40 million. After certifying that the sites were properly remediated, the government granted Texpet and all related corporate entities a full release from any and all environmental liability arising from the consortium operations.

Based on the history described above, Chevron believes that this lawsuit lacks legal or factual merit. As to matters of law, the company believes first, that the court lacks jurisdiction over Chevron; second, that the law under which plaintiffs bring the action, enacted in 1999, cannot be applied retroactively; third, that the claims are barred by the statute of limitations in Ecuador; and, fourth, that the lawsuit is also barred by the releases from liability previously given to Texpet by the Republic of Ecuador and Petroecuador. With regard to the facts, the company believes that the evidence confirms that Texpet's remediation was properly conducted and that the remaining environmental damage reflects Petroecuador's failure to timely fulfill its legal obligations and Petroecuador's further conduct since assuming full control over the operations.

In April 2008, a mining engineer appointed by the court to identify and determine the cause of environmental damage, and to specify steps needed to remediate it, issued a report recommending that the court assess \$8 billion, which would, according to the engineer, provide financial compensation for purported damages, including wrongful death claims, and pay for, among other items, environmental remediation, health care systems and additional infrastructure for Petroecuador. The engineer's report also asserted that an additional \$8.3 billion could be assessed against Chevron for unjust enrichment. The engineer's report is not binding on the court. Chevron also believes that the engineer's work was performed and his report prepared in a manner contrary to law and in violation of the court's orders. Chevron submitted a rebuttal to the report in which it asked the court to strike the report in its entirety. In November 2008, the engineer revised the report and, without additional evidence, recommended an increase in the financial compensation for purported damages to a total of \$18.9 billion and an increase in the assessment for purported unjust enrichment to a total of \$8.4 billion. Chevron submitted a rebuttal to the revised report, which the court dismissed. In September 2009, following the disclosure by Chevron of evidence that the judge participated in meetings in which businesspeople and individuals holding themselves out as government officials discussed the case and its likely outcome, the judge presiding over the case petitioned to be recused. In late September 2009, the judge was recused, and in October 2009, the full chamber of the provincial court affirmed the recusal, resulting in the appointment of a new judge. In February 2010, in accordance with local court process, another judge was elected as president of the provincial court and will preside over the trial.

The court has completed most of the procedural aspects of the case and could render a judgment at any time. Chevron will continue a vigorous defense of any attempted imposition of liability. In the event of an adverse trial court judgment, Chevron would expect to pursue its appeals in Ecuador. Because Chevron has no substantial assets in Ecuador, Chevron would expect enforcement actions following any adverse judgment to be brought in other jurisdictions. Chevron would expect to contest any such actions. The ultimate outcome, including any financial effect on Chevron, remains uncertain.

Management does not believe an estimate of a reasonably possible loss (or a range of loss) can be made in this case. Due to the defects associated with the engineer's report, management does not believe the report has any utility in calculating a reasonably possible loss (or a range of loss). Moreover, the highly uncertain legal environment surrounding the case provides no basis for management to estimate a reasonably possible loss (or a range of loss).

Table of Contents

Guarantees The company and its subsidiaries have certain other contingent liabilities with respect to guarantees, direct or indirect, of debt of affiliated companies or third parties. Under the terms of the guarantee arrangements, generally the company would be required to perform should the affiliated company or third party fail to fulfill its obligations under the arrangements. In some cases, the guarantee arrangements may have recourse provisions that would enable the company to recover any payments made under the terms of the guarantees from assets provided as collateral.

Off-Balance-Sheet Obligations The company and its subsidiaries have certain other contingent liabilities relating to long-term unconditional purchase obligations and commitments, including throughput and take-or-pay agreements, some of which relate to suppliers' financing arrangements. The agreements typically provide goods and services, such as pipeline and storage capacity, drilling rigs, utilities, and petroleum products, to be used or sold in the ordinary course of the company's business.

Indemnifications The company provided certain indemnities of contingent liabilities of Equilon and Motiva to Shell and Saudi Refining, Inc., in connection with the February 2002 sale of the company's interests in those investments. The company would be required to perform if the indemnified liabilities become actual losses. Were that to occur, the company could be required to make future payments up to \$300 million. Through March 2010, the company paid \$48 million under these indemnities and continues to be obligated for possible additional indemnification payments in the future.

The company has also provided indemnities relating to contingent environmental liabilities related to assets originally contributed by Texaco to the Equilon and Motiva joint ventures and environmental conditions that existed prior to the formation of Equilon and Motiva or that occurred during the period of Texaco's ownership interest in the joint ventures. In general, the environmental conditions or events that are subject to these indemnities must have arisen prior to December 2001. Claims had to be asserted by February 2009 for Equilon indemnities and must be asserted no later than February 2012 for Motiva indemnities. Under the terms of these indemnities, there is no maximum limit on the amount of potential future payments. In February 2009, Shell delivered a letter to the company purporting to preserve unmaturing claims for certain Equilon indemnities. The letter itself provides no estimate of the ultimate claim amount. Management does not believe this letter or any other information provides a basis to estimate the amount, if any, of a range of loss or potential range of loss with respect to either the Equilon or the Motiva indemnities. The company posts no assets as collateral and has made no payments under the indemnities.

The amounts payable for the indemnities described in the preceding paragraph are to be net of amounts recovered from insurance carriers and others and net of liabilities recorded by Equilon or Motiva prior to September 30, 2001, for any applicable incident.

In the acquisition of Unocal, the company assumed certain indemnities relating to contingent environmental liabilities associated with assets that were sold in 1997. The acquirer of those assets shared in certain environmental remediation costs up to a maximum obligation of \$200 million, which had been reached at December 31, 2009. Under the indemnification agreement, after reaching the \$200 million obligation, Chevron is solely responsible until April 2022, when the indemnification expires. The environmental conditions or events that are subject to these indemnities must have arisen prior to the sale of the assets in 1997.

Although the company has provided for known obligations under this indemnity that are probable and reasonably estimable, the amount of additional future costs may be material to results of operations in the period in which they are recognized. The company does not expect these costs will have a material effect on its consolidated financial position or liquidity.

Environmental The company is subject to loss contingencies pursuant to laws, regulations, private claims and legal proceedings related to environmental matters that are subject to legal settlements or that in the future may require the company to take action to correct or ameliorate the effects on the environment of prior release of chemicals or petroleum substances, including MTBE, by the company or other parties. Such contingencies may exist for various sites, including, but not limited to, federal Superfund sites and analogous sites under state laws, refineries, crude-oil fields, service stations, terminals, land development areas, and mining operations, whether operating, closed or divested. These future costs are not fully determinable due to such factors as the unknown magnitude of possible contamination, the unknown timing and extent of the corrective actions that may be required, the determination of

Table of Contents

the company's liability in proportion to other responsible parties, and the extent to which such costs are recoverable from third parties.

Although the company has provided for known environmental obligations that are probable and reasonably estimable, the amount of additional future costs may be material to results of operations in the period in which they are recognized. The company does not expect these costs will have a material effect on its consolidated financial position or liquidity. Also, the company does not believe its obligations to make such expenditures have had, or will have, any significant impact on the company's competitive position relative to other U.S. or international petroleum or chemical companies.

Financial Instruments The company believes it has no material market or credit risks to its operations, financial position or liquidity as a result of its commodities and other derivative activities.

Equity Redetermination For crude-oil and natural-gas producing operations, ownership agreements may provide for periodic reassessments of equity interests in estimated crude-oil and natural-gas reserves. These activities, individually or together, may result in gains or losses that could be material to earnings in any given period. One such equity redetermination process has been under way since 1996 for Chevron's interests in four producing zones at the Naval Petroleum Reserve at Elk Hills, California, for the time when the remaining interests in these zones were owned by the U.S. Department of Energy. A wide range remains for a possible net settlement amount for the four zones. For this range of settlement, Chevron estimates its maximum possible net before-tax liability at approximately \$200 million, and the possible maximum net amount that could be owed to Chevron is estimated at about \$150 million. The timing of the settlement and the exact amount within this range of estimates are uncertain.

Tax positions for Chevron and its subsidiaries and affiliates are subject to income tax audits by many tax jurisdictions throughout the world. For the company's major tax jurisdictions, examinations of tax returns for certain prior tax years had not been completed as of March 31, 2010. For these jurisdictions, the latest years for which income tax examinations had been finalized were as follows: United States 2005, Nigeria 1994, Angola 2001 and Saudi Arabia 2003.

Settlement of open tax years, as well as tax issues in other countries where the company conducts its businesses, is not expected to have a material effect on the consolidated financial position or liquidity of the company and, in the opinion of management, adequate provision has been made for income and franchise taxes for all years under examination or subject to future examination.

Other Contingencies On April 26, 2010, a California appeals court issued a ruling related to the adequacy of an Environmental Impact Report (EIR) supporting the issuance of certain permits by the city of Richmond, California, to replace and upgrade certain facilities at Chevron's refinery in Richmond. The company is evaluating the ruling and its options going forward, which may include seeking a review of the decision by the California Supreme Court, requesting the city to revise the EIR to address the issues identified by the Court of Appeal, or other actions. Management believes the outcomes associated with the potential options for the project are uncertain. Due to the uncertainty of the company's future course of action, or potential outcomes of any action or combination of actions, management does not believe an estimate of the financial effects, if any, of the ruling can be made at this time. However, the company's ultimate exposure may be significant to net income in any one future period.

Chevron receives claims from and submits claims to customers; trading partners; U.S. federal, state and local regulatory bodies; governments; contractors; insurers; and suppliers. The amounts of these claims, individually and in the aggregate, may be significant and take lengthy periods to resolve.

The company and its affiliates also continue to review and analyze their operations and may close, abandon, sell, exchange, acquire or restructure assets to achieve operational or strategic benefits and to improve competitiveness and profitability. These activities, individually or together, may result in gains or losses in future periods.

New Accounting Standards

Transfers and Servicing (ASC 860), Accounting for Transfers of Financial Assets (ASU 2009-16) The FASB issued ASU 2009-16 in December 2009. This standard became effective for the company on January 1, 2010. ASU 2009-16 changes how companies account for transfers of financial assets and eliminates the concept of qualifying

Table of Contents

special-purpose entities. Adoption of the guidance did not have an effect on the company's results of operations, financial position or liquidity.

Consolidation (ASC 810), Improvements to Financial Reporting by Enterprises Involved With Variable Interest Entities (ASU 2009-17) The FASB issued ASU 2009-17 in December 2009. This standard became effective for the company on January 1, 2010. ASU 2009-17 requires the enterprise to qualitatively assess if it is the primary beneficiary of a variable-interest entity (VIE), and, if so, the VIE must be consolidated. Adoption of the standard did not have an impact on the company's results of operations, financial position or liquidity.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk*

Information about market risks for the three months ended March 31, 2010, does not differ materially from that discussed under Item 7A of Chevron's 2009 Annual Report on Form 10-K.

Item 4. *Controls and Procedures*

(a) Evaluation of disclosure controls and procedures

The company's management has evaluated, with the participation of the Chief Executive Officer and Chief Financial Officer, the effectiveness of the company's disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. Based on this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the company's disclosure controls and procedures were effective as of March 31, 2010.

(b) Changes in internal control over financial reporting

During the quarter ended March 31, 2010, there were no changes in the company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the company's internal control over financial reporting.

PART II

OTHER INFORMATION

Item 1. *Legal Proceedings*

Government Proceedings In March 2010, the United States Department of Justice (DOJ) indicated that it intends to seek a civil penalty against the company's service station operations in Puerto Rico for alleged violations of the Commonwealth of Puerto Rico's underground storage tank regulations. The alleged violations include failure to test leak detectors, perform release monitoring and maintain compliance records. The DOJ's action may result in payment of a civil penalty exceeding \$100,000.

In the first quarter 2010, Chevron preliminarily agreed to pay the New Mexico Environmental Department a \$182,000 civil penalty and undertake certain corrective measures with respect to alleged violations of the agency's air pollution regulations identified in a June 12, 2009 notice of violation. The alleged violations involved allegations related to pump repairs, blowdown events, deviation reports and testing of the facility flare at the company's Buckeye CQ Plant located southeast of Lovington, New Mexico.

Item 1A. *Risk Factors*

Chevron is a major fully integrated petroleum company with a diversified business portfolio, a strong balance sheet, and a history of generating sufficient cash to fund capital and exploratory expenditures and to pay dividends. Nevertheless, some inherent risks could materially impact the company's financial results of operations or financial condition.

Information about risk factors for the three months ended March 31, 2010, does not differ materially from that set forth in Part I, Item 1A, of Chevron's 2009 Annual Report on Form 10-K.

Table of Contents**Item 2. *Unregistered Sales of Equity Securities and Use of Proceeds*****CHEVRON CORPORATION****ISSUER PURCHASES OF EQUITY SECURITIES**

Period	Total Number of Shares Purchased(1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Maximum Number of Shares that May Yet Be Purchased Under the Program(2)
January 1-31, 2010	144,058	75.69		
February 1-28, 2010	285	73.51		
March 1-31, 2010				
Total	144,343	75.68		

(1) Pertains to common shares repurchased during the three-month period ended March 31, 2010, from company employees for required personal income tax withholdings on the exercise of the stock options issued to management, long-term incentive plans and former Texaco Inc. stock option plans. Also includes shares delivered or attested to in satisfaction of the exercise price by holders of certain former Texaco Inc. employee stock options exercised during the three-month period ended March 31, 2010.

(2) In September 2007, the company authorized common stock repurchases of up to \$15 billion that may be made at prevailing prices as permitted by securities laws and other requirements, and subject to market conditions and other factors. The program is authorized for a period of up to three years, expiring in September 2010, and may be discontinued at any time. As of March 31, 2010, 118,996,749 shares had been acquired under this program for \$10.1 billion. No share repurchases occurred during the first three months of 2010.
