Form 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended October 1, 2011

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission File Number 1-6544

Sysco Corporation

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation or organization)

1390 Enclave Parkway

Houston, Texas

(Address of principal executive offices)

74-1648137

(IRS employer identification number)

77077-2099

(Zip Code)

Registrant's Telephone Number, Including Area Code:

(281) 584-1390

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer

Accelerated Filer

Non-accelerated Filer

Smaller Reporting Company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

586,032,473 shares of common stock were outstanding as of October 29, 2011.

Table of Contents**Sysco Corporation and its Consolidated Subsidiaries****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)**

Unless this Form 10-Q indicates otherwise or the context otherwise requires, the terms we, our, us, Sysco, or the company as used in this Form 10-Q refer to Sysco Corporation together with its consolidated subsidiaries and divisions.

1. BASIS OF PRESENTATION

The consolidated financial statements have been prepared by the company, without audit, with the exception of the July 2, 2011 consolidated balance sheet which was taken from the audited financial statements included in the company's Fiscal 2011 Annual Report on Form 10-K. The financial statements include consolidated balance sheets, consolidated results of operations, consolidated statements of comprehensive income and consolidated cash flows. In the opinion of management, all adjustments, which consist of normal recurring adjustments, necessary to present fairly the financial position, results of operations, comprehensive income and cash flows for all periods presented have been made.

Prior year amounts within the consolidated results of operations have been reclassified to conform to the current year presentation as it relates to the classification of certain items in cost of sales and operating expenses within these statements.

These financial statements should be read in conjunction with the audited financial statements and notes thereto included in the company's Fiscal 2011 Annual Report on Form 10-K. As discussed in footnote 12, Sysco's management changed the way it evaluates the performance of its operating segment results beginning in fiscal 2012. As a result, fiscal 2011 information within Note 12, Note 13 and Note 14 has been revised to show the new basis of operating segment results. As a result of the new segment performance basis of reporting and the change in income statement presentation noted above, Sysco intends to revise applicable sections of Management's Discussion and Analysis of Financial Condition and Results of Operations and Financial Statements and Supplementary Data included in the company's Annual Report on Form 10-K for the fiscal year ended July 2, 2011. These revised sections will be filed on a Current Report on Form 8-K on the same day this Form 10-Q is filed.

A review of the financial information herein has been made by Ernst & Young LLP, independent auditors, in accordance with established professional standards and procedures for such a review. A report from Ernst & Young LLP concerning their review is included as Exhibit 15.1 to this Form 10-Q.

2. NEW ACCOUNTING STANDARDS*Testing Goodwill for Impairment*

In September 2011, the FASB issued Accounting Standard Update 2011-08, *Testing Goodwill for Impairment*. This update amends Accounting Standards Codification (ASC) 350, *Intangibles—Goodwill and Other* to allow entities an option to first assess qualitative factors to determine whether it is necessary to perform the two-step quantitative goodwill impairment test. Under that option, an entity no longer would be required to calculate the fair value of a reporting unit unless the entity determines, based on that qualitative assessment, that it is more likely than not that its fair value is less than its carrying amount. The amendments in this update are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted. Sysco is currently evaluating the impact this update may have on its goodwill impairment testing.

Disclosures About an Employer's Participation in a Multiemployer Plan

In September 2011, the FASB issued Accounting Standard Update 2011-09, *Disclosures about an Employer's Participation in a Multiemployer Plan*. This update amends ASC 715-80, *Compensation—Retirement Benefits—Multiemployer Plans* to require additional disclosures about an employer's participation in a multiemployer pension plan including additional information about the plans, the level of an employer's participation in the plans and the financial health of significant plans. This update does not change the accounting for multiemployer pension plans. The amendments in this update are effective for fiscal years ending after December 15, 2011. Sysco is currently evaluating the impact this update will have on its annual disclosures.

Table of Contents**3. FAIR VALUE MEASUREMENTS**

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e. an exit price). The accounting guidance includes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The three levels of the fair value hierarchy are as follows:

Level 1 Unadjusted quoted prices for identical assets or liabilities in active markets;

Level 2 Inputs other than quoted prices in active markets for identical assets and liabilities that are observable either directly or indirectly for substantially the full term of the asset or liability; and

Level 3 Unobservable inputs for the asset or liability, which include management's own assumption about the assumptions market participants would use in pricing the asset or liability, including assumptions about risk.

Sysco's policy is to invest in only high-quality investments. Cash equivalents primarily include time deposits, certificates of deposit, commercial paper, high-quality money market funds and all highly liquid instruments with original maturities of three months or less. Restricted cash consists of investments in high-quality money market funds.

The following is a description of the valuation methodologies used for assets and liabilities measured at fair value. Time deposits, certificates of deposit and commercial paper included in cash equivalents are valued at amortized cost, which approximates fair value. These are included within cash equivalents as a Level 2 measurement in the tables below.

Money market funds are valued at the closing price reported by the fund sponsor from an actively traded exchange. These are included within cash equivalents and restricted cash as Level 1 measurements in the tables below.

The interest rate swap agreements, discussed further in Note 4, Derivative Financial Instruments, are valued using a swap valuation model that utilizes an income approach using observable market inputs including interest rates, LIBOR swap rates and credit default swap rates. These are included as a Level 2 measurement in the tables below.

The following tables present the company's assets and liabilities measured at fair value on a recurring basis as of October 1, 2011, July 2, 2011 and October 2, 2010:

	Assets Measured at Fair Value as of October 1, 2011			Total
	Level 1	Level 2	Level 3	
	(In thousands)			
Assets:				
Cash and cash equivalents				
Cash equivalents	\$	\$ 83,808	\$	\$ 83,808

Interest rate swap agreements		17,484		17,484
Total assets at fair value	\$ 164,812	\$ 268,753	\$	\$ 433,565

The carrying values of accounts receivable and accounts payable approximated their respective fair values due to the short-term maturities of these instruments. The fair value of Sysco's total debt is estimated based on the quoted market prices for the same or similar issue or on the current rates offered to the company for debt of the same remaining maturities. The fair value of total debt approximated \$3,015.6 million, \$2,919.4 million and \$2,853.9 million as of October 1, 2011, July 2, 2011 and October 2, 2010, respectively. The carrying value of total debt was \$2,596.7 million, \$2,668.5 million and \$2,494.5 million as of October 1, 2011, July 2, 2011 and October 2, 2010, respectively.

4. DERIVATIVE FINANCIAL INSTRUMENTS

Sysco manages its debt portfolio to achieve an overall desired position of fixed and floating rates and may employ interest rate swaps from time to time to achieve this position. The company does not use derivative financial instruments for trading or speculative purposes.

In fiscal 2010, the company entered into two interest rate swap agreements that effectively converted \$250.0 million of fixed rate debt maturing in fiscal 2013 and \$200.0 million of fixed rate debt maturing in fiscal 2014 to floating rate debt. These transactions were entered into with the goal of reducing overall borrowing cost and increasing floating interest rate exposure. These transactions were designated as fair value hedges since the swaps hedge against the changes in fair value of fixed rate debt resulting from changes in interest rates.

The location and the fair value of derivative instruments in the consolidated balance sheet as of October 1, 2011, July 2, 2011 and October 2, 2010 are as follows:

	Asset Derivatives		Liability Derivatives	
	Balance Sheet	Fair Value	Balance Sheet	Fair Value
	Location	(In thousands)	Location	
Fair Value Hedge Relationships:				
Interest rate swap agreements				
October 1, 2011	Other assets	\$ 13,246	N/A	N/A
July 2, 2011	Other assets	13,482	N/A	N/A
October 2, 2010	Other assets	17,484	N/A	N/A

The location and effect of derivative instruments and related hedged items on the consolidated results of operations for the 13-week periods ended October 1, 2011 and October 2, 2010 presented on a pre-tax basis are as follows:

**Location of
(Gain)**

**or Loss
Recognized
in Income**

**Amount of (Gain) or Loss
Recognized in Income
13-Week Period Ended
October 1, 2011 October 2,
2010
(In thousands)**

Fair Value Hedge Relationships:

Interest rate swap agreements

Interest expense

\$ (487)

\$

(500)

7

Table of Contents

Hedge ineffectiveness represents the difference between the changes in the fair value of the derivative instruments and the changes in fair value of the fixed rate debt attributable to changes in the benchmark interest rate. Hedge ineffectiveness is recorded directly in earnings within interest expense and was immaterial for the 13-week periods ended October 1, 2011 and October 2, 2010. The interest rate swaps do not contain credit-risk-related contingent features.

5. DEBT

As of October 1, 2011, Sysco had uncommitted bank lines of credit which provided for unsecured borrowings for working capital of up to \$95.0 million, of which \$5.4 million was outstanding.

On June 30, 2011, a Canadian subsidiary of Sysco entered into a short-term demand loan facility for the purpose of facilitating a distribution from the Canadian subsidiary to Sysco, and Sysco concurrently entered into an agreement with the bank to guarantee the loan. As of July 2, 2011, the amount outstanding under the facility was \$182.0 million. The interest rate under the facility was 2.0% and payable on the due date. The loan was repaid in full on July 4, 2011.

Sysco and one of its subsidiaries, Sysco International, ULC, have a revolving credit facility supporting the company's U.S. and Canadian commercial paper programs. The facility in the amount of \$1,000.0 million expires on November 4, 2012, but is subject to extension.

As of October 1, 2011, commercial paper issuances outstanding were \$108.0 million and were classified as long-term debt since the company's commercial paper programs are supported by the long-term revolving credit facility described above. During the 13-week period ended October 1, 2011, aggregate commercial paper issuances and short-term bank borrowings ranged from zero to approximately \$401.8 million.

6. EMPLOYEE BENEFIT PLANS

The components of net company-sponsored benefit cost for the 13-week period presented are as follows:

	Pension Benefits		Other Postretirement Plans	
	October 1, 2011	October 2, 2010	October 1, 2011	October 2, 2010
	(In thousands)			
Service cost	\$ 27,055	\$ 24,861	\$ 114	\$ 99
Interest cost	36,879	33,744	158	131
Expected return on plan assets	(40,401)	(32,980)		
Amortization of prior service cost	1,201	989	54	47
Recognized net actuarial loss (gain)	15,041	19,988	(83)	(97)
Amortization of transition obligation			38	38
Net periodic benefit cost	\$ 39,775	\$ 46,602	\$ 281	\$ 218

Sysco's contributions to its company-sponsored defined benefit plans were \$5.7 million and \$5.0 million during the 13-week periods ended October 1, 2011 and October 2, 2010, respectively.

The company made contributions of \$140.0 million to its company-sponsored qualified pension plan (Retirement Plan) in fiscal 2011 that would normally have been made in fiscal 2012. Additional contributions to the Retirement Plan are not currently anticipated in fiscal 2012; however, management will evaluate the funding position at the end of fiscal 2012 and select the timing for a contribution at that time. The company's contributions to the Supplemental Executive Retirement Plan (SERP) and other post-retirement plans are made in the amounts needed to fund current year benefit payments. The estimated fiscal 2012 contributions to fund benefit payments for the SERP and other post-retirement plans are \$23.1 million and \$0.3 million, respectively.

Table of Contents**7. EARNINGS PER SHARE**

The following table sets forth the computation of basic and diluted earnings per share:

	13-Week Period Ended	
	October 1, 2011	October 2, 2010
	(In thousands, except for share and per share data)	
Numerator:		
Net earnings	\$ 302,653	\$ 299,069
Denominator:		
Weighted-average basic shares outstanding	592,003,631	588,711,412
Dilutive effect of share-based awards	1,445,470	2,391,934
Weighted-average diluted shares outstanding	593,449,101	591,103,346
Basic earnings per share:	\$ 0.51	\$ 0.51
Diluted earnings per share:	\$ 0.51	\$ 0.51

The number of options that were not included in the diluted earnings per share calculation because the effect would have been anti-dilutive was approximately 50,000,000 and 47,800,000 for the first quarter of fiscal 2012 and 2011, respectively.

8. SHARE-BASED COMPENSATION

Sysco provides compensation benefits to employees and non-employee directors under several share-based payment arrangements including various employee stock incentive plans, the Employees Stock Purchase Plan, and various non-employee director plans.

Stock Incentive Plans

There were no share-based award grants to employees or non-employee directors during the first quarter of fiscal 2012.

Employees Stock Purchase Plan

Plan participants purchased 377,730 shares of Sysco common stock under the Sysco Employees Stock Purchase Plan during the first quarter of fiscal 2012.

The weighted average fair value per share of employee stock purchase rights issued pursuant to the Employees Stock Purchase Plan was \$4.68 during the first quarter of fiscal 2012. The fair value of the stock purchase rights is estimated as the difference between the stock price and the employee purchase price.

All Share-Based Payment Arrangements

The total share-based compensation cost that has been recognized in results of operations was \$9.8 million and \$10.1 million for the first quarter of fiscal 2012 and fiscal 2011, respectively.

As of October 1, 2011, there was \$52.7 million of total unrecognized compensation cost related to share-based compensation arrangements. This cost is expected to be recognized over a weighted-average period of 2.50 years.

Table of Contents**9. INCOME TAXES***Internal Revenue Service Settlement*

In the first quarter of fiscal 2010, Sysco reached a settlement with the Internal Revenue Service (IRS) in connection with its audits of the company's 2003 through 2006 federal income tax returns. As a result of the settlement, Sysco agreed to cease paying U.S. federal taxes related to its affiliate Baugh Supply Chain Cooperative (BSCC) on a deferred basis and pay the amounts that were recorded within deferred taxes related to BSCC over a three-year period as follows:

	(In thousands)
Fiscal 2010	\$ 528,000
Fiscal 2011	212,000
Fiscal 2012	212,000

As noted in the table above, payments related to the settlement were \$212.0 million in fiscal 2011, none of which had been paid in the first quarter of fiscal 2011. Amounts to be paid in fiscal 2012 will occur in connection with Sysco's quarterly tax payments, two of which fall in the second quarter, one in the third quarter and one in the fourth quarter. The company believes it has access to sufficient cash on hand, cash flow from operations and current access to capital to make payments on all of the amounts noted above.

Sysco's deferred taxes were impacted by the timing of these installment payments. Sysco reclassified amounts due within one year from deferred taxes to accrued income taxes at the beginning of each year in which settlement payments were to be made.

Uncertain Tax Positions

As of October 1, 2011, the gross amount of unrecognized tax benefits was \$72.9 million and the gross amount of accrued interest liabilities was \$34.5 million. It is reasonably possible that the amount of the unrecognized tax benefits with respect to certain of the company's unrecognized tax positions will increase or decrease in the next twelve months either because Sysco prevails on positions that were being challenged upon audit or because the company agrees to their disallowance. Items that may cause changes to unrecognized tax benefits primarily include the consideration of various filing requirements in numerous states and the allocation of income and expense between tax jurisdictions. At this time, an estimate of the range of the reasonably possible change cannot be made.

Effective Tax Rates

The effective tax rate of 36.90% for the first quarter of fiscal 2012 was favorably impacted by a decrease in a tax provision for a foreign tax liability of approximately \$3.6 million resulting from changes in exchange rates. Lower foreign statutory tax rates also had the impact of reducing the effective tax rate.

The effective tax rate of 37.28% for the first quarter of fiscal 2011 was favorably impacted by the adjustment of the carrying values of the company's corporate-owned life insurance policies to their cash surrender values. The gain of \$13.5 million recorded in the first quarter of fiscal 2011 was non-taxable for income tax purposes, and had the impact of decreasing income tax expense for the period by \$5.2 million.

Other

The determination of the company's provision for income taxes requires significant judgment, the use of estimates and the interpretation and application of complex tax laws. The company's provision for income taxes reflects a combination of income earned and taxed in the various U.S. federal and state, as well as foreign, jurisdictions. Jurisdictional tax law changes, increases or decreases in permanent differences between book and tax items, accruals or adjustments of accruals for tax contingencies or valuation allowances, and the company's change in the mix of earnings from these taxing jurisdictions all affect the overall effective tax rate.

Table of Contents**10. ACQUISITIONS**

During the first quarter of fiscal 2012, in the aggregate, the company paid cash of \$36.1 million for acquisitions made during fiscal 2012. Acquisitions in the first quarter of fiscal 2012 were immaterial to the consolidated financial statements.

Certain acquisitions involve contingent consideration typically payable over periods up to five years only in the event that certain operating results are attained or certain outstanding contingencies are resolved. As of October 1, 2011, aggregate contingent consideration amounts outstanding relating to acquisitions was \$64.5 million, of which \$46.0 million could result in the recording of additional goodwill.

11. COMMITMENTS AND CONTINGENCIES

Sysco is engaged in various legal proceedings which have arisen but have not been fully adjudicated. Management does not believe these proceedings will have a material adverse effect upon the consolidated financial position or results of operations of the company. However, the final results of legal proceedings cannot be predicted with certainty and if the company failed to prevail in one or more of these legal matters, the company's consolidated financial position or results of operations could be materially adversely affected in future periods.

Multiemployer Pension Plans

Sysco contributes to several multiemployer defined benefit pension plans based on obligations arising under collective bargaining agreements covering union-represented employees. Sysco does not directly manage these multiemployer plans, which are generally managed by boards of trustees, half of whom are appointed by the unions and the other half by other employers contributing to the plan. Based upon the information available from plan administrators, management believes that several of these multiemployer plans are underfunded. In addition, pension-related legislation requires underfunded pension plans to improve their funding ratios within prescribed intervals based on the level of their underfunding. As a result, Sysco expects its contributions to these plans to increase in the future.

Under current law regarding multiemployer defined benefit plans, a plan's termination, Sysco's voluntary withdrawal, or the mass withdrawal of all contributing employers from any underfunded multiemployer defined benefit plan would require Sysco to make payments to the plan for Sysco's proportionate share of the multiemployer plan's unfunded vested liabilities. Generally, Sysco does not have the greatest share of liability among the participants in any of the plans in which it participates. Based on the information available from plan administrators, which has valuation dates ranging from January 31, 2009 to December 31, 2010, Sysco estimates its share of withdrawal liability on most of the multiemployer plans in which it participates could have been as much as \$210.0 million as of October 1, 2011, based on a voluntary withdrawal. This estimate excludes plans for which Sysco has recorded withdrawal liabilities. The majority of the plans Sysco participates in have a valuation date of calendar year-end. As such, the majority of the estimated withdrawal liability results from plans for which the valuation date was December 31, 2009; therefore, the company's estimated liability reflects the condition of the financial markets as of that date. Due to the lack of current information, management believes Sysco's current share of the withdrawal liability could materially differ from this estimate. In addition, if a multiemployer defined benefit plan fails to satisfy certain minimum funding requirements, the IRS may impose a nondeductible excise tax of 5% on the amount of the accumulated funding deficiency for those employers contributing to the fund.

As of October 1, 2011, Sysco had approximately \$46.9 million in liabilities recorded related to certain multiemployer defined benefit plans for which Sysco's voluntary withdrawal had already occurred. Recorded withdrawal liabilities are estimated at the time of withdrawal based on the most recently available valuation and participant data for the respective plans; amounts are adjusted in the period of payment to reflect any changes to these estimates. If any of these plans were to undergo a mass withdrawal, as defined by the Pension Benefit Guaranty Corporation, within a two year time frame from the point of our withdrawal, Sysco could have additional liability. The company does not currently believe any mass withdrawals are probable to occur in the applicable two year time frame relating to the plans from which Sysco has voluntarily withdrawn.

Fuel Commitments

Sysco routinely enters into forward purchase commitments for a portion of its projected diesel fuel requirements. As of October 1, 2011, outstanding forward diesel fuel purchase commitments totaled approximately \$91.7 million at

a fixed price through September 2012.

Table of Contents

12. BUSINESS SEGMENT INFORMATION

The company has aggregated its operating companies into a number of segments, of which only Broadline and SYGMA are reportable segments as defined in the accounting literature related to disclosures about segments of an enterprise. The Broadline reportable segment is an aggregation of the company's United States, Canadian and European Broadline segments. Broadline operating companies distribute a full line of food products and a wide variety of non-food products to their customers. SYGMA operating companies distribute a full line of food products and a wide variety of non-food products to certain chain restaurant customer locations. Other financial information is attributable to the company's other operating segments, including the company's specialty produce and lodging industry segments and a company that distributes to international customers. The accounting policies for the segments are the same as those disclosed by Sysco for its consolidated financial statements. Intersegment sales represent specialty produce products distributed by the Broadline and SYGMA operating companies.

Beginning in the first quarter of fiscal 2012, operating segment results no longer include certain centrally incurred costs for corporate overhead and shared services due to a change in how management evaluates the performance of each of the operating segments. Previously, these centrally incurred costs were charged to the segments based upon the relative level of service used by each operating segment. Management now evaluates the performance of each of our operating segments based on its respective operating income results, which excludes the allocation of certain centrally incurred costs. This results in higher operating income at an operating segment level and higher corporate expenses. Segment reporting for the comparable prior year period has been revised to conform to the new basis of determining segment operating income without the allocation of certain centrally incurred costs. Corporate expenses generally include all expenses of the corporate office and Sysco's shared service center. These also include all share-based compensation costs and expenses related to the company's Business Transformation Project.

In addition, beginning in the third quarter of fiscal 2011, the company's custom-cut meat operations were reorganized to function as part of the United States Broadline segment. As a result, the custom-cut meat operations are included in the Broadline reportable segment in the segment reporting presented below. Previously, these operations were an independent segment and were presented with the Other financial information relating to non-reportable segments. Segment reporting for the comparable prior year period has been revised to conform to the new classification of the custom-cut meat operations as part of the Broadline reportable segment.

Table of Contents

The following tables set forth certain financial information for Sysco's business segments:

	13-Week Period Ended

Table of Contents**13. SUPPLEMENTAL GUARANTOR INFORMATION PARENT GUARANTEE**

Sysco International, ULC is an unlimited liability company organized under the laws of the Province of British Columbia, Canada and is a wholly-owned subsidiary of Sysco. In May 2002, Sysco International, Co. issued, in a private offering, \$200.0 million of 6.10% notes due in 2012. These notes are fully and unconditionally guaranteed by Sysco.

The following condensed consolidating financial statements present separately the financial position, results of operations and cash flows of the parent guarantor (Sysco), the subsidiary issuer (Sysco International) and all other non-guarantor subsidiaries of Sysco (Other Non-Guarantor Subsidiaries) on a combined basis with eliminating entries.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

This discussion should be read in conjunction with our consolidated financial statements as of July 2, 2011, and the fiscal year then ended, and Management's Discussion and Analysis of Financial Condition and Results of Operations, both contained in our Annual Report on Form 10-K for the fiscal year ended July 2, 2011. As discussed in footnotes 1 and 12 within Part I, Item 1 Financial Statements, we had a change in income statement presentation and Sysco's management changed the way it evaluates the performance of its operating segment results. As a result, Sysco intends to recast applicable sections of Management's Discussion and Analysis of Financial Condition and Results of Operations and Financial Statements and Supplementary Data included in the company's Annual Report on Form 10-K for the fiscal year ended July 2, 2011. These recast sections will be filed on a Current Report on Form 8-K on the same day this Form 10-Q is filed.

Our discussion below of our results includes certain non-GAAP financial measures that we believe better represent our underlying operating performance. Any non-GAAP financial measure will be denoted as an adjusted measure and excludes the impact of our Business Transformation Project and corporate-owned life insurance policies (COLI) policies. More information on the rationale of the use of these measures and reconciliations to GAAP numbers can be found in Non-GAAP Reconciliations.

Overview

Sysco distributes food and related products to restaurants, healthcare and educational facilities, lodging establishments and other foodservice customers. Our primary operations are located throughout the United States, Canada and Ireland and include broadline companies (which include our custom-cut meat operations), specialty produce companies, hotel supply operations, SYGMA (our chain restaurant distribution subsidiary) and a company that distributes to international customers.

We consider our primary market to be the foodservice market in the United States and Canada and estimate that we serve about 17% of this approximately \$220 billion annual market. According to industry sources, the foodservice, or food-away-from-home, market represents approximately 47% of the total dollars spent on food purchases made at the consumer level in the United States.

General economic conditions and consumer confidence can affect the frequency of purchases and amounts spent by consumers for food-away-from-home and, in turn, can impact our customers and our sales. We believe the current general economic conditions, including pressure on consumer disposable income, have contributed to a decline in the foodservice market. Historically, we have grown at a faster rate than the overall industry and believe we have continued to grow our market share in this fragmented industry.

Highlights

An uncertain economic environment in the United States, combined with rising product cost inflation and softening consumer sentiment, contributed to a challenging business environment in the first quarter of fiscal 2012. Despite these challenges, we achieved growth in operating income, net earnings and adjusted earnings per share in the first quarter of fiscal 2012.

Comparisons of results from the first quarter of fiscal 2012 to the first quarter of fiscal 2011:

Sales increased 8.6% to \$10.6 billion primarily due to increased prices due to inflation.

Operating income increased 0.6%, or \$3.1 million, to \$509.3 million, primarily driven by the increase in sales and effective management of our cost structure. Gross profit dollars increased 5.5%, or \$101.5 million, but declined as a percentage of sales primarily due to the impact of significant inflation in certain product categories. Operating expenses increased 7.3%, or \$98.4 million, primarily due to increased pay-related expense, an increase in expenses related to our Business Transformation Project, an increase in fuel costs and an unfavorable year-over-year comparison on the amounts recorded to adjust the carrying value of COLI policies to their cash surrender values. Adjusted operating expenses increased 5.3%, or \$70.1 million from the first quarter of fiscal 2011. Adjusted operating income increased 6.1%, or \$31.2 million. Overall, our operating income increase was primarily driven by increasing gross profit dollars more than operating expenses.

Table of Contents

Net earnings increased 1.2% to \$302.7 million primarily due to the increase in operating income and a decrease in the effective tax rate. Adjusted net earnings increased 8.8%.

Basic and diluted earnings per share in the first quarter of fiscal 2012 were \$0.51, which matched last year's first quarter results. Adjusted diluted earnings per share was \$0.55 in the first quarter of fiscal 2012 and \$0.51 in the first quarter of fiscal 2011, or an increase of 7.8%.

See *Non-GAAP Reconciliations* for an explanation of these non-GAAP financial measures.

Trends and Strategy

Trends

General economic conditions and consumer confidence can affect the frequency of purchases and amounts spent by consumers for food-away-from-home and, in turn, can impact our customers and our sales. We believe the current general economic conditions, including pressure on consumer disposable income, have contributed to a slow rate of recovery in the foodservice market.

In addition, we have experienced increasing levels of product cost inflation this quarter compared to fiscal 2011. While we are generally able to pass on modest levels of inflation to our customers, we were unable to fully pass through these higher levels of product cost inflation with the same gross margin without negatively impacting our customers' business and therefore our business. While we cannot predict whether inflation will continue at current levels, periods of high inflation, either overall or in certain product categories, can have a negative impact on us and our customers, as high food costs can reduce consumer spending in the food-away-from-home market, and may negatively impact our sales, gross profit, operating income and earnings.

We have also experienced higher operating costs this fiscal year from increased pay-related expense due to increased gross profit dollars and case volumes, as well as higher fuel costs. We believe pay-related expense could continue to increase if gross profit dollars and case volumes increase, as a portion of these costs is variable in nature. Fuel costs are expected to increase in fiscal 2012 as a result of anticipated higher fuel prices. Our Business Transformation Project is a key part of our strategy to control costs and grow our market share over the long-term. We believe expenses related to the project will increase in fiscal 2012 as compared to fiscal 2011 as we prepare for the deployment of the project to our operating companies and increase our headcount in our shared services center. Pension costs will decrease in fiscal 2012 primarily due to higher returns on assets of Sysco's company-sponsored qualified pension plan (Retirement Plan) obtained in fiscal 2011.

Strategy

We are focused on optimizing our core broadline business in the U.S. and Canada, while continuing to explore appropriate opportunities to profitably grow our market share and create shareholder value through adjacent and international businesses. Day-to-day, our business decisions are driven by our mission to market and deliver great products to our customers with exceptional service, with the aspirational vision of becoming each of our customers most valued and trusted business partner. We have identified five strategies to help us achieve our mission and vision:

Profoundly enrich the experience of doing business with Sysco

Continuously improve productivity in all areas of our business

Expand our portfolio of products and services by initiating a customer-centric innovation program

Explore, assess and pursue new businesses and markets, and

Develop and effectively integrate a comprehensive, enterprise-wide talent management process.

Business Transformation Project

In fiscal 2011, we began testing our underlying systems and processes of our Business Transformation Project through a pilot implementation. In the first quarter of fiscal 2012, we took additional time to improve the underlying information technology systems processes with our pilot company prior to larger scale deployment. These activities

are continuing in fiscal 2012 including a second pilot implementation. Until we reach the point where the underlying system functions as intended, our deployment timeline is still being determined. Although we expect the investment in the Business Transformation Project to

Table of Contents

provide meaningful benefits to the company over the long-term, the costs will exceed the benefits during the testing and deployment stages of implementation, including fiscal 2012.

Expenses related to the Business Transformation Project were \$37.0 million in first quarter of fiscal 2012 or \$0.04 per share and \$21.5 million in the first quarter of fiscal 2011 or \$0.02 per share. Provided the improvements expected in the underlying systems are obtained in the first half of fiscal 2012, we anticipate the software will be ready for its intended use in the second half of fiscal 2012, which will result in reduced capitalization as compared to fiscal 2011 and increased expense from both software amortization and deployment costs. We will also incur increased costs from the ramp up of our shared services center, continuing costs for additional phases of our Business Transformation Project and information technology support costs. Some of these increased costs will be partially offset by benefits obtained from the project, primarily in reduced headcount; however the costs will exceed the benefits in fiscal 2012. We expect our project expenses related to the Business Transformation Project for fiscal 2012 to be approximately \$250 million to \$275 million.

Results of Operations

The following table sets forth the components of the Results of Operations expressed as a percentage of sales for the periods indicated:

	13-Week Period Ended	
	October 1, 2011	October 2, 2010
Sales	100.0%	100.0%
Cost of sales	81.6	81.1
Gross margin	18.4	18.9
Operating expenses	13.6	13.7
Operating income	4.8	5.2
Interest expense	0.3	0.3
Other expense (income), net	0.0	(0.0)
Earnings before income taxes	4.5	4.9
Income taxes	1.7	1.8
Net earnings	2.8%	3.1%

Table of Contents

The following table sets forth the change in the components of the Results of Operations expressed as a percentage increase or decrease over the comparable period in the prior year:

	13-Week Period
Sales	8.6%
Cost of sales	9.3
Gross margin	5.5
Operating expenses	7.3
Operating income	0.6
Interest expense	(5.2)
Other expense (income), net	(114.8)
Earnings before income taxes	0.6
Income taxes	(0.4)
Net earnings	1.2%
Basic earnings per share	%
Diluted earnings per share	
Average shares outstanding	0.6
Diluted shares outstanding	0.4

Sales

Sales were 8.6% higher in the first quarter of fiscal 2012 than in the comparable period of the prior year. Product cost inflation, and the resulting increase in selling prices, impacted sales in the first quarter of fiscal 2012. Changes in product costs, an internal measure of inflation or deflation, were estimated as inflation of 7.3% during the first quarter of fiscal 2012, as compared to inflation of 3.3% during the first quarter of fiscal 2011. Case volumes improved approximately 2.0% including acquisitions within the last 12 months, or approximately 1.0% excluding these acquisitions. Sales from acquisitions within the last 12 months favorably impacted sales by 0.7% for the first quarter of fiscal 2012. The exchange rates used to translate our foreign sales into U.S. dollars positively impacted sales by 0.7% in the first quarter of fiscal 2012 compared to the first quarter fiscal 2011.

Operating Income

Cost of sales primarily includes our product costs, net of vendor consideration, and includes in-bound freight. Operating expenses include the costs of facilities, product handling, delivery, selling and general and administrative activities. Fuel surcharges are reflected within sales and gross profit; fuel costs are reflected within operating expenses.

Operating income increased 0.6%, or \$3.1 million, in the first quarter of fiscal 2012 from the first quarter of fiscal 2011 to \$509.3 million. This increase in operating income was primarily driven by increasing gross profit dollars more than operating expenses. Gross profit dollars increased 5.5%, or \$101.5 million, in the first quarter of fiscal 2012 from the first quarter of fiscal 2011, while operating expenses increased 7.3%, or \$98.4 million, in the first quarter of fiscal 2012. Contributing to the increase in operating expenses were increased expenses related to our Business Transformation Project and reduced gains incurred on our adjustments to the carrying value of COLI policies to their cash surrender values. Adjusted operating expenses increased 5.3%, or \$70.1 million, from the first quarter of fiscal 2011. Adjusted operating income increased 6.1%, or \$31.2 million.

Gross profit dollars increased in the first quarter of fiscal 2012 as compared to the first quarter of fiscal 2011 primarily due to increased sales. Gross margin, which is gross profit as a percentage of sales, was 18.40% in the first quarter of fiscal 2012, a decline of 53 basis points from the gross margin of 18.93% in the first quarter of fiscal 2011. This decline in gross margin was primarily the result of product cost inflation. Sysco's product cost inflation was estimated to be 7.3% during the first quarter of fiscal 2012. Based on our product sales mix for the first quarter of fiscal 2012, we were most impacted by higher levels of inflation in the dairy, meat and canned and dry product categories. While we are generally able to pass through modest levels of inflation to our customers, we were unable to fully pass through these higher levels of product cost inflation with the same

Table of Contents

gross margin in these product categories without negatively impacting our customers' business and therefore our business. While we cannot predict whether inflation will continue at these levels, prolonged periods of high inflation, either overall or in certain product categories, can have a negative impact on us and our customers, as high food costs can reduce consumer spending in the food-away-from-home market, and may negatively impact our sales, gross profit and earnings.

Gross profit dollars for the first quarter of fiscal 2012 also increased as a result of higher fuel surcharges. Fuel surcharges were approximately \$18.0 million higher in the first quarter of fiscal 2012 than in the comparable prior year period due to higher fuel prices incurred during the first quarter of fiscal 2012 and the application of fuel surcharges to a broader customer base in the first quarter of fiscal 2012 as compared to the first quarter of fiscal 2011.

Operating expenses for the first quarter fiscal 2012 were higher than in the comparable prior year period primarily due to increased pay-related expense, increased expenses related to our Business Transformation Project, increased fuel costs and an unfavorable year-over-year comparison on the amounts recorded to adjust the carrying value of COLI policies to their cash surrender values.

Pay-related expenses, excluding labor costs associated with our Business Transformation Project, increased by \$39.7 million in the first quarter of fiscal 2012 over the comparable prior year period. The increase was primarily due to increased gross profit dollars and case volumes, which resulted in increased sales compensation. Portions of our pay-related expense are variable in nature and are expected to increase when gross profit dollars and case volumes increase. Also contributing to the increase were delivery personnel costs, higher provisions for current year management incentive bonuses, pay-related expenses from acquired companies and changes in the exchange rates used to translate our foreign results into U.S. dollars.

Expenses related to our Business Transformation Project, inclusive of pay-related expense, were \$37.0 million in first quarter of fiscal 2012 and \$21.5 million in the first quarter of fiscal 2011, representing an increase of \$15.5 million. The increase in the first quarter of fiscal 2012 resulted from increased project spending including the increased pay-related expenses and facility-related expenses due to the ramp up of our shared services center. Provided the improvements expected in the underlying systems are obtained in the first half of fiscal 2012, we anticipate the software will be ready for its intended use in the second half of fiscal 2012, which will result in increased expense from both software amortization and deployment costs. We will also incur increased costs from the ramp up of our shared services center, continuing costs for additional phases of our Business Transformation Project and information technology support costs. We believe our expenses related to the Business Transformation Project in fiscal 2012 will be approximately \$145 million to \$170 million greater than the expense incurred in fiscal 2011.

Sysco's fuel costs increased by \$14.0 million in the first quarter of fiscal 2012 over the comparable prior year period primarily due to increased contracted and market diesel prices. Our costs per gallon increased 22.1% in the first quarter of fiscal 2012 over the first quarter of fiscal 2011. Our activities to mitigate fuel costs include reducing miles driven by our trucks through improved routing techniques, improving fleet utilization by adjusting idling time and maximum speeds and using fuel surcharges. We routinely enter into forward purchase commitments for a portion of our projected monthly diesel fuel requirements with a goal of mitigating a portion of the volatility in fuel prices.

Our fuel commitments will result in either additional fuel costs or avoided fuel costs based on the comparison of the prices on the fixed price contracts and market prices for the respective periods. In the first quarter of fiscal 2012, the forward purchase commitments resulted in an estimated \$7.7 million of avoided fuel costs as the fixed price contracts were generally lower than market prices for the contracted volumes. In the first quarter of fiscal 2011, the forward purchase commitments resulted in an estimated \$1.9 million of avoided fuel costs as the fixed price contracts were generally lower than market prices for the contracted volumes.

As of October 1, 2011, we had forward diesel fuel commitments totaling approximately \$92 million through September 2012. These contracts will lock in the price of approximately 30% to 35% of our fuel purchase needs for the contracted periods at prices lower than the current market price for diesel for the second quarter of fiscal 2012 and near the current market price for diesel for the second half of the fiscal year. Assuming that fuel prices do not rise significantly over recent levels during fiscal 2012, fuel costs exclusive of any amounts recovered through fuel surcharges are expected to increase by approximately \$25 million to \$35 million as compared to fiscal 2011. Our estimate is based upon current, published quarterly market price projections for diesel, the cost committed to in our

forward fuel purchase agreements currently in place for fiscal 2012 and estimates of fuel consumption. Actual fuel costs could vary from our estimates if any of these assumptions change, in particular if future fuel prices vary significantly from our current estimates. We continue to evaluate all opportunities to offset potential increases in fuel expense, including the use of fuel surcharges and overall expense management. Based on our

Table of Contents

current projections, we anticipate that the increase in fuel surcharges will offset the majority of our projected fuel cost increase in fiscal 2012 as compared to fiscal 2011.

We adjust the carrying values of our COLI policies to their cash surrender values on an ongoing basis. The cash surrender values of these policies are largely based on the values of underlying investments, which through fiscal 2011 included publicly traded securities. As a result, the cash surrender values of these policies fluctuated with changes in the market value of such securities. The changes in the financial markets resulted in gains for these policies of \$13.5 million in the first quarter of fiscal 2011. Near the end of fiscal 2011, we reallocated all of our policies into low-risk, fixed-income securities to reduce earnings volatility and therefore our adjustments for the first quarter of fiscal 2012 were not significant. While we expect a year over year impact from COLI adjustments during the remaining quarters of fiscal 2012 as compared to the comparable periods of fiscal 2011, we do not expect a significant impact on fiscal 2012's operating income, net earnings and earnings per share from these policies.

Net company-sponsored pension costs in first quarter of fiscal 2012 were \$6.8 million lower than the first quarter of fiscal 2011. The decrease in fiscal 2012 was due primarily to higher returns on assets of Sysco's Retirement Plan obtained in fiscal 2011.

Net Earnings

Net earnings increased 1.2% in the first quarter of fiscal 2012 from the comparable period of the prior year due primarily to the impact of changes in income taxes, as well as the factors discussed above. Adjusted net earnings increased 8.8%.

The effective tax rate of 36.90% for the first quarter of fiscal 2012 was favorably impacted by a decrease in a tax provision for a foreign tax liability of approximately \$3.6 million resulting from changes in exchange rates. Lower foreign statutory tax rates also had the impact of reducing the effective tax rate.

The effective tax rate of 37.28% for the first quarter of fiscal 2011 was favorably impacted by the adjustment of the carrying values of our COLI policies to their cash surrender values. The gain of \$13.5 million recorded in the first quarter of fiscal 2011 was non-taxable for income tax purposes, and had the impact of decreasing income tax expense for the period by \$5.2 million.

Earnings Per Share

Basic and diluted earnings per share remained unchanged in the first quarter of fiscal 2012 from the comparable period of the prior year at \$0.51 per share. Net earnings increased 1.2%, however average shares and diluted shares outstanding increased over the first quarter of fiscal 2011 primarily due to option exercises that occurred in the fourth quarter of fiscal 2011. Adjusted diluted earnings per share was \$0.55 in the first quarter of fiscal 2012 and \$0.51 in the first quarter of fiscal 2011, representing an increase of 7.8%.

Non-GAAP Reconciliations

Sysco's results of operations are impacted by costs from our multi-year Business Transformation Project. Additionally, near the end of fiscal 2011, we reallocated all of our investments in our COLI policies into low-risk, fixed-income securities and therefore we do not expect significant volatility in operating expenses, operating income, net earnings and diluted earnings per share in future periods related to these policies. We experienced significant gains in these policies during fiscal 2011. We do not expect a significant impact on fiscal 2012's operating income, net earnings and diluted earnings per share in future periods from these policies. Management believes that adjusting its operating expenses, operating income, net earnings and diluted earnings per share to remove the impact of the Business Transformation Project expenses and COLI gains provides an important perspective of underlying business trends and results and provides meaningful supplemental information to both management and investors that is indicative of the performance of the company's underlying operations and facilitates comparison on a year-over-year basis. The company uses these non-GAAP measures when evaluating its financial results as well as for internal planning and forecasting purposes. These financial measures should not be used as a substitute in assessing the company's results of operations for the 13-week periods ending October 1, 2011 and October 2, 2010. An analysis of any non-GAAP financial measure should be used in conjunction with results presented in accordance with GAAP. As a result, in the table below, the results for the first quarter of fiscal 2012 and the first quarter of fiscal 2011 are adjusted to remove expenses related to the Business Transformation Project and gains recorded on the adjustments to the carrying value of COLI

Table of Contents

policies. Set forth below is a reconciliation of actual operating expenses, operating income, net earnings and diluted earnings per share to adjusted results for these measures for the periods presented:

13-Week Period Ended October 1, 2011

	GAAP	Business Transformation	COLI	Non-GAAP
	(In thousands, except for per share data)			
Operating expenses	\$ 1,438,260	\$ (37,005)	\$ 794	\$ 1,402,049
Operating income	509,340	37,005	(794)	545,551
Tax impact of adjustments		13,655		13,655
Net earnings	302,653	23,350	(794)	325,209
Diluted earnings per share	\$ 0.51	\$ 0.04	\$ (0.02)	\$ 0.55

13-Week Period Ended October 2, 2010

	GAAP	Business Transformation	COLI	Non-GAAP
	(In thousands, except for per share data)

Diluted earnings per share	\$ 0.01	\$ 0.04	0.0%	7.8%

Table of Contents**Segment Results**

We have aggregated our operating companies into a number of segments, of which only Broadline and SYGMA are reportable segments as defined in the accounting literature related to disclosures about segments of an enterprise. The accounting policies for the segments are the same as those disclosed by Sysco for its consolidated financial statements. Intersegment sales represent specialty produce products distributed by the Broadline and SYGMA operating companies.

Beginning in the first quarter of fiscal 2012, operating segment results no longer include certain centrally incurred costs for corporate overhead and shared services due to a change in how management evaluates the performance of each of the operating segments. Previously, these centrally incurred costs were charged to the segments based upon the relative level of service used by each operating segment. Management now evaluates the performance of each of our operating segments based on its respective operating income results, which excludes the allocation of certain centrally incurred costs. This results in higher operating income at an operating segment level and higher corporate expenses. Segment reporting for the comparable prior year period has been revised to conform to the new basis of determining segment operating income without the allocation of certain centrally incurred costs. Corporate expenses generally include all expenses of the corporate office and Sysco's shared service center. These also include all share-based compensation costs and expenses related to the company's Business Transformation Project.

In addition, beginning in the third quarter of fiscal 2011, the company's custom-cut meat operations were reorganized to function as part of the United States Broadline segment. As a result, the custom-cut meat operations are included in the Broadline reportable segment in the segment reporting presented below. Previously, these operations were an independent segment and were presented with the Other financial information relating to non-reportable segments. Segment reporting for the comparable prior year period has been revised to conform to the new classification of the custom-cut meat operations as part of the Broadline reportable segment.

The following table sets forth the operating income of each of our reportable segments and the other segment expressed as a percentage of each segment's sales for each period reported and should be read in conjunction with Note 12, Business Segment Information :

	Operating Income as a Percentage of Sales 13-Week Period	
	October 1, 2011	October 2, 2010
	Broadline	7.2%
SYGMA	1.1	1.1
Other	4.2	4.0

The following table sets forth the change in the selected financial data of each of our reportable segments and the other segment expressed as a percentage increase or decrease over the comparable period in the prior year and should be read in conjunction with Note 12, Business Segment Information :

	13-Week Period	
	Sales	Operating Income
Broadline	8.9%	5.3%
SYGMA	4.9	4.7
Other	11.9	16.7

Table of Contents

The following table sets forth sales and operating income of each of our reportable segments, the other segment, and intersegment sales, expressed as a percentage of aggregate segment sales, including intersegment sales, and operating income, respectively. For purposes of these statistical tables, operating income of our segments excludes corporate expenses of \$155.0 million in the first quarter of fiscal 2012, as compared to \$122.3 million in the first quarter of fiscal 2011, that is not charged to our segments. This information should be read in conjunction with Note 12, Business Segment Information :

	13-Week Period Ended			
	October 1, 2011		October 2, 2010	
	Sales	Segment Operating Income	Sales	Segment Operating Income
Broadline	81.8%	94.0%	81.5%	94.3%
SYGMA	13.0	2.3	13.5	2.4
Other	5.6	3.7	5.4	3.3
Intersegment sales	(0.4)		(0.4)	
Total	100.0%	100.0%	100.0%	100.0%

Broadline Segment

Broadline operating companies distribute a full line of food products and a wide variety of non-food products to both traditional and chain restaurant customers and also provides custom-cut meat operations. In the first quarter of fiscal 2012, the Broadline operating results represented approximately 81.8% of Sysco's overall sales and 94.0% of the aggregated operating income of Sysco's segments, which excludes corporate expenses and consolidated adjustments.

Sales

Sales for the first quarter of fiscal 2012 were 8.9% greater than the comparable prior year period. Product cost inflation and the resulting increase in selling prices, combined with case volume improvement, contributed to the increase in sales in the first quarter of fiscal 2012. Changes in product costs, an internal measure of inflation or deflation, were estimated as inflation of 7.6% in the first quarter of fiscal 2012. Non-comparable acquisitions contributed 0.8% to the overall sales comparison for the first quarter of fiscal 2012. The changes in the exchange rates used to translate our foreign sales into U.S. dollars positively impacted sales by 0.8% compared to the first quarter of fiscal 2011.

Operating Income

Operating income increased by 5.3% in the first quarter of fiscal 2012 over the comparable prior year period. This increase was driven by increasing gross profit dollars more than operating expenses.

Gross profit dollars increased in the first quarter of fiscal 2012 primarily due to increased sales; however, gross profit dollars increased at a lower rate than sales. Based on Broadline's product sales mix for the first quarter of fiscal 2012, we were most impacted by higher levels of inflation in the dairy, meat and canned and dry product categories. While we are generally able to pass through modest levels of inflation to our customers, we were unable to fully pass through these higher levels of product cost inflation with the same gross margin in these product categories without negatively impacting our customers' business and therefore our business. While we cannot predict whether inflation will continue at these levels, prolonged periods of high inflation, either overall or in certain product categories, can have a negative impact on our customers, as high food costs can reduce consumer spending in the food-away-from-home market, and may negatively impact the Broadline segment's sales, gross profit and earnings.

Gross profit dollars for the first quarter of fiscal 2012 also increased as a result of higher fuel surcharges. Fuel surcharges were approximately \$14.9 million higher in the first quarter of fiscal 2012 than the comparable prior year period due to the application of fuel surcharges to a broader customer base in the first quarter of fiscal 2012 due to higher fuel prices incurred during this period as compared to the first quarter of fiscal 2011.

The expense increases in the first quarter of fiscal 2012 were driven largely by an increase in pay-related expenses and fuel costs. The increase in pay-related expenses was due to an increase in gross profit dollars and case volume, impacting sales personnel costs. Portions of our pay-related expense are variable in nature and are expected to increase when gross profit

Table of Contents

dollars and case volumes increase. Also contributing to the increase were delivery personnel costs, higher provisions for current year management incentive bonuses, pay-related expenses from acquired companies and changes in the exchange rates used to translate our foreign results into U.S. dollars. Fuel costs were \$9.0 million higher in the first quarter of fiscal 2012 than the comparable prior year period. Assuming that fuel prices do not rise significantly over recent levels during fiscal 2012, fuel costs for fiscal 2012 not including any amounts recovered through fuel surcharges, are expected to increase by approximately \$15 million to \$25 million as compared to fiscal 2011. Our estimate is based upon current, published quarterly market price projections for diesel, the cost committed to in our forward fuel purchase agreements currently in place for fiscal 2012 and estimates of fuel consumption. Actual fuel costs could vary from our estimates if any of these assumptions change, in particular if future fuel prices vary significantly from our current estimates. We continue to evaluate all opportunities to offset potential increases in fuel expense, including the use of fuel surcharges and overall expense management.

SYGMA Segment

SYGMA operating companies distribute a full line of food products and a wide variety of non-food products to certain chain restaurant customer locations.

Sales

Sales were 4.9% greater in the first quarter of fiscal 2012 than the comparable prior year period. The increase in sales was primarily due to product cost inflation and the resulting increase in selling prices.

Operating Income

Operating income increased by 4.7% in the first quarter of fiscal 2012 over the comparable prior year period primarily due to increased sales. Gross profit increased in the first quarter of fiscal 2012 due to increased sales and an increase of approximately \$3.2 million in the fuel surcharges charged to customers in the first quarter of fiscal 2012 from the comparable prior year period due to higher fuel prices in fiscal 2012. Operating expenses increased in the first quarter of fiscal 2012 largely due to increased delivery and warehouse personnel payroll costs as well as increased fuel cost. Fuel costs in the first quarter of fiscal 2012 were \$4.4 million greater than the comparable prior year period.

Other Segment

Other financial information is attributable to our other operating segments, including our specialty produce and lodging industry products and a company that distributes to international customers. These operating segments are discussed on an aggregate basis as they do not represent reportable segments under segment accounting literature.

Operating income increased 16.7% for the first quarter of fiscal 2012 over the comparable prior year period. The increase in operating income was caused primarily by increased sales and favorable expense management in the specialty produce and lodging industry products segments.

Liquidity and Capital Resources

Sysco's strategic objectives require continuing investment and our financial resources include cash provided by operations and access to capital from financial markets. Our operations historically have produced significant cash flow. Cash generated from operations is generally allocated to working capital requirements; investments in facilities, systems, fleet, other equipment and technology; acquisitions compatible with our overall growth strategy; and cash dividends. Any remaining cash generated from operations may be invested in high-quality, short-term instruments or applied toward the cost of the share repurchase program. As a part of our ongoing strategic analysis, we regularly evaluate business opportunities, including potential acquisitions and sales of assets and businesses, and our overall capital structure. Any transactions resulting from these evaluations may materially impact our liquidity, borrowing capacity, leverage ratios and capital availability.

Our liquidity and capital resources can be influenced by economic trends and conditions primarily due to their impact on our cash flows from operations. Weak economic conditions and low levels of consumer confidence and the resulting pressure on consumer disposable income can lower our sales growth and potentially our cash flows from operations. While these factors were present in fiscal 2012 to date and fiscal 2011, they had only a modest impact on our cash flows from operations in these periods due in large part to our working capital management. We do not believe current economic conditions will significantly impact our cash flows from operations in fiscal 2012, as we can respond to reduced consumer demand, if it were to occur, by

Table of Contents

lowering our working capital requirements. Additionally, approximately one-third of our customers are not impacted by general economic conditions to the same extent as restaurants and other food retailers. These customers include hospitals, nursing homes, schools and colleges. Product cost inflation can potentially lower our gross profit and cash flow from operations if we are unable to pass through all of the increased product costs with the same gross margin to our customers. This occurred in fiscal 2012 to date and fiscal 2011, as we were able to pass some, but not all, of our product cost increases on to our customers; however, we believe our mechanisms to manage product cost inflation, some of which are contractual, are sufficient to limit the impact on our cash flows from operations.

We believe that our cash flows from operations, the availability of additional capital under our existing commercial paper programs and bank lines of credit and our ability to access capital from financial markets, including issuances of debt securities, either privately or under our shelf registration statement filed with the Securities and Exchange Commission (SEC), will be sufficient to meet our anticipated cash requirements for the next twelve months and beyond, while maintaining sufficient liquidity for normal operating purposes. We believe that we will continue to be able to effectively access the commercial paper market and long-term capital markets, if necessary.

Operating Activities

We generated \$255.3 million in cash flow from operations in the first quarter of fiscal 2012, as compared to \$226.8 million in the first quarter of fiscal 2011.

Cash flow from operations in the first quarter of fiscal 2012 and the first quarter of fiscal 2011 was primarily generated by net earnings and non-cash depreciation and amortization expense and an increase in accrued income taxes. These increases were partially offset in both periods by changes in deferred tax assets and liabilities, an increase in accounts receivable balances, an increase in inventory balances and a decrease in accrued expenses.

The increases in accounts receivable balances for the first quarter of fiscal 2012 and fiscal 2011 were primarily due to the increase in sales in the first quarter as well as a seasonal change in volume and customer mix. Due to normal seasonal patterns, sales to multi-unit customers and school districts represented a larger percentage of our sales at the end of each first quarter as compared to the end of each prior fiscal year. Payment terms for these types of customers are traditionally longer than average. The increase in inventory balances for the first quarter of fiscal 2012 and fiscal 2011 was primarily due to the increase in sales in the quarter. The change in accounts payable balances for the first quarter of fiscal 2012 was not significant. The increase in accounts payable balances for the first quarter of fiscal 2011 was primarily due to the growth in inventory discussed above. In addition, accounts payable balances are impacted by many factors, including changes in product mix, cash discount terms and changes in payment terms with vendors.

Cash flow from operations was negatively impacted by decreases in accrued expenses of \$40.9 million for the first quarter of fiscal 2012 and \$124.6 million for the first quarter of fiscal 2011. The decreases in both periods were primarily due to the payment of the respective prior year annual incentive bonuses, partially offset by accruals for current year compensation incentives. A decrease in accrued interest also contributed to the overall decrease for both the first quarter of fiscal 2012 and the first quarter of 2011. Partially offsetting these decreases in the first quarter of fiscal 2012 is an increase in current multi-employer withdrawal liability, reclassified from other long-term liabilities due to the estimated timing of payment in fiscal 2012.

Cash flow from operations for the first quarter of fiscal 2012 was positively impacted by an increase in accrued income taxes of \$444.9 million, partially offset by changes in deferred tax assets and liabilities of \$290.7 million. Cash flow from operations for the first quarter of fiscal 2011 was positively impacted by an increase in accrued income taxes of \$342.1 million, partially offset by changes in deferred tax assets and liabilities of \$198.9 million. There were no payments related to the IRS settlement in the first quarter of fiscal 2012 or fiscal 2011. The changes in both the first quarter of fiscal 2012 and fiscal 2011 were impacted by the current tax provision and prior year extension payments. Total cash taxes paid were \$21.9 million and \$35.2 million in the first quarter of fiscal 2012 and 2011, respectively.

Other long-term liabilities increased \$10.9 million during the first quarter of fiscal 2012 primarily as a result of net company sponsored pension costs exceeding contributions to our company-sponsored pension plans during the period. Partially offsetting this increase was a reduction in long-term multi-employer withdrawal liability, reclassified to accrued expenses due to the estimated timing of payment in fiscal 2012. Other long-term liabilities increased \$47.0 million during the first quarter of fiscal 2011 primarily as a result of net company sponsored pension costs exceeding

contributions to our company-sponsored pension plans during the period.

Table of Contents

We recorded net company-sponsored pension costs of \$39.8 million and \$46.6 million in the first quarter of fiscal 2012 and fiscal 2011, respectively. Our contributions to our company-sponsored defined benefit plans were \$5.7 million and \$5.0 million in the first quarter of fiscal 2012 and fiscal 2011, respectively. In the fourth quarter of fiscal 2011, we made a \$140.0 million contribution to our Retirement Plan that would normally have been made in fiscal 2012. Additional contributions to our Retirement Plan are not currently anticipated in fiscal 2012; however, we will evaluate our funding position at the end of fiscal 2012 and select the timing for a contribution at that time.

Investing Activities

Capital expenditures in both the first quarter of fiscal 2012 and the first quarter of fiscal 2011 primarily included facility replacements and expansions, fleet replacements and investments in technology including \$45.2 million and \$52.7 million for our Business Transformation Project, respectively.

We expect total capital expenditures in fiscal 2012 to be in the range of \$700 million to \$750 million. Fiscal 2012 expenditures will include facility, fleet and other equipment replacements and expansions; new facility construction, including fold-out facilities; and investments in technology including our Business Transformation Project. Our estimate has been reduced from the estimates provided in our Fiscal 2011 Annual Report on Form 10-K due to a change in the timing of the construction of our third regional distribution center. Given current macroeconomic conditions, we continue to evaluate the appropriate time at which to begin construction.

During the first quarter of fiscal 2012, we paid cash of \$36.1 million for operations acquired.

Financing Activities

Shares repurchased during the first quarter of fiscal 2012 were 4,920,000 shares at a cost of \$133.4 million, as compared to 4,000,000 shares at a cost of \$116.7 million in the first quarter of fiscal 2011. An additional 2,270,000 shares were repurchased at a cost of \$59.9 million through October 29, 2011, resulting in a remaining authorization by our Board of Directors to repurchase up to 6,196,600 shares, based on the trades made through that date.

Dividends paid in the first quarter of fiscal 2012 were \$153.8 million, or \$0.26 per share, as compared to \$146.9 million, or \$0.25 per share, in the first quarter of fiscal 2011. In August 2011, we declared our regular quarterly dividend for the second quarter of fiscal 2012 of \$0.26 per share, which was paid in October 2011.

We have uncommitted bank lines of credit, which provide for unsecured borrowings for working capital of up to \$95.0 million, of which \$5.4 million was outstanding as of October 1, 2011. There were no such borrowings outstanding as of October 29, 2011.

On June 30, 2011, a Canadian subsidiary of Sysco entered into a short-term demand loan facility for the purpose of facilitating a distribution from the Canadian subsidiary to Sysco, and Sysco concurrently entered into an agreement with the bank to guarantee the loan. The amount borrowed was \$182.0 million and was repaid in full on July 4, 2011.

Sysco and one of our subsidiaries, Sysco International, ULC, have a revolving credit facility supporting our U.S. and Canadian commercial paper programs. The facility, in the amount of \$1.0 billion, expires on November 4, 2012, but is subject to extension.

There were \$108.0 million of commercial paper issuances outstanding as of October 1, 2011. As of October 29, 2011, there were \$351.0 million of commercial paper issuances outstanding. During the 13-week period ended October 1, 2011, aggregate commercial paper issuances and short-term bank borrowings ranged from zero to approximately \$401.8 million. During the first quarter of fiscal 2012 and 2011, our aggregate commercial paper issuances and short-term bank borrowings had a weighted average interest rate of 0.18% and 0.23%, respectively.

Included in current maturities of long-term debt as October 1, 2011 are the 6.10% senior notes totaling \$200.0 million, which mature in June 2012. These notes were issued by Sysco International, Co., a wholly-owned subsidiary of Sysco now known as Sysco International, ULC. It is our intention to fund the repayment of these notes at maturity through issuances of commercial paper, senior notes or a combination thereof.

Table of Contents*Other Considerations***Multiemployer Pension Plans**

As discussed in Note 11, Commitments and Contingencies, we contribute to several multiemployer defined benefit pension plans based on obligations arising under collective bargaining agreements covering union-represented employees.

Under current law regarding multiemployer defined benefit plans, a plan's termination, our voluntary withdrawal or the mass withdrawal of all contributing employers from any underfunded multiemployer defined benefit plan would require us to make payments to the plan for our proportionate share of the multiemployer plan's unfunded vested liabilities. Generally, Sysco does not have the greatest share of liability among the participants in any of the plans in which we participate. Based on the information available from plan administrators, which has valuation dates ranging from January 31, 2009 to December 31, 2010, we estimate our share of withdrawal liability on most of the multiemployer plans in which we participate could have been as much as \$210.0 million as of October 1, 2011 based on a voluntary withdrawal. This estimate excludes plans for which Sysco has recorded withdrawal liabilities. The majority of the plans we participate in have a valuation date of calendar year-end. As such, the majority of our estimated withdrawal liability results from plans for which the valuation date was December 31, 2009; therefore, our estimated liability reflects condition of the financial markets as of that date. Due to the lack of current information, we believe our current share of the withdrawal liability could materially differ from this estimate. In addition, if a multiemployer defined benefit plan fails to satisfy certain minimum funding requirements, the Internal Revenue Service (IRS) may impose a non-deductible excise tax of 5% on the amount of the accumulated funding deficiency for those employers contributing to the fund.

From time to time, we may voluntarily withdraw from multiemployer pension plans to minimize or limit our future exposure to these plans. As of October 1, 2011, we had approximately \$46.9 million in liabilities recorded related to certain multiemployer defined benefit plans for which our voluntary withdrawal had already occurred. Recorded withdrawal liabilities are estimated at the time of withdrawal based on the most recently available valuation and participant data for the respective plans; amounts are adjusted up to the period of payment to reflect any changes to these estimates. If any of these plans were to undergo a mass withdrawal, as defined by the Pension Benefit Guaranty Corporation, within a two year time frame from the point of our withdrawal, we could have additional liability. We do not currently believe any mass withdrawals are probable to occur in the applicable two year time frame relating to the plans from which we have voluntarily withdrawn.

Required contributions to multiemployer plans could increase in the future as these plans strive to improve their funding levels. In addition, the Pension Protection Act, enacted in August 2006, requires underfunded pension plans to improve their funding ratios within prescribed intervals based on the level of their underfunding. We believe that any unforeseen requirements to pay such increased contributions, withdrawal liability and excise taxes would be funded through cash flow from operations, borrowing capacity or a combination of these items.

BSCC Cooperative Structure

In the first quarter of fiscal 2010, Sysco reached a settlement with the IRS in connection with its audits of our 2003 through 2006 federal income tax returns. As a result of the settlement, we agreed to cease paying U.S. federal taxes related to our affiliate Baugh Supply Chain Cooperative (BSCC) on a deferred basis and pay the amounts that were recorded within deferred taxes related to BSCC over a three-year period as follows:

	(In thousands)
Fiscal 2010	\$ 528,000
Fiscal 2011	212,000
Fiscal 2012	212,000

As noted in the table above, payments related to the settlement were \$212.0 million in fiscal 2011, none of which had been paid in the first quarter of fiscal 2011. Amounts to be paid in fiscal 2012 will occur in connection with Sysco's quarterly tax payments, two of which fall in the second quarter, one in the third quarter and one in the fourth quarter. The company believes it has access to sufficient cash on hand, cash flow from operations and current access

to capital to make payments on all of the amounts noted above.

Table of Contents

Contractual Obligations

Our Annual Report on Form 10-K for the fiscal year ended July 2, 2011 contains a table that summarizes our obligations and commitments to make contractual future cash payments as of July 2, 2011. Since July 2, 2011, there have been no material changes to our contractual obligations.

Critical Accounting Policies and Estimates

Critical accounting policies and estimates are those that are most important to the portrayal of our financial position and results of operations. These policies require our most subjective or complex judgments, often employing the use of estimates about the effect of matters that are inherently uncertain. Sysco's most critical accounting policies and estimates include those that pertain to the allowance for doubtful accounts receivable, self-insurance programs, pension plans, income taxes, vendor consideration, accounting for business combinations and share-based compensation, which are described in Item 7 of our Annual Report on Form 10-K for the year ended July 2, 2011.

Forward-Looking Statements

Certain statements made herein that look forward in time or express management's expectations or beliefs with respect to the occurrence of future events are forward-looking statements under the Private Securities Litigation Reform Act of 1995. They include statements about:

Sysco's ability to increase its sales and market share and grow earnings;

the continuing impact of economic conditions on consumer confidence and our business;

sales and expense trends including expectations regarding pay-related expenses and pension costs;

fuel costs and expectations regarding the use of fuel surcharges;

expectations regarding the impact of adjustments to the carrying value of our COLI policies;

expectations regarding operating income and sales for our business segments;

anticipated multiemployer pension-related liabilities and contributions to various multiemployer pension plans, and the source of funds for any such contributions;

expected implementation, costs and benefits of the ERP system within our Business Transformation Project;

estimated expenses and capital expenditures related to our Business Transformation Project in fiscal 2012;

our ability to respond to reduced consumer demand, if it were to occur, by lowering our working capital requirements;

the sufficiency of our mechanisms for managing product cost inflation;

expectations regarding capital expenditures in fiscal 2012;

source and adequacy of funds for required payments under the IRS settlement;

anticipated company-sponsored pension plan contributions;

Sysco's ability to meet future cash requirements, including the ability to access debt markets effectively, and remain profitable;

the impact of ongoing legal proceedings; and

our plan to continue to explore appropriate opportunities to profitably grow market share and create shareholder value through adjacent and international businesses.

These statements are based on management's current expectations and estimates; actual results may differ materially due in part to the risk factors set forth below and those discussed in Item 1A of our Annual Report on Form 10-K for the fiscal year ended July 2, 2011:

risks relating to difficult economic conditions and heightened uncertainty in the financial markets and their effect on consumer confidence;

periods of significant or prolonged inflation or deflation and their impact on our product costs and profitability;

risks related to our Business Transformation Project, including the risk that the project may not be successfully implemented, may not prove cost effective and may have a material adverse effect on our liquidity and results of operations;

the risk that we may not be able to compensate for increases in fuel costs;

the risk of interruption of supplies due to lack of long-term contracts, severe weather or more prolonged climate change, work stoppages or otherwise;

the risk that we fail to comply with requirements imposed by applicable law or government regulations;

the potential impact of product liability claims and adverse publicity;

the risk that competition in our industry may impact our gross profit or customer retention;

Table of Contents

difficulties in successfully entering and operating in international markets and complimentary lines of business;

the successful completion of acquisitions and integration of acquired companies, as well as the risk that acquisitions could require additional debt or equity financing and negatively impact our stock price or operating results;

Sysco's leverage and debt risks, capital and borrowing needs and changes in interest rates;

our dependence on technology and the reliability of our technology network;

the risk that other sponsors of our multiemployer pension plans will withdraw or become insolvent;

that the IRS may impose an excise tax on the unfunded portion of our multiemployer pension plans or that the Pension Protection Act could require that we make additional pension contributions;

the impact of financial market changes on the assets held by our company-sponsored Retirement Plan and by the multiemployer pension plans in which we participate;

labor issues, including the renegotiation of union contracts and shortage of qualified labor; and

the risk that the anti-takeover benefits provided by our preferred stock may not be viewed as beneficial to stockholders.

For a more detailed discussion of factors that could cause actual results to differ from those contained in the forward-looking statements, see the risk factors discussion contained in Item 1A of our Annual Report on Form 10-K for the fiscal year ended July 2, 2011.

Item 3. *Quantitative and Qualitative Disclosures about Market Risk*

Our market risks consist of interest rate risk, foreign currency exchange rate risk, fuel price risk and investment risk. For a discussion on our exposure to market risk, see Part II, Item 7A, *Quantitative and Qualitative Disclosures about Market Risks* in our Annual Report on Form 10-K for the fiscal year ended July 2, 2011. There have been no significant changes to our market risks since July 2, 2011 except as noted below.

Interest Rate Risk

At October 1, 2011, we had \$108.0 million of commercial paper issuances outstanding. Total debt as of October 1, 2011 was \$2.6 billion, of which approximately 77% was at fixed rates of interest, including the impact of our interest rate swap agreements.

In fiscal 2010, we entered into two interest rate swap agreements that effectively converted \$250 million of fixed rate debt maturing in fiscal 2013 (the fiscal 2013 swap) and \$200 million of fixed rate debt maturing in fiscal 2014 (the fiscal 2014 swap) to floating rate debt. These transactions were entered into with the goal of reducing overall borrowing cost. The major risks from interest rate derivatives include changes in interest rates affecting the fair value of such instruments, potential increases in interest expense due to market increases in floating interest rates and the creditworthiness of the counterparties in such transactions. These transactions were designated as fair value hedges since the swaps hedge against the changes in fair value of fixed rate debt resulting from changes in interest rates.

As of October 1, 2011, the fiscal 2013 swap was recognized as an asset within the consolidated balance sheet at fair value within other assets of \$5.2 million. The fixed interest rate on the hedged debt is 4.2% and the floating interest rate on the swap is three-month LIBOR which resets quarterly. As of October 1, 2011, the fiscal 2014 swap was recognized as an asset within the consolidated balance sheet at fair value within other assets of \$8.1 million. The fixed interest rate on the hedged debt is 4.6% and the floating interest rate on the swap is three-month LIBOR which resets quarterly.

Fuel Price Risk

Due to the nature of our distribution business, we are exposed to potential volatility in fuel prices. The price and availability of diesel fuel fluctuates due to changes in production, seasonality and other market factors generally outside of our control. During the first quarter of fiscal 2012 and fiscal 2011, fuel costs related to outbound deliveries represented approximately 0.7%, and 0.6% of sales, respectively.

We routinely enter into forward purchase commitments for a portion of our projected monthly diesel fuel requirements. As of October 1, 2011, we had forward diesel fuel commitments totaling approximately \$92 million through September 2012. These contracts will lock in the price of approximately 30% to 35% of our fuel purchase needs for the contracted periods at

Table of Contents

prices lower than the current market price for diesel for second quarter of fiscal 2012 and near the current market price for diesel for the remainder of the fiscal year.

Item 4. Controls and Procedures

Sysco's management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures as of October 1, 2011. The term "disclosure controls and procedures," as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding the required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Sysco's disclosure controls and procedures have been designed to provide reasonable assurance of achieving their objectives. Based on the evaluation of our disclosure controls and procedures as of October 1, 2011, our chief executive officer and chief financial officer concluded that, as of such date, Sysco's disclosure controls and procedures were effective at the reasonable assurance level.

No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended October 1, 2011 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II OTHER INFORMATION**Item 1. *Legal Proceedings*

None.

Item 1A. *Risk Factors*

The information set forth in this report should be read in conjunction with the risk factors discussed in Item 1A of our Annual Report on Form 10-K for the year ended July 2, 2011, which could materially impact our business, financial condition or future results.

Item 2. *Unregistered Sales of Equity Securities and Use of Proceeds*

We made the following share repurchases during the first quarter of fiscal 2012:

ISSUER PURCHASES OF EQUITY SECURITIES

Period	(a) Total Number of Shares Purchased⁽¹⁾	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
Month #1 July 3 July 30	76,610	\$ 31.35		13,386,600
Month #2 July 31 August 27	372,372	27.13	355,000	13,031,600
Month #3 August 28 October 1	4,569,349	27.11	4,565,000	8,466,600
Total	5,018,331	\$ 27.18	4,920,000	8,466,600

(1) The total number of shares purchased includes 76,610, 17,372 and 4,349 shares tendered by individuals in connection with stock option exercises in Month #1, Month #2 and Month #3, respectively. All other shares were purchased pursuant to the publicly announced program described below.

On August 27, 2010, the Board of Directors approved the repurchase of 20,000,000 shares. Pursuant to the repurchase program, shares may be acquired in the open market or in privately negotiated transactions at the company's discretion, subject to market conditions and other factors.

In July 2004, the Board of Directors authorized us to enter into agreements from time to time to extend our ongoing repurchase program to include repurchases during company announced blackout periods of such securities in compliance with Rule 10b5-1 promulgated under the Exchange Act.
