COEUR REPORTS SECOND QUARTER 2004 AND FIRST SIX MONTHS FINANCIAL RESULTS

COEUR D'ALENE, Idaho August 9, 2004 Coeur d'Alene Mines Corporation (NYSE:CDE), the world's largest primary silver producer and a growing gold producer, today reported results for the second quarter and first six months of 2004. Coeur also announced that it expects to restate results of operations for the year 2003 and the first quarter of 2004, to reflect an increase in revenues and reduction of net loss by approximately \$1.2 million and \$1.3 million, respectively from the amounts previously reported. The restatements were the result of an error relating to the timing of Coeur's accounting for price changes related to sales of concentrate pursuant to certain contracts.

[Text redacted]

Coeur has called the restatement to the attention of the Securities and Exchange Commission in connection with its pending registration statement that pertains to the proposed acquisition of Wheaton River Minerals, and is in the process of reviewing the restatement with staff of the Commission and Coeur's independent auditors. As the result, Coeur noted that the auditors have not yet completed their audit and review of the restatements.

Wheaton River tender offer

Coeur commenced mailing its tender offer documents to U.S. shareholders of Wheaton River Minerals Ltd. (TSX:WRM, AMEX:WHT) on July 13, 2004. In connection with its offer, Coeur has filed a Registration Statement on Form S-4 with the United States Securities and Exchange Commission. Commencement of the offer to residents of Canada has been delayed by the need to provide additional information required by Canadian law (and, in Quebec, in the French language) and by the accounting restatement described above. Coeur will commence the offer in Canada promptly following the filing of its quarterly report on Form 10Q for the three months ended June 30, 2004. The expiration date of the offer will be amended so that it is at least 35 days from commencement of the offer in Canada.

A Coeur-Wheaton River combination will create the fourth largest North American precious metals company, enhance Coeur's position as the world's largest primary silver producer, increase our silver production by 50 percent, and create a top 10 global gold producer with among the lowest cash costs and one of the highest growth rates in the industry. The offer provides the shareholders of both

companies a unique opportunity to create a leader in the precious metals industry both from a financial and operating perspective, Mr. Wheeler said.

Under Coeur's offer, Wheaton River shareholders may elect to receive for each share of Wheaton River common stock tendered:

Up to Cdn\$5.47 in cash, subject to proration if Wheaton River shareholders request in the aggregate more than Cdn\$570 million; or

0.796 shares of Coeur common stock; or

0.796 exchangeable shares of a Canadian subsidiary of Coeur, which are exchangeable, upon the terms described in the offer documents, for common stock of Coeur on a one-for-one basis.

The offer is subject to customary conditions, including: (i) the tendering of at least 66 2/3% of the issued and outstanding Wheaton River common shares; (ii) the approval by Coeur shareholders of certain terms of the transaction, including the adoption of a reorganization of Coeur, an amendment to Coeur's certificate of incorporation to increase Coeur's authorized capital and the issuance of shares of Coeur common stock in the transactions; (iii) receipt of all necessary regulatory approvals; and (iv) the absence of any material adverse change relating to Wheaton River. Coeur intends to solicit the requisite approval from its shareholders in September.

Coeur's offer represents a premium of approximately 13% to Wheaton River's closing share price as of August 6, 2004, assuming all shareholders elect to receive cash.

Cautionary Statement

(1) The potential quantity and grade of the mineral deposits that are to be targets of further exploration at Cerro Bayo, Martha, and Silver Valley are conceptual in nature. There has been insufficient exploration to define the mineral resources on these properties although work is continuing and it is uncertain if further exploration work will result in discovery of the mineral resources.

(2) Additional information on the geology, exploration activities, and drilling and analysis procedures on Coeur's material properties will be filed with the U.S. Securities and Exchange Commission and the Canadian Provincial securities regulatory authorities as part of the Wheaton offer.

The United States Securities and Exchange Commission permits mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We use the term

resource in this press release which the SEC guidelines strictly prohibit us from including in our filings with the SEC. Investors are urged to consider closely the disclosure in our Form 10-K for the year ended December 31, 2003 and Form

10-Q for the quarter ended March 31, 2004. You can review and obtain copies of these filings as well as an amendment to the Form 10-Q restating the financial statements to revise the valuation of pending metal sales as explained in that amendment from the SEC website at <http://www.sec.gov/edgar.html>.
