**QUOVADX TO ACQUIRE CARESCIENCE IN STOCK AND CASH EXCHANGE
OFFER VALUED AT \$2.09 PER SHARE**

*- Strengthens Quovadx's Leadership in the Healthcare Industry -
- Acquisition Expected to be Accretive to Quovadx Earnings in 2004 -*

ENGLEWOOD, CO, and PHILADELPHIA, PA, August 14, 2003 Quovadx, Inc. (Nasdaq: QVDX), a global platform software and vertical solutions company, and CareScience, Inc., (Nasdaq: CARE), one of the nation's leading healthcare management companies, today announced a definitive agreement regarding the acquisition of CareScience by Quovadx. The acquisition, structured as an exchange offer, consists of \$1.40 in cash and 0.1818 of a share of Quovadx common stock for each share of CareScience common stock. Based on yesterday's closing price of Quovadx stock, the aggregate consideration is valued at \$2.09 per share. The total value of the transaction, including approximately \$14 million of acquired cash, net of debt, is \$28 million. The transaction value, net of acquired cash and debt, is \$14 million. CareScience's products and clinical solutions will fortify Quovadx's industry leading healthcare offerings and provide significant capabilities in the growing care management market sector. They bring a highly visible, high margin, recurring revenue model to Quovadx, with total backlog, which represents unrecognized revenue on signed customer contracts, equal to \$33.2 million at June 30, 2003.

Our acquisition of CareScience and their expertise in care management and clinical knowledge is a natural extension to our medical management product offerings in the healthcare provider and payer segments, said Lorine Sweeney, president and chief executive officer of Quovadx. We are a recognized leader in helping companies improve business processes and achieve competitive process advantage. This transaction solidifies our leadership position in the large and growing healthcare market and extends our reach in the clinical process improvement and care management arenas.

CareScience offers products and services that help hospitals and health systems improve patient throughput, reduce complications and medical errors, increase compliance with evidence based medicine and enable within and beyond enterprise data access through the use of their proprietary analysis techniques and collaboration tools. As an application service provider, they currently support more than 170 provider organizations in 34 states. The combination of CareScience's care management offerings with Quovadx's integration capabilities and interface and workflow engines will provide customers with real time and population-based data for integrated care management decision-making.

Quovadx offers an industry leading technology platform, including integration technology and workflow support with a world class healthcare customer base, said Dr. Ronald Paulus, president and chief executive officer of CareScience. Blending our clinical process management expertise with their proven technology will deliver an even more compelling and robust care management offering to our customers.

I'm excited to welcome the CareScience team to the Quovadx family, stated Ms. Sweeney. They will be a valuable addition and I look forward to working with them to ensure a rapid completion of this transaction and a smooth transition.

Quovadx expects the acquisition to be accretive to earnings in 2004 as a result of cost savings, cross-selling opportunities and incremental revenue streams resulting from the companies' complementary products. CareScience's products are offered on subscription

contracts for three to five-year terms. At June 30, 2003, their total backlog was \$33.2 million, a 31% increase over backlog of \$25.4 million at December 31, 2002.

Under the terms of the merger agreement, Quovadx will commence an exchange offer for the outstanding shares of CareScience stock. The offer is subject to certain conditions, as will be described in the offer to purchase, letter of transmittal and related documents. The exchange offer is expected to close in the fourth quarter of 2003. The acquisition has been approved by the board of directors of each company. First Albany Corporation acted as financial advisor to Quovadx, Inc. William Blair & Company acted as financial advisor to CareScience, Inc.
